.A101 *Maintenance of integrity of significant assumptions and the data used in applying the method (Ref: par. .22*e*).* Maintaining the integrity of significant assumptions and the data in applying the method refers to the maintenance of the accuracy and completeness of the data and assumptions through all stages of information processing. A failure to maintain such integrity may result in corruption of the data, and assumptions and may give rise to misstatements. In this regard, relevant considerations for the auditor may include whether the data and assumptions are subject to all changes intended by management, and not subject to any unintended changes, during activities such as input, storage, retrieval, transmission, or processing.

Significant Assumptions (Ref: par. .23)

.A102 Relevant considerations for the auditor regarding the appropriateness of the significant assumptions in the context of the applicable financial reporting framework and, if applicable, the appropriateness of changes from the prior period may include the following:

- Management's rationale for the selection of the assumption.
- Whether the assumption is appropriate in the circumstances given the nature of the accounting estimate, the requirements of the applicable financial reporting framework, and the business, industry, and environment in which the entity operates.
- Whether a change from prior periods in selecting an assumption is based on new circumstances or new information. When it is not, the change may not be reasonable nor in compliance with the applicable financial reporting framework. Arbitrary changes in an accounting estimate may give rise to material misstatements of the financial statements or may be an indicator of possible management bias. (See paragraphs .A133–.A136.)

.A103 Management may evaluate alternative assumptions or outcomes of accounting estimates, which may be accomplished through a number of approaches depending on the circumstances. One possible approach is a sensitivity analysis. This might involve determining how the monetary amount of an accounting estimate varies with different assumptions. Even for accounting estimates measured at fair value, there may be variation because different market participants will use different assumptions. A sensitivity analysis may lead to the development of a number of outcome scenarios, sometimes characterized as a range of outcomes by management, including "pessimistic" and "optimistic" scenarios.

.A104 Through the knowledge obtained in performing the audit, the auditor may become aware of or may have obtained an understanding of assumptions used in other areas of the entity's business. Such matters may include, for example, business prospects, assumptions in strategy documents, and future cash flows. Also, if the engagement partner has performed other engagements for the entity, section 315[55] requires the engagement partner to consider whether information obtained from those other engagements is relevant to identifying risks of material misstatement. This information may also be useful to consider in addressing whether significant assumptions are consistent with each other and with those used in other accounting estimates.

.A105 The appropriateness of the significant assumptions in the context of the requirements of the applicable financial reporting framework may depend on management's intent and ability to carry out certain courses of action. Management often documents plans and

[55]Paragraph .08 of section 315. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

intentions relevant to specific assets or liabilities, and the applicable financial reporting framework may require management to do so. The nature and extent of audit evidence to be obtained about management's intent and ability is a matter of professional judgment. When applicable, the auditor's procedures may include the following:

- Review of management's history of carrying out its stated intentions
- Inspection of written plans and other documentation, including, when applicable, formally approved budgets, authorizations, or minutes
- Inquiry of management about its reasons for a particular course of action
- Review of events occurring subsequent to the date of the financial statements and up to the date of the auditor's report
- Evaluation of the entity's ability to carry out a particular course of action given the entity's economic circumstances, including the implications of its existing commitments and legal, regulatory, or contractual restrictions that could affect the feasibility of management's actions
- Consideration of whether management has met the applicable documentation requirements, if any, of the applicable financial reporting framework

Certain financial reporting frameworks, however, may not permit management's intentions or plans to be taken into account when making an accounting estimate. This is often the case for fair value accounting estimates because their measurement objective requires that significant assumptions reflect those used by market participants.

.A106 *Data (Ref: par. .24*a*).* Relevant considerations for the auditor regarding the appropriateness of the data selected for use in the context of the applicable financial reporting framework and, if applicable, the appropriateness of the changes from the prior period may include the following:

- Management's rationale for the selection of the data.
- Whether the data is appropriate in the circumstances given the nature of the accounting estimate, the requirements of the applicable financial reporting framework, and the business, industry, and environment in which the entity operates.
- Whether the change from prior periods in the sources or items of data selected or data selected is based on new circumstances or new information. When it is not, it is unlikely to be reasonable nor in compliance with the applicable financial reporting framework. Arbitrary changes in an accounting estimate result in inconsistent financial statements over time and may give rise to financial statement misstatements or may be an indicator of possible management bias. (See paragraphs .A133–.A136.)

.A107 *Relevance and reliability of the data (Ref: par. .24*c*).* Section 500 requires the auditor to evaluate information to be used as audit evidence by taking into account, among other things, the relevance and reliability of the information, including its source. The auditor's evaluation of such information to be used as audit evidence is required to include evaluating whether the information is sufficiently precise and detailed for the auditor's purposes and obtaining audit evidence about the accuracy and completeness of the information, as necessary.[56]Paragraphs .A126–.A129 provide further guidance related to evaluating information from external information sources. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

.A108 *Complex legal or contractual terms (Ref: par. .24*d*).* Procedures that the auditor may consider when the accounting estimate is based on complex legal or contractual terms include the following:

- Considering whether specialized skills or knowledge are needed to understand or interpret the contract
- Inquiring of the entity's legal counsel regarding the legal or contractual terms
- Inspecting the underlying contracts to
  - — evaluate the underlying business purpose for the transaction or agreement, and
  - — consider whether the terms of the contracts are consistent with management's explanations.

Management's Selection of a Point Estimate and Related Disclosures About Estimation Uncertainty

.A109 *Management's steps to understand and address estimation uncertainty (Ref: par. .25*a*).* *Estimation uncertainty* is the susceptibility to an inherent lack of precision in measurement. This arises when the required monetary amount for a financial statement item cannot be measured with precision through direct observation of the cost or price. The susceptibility to a lack of precision in measurement is often referred to in accounting frameworks as *measurement uncertainty*. Relevant considerations regarding whether management has taken appropriate steps to understand and address estimation uncertainty may include whether management has

a. understood the estimation uncertainty, by identifying the sources, and assessing the degree of inherent variability in the measurement outcomes and the resulting range of reasonably possible measurement outcomes;

b. identified the degree to which, in the measurement process, complexity or subjectivity affect the risk of material misstatement, and addressed the resulting potential for misstatement by applying

   i. appropriate skills and knowledge in making accounting estimates, and

   ii. professional judgment, including identifying and addressing susceptibility to management bias; and

[56]Paragraphs .07–.08 of section 500. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

c. addressed estimation uncertainty through appropriately selecting management's point estimate and related disclosures that describe the estimation uncertainty.

.A110 *The selection of management's point estimate and related disclosures of estimation uncertainty (Ref: par. .25*b*).* Matters that may be relevant regarding the selection of management's point estimate and the development of related disclosures about estimation uncertainty include whether

- the methods and data used were selected appropriately, including when alternative methods for making the accounting estimate and alternative sources of data were available.
- valuation attributes used were appropriate and complete.
- the assumptions used were selected from a range of reasonably possible amounts and were supported by appropriate data that is relevant and reliable.
- the data used was appropriate, relevant, and reliable, and the integrity of that data was maintained.
- the calculations were applied in accordance with the method and were mathematically accurate.
- management's point estimate is appropriately chosen from the reasonably possible measurement outcomes.
- the related disclosures appropriately describe the amount as an estimate and explain the nature and limitations of the estimation process, including the variability of the reasonably possible measurement outcomes.

.A111 Relevant considerations for the auditor regarding the appropriateness of management's point estimate may include the following:

- When the requirements of the applicable financial reporting framework prescribe the point estimate that is to be used after consideration of the alternative outcomes and assumptions, or prescribes a specific measurement method, whether management has followed the requirements of the applicable financial reporting framework
- When the applicable financial reporting framework has not specified how to select an amount from reasonably possible measurement outcomes, whether management has exercised judgment, taking into account the requirements of the applicable financial reporting framework

.A112 Relevant considerations for the auditor regarding management's disclosures about estimation uncertainty include the requirements of the applicable financial reporting framework, which may require disclosures

- that describe the amount as an estimate and explain the nature and limitations of the process for making it, including the variability in reasonably possible measurement outcomes. The framework also may require additional disclosures to meet a disclosure objective.[57]

- about significant accounting policies related to accounting estimates. Depending on the circumstances, relevant accounting policies may include matters such as the specific principles, bases, conventions, rules, and practices applied in preparing and presenting accounting estimates in the financial statements.
- about significant or critical judgments (for example, those that had the most significant effect on the amounts recognized in the financial statements) as well as significant forward-looking assumptions or other sources of estimation uncertainty.

In certain circumstances, additional disclosures beyond those explicitly required by the financial reporting framework may be needed in order to achieve fair presentation, or in the case of a compliance framework, for the financial statements not to be misleading.

.A113 The greater the degree to which an accounting estimate is subject to estimation uncertainty, the more likely the risks of material misstatement will be assessed as higher and, therefore, the more persuasive the audit evidence needs to be to determine, in accordance with paragraph .35, whether management's point estimate and related disclosures about estimation uncertainty are reasonable in the context of the applicable financial reporting framework, or are misstated.

.A114 If the auditor's consideration of estimation uncertainty associated with an accounting estimate, and its related disclosure, is a matter that required significant auditor attention, then this may constitute a key audit matter.[58]

When Management Has Not Taken Appropriate Steps to Understand and Address Estimation Uncertainty (Ref: par. .26)

.A115 When the auditor determines that management has not taken appropriate steps to understand and address estimation uncertainty, additional procedures that the auditor may request management to perform to understand estimation uncertainty may include, for example, consideration of alternative assumptions or the performance of a sensitivity analysis.

.A116 In considering whether it is practicable to develop a point estimate or range, matters that the auditor may need to take into account include whether the auditor could do so without impairing independence.[59] This may include relevant ethical requirements that address prohibitions on assuming management responsibilities.

.A117 If, after considering management's response, the auditor determines that it is not practicable to develop an auditor's point estimate or range, the auditor is required to

---

[57]Paragraph 1A of FASB ASC 820-10-50. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

[58]See section 701, *Communicating Key Audit Matters in the Independent Auditor's Report*. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

[59]See management responsibilities in the "Nonattest Services" interpretation (ET sec. 1.295) under the "Independence Rule" (ET sec. 1.200) of the AICPA Code of Professional Conduct. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

evaluate the implications for the audit or the auditor's opinion on the financial statements in accordance with paragraph .34.

*Developing an Auditor's Point Estimate or Using an Auditor's Range (Ref: **par. .27–.28**)*

.A118 Developing an auditor's point estimate or range to evaluate management's point estimate and related disclosures about estimation uncertainty may be an appropriate approach when, for example

- the auditor's review of similar accounting estimates made in the prior-period financial statements suggests that management's current period process is not expected to be effective.
- the entity's controls within and over management's process for making accounting estimates are not well-designed or properly implemented.
- events or transactions between the period-end and the date of the auditor's report have not been properly taken into account, when it is appropriate for management to do so, and such events or transactions appear to contradict management's point estimate.
- there are appropriate alternative assumptions or sources of relevant data that can be used in developing an auditor's point estimate or a range.
- management has not taken appropriate steps to understand or address the estimation uncertainty (see paragraph .26).

.A119 The decision to develop a point estimate or range also may be influenced by the applicable financial reporting framework, which may prescribe the point estimate that is to be used after consideration of the alternative outcomes and assumptions, or prescribe a specific measurement method (for example, the use of a discounted probability-weighted expected value or the most likely outcome).

.A120 The auditor's decision about whether to develop a point estimate, rather than a range, may depend on the nature of the estimate and the auditor's judgment in the circumstances. For example, the nature of the estimate may be such that there is expected to be less variability in the reasonably possible outcomes. In these circumstances, developing a point estimate may be an effective approach, particularly when it can be developed with a higher degree of precision.

.A121 The auditor may develop a point estimate or a range in a number of ways, for example, by

- using a different model than the one used by management, for example, one that is commercially available for use in a particular sector or industry, or a proprietary or auditor-developed model.
- using management's model but developing alternative assumptions or data sources to those used by management.

- using the auditor's own method but developing alternative assumptions to those used by management.
- employing or engaging a person with specialized expertise to develop or execute a model, or to provide relevant assumptions.
- considering other comparable conditions, transactions, or events, or, where relevant, markets for comparable assets or liabilities.

.A122 The auditor also may develop a point estimate or range for only part of the accounting estimate (for example, for a particular assumption or when only a certain part of the accounting estimate is giving rise to the risk of material misstatement).

.A123 When using the auditor's own methods, assumptions, or data to develop a point estimate or range, the auditor may obtain evidence about the appropriateness of management's methods, assumptions, or data. For example, if the auditor uses the auditor's own assumptions in developing a range to evaluate the reasonableness of management's point estimate, the auditor may also develop a view about whether management's judgments in selecting the significant assumptions used in making the accounting estimate give rise to indicators of possible management bias.

.A124 The requirement in paragraph .28*a* for the auditor to determine that the range includes only amounts that are supported by sufficient appropriate audit evidence does not mean that the auditor is expected to obtain audit evidence to support each possible outcome in the range individually. Rather, the auditor is likely to obtain evidence to determine that the points at both ends of the range are reasonable in the circumstances, thereby supporting that amounts falling between those two points also are reasonable.

.A125 The size of the auditor's range may be multiples of materiality for the financial statements as a whole, particularly when materiality is based on operating results (for example, pre-tax income), and this measure is relatively small in relation to assets or other balance sheet measures. This situation is more likely to arise in circumstances in which the estimation uncertainty associated with the accounting estimate is itself multiples of materiality, which is more common for certain types of accounting estimates in which a high degree of estimation uncertainty is more typical, and there may be specific requirements in the applicable financial reporting framework in that regard. Based on the procedures performed and audit evidence obtained in accordance with the requirements of this section, the auditor may conclude that a range that is multiples of materiality is, in the auditor's judgment, appropriate in the circumstances. When this is the case, the auditor's evaluation of the reasonableness of the disclosures about estimation uncertainty becomes increasingly important, particularly whether such disclosures appropriately convey the high degree of estimation uncertainty and the range of possible outcomes. Paragraphs .A139–.A144 include additional considerations that may be relevant in these circumstances.

Other Considerations Relating to Audit Evidence (Ref: par. .30)

.A126 Information to be used as audit evidence, regarding risks of material misstatement relating to accounting estimates, may have been produced by the entity, prepared using the work of a management's specialist, or provided by an external information source.

External Information Sources

.A127 As explained in section 500, the reliability of evidence depends on the nature and source of the audit evidence and the circumstances under which it is obtained. Generally, the reliability of audit evidence increases when it is obtained from external parties because the information is less susceptible to management bias.[60] Consequently, the nature and extent of the auditor's further audit procedures to consider the reliability of the information used in making an accounting estimate may vary depending on the nature of these factors. Examples follow:

- When market or industry data is obtained from a single external information source specializing in such information, the auditor may seek data from an alternative independent source with which to compare.
- When market or industry data, prices, or pricing-related data are obtained from multiple independent external information sources and points to consensus across those sources, the auditor may need to obtain less evidence about the reliability of the data from an individual source.
- When information obtained from multiple information sources points to divergent market views, the auditor may seek to understand the reasons for the diversity in views. The diversity may result from the use of different methods, assumptions, or data. For example, one source may be using current prices, and another may be using future prices. When the diversity relates to estimation uncertainty, the auditor is required by paragraph .26*b* of this section to obtain sufficient appropriate audit evidence about whether, in the context of the applicable financial reporting framework, the disclosures in the financial statements that describe the estimation uncertainty are reasonable. In such cases, professional judgment is also important in considering information about the methods, assumptions, or data applied.
- When information obtained from an external information source has been developed by that source using its own models (for example, for a derivative instrument or security, a pricing model or cash flow projection model), Statement on Auditing Standards (SAS) No. 142, *Audit Evidence* (sec. 500),[61] provides relevant guidance for the auditor.
- When, for derivative instruments or securities, a pricing source has a relationship with an entity that might impair its objectivity, such as an affiliate or a counterparty involved in selling or structuring the product, the auditor may determine that it is necessary to obtain estimates from more than one pricing source.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

---

[60]Paragraph .A22 and appendix A, "Considerations Regarding the Use of External Information Sources," of section 500. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

[61]Appendix A of section 500. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

.A128 For fair value accounting estimates, additional considerations of the relevance and reliability of information obtained from external information sources may include the following:

a. Whether fair values are based on trades of the same instrument or active market quotations

b. When the fair values are based on transactions of comparable assets or liabilities, how those transactions are identified and considered comparable

c. When there are no transactions either for the asset or liability or comparable assets or liabilities, how the information was developed, including whether the inputs developed and used represent the assumptions that market participants would use when pricing the asset or liability, if applicable

Examples of sources relating to (*a*) and (*b*) for derivative instruments and securities listed on national exchanges or over-the-counter (OTC) markets include financial publications, the exchanges, NASDAQ, or pricing services based on sources such as those. For derivative instruments and securities, if quoted market prices are not available, estimates of fair value frequently may be obtained from, for example, broker-dealers or other third-party sources, based on proprietary valuation models, or from the entity, based on internally or externally developed valuation models (for example, the Black-Scholes option-pricing model). Examples of broker quotes for certain derivative instruments and securities include quoted market prices obtained from broker-dealers who are market makers in such derivative instruments and securities or through electronic quotation and trading systems for OTC securities. However, using such a price quote to test valuation assertions may require special knowledge to understand the circumstances in which the quote was developed. For example, quotations published by electronic quotation and trading systems for OTC securities may not be based on recent trades and may be only an indication of interest and not an actual price for which a counterparty will purchase or sell the underlying derivative instrument or security. Appendix C, "Use of Pricing Information From Third Parties as Audit Evidence," provides further guidance on the use of pricing information from third parties, including brokers or dealers, as audit evidence. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

.A129 When information from an external information source is used as audit evidence, a relevant consideration for the auditor may be whether information can be obtained, or whether the information is sufficiently detailed, to understand the methods, assumptions, and other data used by the external information source. This may be limited in some respects and consequently influence the auditor's consideration of the nature, timing, and extent of procedures to perform. For example, pricing services often provide information about their methods and assumptions by asset class, rather than individual securities. Brokers often provide only limited information about their inputs and assumptions when providing broker-indicative quotes for individual securities. Section 500[62] provides guidance with respect to restrictions placed by the external information source on the provision of supporting information.

[62] Appendix A of section 500. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

Management's Specialist

.A130 Assumptions relating to accounting estimates that are made or identified by a management's specialist become management's assumptions when used by management in making an accounting estimate. Accordingly, the auditor applies the relevant requirements in this section to those assumptions.

.A131 If the work of a management's specialist involves the use of methods or sources of data relating to accounting estimates, or developing or providing findings or conclusions relating to a point estimate or related disclosures for inclusion in the financial statements, the requirements in paragraphs .21–.29 of this section may assist the auditor in applying the requirements in section 501 relating to the use of management's specialists.[63]

Service Organizations

.A132 Section 402, *Audit Considerations Relating to an Entity Using a Service Organization*, deals with the auditor's understanding of the services provided by a service organization, including internal control, as well as the auditor's responses to assessed risks of material misstatement. When the entity uses the services of a service organization in making accounting estimates, the requirements and guidance in section 402 may assist the auditor in applying the requirements of this section.

Indicators of Possible Management Bias (Ref: par. .32)

.A133 Management bias may be difficult to detect at an account level and may only be identified by the auditor when considering groups of accounting estimates, all accounting estimates in aggregate, or when observed over a number of accounting periods. For example, if accounting estimates included in the financial statements are considered to be individually reasonable but management's point estimates consistently trend toward one end of the auditor's range of reasonable outcomes that provide a more favorable financial reporting outcome for management, such circumstances may indicate possible bias by management.

.A134 Examples of indicators of possible management bias with respect to accounting estimates include the following:

- Changes in an accounting estimate, or the method for making it, when management has made a subjective assessment that there has been a change in circumstances
- Selection or development of significant assumptions or the data that yield a point estimate favorable for management objectives
- Selection of a point estimate that may indicate a pattern of optimism or pessimism

When such indicators are identified, there may be a risk of material misstatement either at the assertion or financial statement level. Indicators of possible management bias

---

[63]Paragraph .27*c* of section 501, as amended by SAS No. 142. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

themselves do not constitute misstatements for purposes of drawing conclusions about the reasonableness of individual accounting estimates. However, in some cases, the audit evidence may point to a misstatement, rather than simply an indicator of management bias.

.A135 Indicators of possible management bias may affect the auditor's conclusion about whether the auditor's risk assessment and related responses remain appropriate. The auditor may also need to consider the implications for other aspects of the audit, including the need to further question the appropriateness of management's judgments in making accounting estimates. Further, indicators of possible management bias may affect the auditor's conclusion about whether the financial statements as a whole are free from material misstatement, as discussed in section 700, *Forming an Opinion and Reporting on Financial Statements*, or section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*.[64]

.A136 In addition, in applying section 240, the auditor is required to evaluate whether management's judgments and decisions in making the accounting estimates included in the financial statements indicate a possible bias that may represent a material misstatement due to fraud.[65] Fraudulent financial reporting is often accomplished through intentional misstatement of accounting estimates, which may include intentionally understating or overstating accounting estimates. Indicators of possible management bias that may also be a fraud risk factor may cause the auditor to reassess whether the auditor's risk assessments, in particular, the assessment of fraud risks, and related responses remain appropriate.

Overall Evaluation Based on Audit Procedures Performed (Ref: par. .33)

.A137 As the auditor performs planned audit procedures, the audit evidence obtained may cause the auditor to modify the nature, timing, or extent of other planned audit procedures.[66] In relation to accounting estimates, information may come to the auditor's attention through performing procedures to obtain audit evidence that differs significantly from the information on which the risk assessment was based. For example, the auditor may have identified that the only reason for an assessed risk of material misstatement is the subjectivity involved in making the accounting estimate. However, while performing procedures to respond to the assessed risks of material misstatement, the auditor may discover that the accounting estimate is more complex than originally contemplated, which may call into question the assessment of the risk of material misstatement (for example, the inherent risk may need to be re-assessed on the higher end of the spectrum of inherent risk due to the effect of complexity) and, therefore, the auditor may need to perform additional further audit procedures to obtain sufficient appropriate audit evidence.[67]

.A138 With respect to accounting estimates that have not been recognized, a particular focus of the auditor's evaluation may be on whether the recognition criteria of the applicable

---

[64] Paragraph .14 of section 700 or paragraph .39 of section 703. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

[65] Paragraph .32*b* of section 240. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

[66] Paragraph .A73 of section 330. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

[67] See also paragraph .32 of section 315. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

financial reporting framework have, in fact, been met. When an accounting estimate has not been recognized, and the auditor concludes that this treatment is appropriate, some financial reporting frameworks may require disclosure of the circumstances in the notes to the financial statements.

*Determining Whether the Accounting Estimates Are Reasonable or Misstated (Ref: **par. .35**)*

.A139 In determining whether, based on the audit procedures performed and evidence obtained, management's point estimate and related disclosures are reasonable or are misstated

- when the audit evidence supports a range, the size of the range may be wide and, in some circumstances, may be multiples of materiality for the financial statements as a whole (see also paragraph .A125). Although a wide range may be appropriate in the circumstances, it may indicate that it is important for the auditor to reconsider whether sufficient appropriate audit evidence has been obtained regarding the reasonableness of the amounts within the range.
- the audit evidence may support a point estimate that differs from management's point estimate. In such circumstances, the difference between the auditor's point estimate and management's point estimate constitutes a misstatement.
- the audit evidence may support a range that does not include management's point estimate. In such circumstances, the misstatement is the difference between management's point estimate and the nearest point of the auditor's range.

.A140 Paragraphs .A110–.A114 provide guidance to assist the auditor in evaluating management's selection of a point estimate and related disclosures to be included in the financial statements.

.A141 When the auditor's further audit procedures include testing how management made the accounting estimate or developing an auditor's point estimate or range, the auditor is required to obtain sufficient appropriate audit evidence about disclosures that describe estimation uncertainty in accordance with paragraphs .25*b* and .28*b* and other disclosures in accordance with paragraph .31. The auditor then considers the audit evidence obtained about disclosures as part of the overall evaluation, in accordance with paragraph .35, of whether the accounting estimates and related disclosures are reasonable in the context of the applicable financial reporting framework or are misstated.

.A142 Section 450 also provides guidance regarding qualitative disclosures[68] and when misstatements in disclosures could be indicative of fraud.[69]

.A143 The auditor's evaluation about whether the financial statements achieve fair presentation[70] includes the consideration of the overall presentation, structure, and content of the financial statements and whether the financial statements, including the related

[68] Paragraph .A23 of section 450. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

[69] Paragraph .A24 of section 450. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

notes, represent the transactions and events in a manner that achieves fair presentation. The auditor's professional judgment concerning the fairness of the presentation of the financial statements is applied within the context of the financial reporting framework. For example, when an accounting estimate is subject to a higher degree of estimation uncertainty, the auditor may determine that additional disclosures are necessary to achieve fair presentation. If management does not include such additional disclosures, the auditor may conclude that the financial statements are materially misstated.

.A144 Section 705[71] provides guidance on the implications for the auditor's opinion when the auditor believes that management's disclosures in the financial statements are inadequate or misleading, including, for example, with respect to estimation uncertainty.

Written Representations

.A145 Part of the auditor's audit evidence related to accounting estimates, as required by section 580, *Written Representations*, includes representations obtained from management about whether management believes the methods, significant assumptions, and the data used in making the accounting estimates and the related disclosures are appropriate to achieve recognition, measurement, or disclosure that is in accordance with the applicable financial reporting framework.[72]

Communication With Those Charged With Governance, Management, or Other Relevant Parties (Ref: par. .37)

.A146 In applying section 260, the auditor communicates with those charged with governance the auditor's views about significant qualitative aspects of the entity's accounting practices relating to accounting estimates and related disclosures.[73]Appendix B, "Communications With Those Charged With Governance," includes matters specific to accounting estimates that the auditor may consider communicating to those charged with governance.

.A147 Section 265 requires the auditor to communicate in writing to those charged with governance significant deficiencies and material weaknesses in internal control identified during the audit.[74] Deficiencies in controls, which may also be significant deficiencies or material weaknesses, may include those related to controls over

a. the selection and application of significant accounting policies and the selection and application of methods, assumptions, and data,

b. risk management and related systems,

c. data integrity, including when data is obtained from an external information source, and

d. the use, development, and validation of models, including models obtained from an external provider, and any adjustments that may be required.

Documentation (Ref: par. .38)

.A148 Section 315[75] and section 330[76] provide requirements and guidance on documenting the auditor's understanding of the entity, risk assessments, and responses to assessed risks. This guidance is based on the requirements and guidance in section 230, *Audit Documentation*.[77] In the context of auditing accounting estimates, the auditor is required to prepare audit documentation about key elements of the auditor's understanding of the entity and its environment related to accounting estimates. In addition, the auditor's judgments about the assessed risks of material misstatement related to accounting estimates, and the auditor's responses, may likely be further supported by documentation of communications with those charged with governance and management.

.A149 In documenting the linkage of the auditor's further audit procedures with the assessed risks of material misstatement at the relevant assertion level, in accordance with section 330, this section requires that the auditor take into account the reasons given to the risks of material misstatement at the relevant assertion level. Those reasons may relate to one or more inherent risk factors or the auditor's assessment of control risk. However, the auditor is not required to document how every inherent risk factor was taken into account in identifying and assessing the risks of material misstatement in relation to each accounting estimate.

.A150 The auditor also may consider documenting the following:

- When management's application of the method involves complex modeling, whether management's judgments have been applied consistently and, when applicable, that the design of the model meets the measurement objective of the applicable financial reporting framework.
- When the selection and application of methods, significant assumptions, or the data is affected by complexity to a higher degree, the auditor's judgments in determining whether specialized skills or knowledge are required to perform the risk assessment procedures, to design and perform procedures responsive to those risks, or to evaluate the audit evidence obtained. In these circumstances, the documentation also may include how the required skills or knowledge were applied.

.A151 Section 230[78] notes that although there may be no single way in which the auditor's exercise of professional skepticism is documented, the audit documentation

---

[75]Paragraphs .33 and .A161–.A164 of section 315. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

[76]Paragraphs .30 and .A77 of section 330. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

[77]Paragraph .09*c* of section 230. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

may, nevertheless, provide evidence of the auditor's exercise of professional skepticism. For example, in relation to accounting estimates, when the audit evidence obtained includes evidence that both corroborates and contradicts management's assertions, the documentation may include how the auditor evaluated that evidence, including the professional judgments made in forming a conclusion about the sufficiency and appropriateness of the audit evidence obtained. Examples of other requirements in this section for which documentation may provide evidence of the exercise of professional skepticism by the auditor include the following:

- Paragraph .12*d* of this section, regarding how the auditor has applied an understanding in developing the auditor's own expectation of the accounting estimates and related disclosures to be included in the entity's financial statements and how that expectation compares with the entity's financial statements prepared by management
- Paragraph .17 of this section, which requires further audit procedures to be designed and performed to obtain sufficient appropriate evidence in a manner that is not biased toward obtaining audit evidence that may be corroborative or toward excluding audit evidence that may be contradictory
- Paragraphs .22*b*, .23*b*, .24*b*, and .32 of this section, which address indicators of possible management bias
- Paragraph .34 of this section, which addresses the auditor's consideration of all relevant audit evidence, whether corroborative or contradictory

[78]Paragraph .A9 of section 230. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

Appendix A — Inherent Risk Factors

.A152

Introduction

1. In identifying, assessing, and responding to the risks of material misstatement at the relevant assertion level for an accounting estimate and related disclosures, this section requires the auditor to take into account the degree to which the accounting estimate is subject to estimation uncertainty; the degree to which the selection and application of the methods, assumptions, and data used in making the accounting estimate; and the degree to which the selection of management's point estimate and related disclosures for inclusion in the financial statements are affected by complexity, subjectivity, or other inherent risk factors.

2. Inherent risk related to an accounting estimate is the susceptibility of an assertion about the accounting estimate to material misstatement, before consideration of controls. Inherent risk results from inherent risk factors, which give rise to challenges in appropriately making the accounting estimate. This appendix provides further explanation about the nature of the inherent risk factors of estimation uncertainty, subjectivity, and complexity and their interrelationships in the context of making accounting estimates and selecting management's point estimate and related disclosures for inclusion in the financial statements.

Measurement Basis

3. The measurement basis and the nature, condition, and circumstances of the financial statement item give rise to relevant valuation attributes. When the cost or price of the item cannot be directly observed, an accounting estimate is required to be made by applying an appropriate method and using appropriate data and assumptions. The method may be specified by the applicable financial reporting framework, or is selected by management, to reflect the available knowledge about how the relevant valuation attributes would be expected to influence the cost or price of the item on the measurement basis.

Estimation Uncertainty

4. Susceptibility to a lack of precision in measurement may be referred to in accounting frameworks as *measurement uncertainty*. *Estimation uncertainty* is defined in this section as susceptibility to an inherent lack of precision in measurement. It arises when the required monetary amount for a financial statement item that is recognized or disclosed in the financial statements cannot be measured with precision through direct observation of the cost or price. When direct observation is not possible, the next most precise alternative measurement strategy is to apply a method that reflects the available knowledge about cost or price for the item on the relevant measurement basis, using observable data about relevant valuation attributes.

5. However, constraints on the availability of such knowledge or data may limit the verifiability of such inputs to the measurement process and, therefore, limit the precision of measurement outcomes. Furthermore, most accounting frameworks acknowledge that there are practical constraints on the information that should be taken into account, such as when the cost of obtaining it would exceed the benefits. The lack of precision in measurement arising from these constraints is inherent because it cannot be eliminated from the measurement process. Accordingly, such constraints are sources of estimation uncertainty. Other sources of measurement uncertainty that may occur in the measurement process are, at least in principle, capable of elimination if the method is applied appropriately and, therefore, are sources of potential misstatement, rather than estimation uncertainty.

6. When estimation uncertainty relates to uncertain future inflows or outflows of economic benefits that will ultimately result from the underlying asset or liability, the outcome of these flows will only be observable after the date of the financial statements. Depending on the nature of the applicable measurement basis and on the nature, condition, and circumstances of the financial statement item, this outcome may be directly observable before the financial statements are finalized or may only be directly observable at a later date. For some accounting estimates, there may be no directly observable outcome at all.

7. Some uncertain outcomes may be relatively easy to predict with a high level of precision for an individual item. For example, the useful life of a production machine may be easily predicted if sufficient technical information is available about its average useful life. When it is not possible to predict a future outcome, such as an individual's life expectancy based on actuarial assumptions, with reasonable precision, it may still be possible to predict that outcome for a group of individuals with greater precision. Measurement bases may, in some cases, indicate a portfolio level as the relevant unit of account for measurement purposes, which may reduce inherent estimation uncertainty.

Complexity

8. Complexity (that is, the complexity inherent in the process of making an accounting estimate, before consideration of controls) gives rise to inherent risk. Inherent complexity may arise when

- there are many valuation attributes with many or nonlinear relationships between them.
- determining appropriate values for one or more valuation attributes requires multiple data sets.
- more assumptions are required in making the accounting estimate, or when there are correlations between the required assumptions.
- the data used is inherently difficult to identify, capture, access, or understand.

9. Complexity may be related to the complexity of the method and the computational process or model used to apply it. For example, complexity in the model may reflect the need to apply probability-based valuation concepts or techniques, option pricing formulae, or simulation techniques to predict uncertain future outcomes or hypothetical behaviors. Similarly, the computational process may require data from multiple sources or multiple data sets to support the making of an assumption or the application of sophisticated mathematical or statistical concepts.

10. The greater the complexity, the more likely it is that management will need to apply specialized skills or knowledge in making an accounting estimate or engage a management's expert, for example, in relation to

- valuation concepts and techniques that could be used in the context of the measurement basis and objectives or other requirements of the applicable financial reporting framework and how to apply those concepts or techniques;
- the underlying valuation attributes that may be relevant given the nature of the measurement basis and the nature, condition, and circumstances of the financial statement items for which accounting estimates are being made; or
- identifying appropriate sources of data from internal sources (including from sources outside the general or subsidiary ledgers) or from external information sources, determining how to address potential difficulties in obtaining data from such sources or in maintaining its integrity in applying the method, or understanding the relevance and reliability of that data.

11. Complexity relating to data may arise, for example, in the following circumstances:

a. When data is difficult to obtain or when it relates to transactions that are not generally accessible. Even when such data is accessible, for example, through an external information source, it may be difficult to consider the relevance and reliability of the data, unless the external information source discloses adequate information about the underlying data sources it has used and about any data processing that has been performed

b. When data reflecting an external information source's views about future conditions or events, which may be relevant in developing support for an assumption, is difficult to understand without transparency about the rationale and information taken into account in developing those views

c. When certain types of data are inherently difficult to understand because they require an understanding of technically complex business or legal concepts, such as may be required to properly understand data that comprises the terms of legal agreements about transactions involving complex financial instruments or insurance products

Subjectivity

12. Subjectivity (that is, the subjectivity inherent in the process of making an accounting estimate, before consideration of controls) reflects inherent limitations in the knowledge or data reasonably available about valuation attributes. When such limitations exist, the applicable financial reporting framework may reduce the degree of subjectivity by providing a required basis for making certain judgments. Such requirements may, for example, set explicit or implied objectives relating to measurement, disclosure, the unit of account, or the application of a cost constraint. The applicable financial reporting framework may also highlight the importance of such judgments through requirements for disclosures about those judgments.

13. Management judgment is generally needed in determining some or all of the following matters, which often involve subjectivity:

- To the extent not specified under the requirements of the applicable financial reporting framework, the appropriate valuation approaches, concepts, techniques, and factors to use in the estimation method, having regard to available knowledge
- To the extent valuation attributes are observable when there are various potential sources of data, the appropriate sources of data to use
- To the extent valuation attributes are not observable, the appropriate assumptions or range of assumptions to make, considering the best available data, including, for example, market views
- The range of reasonably possible outcomes from which to select management's point estimate, and the relative likelihood that certain points within that range would be consistent with the objectives of the measurement basis required by the applicable financial reporting framework
- The selection of management's point estimate, and the related disclosures to be made, in the financial statements

14. Making assumptions about future events or conditions involves the use of judgment, the difficulty of which varies with the degree to which those events or conditions are uncertain. The precision with which it is possible to predict uncertain future events or conditions depends on the degree to which those events or conditions are determinable based on knowledge, including knowledge of past conditions, events, and related outcomes. The lack of precision also contributes to estimation uncertainty, as described previously.

15. With respect to future outcomes, assumptions will only need to be made for those features of the outcome that are uncertain. For example, in considering the measurement of a possible impairment of a receivable for a sale of goods at the balance sheet date, the amount of the receivable may be unequivocally established and directly observable in the related transaction documents. What may be uncertain is the amount, if any, for loss due to impairment. In this case, assumptions may only be required about the likelihood of loss and the amount and timing of any such loss.

16. However, in other cases, the amounts of cash flows embodied in the rights relating to an asset may be uncertain. In those cases, assumptions may have to be made about both the amounts of the underlying rights to cash flows and about potential losses due to impairment.

17. It may be necessary for management to consider information about past conditions and events, together with current trends and expectations about future developments. Past conditions and events provide historical information that may highlight repeating historical patterns that can be extrapolated in evaluating future outcomes. Such historical information may also indicate changing patterns of such behavior over time (cycles or trends). These may suggest that the underlying historical patterns of behavior have been changing in somewhat predictable ways that may also be extrapolated in evaluating future outcomes. Other types of information may also be available that indicate possible changes in historical patterns of such behavior or in related cycles or trends. Difficult judgments may be needed about the predictive value of such information.

18. The extent and nature (including the degree of subjectivity involved) of the judgments taken in making the accounting estimates may create opportunity for management bias in making decisions about the course of action that, according to management, is appropriate in making the accounting estimate. When there is also a high level of complexity or a high level of estimation uncertainty, or both, the risk of and opportunity for management bias or fraud may also be increased.

Relationship of Estimation Uncertainty to Subjectivity and Complexity

19. Estimation uncertainty gives rise to inherent variation in the possible methods, data sources, and assumptions that could be used to make an accounting estimate. This gives rise to subjectivity and, hence, the need for the use of judgment in making the accounting estimate. Such judgments are required in selecting the appropriate methods and data sources, in making the assumptions, and in selecting management's point estimate and related disclosures for inclusion in the financial statements. These judgments are made in the context of the recognition, measurement, presentation, and disclosure requirements of the applicable financial reporting framework. However, because there are constraints on the availability and accessibility of knowledge or information to support these judgments, they are subjective in nature.

20. Subjectivity in such judgments creates the opportunity for unintentional or intentional management bias in making them. Many accounting frameworks require that information prepared for inclusion in the financial statements should be neutral (that is, it should not be biased). Given that bias can, at least in principle, be eliminated from the estimation process, sources of potential bias in the judgments made to address subjectivity are sources of potential misstatement, rather than sources of estimation uncertainty.

21. The inherent variation in the possible methods, data sources, and assumptions that could be used to make an accounting estimate (see paragraph 19) also gives rise to variation in the possible measurement outcomes. The size of the range of reasonably possible measurement outcomes results from the degree of estimation uncertainty and is often referred to as the *sensitivity of the accounting estimate*. In addition to determining measurement outcomes, an estimation process also involves analyzing the effect of inherent variations in the possible methods, data sources, and assumptions on the range of reasonably possible measurement outcomes (referred to as *sensitivity analysis*).

22. Developing a financial statement presentation for an accounting estimate, which, when required by the applicable financial reporting framework, achieves faithful representation (that is, complete, neutral, and free from error) includes making appropriate judgments in selecting a management point estimate that is appropriately chosen from within the range of reasonably possible measurement outcomes and related disclosures that appropriately describe the estimation uncertainty. These judgments may themselves involve subjectivity, depending on the nature of the requirements in the applicable financial reporting framework that address these matters. For example, the applicable financial reporting framework may require a specific basis (such as a probability-weighted average or a best estimate) for the selection of the management point estimate. Similarly, it may require specific disclosures or disclosures that meet specified disclosure objectives or additional disclosures that are required to achieve fair presentation in the circumstances.

23. Although an accounting estimate that is subject to a higher degree of estimation uncertainty may be less precisely measurable than one subject to a lower degree of estimation uncertainty, the accounting estimate may still have sufficient relevance for users of the financial statements to be recognized in the financial statements if, when required by the applicable financial reporting framework, a faithful representation of the item can be achieved. In some cases, estimation uncertainty may be so great that the recognition criteria in the applicable financial reporting framework are not met, and the accounting estimate cannot be recognized in the financial statements. Even in these circumstances, there may still be relevant disclosure requirements, for example, to disclose the point estimate or range of reasonably possible measurement outcomes and information describing the estimation uncertainty and constraints in recognizing the item. The requirements of the applicable financial reporting framework that apply in these circumstances may be specified to a greater or lesser degree. Accordingly, in these circumstances, there may be additional judgments that involve subjectivity to be made.

Appendix B — Communications With Those Charged With Governance (Ref: par. .A146)

.A153

1. Section 260, *The Auditor's Communication With Those Charged With Governance*, requires the auditor to communicate with those charged with governance the auditor's views about the qualitative aspects of the entity's significant accounting practices, including accounting policies, accounting estimates, and financial statement disclosures.[1]Section 260[2] also identifies matters that may be communicated as part of this communication. The following is a list of additional matters that the auditor may consider communicating with those charged with governance with respect to the auditor's views about significant qualitative aspects of the entity's accounting practices related to accounting estimates and related disclosures:

- How management identifies transactions, other events, and conditions that may give rise to the need for or changes in accounting estimates and related disclosures
- Risks of material misstatement
- The relative materiality of the accounting estimates to the financial statements as a whole
- Management's understanding (or lack thereof) regarding the nature and extent of and the risks associated with accounting estimates
- Whether management has applied appropriate specialized skills or knowledge or engaged appropriate experts
- The auditor's views about differences between the auditor's point estimate or range and management's point estimate
- The auditor's views about the appropriateness of the selection of accounting policies related to accounting estimates and presentation of accounting estimates in the financial statements
- Indicators of possible management bias
- Whether there has been or ought to have been a change from the prior period in the methods for making the accounting estimates
- When there has been a change from the prior period in the methods for making the accounting estimate, why, as well as the outcome of accounting estimates in prior periods
- Whether management's methods for making the accounting estimates, including when management has used a model, are appropriate in the context of the measurement

[1]Paragraph .12 of section 260, *The Auditor's Communication With Those Charged With Governance*.

[2]The appendix, "Qualitative Aspects of Accounting Practices," of section 260.

objectives; the nature, conditions, and circumstances; and other requirements of the applicable financial reporting framework

- The nature and consequences of significant assumptions used in accounting estimates and the degree of subjectivity involved in the development of the assumptions
- Whether significant assumptions are consistent with each other and with those used in other accounting estimates or with assumptions used in other areas of the entity's business activities
- When relevant to the appropriateness of the significant assumptions or the appropriate application of the applicable financial reporting framework, whether management has the intent to carry out specific courses of action and has the ability to do so
- How management has considered alternative assumptions or outcomes and why it has rejected them or how management has otherwise addressed estimation uncertainty in making the accounting estimate
- Whether the data and significant assumptions used by management in making the accounting estimates are appropriate in the context of the applicable financial reporting framework
- The relevance and reliability of information obtained from an external information source
- Significant difficulties encountered when obtaining sufficient appropriate audit evidence relating to data obtained from an external information source or valuations performed by management or management's expert
- Significant differences in judgments between the auditor and management or management's expert regarding valuations
- The potential effects on the entity's financial statements of material risks and exposures required to be disclosed in the financial statements, including the estimation uncertainty associated with accounting estimates
- The reasonableness of disclosures about estimation uncertainty in the financial statements
- Whether management's decisions relating to the recognition, measurement, presentation, and disclosure of the accounting estimates and related disclosures in the financial statements are in accordance with the applicable financial reporting framework

Appendix C — Use of Pricing Information From Third Parties as Audit Evidence

.A154

1. Section 500, *Audit Evidence*, contains requirements and provides guidance about evaluating information to be used as audit evidence, including information from external information sources. This section provides guidance on complying with section 500 with respect to information to be used as audit evidence relating to accounting estimates, without regard to the sources of information. As explained in section 500, the reliability of evidence depends on the nature and source of the audit evidence and the circumstances under which it is obtained. Generally, the reliability of audit evidence increases when it is obtained from external parties because the information is less susceptible to management bias. This appendix provides additional guidance about information used as audit evidence for estimates, when that information is pricing information obtained from external information sources.

2. When the auditor uses pricing information from an external information source to develop an independent expectation or evaluates pricing information provided by a third party used by the entity, the requirement in section 500[1] to evaluate information to be used as audit evidence applies. Quoted market prices for derivative instruments and securities listed on national exchanges or over-the-counter markets that are obtained from sources such as financial publications, the exchanges, NASDAQ, or pricing services based on sources such as these generally provide sufficient evidence of the fair value of the derivative instruments and securities. The following paragraphs provide guidance for evaluating pricing information from the following sources:

a. Organizations that routinely provide uniform pricing information to users, generally on a subscription basis (pricing services). Note that when a pricing service is engaged to individually develop a price for a specific financial instrument not routinely priced for its subscribers, the requirements in sections 501, *Audit Evidence — Specific Considerations for Selected Items*, and 620, *Using the Work of an Auditor's Specialist*, relating to management's or the auditor's specialist, respectively, apply.

b. Brokers or dealers.

Using Pricing Information From Pricing Services

3. Appendix A, "Considerations Regarding the Use of External Information Sources," of section 500 provides guidance relevant to evaluating the reliability of information from external information sources. The reliability of information to be used as audit evidence depends on the nature and source of the information and the circumstances under which it is obtained. The following factors affect the reliability of pricing information provided by a pricing service:

[1]Paragraph .07 of section 500, *Audit Evidence*.

a. The experience and expertise of the pricing service relative to the types of financial instruments being valued, including whether the types of financial instruments being valued are routinely priced by the pricing service

b. Whether the methodology used by the pricing service in determining fair value of the types of financial instruments being valued is in accordance with the applicable financial reporting framework

c. Whether the pricing service has a relationship with the entity by which management has the ability to influence the pricing service

4. The procedures performed under section 550, *Related Parties*, can assist the auditor in evaluating the reliability of the audit evidence obtained from the pricing service by taking into account the ability of management to influence the information obtained from the pricing service through relationships between the entity and the pricing service. The existence of a process by which subscribers can challenge a pricing service's pricing information does not, by itself, mean that management has the ability to influence that pricing service.

5. If the auditor performs procedures to assess the reliability of pricing information provided by a pricing service at an interim date, the auditor may determine it necessary to evaluate whether the pricing service has changed its valuation process relative to the types of financial instruments being valued and, if so, the effect of such changes on the pricing information provided at period end.

6. The relevance of audit evidence refers to its relationship to the assertion or to the objective of the control being tested. The following factors affect the relevance of pricing information provided by a pricing service:

a. Whether the fair values are based on quoted prices in active markets for identical financial instruments

b. When the fair values are based on transactions of similar financial instruments, how those transactions are identified and considered comparable to the financial instruments being valued

c. When no recent transactions have occurred for either the financial instrument being valued or similar financial instruments or the price was developed using a nonbinding quote from a broker or dealer, how the fair value was developed, including whether the inputs used represent the assumptions that market participants would use when pricing the financial instruments

7. Fair values of financial instruments based on trades of identical financial instruments in an active market have a lower risk of material misstatement than fair values derived from observable trades of similar financial instruments or unobservable inputs. When the fair values are based on transactions of similar financial instruments, audit procedures to evaluate the process used by the pricing service may include evaluating how transactions are identified, considered comparable, and used to value the types of financial instruments selected for testing.

8. When financial instruments are similar, and are priced by the pricing service using the same process, procedures related to the information from the pricing service may be performed for financial instruments as a group, rather than for each instrument individually. Considerations for determining the similarity of the financial instruments include the following matters:

- The terms and characteristics of the financial instruments
- The extent to which the fair value of the type of financial instrument is based on inputs that are observable directly or indirectly
- Other factors affecting the valuation of the financial instruments, such as credit or counterparty risk, market risk, and liquidity risk

9. When no recent transactions have occurred for either the financial instrument being valued or similar financial instruments, audit procedures may include evaluating the appropriateness of the valuation method and the reasonableness of observable and unobservable inputs used by the pricing service.

Using Pricing Information From Multiple Pricing Services

10. When pricing information is obtained from multiple pricing services (that is, more than one), less information may be needed about the particular methods and inputs used by the individual pricing services based on the presence of factors such as the following:

a. There are recent trades of the financial instrument or of financial instruments substantially similar to the financial instruments being valued.

b. The type of financial instrument being valued is routinely priced by several (that is, more than two) pricing services.

c. Prices obtained are reasonably consistent across pricing services, taking into account the nature and characteristics of the financial instruments being valued, and market conditions.

d. The pricing information for the type of financial instrument is generally based on inputs that are observable.

11. When one or more of the preceding factors are not present, further audit procedures may be necessary to evaluate the appropriateness of the valuation method and the reasonableness of observable and unobservable inputs for a representative price for the type of financial instrument being valued.

Using Pricing Information From a Broker or Dealer

12. When a fair value measurement is based on a quote from a broker or dealer (broker quote), the relevance and reliability of the evidence provided by the broker quote depend on whether

a. the broker or dealer has a relationship with the entity by which management has the ability to influence the broker or dealer;

b. the broker or dealer making the quote is a market maker that transacts in the same type of financial instrument;

c. the broker quote reflects market conditions as of the date of the financial statements;

d. the broker quote is binding on the broker or dealer; and

e. there are any restrictions, limitations, or disclaimers in the broker quote and, if so, their nature.

13. Broker quotes generally provide more relevant and reliable evidence when they are timely, binding quotes, without any restrictions, limitations, or disclaimers, from unaffiliated market makers transacting in the same type of financial instrument. If the broker quote does not provide sufficient appropriate audit evidence, additional procedures the auditor may perform include obtaining relevant and reliable pricing information from another pricing source.

14. The procedures performed under section 550 can assist the auditor in evaluating the reliability of the audit evidence obtained from the broker or dealer by taking into account the ability of management to influence the information obtained from the broker or dealer through relationships between the entity and the broker or dealer.

Unobservable Inputs

15. When the valuation of a financial instrument includes unobservable inputs that are significant to the valuation, obtaining an understanding of how unobservable inputs were determined and evaluating the reasonableness of the unobservable inputs may include taking into account the following:

a. Whether modifications made to observable information generally reflect the assumptions that market participants would use when pricing the financial instrument, including assumptions about risk

b. How management determined its fair value measurement, including whether it appropriately considered the information available

> **Note**
> In March 2023, the ASB issued SAS No. 149, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors and Audits of Referred-to Auditors)*, which contains amendments to this section.
>
> The amendments are effective for audits of financial statements for periods ending on or after December 15, 2026, and can be viewed in appendix C of section 600 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibilities relating to related party relationships and transactions in an audit of financial statements.[1] Specifically, it expands on how section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*; section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*; and section 240, *Consideration of Fraud in a Financial Statement Audit*, are to be applied regarding risks of material misstatement associated with related party relationships and transactions.

.02 Section 700, *Forming an Opinion and Reporting on Financial Statements*, and section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, as applicable, requires the auditor to evaluate whether the financial statements achieve fair presentation.[2]Section 800, *Special Considerations — Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks*,

---

[1]The phrase "related party relationships and transactions" as used in generally accepted auditing standards is intended to have the same meaning as the phrase "related parties and relationships and transactions with related parties" as used in the auditing standards of the PCAOB. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

requires that, in audits of special purpose financial statements that contain related party transactions, the auditor evaluate whether the financial statements include informative disclosures similar to those required by generally accepted accounting principles (GAAP).[3]Section 800 also requires the auditor to evaluate whether additional disclosures beyond those specifically required by the framework and related to matters that are not specifically identified on the face of the financial statements or other disclosures may be necessary for the financial statements to achieve fair presentation.[4] Thus, this section applies to all audits of financial statements. (Ref: par. .A1–.A3) [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

Nature of Related Party Relationships and Transactions (Ref: par. .A1–.A6)

.03 Many related party transactions are in the normal course of business. In such circumstances, they may carry no higher risk of material misstatement of the financial statements than similar transactions with unrelated parties. However, the nature of related party relationships and transactions may, in some circumstances, give rise to higher risks of material misstatement of the financial statements than transactions with unrelated parties. For example

- related parties may operate through an extensive and complex range of relationships and structures, with a corresponding increase in the complexity of related party transactions.
- information systems may be ineffective at identifying or summarizing transactions and outstanding balances between an entity and its related parties.
- related party transactions may not be conducted under normal market terms and conditions (for example, some related party transactions may be conducted with no exchange of consideration).
- related party transactions may be motivated solely or in large measure to engage in fraudulent financial reporting or conceal misappropriation of assets.

Responsibilities of the Auditor

.04 Because related parties are not independent of each other, financial reporting frameworks establish specific accounting and disclosure requirements for related party relationships, transactions, and balances to enable users of the financial statements to understand their nature and actual or potential effects on the financial statements. Therefore, the auditor has a responsibility to perform audit procedures to identify, assess,

[Footnote renumbered by the issuance of SAS No. 135, May 2019. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

[3]Paragraph .17 of section 800, *Special Considerations — Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks*. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

[4]Paragraph .17 of section 800. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

and respond to the risks of material misstatement arising from the entity's failure to appropriately account for or disclose related party relationships, transactions, or balances. (Ref: par. .A3)

.05 In addition, an understanding of the entity's related party relationships and transactions is relevant to the auditor's evaluation of whether one or more fraud risk factors are present, as required by section 240, because fraud may be more easily committed through related parties.[5]

.06 Owing to the inherent limitations of an audit, an unavoidable risk exists that some material misstatements of the financial statements may not be detected, even though the audit is properly planned and performed in accordance with generally accepted auditing standards (GAAS).[6] In the context of related parties, the potential effects of inherent limitations on the auditor's ability to detect material misstatements are greater because of reasons such as the following:

- Management may be unaware of the existence of all related party relationships and transactions.
- Related party relationships may present a greater opportunity for collusion, concealment, or manipulation by management.

.07 Planning and performing the audit with professional skepticism as required by section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*, is, therefore, particularly important in this context, given the potential for undisclosed related party relationships and transactions.[7] The requirements in this section are designed to assist the auditor in identifying and assessing the risks of material misstatement associated with related party relationships and transactions and in designing audit procedures to respond to the assessed risks.

Effective Date

.08 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objectives

.09 The objectives of the auditor are to

a. obtain an understanding of related party relationships and transactions sufficient to be able to

---

[5]Paragraph .24 of section 240, *Consideration of Fraud in a Financial Statement Audit*. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

[6]Paragraph .A56 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

[7]Paragraph .17 of section 200. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

i. recognize fraud risk factors, if any, arising from related party relationships and transactions that are relevant to the identification and assessment of the risks of material misstatement due to fraud.

ii. conclude, based on the audit evidence obtained, whether the financial statements, insofar as they are affected by those relationships and transactions, achieve fair presentation.

b. obtain sufficient appropriate audit evidence about whether related party relationships and transactions have been appropriately identified, accounted for, and disclosed in the financial statements.

Definitions

.10 For purposes of GAAS, the following terms have the meanings attributed as follows:

Arm's length transaction. A transaction conducted on such terms and conditions between a willing buyer and a willing seller who are unrelated and are acting independently of each other and pursuing their own best interests.

Related party. A party defined as a related party in GAAP. (Ref: par. .A1)

.11 Reference to GAAP in GAAS means generally accepted accounting principles promulgated by bodies designated by the Council of the AICPA pursuant to the "Compliance With Standards Rule" (ET sec. 1.310.001) and the "Accounting Principles Rule" (ET sec. 1.320.001) of the AICPA Code of Professional Conduct. [Revised, January 2015, to reflect conforming changes necessary due to the issuance of the revised AICPA Code of Professional Conduct, effective December 15, 2014.]

Requirements

Risk Assessment Procedures and Related Activities

.12 As part of the risk assessment procedures and related activities that section 240 and section 315A require the auditor to perform during the audit, the auditor should perform the audit procedures and related activities set out in paragraphs .13–.19 to obtain information relevant to identifying the risks of material misstatement associated with related party relationships and transactions.[8,9]

Understanding the Entity's Related Party Relationships and Transactions

.13 In connection with the engagement team discussion(s) that section 240 and section 315A require, the auditor should include specific consideration of the susceptibility of the financial statements to material misstatement due to fraud or error that could result from the entity's related party relationships and transactions.[10,11] (Ref: par. .A7–.A8)

---

[8]Paragraph .16 of section 240. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

[9]Paragraph .05 of section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

.14 The auditor should inquire of management and others within the entity regarding the following:

a. The identity of the entity's related parties, including changes from the prior period (Ref: par. .A9–.A15)

b. The nature of the relationships (including ownership structure) between the entity and these related parties

c. The business purpose of entering into a transaction with a related party versus an unrelated party

d. Whether the entity entered into, modified, or terminated any transactions with these related parties during the period and, if so, the type and business purpose of the transactions

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

.15 The auditor should inquire of management and others within the entity and perform other risk assessment procedures[12] considered appropriate to obtain an understanding of the controls, if any, that management has established to (Ref: par. .A16–.A21)

a. identify, account for, and disclose related party relationships and transactions.

b. authorize and approve significant transactions and arrangements with related parties. (Ref: par. .A22)

c. authorize and approve significant unusual transactions, and arrangements outside the normal course of business.

Inquiries should include asking about any related party transactions

a. that have not been authorized and approved in accordance with the entity's established policies or procedures regarding the authorization and approval of transactions with related parties.

b. for which exceptions to the entity's established policies or procedures were granted and the reasons for granting those exceptions. (Ref: par. .A44–.A45)

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

.16 Unless all of those charged with governance are involved in managing the entity, the auditor should inquire of those charged with governance (or the audit committee or, at least, its chair) regarding

[10] Paragraph .15 of section 240. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

[11] Paragraph .11 of section 315A. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

[12] Paragraph .06 of section 315A. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

a. their understanding of the entity's relationships and transactions with related parties that are significant to the entity and

b. whether any of those charged with governance have concerns regarding relationships or transactions with related parties and, if so, the substance of those concerns.

[Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

Remaining Alert for Related Party Information When Reviewing Records or Documents

.17 During the audit, the auditor should remain alert when inspecting records or documents for arrangements or other information that may indicate the existence of related party relationships or transactions that management has not previously identified or disclosed to the auditor. In particular, the auditor should inspect the following for indications of the existence of related party relationships or transactions that management has not previously identified or disclosed to the auditor: (Ref: par. .A23–.A25)

a. Bank and legal confirmations obtained as part of the auditor’s procedures

b. Minutes of meetings of shareholders and of those charged with governance and summaries of actions of recent meetings for which minutes have not yet been prepared

c. Such other records or documents as the auditor considers necessary in the circumstances of the entity

[Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

.18 If the auditor identifies significant unusual transactions when performing the audit procedures required by paragraph .17 or through other audit procedures, the auditor should inquire of management about the following: (Ref: par. .A26–.A27)

a. The nature of these transactions (Ref: par. .A28)

b. Whether related parties could be involved (Ref: par. .A29)

[Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

Sharing Related Party Information With the Engagement Team

.19 The auditor should share with the other members of the engagement team the identity of the entity’s related parties and other relevant information obtained about the related parties. (Ref: par. .A30–.A31) [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

Identification and Assessment of the Risks of Material Misstatement Associated With Related Party Relationships and Transactions

.20 In meeting the requirement of section 315A to identify and assess the risks of material misstatement, the auditor should identify and assess the risks of material misstatement associated with related party relationships and transactions and determine whether any of those risks are significant risks.[13] In making this determination, the auditor should treat identified related party transactions that are also significant unusual transactions as giving rise to significant risks. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

.21 If the auditor identifies fraud risk factors (including circumstances relating to the existence of a related party with dominant influence) when performing the risk assessment procedures and related activities in connection with related parties, the auditor should consider such information when identifying and assessing the risks of material misstatement due to fraud, in accordance with section 240.[14] (Ref: par. .A32–.A34) [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

Responses to the Risks of Material Misstatement Associated With Related Party Relationships and Transactions

.22 As part of the requirement in section 330 that the auditor respond to assessed risks, the auditor should design and perform further audit procedures to obtain sufficient appropriate audit evidence about the assessed risks of material misstatement associated with related party relationships and transactions. The auditor should evaluate whether the entity has properly identified its related party relationships and transactions. Evaluating whether an entity has properly identified its related party relationships and transactions involves more than assessing the process used by the entity. The evaluation should include procedures to test the accuracy and completeness of the related party relationships and transactions identified by the entity, taking into account the information gathered during the audit.[15] (Ref: par. .A35–.A38) [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

.23 The auditor should perform procedures on balances with affiliated entities as of concurrent dates, even if fiscal years of the respective entities differ. The procedures performed should address the risks of material misstatement associated with the entity's accounts with affiliates. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

---

[13]Paragraph .26 of section 315A. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

[14]Paragraph .24 of section 240. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

[15]Paragraphs .05–.06 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

Identification of Previously Unidentified or Undisclosed Related Parties or Significant Related Party Transactions

.24 If the auditor identifies arrangements or information that suggests the existence of related party relationships or transactions that management has not previously identified or disclosed to the auditor, the auditor should determine whether the underlying circumstances confirm the existence of those relationships or transactions. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

.25 If the auditor identifies related parties or significant related party transactions that management has not previously identified or disclosed to the auditor, the auditor should

a. promptly communicate the relevant information to the other members of the engagement team. (Ref: par. .A30 and .A39)

b. request management to identify all transactions with the newly identified related parties for the auditor's further evaluation.

c. inquire why the entity's controls over related party relationships and transactions failed to enable the identification or disclosure of the related party relationships or transactions.

d. perform appropriate substantive audit procedures relating to such newly identified related parties or significant related party transactions. (Ref: par. .A40)

e. reconsider the risk that other related parties or significant related party transactions may exist that management has not previously identified or disclosed to the auditor and perform additional audit procedures as necessary.

f. evaluate the implications for the audit if the nondisclosure by management appears intentional (and, therefore, indicative of a risk of material misstatement due to fraud). (Ref: par. .A41)

[Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

Identified Related Party Transactions That Are Required to Be Disclosed or Determined to be a Significant Risk

.26 For identified significant related party transactions that are required to be disclosed in the financial statements or determined to be a significant risk, the auditor should[16]

a. read the underlying contracts or agreements, if any, and evaluate whether

   i. the business purpose (or lack thereof) of the transactions suggests that they may have been entered into to engage in fraudulent financial reporting or to conceal misappropriation of assets.[17] (Ref: par. .A42–.A43)

[16]See paragraph .21, which requires the auditor to treat identified related party transactions that are also significant unusual transactions as giving rise to significant risks. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

ii. the terms of the transactions are consistent with management's explanations.

iii. the transactions have been appropriately accounted for and disclosed.

b. obtain audit evidence that the transactions have been appropriately authorized and approved. (Ref: par. .A44–.A45)

[Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

Assertions That Related Party Transactions Were Conducted on Terms Equivalent to Those Prevailing in an Arm's Length Transaction

.27 If management has made an assertion in the financial statements to the effect that a related party transaction was conducted on terms equivalent to those prevailing in an arm's length transaction, the auditor should obtain sufficient appropriate audit evidence about the assertion. (Ref: par. .A46–.A50) [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

Evaluation of the Accounting for, and Disclosure of, Identified Related Party Relationships and Transactions

.28 In forming an opinion on the financial statements, in accordance with section 700, or section 703, the auditor should evaluate the following:[18] (Ref: par. .A51)

a. Whether the identified related party relationships and transactions have been appropriately accounted for and disclosed (Ref: par. .A52)

b. Whether the effects of the related party relationships and transactions prevent the financial statements from achieving fair presentation (Ref: par. .A3)

[Paragraph renumbered by the issuance of SAS No. 135, May 2019. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

Communication With Those Charged With Governance

.29 Unless all of those charged with governance are involved in managing the entity, the auditor should communicate with those charged with governance significant findings or issues arising during the audit in connection with the entity's related parties.[19] (Ref: par. .A53) [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

---

[17]Paragraph .32*c* of section 240. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

[18]Paragraphs .12–.17 of section 700, or paragraphs .37–.42 of section 703, as applicable. [Footnote renumbered by the issuance of SAS No. 135, May 2019. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

[19]Paragraph .09 of section 260, *The Auditor's Communication With Those Charged With Governance*. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

Documentation

.30 The auditor should include in the audit documentation the names of the identified related parties and the nature of the related party relationships.[20] [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

Application and Other Explanatory Material

Nature of Related Party Relationships and Transactions (Ref: par. .02–.04, .10, and .28b)

.A1 GAAP frameworks include or refer to specific disclosure requirements for related party relationships and transactions. If the applicable financial reporting framework does not have specific disclosure requirements, the auditor, nonetheless, evaluates whether related party information is disclosed in a manner comparable to GAAP in order for the financial statements to achieve fair presentation.[21]

.A2 Certain accounting pronouncements prescribe the accounting treatment when related parties are involved; however, established accounting principles ordinarily do not require transactions with related parties to be accounted for on a basis different from that which would be appropriate if the parties were not related. In addition, the substance of a particular transaction may be significantly different from its form. Accordingly, financial statements prepared in accordance with GAAP generally recognize the substance of particular transactions rather than merely their legal form.

.A3 Related party relationships and transactions may cause the financial statements to fail to achieve fair presentation if, for example, the economic substance of such relationships and transactions is not appropriately reflected in the financial statements. For instance, fair presentation may not be achieved if the sale of a property by the entity to a controlling shareholder at a price above or below fair market value has been accounted for as a transaction involving a profit or loss for the entity when it may constitute a contribution or return of capital or the payment of a dividend. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

.A4 Transactions that because of their nature may be indicative of the existence of related parties include the following:

a. Borrowing or lending on an interest free basis or at a rate of interest significantly above or below market rates prevailing at the time of the transaction

b. Selling real estate at a price that differs significantly from its appraised value

c. Exchanging property for similar property in a nonmonetary transaction

[20] Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

[21] Paragraph .17 of section 800. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

d. Making loans with no scheduled terms for when or how the funds will be repaid

.A5 Although many related party transactions are in the normal course of business, a possibility exists that transactions with related parties may have been motivated solely or in large measure by conditions similar to the following:

a. Lack of sufficient working capital or credit to continue the business

b. An overly optimistic earnings forecast

c. Dependence on a single or relatively few products, customers, or transactions for the continued success of the venture

d. A declining industry characterized by a large number of business failures

e. Excess capacity

f. Significant litigation, especially litigation between stockholders and management

g. Significant obsolescence dangers because the company is in a high technology industry

For these reasons, related party transactions may indicate an increased risk of material misstatement of the financial statements.

Considerations Specific to Governmental Entities

.A6 For state and local governmental entities, related party relationships and transactions can result from interactions with other governments, not-for-profit entities, for-profit entities, and individuals. The applicable financial reporting framework used by most state and local governmental entities addresses related party relationships and transactions using terms that include *related parties*, *related organizations*, and *component units*, and can result in the inclusion of the related parties' financial statements as a reporting unit, inclusion within a reporting unit, disclosure of the related party transactions, or disclosure about why the related party or its transactions are not included. In all such cases, the objectives described in paragraph .09 are relevant to the auditor.

Risk Assessment Procedures and Related Activities

Understanding the Entity's Related Party Relationships and Transactions

Discussion Among the Engagement Team (Ref: par. .13)

.A7 Matters that may be addressed in the discussion among the engagement team include the following:

- The nature and extent of the entity's relationships and transactions with related parties (using, for example, the auditor's record of identified related parties updated after each audit)

- An emphasis on the importance of maintaining professional skepticism throughout the audit regarding the potential for material misstatement associated with related party relationships and transactions
- The circumstances or conditions of the entity that may indicate the existence of related party relationships or transactions that management has not identified or disclosed to the auditor (for example, a complex organizational structure, use of entities formed to accomplish specific purposes,[22] or an inadequate information system)
- The records or documents that may indicate the existence of related party relationships or transactions
- The importance that management and those charged with governance attach to the identification of, appropriate accounting for, and disclosure of related party relationships and transactions and the related risk of management override of controls

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A8 In addition, the discussion in the context of fraud may include specific consideration of how related parties may be involved in fraud. For example:

- Entities formed to accomplish specific purposes and that are controlled by management might be used to facilitate earnings management.
- Transactions between the entity and a known business partner of a key member of management could be arranged to facilitate misappropriation of the entity's assets.
- As indicated in paragraph .A2, the form of a related party transaction may mask its substance. For example, equity distributions or capital contributions may be structured as loans.
- Related party transactions may be subject to period-end window dressing. For example, a stockholder may pay a loan shortly before period-end, but the entity loans the same amount to the stockholder shortly after period-end.
- Certain entities, such as governmental entities or entities operating in regulated industries, may circumvent laws or regulations that limit or restrict their ability to engage in transactions with related parties.

The Identity of the Entity's Related Parties (Ref: par. .14a)

.A9 Information regarding the identity of the entity's related parties is likely to be readily available to management if the entity's information systems record, process, and summarize related party relationships and transactions to enable the entity to meet applicable disclosure requirements. Therefore, management may have a comprehensive list of related

[22]Entities formed to accomplish specific purposes are discussed in paragraphs .A27–.A28 of section 315A. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

parties and changes from the prior period. For recurring engagements, making the inquiries specified by paragraph .14 provides a basis for comparing the information supplied by management with the auditor's record of related parties noted in previous audits.

.A10 However, if the entity does not have such information systems in place, management may not be aware of the existence of all related parties. Nevertheless, the requirement to make the inquiries specified by paragraph .14 still applies because management may be aware of parties that meet the related party definition set out in GAAP. In such a case, however, the auditor's inquiries regarding the identity of the entity's related parties are likely to form part of the auditor's risk assessment procedures and related activities performed in accordance with Statement on Auditing Standards (SAS) No. 145, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, to obtain information regarding the entity's organizational structure, ownership, governance, and business model.[23]

In the particular case of common control relationships, because management is more likely to be aware of such relationships if they have economic significance to the entity, the auditor's inquiries are likely to be more effective if they are focused on whether parties with which the entity engages in significant transactions or shares resources to a significant degree are related parties. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A11 In the context of a group audit, section 600A, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors)*, requires the group engagement team to provide each component auditor with information about related parties prepared by group management and any other related parties of which the group engagement team is aware, including the nature of the entity's relationships and transactions with those related parties.[24] When the entity is a component within a group, this information provides a useful basis for the auditor's inquiries of management regarding the identity of the entity's related parties. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

.A12 The auditor also may obtain some information regarding the identity of the entity's related parties through inquiries of management during the engagement acceptance or continuance process.

.A13 Section 580, *Written Representations*, addresses requirements to obtain management representations, including representations that management and, when appropriate, those charged with governance have[25]

a. disclosed to the auditor the identity of the entity's related parties and all the related party relationships of which they are aware.

---

[23]Paragraph .12 of section 315A. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

[24]Paragraph .41*c* of section 600A, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors)*. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

[25]Paragraph .17 of section 580, *Written Representations*. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

b. appropriately accounted for and disclosed such relationships and transactions.

.A14 The inquiry about the identity of the entity's related parties may include background information concerning the related parties, for example, physical location, industry, size, and extent of operations. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

.A15 *Considerations specific to governmental entities.* Because of the variety of the types of relationships and transactions among governmental and other entities, some of which are highly complex, identifying the nature of the related party relationship and its appropriate treatment in the financial statements relies heavily on a governmental entity's application of its financial reporting framework. Further, in some circumstances, the governmental entity may have no legal jurisdiction over the related party even when the application of the financial reporting framework concludes that the related party's financial statements are to be included in the governmental entity's financial statements. In such cases, the auditor's inquiries regarding the identity of the entity's related parties are likely to include the concepts and guidance from the applicable financial reporting framework to assist in making appropriate assessments about the existence and nature of related party relationships. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

The Entity's Controls Over Related Party Relationships and Transactions (Ref: par. .15)

.A16 Others within the entity are those considered likely to have knowledge of the entity's related party relationships and transactions and the entity's controls over such relationships and transactions, as well as the existence of related parties or relationships or transactions with related parties previously undisclosed to the auditor, and whether such relationships or transactions were with known or previously unknown related parties. These may include, to the extent that they do not form part of management, the following:

- Those charged with governance
- Personnel in a position to initiate, authorize, process, or record significant unusual transactions and those who supervise or monitor such personnel
- The internal audit function
- In-house legal counsel
- The chief ethics officer or equivalent person
- Chief compliance officer
- The human resources director or equivalent person

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2014, by SAS No. 128. Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

.A17 The audit is conducted on the premise that management and, when appropriate, those charged with governance have acknowledged and understand that they have responsibility for the preparation and fair presentation of the financial statements in accordance with the applicable financial reporting framework and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.[26] Accordingly, the preparation of the financial statements requires management, with oversight from those charged with governance, to design, implement, and maintain adequate controls over related party relationships and transactions so that these are identified and appropriately accounted for and disclosed. In their oversight role, those charged with governance monitor how management is discharging its responsibility for such controls. Those charged with governance may, in their oversight role, obtain information from management to enable them to understand the nature and business purpose of the entity's related party relationships and transactions. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

.A18 In meeting the requirement of section 315A to obtain an understanding of internal control, the auditor may consider features or elements relevant to mitigating the risks of material misstatement associated with related party relationships and transactions, such as the following:[27]

- Internal ethical codes, appropriately communicated to the entity's personnel and enforced, governing the circumstances in which the entity may enter into specific types of related party transactions
- Policies and procedures for open and timely disclosure of the interests that management and those charged with governance have in related party transactions
- The assignment of responsibilities within the entity for identifying, recording, summarizing, and disclosing related party transactions
- Timely disclosure and discussion between management and those charged with governance of related party transactions that are also significant unusual transactions, including whether those charged with governance have appropriately challenged the business purpose of such transactions (for example, by seeking advice from external professional advisors)
- Clear guidelines for the approval of related party transactions involving actual or perceived conflicts of interest, such as approval by a subcommittee of those charged with governance comprising individuals independent of management
- Periodic reviews by the internal audit function, when applicable
- Proactive action taken by management to resolve related party disclosure issues, such as by seeking advice from the auditor or external legal counsel
- The existence of whistle-blowing policies and procedures, when applicable

[26] Paragraphs .05 and .A2 of section 200. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]
[27] Paragraph .13 of section 315A. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2014, by SAS No. 128. Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

.A19 Controls over related party relationships and transactions within some entities may be deficient or nonexistent for a number of reasons, such as the following:

- The low importance attached by management to identifying and disclosing related party relationships and transactions
- The lack of appropriate oversight by those charged with governance
- An intentional disregard for such controls because related party disclosures may reveal information that management considers sensitive (for example, the existence of transactions involving family members of management)
- An insufficient understanding by management of the applicable related party disclosure requirements

When such controls are ineffective or nonexistent, the auditor may be unable to obtain sufficient appropriate audit evidence about related party relationships and transactions. If this were the case, the auditor would, in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*, consider the implications for the audit, including the opinion in the auditor's report. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

.A20 Fraudulent financial reporting often involves management override of controls that otherwise may appear to be operating effectively.[28] The risk of management override of controls is higher if management has relationships that involve control or significant influence with parties with which the entity does business because these relationships may present management with greater incentives and opportunities to perpetrate fraud. For example, management's financial interests in certain related parties may provide incentives for management to override controls by (*a*) directing the entity, against its interests, to conclude transactions for the benefit of these parties, or (*b*) colluding with such parties or controlling their actions. Examples of possible fraud include the following:

- Creating fictitious terms of transactions with related parties designed to misrepresent the business purpose of these transactions
- Fraudulently organizing the transfer of assets from or to management or others at amounts significantly above or below market value
- Engaging in complex transactions with related parties, such as entities formed to accomplish specific purposes, that are structured to misrepresent the financial position or financial performance of the entity

[28]Paragraph .31 of section 240. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

[Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

.A21 *Considerations specific to smaller entities.* Controls in smaller entities are likely to be less formal, and smaller entities may have no documented processes for dealing with related party relationships and transactions. An owner-manager may mitigate some of the risks arising from related party transactions or potentially increase those risks through active involvement in all the main aspects of the transactions. For such entities, the auditor may obtain an understanding of the related party relationships and transactions, and any controls that may exist over these, through inquiry of management combined with other procedures, such as observation of management's oversight and review activities and inspection of available relevant documentation. [Paragraph renumbered by the issuance of SAS No. 135, May 2019. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A22 *Authorization and approval of significant transactions and arrangements (Ref: par. .15b).* Authorization involves the granting of permission by a party or parties with the appropriate authority (whether management, those charged with governance, or the entity's shareholders) for the entity to enter into specific transactions in accordance with predetermined criteria, whether or not judgmental. Approval involves those parties' acceptance of the transactions the entity has entered into as having satisfied the criteria on which authorization was granted. Examples of controls the entity may have established to authorize and approve significant transactions and arrangements with related parties or significant unusual transactions and arrangements outside the normal course of business include the following:

- Monitoring controls to identify such transactions and arrangements for authorization and approval
- Approval of the terms and conditions of the transactions and arrangements by management, those charged with governance, or, when applicable, shareholders

[Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

Remaining Alert for Related Party Information When Reviewing Records or Documents

Records or Documents That the Auditor May Inspect (Ref: par. .17)

.A23 During the audit, the auditor may inspect records or documents that indicate the existence of related party relationships or transactions that management has not previously identified or disclosed to the auditor. Examples of those records or documents include the following:

- Third party confirmations obtained by the auditor (in addition to bank and legal confirmations)
- Entity income tax returns

- Information supplied by the entity to regulatory authorities
- Shareholder registers to identify the entity's principal shareholders
- Statements of conflicts of interest from management and those charged with governance
- Records of the entity's investments and those of its benefit plans
- Contracts and agreements with key management or those charged with governance
- Significant contracts and agreements not in the entity's ordinary course of business
- Specific invoices and correspondence from the entity's professional advisors
- Life insurance policies acquired by the entity
- Significant contracts renegotiated by the entity during the period
- Reports of the internal audit function
- Capital financing arrangements with entities other than financial institutions (for example, construction of a governmental entity facility associated with the issuance of debt by a related not-for-profit entity)
- Economic development arrangements for capital additions (for example, a governmental entity's use and eventual ownership of properties and facilities financed and operated by a company or another governmental entity)

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2014, by SAS No. 128. Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

.A24 Additionally, the auditor may review the prior years' audit documentation for information about related party relationships and transactions. If applicable, the auditor may inquire of a predecessor auditor about the predecessor's knowledge of existing relationships and the extent of management involvement in material transactions. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

.A25 *Arrangements that may indicate the existence of previously unidentified or undisclosed related party relationships or transactions.* An arrangement involves a formal or informal agreement between the entity and one or more other parties for such purposes as the following:

- The establishment of a business relationship through appropriate vehicles or structures
- The conduct of certain types of transactions under specific terms and conditions
- The provision of designated services or financial support

Examples of arrangements that may indicate the existence of related party relationships or transactions that management has not previously identified or disclosed to the auditor include the following:

- Participation in unincorporated partnerships with other parties
- Agreements for the provision of services to certain parties under terms and conditions that are outside the entity's normal course of business
- Guarantees and guarantor relationships

[Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

Identification of Significant Unusual Transactions (Ref: par. .18)

.A26 Obtaining further information on significant unusual transactions enables the auditor to evaluate whether fraud risk factors, if any, are present and to identify the risks of material misstatement due to fraud. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

.A27 Examples of transactions that may be significant unusual transactions include the following:

- Complex equity transactions, such as corporate restructurings or acquisitions
- Transactions with offshore entities in jurisdictions with less rigorous corporate governance structures, laws, or regulations
- The leasing of premises or the rendering of management services by the entity to another party if no consideration is exchanged
- Sales transactions with unusually large discounts or returns
- Transactions with circular arrangements (for example, sales with a commitment to repurchase)
- Transactions under contracts whose terms are changed before expiration

[Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

.A28 *Understanding the nature of significant unusual transactions (Ref: par. .18a).* Inquiring into the nature of the significant unusual transactions involves obtaining an understanding of the business purpose of the transactions and the terms and conditions under which these have been entered into.[29] [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

.A29 *Inquiring into whether related parties could be involved (Ref: par. .18b).* A related party could be involved in a significant unusual transaction not only by directly influencing

[29]Paragraph .32*c* of section 240. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

the transaction by being a party to the transaction but also by indirectly influencing it through an intermediary. Such influence may indicate the presence of a fraud risk factor. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

Sharing Related Party Information With the Engagement Team (Ref: par. .19 and .25a)

.A30 Relevant related party information shared with the engagement team members may include the following:

- The nature of the related party relationships and transactions
- Significant or complex related party relationships or transactions that may be associated with significant risks, particularly transactions in which management or those charged with governance are financially involved

The exchange of information is most useful if made at an early stage of the audit. [Paragraph renumbered by the issuance of SAS No. 135, May 2019. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A31 Section 600A addresses the communications that apply to group audits, particularly those that involve component auditors. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

Identification and Assessment of the Risks of Material Misstatement Associated With Related Party Relationships and Transactions

Fraud Risk Factors Associated With a Related Party With Dominant Influence (Ref: par. .21)

.A32 Related parties with the ability to exert control or significant influence may be in a position to exert dominant influence over the entity or its management. Consideration of such behavior is relevant when identifying and assessing the risks of material misstatement due to fraud, as further explained in paragraphs .A33–.A34. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

.A33 Domination of management by a single person or small group of persons without compensating controls is a fraud risk factor.[30] Indicators of dominant influence exerted by a related party include the following:

- The related party has vetoed significant business decisions taken by management or those charged with governance.
- Significant transactions are referred to the related party for final approval.
- Little or no debate occurs among management and those charged with governance regarding business proposals initiated by the related party.

[30]Paragraph .A76 of section 240. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

- Transactions involving the related party (or a close family member of the related party) are rarely independently reviewed and approved.

Dominant influence also may exist, in some cases, if the related party has played a leading role in founding the entity and continues to play a leading role in managing the entity. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

.A34 In the presence of other risk factors, the existence of a related party with dominant influence may indicate significant risks of material misstatement due to fraud. For example

- an unusually high turnover of senior management or professional advisors may suggest unethical or fraudulent business practices that serve the related party's purposes.
- the use of business intermediaries for significant transactions for which there appears to be no clear business justification may suggest that the related party could have an interest in such transactions through control of such intermediaries for fraudulent purposes.

Evidence of the related party's excessive participation in, or preoccupation with, the selection of accounting policies or the determination of significant estimates may suggest the possibility of fraudulent financial reporting. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

Responses to the Risks of Material Misstatement Associated With Related Party Relationships and Transactions (Ref: par. .22)

.A35 The nature, timing, and extent of the further audit procedures that the auditor may select to respond to the assessed risks of material misstatement associated with related party relationships and transactions depend upon the nature of those risks and the circumstances of the entity. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

.A36 Examples of substantive audit procedures that the auditor may perform when the auditor has assessed a significant risk that management has not appropriately accounted for or disclosed specific related party transactions (whether due to fraud or error) include the following:

- Confirming the business purposes, specific terms, or amounts of the transactions with the related parties (this audit procedure may be less effective when the auditor judges that the entity is likely to influence the related parties in their responses to the auditor).
- Inspecting evidence in possession of the other party or parties to the transaction.
- Confirming or discussing significant information with intermediaries, such as banks, guarantors, agents, or attorneys, to obtain a better understanding of the transaction.

- Referring to financial publications, trade journals, credit agencies, and other information sources when there is reason to believe that unfamiliar customers, suppliers, or other business enterprises with which material amounts of business have been transacted may lack substance.
- With respect to material uncollected balances, guarantees, and other obligations, evaluating information about the financial capability of the other party or parties to the transaction. Such information may be obtained from audited financial statements, unaudited financial statements, income tax returns, and reports issued by regulatory agencies, taxing authorities, financial publications, or credit agencies.

[Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

.A37 If the auditor has assessed a significant risk of material misstatement due to fraud as a result of the presence of a related party with dominant influence, the auditor may, in addition to the general requirements of section 240, perform audit procedures such as the following to obtain an understanding of the business relationships that such a related party may have established directly or indirectly with the entity and to determine the need for further appropriate substantive audit procedures:

- Inquiries of, and discussion with, management and those charged with governance
- Inquiries of the related party
- Inspection of significant contracts with the related party
- Appropriate background research, such as through the Internet or specific external business information databases
- Review of employee whistle-blowing reports when these are retained

[Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

.A38 Depending upon the results of the auditor's risk assessment procedures, the auditor may consider it appropriate to obtain audit evidence without testing the entity's controls over related party relationships and transactions. In some circumstances, however, it may not be possible to obtain sufficient appropriate audit evidence from substantive audit procedures alone, regarding the risks of material misstatement associated with related party relationships and transactions. For example, when intragroup transactions between the entity and its components are numerous and a significant amount of information regarding these transactions is initiated, authorized, recorded, processed, or reported electronically in an integrated system, the auditor may determine that it is not possible to design effective substantive audit procedures that by themselves would reduce the risks of material misstatement associated with these transactions to an acceptably low level. In such a case, in meeting the requirement of section 330 to obtain sufficient appropriate audit evidence about the operating effectiveness of controls, the auditor is required to test the entity's controls over the completeness and accuracy of the recording of the related party relationships and transactions.[31] [Paragraph renumbered by the issuance of SAS No. 135, May 2019. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Identification of Previously Unidentified or Undisclosed Related Parties or Significant Related Party Transactions

Communicating Newly Identified Related Party Information to the Engagement Team (Ref: par. .25a)

.A39 Promptly communicating any newly identified related parties to the other members of the engagement team assists them in determining whether this information affects the results of, and conclusions drawn from, risk assessment procedures already performed, including whether the risks of material misstatement need to be reassessed. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

Substantive Procedures Relating to Newly Identified Related Parties or Significant Related Party Transactions (Ref: par. .25d)

.A40 Examples of substantive audit procedures that the auditor may perform relating to newly identified related parties or significant related party transactions include the following:

- Making inquiries regarding the nature of the entity's relationships with the newly identified related parties, including inquiring of parties outside the entity who are presumed to have significant knowledge of the entity and its business, such as legal counsel, principal agents, major representatives, consultants, guarantors, or other close business partners.
- Conducting an analysis of accounting records for transactions with the newly identified related parties. Such an analysis may be facilitated using computer assisted audit techniques.
- Verifying the terms and conditions of the newly identified related party transactions and evaluating whether the transactions have been appropriately accounted for and disclosed.

[Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

Intentional Nondisclosure by Management (Ref: par. .25f)

.A41 The requirements and guidance in section 240 regarding the auditor's responsibilities relating to fraud in an audit of financial statements are relevant when management appears to have intentionally failed to disclose related parties or significant related party transactions to the auditor. The auditor also may consider whether it is necessary to reevaluate the reliability of management's responses to the auditor's inquiries and management's representations to the auditor.[32] [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

[31] Paragraph .08*b* of section 330. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

Identified Related Party Transactions Required To Be Disclosed or Determined to be a Significant Risk

Evaluating the Business Purpose (Ref: par. .26a(i))

.A42 In evaluating the business purpose of a related party transaction that is required to be disclosed in the financial statements or determined to be a significant risk, the auditor may consider the following:

- Whether the transaction
  - — is overly complex (for example, it may involve multiple related parties within a consolidated group)
  - — has unusual terms of trade, such as unusual prices, interest rates, guarantees, and repayment terms
  - — lacks an apparent logical business reason for its occurrence
  - — involves previously unidentified related parties
  - — is processed in an unusual manner
- Whether management has discussed the nature of, and accounting for, such a transaction with those charged with governance
- Whether management is placing more emphasis on a particular accounting treatment rather than giving due regard to the economic substance of the transaction

If management's explanations are materially inconsistent with the terms of the related party transaction, the auditor is required to consider the reliability of management's explanations and representations on other significant matters.[33] [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

.A43 The auditor also may seek to understand the business purpose of such a transaction from the related party's perspective because this may help the auditor to better understand the economic substance of the transaction and why it was carried out. A business purpose from the related party's perspective that appears inconsistent with the nature of its business may represent a fraud risk factor. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

Authorization and Approval of Significant Related Party Transactions (Ref: par. .26b)

.A44 Authorization and approval by management, those charged with governance, or, when applicable, the shareholders of related party transactions that are required to be

---

[32] Paragraphs .22–.24 and .26 of section 580. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

[33] Paragraph .10 of section 500, *Audit Evidence*. [Footnote renumbered by the issuance of SAS No. 135, May 2019. Footnote revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142.]

disclosed in the financial statements or determined to be a significant risk may provide audit evidence that these have been duly considered at the appropriate levels within the entity, and that their terms and conditions have been appropriately reflected in the financial statements. The existence of transactions of this nature that were not subject to such authorization and approval, in the absence of rational explanations based on discussion with management or those charged with governance, may indicate risks of material misstatement due to fraud or error. In these circumstances, the auditor may need to be alert for other transactions of a similar nature. Authorization and approval alone, however, may not be sufficient in concluding whether risks of material misstatement due to fraud are absent because authorization and approval may be ineffective if there has been collusion between the related parties or if the entity is subject to the dominant influence of a related party. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

.A45 *Considerations specific to smaller entities.* A smaller entity may not have the same controls provided by different levels of authority and approval that may exist in a larger entity. Accordingly, when auditing a smaller entity, the auditor may rely to a lesser degree on authorization and approval for audit evidence regarding the validity of related party transactions that are required to be disclosed in the financial statements or determined to be a significant risk. Instead, the auditor may consider performing other audit procedures, such as inspecting relevant documents, confirming specific aspects of the transactions with relevant parties, or observing the owner-manager's involvement with the transactions. The discussion of management domination in paragraph .A33 and the fraud considerations discussed in paragraph .A8 provide further relevant guidance. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

Assertions That Related Party Transactions Were Conducted on Terms Equivalent to Those Prevailing in an Arm's Length Transaction (Ref: par. .27)

.A46 It will generally not be possible to determine whether a particular transaction would have taken place if the parties had not been related or, assuming it would have taken place, what the terms and manner of settlement would have been. Accordingly, it is difficult to substantiate representations that a transaction was consummated on terms equivalent to those that prevail in arm's length transactions. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

.A47 Although audit evidence may be readily available regarding how the price of a related party transaction compares to that of a similar arm's length transaction, practical difficulties ordinarily limit the auditor's ability to obtain audit evidence that all other aspects of the transaction are equivalent to those of the arm's length transaction. For example, although the auditor may be able to confirm that a related party transaction has been conducted at a market price, it may be impracticable to confirm whether other terms and conditions of the transaction (such as credit terms, contingencies, and specific charges) are equivalent to those that would ordinarily be agreed between independent parties. Accordingly, there may be a risk that management's assertion that a related party transaction was conducted on terms equivalent to those prevailing in an arm's length transaction may be materially misstated. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

.A48 The preparation and fair presentation of the financial statements requires management to substantiate an assertion included in financial statements that a related party transaction was conducted on terms equivalent to those prevailing in an arm's length transaction, giving appropriate consideration to the difficulties described in paragraphs .A46–.A47. Management's support for the assertion may include the following:

- Comparing the terms of the related party transaction to those of an identical or similar transaction with one or more unrelated parties
- Engaging an external specialist to determine a market value and confirm market terms and conditions for the transaction
- Comparing the terms of the transaction to known market terms for broadly similar transactions on an open market

[Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

.A49 Evaluating management's support for this assertion may involve one or more of the following:

- Considering the appropriateness of management's process for supporting the assertion
- Verifying the source of the internal or external data supporting the assertion and testing the data to determine their accuracy, completeness, and relevance

[Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

.A50 If the auditor believes that management's assertion is unsubstantiated or the auditor cannot obtain sufficient appropriate audit evidence to support the assertion, the auditor, in accordance with section 705, considers the implications for the audit, including the opinion in the auditor's report. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

Evaluation of the Accounting for, and Disclosure of, Identified Related Party Relationships and Transactions

Materiality Considerations in Evaluating Misstatements (Ref: par. .28)

.A51 Section 450, *Evaluation of Misstatements Identified During the Audit*, requires the auditor to consider both the size and nature of a misstatement and the particular circumstances of its occurrence when evaluating whether the misstatement is material.[34] The significance of the transaction to the financial statement users may not depend solely on the recorded amount of the transaction but also on other specific relevant factors, such as

[34]Paragraph .11*a* of section 450, *Evaluation of Misstatements Identified During the Audit*. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

the nature of the related party relationship. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

Evaluation of Related Party Disclosures (Ref: par. .28a)

.A52 Evaluating the related party disclosures means considering whether the facts and circumstances of the entity's related party relationships and transactions have been appropriately summarized and presented so that the disclosures are understandable. Disclosures of related party transactions may not be understandable if

a. the business purpose and the effects of the transactions on the financial statements are unclear or misstated.

b. key terms, conditions, or other important elements of the transactions necessary for understanding them are not appropriately disclosed.

[Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

Communication With Those Charged With Governance (Ref: par. .29)

.A53 Communicating significant findings or issues arising during the audit in connection with the entity's related parties helps the auditor establish a common understanding with those charged with governance of the nature and resolution of these matters.[35] Examples of significant related party findings or issues include the following:

- Nondisclosure (whether or not intentional) by management to the auditor of related parties or significant related party transactions, which may alert those charged with governance to significant related party relationships and transactions of which they may not have been previously aware
- The identification of significant related party transactions that have not been appropriately authorized and approved, which may give rise to suspected fraud
- The identification of significant related party transactions that appear to lack a business purpose
- Disagreement with management regarding the accounting for, and disclosure of, significant related party transactions
- The inclusion of a statement in the financial statements that a transaction with a related party was conducted on terms equivalent to those prevailing in an arm's-length transaction
- Noncompliance with applicable laws or regulations prohibiting or restricting specific types of related party transactions

[35] Paragraph .A10 of section 230 provides further guidance on the nature of significant findings or issues arising during the audit. [Footnote renumbered by the issuance of SAS No. 135, May 2019.]

- Difficulties in identifying the party that ultimately controls the entity

[Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

AU-C Section 560

Subsequent Events and Subsequently Discovered Facts

Source: SAS No. 122; SAS No. 133; SAS No. 135; SAS No. 136.

Effective for audits of financial statements for periods ending on or after December 15, 2012, unless otherwise indicated.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibilities relating to subsequent events and subsequently discovered facts in an audit of financial statements. It also addresses a predecessor auditor's responsibilities for subsequent events and subsequently discovered facts when reissuing the auditor's report on previously issued financial statements that are to be presented on a comparative basis with audited financial statements of a subsequent period. (Ref: par. .A1)

Subsequent Events and Subsequently Discovered Facts

.02 Financial statements may be affected by certain events that occur after the date of the financial statements. Many financial reporting frameworks specifically refer to such events. Such financial reporting frameworks ordinarily identify two types of events:

a. Those that provide evidence of conditions that existed at the date of the financial statements

b. Those that provide evidence of conditions that arose after the date of the financial statements

.03 Section 700, *Forming an Opinion and Reporting on Financial Statements*, and section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, explain that the date of the auditor's report informs the user of the auditor's report that the auditor has considered the effect of events and transactions of which the auditor becomes aware and that occurred up to that date.[1] Accordingly, this section addresses the auditor's responsibilities relating to subsequent events occurring

---

[1]Paragraph .A55 of section 700, *Forming an Opinion and Reporting on Financial Statements*, and paragraph .A119 of section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, as applicable. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

between the date of the financial statements and the date of the auditor's report that require adjustment of, or disclosure in, the financial statements. It also addresses the auditor's responsibilities relating to subsequently discovered facts that become known to the auditor after the date of the auditor's report. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

Effective Date

.04 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objectives

.05 The objectives of the auditor are to

a. obtain sufficient appropriate audit evidence about whether events occurring between the date of the financial statements and the date of the auditor's report that require adjustment of, or disclosure in, the financial statements are appropriately reflected in those financial statements in accordance with the applicable financial reporting framework and

b. respond appropriately to facts that become known to the auditor after the date of the auditor's report that, had they been known to the auditor at that date, may have caused the auditor to revise the auditor's report.

.06 The objective of a predecessor auditor who is requested to reissue a previously issued auditor's report on financial statements that are to be presented on a comparative basis with audited financial statements of a subsequent period is to perform specified procedures to determine whether the previously issued auditor's report is still appropriate before such report is reissued.

Definitions

.07 For purposes of generally accepted auditing standards, the following terms have the meanings attributed as follows:

Date of the auditor's report. The date that the auditor dates the report on the financial statements, in accordance with sections 700 or 703.[2] (Ref: par. .A14)

Date of the financial statements. The date of the end of the latest period covered by the financial statements.

Subsequent events. Events occurring between the date of the financial statements and the date of the auditor's report.

[2]Paragraph .43 of section 700, or paragraphs .82 and .126 of section 703. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

Subsequently discovered facts. Facts that become known to the auditor after the date of the auditor's report that, had they been known to the auditor at that date, may have caused the auditor to revise the auditor's report.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136]

.08 Reference to *audited financial statements* in this section means *the financial statements, together with the auditor's report thereon*.

Requirements

Subsequent Events

.09 The auditor should perform audit procedures designed to obtain sufficient appropriate audit evidence that all subsequent events that require adjustment of, or disclosure in, the financial statements have been identified. The auditor is not, however, expected to perform additional audit procedures on matters to which previously applied audit procedures have provided satisfactory conclusions. (Ref: par. .A2–.A3)

.10 The auditor should perform the procedures required by paragraph .09 so that they cover the period from the date of the financial statements to the date of the auditor's report or as near as practicable thereto. The auditor should take into account the auditor's risk assessment in determining the nature and extent of such audit procedures, which should include the following: (Ref: par. .A4–.A5 and .A8–.A10)

a. Obtaining an understanding of any procedures that management has established to ensure that subsequent events are identified

b. Inquiring of management and, when appropriate, those charged with governance about whether any subsequent events have occurred that might affect the financial statements (Ref: par. .A6)

c. Reading minutes, if any, of the meetings of the entity's owners, management, and those charged with governance that have been held after the date of the financial statements and inquiring about matters discussed at any such meetings for which minutes are not yet available (Ref: par. .A4 and .A7)

d. Reading the entity's latest subsequent interim financial statements, if any

.11 If, as a result of the procedures performed as required by paragraphs .09–.10, the auditor identifies subsequent events that require adjustment of, or disclosure in, the financial statements, the auditor should determine whether each such event is appropriately reflected in the financial statements in accordance with the applicable financial reporting framework.

Subsequently Discovered Facts That Become Known to the Auditor Before the Report Release Date

.12 The auditor is not required to perform any audit procedures regarding the financial statements after the date of the auditor's report. However, if a subsequently discovered fact becomes known to the auditor before the report release date,[3] the auditor should

a. discuss the matter with management and, when appropriate, those charged with governance.

b. determine whether the financial statements need revision and, if so, inquire how management intends to address the matter in the financial statements.[4]

.13 If management revises the financial statements, the auditor should perform the audit procedures necessary in the circumstances on the revision. The auditor also should either (Ref: par. .A11–.A16)

a. date the auditor's report as of a later date; extend the audit procedures referred to in paragraphs .09–.10 to the new date of the auditor's report on the revised financial statements; and request written representations from management as of the new date of the auditor's report, in accordance with the requirements of section 580, *Written Representations*, or

b. include an additional date in the auditor's report on the revised financial statements that is limited to the revision (that is, dual-date the auditor's report for that revision), thereby indicating that the auditor's procedures subsequent to the original date of the auditor's report are limited solely to the revision of the financial statements described in the relevant note to the financial statements. In this circumstance, the auditor should request written representations from management as of the additional date in the auditor's report about whether

    i. any information has come to management's attention that would cause management to believe that any of the previous representations should be modified.

    ii. any other events have occurred subsequent to the date of the financial statements that would require adjustment to, or disclosure in, those financial statements.

.14 If management does not revise the financial statements in circumstances when the auditor believes they need to be revised, the auditor should modify the opinion (express a qualified opinion or an adverse opinion), as required by section 705, *Modifications to the Opinion in the Independent Auditor's Report*. (Ref: par. .A17)

---

[3]The term *report release date* is defined in paragraph .06 of section 230, *Audit Documentation*.

[4]There may be instances in which the auditor applies the relevant requirements in this section after the date of the auditor's report as described in section 925, *Filings With the U.S. Securities and Exchange Commission Under the Securities Act of 1933*, and section 945, *Auditor Involvement With Exempt Offering Documents*. [Footnote added, effective for exempt offering documents with which the auditor is involved that are initially distributed, circulated, or submitted on or after June 15, 2018, by SAS No. 133.]

Subsequently Discovered Facts That Become Known to the Auditor After the Report Release Date

.15 If a subsequently discovered fact becomes known to the auditor after the report release date, the auditor should (Ref: par. .A18–.A20)

a. discuss the matter with management and, when appropriate, those charged with governance.

b. determine whether the financial statements need revision and, if so, inquire how management intends to address the matter in the financial statements.

.16 If management revises the financial statements, the auditor should

a. apply the requirements of paragraph .13.

b. if the audited financial statements (before revision) have been made available to third parties, assess whether the steps taken by management are timely and appropriate to ensure that anyone in receipt of those financial statements is informed of the situation, including that the audited financial statements are not to be relied upon. If management does not take the necessary steps, the auditor should apply the requirements of paragraph .18. (Ref: par. .A21–.A22)

c. if the auditor's opinion on the revised financial statements differs from the opinion the auditor previously expressed, disclose the following matters in an emphasis-of-matter or other-matter paragraph, in accordance with section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report*:

   i. The date of the auditor's previous report

   ii. The type of opinion previously expressed

   iii. The substantive reasons for the different opinion

   iv. That the auditor's opinion on the revised financial statements is different from the auditor's previous opinion

.17 If management does not revise the financial statements in circumstances when the auditor believes they need to be revised, then

a. if the audited financial statements have not been made available to third parties, the auditor should notify management and those charged with governance—unless all of those charged with governance are involved in managing the entity[5]—not to make the audited financial statements available to third parties before the necessary revisions have been made and a new auditor's report on the revised financial statements has been provided. If the audited financial statements are, nevertheless, subsequently

[5]Paragraph .14 of section 260, *The Auditor's Communication With Those Charged With Governance*. [Footnote renumbered by the issuance of SAS No. 133, June 2018.]

made available to third parties without the necessary revisions, the auditor should apply the requirements of paragraph .17*b*.

b. if the audited financial statements have been made available to third parties, the auditor should assess whether the steps taken by management are timely and appropriate to ensure that anyone in receipt of the audited financial statements is informed of the situation, including that the audited financial statements are not to be relied upon. If management does not take the necessary steps, the auditor should apply the requirements of paragraph .18. (Ref: par. .A21–.A22)

.18 If management does not take the necessary steps to ensure that anyone in receipt of the audited financial statements is informed of the situation, as provided by paragraphs .16*b* or .17*b*, the auditor should notify management and those charged with governance—unless all of those charged with governance are involved in managing the entity[6]—that the auditor will seek to prevent future reliance on the auditor's report. If, despite such notification, management or those charged with governance do not take the necessary steps, the auditor should take appropriate action to seek to prevent reliance on the auditor's report. (Ref: par. .A23–.A26)

Predecessor Auditor's Reissuance of the Auditor's Report in Comparative Financial Statements (Ref: par. .A27–.A28)

Predecessor Auditor's Report Reissued (Ref: par. .A29–.A30)

.19 Before reissuing a previously issued auditor's report on financial statements that are to be presented on a comparative basis with audited financial statements of a subsequent period, the predecessor auditor should perform the following procedures to determine whether the previously issued auditor's report is still appropriate:

a. Read the financial statements of the subsequent period to be presented on a comparative basis

b. Compare the prior period financial statements that the predecessor auditor reported on with the financial statements of the subsequent period to be presented on a comparative basis

c. Inquire of, and request written representations from, management of the former client, at or near the date of reissuance, about whether

   i. any information has come to management's attention that would cause management to believe that any of the previous representations should be modified

   ii. any events have occurred subsequent to the date of the latest prior period financial statements reported on by the predecessor auditor that would require adjustment to, or disclosure in, those financial statements

[6]Paragraph .14 of section 260. [Footnote renumbered by the issuance of SAS No. 133, June 2018.]

d. Obtain a representation letter from the successor auditor stating whether the successor auditor's audit revealed any matters that, in the successor auditor's opinion, might have a material effect on, or require disclosure in, the financial statements reported on by the predecessor auditor

.20 If, in performing the procedures in paragraph .19, a subsequently discovered fact becomes known to the predecessor auditor, then

a. the predecessor auditor should apply the requirements of paragraph .15.

b. if management revises the financial statements and the predecessor auditor plans to issue a new auditor's report on the revised financial statements, the predecessor auditor should apply the requirements of paragraph .16.

c. if management revises the financial statements and the predecessor auditor does not plan to issue a new auditor's report on the revised financial statements, or if management does not revise the financial statements in circumstances when the predecessor auditor believes they need to be revised, the predecessor auditor should assess the steps taken by management, as required by paragraph .17*b*.

Application and Other Explanatory Material

Scope of This Section (Ref: par. .01)

.A1 When audited financial statements are included in other documents subsequent to their issuance, the auditor may have additional responsibilities to consider, such as legal or regulatory requirements involving private placement offerings, exempt public offerings (including offerings pursuant to Securities and Exchange Commission [SEC] Rule 144A), or other offerings of securities to the public in jurisdictions outside the United States. Section 720, *The Auditor's Responsibilities Relating to Other Information Included in Annual Reports*, may be applied, adapted as necessary in the circumstances, to such other documents. Section 925, *Filings With the U.S. Securities and Exchange Commission Under the Securities Act of 1933*, addresses the auditor's responsibilities in connection with financial statements of a nonissuer included in a registration statement filed with the SEC under the Securities Act of 1933, as amended. Section 945, *Auditor Involvement With Exempt Offering Documents*, addresses the auditor's responsibilities when an auditor is involved with an exempt offering document. [As amended, effective for exempt offering documents with which the auditor is involved that are initially distributed, circulated, or submitted on or after June 15, 2018, by SAS No. 133. Revised, December 2021, to reflect conforming changes necessary due to the issuance of SAS No. 137.]

Subsequent Events (Ref: par. .09–.11)

.A2 The period between the date of the financial statements and the date of the auditor's report may vary from a relatively short period to one or more months. Some phases of the audit will be performed during this period, whereas other phases will be substantially completed on or before the date of the financial statements. As an audit approaches completion, the auditor is not expected to perform additional audit procedures on matters to which previously applied audit procedures have provided satisfactory conclusions. New information, however, may be inconsistent with the audit evidence obtained, in which case the auditor is required to determine what modifications or additions to audit procedures are necessary to resolve the matter and consider the effect of the matter, if any, on other aspects of the audit.[7]

.A3 Depending on the auditor's risk assessment, the audit procedures required by paragraphs .09–.10 may include procedures necessary to obtain sufficient appropriate audit evidence involving the review or testing of accounting records or transactions occurring between the date of the financial statements and the date of the auditor's report. The audit procedures required by paragraphs .09–.10 are in addition to procedures that the auditor may perform for other purposes that, nevertheless, may provide evidence about subsequent events (for example, to obtain audit evidence for account balances as of the date of the financial statements, such as cut-off procedures or procedures regarding subsequent receipts of accounts receivable).

.A4 Paragraph .10 stipulates certain audit procedures that the auditor is required to perform pursuant to paragraph .09. However, the subsequent events procedures that the auditor performs may depend on the information that is available and, in particular, the manner in which the accounting records have been maintained and the extent to which information has been prepared since the date of the financial statements. When interim financial statements (whether for internal or external purposes) or minutes of meetings of management or those charged with governance have not been prepared, relevant audit procedures may take the form of inspection of available books and records.

.A5 In addition to the audit procedures required by paragraphs .09–.10, the auditor may consider it necessary and appropriate to read the entity's latest available budgets, cash flow forecasts, and other related management reports for periods after the date of the financial statements. Paragraphs .A6–.A10 provide guidance on additional matters that the auditor may consider in the course of performing subsequent events procedures.

Inquiry (Ref: par. .10b)

.A6 In inquiring of management and, when appropriate, those charged with governance about whether any subsequent events have occurred that might affect the financial statements, the auditor may inquire about the current status of items that were accounted for on the basis of preliminary or inconclusive data and may make specific inquiries about the following matters:

- Whether new commitments, borrowings, or guarantees have been entered into
- Whether sales or acquisitions of assets have occurred or are planned

[7]Paragraph .10 of section 500, *Audit Evidence*. [Footnote renumbered by the issuance of SAS No. 133, June 2018. Footnote revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142.]

- Whether there have been increases in capital or issuance of debt instruments, such as the issue of new shares or debentures, or an agreement to merge or liquidate has been made or is planned
- Whether any assets have been appropriated by the government or destroyed (for example, by fire or flood)
- Whether there have been any developments regarding contingencies
- Whether any unusual accounting adjustments have been made or are contemplated
- Whether any events have occurred or are likely to occur that will bring into question the appropriateness of accounting policies used in the financial statements, as would be the case, for example, if such events call into question the validity of the going concern assumption
- Whether any events have occurred that are relevant to the measurement of estimates or provisions made in the financial statements
- Whether any events have occurred that are relevant to the recoverability of assets
- Whether there have been any changes in the entity's related parties
- Whether there have been any significant new related party transactions
- Whether the entity has entered into any significant unusual transactions

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

*Reading Minutes (Ref: **par. .10c**)*

Considerations Specific to Governmental Entities

.A7 In audits of governmental entities, the auditor may, in performing the requirement in paragraph .10*c*, read the official records of relevant proceedings of the legislative or governing body, or other relevant regulatory or oversight body, and inquire about matters addressed in proceedings for which official records are not yet available.

Inquiries of Legal Counsel

.A8 Section 501, *Audit Evidence—Specific Considerations for Selected Items*, addresses the auditor's responsibility to seek direct communication with the entity's legal counsel concerning litigation, claims, and assessments through the date of the auditor's report.

Written Representations

.A9 Section 580 requires the auditor to request that management and, when appropriate, those charged with governance provide written representations as of the date of the auditor's report that all events occurring subsequent to the date of the financial statements, and for which the applicable financial reporting framework requires adjustment or disclosure, have been adjusted or disclosed.[8] The auditor may consider whether written representations covering particular subsequent events or significant matters disclosed to the auditor in the performance of the audit procedures required by paragraphs .09–.10 may be necessary to support other audit evidence to obtain sufficient appropriate audit evidence.

.A10 The applicable financial reporting framework may require management to evaluate subsequent events through the date the financial statements are issued or available to be issued and to disclose the date through which subsequent events were evaluated in the financial statements. In most cases, this will result in the date that management discloses as the date through which management has evaluated subsequent events being the same date as the auditor's report. This is because section 700 or section 703 requires the auditor's report to be dated no earlier than the date on which the auditor has obtained sufficient appropriate audit evidence on which to base the auditor's opinion on the financial statements, including evidence that the audit documentation has been reviewed; that all the statements that comprise the financial statements, including related notes, have been prepared; and that management has asserted that they have taken responsibility for those financial statements.[9] Also, the auditor is concerned with subsequent events that require adjustment of, or disclosure in, the financial statements through the date of the auditor's report or as near as practicable thereto. Therefore, management's representations concerning events occurring subsequent to the date of the financial statements and for which the applicable financial reporting framework requires adjustment or disclosure are required to be made as of the date of the auditor's report on the financial statements.[10] To align the date disclosed by management in the financial statements, the representation letter date, and the auditor's report date, the auditor may discuss the dating requirements with management and may also include, in the terms of the audit engagement,[11] that management will not date the subsequent event disclosure earlier than the date of the representation letter (also the date of the auditor's report). [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

Subsequently Discovered Facts That Become Known to the Auditor Before the Report Release Date (Ref: par. .12–.14)

Dating the Auditor's Report on the Revised Financial Statements (Ref: par. .13)

.A11 The auditor has two methods available for dating the auditor's report when the financial statements are revised after the original date of the auditor's report. The auditor may include an additional date limited to the revision (that is, dual-date the auditor's report for that revision) or date the auditor's report as of a later date. In the former instance, the auditor's responsibility for events occurring subsequent to the original date of the

---

[8]Paragraph .18 of section 580, *Written Representations*. [Footnote renumbered by the issuance of SAS No. 133, June 2018.]

[9]Paragraph .43 of section 700, or paragraphs .82 and .126 of section 703. [Footnote renumbered by the issuance of SAS No. 133, June 2018. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

[10]Paragraph .20 of section 580. [Footnote renumbered by the issuance of SAS No. 133, June 2018.]

[11]Paragraph .A24 of section 210A, *Terms of Engagement*. [Footnote renumbered by the issuance of SAS No. 133, June 2018.]

auditor's report is limited to the specific event described in the relevant note to the financial statements. In the latter instance, the auditor's responsibility for subsequent events extends to the new date of the auditor's report on the revised financial statements.

.A12 Generally, when the revision of the financial statements is specifically limited to the effects of the specific event described in the relevant note to the financial statements, the auditor may decide to limit the audit procedures to that revision, as provided by paragraph .13*b*. Even when the financial statements are revised and disclosure of the revision is made, the auditor is not precluded from extending the audit procedures referred to in paragraphs .09–.10 to the new date of the auditor's report on the revised financial statements, as provided by paragraph .13*a*.

.A13 When, in the circumstances described in paragraph .13*b*, the auditor includes an additional date limited to the revision (a dual date), the original date of the auditor's report on the financial statements prior to their subsequent revision by management remains unchanged because this date informs the reader about when the auditor obtained sufficient appropriate audit evidence with respect to those financial statements prior to their subsequent revision. However, an additional date is included in the auditor's report to inform users that the auditor's procedures subsequent to the original date of the auditor's report were limited to the subsequent revision of the financial statements. The following is an illustration of such wording:

(Date of auditor's report), except as to note Y, which is as of (date of completion of audit procedures limited to revision described in note Y).

.A14 As discussed in paragraph .A10, section 700 or section 703, as applicable, requires the auditor's report to be dated no earlier than the date on which the auditor has obtained sufficient appropriate audit evidence on which to base the auditor's opinion on the financial statements.[12] When management revises the financial statements and the auditor reports on the revised financial statements, the new date (or the dual date) included in the auditor's report cannot be earlier than the date on which the auditor carried out the audit procedures necessary in the circumstances on the revision, including that the documentation has been reviewed and management has prepared and asserted that they have taken responsibility for the revised financial statements. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

Updated Written Representations

.A15 Section 580 requires the date of the written representations to be as of the date of the auditor's report on the financial statements.[13] If management revises the financial statements and, in accordance with paragraph .13*a*, the auditor dates the auditor's report on the revised financial statements as of a later date, written representations from

[12] Paragraph .43 of section 700, or paragraphs .82 and .126 of section 703. [Footnote renumbered by the issuance of SAS No. 133, June 2018. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

[13] Paragraph .20 of section 580. [Footnote renumbered by the issuance of SAS No. 133, June 2018.]

management are required as of the later date to comply with section 580. The auditor may request management to provide a new representation letter or may agree with management on a form of written representations that update the written representations previously provided by addressing whether there are any changes to such written representations and, if so, what they are. An updated written representation letter may be in the form of the representations required by paragraph .13*b* when the auditor dual-dates the auditor's report for the revision.

Unaudited Events

.A16 To prevent the financial statements from being misleading, management may revise the financial statements by disclosing an event that arose after the original date of the auditor's report. When such event is included in a separate financial statement note that is labeled as unaudited (for example, when the event is captioned "Event (Unaudited) Subsequent to the Date of the Independent Auditor's Report"), the auditor is not required to perform any procedures on the revision, and the auditor's report carries the original date of the auditor's report.

Considerations Specific to Governmental Entities (Ref: par. .14)

.A17 In audits of governmental entities in which management does not revise the financial statements, the actions taken in accordance with paragraph .14 may also include reporting separately to the legislative or governing body, or other relevant regulatory or oversight body, on the implications of the subsequent event for the financial statements and the auditor's report and, if applicable, for the entity's internal control over financial reporting and compliance with law or regulation.

Subsequently Discovered Facts That Become Known to the Auditor After the Report Release Date (Ref: par. .15–.18)

Auditor's Responsibility After the Report Release Date (Ref: par. .15)

.A18 New information may come to the auditor's attention that, had such information been known to the auditor at the date of the auditor's report, may have caused the auditor to revise the auditor's report. When such information becomes known to the auditor after the report release date, the requirements in paragraphs .15–.18 apply, even if the auditor has withdrawn or been discharged.

.A19 Because of the variety of conditions that might be encountered, the specific procedures or actions to be taken in a particular case may vary somewhat in light of the circumstances. For example, in determining whether the financial statements need revision, as required by paragraph .15*b*, the auditor may consider, in addition to the requirements of the applicable financial reporting framework, whether the auditor believes there are persons currently relying or likely to rely on the financial statements who would attach importance to the subsequently discovered facts. Consideration may be given, among other things, to the issuance of audited financial statements for a subsequent period, the time elapsed since the financial statements were issued and the auditor's report released, and any legal implications.

.A20 Section 708, *Consistency of Financial Statements*, addresses the auditor's evaluation of the consistency of the financial statements, including changes to previously issued financial statements, and the effect of that evaluation on the auditor's report.

Revision of Financial Statements by Management (Ref: par. .16b and .17b)

.A21 The steps taken by management to ensure that anyone in receipt of the audited financial statements is informed of the situation, including that the audited financial statements are not to be relied upon, depend on the circumstances. Management's steps may include the following:

- Notification to anyone who is known to be relying or who is likely to rely on the financial statements and the auditor's report that they are not to be relied upon and that revised financial statements, together with a new auditor's report, will be issued. This may be necessary when the issuance of revised financial statements and a new auditor's report is not imminent.
- Issuing, as soon as practicable, revised financial statements with appropriate disclosure of the matter.
- Issuing the subsequent period's financial statements with appropriate disclosure of the matter. This may be appropriate when issuance of the subsequent period's audited financial statements is imminent.

Considerations Specific to Governmental Entities

.A22 For audits performed under *Government Auditing Standards*, additional requirements exist, such as those pertaining to the evaluation of the timeliness and appropriateness of management's disclosure and actions to determine and correct misstatements in previously issued financial statements, reporting on the revised financial statements, and reporting directly to appropriate officials when management does not take the necessary steps.

Auditor Action to Seek to Prevent Reliance on the Auditor's Report (Ref: par. .18)

.A23 If management made the audited financial statements available to third parties despite the auditor's notification not to do so, or if the auditor believes that management or those charged with governance have failed to take the necessary steps to prevent reliance on the auditor's report on the previously issued audited financial statements despite the auditor's prior notification that the auditor will take action to seek to prevent such reliance, the auditor's course of action depends upon the auditor's legal rights and obligations. Consequently, the auditor may consider it appropriate to seek legal advice.

.A24 The actions that the auditor may take to seek to prevent reliance on the auditor's report may depend upon the degree of certainty of the auditor's knowledge that persons or entities exist who are currently relying or who will rely on the audited financial statements, and who would attach importance to the information, and the auditor's ability as a practical matter to communicate with them. In addition to seeking legal advice, the auditor may consider taking the following steps to the extent applicable:

- Notify management and those charged with governance that the auditor's report is not to be relied upon.
- Notify regulatory agencies having jurisdiction over the entity that the auditor's report is not to be relied upon, including a request that the agency take whatever steps it may deem appropriate to accomplish the necessary disclosure.
- Notify anyone known to the auditor to be relying on the financial statements that the auditor's report is not to be relied upon. In some instances, it will not be practicable for the auditor to give appropriate individual notification to stockholders or investors at large whose identities are unknown to the auditor; notification to a regulatory agency having jurisdiction over the entity will usually be the only practical means for the auditor to provide appropriate disclosure, together with a request that the agency take whatever steps it may deem appropriate to accomplish the necessary disclosure.

.A25 Depending on the circumstances, if the auditor is able to determine that the financial statements need revision, the auditor's notification to anyone in receipt of the audited financial statements may, if permitted by law, regulation, and relevant ethical requirements,

- include a description of the nature of the matter and of its effect on the financial statements, avoiding comments concerning the conduct or motives of any person.
- describe the effect that the matter would have had on the auditor's report if it had been known to the auditor at the date of the report and had not been reflected in the financial statements.

.A26 If the auditor was not able to determine whether the financial statements need revision, the notification to anyone in receipt of the audited financial statements may indicate that information became known to the auditor and that, if the information is true, the auditor believes that the auditor's report is not to be relied upon. The specific matter need not be detailed in the notification.

Predecessor Auditor's Reissuance of the Auditor's Report in Comparative Financial Statements (Ref: par. .19–.20)

.A27 An auditor may be requested by management or those charged with governance to furnish additional copies of the auditor's report after the report release date. Providing additional copies of the auditor's report is not a report reissuance. In such cases, the auditor has no responsibility to make further investigation or inquiry about events that may have occurred during the period between the date of the auditor's report and the date of the release of the additional copies.

.A28 Additional responsibilities relating to the reissuance of a previously issued auditor's report in connection with financial statements of a nonissuer included in a registration statement filed with the SEC under the Securities Act of 1933, as discussed in paragraph .A1, are addressed in section 925.

Predecessor Auditor's Report Reissued

.A29 A predecessor auditor may be requested to reissue the auditor's report by a former client when prior period financial statements audited by the predecessor auditor are to be presented on a comparative basis with audited financial statements of a subsequent period. A predecessor auditor's knowledge of the current affairs of the former client is limited in the absence of a continuing relationship. Accordingly, a predecessor auditor may be in a position to reissue the report if the predecessor auditor is able to make satisfactory arrangements with the former client to perform this service and if the predecessor auditor complies with paragraph .19 to determine whether the previous auditor's report is still appropriate. A predecessor auditor is not required to reissue the auditor's report. Either the current form or manner of presentation of the financial statements of the prior period or one or more events might make a predecessor auditor's previous report inappropriate.

.A30 Section 700 and section 703, as applicable, address the auditor's responsibilities when the auditor is engaged to audit and report on a revision to prior period financial statements audited by the predecessor auditor.[14] It also addresses the auditor's responsibilities when the predecessor auditor's report will not be presented.[15] [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

[14] Paragraph .A75 of section 700, and paragraph .A129 of section 703, as applicable. [Footnote renumbered by the issuance of SAS No. 133, June 2018. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

[15] Paragraph .57 of section 700, and paragraph .93 of section 703, as applicable. [Revised, July 2017, to reflect conforming changes necessary due to the issuance of SAS No. 131. AU-C Section 570

The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern

(Supersedes SAS No. 126.)

Source: SAS No. 132; SAS No. 134; SAS No. 136.

Effective for audits of financial statements for periods ending on or after December 15, 2017, unless otherwise indicated.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibilities in the audit of financial statements relating to the entity's ability to continue as a going concern and the implications for the auditor's report. This section applies to all audits of a complete set of financial statements, regardless of whether the financial statements are prepared in accordance with a general purpose or a special purpose framework.[1]

.02 Under the going concern basis of accounting, the financial statements are prepared on the assumption that the entity is a going concern and will continue its operations for a reasonable period of time. A complete set of general purpose financial statements is prepared using the going concern basis of accounting, unless the liquidation basis of accounting is appropriate. (Ref: par. .A1–.A2)

.03 Special purpose financial statements[2] may or may not be prepared in accordance with an applicable financial reporting framework for which the going concern basis of accounting is relevant. As a result, when the going concern basis of accounting is not relevant, the requirement of this section to obtain sufficient appropriate audit evidence regarding, and conclude on, the appropriateness of management's use of the going concern basis of accounting do not apply. However, irrespective of whether the going concern basis of accounting is relevant in the preparation of special purpose financial statements, the requirements of this section apply regarding the auditor's responsibilities to perform the following:

---

[1]*General purpose* and *special purpose frameworks* are defined in section 700, *Forming an Opinion and Reporting on Financial Statements*, and section 800, *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks* , respectively.

[2]Section 800 addresses audits of a complete set of financial statements prepared in accordance with special purpose frameworks.

a. Conclude, based on the audit evidence obtained, whether substantial doubt exists about an entity's ability to continue as a going concern for a reasonable period of time

b. Evaluate the possible financial statement effects, including the adequacy of disclosure regarding the entity's ability to continue as a going concern for a reasonable period of time

.04 The auditor's responsibilities under this section apply even if the applicable financial reporting framework used in the preparation of the financial statements does not include an explicit requirement for management to make a specific evaluation of the entity's ability to continue as a going concern.

Responsibility for the Evaluation of the Entity's Ability to Continue as a Going Concern

When Management Is Required to Make a Specific Evaluation Under the Applicable Financial Reporting Framework

.05 Some financial reporting frameworks explicitly require management to evaluate the entity's ability to continue as a going concern for a reasonable period of time and provide disclosures related to the entity's ability to continue as a going concern. For example, FASB *Accounting Standards Codification*® (ASC) requires management to evaluate whether there are conditions and events, considered in the aggregate, that raise substantial doubt about an entity's ability to continue as a going concern within one year after the date that the financial statements are issued (or within one year after the date that the financial statements are available to be issued, when applicable).[3] Similarly, GASB Statement No. 56, *Codification of Accounting and Financial Reporting Guidance Contained in the AICPA Statements on Auditing Standards,* requires financial statement preparers to evaluate whether there is substantial doubt about a governmental entity's ability to continue as a going concern for 12 months beyond the date of the financial statements. GASB Statement No. 56 further requires that, if information is currently known to the governmental entity that may raise substantial doubt shortly thereafter (for example, within an additional three months), such information should also be considered.[4] Law or regulation may also set forth requirements regarding management's responsibility to evaluate the entity's ability to continue as a going concern for a defined period of time and related financial statement disclosures. (Ref: par. .A3)

.06 Management's evaluation of the entity's ability to continue as a going concern for a reasonable period of time involves making a judgment, at a particular point in time, about inherently uncertain future outcomes of conditions or events. The following factors are relevant to that judgment:

a. The degree of uncertainty associated with the outcome of a condition or event increases significantly the further into the future a condition or event or the outcome

[3] "Pending Content" in FASB *Accounting Standards Codification* (ASC) 205-40-50-1.

[4] Paragraph 16 of GASB Statement No. 56, *Codification of Accounting and Financial Reporting Guidance Contained in the AICPA Statements on Auditing Standards*.

occurs. For that reason, most financial reporting frameworks that require an explicit management evaluation specify the period for which management is required to take into account all available information.

b. The size and complexity of the entity, the nature and condition of its business, and the degree to which it is affected by external factors affect the judgment regarding the outcome of conditions or events.

c. Any judgment about the future is based on conditions or events that are known and reasonably knowable at the date that the financial statements are issued (or at the date that the financial statements are available to be issued, when applicable). Subsequent events may result in outcomes that are inconsistent with judgments that were reasonable at the time they were made. (Ref: par. .A4–.A5)

When Management Is Not Required to Make a Specific Evaluation Under the Applicable Financial Reporting Framework

.07 In other financial reporting frameworks, there may be no explicit requirement for management to make a specific assessment of the entity's ability to continue as a going concern. Nevertheless, when the going concern basis of accounting is a fundamental principle in the preparation of financial statements, as discussed in paragraphs .02–.03, the preparation of the financial statements requires management to assess the entity's ability to continue as a going concern even if the financial reporting framework does not include an explicit requirement to do so.

Inherent Limitations in Evaluating the Entity's Ability to Continue as a Going Concern

.08 The potential effects of inherent limitations on the auditor's ability to detect material misstatements are greater for future events or conditions, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. The auditor cannot predict such future conditions or events. Accordingly, the absence of any reference to substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in an auditor's report cannot be viewed as a guarantee of the entity's ability to continue as a going concern for a reasonable period of time.

Effective Date

.09 This section is effective for audits of financial statements for periods ending on or after December 15, 2017.

Objectives

.10 The objectives of the auditor are as follows:

a. To obtain sufficient appropriate audit evidence regarding, and to conclude on, the appropriateness of management's use of the going concern basis of accounting, when relevant, in the preparation of the financial statements

b. To conclude, based on the audit evidence obtained, whether substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time exists

c. To evaluate the possible financial statement effects, including the adequacy of disclosure regarding the entity's ability to continue as a going concern for a reasonable period of time

d. To report in accordance with this section

Definition

.11 For purposes of this section, the following term has the meaning attributed as follows:

Reasonable period of time. The period of time required by the applicable financial reporting framework or, if no such requirement exists, within one year after the date that the financial statements are issued (or within one year after the date that the financial statements are available to be issued, when applicable). (Ref: par. .A6)

Requirements

Risk Assessment Procedures and Related Activities

Conditions or Events That Raise Substantial Doubt About an Entity's Ability to Continue as a Going Concern

.12 When performing risk assessment procedures as required by section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*,[5] the auditor should consider whether there are conditions or events, considered in the aggregate, that raise substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time. In doing so, the auditor should determine whether management has performed a preliminary evaluation of whether such conditions or events exist: (Ref: par .A7–.A16)

a. If such an evaluation has been performed, the auditor should discuss the evaluation with management and determine whether management has identified conditions or events that raise substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time and, if so, understand management's plans to address them.

b. If such an evaluation has not yet been performed, the auditor should discuss with management the basis for the intended use of the going concern basis of accounting and inquire of management whether conditions or events exist that raise substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time.

[5]Paragraph .05 of section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement.*

Remaining Alert Throughout the Audit for Audit Evidence About Conditions or Events

.13 The auditor should remain alert throughout the audit for audit evidence of conditions or events that raise substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time. (Ref: par. .A17)

Management's Evaluation and Supporting Analysis, and the Auditor's Evaluation

.14 The auditor's evaluation should

a. address management's evaluation of whether there are conditions or events, considered in the aggregate, that raise substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time. (Ref: par. .A18–.A24)

b. cover the same period as that used by management in its evaluation as required by the applicable financial reporting framework. (Ref: par. .A19)

c. include consideration of whether management's evaluation includes all relevant information of which the auditor is aware as a result of the audit.

Period Beyond Management's Evaluation

.15 The auditor should inquire of management regarding its knowledge of conditions or events beyond the period of management's evaluation that may have an effect on the entity's ability to continue as a going concern. (Ref: par. .A23, .A25–.A27)

Additional Audit Procedures When Events or Conditions Are Identified

.16 The auditor should obtain sufficient appropriate audit evidence to determine whether conditions and events identified, considered in the aggregate, raise substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time by performing additional audit procedures, including consideration of mitigating factors. These procedures should include the following: (Ref: par. .A28)

a. Requesting management to make an evaluation when management has not yet performed an evaluation

b. Evaluating management's plans in relation to its going concern evaluation, with regard to whether it is probable that (Ref: par. .A29)

    i. management's plans can be effectively implemented and

    ii. the plans would mitigate the relevant conditions or events that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time

c. When the entity has prepared a cash flow forecast, and analysis of the forecast is a significant factor in evaluating management's plans, (Ref: par. .A30–.A31)

i. evaluating the reliability of the underlying data generated to prepare the forecast and

ii. determining whether there is adequate support for the assumptions underlying the forecast, which includes considering contradictory audit evidence

d. Considering whether any additional facts or information have become available since the date on which management made its evaluation

Financial Support by Third Parties or the Entity's Owner-Manager

.17 When management's plans include financial support by third parties or the entity's owner-manager (hereinafter referred to as "supporting parties") and such support is necessary in supporting management's assertions about the entity's ability to continue as a going concern for a reasonable period of time, the auditor should obtain sufficient appropriate audit evidence about the following:

a. The intent of such supporting parties to provide the necessary financial support, including written evidence of such intent, and (Ref: par. .A32–.A37)

b. The ability of such supporting parties to provide the necessary financial support (Ref: par. .A24, .A38)

The failure to obtain the written evidence required by item (*a*) constitutes a lack of sufficient appropriate audit evidence regarding the intent of the supporting parties to provide financial support. Therefore, the auditor should conclude that management's plans are insufficient to alleviate the determination that substantial doubt exists about the entity's ability to continue as a going concern for a reasonable period of time. (Ref: par. .A32–.A34)

Written Representations

.18 If the auditor believes, before consideration of management's plans pursuant to paragraph .16, that substantial doubt exists about the entity's ability to continue as a going concern for a reasonable period of time, the auditor should request the following written representations from management: (Ref: par. .A39–.A40)

a. A description of management's plans that are intended to mitigate the adverse effects of conditions or events that indicate there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time and the probability that those plans can be effectively implemented

b. That the financial statements disclose all the matters of which management is aware that are relevant to the entity's ability to continue as a going concern for a reasonable period of time, including principal conditions or events and management's plans

Auditor Conclusions

Use of the Going Concern Basis of Accounting

.19 The auditor should evaluate whether sufficient appropriate audit evidence has been obtained and conclude on the appropriateness of management's use of the going concern basis of accounting, when relevant, in the preparation of the financial statements.

Substantial Doubt About the Entity's Ability to Continue as a Going Concern

.20 Based on the audit evidence obtained, the auditor should conclude whether, in the auditor's judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time.

Adequacy of Disclosure When Conditions or Events Have Been Identified and Substantial Doubt Has Not Been Alleviated

.21 If the auditor concludes that management's use of the going concern basis of accounting is appropriate in the circumstances but substantial doubt exists about an entity's ability to continue as a going concern for a reasonable period of time, the auditor should evaluate the adequacy of the financial statement disclosures as required by the applicable financial reporting framework. (Ref: par. .A41–.A44)

Adequacy of Disclosures When Conditions or Events Have Been Identified But Substantial Doubt Has Been Alleviated by Management's Plans

.22 If conditions or events, considered in the aggregate, have been identified that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time but, based on the audit evidence obtained, the auditor concludes that substantial doubt has been alleviated by management's plans, the auditor should evaluate the adequacy of the financial statement disclosures required by the applicable financial reporting framework. (Ref: par. .A45–.A47)

Implications for the Auditor's Report

Use of Going Concern Basis of Accounting Is Inappropriate

.23 If the financial statements have been prepared using the going concern basis of accounting but, in the auditor's judgment, management's use of the going concern basis of accounting in the preparation of the financial statements is inappropriate, the auditor should express an adverse opinion. (Ref: par. .A48–.A50)

Use of the Going Concern Basis of Accounting Is Appropriate But Conditions and Events Have Been Identified

.24 If, after considering identified conditions or events and management's plans, the auditor concludes that substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains, the auditor should include a separate section in the auditor's report[6] with the heading "Substantial Doubt About the Entity's Ability to Continue as a Going Concern" that does the following: (Ref: par. .A53–.A58)

a. Draws attention to the note in the financial statements that discloses
   i. the conditions or events identified and management's plans that deal with these conditions or events and
   ii. that these conditions or events indicate that substantial doubt exists about the entity's ability to continue as a going concern for a reasonable period of time
b. States that the auditor's opinion is not modified with respect to the matter

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

.25 The description in the "Going Concern" section about the entity's ability to continue as a going concern for a reasonable period of time should use terms consistent with those included in the applicable financial reporting framework. The auditor should not use conditional language concerning the existence of substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Adequate Disclosure About an Entity's Ability to Continue as a Going Concern Is Not Made in the Financial Statements

.26 If adequate disclosure about an entity's ability to continue as a going concern for a reasonable period of time is not made in the financial statements, the auditor should do the following:

a. Express a qualified opinion or adverse opinion, as appropriate, in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*.
b. In the "Basis for Qualified (Adverse) Opinion" section of the auditor's report, state that
   i. substantial doubt exists about the entity's ability to continue as a going concern and that the financial statements do not adequately disclose this matter or
   ii. substantial doubt about the entity's ability to continue as a going concern has been alleviated by management's plans but the financial statements do not adequately disclose this matter.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

[6] [Footnote deleted by the issuance of SAS No. 134, May 2019.]

Management Unwilling to Perform or Extend Its Evaluation

.27 If management is unwilling to perform or extend its evaluation to meet the period of time required by the applicable financial reporting framework when requested to do so by the auditor, the auditor should consider the implications for the auditor's report. (Ref: par. .A59)

Communication With Those Charged With Governance

.28 Unless all those charged with governance are involved in managing the entity,[7] the auditor should communicate with those charged with governance regarding conditions and events, considered in the aggregate, that raise substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time. Such communication with those charged with governance should include the following:

a. Whether the conditions or events, considered in the aggregate, that raise substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time constitute substantial doubt

b. The auditor's consideration of management's plans

c. Whether management's use of the going concern basis of accounting, when relevant, is appropriate in the preparation of the financial statements

d. The adequacy of related disclosures in the financial statements

e. The implications for the auditor's report

Comparative Presentations

.29 If substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time existed at the date of prior period financial statements that are presented on a comparative basis and that doubt has been removed in the current period, the going concern section included in the auditor's report on the financial statements of the prior period should not be repeated. (Ref: par. .A60–.A61) [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Eliminating a Going Concern Section From a Reissued Report

.30 Management may request that the auditor reissue an auditor's report and eliminate a "Going Concern" section contained therein. Although an auditor has no obligation to reissue the report, if the auditor decides to reissue the report, the auditor should reassess the going concern status of the entity by doing the following:

a. Performing audit procedures related to the events or transactions that prompted the request to reissue the report without the "Going Concern" section

---

[7]Paragraph .09 of section 260, *The Auditor's Communication With Those Charged With Governance*.

b. Performing the procedures listed in section 560, *Subsequent Events and Subsequently Discovered Facts*, at or near the date of reissuance, including procedures to evaluate the adequacy of the proposed disclosures regarding management's plans to mitigate the conditions or events that raised substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time[8]

c. Considering the matters described in paragraphs .16–.18 of this section based on the conditions or circumstances at the date of reissuance

d. Considering the implications for the auditor's report in accordance with section 560[9] (Ref: par. .A62–.A63)

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Significant Delay in the Issuance of Financial Statements

.31 If there is significant delay in the expected issuance of the financial statements by management or those charged with governance, the auditor should inquire about the reasons for the delay. If the auditor believes that the delay could be related to the evaluation of whether there is substantial doubt about the entity's ability to continue as a going concern, the auditor should perform additional audit procedures as necessary, as described in paragraph .16, as well as consider the effect on the auditor's conclusion regarding the existence of substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time, as described in paragraph .21.

Documentation

.32 If conditions or events are identified that, when considered in the aggregate, raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time before consideration of management's plans, the auditor should document the following: (Ref: par. .A63)

a. The conditions or events that led the auditor to believe that there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time.

b. The elements of management's plans that the auditor considered to be particularly significant to overcoming the conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern, if applicable.

c. The audit procedures performed to evaluate the significant elements of management's plans and evidence obtained, if applicable.

d. The auditor's conclusion regarding whether substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains

[8] Paragraphs .09–.11 of section 560, *Subsequent Events and Subsequently Discovered Facts*.

[9] Paragraph .13 of section 560.

or is alleviated. If substantial doubt remains, the auditor should also document the possible effects of the conditions or events on the financial statements and the adequacy of the related disclosures. If substantial doubt is alleviated, the auditor should also document the auditor's conclusion regarding the need for, and, if applicable, the adequacy of, disclosure of the principal conditions or events that initially caused the auditor to believe there was substantial doubt and management's plans that alleviated the substantial doubt.

e. The auditor's conclusion with respect to the effects on the auditor's report.

Application and Other Explanatory Material

Scope of This Section (Ref: par. .02)

.A1 The applicable financial reporting framework might contain explicit requirements regarding when the liquidation basis of accounting is appropriate. For example, FASB ASC requires that if and when an entity's liquidation becomes imminent financial statements should be prepared under the liquidation basis of accounting.[10] Accordingly, this section does not apply to an audit of a complete set of general purpose financial statements prepared under the liquidation basis of accounting.

Considerations Specific to Governmental Entities

.A2 Management's use of the going concern basis of accounting is also relevant to financial statements of governmental entities. For example, GASB Statement No. 56, *Codification of Accounting and Financial Reporting Guidance Contained in the AICPA Statements on Auditing Standards*, addresses the issue of the ability of governmental entities to continue as a going concern for 12 months beyond the financial statement date, and requires consideration of information known to the government that may raise substantial doubt shortly thereafter (for example, within an additional three months).[11] Going concern indicators may arise in, but are not limited to, situations in which governmental entities operate on a for-profit basis, where government support may be reduced or withdrawn, or in the case of privatization. Conditions or events that raise substantial doubt about a governmental entity's ability to continue as a going concern for a reasonable period of time may include situations in which the governmental entity lacks funding for its continued existence or when policy decisions are made that affect the services provided by the governmental entity.

---

[10] FASB ASC 205-30.

[11] Paragraphs 16–19 of GASB Statement No. 56.

Responsibility for the Evaluation of the Entity's Ability to Continue as a Going Concern

*When Management Is Required to Make a Specific Evaluation Under the Applicable Financial Reporting Framework (Ref: **par. .05–.06**)*

.A3 FASB ASC defines *substantial doubt about an entity's ability to continue as a going concern* as follows:

Substantial doubt about an entity's ability to continue as a going concern exists when conditions and events, considered in the aggregate, indicate that it is probable that the entity will be unable to meet its obligations as they become due within one year after the date that the financial statements are issued (or within one year after the date that the financial statements are available to be issued, when applicable). The term *probable* is used consistently with its use in topic 450 on contingencies.[12]

Other financial reporting frameworks may use different terms that are similar to the concept of substantial doubt. For example, International Financial Reporting Standards (IFRS) use the terms *material uncertainty* and *significant doubt*. Also, other financial reporting frameworks may not use *probable* as their threshold. For example, IFRS uses "may cast significant doubt on the entity's ability to continue as a going concern."[13] This section uses the terminology of FASB ASC and the GASB statements; if an audit is performed on financial statements prepared under another financial reporting framework, the requirements and application material may need to be adapted as necessary.

.A4 In addition to the factors in paragraph .06, FASB ASC requires management to consider quantitative and qualitative information about the following conditions and events:[14]

a. The entity's current financial condition, including its liquidity sources at the date that the financial statements are issued (for example, available liquid funds and available access to credit)

b. The entity's conditional and unconditional obligations due or anticipated within one year after the date that the financial statements are issued (regardless of whether those obligations are recognized in the entity's financial statements)

c. The funds necessary to maintain the entity's operations considering its current financial condition, obligations, and other expected cash flows within one year after the date that the financial statements are issued

d. The other conditions and events, when considered in conjunction with the preceding items, that may adversely affect the entity's ability to meet its obligations within one year after the date the financial statements are issued. See paragraph .A7 for examples of those conditions and events.

---

[12] "Pending Content" in FASB ASC 205-40-20.

[13] See paragraph 25 of International Accounting Standard (IAS) 1, *Presentation of Financial Statements*.

[14] "Pending Content" in FASB ASC 205-40-50-5.

.A5 As explained by FASB, *reasonably knowable* means that an entity should make a reasonable effort to identify conditions and events that it may not readily know but would be able to identify without undue cost and effort.[15]

Definition (Ref: par. .11)

.A6 Most financial reporting frameworks requiring an explicit management evaluation of the entity's ability to continue as a going concern specify the period of time to be evaluated. For example, the financial reporting frameworks of the following standard-setting bodies specify such period of time as follows:

a. *FASB.* Within one year after the date that the financial statements are issued (or within one year after the date that the financial statements are available to be issued, when applicable).[16]

b. *GASB.* 12 months beyond the date of the financial statements. GASB further requires that, if a governmental entity currently knows information that may raise substantial doubt shortly thereafter (for example, within an additional three months), such information should also be considered.[17]

c. *International Accounting Standards Board*. At least, but not limited to, one year from the end of the reporting period.[18]

Risk Assessment Procedures and Related Activities

Conditions or Events That Raise Substantial Doubt About an Entity's Ability to Continue as a Going Concern (Ref: par. .12)

.A7 The following list includes examples of adverse conditions and events that may raise substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time. This list is not all-inclusive. The existence of one or more of these conditions or events does not establish that there is substantial doubt about the entity's ability to continue as a going concern. Similarly, the absence of these conditions or events does not establish that there is no substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time. Determining whether there is substantial doubt depends on an assessment of relevant conditions and events, in the aggregate, that are known and reasonably knowable at the date that the financial statements are issued (or at the date the financial statements are available to be issued, when applicable). An entity should weigh the likelihood and magnitude of the potential effects of the relevant conditions and events and consider their anticipated timing.[19]

---

[15] See paragraph BC26 of the "Background Information and Basis for Conclusions" section of "Pending Content" in FASB ASC 205-40.

[16] "Pending Content" in FASB ASC 205-40-50-1.

[17] Paragraph 16 of GASB Statement No. 56.

[18] Paragraph 26 of IAS 1.

[19] "Pending Content" in FASB ASC 205-40-55-2.

a. Negative financial trends, for example, recurring operating losses, working capital deficiencies, negative cash flows from operating activities, and other adverse key financial ratios

b. Other indications of possible financial difficulties, for example, default on loans or similar agreements, arrearages in dividends, denial of usual trade credit from suppliers, a need to restructure debt to avoid default, noncompliance with statutory capital requirements, and a need to seek new sources or methods of financing or to dispose of substantial assets

c. Internal matters, for example, work stoppages or other labor difficulties, substantial dependence on the success of a particular project, uneconomic long-term commitments, and a need to significantly revise operations

d. External matters, for example, legal proceedings, legislation, or similar matters that might jeopardize the entity's ability to operate; loss of a key franchise, license, or patent; loss of a principal customer or supplier; and an uninsured or underinsured catastrophe such as a hurricane, tornado, earthquake, or flood

.A8 The significance of such events or conditions can often be mitigated by other factors. The following list includes examples of plans that management may implement to mitigate conditions or events that raise substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time. The examples are not all-inclusive. Following each example is a list of the types of information that management should consider at the date that the financial statements are issued in evaluating the feasibility of the plans to determine whether it is probable[20] that the plan will be effectively implemented within one year after the date that the financial statements are issued.[21]

a. Plans to dispose of an asset or business
   i. Restrictions on disposal of an asset or business, such as covenants that limit those transactions in loan or similar agreements, or encumbrances against the asset or business
   ii. Marketability of the asset or business that management plans to sell
   iii. Possible direct or indirect effects of disposal of the asset or business

b. Plans to borrow money or restructure debt
   i. Availability and terms of new debt financing or availability and terms of existing debt refinancing, such as term debt, lines of credit, or arrangements for factoring receivables or sale-leaseback of assets
   ii. Existing or committed arrangements to restructure or subordinate debt or to guarantee loans to the entity

[20] The FASB ASC master glossary defines *probable* as "the future event or events are likely to occur."

[21] "Pending Content" in FASB ASC 205-40-55-3.

iii. Possible effects on management's borrowing plans of existing restrictions on additional borrowing or the sufficiency of available collateral

c. Plans to reduce or delay expenditures

  i. Feasibility of plans to reduce overhead or administrative expenditures, to postpone maintenance or research and development projects, or to lease rather than purchase assets

  ii. Possible direct or indirect effects on the entity and its cash flows of reduced or delayed expenditures

d. Plans to increase ownership equity

  i. Feasibility of plans to increase ownership equity, including existing or committed arrangements to raise additional capital

  ii. Existing or committed arrangements to reduce current dividend requirements or to accelerate cash infusions from affiliates or other investors

Considerations Specific to Governmental Entities

.A9 The GASB statements also include the following examples of indicators that there may be substantial doubt about a governmental entity's ability to continue as a going concern:[22]

a. *Negative trends.* For example, recurring periods in which expenses or expenditures significantly exceed revenues, recurring unsubsidized operating losses in business-type activities, consistent working capital deficiencies, continuing negative operating cash flows from business-type activities, or adverse key financial ratios

b. *Other indications of possible financial difficulties*. For example, default on bonds, loans, or similar agreements; proximity to debt and tax limitations; denial of usual trade credit from suppliers; restructuring of debt (other than refundings); noncompliance with statutory capital or reserve requirements; or the need to seek new sources or methods of financing or to dispose of substantial assets

c. *Internal matters*. For example, work stoppages or other labor difficulties, substantial dependence on the success of a particular project or program, uneconomic long-term commitments (burdensome labor contracts, for example), or the need to significantly revise operations

d. *External matters*. For example, legal proceedings, legislation, or similar matters that might jeopardize intergovernmental revenues and the fiscal sustainability of key governmental programs; loss of a critical license or patent for a business-type activity; loss of a principal customer, taxpayer, or supplier; or uninsured or underinsured catastrophe such as a drought, earthquake, or flood

.A10 The indicators listed in paragraph .A9 may be mitigated by other factors. For example, taxing power and borrowing capabilities together with the constant demand

[22] Paragraph 17 of GASB Statement No. 56.

for the provision of public services are factors that may diminish the possibility that a governmental entity would be unable to continue as a going concern.[23]

Other Considerations

.A11 The risk assessment procedures required by paragraph .12 are intended to assist the auditor in determining whether substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time is likely to be an important issue in planning and performing the audit. These procedures also allow for more timely discussions with management, including a discussion of management's plans for addressing any potential going concern matters identified.

.A12 In the absence of guidance provided by the applicable financial reporting framework that illustrates adverse conditions or events that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time or plans that management may implement to mitigate conditions or events that raise substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time, the auditor may consider the guidance in paragraphs .A7–.A10.

.A13 As discussed in paragraph .A7, FASB ASC contains guidance for determining whether substantial doubt exists about an entity's ability to continue as a going concern for a reasonable period of time. Other financial reporting frameworks may contain other relevant guidance.

.A14 If management is preparing interim financial statements, FASB ASC requires management to perform a going concern evaluation for the interim periods.[24] As a result, the auditor may consider management's interim evaluation(s) of whether there are conditions and events, considered in the aggregate, that raise substantial doubt about an entity's ability to continue as a going concern in completing the risk assessment procedures in paragraph .12.

Considerations Specific to Smaller, Less Complex Entities

.A15 The size of an entity may affect its ability to withstand adverse conditions. Smaller, less complex entities may be able to respond quickly to exploit opportunities but may lack reserves to sustain operations.

.A16 Conditions of particular relevance to smaller entities include the risk that banks and other lenders may cease to support the entity, as well as the possible loss of a principal supplier, major customer, key employee, or the right to operate under a license, franchise, or other legal agreement.

Remaining Alert Throughout the Audit for Audit Evidence About Conditions or Events (Ref: par. .13)

.A17 Section 315A requires the auditor to revise the auditor's risk assessment and modify the further planned audit procedures accordingly when additional audit evidence that

---

[23] Paragraph 18 of GASB Statement No. 56.

[24] "Pending Content" in FASB ASC 205-40-50-1.

affects the auditor's assessment of risk is obtained during the course of the audit.[25] If conditions or events that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time are identified after the auditor's initial risk assessments are made, in addition to performing the procedures in paragraph .16 of this section, the auditor's assessment of the risks of material misstatement may need to be revised. The existence of such conditions or events may also affect the nature, timing, and extent of the auditor's further procedures in response to the assessed risks. Section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, establishes requirements and provides guidance on this issue.

Management's Evaluation and Supporting Analysis, and the Auditor's Evaluation (Ref: par. .14)

.A18 Management's evaluation of whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time is an important consideration with respect to the auditor's conclusion on management's use of the going concern basis of accounting and whether substantial doubt exists.

.A19 If management is not required by the applicable financial reporting framework to make an evaluation about whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time, then the period that the auditor's evaluation covers is within one year after the date that the financial statements are issued (or within one year after the date that the financial statements are available to be issued, when applicable), as discussed in paragraph .11.

.A20 It is not the auditor's responsibility to rectify the lack of analysis by management to support its evaluation. In some circumstances, however, the auditor may be able to conclude whether substantial doubt exists in the circumstances despite the lack of detailed analysis by management. For example, when a history of profitable operations and a ready access to financial resources exists, management may make its evaluation without a detailed analysis. In this case, the auditor's evaluation of the appropriateness of management's evaluation may be made without performing detailed evaluation procedures if the auditor's other audit procedures are sufficient to enable the auditor to conclude whether there is substantial doubt in the circumstances. However, in situations in which management is required by the applicable financial reporting framework to make an evaluation about the entity's ability to continue as a going concern for a reasonable period of time, a lack of a detailed analysis when needed may be an indicator of a deficiency in internal control. An auditor's evaluation is required to determine whether this constitutes a significant deficiency or material weakness, in accordance with section 265, *Communicating Internal Control Related Matters Identified in an Audit*.

.A21 In other circumstances, evaluating management's evaluation of whether there is substantial doubt, as required by paragraph .14, may include an evaluation of the process

[25] Paragraph .32 of section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement.*

management followed to make its evaluation, the assumptions on which the evaluation is based, management's plans, and whether management's plans are feasible in the circumstances to alleviate substantial doubt.

.A22 For financial reporting frameworks that require the entity to perform an evaluation about whether there is substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time, for example, FASB ASC and the GASB statements,[26] the auditor's conclusions might be primarily based on the auditor's procedures performed to evaluate management's compliance with the applicable financial reporting framework.

Considerations Specific to Smaller, Less Complex Entities (Ref: par. .14)

.A23 In many cases, management of smaller entities may not have prepared a detailed evaluation of whether there is substantial doubt, but instead may rely on in-depth knowledge of the business and anticipated future prospects. Nevertheless, in accordance with the requirements of this section, the auditor is required to evaluate management's evaluation of whether there is substantial doubt. For smaller entities, it may be appropriate to discuss the medium and long-term financing of the entity with management.

.A24 Financial support by owner-managers is often important to smaller entities' ability to continue as a going concern. When a smaller entity is largely financed by a loan from the owner-manager, it may be important that these funds are not withdrawn. For example, the continuance of a smaller entity in financial difficulty may be dependent on the owner-manager subordinating a loan to the entity in favor of banks or other creditors, or the owner-manager supporting a loan for the entity by providing a guarantee with the owner-manager's personal assets as collateral. See paragraphs .A32–.A38 for further guidance about financial support from the owner-manager.

Period Beyond Management's Evaluation (Ref: par. .15)

.A25 The inquiry required by paragraph .15 is not intended to require management to extend its evaluation beyond the requirements of the applicable financial reporting framework. Other than inquiry of management, the auditor does not have a responsibility to perform any other audit procedures to identify conditions or events that may raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time beyond the period evaluated by management.

.A26 The applicable financial reporting framework may provide guidance about whether or how conditions or events that occur after the period required by the applicable financial reporting framework may affect the evaluation of whether substantial doubt about an entity's ability to continue as a going concern exists. For example, the GASB statements require that, if a governmental entity currently knows of information that may raise substantial doubt shortly after one year beyond the financial statement date, such information should be considered in the evaluation of substantial doubt.[27]

[26] "Pending Content" in FASB ASC 205-40 and paragraphs 16–19 of GASB Statement No. 56.

.A27 FASB ASC requires the evaluation to include events and conditions that may raise substantial doubt about the entity's ability to continue as a going concern within one year after the date that the financial statements are issued (or within one year after the date that the financial statements are available to be issued, when applicable).[28] Therefore, the conditions or events known after this time period will not affect the evaluation of whether substantial doubt exists but may affect other disclosure requirements or consideration of whether the financial statements are fairly presented.

Additional Audit Procedures When Events or Conditions Are Identified (Ref: par. .16)

.A28 Audit procedures that may be relevant to performing the requirements in paragraph .16 include the following:

a. Analyzing and discussing cash flow, profit, and other relevant forecasts with management

b. Analyzing and discussing the entity's latest available interim financial statements

c. Reading the terms of debentures and loan agreements and determining whether any have been breached

d. Reading minutes of the meetings of shareholders, those charged with governance, and relevant committees, for reference to financial difficulties

e. Inquiring of the entity's legal counsel regarding the existence of litigation and claims and the reasonableness of management's evaluations of their outcome and the estimate of their financial implications

f. Evaluating the entity's plans to deal with unfilled customer orders

g. Performing audit procedures regarding subsequent events to identify those that either mitigate or exacerbate substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time

h. Confirming the existence, terms, and adequacy of borrowing facilities

i. Obtaining and reviewing reports of regulatory actions

j. Determining the adequacy of support for any planned disposals of assets

Evaluating Management's Plans (Ref: par. .16b–c)

.A29 Evaluating management's plans may include performing audit procedures that the auditor considers necessary in the circumstances regarding management's plans for future action, including, for example, its plans to liquidate assets, borrow money or restructure debt, reduce or delay expenditures, or increase capital. For governmental entities, evaluating management's plans may also include management's plans for future

[27]Paragraph 16 of GASB Statement No. 56.

[28]"Pending Content" in FASB ASC 205-40-50-1.

actions, including, for example, its plans to increase taxes to the extent allowable by law (as well as obtaining the necessary approvals to do so) or to issue additional debt up to the legal debt limit. See paragraphs .A8–.A10 for examples of other plans that management may implement to mitigate conditions or events that raise substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time.

.A30 In addition to the procedures required in paragraph .16*c*, the auditor may compare

a. the prospective financial information used in recent prior periods with historical results and

b. the prospective financial information used in the current period with results achieved to date.

.A31 When evaluating a cash flow forecast, an example of contradictory evidence may include assumptions in the cash flow forecasts that are inconsistent with assumptions used for other purposes, such as forecasts used to evaluate the recoverability of deferred tax assets or potential impairment of goodwill or long-lived assets.

Financial Support by Third Parties or the Entity's Owner-Manager

Intent

Support Letters or Written Confirmations

.A32 The auditor's evaluation of the support letter (as further described in paragraph .A33) or written confirmation includes consideration of the terms and conditions of the commitment and may include, as applicable, considerations of the legality and enforceability of the commitments.

.A33 The intent of supporting parties to provide the necessary financial support may be evidenced by either of the following:

a. Obtaining from management written evidence of a commitment from the supporting party to provide or maintain the necessary financial support (sometimes referred to as a "support letter").

b. Confirming directly with the supporting parties (as described in paragraph .A35) the existence of commitments to provide or maintain the necessary financial support. Confirmation may be necessary if management only has oral evidence of such financial support.

.A34 When the financial support is provided by an owner-manager, the evidence regarding intent may be in the form of a support letter or a written representation.[29]

Obtaining Written Confirmations

[29]See section 580, *Written Representations*.

.A35 If the auditor obtains a support letter as described in paragraph .A33*a*, the auditor may still request a written confirmation in accordance with section 505, *External Confirmations*, from the supporting parties regarding the contents of the support letter. For example, such written confirmation may be requested when, in the auditor's professional judgment, a written confirmation is necessary to determine the validity of the support letter as well as the accuracy and completeness of the related terms and conditions.

Illustration of the Third-Party Support Letter

.A36 The purpose of the support letter from supporting parties is to provide sufficient appropriate audit evidence about the supporting parties' intent to provide financial support to the entity. The support letter may also include additional material facts and circumstances that may be pertinent to the determination of whether substantial doubt exists about the entity's ability to continue as a going concern for a reasonable period of time. The following is an illustration of a support letter that may be requested from the supporting parties when the applicable financial reporting framework is FASB ASC. The illustrative wording also includes an assertion about the supporting party's ability to provide financial support, but such wording does not, by itself, provide sufficient appropriate audit evidence regarding ability.

> *(Supporting party name)* will, and has the ability to, fully support the operating, investing, and financing activities of *(entity name)* through at least one year and a day beyond [insert date][30] (*the date the financial statements are issued or available for issuance, when applicable)*.

Depending on the facts and circumstances, this written support letter may be adapted, for example, by adding the following wording:

> This also applies to any amounts that may ultimately be due to the Internal Revenue Service as a result of the recent judgment against *(entity name)* and also applies should *(entity name's)* debt not be refinanced when the debt becomes due in the next year.

.A37 In accordance with section 700, *Forming an Opinion and Reporting on Financial Statements*, or section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, the auditor is required to date the auditor's report no earlier than the date on which the auditor has obtained sufficient appropriate audit evidence on which to base the auditor's opinion on the financial statements.[31] Accordingly, in order to cover the assessment period required by the applicable financial reporting framework, the support letter or the written confirmation defines a specific date

[30] See paragraph .A37.

[31] Paragraph .43 of section 700, *Forming an Opinion and Reporting on Financial Statements*, or paragraphs .82 and .126 of section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

through which the supporting party intends to provide support. For example, for financial statements prepared in accordance with FASB ASC, the date would be a year and a day beyond the date that the financial statements are issued (or available to be issued, when applicable). Specifying a date in the support letter or written confirmation that is later than the expected date that the financial statements will be issued (or will be available to be issued, when applicable) may obviate the need to obtain updated information from the supporting parties. The period covered by the support letter or written confirmation may be shorter if there is another source of support that management intends to utilize in order to continue as a going concern through the assessment period. Such other support would be subjected to the same auditing procedures discussed in this section. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

Ability

.A38 With respect to the supporting party's ability to provide support, matters to which the auditor may give consideration include the following:

a. Audit evidence of past support obtained from the supporting party when such support was needed.

b. The solvency of the supporting party and the sufficiency of the evidence supporting the solvency assertion. The auditor may obtain financial statements of the supporting party audited by a reputable auditor as evidence of the ability of the supporting party to provide the needed support. If the financial statements have not been audited, the auditor may perform other procedures, such as obtaining bank statements and evidence regarding the valuation of assets held by the supporting party that may be used to provide the needed support. However, these procedures might not provide evidence regarding other claims on the pledged assets that would limit the ability of the supporting party to use the assets to provide the support to the reporting entity.

c. The ability to provide the needed support in a timely manner for the reporting entity to meet its obligations.

d. When the entity and supporting party are in different countries, the ability of the supporting party to transfer the necessary funds (or other financial support) to the entity. Factors such as trade embargos, financial transfer restrictions, and war may limit the ability to transfer the necessary financial support.

Given the nature of these matters, the auditor may consult with legal counsel, as appropriate.

Written Representations (Ref: par. .18)

.A39 The auditor may consider it appropriate to request specific written representations beyond those required in paragraph .18 in support of audit evidence obtained regarding management's plans in relation to its going concern evaluation and the feasibility of those plans to alleviate substantial doubt.

.A40 Paragraph .26 of section 580, *Written Representations*, addresses situations in which management does not provide one or more of the requested written representations.

Auditor Conclusions

Substantial Doubt About the Entity's Ability to Continue as a Going Concern (Ref: par. .20–.21)

Adequacy of Disclosure When Conditions or Events Have Been Identified and Substantial Doubt Has Not Been Alleviated

.A41 Some financial reporting frameworks provide requirements about management's responsibilities to evaluate whether substantial doubt exists about an entity's ability to continue as a going concern for a reasonable period of time and provide explicit requirements about financial statement disclosures.

.A42 For example, under FASB ASC, if, after considering management's plans, substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time is not alleviated — that is, substantial doubt exists — the entity is required to include a statement in the notes to the financial statements indicating that there is substantial doubt about the entity's ability to continue as a going concern within one year after the date that the financial statements are issued (or within one year after the date the financial statements are available to be issued, when applicable). Additionally, the entity is required to disclose information that enables users of the financial statements to understand[32]

a. principal conditions or events that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time.

b. management's evaluation of the significance of those conditions or events in relation to the entity's ability to meet its obligations.

c. management's plans that are intended to mitigate the conditions or events that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time.

.A43 For example, under the GASB statements, if it is determined that there is substantial doubt about a governmental entity's ability to continue as a going concern, the notes to the financial statements are required to include disclosure of the following, as appropriate:[33]

a. Pertinent conditions and events giving rise to the assessment of substantial doubt about the governmental entity's ability to continue as a going concern for a reasonable period of time

b. The possible effects of such conditions and events

---

[32]"Pending Content" in FASB ASC 205-40-50-13.

[33]Paragraph 19 of GASB Statement No. 56.

c. Government officials' evaluation of the significance of those conditions and events and any mitigating factors

d. Possible discontinuance of operations

e. Government officials' plans (including relevant prospective financial information)

f. Information about the recoverability or classification of recorded asset amounts or the amounts or classification of liabilities

.A44 Under the GASB statements, management's discussion and analysis (MD&A) is required to include a description of currently known facts, decisions, or conditions that are expected to have a significant effect on the governmental entity's financial position or results of operations. If it is determined that there is substantial doubt about a governmental entity's ability to continue as a going concern, it may be necessary to include a discussion of going concern issues in the MD&A, depending on the facts and circumstances.[34] This discussion of going concern issues is presented as required supplementary information, and the auditor is required to perform procedures on the required supplementary information in accordance with section 730, *Required Supplementary Information*, as applicable.[35]

Adequacy of Disclosures When Conditions or Events Have Been Identified But Substantial Doubt Has Been Alleviated by Management's Plans (Ref: par. .22)

.A45 Even in situations when events or conditions that raise substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time have been identified, but management concludes that no substantial doubt exists after considering its plans, the auditor is required by paragraph .22 to evaluate the adequacy of the financial statement disclosures required by the applicable financial reporting framework. For example, FASB ASC states that, if substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time is alleviated as a result of consideration of management's plans, an entity shall disclose in a note to the financial statements information that enables users of the financial statements to understand all of the following (or shall refer to similar information disclosed elsewhere in the footnotes):[36]

a. Principal conditions or events that raised substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time (before consideration of management's plans)

b. Management's evaluation of the significance of those conditions or events in relation to the entity's ability to meet its obligations

c. Management's plans that alleviated substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time

---

[34]Paragraph 11h of GASB Statement No. 34, *Basic Financial Statements—and Management's Discussion and Analysis—for State and Local Governments*, and paragraph 19 of GASB Statement No. 56.

[35]Paragraph 129 of GASB Statement No. 34.

[36]"Pending Content" in FASB ASC 205-40-50-12.

.A46 The auditor's evaluation about whether the financial statements achieve fair presentation includes the consideration of the overall presentation, structure, and content of the financial statements and whether the financial statements, including the related notes, represent the underlying transactions and events in a manner that achieves fair presentation.[37] Depending on the facts and circumstances, the auditor may determine that additional disclosures are necessary to achieve fair presentation.

.A47 In the absence of disclosures explicitly required by the applicable financial reporting framework that address management's evaluation of the entity's ability to continue as a going concern for a reasonable period of time, the auditor may consider the disclosure guidance set out in paragraphs .A42–.A46 in considering whether the financial statements are fairly presented.

Implications for the Auditor's Report

Use of Going Concern Basis of Accounting Is Inappropriate (Ref: par. .23)

.A48 The requirement in paragraph .23 for the auditor to express an adverse opinion applies regardless of whether the financial statements include disclosure of the inappropriateness of management's use of the going concern basis of accounting.

.A49 When the use of the going concern basis of accounting is not appropriate in the circumstances, management may be required, or may elect, to prepare the financial statements on another basis (for example, under FASB ASC, the entity is required to comply with FASB ASC 205-30 and prepare the financial statements using the liquidation basis of accounting when an entity's liquidation becomes imminent).

.A50 Interpretation No. 1, "Reporting on Financial Statements Prepared on a Liquidation Basis of Accounting", of section 700, *Forming an Opinion and Reporting on Financial Statements* (sec. 9700 par. .01–.05), addresses the situation in which an auditor issues an unmodified opinion on the entity's financial statements prepared under the liquidation basis of accounting and the auditor determines an emphasis-of-matter paragraph is appropriate.

Use of the Going Concern Basis of Accounting Is Appropriate But Conditions and Events Have Been Identified (Ref: par. .24–.25)

Conditions and Events Have Been Identified and Substantial Doubt Has Not Been Alleviated

.A51 The identification of substantial doubt is a matter that is important to users' understanding of the financial statements. The use of a separate section with a heading that includes reference to the fact that substantial doubt exists about the entity's ability to continue as going concern alerts users to this circumstance. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

[37] Paragraph .17 of section 700.

.A52 The exhibit to this section provides an illustration of the statements that are required to be included in the auditor's report on the financial statements (illustration 1) and an illustration of the circumstances described in paragraph .A54 (illustration 2). Illustration 1 and illustration 2 provide examples in which FASB ASC is the applicable financial reporting framework. If an applicable financial reporting framework other than FASB ASC is used, the wording in the illustrative reports in the exhibit to this section may need to be adapted to reflect the application of the other financial reporting framework in the circumstances. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

.A53 When FASB ASC or the GASB statements are the applicable financial reporting framework used in the preparation of the financial statements, the auditor's conclusion about the entity's ability to continue as a going concern is expressed through the use of the phrase "substantial doubt about its (the entity's) ability to continue as a going concern." In other financial reporting frameworks, a similar term may be appropriate depending on the requirements of the applicable financial reporting framework. If the applicable financial reporting framework does not include comparable terms, then wording that includes the terms *substantial doubt* and *going concern* may be appropriate. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Conditions and Events Have Been Identified and Substantial Doubt Has Been Alleviated

.A54 If conditions or events, considered in the aggregate, have been identified that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time but, based on the audit evidence obtained, the auditor concludes that substantial doubt has been alleviated by management's plans and adequate disclosure has been made in the financial statements, the auditor may include an emphasis-of-matter paragraph in accordance with section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report*, making reference to management's disclosures related to the conditions and events and management's plans related to those conditions and events.[38] In this circumstance, the use of an emphasis-of-matter paragraph is to draw users' attention to the disclosures of the conditions and events and management's plans. It is distinguished from the situation in which the auditor concludes, after considering identified conditions or events and management's plans, that substantial doubt about the entity's ability to continue as a going concern remains, in which case the auditor is required by paragraph .24 of this section to include a separate "Going Concern" section in the auditor's report. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

.A55 As indicated in section 706, the use of an emphasis-of-matter paragraph is not appropriate if either of the following applies:

a. The matter has been determined to be a key audit matter when section 701, *Communicating Key Audit Matters in the Independent Auditor's Report*, applies.

[38]Paragraphs .08–.09 of section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report.*

b. The auditor would be required to modify the opinion in accordance with section 705[39] as a result of the matter.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

.A56 As indicated in section 705, in circumstances in which conditions and events have been identified and the auditor concludes that, based on the audit evidence obtained, the disclosures are materially misstated, the auditor is required to modify the auditor's report.[40] [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Inappropriate Use of Conditional Language

.A57 Examples of conditional language that are inappropriate to use in the "Going Concern" section include the following:

a. If the Company continues to suffer recurring losses from operations and continues to have a net capital deficiency, there may be substantial doubt about its ability to continue as a going concern.

b. The Company has been unable to renegotiate its expiring credit agreements. Unless the Company is able to obtain financial support, there is substantial doubt about its ability to continue as a going concern.

[Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Communication With Regulators

.A58 When the auditor of a regulated entity considers that it may be necessary to include a reference to going concern matters in the auditor's report, the auditor may have a duty to communicate with the applicable regulatory, enforcement, or supervisory authorities. (Ref: par. .24) [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Management Unwilling to Perform or Extend Its Evaluation (Ref: par. .27)

.A59 In certain circumstances, the auditor may believe it necessary to request that management perform or extend its evaluation to meet the period of time required by the applicable financial reporting framework. If management is unwilling to do so, a qualified or adverse opinion in the auditor's report may be appropriate. For example, management may be unwilling to extend its evaluation because it believes it has satisfied the requirements to conclude whether substantial doubt exists about the entity's ability to continue as a going concern for a reasonable period of time when the applicable financial reporting framework

---

[39] Paragraph .08 of section 706. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

[40] Paragraph .07 of section 705, *Modifications to the Opinion in the Independent Auditor's Report*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

requires management to make this evaluation. If, in the auditor's judgment, management's conclusion is not adequately supported, the auditor may conclude that a qualified or adverse opinion for a departure from the applicable financial reporting framework is appropriate in these circumstances. Section 705 provides guidance related to the modification of the auditor's opinion. In addition, management's unwillingness to make or extend its evaluation to meet the period of time required by the applicable financial reporting framework may be an indicator of a deficiency in internal control that is required to be evaluated to determine whether it constitutes a significant deficiency or material weakness in accordance with section 265. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Comparative Presentations (Ref: par. .29)

.A60 Substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time that arose in the current period does not imply that a basis for such doubt existed in the prior period and, therefore, does not affect the auditor's report on the financial statements of the prior period that are presented on a comparative basis. Section 700 and section 703 provide guidance on reporting when financial statements of one or more prior periods are presented on a comparative basis with financial statements of the current period. [Paragraph renumbered by the issuance of SAS No. 134, May 2019. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

.A61 A financial reporting framework may contain disclosure requirements in a subsequent period in which substantial doubt no longer exists. For example, FASB ASC states that for the period in which substantial doubt no longer exists (before or after consideration of management's plans), an entity shall disclose how the relevant conditions or events that raised substantial doubt were resolved.[41] [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Eliminating a Going Concern Emphasis-of-Matter Paragraph From a Reissued Report (Ref: par. .30)

.A62 After the auditor has issued the auditor's report containing a "Going Concern" section, the auditor may be asked to reissue the auditor's report on the financial statements and eliminate the "Going Concern" section that appeared in the original report. Such requests may occur after the conditions or events that gave rise to substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time have been resolved. For example, subsequent to the date of the auditor's original report, an entity might obtain needed financing. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

.A63 The auditor may perform procedures in addition to those required by paragraph .30 that the auditor deems necessary in the circumstances. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

---

[41] "Pending Content" in FASB ASC 205-40-50-14. [Footnote renumbered by the issuance of SAS No. 134, May 2019.]

Documentation (Ref: par. .32)

.A64 Section 230, *Audit Documentation*, addresses the auditor's responsibility to prepare audit documentation for an audit of financial statements.[42] The documentation requirements of paragraph .32 of this section are incremental to section 230 and apply when the auditor believes there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time before consideration of management's plans. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

[42] Paragraph .01 of section 230, *Audit Documentation*. [Footnote renumbered by the issuance of SAS No. 134, May 2019.]

Exhibit — Illustrations of Auditor's Reports Relating to Going Concern (Ref: par. .A52–.A56)

.A65

Illustration 1 — An Auditor's Report Containing an Unmodified Opinion and Includes a Going Concern Section When Management Is Required Under the Applicable Financial Reporting Framework to Include a Statement In the Notes to the Financial Statements That Conditions or Events Have Been Identified and Substantial Doubt Exists and Disclosure In The Financial Statements Is Adequate

Illustration 2 — An Auditor's Report Containing an Unmodified Opinion and Includes an Emphasis-of-Matter Paragraph Because Substantial Doubt Has Been Alleviated

Illustration 1 — An Auditor's Report Containing an Unmodified Opinion and Includes a Going Concern Section When Management Is Required Under the Applicable Financial Reporting Framework to Include a Statement In the Notes to the Financial Statements That Conditions or Events Have Been Identified and Substantial Doubt Exists and Disclosure In The Financial Statements Is Adequate

For purposes of this illustrative auditor's report, the following circumstances are assumed:

- Audit of a complete set of financial statements prepared in accordance with FASB ASC. The audit is not a group audit.
- The auditor has concluded that an unmodified opinion is appropriate based on the audit evidence obtained.
- The auditor has concluded, after considering identified conditions or events and management's plans, that substantial doubt remains and the disclosures of the conditions or events and management's plans are adequate.
- Management is required under FASB ASC to include an explicit statement in the notes to the financial statements that conditions or events have been identified and substantial doubt exists.

Independent Auditor's Report

To the Shareholders of ABC Company [*or Other Appropriate Addressee*]

The auditor's report is presented in accordance with paragraphs .21–.42 of section 700, *Forming an Opinion and Reporting on Financial Statements*. For illustrative purposes, the Going Concern section is presented immediately after the "Basis for Opinion of the Auditor's Report" section.

Substantial Doubt About the Company's Ability to Continue as a Going Concern

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note X to the financial statements, the Company has suffered recurring losses from operations, has a net capital deficiency, and has stated that substantial doubt exists about the Company's ability to continue as a going concern. Management's evaluation of the events and conditions and management's plans regarding these matters are also described in Note X. The financial statements do not include any adjustments that might result from the outcome of this uncertainty. Our opinion is not modified with respect to this matter.

Illustration 2 — An Auditor's Report Containing an Unmodified Opinion and Includes an Emphasis-of-Matter Paragraph Because Substantial Doubt Has Been Alleviated (Ref: par. .A52)

For purposes of this illustrative auditor's report, the following circumstances are assumed:

- Audit of a complete set of financial statements prepared in accordance with FASB ASC. The audit is not a group audit.
- Management has disclosed conditions or events, considered in the aggregate, that raised substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time.
- Management has disclosed its evaluation of the significance of those conditions or events, considered in the aggregate, in relation to the entity's ability to meet its obligations.
- Management has disclosed that the substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time has been alleviated by management's plans.
- The auditor has concluded that management's disclosures are adequate.

Independent Auditor's Report

To the Shareholders of ABC Company [*or Other Appropriate Addressee*]

Report on the Audit of the Financial Statements

The auditor's report is presented in accordance with paragraph .09 of section 706, *Emphasis-of Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report*.

Emphasis-of-Matter

As discussed in Note X to the financial statements, the Company has suffered recurring losses from operations and has a net capital deficiency. Management's evaluation of the events and conditions and management's plans to mitigate these matters are also described in Note X. Our opinion is not modified with respect to this matter.

[Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

AU-C Section 580

Written Representations

Source: SAS No. 122; SAS No. 135; SAS No. 136; SAS No. 143.

Effective for audits of financial statements for periods ending on or after December 15, 2012, unless otherwise indicated.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility to obtain written representations from management and, when appropriate, those charged with governance in an audit of financial statements.

.02 Exhibit D, "List of AU-C Sections Containing Requirements for Written Representations," lists other AU-C sections containing subject matter-specific requirements for written representations. The specific requirements for written representations of other AU-C sections do not limit the application of this section.

Written Representations as Audit Evidence

.03 *Audit evidence* is the information used by the auditor in arriving at the conclusions on which the auditor's opinion is based.[1] Written representations are necessary information that the auditor requires in connection with the audit of the entity's financial statements. Accordingly, similar to responses to inquiries, written representations are audit evidence. (Ref: par. .A1)

.04 Although written representations provide necessary audit evidence, they complement other auditing procedures and do not provide sufficient appropriate audit evidence on their own about any of the matters with which they deal. Furthermore, obtaining reliable written representations does not affect the nature or extent of other audit procedures that the auditor applies to obtain audit evidence about the fulfillment of management's responsibilities or about specific assertions.

Effective Date

.05 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

---

[1]Paragraph .06 of section 500, *Audit Evidence*. [Footnote revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142.]

Objectives

.06 The objectives of the auditor are to

a. obtain written representations from management and, when appropriate, those charged with governance that they believe that they have fulfilled their responsibility for the preparation and fair presentation of the financial statements and for the completeness of the information provided to the auditor;

b. support other audit evidence relevant to the financial statements or specific assertions in the financial statements by means of written representations if determined necessary by the auditor or required by other AU-C sections; and

c. respond appropriately to written representations provided by management and, when appropriate, those charged with governance or if management or, when appropriate, those charged with governance do not provide the written representations requested by the auditor.

Definition

.07 For purposes of generally accepted auditing standards, the following term has the meaning attributed as follows:

Written representation. A written statement by management provided to the auditor to confirm certain matters or to support other audit evidence. Written representations in this context do not include financial statements, the assertions therein, or supporting books and records.

.08 For purposes of this section, references to *management* are to be read as "management and, when appropriate, those charged with governance" unless the context suggests otherwise.

Requirements

Management From Whom Written Representations Are Requested

.09 The auditor should request written representations from management with appropriate responsibilities for the financial statements and knowledge of the matters concerned. (Ref: par. .A2–.A6)

Written Representations About Management's Responsibilities

Preparation and Fair Presentation of the Financial Statements

.10 The auditor should request management to provide a written representation that it has fulfilled its responsibility, as set out in the terms of the audit engagement,

a. for the preparation and fair presentation of the financial statements in accordance with the applicable financial reporting framework; and

b. for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.[2] (Ref: par. .A7–.A10, .A22, and .A29)

Information Provided and Completeness of Transactions

.11 The auditor should request management to provide written representations that

a. it has provided the auditor with all relevant information and access, as agreed upon in the terms of the audit engagement, and

b. all transactions have been recorded and are reflected in the financial statements. (Ref: par. .A7–.A10, .A22, and .A29)

Other Written Representations

Fraud

.12 The auditor should request management to provide written representations that it

a. acknowledges its responsibility for the design, implementation, and maintenance of internal controls to prevent and detect fraud;

b. has disclosed to the auditor the results of its assessment of the risk that the financial statements may be materially misstated as a result of fraud;

c. has disclosed to the auditor its knowledge of fraud or suspected fraud affecting the entity involving

   i. management,

   ii. employees who have significant roles in internal control, or

   iii. others when the fraud could have a material effect on the financial statements; and

d. has disclosed to the auditor its knowledge of any allegations of fraud or suspected fraud affecting the entity's financial statements communicated by employees, former employees, regulators, or others. (Ref: par. .A11)

Laws and Regulations

.13 The auditor should request management to provide written representations that all instances of identified or suspected noncompliance with laws and regulations whose effects should be considered by management when preparing financial statements have been disclosed to the auditor.[3]

---

[2]Paragraph .06*b*(i–ii) of section 210A, *Terms of Engagement*.

Uncorrected Misstatements

.14 The auditor should request management to provide written representations about whether it believes the effects of uncorrected misstatements are immaterial, individually and in the aggregate, to the financial statements as a whole. A summary of such items should be included in, or attached to, the written representation. (Ref: par. .A12)

Litigation and Claims

.15 The auditor should request management to provide written representations that all known actual or possible litigation and claims whose effects should be considered by management when preparing the financial statements have been disclosed to the auditor and accounted for and disclosed in accordance with the applicable financial reporting framework.

Estimates

.16 The auditor should request written representations from management and, when appropriate, those charged with governance about whether the methods, significant assumptions, and the data used in making the accounting estimates and the related disclosures are appropriate to achieve recognition, measurement, or disclosure that is in accordance with the applicable financial reporting framework. The auditor should also consider the need to obtain representations about specific accounting estimates, including in relation to the methods, assumptions, or data used. (Ref: par. .A13–.A14)

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 143.]

Related Party Transactions

.17 The auditor should request management to provide written representations that (Ref: par. .A15–.A16)

a. it has disclosed to the auditor the identity of all the entity's related parties and all the related party relationships and transactions of which it is aware and

b. it has appropriately accounted for and disclosed such relationships and transactions.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

Subsequent Events

.18 The auditor should request management to provide written representations that all events occurring subsequent to the date of the financial statements and for which the applicable financial reporting framework requires adjustment or disclosure have been adjusted or disclosed. (Ref: par. .A17)

---

[3]Paragraph .A18 of section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*.

Additional Written Representations About the Financial Statements

.19 Other AU-C sections require the auditor to request written representations. If, in addition to such required representations, the auditor determines that it is necessary to obtain one or more written representations to support other audit evidence relevant to the financial statements or one or more specific assertions in the financial statements, the auditor should request such other written representations. (Ref: par. .A18–.A22 and .A29)

Date of, and Period(s) Covered by, Written Representations

.20 The date of the written representations should be as of the date of the auditor's report on the financial statements. The written representations should be for all financial statements and period(s) referred to in the auditor's report. (Ref: par. .A23–.A26)

Form of Written Representations

.21 The written representations should be in the form of a representation letter addressed to the auditor. (Ref: par. .A27–.A28)

Doubt About the Reliability of Written Representations and Requested Written Representations Not Provided

Doubt About the Reliability of Written Representations

.22 If the auditor has concerns about the competence, integrity, ethical values, or diligence of management or about management's commitment to, or enforcement of, these, the auditor should determine the effect that such concerns may have on the reliability of representations (oral or written) and audit evidence in general. (Ref: par. .A30)

.23 In particular, if written representations are inconsistent with other audit evidence, the auditor should perform audit procedures to attempt to resolve the matter. If the matter remains unresolved, the auditor should reconsider the assessment of the competence, integrity, ethical values, or diligence of management or of management's commitment to, or enforcement of, these and should determine the effect that this may have on the reliability of representations (oral or written) and audit evidence in general. (Ref: par. .A31)

.24 If the auditor concludes that the written representations are not reliable, the auditor should take appropriate action, including determining the possible effect on the opinion in the auditor's report in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*, considering the requirement in paragraph .25 of this section.

Written Representations About Management's Responsibilities

.25 The auditor should disclaim an opinion on the financial statements in accordance with section 705 or withdraw from the engagement if (Ref: par. .A32–.A33)

a. the auditor concludes that sufficient doubt exists about the integrity of management such that the written representations required by paragraphs .10–.11 are not reliable or

b. management does not provide the written representations required by paragraphs .10–.11.

Requested Written Representations Not Provided

.26 If management does not provide one or more of the requested written representations, the auditor should

a. discuss the matter with management;

b. reevaluate the integrity of management and evaluate the effect that this may have on the reliability of representations (oral or written) and audit evidence in general; and

c. take appropriate actions, including determining the possible effect on the opinion in the auditor's report in accordance with section 705, considering the requirement in paragraph .25 of this section. (Ref: par. .A34)

Application and Other Explanatory Material

Written Representations as Audit Evidence (Ref: par. .03)

.A1 Written representations are an important source of audit evidence. If management modifies or does not provide the requested written representations, it may alert the auditor to the possibility that one or more significant issues may exist. Further, a request for written rather than oral representations, in many cases, may prompt management to consider such matters more rigorously, thereby enhancing the quality of the representations.

Management From Whom Written Representations Are Requested (Ref: par. .09)

.A2 Written representations are requested from those with overall responsibility for financial and operating matters whom the auditor believes are responsible for, and knowledgeable about, directly or through others in the organization, the matters covered by the representations, including the preparation and fair presentation of the financial statements. Those individuals may vary depending on the governance structure of the entity; however, management (rather than those charged with governance) is often the responsible party. Written representations may therefore be requested from the entity's chief executive officer and chief financial officer or other equivalent persons in entities that do not use such titles. In some circumstances, however, other parties, such as those charged with governance, also are responsible for the preparation and fair presentation of the financial statements.

.A3 Due to its responsibility for the preparation and fair presentation of the financial statements and its responsibility for the conduct of the entity's business, management would be expected to have sufficient knowledge of the process followed by the entity in preparing the financial statements and the assertions therein on which to base the written representations.

.A4 In some cases, however, management may decide to make inquiries of others who participate in preparing the financial statements and assertions therein, including individuals who have specialized knowledge relating to the matters about which written representations are requested. Such individuals may include the following:

- An actuary responsible for actuarially determined accounting measurements
- Staff engineers who may have responsibility for environmental liability measurements
- Internal counsel who may provide information essential to provisions for legal claims

.A5 To reinforce the need for management to make informed representations, the auditor may request that management include in the written representations confirmation that it has made such inquiries as it considered appropriate to place it in the position to be able to make the requested written representations. It is not expected that such inquiries would usually require a formal internal process beyond those already established by the entity.

.A6 In some cases, management may include in the written representations qualifying language to the effect that representations are made to the best of its knowledge and belief. It is reasonable for the auditor to accept such wording if, in the auditor's professional judgment, the representations are being made by those with appropriate responsibilities and knowledge of the matters included in the representations.

Written Representations About Management's Responsibilities (Ref: par. .10–.11)

.A7 Audit evidence obtained during the audit that management has fulfilled the responsibilities referred to in paragraphs .10–.11 is not sufficient without obtaining confirmation from management that it believes that it has fulfilled those responsibilities. This is because the auditor is not able to judge solely on other audit evidence whether management has prepared and fairly presented the financial statements and provided information to the auditor on the basis of the agreed acknowledgment and understanding of its responsibilities. For example, the auditor could not conclude that management has provided the auditor with all relevant information agreed upon in the terms of the audit engagement without asking management whether, and receiving confirmation that, such information has been provided.

.A8 The written representations required by paragraphs .10–.11 draw on the agreed acknowledgment and understanding of management of its responsibilities in the terms of the audit engagement by requesting confirmation that it has fulfilled them. In addition to requesting management to confirm that it has fulfilled its responsibilities, the auditor also may ask management to reconfirm its acknowledgment and understanding of those responsibilities in written representations. This is common but, in any event, may be particularly appropriate when

- those who signed the terms of the audit engagement on behalf of the entity no longer have the relevant responsibilities,
- the terms of the audit engagement were prepared in a previous year,
- any indication exists that management misunderstands those responsibilities, or
- changes in circumstances make it appropriate to do so.

Consistent with the requirement of section 210A, *Terms of Engagement*, such reconfirmation of management's acknowledgment and understanding of its responsibilities is unconditional and is not made subject to the best of management's knowledge and belief (as discussed in paragraph .A6 of this section).

.A9 Relevant information may include such matters as the following:

- Completeness and availability of all minutes of meetings of stockholders, directors, and committees of directors or summaries of actions of recent meetings for which minutes have not yet been prepared
- Communications from regulatory agencies concerning noncompliance with, or deficiencies in, financial reporting practices

Considerations Specific to Governmental Entities

.A10 The legal or regulatory requirements for audits of the financial statements of governmental entities may be broader than those of other entities. As a result, the premise, relating to management's responsibilities, on which an audit of the financial statements of a governmental entity is conducted may give rise to additional written representations. These may include written representations confirming that transactions and events have been carried out in accordance with applicable law or regulation.

Other Written Representations

Fraud (Ref: par. .12)

.A11 The written representations relating to fraud required by paragraph .12 are important for the auditor to obtain, regardless of the size of the entity, because of the nature of fraud and the difficulties encountered by auditors in detecting material misstatements in the financial statements resulting from fraud.

Uncorrected Misstatements (Ref: par. .14)

.A12 Because the preparation of the financial statements requires management to adjust the financial statements to correct material misstatements, the auditor is required to request management to provide a written representation about uncorrected misstatements. In some circumstances, management may not believe that certain uncorrected misstatements are misstatements. For that reason, management may want to add to their written representation words such as "We do not agree that items ... and ...

constitute misstatements because [*description of reasons*]." Obtaining this representation does not, however, relieve the auditor of the need to form a conclusion on the effect of uncorrected misstatements in accordance with section 450, *Evaluation of Misstatements Identified During the Audit*.

Estimates (Ref: par. .16)

.A13 Written representations about specific accounting estimates may include representations

- that the significant judgments made in making the accounting estimates have taken into account all relevant information of which management is aware.
- about the consistency and appropriateness in the selection or application of the methods, assumptions, and data used by management in making the accounting estimates.
- that the assumptions appropriately reflect management's intent and ability to carry out specific courses of action on behalf of the entity when relevant to the accounting estimates and disclosures.
- that disclosures related to accounting estimates, including disclosures describing estimation uncertainty, are complete and reasonable in the context of the applicable financial reporting framework.
- that appropriate specialized skills or expertise has been applied in making the accounting estimates.
- that no subsequent event requires adjustment to the accounting estimates and related disclosures included in the financial statements.
- when accounting estimates are not recognized or disclosed in the financial statements, about the appropriateness of management's decision that the recognition or disclosure criteria of the applicable financial reporting framework have not been met.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 143.]

.A14 [Paragraph deleted by the issuance of SAS No. 143, July 2020.][4]

Related Parties (Ref: par. .17)

.A15 Circumstances in which it may be appropriate to obtain written representations about related parties from those charged with governance in addition to management include the following:

- When they have approved specific related party transactions that (*a*) materially affect the financial statements or (*b*) involve management

[4][Footnote deleted by the issuance of SAS No. 143, July 2020.]

- When they have made specific oral representations to the auditor on details of certain related party transactions
- When they have financial or other interests in the related parties or the related party transactions

.A16 The auditor also may decide to obtain written representations regarding specific assertions that management may have made, such as a representation that specific related party transactions do not involve undisclosed side agreements, or that a transaction with a related party was conducted on terms equivalent to those prevailing in an arm's-length transaction. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

Subsequent Events (Ref: par. .18)

.A17 Section 560, *Subsequent Events and Subsequently Discovered Facts*, addresses circumstances when the auditor includes an additional date on the auditor's report (that is, dual-dates the auditor's report for a revision relating to a subsequent event).[5] In such circumstances, the auditor may determine that obtaining additional representations relating to the subsequent event is appropriate.

Additional Written Representations About the Financial Statements (Ref: par. .19)

.A18 In addition to the written representations required by paragraphs .10–.18, the auditor may consider it necessary to request other written representations about the financial statements. Such written representations may supplement, but do not form part of, the written representations required by paragraphs .10–.18. They may include representations about the following:

- Whether the selection and application of accounting policies are appropriate
- Whether matters such as the following, when relevant under the applicable financial reporting framework, have been recognized, measured, presented, or disclosed in accordance with that framework:
  - — Plans or intentions that may affect the carrying value or classification of assets and liabilities
  - — Liabilities, both actual and contingent
  - — Title to, or control over, assets and the liens or encumbrances on assets and assets pledged as collateral
- Aspects of laws, regulations, and contractual agreements that may affect the financial statements, including noncompliance
- Whether any side agreements or other arrangements (either written or oral) exist that have not been disclosed to the auditor

[5]Paragraph .13 of section 560, *Subsequent Events and Subsequently Discovered Facts*.

Exhibit B, "Illustrative Specific Written Representations," contains illustrations of additional representations that may be appropriate in certain situations. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

Additional Written Representations About Information Provided to the Auditor

.A19 In addition to the written representation required by paragraph .11, the auditor may consider it necessary to request management to provide a written representation that it has communicated to the auditor all deficiencies in internal control of which management is aware.

Written Representations About Specific Assertions

.A20 When obtaining evidence about or evaluating judgments and intentions, the auditor may consider one or more of the following:

- The entity's past history in carrying out its stated intentions
- The entity's reasons for choosing a particular course of action
- The entity's ability to pursue a specific course of action
- The existence, or lack thereof, of any other information obtained during the course of the audit that may be inconsistent with management's judgment or intent

.A21 In addition, the auditor may consider it necessary to request management to provide written representations about specific assertions in the financial statements; in particular, to support an understanding that the auditor has obtained from other audit evidence of management's judgment or intent regarding, or the completeness of, a specific assertion. For example, if the intent of management is important to the valuation basis for investments, it may not be possible to obtain sufficient appropriate audit evidence without a written representation from management about its intentions. Although such written representations provide necessary audit evidence, they do not provide sufficient appropriate audit evidence on their own for that assertion.

Communicating a Threshold Amount (Ref: par. .10–.11 and .19)

.A22 Management's representations may be limited to matters that are considered either individually or collectively material to the financial statements, provided management and the auditor have reached an understanding on materiality for this purpose. Materiality may be different for different representations. A discussion of materiality may be included explicitly in the representation letter in either qualitative or quantitative terms. Materiality considerations do not apply to those representations that are not directly related to amounts included in the financial statements (for example, management's representations about the premise underlying the audit). In addition, because of the possible effects of fraud on other aspects of the audit, materiality would not apply to management's acknowledgment regarding its responsibility for the design, implementation, and maintenance of internal control to prevent and detect fraud.

Date of, and Period(s) Covered by, Written Representations (Ref: par. .20)

.A23 Because written representations are necessary audit evidence, the auditor's opinion cannot be expressed, and the auditor's report cannot be dated, before the date of the written representations. Furthermore, because the auditor is concerned with events occurring up to the date of the auditor's report that may require adjustment to, or disclosure in, the financial statements, the written representations are dated as of the date of the auditor's report on the financial statements.

.A24 In some circumstances, it may be appropriate for the auditor to obtain a written representation about a specific assertion in the financial statements during the course of the audit. When this is the case, it may be necessary to request an updated written representation.

.A25 The written representations cover all periods referred to in the auditor's report because management needs to reaffirm that the written representations it previously made with respect to the prior periods remain appropriate. The auditor and management may agree to a form of written representation that updates written representations relating to the prior periods by addressing whether there are any changes to such written representations and, if so, what they are.

.A26 Situations may arise in which current management was not present during all periods referred to in the auditor's report. Such persons may assert that they are not in a position to provide some or all of the written representations because they were not in place during the period. This fact, however, does not diminish such persons' responsibilities for the financial statements as a whole. Accordingly, the requirement for the auditor to request from them written representations that cover the whole of the relevant period(s) still applies.

Form of Written Representations (Ref: par. .21)

.A27 Occasionally, circumstances may prevent management from signing the representation letter and returning it to the auditor on the date of the auditor's report. In those circumstances, the auditor may accept management's oral confirmation, on or before the date of the auditor's report, that management has reviewed the final representation letter and will sign the representation letter without exception as of the date of the auditor's report thereby providing sufficient appropriate audit evidence for the auditor to date the report. However, possession of the signed management representation letter prior to releasing the auditor's report is necessary because paragraph .21 requires that the representations be in the form of a written letter from management. Furthermore, when there are delays in releasing the report, a fact may become known to the auditor that, had it been known to the auditor at the date of the auditor's report, might affect the auditor's report and result in the need for updated representations. Section 560 addresses the auditor's responsibilities in such circumstances.

.A28 Exhibit A, "Illustrative Representation Letter," provides an illustrative example of a representation letter.

Communication With Those Charged With Governance (Ref: par. .10–.11 and .19)

.A29 Section 260, *The Auditor's Communication With Those Charged With Governance*, requires the auditor to communicate with those charged with governance the written representations that the auditor has requested from management.[6]

Doubt About the Reliability of Written Representations and Requested Written Representations Not Provided

Doubt About the Reliability of Written Representations (Ref: par. .22–.23)

.A30 Concerns about the competence, integrity, ethical values, or diligence of management or about its commitment to, or enforcement of, these may cause the auditor to conclude that the risk of management misrepresentation in the financial statements is such that an audit cannot be conducted. In such a case, the auditor may consider withdrawing from the engagement, when withdrawal is possible under applicable law or regulation, unless those charged with governance put in place appropriate corrective measures. Such measures, however, may not be sufficient to enable the auditor to issue an unmodified audit opinion.

.A31 In the case of identified inconsistencies between one or more written representations and audit evidence obtained from another source, the auditor may consider whether the risk assessment remains appropriate and, if not, may revise the risk assessment and determine the nature, timing, and extent of further audit procedures to respond to the assessed risks.

Written Representations About Management's Responsibilities (Ref: par. .25)

.A32 As explained in paragraph .A7, the auditor is not able to judge solely on other audit evidence whether management has fulfilled the responsibilities referred to in paragraphs .10–.11. Therefore, if, as described in paragraph .25*a*, the auditor concludes that the written representations about these matters are unreliable or if management does not provide those written representations, the auditor is unable to obtain sufficient appropriate audit evidence. The possible effects on the financial statements of such inability are not confined to specific elements, accounts, or items of the financial statements and are hence pervasive. Section 705 requires the auditor to disclaim an opinion on the financial statements in such circumstances.[7]

.A33 A written representation that has been modified from that requested by the auditor does not necessarily mean that management did not provide the written representation. However, the underlying reason for such modification may affect the opinion in the auditor's report. For example

- the written representation about management's fulfillment of its responsibility for the preparation and fair presentation of the financial statements may state that management believes that, except for material noncompliance with a particular requirement of the applicable financial reporting framework, the financial statements

[6]Paragraph .14*d* of section 260, *The Auditor's Communication With Those Charged With Governance*.

[7]Paragraph .10 of section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

are prepared and fairly presented in accordance with that framework. The requirement in paragraph .25 does not apply because the auditor concluded that management has provided reliable written representations. However, the auditor is required to consider the effect of the noncompliance on the opinion in the auditor's report in accordance with section 705.

- the written representation about the responsibility of management to provide the auditor with all relevant information agreed upon in the terms of the audit engagement may state that management believes that, except for information destroyed in a fire, it has provided the auditor with such information. The requirement in paragraph .25 does not apply because the auditor concluded that management has provided reliable written representations. However, the auditor is required to consider the effects of the pervasiveness of the information destroyed in the fire on the financial statements and the effect thereof on the opinion in the auditor's report in accordance with section 705.

Requested Written Representations Not Provided (Ref: par. .26)

.A34 Management's refusal to furnish written representations constitutes a limitation on the scope of the audit. Such refusal is often sufficient to preclude an unmodified opinion and, in particular with respect to the representations in paragraphs .12–.18, may cause an auditor to disclaim an opinion or withdraw from the engagement when withdrawal is possible under applicable law or regulation. However, based on the nature of the representations not obtained or the circumstances of the refusal, the auditor may conclude that a qualified opinion is appropriate.

Exhibit A — Illustrative Representation Letter

.A35 The following illustrative letter includes written representations that are required by this and other AU-C sections in effect for audits of financial statements for periods ending on or after December 15, 2012. It is assumed in this illustration that the applicable financial reporting framework is accounting principles generally accepted in the United States, that the requirement in section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, to obtain a written representation is not relevant, and that no exceptions exist to the requested written representations. If there were exceptions, the representations would need to be modified to reflect the exceptions.

(Entity Letterhead)

(To Auditor)

(Date)

This representation letter is provided in connection with your audit of the financial statements of ABC Company, which comprise the balance sheet as of December 31, 20XX, and the related statements of income, changes in stockholders' equity, and cash flows for the year then ended, and the related notes to the financial statements, for the purpose of expressing an opinion on whether the financial statements are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States (U.S. GAAP).

Certain representations in this letter are described as being limited to matters that are material. Items are considered to be material, regardless of size, if they involve an omission or misstatement of accounting information that, in light of the surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would be changed or influenced by the omission or misstatement.

Except where otherwise stated below, immaterial matters less than $[*insert amount*] collectively are not considered to be exceptions that require disclosure for the purpose of the following representations. This amount is not necessarily indicative of amounts that would require adjustment to or disclosure in the financial statements.

We confirm that [*, to the best of our knowledge and belief, having made such inquiries as we considered necessary for the purpose of appropriately informing ourselves*] [*as of (date of auditor's report),*]:

Financial Statements

- We have fulfilled our responsibilities, as set out in the terms of the audit engagement dated [*insert date*], for the preparation and fair presentation of the financial statements in accordance with U.S. GAAP. (par. .10*a*)
- We acknowledge our responsibility for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. (par. .10*b*)
- We acknowledge our responsibility for the design, implementation, and maintenance of internal control to prevent and detect fraud. (par. .12*a*)
- The methods, data, and significant assumptions used by us in making accounting estimates and their related disclosures are appropriate to achieve recognition, measurement, or disclosure that is reasonable in the context of the applicable financial reporting framework. (par. .16)

- Related party relationships and transactions have been appropriately accounted for and disclosed in accordance with the requirements of U.S. GAAP. (par. .17*b*)
- All events subsequent to the date of the financial statements and for which U.S. GAAP requires adjustment or disclosure have been adjusted or disclosed. (par. .18)
- The effects of uncorrected misstatements are immaterial, both individually and in the aggregate, to the financial statements as a whole. A list of the uncorrected misstatements is attached to the representation letter. (par. .14)
- The effects of all known actual or possible litigation and claims have been accounted for and disclosed in accordance with U.S. GAAP. (par. .15)

[*Any other matters that the auditor may consider appropriate (see paragraph .A21).*]

Information Provided

- We have provided you with:
  - — Access to all information, of which we are aware that is relevant to the preparation and fair presentation of the financial statements such as records, documentation and other matters; (par. .11*a*)
  - — Additional information that you have requested from us for the purpose of the audit; (par. .11*a*) and
  - — Unrestricted access to persons within the entity from whom you determined it necessary to obtain audit evidence. (par. .11*a*)
- All transactions have been recorded in the accounting records and are reflected in the financial statements. (par. .11*b*)
- We have disclosed to you the results of our assessment of the risk that the financial statements may be materially misstated as a result of fraud. (par. .12*b*)
- We have [*no knowledge of any*] [*disclosed to you all information that we are aware of regarding*] fraud or suspected fraud that affects the entity and involves:
  - — Management;
  - — Employees who have significant roles in internal control; or
  - — Others when the fraud could have a material effect on the financial statements (par. .12*c*)
- We have [*no knowledge of any*] [*disclosed to you all information that we are aware of regarding*] allegations of fraud, or suspected fraud, affecting the entity's financial statements communicated by employees, former employees, analysts, regulators or others. (par. .12*d*)
- We have disclosed to you all known instances of non-compliance or suspected non-compliance with laws and regulations whose effects should be considered when preparing financial statements. (par. .13)

- We [*have disclosed to you all known actual or possible*] [*are not aware of any pending or threatened*] litigation, claims, and assessments whose effects should be considered when preparing the financial statements [*and we have not consulted legal counsel concerning litigation, claims, or assessments*]. (par. .15)
- We have disclosed to you the identity of the entity's related parties and all the related party relationships and transactions of which we are aware. (par. .17*a*)

[*Any other matters that the auditor may consider necessary (see paragraph .A21).*]

[*Name of Chief Executive Officer and Title*]

[*Name of Chief Financial Officer and Title*]

[Revised, March 2012, to reflect conforming changes necessary due to the issuance of SAS No. 122. Revised, August 2012, to reflect conforming changes necessary due to the issuance of SAS No. 126. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 143.]

Exhibit B — Illustrative Specific Written Representations

.A36 As discussed in paragraph .19, the auditor may determine that a specific written representation is necessary to corroborate other audit evidence. Certain AICPA Audit and Accounting Guides recommend that the auditor obtain written representations concerning matters that are unique to a particular industry. The following is a list of additional representations that may be appropriate in certain situations. This list is not intended to be all-inclusive. The existence of a condition listed subsequently does not mean that the representation is required; professional judgment is necessary to determine whether corroborative audit evidence in the form of a specific written representation is necessary.

Condition	Illustrative Specific Written Representation
General	
Unaudited interim information accompanies the financial statements.	The unaudited interim financial information accompanying [*presented in Note X to*] the financial statements for the [*identify all related periods*] has been prepared and fairly presented in conformity with generally accepted accounting principles applicable to interim financial information. The accounting principles used to prepare the unaudited interim financial information are consistent with those used to prepare the audited financial statements.
The effect of a new accounting principle is not known.	We have not completed the process of evaluating the effect that will result from adopting the guidance in Financial Accounting Standards Board (FASB) Accounting Standards Update 20YY-XX, as discussed in Note [*X*]. The company is therefore unable to disclose the effect that adopting the guidance in FASB Accounting Standards Update 20YY-XX will have on its financial position and the results of operations when such guidance is adopted.
Financial circumstances are strained, with disclosure of management's intentions and the entity's ability to continue as a going concern.	Note [*X*] to the financial statements discloses all of the matters of which we are aware that are relevant to the company's ability to continue as a going concern, including significant conditions and events, and management's plans.
The possibility exists that the value of specific significant long-lived assets or certain identifiable intangibles may be impaired.	We have reviewed long-lived assets and certain identifiable intangibles to be held and used for impairment whenever events or changes in circumstances have indicated that the carrying amount of the assets might not be recoverable and have appropriately recorded the adjustment.
The entity has a variable interest in another entity.	Variable interest entities (VIEs) and potential VIEs and transactions with VIEs and potential VIEs have been properly recorded and disclosed in the financial statements in accordance with generally accepted accounting principles. We have considered both implicit and explicit variable interests in (*a*) determining whether potential VIEs should be considered VIEs, (*b*) calculating expected losses and residual returns, and (*c*) determining which party, if any, is the primary beneficiary. We have provided you with lists of all identified variable interests in (i) VIEs, (ii) potential VIEs that we considered but judged not to be VIEs, and (iii) entities that were afforded the scope exceptions of Financial Accounting Standards Board (FASB) *Accounting Standards Codification*™ (ASC) 810, *Consolidation*. We have advised you of all transactions with identified VIEs, potential VIEs, or entities afforded the scope exceptions of FASB ASC 810. We have made available all relevant information about financial interests and contractual arrangements with related parties, de facto agents and other entities, in-

Condition	Illustrative Specific Written Representation
	cluding but not limited to, their governing documents, equity and debt instruments, contracts, leases, guarantee arrangements, and other financial contracts and arrangements. The information we provided about financial interests and contractual arrangements with related parties, de facto agents and other entities includes information about all transactions, unwritten understandings, agreement modifications, and written and oral side agreements. Our computations of expected losses and expected residual returns of entities that are VIEs and potential VIEs are based on the best information available and include all reasonably possible outcomes. Regarding entities in which the company has variable interests (implicit and explicit), we have provided all information about events and changes in circumstances that could potentially cause reconsideration about whether the entities are VIEs or whether the company is the primary beneficiary or has a significant variable interest in the entity. We have made and continue to make exhaustive efforts to obtain information about entities in which the company has an implicit or explicit interest but that were excluded from complete analysis under FASB ASC 810 due to lack of essential information to determine one or more of the following: whether the entity is a VIE, whether the company is the primary beneficiary, or the accounting required to consolidate the entity.
The work of a specialist has been used by the entity.	We agree with the findings of specialists in evaluating the [*describe assertion*] and have adequately considered the qualifications of the specialist in determining the amounts and disclosures used in the financial statements and underlying accounting records. We did not give or cause any instructions to be given to specialists with respect to the values or amounts derived in an attempt to bias their work, and we are not otherwise aware of any matters that have had an effect on the independence or objectivity of the specialists.
Assets	
Cash Disclosure is required of compensating balances or other arrangements involving restrictions on cash balances, lines of credit, or similar arrangements.	Arrangements with financial institutions involving compensating balances or other arrangements involving restrictions on cash balances, line of credit, or similar arrangements have been properly disclosed.
Financial Instruments Management intends to and has the ability to hold to maturity debt securities classified as held-to-maturity.	Debt securities that have been classified as held-to-maturity have been so classified due to the company's intent to hold such securities, to maturity and the company's ability to do so. All other debt securities have been classified as available-for-sale or trading.

Condition	Illustrative Specific Written Representation
Management considers the decline in value of debt or equity securities to be temporary.	We consider the decline in value of debt or equity securities classified as either available-for-sale or held-to-maturity to be temporary.
Management has determined the fair value of significant financial instruments that do not have readily determinable market values.	The methods and significant assumptions used to determine fair values of financial instruments are as follows: [*describe methods and significant assumptions used to determine fair values of financial instruments*]. The methods and significant assumptions used result in a measure of fair value appropriate for financial statement measurement and disclosure purposes.
Financial instruments with off-balance-sheet risk and financial instruments with concentrations of credit risk exist.	The following information about financial instruments with off-balance-sheet risk and financial instruments with concentrations of credit risk has been properly disclosed in the financial statements: 1. The extent, nature, and terms of financial instruments with off-balance-sheet risk 2. The amount of credit risk of financial instruments with off-balance-sheet risk and information about the collateral supporting such financial instruments 3. Significant concentrations of credit risk arising from all financial instruments and information about the collateral supporting such financial instruments
Investments Unusual considerations are involved in determining the application of equity accounting.	[*For investments in common stock that are either nonmarketable or of which the entity has a 20 percent or greater ownership interest, select the appropriate representation from the following:*] • The equity method is used to account for the company's investment in the common stock of [*investee*] because the company has the ability to exercise significant influence over the investee's operating and financial policies. • The cost method is used to account for the company's investment in the common stock of [*investee*] because the company does not have the ability to exercise significant influence over the investee's operating and financial policies.
The entity had loans to executive officers, nonaccrued loans or zero interest rate loans.	Loans to executive officers have been properly accounted for and disclosed.
Liabilities	
Debt Short-term debt could be refinanced on a long-term basis and management intends to do so.	The company has excluded short-term obligations totaling $[*amount*] from current liabilities because it intends to refinance the obligations on a long-term basis. [*Complete with appropriate wording detailing how amounts will be refinanced as follows:*] • The company has issued a long-term obligation [*debt security*] after the date of the balance sheet but prior to the issuance of the financial statements for the purpose of refinancing the short-term obligations on a long-term basis.

Condition	Illustrative Specific Written Representation
	• The company has the ability to consummate the refinancing, by using the financing agreement referred to in Note [*X*] to the financial statements.
Tax-exempt bonds have been issued.	Tax-exempt bonds issued have retained their tax-exempt status.
Taxes Management intends to reinvest undistributed earnings of a foreign subsidiary.	We intend to reinvest the undistributed earnings of [*name of foreign subsidiary*].
Pension and Postretirement Benefits An actuary has been used to measure pension liabilities and costs.	We believe that the actuarial assumptions and methods used to measure pension liabilities and costs for financial accounting purposes are appropriate in the circumstances.
Involvement with a multiemployer plan exists.	We are unable to determine the possibility of a withdrawal liability in a multiemployer benefit plan. or We have determined that there is the possibility of a withdrawal liability in a multiemployer plan in the amount of $[*XX*].
Postretirement benefits have been eliminated.	We do not intend to compensate for the elimination of postretirement benefits by granting an increase in pension benefits. or We plan to compensate for the elimination of postretirement benefits by granting an increase in pension benefits in the amount of $[*XX*].
Employee layoffs that would otherwise lead to a curtailment of a benefit plan are intended to be temporary.	Current employee layoffs are intended to be temporary.
Management intends to either continue to make or not make frequent amendments to its pension or other postretirement benefit plans, which may affect the amortization period of prior service cost, or has expressed a substantive commitment to increase benefit obligations.	We plan to continue to make frequent amendments to the pension or other postretirement benefit plans, which may affect the amortization period of prior service cost. or We do not plan to make frequent amendments to the pension or other postretirement benefit plans.
Equity	
Capital stock repurchase options or agreements or capital stock reserved for options, warrants, conversions, or other requirements exist.	Capital stock repurchase options or agreements or capital stock reserved for options, warrants, conversions, or other requirements have been properly disclosed.

Exhibit C — Illustrative Updating Management Representation Letter

.A37 The following letter is presented for illustrative purposes only. It may be used in the circumstances described in paragraph .A17 of this section. Management need not repeat all of the representations made in the previous representation letter.

If matters to be disclosed to the auditor exist, they may be listed following the representation. For example, if an event subsequent to the date of the balance sheet has been disclosed in the financial statements, the final paragraph could be modified as follows: "To the best of our knowledge and belief, except as discussed in Note X to the financial statements, no events have occurred. . . ."

[*Date*]

To [*Auditor*]

In connection with your audit(s) of the [*identification of financial statements*] of [*name of entity*] as of [*dates*] and for the [*periods*] for the purpose of expressing an opinion as to whether the [*consolidated*] financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of [*name of entity*] in accordance with accounting principles generally accepted in the United States of America, you were previously provided with a representation letter under date of [*date of previous representation letter*]. No information has come to our attention that would cause us to believe that any of those previous representations should be modified.

To the best of our knowledge and belief, no events have occurred subsequent to [*date of latest balance sheet reported on by the auditor*] and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

[*Name of Chief Executive Officer and Title*]

[*Name of Chief Financial Officer and Title*]

[Paragraph added, March 2012, to reflect conforming changes necessary due to the issuance of SAS No. 122.]

Exhibit D — List of AU-C Sections Containing Requirements for Written Representations

.A38 This exhibit identifies paragraphs in other AU-C sections that require specific written representations that may not be required for every audit. The list is not a substitute for considering the requirements and related application and other explanatory material in AU-C sections:

- Paragraph .19 of section 560, *Subsequent Events and Subsequently Discovered Facts*
- Paragraph .18 of section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*
- Paragraph .55 of section 700, *Forming an Opinion and Reporting on Financial Statements*, or paragraphs .36, .91, and .131 of section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, as applicable
- Paragraph .07*g* of section 725, *Supplementary Information in Relation to the Financial Statements as a Whole*
- Paragraph .23 of section 935, *Compliance Audits*

In addition, certain AICPA Audit and Accounting Guides suggest written representations concerning matters that are unique to a particular industry.

[Paragraph renumbered, March 2012, to reflect conforming changes necessary due to the issuance of SAS No. 122. Revised, July 2017, to reflect conforming changes necessary due to the issuance of SAS No. 131. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

AU-C Section 585

Consideration of Omitted Procedures After the Report Release Date

Source: SAS No. 122.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibilities when, subsequent to the report release date, the auditor becomes aware that one or more auditing procedures that the auditor considered necessary in the circumstances existing at the time of the audit were omitted from the audit of the financial statements. Section 560, *Subsequent Events and Subsequently Discovered Facts*, is applicable when a fact becomes known to the auditor after the report release date that, had it been known to the auditor at that date, may have caused the auditor to revise the auditor's report.

.02 The provisions of this section do not apply to an engagement in which an auditor's work is at issue in a threatened or pending legal proceeding or regulatory investigation. A *threatened legal proceeding* means that a potential claimant has manifested to the auditor an awareness of, and a present intention to assert, a possible claim.

Effective Date

.03 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objectives

.04 The objectives of the auditor are to

a. assess the effect of omitted procedures of which the auditor becomes aware on the auditor's present ability to support the previously expressed opinion on the financial statements, and

b. respond appropriately.

Definition

.05 For purposes of generally accepted auditing standards, the following term has the meaning attributed as follows:

Omitted procedure. An auditing procedure that the auditor considered necessary in the circumstances existing at the time of the audit of the financial statements but which was not performed.

Requirements

.06 If, subsequent to the report release date, the auditor becomes aware of an omitted procedure, the auditor should assess the effect of the omitted procedure on the auditor's present ability to support the previously expressed opinion on the financial statements. (Ref: par. .A1–.A4)

.07 If the auditor concludes that an omitted procedure of which the auditor has become aware impairs the auditor's present ability to support a previously expressed opinion on the financial statements and the auditor believes that there are users currently relying, or likely to rely, on the previously released report, the auditor should promptly perform the omitted procedure, or alternative procedures, to determine whether there is a satisfactory basis for the auditor's previously expressed opinion. The auditor should include in the audit documentation the procedures performed, in accordance with the provisions of section 230, *Audit Documentation*.[1] (Ref: par. .A3–.A5)

.08 When, as a result of the subsequent performance of an omitted procedure or alternative procedures, the auditor becomes aware of facts regarding the financial statements that existed at the report release date that, had they been known to the auditor at that date, may have caused the auditor to revise the auditor's report, the auditor should apply the provisions of section 560.[2]

Application and Other Explanatory Material

.A1 The auditor's present ability to support the previously expressed opinion on the financial statements is dependent on whether the omitted procedure affects the auditor's conclusion that sufficient appropriate audit evidence was obtained. In accordance with section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*, the auditor is required to obtain sufficient appropriate audit evidence to reduce audit risk to an acceptably low level and thereby enable the auditor to draw reasonable conclusions on which to base the auditor's opinion.[3] (Ref: par. .06)

[1]Paragraph .14 of section 230, *Audit Documentation*.

[2]Paragraphs .15–.18 of section 560, *Subsequent Events and Subsequently Discovered Facts*.

[3]Paragraph .19 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

.A2 After the report release date, the auditor has no responsibility to carry out any retrospective review of the audit work performed. However, situations may arise in which the auditor becomes aware that an auditing procedure considered necessary by the auditor in the circumstances existing at the time of the audit was omitted. For example, after the report release date, reports and supporting audit documentation for particular engagements may be subjected to review in connection with a firm's inspection or monitoring process,[4] or otherwise, and the omission of a necessary audit procedure may be identified. (Ref: par. .06)

.A3 Procedures that the auditor may perform in connection with assessing the effect of an omitted procedure on the auditor's present ability to support a previously expressed opinion on financial statements include the following:

- Review of the audit documentation
- Discussion of the circumstances with engagement personnel and others within the firm
- Reevaluation of the overall scope of the audit

The results of other audit procedures that were performed may tend to compensate for the omitted procedure or make the effect of its omission less significant. Additionally, subsequent audits may provide audit evidence in support of the previously expressed opinion. (Ref: par. .06–.07)

.A4 The period of time during which the auditor considers whether this section applies to the circumstances of a particular engagement and then takes the actions, if any, that are required hereunder may be important. Because of the legal implications that may be involved in taking the actions contemplated herein, the auditor may decide to seek legal advice in determining an appropriate course of action. (Ref: par. .06–.07)

.A5 If, in the circumstances addressed in paragraph .07, the auditor is unable to perform a previously omitted procedure, or alternative procedures, to determine that there is a satisfactory basis for the auditor's previously expressed opinion, the auditor may decide to seek legal advice to determine an appropriate course of action concerning the auditor's responsibilities to the entity; regulatory authorities, if any, having jurisdiction over the entity; and users relying, or likely to rely, on the auditor's report. (Ref: par. .07)

[4] See QM section 10A, *A Firm's System of Quality Control*, regarding inspection in the context of the monitoring element of quality control.

AU-C Sections 600–699

USING THE WORK OF OTHERS

AU-C Section 600

Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors and Audits of Referred-to Auditors)

(Supersedes SAS No. 122 section 600.)

Source: SAS No. 149.

Effective for audits of group financial statements for periods ending on or after December 15, 2026.

Introduction

Scope of This Section

.01 Generally accepted auditing standards (GAAS) apply to an audit of group financial statements (a group audit). This section applies to all group audits. It addresses special considerations that apply to a group audit, including in circumstances in which component auditors are involved or when the group auditor makes reference to the audit of a referred-to auditor. The requirements and guidance in this section refer to, or expand on, the application of other relevant AU-C sections to a group audit, in particular, section 220, *Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*; section 230, *Audit Documentation*; section 300, *Planning an Audit*; section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*; and section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*. (Ref: par. .A1–.A2, .A32)

.02 Group financial statements include the financial information of more than one entity or business unit through a consolidation process, as described in paragraph .16. The term *consolidation process* as used in this section refers not only to the preparation of consolidated financial statements in accordance with the applicable financial reporting framework but also to the presentation of combined financial statements and to the aggregation of the financial information of entities or business units, such as branches or divisions. (Ref: par. .A3–.A5, .A30)

.03 Government entities frequently prepare group financial statements. AICPA Audit and Accounting Guide *State and Local Governments* provides guidance to assist auditors in auditing and reporting on those financial statements in accordance with GAAS, including the requirements of this section.

.04 As explained in section 220,[1] this section, adapted as necessary in the circumstances, may also be useful in an audit of financial statements other than a group audit when the engagement team includes individuals from another firm. For example, this section may be useful when involving such an individual to attend a physical inventory count; inspect property, plant, and equipment; or perform audit procedures at a shared service center at a remote location.

Groups and Components

.05 A group may be organized in various ways. For example, a group may be organized by legal or other entities, such as a parent and one or more subsidiaries, joint ventures, or investments accounted for by the equity method. Alternatively, the group may be organized by geography, by other economic units (including branches or divisions), or by functions or business activities. In this section, these different forms of organization are collectively referred to as *entities* or *business units*. (Ref: par. .A6)

.06 The group auditor determines an appropriate approach to planning and performing audit procedures to respond to the assessed risks of material misstatement of the group financial statements. For this purpose, the group auditor uses professional judgment in determining the components at which audit work will be performed. This determination is based on the group auditor's understanding of the group and its environment, and other factors such as the ability to perform audit procedures centrally, the presence of shared service centers, or the existence of common information systems and controls. (Ref: par. .A7–.A9)

Involvement of Component Auditors

.07 Section 220[2] requires the engagement partner to determine that sufficient and appropriate resources to perform the engagement are assigned or made available to the engagement team in a timely manner. In a group audit, such resources may include component auditors, who are a part of the engagement team. Therefore, this section requires the group auditor to determine the nature, timing, and extent of involvement of component auditors.

.08 The group auditor may involve component auditors to provide information, or to perform audit work, to fulfill the requirements of this section. Component auditors may have greater experience with and a more in-depth knowledge of the components and their environments (including local laws and regulations, business practices, language, and culture) than the group auditor. Accordingly, component auditors can be, and often are, involved in all phases of the group audit under the direction and supervision of the group auditor. (Ref: par. .A10–.A11)

.09 Audit risk is a function of the risks of material misstatement and detection risk.[3] Detection risk in a group audit includes the risk that a component auditor may not

---

[1] Paragraph .A1 of section 220, *Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*.

[2] Paragraph .25 of section 220.

detect a misstatement in the financial information of a component that could cause a material misstatement of the group financial statements, and that the group auditor may not detect this misstatement. Accordingly, this section requires sufficient and appropriate involvement by the group engagement partner or group auditor, as applicable, in the work of component auditors and emphasizes the importance of two-way communication between the group auditor and component auditors. In addition, this section explains the matters that the group auditor takes into account when determining the nature, timing, and extent of the direction and supervision of component auditors and the review of their work. (Ref: par. .A12–.A13)

Making Reference to the Audit of a Referred-to Auditor

.10 In accordance with this section, the group engagement partner may also determine to make reference to the audit of a referred-to auditor in the auditor's report on the group financial statements in situations when the referred-to auditor has performed an audit of component financial statements and issued an auditor's report thereon. Reference in the auditor's report on the group financial statements to the fact that part of the audit was conducted by a referred-to auditor communicates the source of audit evidence with respect to those components for which such reference is made. This section describes the procedures to be followed to obtain sufficient appropriate audit evidence when the group engagement partner determines to make reference to the audit of a referred-to auditor in the auditor's report on the group financial statements. A referred-to auditor is not a component auditor, and accordingly, a referred-to auditor is not a part of the engagement team. Therefore, when the terms *component auditor* and *engagement team* are used in this section, they do not include referred-to auditors. Accordingly, the requirements in paragraphs .51–.65 and the related application material specific to referred-to auditors are applicable, but the group auditor is not required to be involved in the work of referred-to auditors and therefore is not required to direct and supervise referred-to auditors or review their work. Paragraphs .51–.57 set out requirements for determining whether to make reference to the audit of a referred-to auditor in the auditor's report on the group financial statements when establishing the overall group audit strategy and group audit plan in accordance with paragraph .24 of this section. Therefore, when the group engagement partner plans to make reference to the audit of a referred-to auditor in the auditor's report on the group financial statements, the requirements in paragraphs .51–.65, in addition to other requirements related to the execution of the group audit, are relevant. (Ref: Exhibit A, "Relevancy of Requirements in Various Group Audit Scenarios" and par. .A165)

Professional Skepticism

.11 In accordance with section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*,[4]the engagement team is required to plan and perform the group audit with professional skepticism and to exercise professional judgment. The appropriate maintenance of professional skepticism may be demonstrated through the actions and communications of

---

[3]Paragraph .A36 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards.*

[4]Paragraphs .17–.18 and .A22–.A28 of section 200.

the engagement team, including emphasizing the importance of each engagement team member maintaining professional skepticism throughout the group audit. Such actions and communications may include specific steps to mitigate impediments that may impair the appropriate maintenance of professional skepticism. (Ref: par. .A14–.A18)

Scalability

.12 This section applies to all group audits, regardless of size or complexity. However, the requirements of this section are intended to be applied in the context of the nature and circumstances of each group audit. For example, when a group audit is carried out entirely by the group auditor, some requirements in this section are not relevant because they are conditional on the involvement of component auditors or on making reference to the audit of a referred-to auditor in the auditor's report on the group financial statements. This may be the case when the group auditor is able to perform audit procedures centrally or when the group auditor is able to perform procedures at the components without involving component auditors or making reference to the audit of a referred-to auditor in the auditor's report on the group financial statements. The guidance in paragraphs .A132–.A133 also may be helpful in applying this section in these circumstances. (Ref: Exhibit A, "Relevancy of Requirements in Various Group Audit Scenarios")

Responsibilities of the Group Engagement Partner and Group Auditor

.13 The group engagement partner remains ultimately responsible and therefore accountable for compliance with the requirements of this section. Nevertheless, the group engagement partner may seek assistance from others to fulfill these responsibilities. The phrase "the group engagement partner should take responsibility for..." or "the group auditor should take responsibility for..." is used for those requirements for which the group engagement partner or group auditor, respectively, is permitted to assign the design or performance of procedures, tasks, or actions to other appropriately skilled or suitably experienced members of the engagement team, including component auditors. For other requirements, this section expressly intends that the requirement or responsibility be fulfilled by the group engagement partner or group auditor, as applicable. In such circumstances, the group engagement partner or group auditor may need to obtain information from the firm or other members of the engagement team. For example, when others, including component auditors, perform supervisory and review activities, the outcomes of those activities can be taken into account by the group engagement partner or group auditor in fulfilling these responsibilities. (Ref: par. .A19 and .A33)

Effective Date

.14 This section is effective for audits of group financial statements for periods ending on or after December 15, 2026.

Objectives

.15 The objectives of the auditor are to do the following:

a. With respect to the acceptance and continuance of the group audit engagement, determine whether sufficient appropriate audit evidence can reasonably be expected to be obtained to provide a basis for forming an opinion on the group financial statements

b. Identify and assess the risks of material misstatement of the group financial statements, whether due to fraud or error, and plan and perform further audit procedures to appropriately respond to those assessed risks

c. Be sufficiently and appropriately involved in the work of component auditors throughout the group audit, including communicating clearly about the scope and timing of their work, and evaluating the results of that work

d. Evaluate whether sufficient appropriate audit evidence has been obtained from the audit procedures performed, including with respect to the work performed by component auditors, or through making reference to the audit of a referred-to auditor in the auditor's report on the group financial statements, as a basis for forming an opinion on the group financial statements

Definitions

.16 For purposes of GAAS, the following terms have the meanings attributed as follows:

aggregation risk. The probability that the aggregate of uncorrected and undetected misstatements exceeds materiality for the financial statements as a whole. (Ref: par. .A20)

component. An entity, business unit, function, or business activity, or some combination thereof, determined by the group auditor for purposes of planning and performing audit procedures in a group audit. (Ref: par. .A21–.A22)

component auditor. An auditor who performs audit work related to a component for purposes of the group audit. A component auditor is a part of the engagement team[5] for a group audit. (Ref: par. .A23–.A26)

component management. Management responsible for a component. (Ref: par. .A27)

component performance materiality. An amount set by the group auditor to reduce aggregation risk to an appropriately low level for purposes of planning and performing audit procedures in relation to a component.

group. A reporting entity for which group financial statements are prepared.

group audit. The audit of group financial statements.

group auditor. The group engagement partner and members of the engagement team other than component auditors. The group auditor is responsible for the following:

[5] Paragraph .12 of section 220.

i. Establishing the overall group audit strategy and group audit plan

ii. Directing and supervising component auditors and reviewing their work

iii. Evaluating the conclusions drawn from the audit evidence obtained as the basis for forming an opinion on the group financial statements

group audit opinion. The audit opinion on the group financial statements.

group engagement partner. The engagement partner[6] responsible for the group audit. (Ref: par. .A28)

group financial statements. Financial statements that include the financial information of more than one entity or business unit through a consolidation process. For purposes of this section, a consolidation process includes one or more of the following: (Ref: par. .A29–.A31)

i. Consolidation, proportionate consolidation, inclusion, or an equity method of accounting

ii. The presentation in combined financial statements of the financial information of entities or business units that are under common control or common management

iii. The aggregation of the financial information of entities or business units such as branches or divisions

group management. Management responsible for the preparation of the group financial statements.

group performance materiality. Performance materiality[7] in relation to the group financial statements as a whole, as determined by the group auditor.

referred-to auditor. An auditor who performs an audit of the financial statements of a component to which the group engagement partner determines to make reference in the auditor's report on the group financial statements. A referred-to auditor is not a component auditor, and accordingly, is not a part of the engagement team for a group audit.

.17 Reference in this section to *the applicable financial reporting framework* means the financial reporting framework that applies to the group financial statements. (Ref: par. .A32)

---

[6] See footnote 5.

[7] Paragraphs .09 and .11 of section 320, *Materiality in Planning and Performing an Audit.*

Requirements

Leadership Responsibilities for Managing and Achieving Quality on a Group Audit

.18 In applying section 220,[8]the group engagement partner is required to take overall responsibility for managing and achieving quality on the group audit engagement. In doing so, the group engagement partner should do the following: (Ref: par. .A33–.A34)

a. Take responsibility for creating an environment for the group audit engagement that emphasizes the expected behavior of engagement team members (Ref: par. .A35)

b. Be sufficiently and appropriately involved throughout the group audit engagement, including in the work of component auditors, such that the group engagement partner has the basis for determining whether the significant judgments made, and the conclusions reached, are appropriate given the nature and circumstances of the group audit engagement

Acceptance and Continuance

.19 Before accepting or continuing the group audit engagement, the group engagement partner should determine whether sufficient appropriate audit evidence can reasonably be expected to be obtained (including through involving component auditors or through making reference to the audit of a referred-to auditor in the auditor's report on the group financial statements) to provide a basis for forming an opinion on the group financial statements. (Ref: par. .A36–.A41, .A43)

.20 If after the acceptance or continuance of the group audit engagement the group engagement partner concludes that sufficient appropriate audit evidence cannot be obtained, the group engagement partner should consider the possible effects on the group audit. (Ref: par. .A42)

Terms of Engagement

.21 In applying section 210, *Terms of Engagement*,[9]the group auditor should obtain the agreement of group management that it acknowledges and understands its responsibility to provide the engagement team with the following: (Ref: par. .A44)

a. Access to all information of which group management is aware that is relevant to the preparation of the group financial statements such as records, documentation, and other matters

b. Additional information that the engagement team may request from group management or component management for the purpose of the group audit

---

[8]Paragraph .13 of section 220.

[9]Paragraphs .06*b* and .08*b* of section 210, *Terms of Engagement*.

c. Unrestricted access to persons within the group from whom the engagement team determines it necessary to obtain audit evidence

Restrictions on Access to Information or People Outside the Control of Group Management

.22 If the group engagement partner concludes that group management cannot provide the engagement team with access to information or unrestricted access to persons within the group due to restrictions that are outside the control of group management, the group engagement partner should consider the possible effects on the group audit. (Ref: par. .A45–.A53)

Restrictions on Access to Information or People Imposed by Group Management

.23 If the group engagement partner concludes that (Ref: par. .A50–.A53)

a. it will not be possible for the group auditor to obtain sufficient appropriate audit evidence due to restrictions imposed by group management, and

b. the possible effect of this limitation will result in a disclaimer of opinion on the group financial statements, the group engagement partner should either

   i. in the case of an initial engagement, not accept the engagement, or, in the case of a recurring engagement, withdraw from the engagement, when withdrawal is possible under applicable law or regulation, or

   ii. when the entity is required by law or regulation to have an audit, having performed the audit of the group financial statements to the extent possible, disclaim an opinion on the group financial statements.

Overall Group Audit Strategy and Group Audit Plan

.24 In applying section 300,[10]the group auditor should establish, and update as necessary, an overall group audit strategy and group audit plan. In doing so, the group auditor should determine the following: (Ref: par. .A54–.A58)

a. The components at which audit work will be performed (Ref: par. .A59–.A60)

b. The resources needed to perform the group audit engagement, including the nature, timing, and extent to which component auditors are to be involved (Ref: par. .A61–.A65)

c. The components for which, if any, the auditor's report on the group financial statements will make reference to the audit of a referred-to auditor (see paragraphs .51–.65)

---

[10]Paragraphs .07–.10 of section 300, *Planning an Audit*.

d. For components that are accounted for by the equity method, whether to use audited financial statements as audit evidence regarding the noncontrolled entity's financial results (see paragraph .66) (Ref: par. .A66).

Considerations When Component Auditors Are Involved

.25 In establishing the overall group audit strategy and group audit plan, the group engagement partner should evaluate whether the group auditor will be able to be sufficiently and appropriately involved in the work of the component auditor. (Ref: par. .A67)

.26 As part of the evaluation in paragraph .25, the group auditor should request the component auditor to confirm that the component auditor will cooperate with the group auditor, including whether the component auditor will perform the work requested by the group auditor. (Ref: par. .A68)

Relevant Ethical Requirements, Including Those Related to Independence

.27 In applying section 220,[11] the group engagement partner should take responsibility for the following: (Ref: par. .A69–.A70, .A97)

1. Component auditors having been made aware of relevant ethical requirements that are applicable given the nature and circumstances of the group audit engagement
2. Confirming whether the component auditors understand and will comply with the relevant ethical requirements, including those related to independence, that apply to the group audit engagement.

Engagement Resources

.28 In applying section 220,[12]the group engagement partner should do the following: (Ref: par. .A71–.A78)

a. Determine that component auditors have the appropriate competence and capabilities, including sufficient time, to perform the assigned audit procedures at the component

b. If information about the results of the monitoring and remediation process or external inspections related to the component auditor has been provided by the group auditor's firm or has otherwise been made available to the group engagement partner, determine the relevance of such information to the group auditor's determination in paragraph .28*a*

.29 The group auditor should obtain sufficient appropriate audit evidence relating to the work to be performed at the component without involving the component auditor if

[11] Paragraph .17 of section 220.

[12] Paragraphs .25–.26 of section 220.

a. the component auditor does not comply with the relevant ethical requirements, including those related to independence, that apply to the group audit engagement,[13] or (Ref: par. .A79–.A80)

b. the group engagement partner has serious concerns about the matters in paragraphs .25–.28. (Ref: par. .A81)

Engagement Performance

.30 In applying section 220,[14] the group engagement partner should take responsibility for the nature, timing, and extent of direction and supervision of component auditors and the review of their work, taking into account the following: (Ref: par. .A82–.A87)

a. Areas of higher assessed risks of material misstatement of the group financial statements or significant risks identified in accordance with section 315

b. Areas in the audit of the group financial statements that involve significant judgment

Communications With Component Auditors

.31 The group auditor should communicate with component auditors about their respective responsibilities and the group auditor's expectations, including an expectation that communications between the group auditor and component auditors take place at appropriate times throughout the group audit. (Ref: par. .A88–.A97)

Understanding the Group and Its Environment, the Applicable Financial Reporting Framework, and the Group's System of Internal Control

.32 In applying section 315A,[15]the group auditor should take responsibility for obtaining an understanding of the following: (Ref: par. .A98–.A103)

a. The group and its environment, including (Ref: par. .A104–.A106)

   i. the group's organizational structure and its business model, including

      1. the locations in which the group has its operations or activities,

      2. the nature of the group's operations or activities and the extent to which they are similar across the group, and

      3. the extent to which the group's business model integrates the use of IT

   ii. regulatory factors affecting the entities and business units in the group; and

---

[13]Paragraphs .15–.16 of section 200.

[14]Paragraph .29 of section 220.

[15]Paragraphs .19–.31 of section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

iii. the measures used internally and externally to assess the financial performance of the entities or business units

b. The applicable financial reporting framework and the consistency of accounting policies and practices across the group

c. The group's system of internal control, including

i. the nature and extent of commonality of controls; (Ref: par. .A107–.A110, .A113)

ii. whether, and if so, how, the group centralizes activities relevant to financial reporting; (Ref: par. .A111–.A113)

iii. the consolidation process used by the group, including sub-consolidations, if any, and consolidation adjustments; and

iv. how group management communicates significant matters that support the preparation of the group financial statements and related financial reporting responsibilities in the information system and other components of the group's system of internal control to management of entities or business units (Ref: par. .A114–.A116)

Considerations When Component Auditors Are Involved

.33 The group auditor should communicate the following to component auditors on a timely basis: (Ref: par. .A117)

a. Matters that the group auditor determines to be relevant to the component auditor's design or performance of risk assessment procedures for purposes of the group audit, including identified significant risks of the group financial statements

b. In applying section 550, *Related Parties*,[16]related party relationships or transactions identified by group management, and any other related parties of which the group auditor is aware, that are relevant to the work of the component auditor (Ref: par. .A118–.A119)

c. In applying section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, events or conditions identified by group management or the group auditor that may raise substantial doubt about the group's ability to continue as a going concern for a reasonable period of time that are relevant to the work of the component auditor

.34 The group auditor should request component auditors to communicate the following on a timely basis:

a. Matters related to the financial information of the component that the component auditor determines to be relevant to the identification and assessment of the risks

[16]Paragraph .19 of section 550, *Related Parties*.

of material misstatement of the group financial statements, whether due to fraud or error

b. Related party relationships not previously identified by group management or the group auditor (Ref: par. .A119)

c. Any events or conditions identified by the component auditor that may raise substantial doubt about the group's ability to continue as a going concern for a reasonable period of time

Identifying and Assessing the Risks of Material Misstatement

.35 In applying section 315,[17] based on the understanding obtained in paragraph .32, the group auditor should take responsibility for the identification and assessment of the risks of material misstatement of the group financial statements, including with respect to the consolidation process. (Ref: par. .A120–.A125)

Considerations When Component Auditors Are Involved

.36 In applying section 315,[18]the group auditor should evaluate whether the audit evidence obtained from the risk assessment procedures performed by the group auditor and component auditors provides an appropriate basis for the identification and assessment of the risks of material misstatement of the group financial statements. (Ref: par. .A126–.A127)

Materiality

.37 In applying section 320, *Materiality in Planning and Performing an Audit*,[19] and section 450, *Evaluation of Misstatements Identified During the Audit*,[20]when classes of transactions, account balances, or disclosures in the group financial statements are disaggregated across components, for purposes of planning and performing audit procedures, for those components on which the group auditor or component auditor will perform audit procedures, the group auditor should determine the following:

a. *Component performance materiality*. To address aggregation risk, such amount should be lower than group performance materiality. (Ref: par. .A128–.A134)

b. *The threshold above which misstatements identified in the component financial information are to be communicated to the group auditor*. Such threshold should not exceed the amount regarded as clearly trivial to the group financial statements. (Ref: par. .A135)

---

[17]Paragraphs .32–.38 of section 315.

[18]Paragraph .39 of section 315.

[19]Paragraph .11 of section 320.

[20]Paragraph .05 of section 450, *Evaluation of Misstatements Identified During the Audit*.

Considerations When Component Auditors Are Involved

.38 The group auditor should communicate to the component auditor the amounts determined in accordance with paragraph .37. (Ref: par. .A136–.A137)

Responding to the Assessed Risks of Material Misstatement

.39 In applying section 330,[21]the group auditor should take responsibility for the nature, timing, and extent of further audit procedures to be performed, including determining the components at which to perform further audit procedures and the nature, timing, and extent of the work to be performed at those components. (Ref: par. .A138–.A154)

Consolidation Process

.40 The group auditor should take responsibility for designing and performing further audit procedures to respond to the assessed risks of material misstatement of the group financial statements arising from the consolidation process. This should include the following: (Ref: par. .A155)

a. Evaluating whether all entities and business units have been included in the group financial statements as required by the applicable financial reporting framework and, if applicable, for designing and performing further audit procedures on sub-consolidations

b. Evaluating the appropriateness, completeness, and accuracy of consolidation adjustments and reclassifications (Ref: par. .A156)

c. Evaluating whether management's judgments made in the consolidation process give rise to indicators of possible management bias

d. Responding to assessed risks of material misstatement due to fraud arising from the consolidation process

.41 If the financial information of an entity or business unit has not been prepared in accordance with the same accounting policies applied to the group financial statements, the group auditor should evaluate whether the financial information has been appropriately adjusted for purposes of the preparation and fair presentation of the group financial statements in accordance with the applicable financial reporting framework.

.42 If the group financial statements include the financial information of an entity or business unit with a financial reporting period-end that differs from that of the group, the group auditor should take responsibility for evaluating whether appropriate adjustments have been made to that financial information in accordance with the applicable financial reporting framework.[22]

---

[21]Paragraphs .06–.07 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

[22]See, for example, FASB *Accounting Standards Codification* (ASC) 810, *Consolidation*.

Considerations When Component Auditors Are Involved

.43 When the group auditor involves component auditors in the design or performance of further audit procedures, the group auditor should communicate with the component auditor about matters that the group auditor or component auditor determine to be relevant to the design of responses to the assessed risks of material misstatement of the group financial statements.

.44 For areas of higher assessed risks of material misstatement of the group financial statements, or significant risks identified in accordance with section 315, for which a component auditor is determining the further audit procedures to be performed, the group auditor should evaluate the appropriateness of the design and performance of those further audit procedures. (Ref: par. .A157–.A158)

.45 When component auditors perform further audit procedures on the consolidation process, including on sub-consolidations, the group auditor should determine the nature and extent of direction and supervision of component auditors and the review of their work. (Ref: par. .A158)

.46 The group auditor should determine whether the financial information identified in the component auditor's communication (see paragraph .47*a*) is the financial information that is incorporated in the group financial statements.

Evaluating the Component Auditor's Communications and the Adequacy of Their Work

.47 The group auditor should request the component auditor to communicate matters relevant to the group auditor's conclusion with regard to the group audit. Such communication should include the following: (Ref: par. .A159)

a. Identification of the financial information on which the component auditor has been requested to perform audit procedures

b. Whether the component auditor has performed the work requested by the group auditor

c. Whether the component auditor has complied with the relevant ethical requirements, including those related to independence, that apply to the group audit engagement

d. Information about instances of noncompliance with laws or regulations

e. Corrected and uncorrected misstatements of the component financial information identified by the component auditor and that are above the threshold communicated by the group auditor in accordance with paragraph .38 (Ref: par. .A160)

f. Indicators of possible management bias

g. Description of any deficiencies in the system of internal control identified in connection with the audit procedures performed

h. Fraud or suspected fraud involving component management, employees at entities or business units who have significant roles in the group's system of internal control at the component, or others at entities or business units where the fraud resulted in a material misstatement of the component financial information

i. Other significant matters that the component auditor communicated or expects to communicate to component management or those charged with governance of the component

j. Any other matters that may be relevant to the group audit, or that the component auditor determines are appropriate to draw to the attention of the group auditor, including exceptions noted in written representations that the component auditor requested from component management

k. The component auditor's overall findings or conclusions (Ref: par. .A161)

.48 The group auditor should

a. discuss significant matters arising from communications with the component auditor, including those in accordance with paragraph .47, with the component auditor, component management, or group management, as appropriate, and

b. evaluate whether communications with the component auditor are adequate for the group auditor's purposes. If such communications are not adequate for the group auditor's purposes, the group auditor should consider the implications for the group audit. (Ref: par. A162)

.49 The group auditor should determine whether, and the extent to which, it is necessary to review additional component auditor audit documentation. In making this determination, the group auditor should consider (Ref: par. .A163–.A164)

a. the nature, timing, and extent of the work performed by the component auditor,

b. the competence and capabilities of the component auditor as determined in accordance with paragraph .28*a*, and

c. the direction and supervision of the component auditor and review of their work.

.50 If the group auditor concludes that the work of the component auditor is not adequate for the group auditor's purposes, the group auditor should determine what additional audit procedures are to be performed and whether they are to be performed by a component auditor or the group auditor.

Considerations Regarding Making Reference to the Audit of a Referred-to Auditor in the Auditor's Report on the Group Financial Statements

Understanding the Referred-to Auditor

Relevant Ethical Requirements, Including Those Related to Independence, for Referred-to Auditors

.51 The group engagement partner should take responsibility for the following: (Ref: par. .A166)

a. Referred-to auditors having been made aware of relevant ethical requirements that are applicable given the nature and circumstances of the group audit engagement

b. Confirming whether the referred-to auditors understand and will comply with the ethical requirements that are relevant to the group audit engagement, including those related to independence

Competence and Capabilities of Referred-to Auditors

.52 The group engagement partner should determine that referred-to auditors have the appropriate competence and capabilities. (Ref: par. .A167–.A169)

.53 The group auditor should obtain sufficient appropriate audit evidence relating to the work to be performed at the component without making reference to the audit of a referred-to auditor in the auditor's report on the group financial statements if (Ref: par. .A170–.A171)

a. the referred-to auditor does not comply with the relevant ethical requirements, including those related to independence, that apply to the group audit engagement, or

b. the group engagement partner has serious concerns about the matters in paragraphs .51–.52.

Consolidation Process Considerations for Referred-to Auditors

.54 The group auditor should obtain an understanding of whether the group auditor will be able to obtain information affecting the consolidation process from group management or a referred-to auditor.

Determining Whether to Make Reference to the Audit of a Referred-to Auditor (Ref: par. .A172–.A180)

.55 Having obtained an understanding of the referred-to auditor in paragraphs .51–.54, the group engagement partner should determine whether to make reference to the audit of a referred-to auditor in the auditor's report on the group financial statements.

.56 Reference to the audit of a referred-to auditor in the auditor's report on the group financial statements should not be made unless

a. the group engagement partner has determined that the referred-to auditor has performed an audit of the financial statements of the component in accordance with the relevant requirements of GAAS or the standards promulgated by the PCAOB (Ref: par. .A176), and

b. the referred-to auditor has issued an auditor's report that is not restricted as to use.

.57 If the component's financial statements are prepared using a different financial reporting framework from that used for the group financial statements, reference to the audit of a referred-to auditor in the auditor's report on the group financial statements should not be made unless both of the following occur:

a. The measurement, recognition, presentation, and disclosure criteria that are applicable to material items in the component's financial statements under the financial reporting framework used by the component are similar to the criteria that are applicable to material items in the group's financial statements under the financial reporting framework used by the group.

b. The group auditor has obtained sufficient appropriate audit evidence for purposes of evaluating the appropriateness of the adjustments to convert the component's financial statements to the financial reporting framework used by the group without the need to be involved in the audit of the component financial statements. (Ref: par. .A177–.A180)

.58 When the group engagement partner determines to make reference to the audit of a referred-to auditor in the auditor's report on the group financial statements, the group auditor should obtain sufficient appropriate audit evidence with regard to such components by

a. performing the procedures required by this section, as applicable (Ref: Exhibit A, "Relevancy of Requirements in Various Group Audit Scenarios"), and

b. reading the component's financial statements and the referred-to auditor's report thereon to identify significant matters (see paragraph .64).

Making Reference to the Audit of a Referred-to Auditor (Ref: par. .A181–.A184)

.59 When the group engagement partner determines to make reference to the audit of a referred-to auditor in the auditor's report on the group financial statements, the report on the group financial statements should clearly indicate the following:

a. The component was not audited by the group auditor but was audited by the referred-to auditor.

b. The magnitude of the portion of the financial statements audited by the referred-to auditor.

c. When the component's financial statements are prepared using a different financial reporting framework from that used for the group financial statements

   i. the financial reporting framework used by the component, and

   ii. that the group auditor is taking responsibility for evaluating the appropriateness of the adjustments to convert the component's financial statements to the financial reporting framework used by the group in accordance with paragraph .41. (Ref: par. .A177)

d. When

   a. the referred-to auditor's report on the component's financial statements does not state that the audit of the component's financial statements was performed in accordance with GAAS or the standards promulgated by the PCAOB, and

   b. the group engagement partner has determined that the referred-to auditor performed additional audit procedures in order to meet the relevant requirements of GAAS

      1. the set of auditing standards used by the referred-to auditor and

      2. that additional audit procedures were performed by the referred-to auditor to meet the relevant requirements of GAAS.

.60 If the group engagement partner determines to name a referred-to auditor in the auditor's report on the group financial statements

a. the referred-to auditor's express permission should be obtained, and

b. the referred-to auditor's report should be presented together with that of the auditor's report on the group financial statements.

.61 If the opinion of a referred-to auditor is modified or that audit report includes an emphasis-of-matter paragraph, an other-matter paragraph, or a going concern section, the group auditor should determine the effect that this may have on the auditor's report on the group financial statements. When deemed appropriate, the group auditor should modify the opinion on the group financial statements or include an emphasis-of-matter paragraph, an other-matter paragraph, or a going concern section in the auditor's report on the group financial statements. (Ref. par. .A184)

*Communications With the Referred-to Auditor (Ref: **par. .A185–.A187**)*

.62 The group auditor should communicate the following to a referred-to auditor on a timely basis:

a. In accordance with paragraph .51, the ethical requirements that are relevant to the group audit engagement, including those related to independence

b. Related party relationships or transactions identified by group management, and any other related parties of which the group auditor is aware, that are relevant to the work of the referred-to auditor (Ref: par. .A187)

c. A request that the referred-to auditor communicate the following on a timely basis:

   i. Confirmation that the referred-to auditor will cooperate with the group auditor

   ii. Related party relationships not previously identified by group management or the group auditor

iii. If the group engagement partner decides to name a referred-to auditor in the auditor's report on the group financial statements, the referred-to auditor's express permission for the group engagement partner to name the referred-to auditor in the auditor's report on the group financial statements in accordance with paragraph .60*a*.

.63 The group auditor should request a referred-to auditor to communicate matters relevant to the group auditor's conclusion with regard to the group audit. Such communication should include the following:

i. Identification of the financial information of the component on which the referred-to auditor is reporting

ii. Whether the referred-to auditor has complied with ethical requirements that are relevant to the group audit engagement, including independence

iii. The referred-to auditor's report

Evaluating a Referred-to Auditor's Communication

.64 The group auditor should evaluate a referred-to auditor's communication (see paragraph .62*c* and .63). The group auditor should discuss matters arising from that evaluation, or significant matters identified in accordance with paragraph .58*b*, with the referred-to auditor, component management, or group management, as appropriate.

.65 The group auditor should determine whether the financial information identified in the referred-to auditor's communication (see paragraph. .63*a*) is the financial information that is incorporated in the group financial statements.

Considerations Regarding Using Audited Financial Statements of a Noncontrolled Entity That Is Accounted for by the Equity Method as Audit Evidence

.66 The group may have a noncontrolling interest in an entity that is accounted for by the equity method and for which audited financial statements of the noncontrolled entity are available. If the group auditor intends to use the audited financial statements as audit evidence regarding the noncontrolled entity's financial results, the group auditor should (Ref: par. .A188–.A191)

a. obtain and read the audited financial statements of the noncontrolled entity, including the accompanying audit report, and determine whether the audited financial statements are satisfactory for this purpose,

b. if the difference between the financial statement period of the group and the noncontrolled entity has or could have a material effect on the group financial statements, determine whether group management has properly considered the lack of comparability and determine the effect, if any, on the group auditor's report in accordance with section 708, *Consistency of Financial Statements*, and

c. if the carrying amount of the noncontrolled entity on the group financial statements is materially different from the underlying equity in net assets of the noncontrolled entity on the noncontrolled entity financial statements, obtain sufficient appropriate audit evidence for the material differences and determine that such differences are appropriate in accordance with the applicable financial reporting framework.

Subsequent Events

.67 In applying section 560, *Subsequent Events and Subsequently Discovered Facts*,[23]the group auditor should take responsibility for performing procedures, including, as appropriate, requesting component auditors or referred-to auditors to perform procedures designed to identify events that may require adjustment of, or disclosure in, the group financial statements. (Ref: par. .A192–.A194)

Considerations When Component Auditors Are Involved

.68 The group auditor should request the component auditors to notify the group auditor if they become aware of subsequent events that may require adjustment of, or disclosure in, the group financial statements. (Ref: par. .A194)

Evaluating the Sufficiency and Appropriateness of Audit Evidence Obtained

.69 In applying section 330,[24]the group auditor should evaluate whether sufficient appropriate audit evidence has been obtained from the audit procedures performed (including from the work performed by component auditors, or through making reference to the audit of a referred-to auditor in the auditor's report on the group financial statements) on which to base the group audit opinion. (Ref: par. .A195–.A199)

.70 The group engagement partner should evaluate the effect on the group audit opinion of any uncorrected misstatements (whether identified by the group auditor or communicated by component auditors) and any instances when there has been an inability to obtain sufficient appropriate audit evidence. (Ref: par. .A200)

Auditor's Report

Considerations When Component Auditors Are Involved (Ref: par. .A201–.A202)

.71 When component auditors are involved in the group audit, no reference should be made to the component auditor in the auditor's report on the group financial statements.

---

[23]Paragraphs .09–.10 of section 560, *Subsequent Events and Subsequently Discovered Facts.*

[24]Paragraph .28 of section 330.

Communication With Group Management and Those Charged With Governance of the Group

Communication With Group Management

.72 The group auditor should communicate with group management an overview of the planned scope and timing of the audit, including an overview of the work to be performed at components of the group. (Ref: par. .A203)

.73 If fraud has been identified by the group auditor or brought to its attention by a component auditor (see paragraph .47*h*) or referred-to auditor, or information indicates that a fraud may exist, the group auditor should communicate this on a timely basis to the appropriate level of group management to inform those with primary responsibility for the prevention and detection of fraud of matters relevant to their responsibilities. (Ref: par. .A204)

.74 When a component auditor or a referred-to auditor has been engaged to express an audit opinion on the financial statements of an entity or business unit that forms part of the group, the group auditor should request group management to inform management of the entity or business unit of any matter of which the group auditor becomes aware that may be significant to the financial statements of the entity or business unit, but of which management of the entity or business unit may be unaware. If group management refuses to communicate the matter to management of the entity or business unit, the group auditor should discuss the matter with those charged with governance of the group. If the matter remains unresolved, the group auditor, subject to legal and professional confidentiality considerations, should consider whether to advise the component auditor or referred-to auditor not to issue the auditor's report on the financial statements of the entity or business unit until the matter is resolved and whether to withdraw from the engagement. (Ref: par. .A205–.A206)

Communication With Those Charged With Governance of the Group

.75 The group auditor should communicate the following matters with those charged with governance of the group, in addition to those required by section 260, *The Auditor's Communication With Those Charged With Governance* and other AU-C sections: (Ref: par. .A207)

a. An overview of the work to be performed at the components of the group, including the basis for the decision to make reference to the audit of a referred-to auditor in the auditor's report on the group financial statements, and the nature of the group auditor's planned involvement in the work to be performed by component auditors (Ref: par. .A208)

b. Instances when the group auditor's review of the work of a component auditor gave rise to a concern about the quality of that component auditor's work and how the group auditor addressed the concern

c. Any limitations on the scope of the group audit, for example, significant matters related to restrictions on access to people or information

d. Fraud or suspected fraud involving group management, component management, employees at entities or business units who have significant roles in the group's system of internal control, or others at entities or business units in which a material misstatement of the group financial statements has or may have resulted from fraud

Communication of Identified Deficiencies in Internal Control

.76 In applying section 265, *Communicating Internal Control Related Matters Identified in an Audit*, the group auditor should determine whether any identified deficiencies in the group's system of internal control are required to be communicated to those charged with governance of the group or group management. In making this determination, the group auditor should consider deficiencies in internal control that have been identified by component auditors and communicated to the group auditor in accordance with paragraph .47*g*. (Ref: par. .A209)

Documentation

.77 In accordance with section 230,[25]the audit documentation for a group audit engagement needs to be sufficient to enable an experienced auditor, having no previous connection with the audit, to understand the nature, timing, and extent of audit procedures performed, the evidence obtained, and the conclusions reached with respect to significant matters arising during the group audit. In applying section 230,[26]the group auditor should include in the audit documentation the following: (Ref: par. .A210–.A212, .A222–.A225)

a. Significant matters related to restrictions on access to people or information within the group that were considered before deciding to accept or continue the engagement, or that arose subsequent to acceptance or continuance, and how such matters were addressed

b. The basis for the group auditor's determination of components for purposes of planning and performing the group audit (Ref: par. .A213)

c. The basis for the determination of component performance materiality and the threshold for communicating misstatements in the component financial information to the group auditor

d. The basis for the group auditor's determination that component auditors have the appropriate competence and capabilities, including sufficient time, to perform the assigned audit procedures at the components (Ref: par. .A214)

e. Key elements of the understanding of the group's system of internal control in accordance with paragraph .32*c*

[25]Paragraph .08 of section 230.

[26]Paragraphs .01–.03, .09–.12, .A8–.A9, and the exhibit in section 230.

f. The nature, timing, and extent of the group auditor's direction and supervision of component auditors and the review of their work, including, as applicable, the group auditor's review of additional component auditor audit documentation in accordance with paragraph .49 (Ref: par. .A215–.A221)

g. Matters related to communications with component auditors, including

   i. matters, if any, related to fraud, related parties, or going concern communicated in accordance with paragraph .34 and

   ii. matters relevant to the group auditor's conclusion with regard to the group audit, in accordance with paragraph .47, including how the group auditor has addressed significant matters discussed with component auditors, component management, or group management.

h. Those components for which reference to the audit of referred-to auditors is made in the auditor's report on the group financial statements, including the following for such components:

   i. The financial statements of the component and the auditor's report of the referred-to auditor thereon

   ii. When the referred-to auditor's report on the component's financial statements does not state that the audit of the component's financial statements was performed in accordance with GAAS or the standards promulgated by the PCAOB, the basis for the group engagement partner's determination that the audit performed by the referred-to auditor met the relevant requirements of GAAS

   iii. The basis for the group auditor's determination that referred-to auditors have the appropriate competence and capabilities

   iv. Matters related to communications with referred-to auditors communicated in accordance with paragraphs .62*c* and .63, including how the group auditor has addressed significant matters discussed with referred-to auditors, component management, or group management

i. Those components for which the group auditor uses audited financial statements of a noncontrolled entity that is accounted for by the equity method as sufficient appropriate audit evidence regarding the noncontrolled entity's financial results

j. The group auditor's evaluation of, and response to, findings or conclusions of the component auditors or referred-to auditors about matters that could have a material effect on the group financial statements

Application and Other Explanatory Material

Scope of This section (Ref: par. .01–.02)

.A1 This section also addresses the special considerations for the group engagement partner or group auditor, as applicable, in applying the requirements and guidance in section 220, including for the direction and supervision of component auditors and the review of their work.

.A2 QM section 10, *A Firm's System of Quality Management*, addresses the engagements for which an engagement quality review is required to be performed. QM section 20, *Engagement Quality Reviews*, addresses the appointment and eligibility of the engagement quality reviewer and the engagement quality reviewer's responsibilities relating to performing and documenting an engagement quality review, including for a group audit.

.A3 An entity or business unit of a group may also prepare its own group financial statements that incorporate the financial information of those entities or business units it encompasses (that is, a sub-group). This section applies to an audit of the group financial statements of such sub-groups performed for legal, regulatory, or other reasons. When the group auditor is engaged to express opinions on both the group financial statements and the separate financial statements of the components presented in the group financial statements (for example, when auditing a governmental entity), the auditor is responsible for reporting on each audit engagement in accordance with AU-C sections.

.A4 A single legal entity may be organized with more than one business unit, for example, a company with operations in multiple locations, such as a bank with multiple branches. When those business units have characteristics such as separate locations, separate management, or separate information systems (including a separate general ledger) and the financial information is aggregated in preparing the single legal entity's financial statements, such financial statements meet the definition of *group financial statements* because they include the financial information of more than one entity or business unit through a consolidation process.

.A5 In some cases, a single legal entity may configure its information system to capture financial information for more than one product or service line for legal or regulatory reporting or other management purposes. In these circumstances, the entity's financial statements are not group financial statements because there is no aggregation of the financial information of more than one entity or business unit through a consolidation process. Further, capturing separate information (for example, in a subledger) for legal or regulatory reporting or other management purposes does not create separate entities or business units (for example, divisions) for purposes of this section.

Groups and Components (Ref: par. .05–.06)

.A6 The group's information system, including its financial reporting process, may or may not be aligned with the group's organizational structure. For example, a group may be organized according to its legal structure, but its information system may be organized by function, process, product, service (or by groups of products or services), or geographic locations for management or reporting purposes.

.A7 The group auditor may determine that the financial statements of an entity meet the definition of *group financial statements*; however, based on the understanding of the group's organizational structure and information system, the group auditor may determine it is appropriate to consider the financial information of certain entities or business units together for purposes of planning and performing audit procedures. For example, a group may have three legal entities with similar business characteristics, operating in the same geographical location, under the same management, and using a common system of internal control, including the information system. In these circumstances, the group auditor may decide to treat these three legal entities as one component. Therefore, the audit is a group audit even when the group auditor identifies only one component. In this scenario, this section applies (for example, even if the group auditor has identified only one component, the requirements in paragraph .40 related to designing and performing further audit procedures to respond to the assessed risks of material misstatement arising from the consolidation process are relevant). (Ref: Exhibit A, "Relevancy of Requirements in Various Group Audit Scenarios.")

.A8 A group may also centralize activities or processes that are applicable to more than one entity or business unit within the group, for example, through the use of a shared service center. When such centralized activities are relevant to the group's financial reporting process, the group auditor may determine that the shared service center is a component.

.A9 Another consideration that may be relevant to the group auditor's determination of components is how management has determined operating segments in accordance with the disclosure requirements of the applicable financial reporting framework.[27]

Involvement of Component Auditors (Ref: par. .08–.09)

.A10 Component auditors may perform an audit of the financial statements of a component, whether for legal, regulatory, or other reasons, particularly when a component is a legal entity. When a component auditor is also performing or has completed an audit of the component financial statements, the group auditor may be able to use audit work performed on the component financial statements, provided the group auditor is satisfied that such work is appropriate for purposes of the group audit. In addition, component auditors may adapt the work performed on the audit of the component financial statements to also meet the needs of the group auditor. In any event, the requirements of this section apply, including those relating to the direction and supervision of component auditors and the review of their work.

.A11 In accordance with section 220,[28]the engagement partner is required to determine that the approach to direction, supervision, and review is responsive to the nature and circumstances of the audit engagement. Paragraph .A86 provides examples of different ways in which the group engagement partner may take responsibility for directing and supervising component auditors and reviewing their work and may be helpful in circumstances when the group auditor plans to use the audit work from an audit of component financial statements that has already been completed.

.A12 As explained in section 200,[29]detection risk relates to the nature, timing, and extent of the auditor's procedures that are determined by the auditor to reduce audit risk to

[27]See, for example, FASB ASC 280, *Segment Reporting*.

[28]Paragraph .30*b* of section 220.

[29]Paragraph .A47 of section 200.

an acceptably low level. Detection risk is a function not only of the effectiveness of an audit procedure but also the application of that procedure by the auditor. Therefore, detection risk is influenced by matters such as adequate planning, the assignment of appropriate resources to the engagement, the maintenance of professional skepticism, and the supervision and review of the audit work performed.

.A13 Detection risk is a broader concept than aggregation risk as described in paragraphs .16 and .A20. In a group audit, there may be a higher probability that the aggregate of uncorrected and undetected misstatements may exceed materiality for the group financial statements as a whole because audit procedures may be performed separately on the financial information of components across the group. Accordingly, component performance materiality is set by the group auditor to reduce aggregation risk to an appropriately low level.

Professional Skepticism (Ref: par. .11)

.A14 Section 220[30]provides examples of the impediments to the maintenance of professional skepticism at the engagement level, including unconscious auditor biases that may impede the maintenance of professional skepticism when designing and performing audit procedures and evaluating audit evidence. Section 220 also provides possible actions that the engagement team may take to mitigate impediments to the maintenance of professional skepticism at the engagement level.

.A15 Requirements and relevant application material in section 315,[31]section 540, *Auditing Accounting Estimates and Related Disclosures*,[32]and other AU-C sections address the maintenance of professional skepticism and include examples of how documentation may help provide evidence of the auditor's maintenance of professional skepticism.

.A16 All members of the engagement team are required to maintain professional skepticism throughout the group audit. The group auditor's direction and supervision of engagement team members, including component auditors, and the review of their work, may inform the group auditor about whether the engagement team has appropriately maintained professional skepticism.

.A17 The maintenance of professional skepticism in a group audit may be affected by matters such as the following:

- Component auditors in different locations may be subject to varying cultural influences, which may affect the nature of the biases to which they are subject.
- The complex structure of some groups may introduce factors that give rise to increased susceptibility to risks of material misstatement. In addition, an overly complex organizational structure may be a fraud risk factor in accordance with section 240, *Consideration of Fraud in a Financial Statement Audit*,[33]and therefore may require

[30]Paragraphs .A34–.A36 of section 220.

[31]Paragraph .A268 of section 315.

[32]Paragraph .A11 of section 540, *Auditing Accounting Estimates and Related Disclosures.*

additional time or expertise to understand the business purpose and activities of certain entities or business units.

- The nature and extent of intragroup transactions (for example, transactions that involve multiple entities and business units within the group or multiple related parties), cash flows, or transfer pricing agreements may give rise to additional complexities. In some cases, such matters may also give rise to fraud risk factors.
- When the group audit is subject to tight reporting deadlines, this may put pressure on engagement team members when completing the work assigned. In these circumstances, the engagement team may need to take additional time to appropriately question management's assertions, make appropriate judgments, or appropriately review the audit work performed.

.A18 The maintenance of professional skepticism by the group auditor includes remaining alert for inconsistent information from component auditors, component management, and group management about matters that may be significant to the group financial statements.

Responsibilities of the Group Engagement Partner and Group Auditor (Ref: par. .13)

.A19 Component auditors may perform work on the financial information of the components for the group audit, or reference may be made to the audit of a referred-to auditor in the auditor's report on the group financial statements and, as such, component auditors and referred-to auditors are responsible for their overall findings or conclusions. However, regardless of whether reference is made in the auditor's report on the group financial statements to the report of a referred-to auditor, the group engagement partner or the group engagement partner's firm is responsible for the group audit opinion.

Definitions

Aggregation Risk (Ref: par. .16)

.A20 Aggregation risk exists in all audits of financial statements but is particularly important to understand and address in a group audit because there is a greater likelihood that audit procedures will be performed on classes of transactions, account balances, or disclosures that are disaggregated across components. Generally, aggregation risk increases as the number of components at which audit procedures are performed separately increases, whether by component auditors or other members of the engagement team.

Component (Ref: par. .16)

.A21 The group auditor uses professional judgment in determining components at which audit work will be performed considering, for example, the understanding of the group obtained in accordance with paragraph .32, including the understanding of the financial reporting framework and the consistency of accounting policies and practices across the

[33]Appendix A of section 240, *Consideration of Fraud in a Financial Statement Audit.*

group. Paragraph .A7 explains that the financial information of certain entities or business units may be considered together for purposes of planning and performing audit procedures. However, the group auditor's responsibility for the identification and assessment of the risks of material misstatement of the group financial statements encompasses all the entities and business units whose financial information is included in the group financial statements.

Considerations Specific to Governmental Entities (Ref: par. .16)

.A22 In audits of state and local governments, a component may be a separate legal entity reported as a component unit or as part of the governmental entity, such as a business activity, department, or program.

Component Auditor (Ref: par. .16)

.A23 References in this section to the *engagement team* include the group auditor and component auditors. Component auditors may be from a network firm, a firm that is not a network firm, or the group auditor's firm (for example, another office within the group auditor's firm).

.A24 An auditor who performs work on a component when the group auditor will not use that work to provide audit evidence for the group audit is not considered a component auditor.

.A25 In some circumstances, the group auditor may perform centralized testing on classes of transactions, account balances, or disclosures, or may perform audit procedures related to a component. In these circumstances, the group auditor is not considered a component auditor.

.A26 Paragraph .26 requires the group auditor to request the component auditor to confirm that the component auditor will cooperate with the group auditor, including whether the component auditor will perform the work requested by the group auditor. Paragraph .A68 provides guidance for circumstances in which the component auditor is unable to provide such a confirmation.

Component Management (Ref: par. .16)

.A27 *Component management* refers to management responsible for the financial information or other activity (for example, processing of transactions at a shared service center) at an entity or business unit that is part of the group. When the group auditor considers the financial information of certain entities or business units together as a component or determines that a shared service center is a component (see paragraphs .A7–.A8), *component management* refers to the management that is responsible for the financial information or transaction processing that is subject to the audit procedures being performed in relation to that component. In some circumstances, there may not be separate component management, and group management may be directly responsible for the financial information or other activities of the component.

Group Engagement Partner (Ref: par. .16)

.A28 When joint auditors conduct a group audit, the joint engagement partners and their engagement teams collectively constitute the *group engagement partner* and *engagement team* for the purposes of GAAS. This section does not, however, deal with the relationship between joint auditors or the work that one joint auditor performs in relation to the work of the other joint auditor for purposes of the group audit.

Group Financial Statements (Ref: par. .02, .16)

.A29 The requirements for the preparation and fair presentation of the group financial statements may be specified in the applicable financial reporting framework, which may therefore affect the determination of the financial information of entities or business units to be included in the group financial statements. For example, some frameworks require the preparation of consolidated financial statements when an entity (a parent entity) controls one or more other entities (for example, subsidiaries) through majority ownership interest or other means. In some cases, the applicable financial reporting framework includes separate requirements for, or may otherwise permit, the presentation of combined financial statements. Examples of circumstances in which the presentation of combined financial statements may be permitted include entities that are under common control or entities under common management.

.A30 The term *consolidation process* as used in this section is not intended to have the same meaning as *consolidation* or *consolidated financial statements* as defined or described in financial reporting frameworks. Rather, consolidation process refers more broadly to the process used to prepare group financial statements.

.A31 The detailed aspects of the consolidation process vary from one group to another, depending on the group's structure and information system, including the financial reporting process. However, a consolidation process involves considerations such as the elimination of intra-group transactions and balances and, when applicable, implications of different reporting periods for entities or business units included in the group financial statements.

Considerations Specific to Governmental Entities (Ref: par. .01, .17)

.A32 In audits of state and local governments, the applicable financial reporting framework may be based on multiple reporting units. Therefore, the consolidation process may involve the inclusion, but separate presentation, of the financial statements of each reporting unit in the governmental entity.

Leadership Responsibilities for Managing and Achieving Quality on a Group Audit (Ref: par. .13, .18)

.A33 It may not be possible or practical for the group engagement partner to solely deal with all requirements in section 220, particularly when the engagement team includes a large number of component auditors located in multiple locations. In managing quality at the engagement level, section 220[24]permits the engagement partner to assign the design or performance of procedures, tasks, or actions to other members of the engagement team to assist the engagement partner. Accordingly, the group engagement partner may assign procedures, tasks, or actions to other members of the engagement team, and these members may assign procedures, tasks, or actions further. In such circumstances, section 220 requires that the engagement partner should continue to take overall responsibility for managing and achieving quality on the audit engagement.

.A34 Policies or procedures established by the firm, or that are common network requirements or network services,[35]may support the group engagement partner by facilitating communication between the group auditor and component auditors and supporting the group auditor's direction and supervision of those component auditors and the review of their work.

.A35 Section 220[36]explains that a culture that demonstrates a commitment to quality is shaped and reinforced by the engagement team members as they demonstrate expected behaviors when performing the engagement. In addressing the requirement in paragraph .18*a*, the group engagement partner may communicate directly to other members of the engagement team (including component auditors) and reinforce this communication through personal conduct and actions (for example, leading by example).

Acceptance and Continuance

Determining Whether Sufficient and Appropriate Audit Evidence Can Reasonably Be Expected to Be Obtained (Ref: par. .19–.20)

.A36 In determining whether sufficient appropriate audit evidence can reasonably be expected to be obtained, the group engagement partner may obtain an understanding of matters such as the following:

- The group structure, including both the legal and organizational structure
- Activities that are significant to the group, including the industry and regulatory, economic, and political environments in which those activities take place
- The use of service organizations
- The use of shared service centers
- The consolidation process
- Whether the group auditor
  - — will have unrestricted access to those charged with governance of the group, group management, those charged with governance of the component, component management, and component information, including of those components that are accounted for by the equity method, and

[24]Paragraph .15 of section 220.

[35]Paragraphs .49–.53 of QM section 10, *Engagement Quality Reviews*.

[36]Paragraph .A28 of section 220.

  - — will be able to perform necessary work on the financial information of the components when applicable

- Whether sufficient and appropriate resources are assigned or will be made available

.A37 In the case of an initial group audit engagement, the group auditor's understanding of the matters in paragraph .A36 may be obtained from

- information provided by group management,
- communication with group management,
- communication with those charged with governance of the group, and
- when applicable, communication with component management or the predecessor auditor.

.A38 For a recurring engagement, the ability to obtain sufficient appropriate audit evidence may be affected by significant changes in, for example, the following:

- The group structure (for example, acquisitions, disposals, joint ventures, reorganizations, or changes in how the group financial reporting system is organized)
- Components' activities that are significant to the group
- The composition of those charged with governance of the group, group management, or key management of components for which audit procedures are expected to be performed
- The group auditor's understanding of the integrity and competence of group or component management
- Changes in the applicable financial reporting framework

.A39 There may be additional complexities with obtaining sufficient appropriate audit evidence in a group audit when components are located in jurisdictions other than the group auditor's jurisdiction because of cultural and language differences, and different laws or regulations. For example, law or regulation may restrict the component auditor from providing documentation outside of its jurisdiction, or war, civil unrest, or outbreaks of disease may restrict the group auditor's access to relevant component auditor audit documentation. Paragraph .A223 includes possible ways to address these situations.

.A40 In addition to the work performed by the group auditor, the group engagement partner may obtain sufficient appropriate audit evidence regarding the financial information of one or more components through using the work of a component auditor or through making reference to the audit of a referred-to auditor in the auditor's report on the group financial statements.

.A41 There may be more complexities in determining whether sufficient appropriate audit evidence can reasonably be expected to be obtained in a group audit where reference is made to the audit of referred-to auditors in the auditor's report on the group financial statements, including in group audits where no component auditors are also involved. The group engagement partner may consider the nature and extent of work to be performed by referred-to auditors, including matters such as the following:

- The risks of material misstatement to the group financial statements associated with the portion of the entity's financial statements for which the group auditor or component auditor performs audit procedures compared to the portion audited by referred-to auditors
- The importance to the group of the components audited by referred-to auditors, considering quantitative and qualitative factors

More complexity in determining whether sufficient appropriate audit evidence can reasonably be expected to be obtained may indicate an area of significant judgment for which the group engagement partner is required to review the audit documentation related to the significant judgment,[37]including the conclusions reached.[38]For example, the group engagement partner may identify as a significant judgment the determination that sufficient appropriate audit evidence can reasonably be expected to be obtained through making reference to the audit of referred-to auditors in the auditor's report on the group financial statements when the portion of the group financial statements audited by referred-to auditors is quantitatively or qualitatively significant.

.A42 Restrictions may be imposed after the group engagement partner's acceptance of the group audit engagement that may affect the engagement team's ability to obtain sufficient appropriate audit evidence. Such restrictions may include those affecting

- the group auditor's access to component information, management or those charged with governance of components, or the component auditors (including relevant audit documentation sought by the group auditor) (see paragraphs .22–.23), or
- the work to be performed on the financial information of components.

Paragraphs .A52–.A53 explain the possible effect of such restrictions on the auditor's report on the group financial statements.

Considerations Specific to Governmental Entities (Ref: par. .19)

.A43 In audits of state and local governments, when reference is made to the audit of referred-to auditors in the auditor's report on the group financial statements, the following are additional factors to consider in determining whether sufficient appropriate audit evidence can reasonably be expected to be obtained:

- Engagement by the primary government as the auditor of the financial reporting entity

[37]Paragraph .31 and .A93 of section 220.

[38]Paragraph .08 of section 230.

- Responsibility for auditing the primary government's general fund (or other primary operating fund)

Agreeing the Terms of Audit Engagements (Ref: par. .21)

.A44 Section 210[39]requires the auditor to agree upon the terms of the audit engagement with management or those charged with governance, as appropriate. The terms of engagement identify the applicable financial reporting framework.[40]Additional matters that may be included in the terms of a group audit engagement include whether reference will be made to the audit of a referred-to auditor in the auditor's report on the group financial statements, when relevant, or arrangements to facilitate the following:

- Unrestricted communications between the group auditor and component auditors, to the extent permitted by laws or regulations
- Communications to the group auditor of important communications between
  - — component auditors and those charged with governance of the component or component management, including communications on significant deficiencies and material weaknesses in internal control and
  - — regulatory authorities and entities or business units related to financial reporting matters that may be relevant to the group audit
- Permission for the group auditor to perform work, or request a component auditor to perform work, at the component

Restrictions on Access to Information or People (Ref: par. .22–.23)

.A45 Restrictions on access to information or people do not eliminate the requirement for the group auditor to obtain sufficient appropriate audit evidence.

.A46 Access to information or people can be restricted for many reasons, such as restrictions imposed by component management, laws or regulations, or other conditions, for example, war, civil unrest, or outbreaks of disease. Paragraph .A223 describes how the group auditor may be able to overcome restrictions on access to component auditor audit documentation.

.A47 In some circumstances, the group auditor may be able to overcome restrictions on access to information or people. Examples follow:

- If access to component management or those charged with governance of the component is restricted, the group auditor may request group management or those charged with governance of the group to assist with removing the restriction or otherwise request information directly from group management or those charged with governance of the group.

[39]Paragraph .09 of section 210, *Terms of Engagement*.

[40]Paragraph .10*e* of section 210.

- If the group has a noncontrolling interest in an entity that is accounted for by the equity method for which the group auditor is neither making reference to the audit of the noncontrolled entity's auditor in the auditor's report on the group financial statements (see paragraphs .A66 and .A175), nor using audited financial statements of the noncontrolled entity as sufficient appropriate audit evidence regarding the noncontrolled entity's financial results (see paragraphs .66, .A66, and .A188–.A190), the group auditor may do the following:
  - — Determine whether provisions exist (for example, in the terms of joint venture agreements or the terms of other investment agreements) regarding access by the group to the financial information of the entity and request group management to exercise such rights
  - — If the group has representatives who are on the executive board or are members of those charged with governance of the noncontrolled entity, inquire whether they can provide financial and other information available to them in these roles

.A48 If the group has a noncontrolling interest in an entity that is accounted for by the equity method for which the group auditor is neither making reference to the audit of the noncontrolled entity's auditor in the auditor's report on the group financial statements (see paragraphs .A66 and .A175), nor using audited financial statements of the noncontrolled entity as sufficient appropriate audit evidence regarding the noncontrolled entity's financial results (see paragraphs .66, .A66, and .A188–.A190), and the group auditor's access to information or people at the entity is restricted, the group auditor may be able to obtain information to be used as audit evidence regarding the entity's financial information, for example, from the following:

- Financial information that is available from group management because group management also needs to obtain the noncontrolled entity's financial information in order to prepare the group financial statements
- Publicly available information, such as public disclosure documents or quoted prices of equity instruments in the noncontrolled entity

It is a matter of professional judgment, particularly in view of the assessed risks of material misstatement of the group financial statements and considering other sources of information that may corroborate or otherwise contribute to audit evidence obtained, whether the auditor can obtain sufficient appropriate audit evidence.[41]

.A49 If the group has a noncontrolling interest in an entity that is accounted for by the equity method and access to information or people at the entity is restricted, the group auditor may consider whether such restrictions are inconsistent with group management's assertions regarding the appropriateness of the use of the equity method of accounting.

.A50 When the group auditor is unable to obtain sufficient appropriate audit evidence due to restrictions on access to information or people, the group auditor may

[41] Paragraph .07*b* of section 330.

- communicate the restrictions to the group auditor's firm to assist the group auditor in determining an appropriate course of action. For example, the group auditor's firm may communicate with group management about the restrictions and encourage group management to communicate with regulators. This may be useful when restrictions affect multiple audits in the jurisdiction or by the same firm, for example, because of war, civil unrest, or outbreaks of disease in a major economy.
- be required by law or regulation to communicate with regulators, listing authorities, or others about the restrictions.

.A51 Restrictions on access may have other implications for the group audit. For example, if restrictions are imposed by group management, the group auditor may need to reconsider the reliability of group management's responses to the group auditor's inquiries and whether the restrictions call into question group management's integrity.

Effect of Restrictions on Access to Information or People on the Auditor's Report on Group Financial Statements (Ref: par. .22–.23)

.A52 Section 705, *Modifications to the Opinion in the Independent Auditor's Report*, contains requirements and guidance about how to address situations when the group auditor is unable to obtain sufficient appropriate audit evidence. Illustration 1 in exhibit B, "Illustrative Auditor's Reports on Group Financial Statements," contains an example of an auditor's report containing a qualified group audit opinion based on the group auditor's inability to obtain sufficient appropriate audit evidence in relation to a component that is accounted for by the equity method.

Law or Regulation Prohibits the Group Engagement Partner From Declining or Withdrawing From an Engagement (Ref: par. .22–.23)

.A53 Section 210 addresses circumstances when an entity is required by law or regulation to have an audit. In these circumstances, this section still applies to the group audit, and the effect of the group auditor's inability to obtain sufficient appropriate audit evidence is addressed in section 705.

Overall Group Audit Strategy and Group Audit Plan

The Continual and Iterative Nature of Planning and Performing a Group Audit (Ref: par. .24)

.A54 As explained in section 300,[42]planning is not a discrete phase of an audit but, rather, a continual and iterative process that often begins shortly after (or in connection with) the completion of the previous audit and continues until the completion of the current audit engagement. For example, due to unexpected events, changes in conditions, or audit evidence obtained from risk assessment or further audit procedures, the group auditor may need to modify the overall group audit strategy and group audit plan, and the resulting planned nature, timing, and extent of further audit procedures, based on the revised

[42]Paragraph .A2 of section 300.

consideration of assessed risks. The group auditor may also modify the determination of the components at which to perform audit work as well as the nature, timing, and extent of the component auditors' involvement. Section 300[43]requires the auditor to update and change the overall audit strategy and audit plan as necessary during the course of the audit.

.A55 The form of the group audit strategy and group audit plan may vary based on the nature and circumstances of each group audit engagement, including the extent to which engagement management is integrated into the audit tools used for the group audit. An electronic audit tool may be used to develop and update the group audit strategy and audit plan and facilitate the group engagement partner's review of the group audit plan and group audit strategy.

Establishing the Overall Group Audit Strategy and Group Audit Plan (Ref: par. .24)

.A56 In an initial group audit engagement, the group auditor may have a preliminary understanding of the group and its environment, the applicable financial reporting framework, and the entity's system of internal control based on information obtained from group management, those charged with governance of the group and, when applicable, communication with component management or the predecessor auditor. In a recurring group audit engagement, the group auditor's preliminary understanding may be obtained through prior period audits. This preliminary understanding may assist the group auditor in developing initial expectations about the classes of transactions, account balances, and disclosures that may be significant.

.A57 The group auditor may also use information obtained during the engagement acceptance and continuance process in establishing the overall group audit strategy and group audit plan, for example, in relation to the resources needed to perform the group audit.

.A58 The process of establishing the overall group audit strategy and group audit plan and initial expectations about the classes of transactions, account balances, and disclosures that may be significant at the group financial statement level may assist the group auditor in developing a preliminary determination of matters such as the following:

- Whether to perform audit work centrally, at components, or a combination thereof
- The nature, timing, and extent of audit work to be performed with respect to the financial information of components (for example, design and perform risk assessment procedures, further audit procedures, or a combination thereof) (see paragraph .A146)
- The components for which, if any, the auditor's report on the group financial statements will make reference to the audit of a referred-to auditor

---

[43]Paragraph .10 of section 300.

Components at Which to Perform Audit Work (Ref: par. .24a)

.A59 The determination of components at which to perform audit work is a matter of professional judgment. The following are examples of matters that may influence the group auditor's determination:

- The nature of events or conditions that may give rise to risks of material misstatement at the assertion level of the group financial statements that are associated with a component, for example
  - — newly formed or acquired entities or business units,
  - — entities or business units in which significant changes have taken place,
  - — significant transactions with related parties,
  - — significant unusual transactions, and
  - — abnormal fluctuations identified by analytical procedures performed at the group level, in accordance with section 315[44]
- The disaggregation of significant classes of transactions, account balances, and disclosures in the group financial statements across components, considering the size and nature of assets, liabilities, and transactions at the location or business unit relative to the group financial statements
- The assessed risks of material misstatement of the group financial statements that exist at a component, and whether such risks are higher or exist at more than one component
- Whether sufficient appropriate audit evidence is expected to be obtained for all significant classes of transactions, account balances, and disclosures in the group financial statements from audit work planned on the financial information of identified components
- The nature and extent of misstatements or control deficiencies identified at a component in prior period audits
- The nature and extent of the commonality of controls across the group and whether, and if so, how, the group centralizes activities relevant to financial reporting

Considerations Specific to Governmental Entities (Ref: par. .24a)

.A60 In audits of governmental entities, the following are examples of matters that may influence the group auditor's determination of components at which to perform audit work:

- The disaggregation of significant classes of transactions, account balances, and disclosures (for example, net costs or total budget) in the group financial statements across components, considering the size and nature of assets, liabilities, and

[44] Paragraph .14*b* of section 315.

transactions, at the component unit, business activity, department, or program relative to the group financial statements

- The materiality of the component relative to its related opinion unit as set forth in AICPA Audit and Accounting Guide *State and Local Governments*
- Matters of heightened public sensitivity, such as national security issues, donor-funded projects, or reporting of tax revenue

Resources (Ref: par. .24b)

.A61 Matters that influence the group auditor's determination of the resources needed to perform the group audit and the nature, timing, and extent to which component auditors are to be involved are a matter of professional judgment. The following are examples of such matters:

- The understanding of the group, the components within the group at which audit work is to be performed, and whether to perform work centrally, at components, or a combination thereof.
- The knowledge and experience of the engagement team. For example, component auditors may have greater experience and a more in-depth knowledge than the group auditor of the local industries in which components operate, local laws or regulations, business practices, language, and culture. In addition, the involvement of auditor's specialists may be needed on complex matters.
- The initial expectations about the potential risks of material misstatement.
- The amount or location of resources to allocate to specific audit areas. For example, the extent to which components are dispersed across multiple locations may affect the need to involve component auditors in specific locations.
- Access arrangements. For example, when the group auditor's access to a component in a particular jurisdiction is restricted, component auditors may need to be involved.
- The nature of the components' activities, including their complexity or specialization of operations.
- The group's system of internal control, including the information system in place and its degree of centralization. For example, the involvement of component auditors may be more likely when the system of internal control is decentralized.
- Previous experience with the component auditor.

.A62 Component auditors may be involved in different phases of an audit. For example, component auditors may design or perform

- risk assessment procedures, or
- procedures to respond to the assessed risks of material misstatement.

.A63 The nature, timing, and extent to which component auditors are to be involved depends on the facts and circumstances of the group audit engagement. Often, component auditors will be involved in all phases of the audit, but the group auditor may decide to involve component auditors only in a certain phase. When the group auditor does not intend to involve component auditors in risk assessment procedures, the group auditor may still discuss with component auditors whether there are any significant changes in the business or the system of internal control of the component that could have an effect on the risks of material misstatement of the group financial statements.

.A64 Section 300[45]requires the engagement partner and other key members of the engagement team to be involved in planning the audit. When component auditors are involved, one or more individuals from a component auditor may be key members of the engagement team and therefore involved in planning the group audit. The involvement of component auditors in planning the audit draws on their experience and insight, thereby enhancing the effectiveness and efficiency of the planning process. The group engagement partner uses professional judgment in determining which component auditors to involve in planning the audit relative to particular components. This may be affected by the nature, timing, and extent to which the component auditors are expected to be involved in designing and performing risk assessment or further audit procedures.

.A65 As described in QM section 10,[46]there may be circumstances when the fee quoted for an engagement is not sufficient given the nature and circumstances of the engagement, and it may diminish the firm's ability to perform the engagement in accordance with professional standards and applicable legal or regulatory requirements. The level of fees, including, when applicable, their allocation to component auditors, and the extent to which they relate to the resources required, may be a special consideration for group audit engagements. For example, in a group audit, the firm's financial and operational priorities may place constraints on the determination of the components at which audit work will be performed, as well as the resources needed, including the involvement of component auditors. In such circumstances, these constraints do not alleviate the group engagement partner's responsibility for achieving quality at the engagement level or the requirements for the group auditor to obtain sufficient appropriate audit evidence on which to base the group audit opinion.

.A66 If the group has a noncontrolling interest in an entity that is accounted for by the equity method and audited financial statements of the noncontrolled entity are available, the group auditor may determine to use such audited financial statements as audit evidence regarding the noncontrolled entity's financial results, for example (Ref: par. .24*d*)

- in applying the requirements in paragraphs .51–.65, the group engagement partner may determine to make reference to the audit of the noncontrolled entity's auditor in the auditor's report on the group financial statements, or
- in applying the guidance in paragraphs .A188–.A190, the group auditor may determine that the audited financial statements of the noncontrolled entity provide

[45]Paragraph .05 of section 300.

[46]Paragraph .A78 of QM section 10.

sufficient appropriate audit evidence regarding the noncontrolled entity's financial results. In this situation, the requirements in paragraph .66 regarding using audited financial statements of the noncontrolled entity as sufficient appropriate audit evidence regarding the noncontrolled entity's financial results are applicable.

If audited financial statements of the noncontrolled entity are not available, or, in applying the guidance in paragraphs .A188–.A190, the group auditor determines that the audited financial statements of the noncontrolled entity do not provide sufficient appropriate audit evidence regarding the noncontrolled entity's financial results, the requirements in this section regarding obtaining sufficient appropriate audit evidence regarding the noncontrolled entity's (that is, a component's) financial results, without making reference to the audit of the noncontrolled entity's auditor in the auditor's report on the group financial statements, are applicable (see paragraph .A191).

Considerations When Component Auditors Are Involved

Sufficient and Appropriate Involvement in the Work of the Component Auditor (Ref: par. .25–.26)

.A67 In evaluating whether the group auditor will be able to be sufficiently and appropriately involved in the work of the component auditor, the group auditor may obtain an understanding of whether the component auditor is subject to any restrictions that limit communication with the group auditor, including with regard to sharing audit documentation with the group auditor. The group auditor may also obtain an understanding about whether audit evidence related to components located in a different jurisdiction may be in a different language and may need to be translated for use by the group auditor.

.A68 If the component auditor is unable to cooperate with the group auditor, the group auditor may do the following:

- Request the component auditor to provide its rationale.
- Be able to take appropriate action to address the matter, including adjusting the nature of the work requested to be performed. Alternatively, in accordance with paragraph .29, the group auditor may need to obtain sufficient appropriate audit evidence relating to the work to be performed at the component without involving the component auditor.

Relevant Ethical Requirements, Including Those Related to Independence (Ref: par. .27)

.A69 When performing work at a component for a group audit engagement, the component auditor is subject to ethical requirements, including those related to independence, that are relevant to the group audit engagement. The AICPA Code of Professional Conduct establishes the fundamental principles of professional ethics, which include due care. Due care requires the auditor to discharge professional responsibilities with competence and to have the appropriate capabilities to perform the audit.[47] Such requirements may be different from or in addition to those applying to the component auditor when performing an audit on the financial statements of an entity or business unit that is part of the group for legal, regulatory, or other reasons in the component auditor's jurisdiction. When the component auditor is not subject to the AICPA Code of Professional Conduct, compliance by the component auditor with the ethics and independence requirements, including those related to professional competence and due care, set forth in the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants (including International Independence Standards)* is sufficient to fulfill the component auditor's ethical responsibilities in the group audit. [Revised, October 2023, to reflect the updated title of the IESBA Code of Ethics for Professional Accountants.]

.A70 In making the component auditor aware of relevant ethical requirements, the group auditor may consider whether additional information or training for component auditors is necessary regarding the provisions of the ethical requirements that are relevant to the group audit engagement.

Engagement Resources (Ref: par. .28)

.A71 Section 220[48]requires the engagement partner to determine that sufficient and appropriate resources to perform the engagement are assigned or made available to the engagement team in a timely manner. When sufficient or appropriate resources are not made available in relation to work to be performed by a component auditor, the group engagement partner may discuss the matter with the component auditor, group management, or the group auditor's firm and may subsequently request the component auditor or the group auditor's firm to make sufficient and appropriate resources available.

Competence and Capabilities of the Component Auditor

.A72 Section 220[49]provides guidance regarding matters the engagement partner may take into consideration when determining the competence and capabilities of the engagement team. This determination is particularly important in a group audit when the engagement team includes component auditors. Section 220[50]indicates that the firm's policies or procedures may require the firm or the engagement partner to take different actions from those applicable to personnel when obtaining an understanding of whether a component auditor from another firm has the appropriate competence and capabilities to perform the audit engagement.

.A73 Determining whether component auditors have the appropriate competence and capabilities is a matter of professional judgment and is influenced by the nature and circumstances of the group audit engagement. This determination influences the nature, timing, and extent of the group engagement partner's direction and supervision of the component auditor and the review of their work.

.A74 In determining whether component auditors have the appropriate competence and capabilities to perform the assigned audit procedures at the component, the group engagement partner may consider matters such as the following:

---

[47]Paragraph .A16 and .A19 of section 200.

[48]Paragraph .25 of section 220.

[49]Paragraph .A71 of section 220.

[50]Paragraph .A24 of section 220.

- Previous experience with or knowledge of the component auditor
- The component auditor's specialized skills (for example, industry-specific knowledge or knowledge of relevant financial reporting requirements for statements and schedules to be filed with regulatory agencies)
- The component auditor's understanding of the auditing and other standards applicable to the group audit, such as GAAS, that is sufficient to fulfill the component auditor's responsibilities
- The degree to which the group auditor and component auditor are subject to a common system of quality management, for example, whether the group auditor and the component auditor
  - — use common resources to perform the work (for example, audit methodologies or IT applications),
  - — share common policies or procedures affecting engagement performance (for example, direction, supervision, and review of work or consultation),
  - — are subject to common monitoring activities, or
  - — have other commonalities, including common leadership or a common cultural environment
- The consistency or similarity of
  - — laws or regulations or legal system;
  - — language and culture;
  - — education and training;
  - — professional oversight, discipline, and external quality assurance; or
  - — professional organizations and standards
- Information obtained about the component auditor through interactions with component management, those charged with governance, and other key personnel, such as internal auditors

.A75 The procedures to determine the component auditor's competency and capability may include, for example, the following:

- An evaluation of the information communicated by the group auditor's firm to the group auditor, including
  - — the firm's ongoing communication related to monitoring and remediation, in circumstances when the group auditor and component auditor are from the same firm[51]

[51]Paragraph .48 of QM section 10.

    - information from the network about the results of the monitoring activities undertaken by the network across the network firms[52]
    - information obtained from professional bodies to which the component auditor belongs, the authorities by which the component auditor is licensed, or other third parties

- Discussing the assessed risks of material misstatement with the component auditor
- Requesting the component auditor to confirm its understanding of the matters referred to in paragraph .27 in writing
- Discussing the component auditor's competence and capabilities with colleagues in the group engagement partner's firm that have worked directly with the component auditor
- Obtaining published external inspection reports, peer review reports on the component auditor's firm, and other relevant publicly available information relating to the professional reputation and standing of a component auditor

.A76 The group engagement partner's firm and the component auditor may be members of the same network and may be subject to common network requirements or use common network services.[53]When determining whether component auditors have the appropriate competence and capabilities to perform work in support of the group audit engagement, the group engagement partner may be able to depend on such network requirements, for example, those addressing professional training or recruitment or that require the use of audit methodologies and related implementation tools. In accordance with QM section 10,[54]the firm is responsible for designing, implementing, and operating its system of quality management, and the firm may need to adapt or supplement network requirements or network services to be appropriate for use in its system of quality management.

Using the Work of an Auditor's Specialist

.A77 Section 220[55]requires the engagement partner to determine that members of the engagement team, and any auditor's external specialists who are not part of the engagement team, collectively have the appropriate competence and capabilities, including sufficient time, to perform the audit engagement. If an auditor's specialist is used by a component auditor, the group engagement partner may need to obtain information from the component auditor. For example, the group auditor may discuss with the component auditor, the component auditor's evaluation of the competence and capabilities of the auditor's specialist.

[52]Paragraph .52*b* of QM section 10.

[53]Paragraphs .A20 and .A188 of QM section 10.

[54]Paragraphs .49–.50 of QM section 10.

[55]Paragraph .26 of section 220.

Automated Tools and Techniques

.A78 When determining whether the engagement team has the appropriate competence and capabilities, the group engagement partner may take into consideration such matters as the expertise of the component auditor in the use of automated tools and techniques. For example, as described in section 220,[56]when the group auditor requires component auditors to use specific automated tools and techniques when performing audit procedures, the group auditor may communicate with component auditors that the use of such automated tools and techniques need to comply with the group auditor's instructions.

Application of the Group Auditor's Understanding of a Component Auditor (Ref: par. .29)

.A79 Section 220[57]requires the engagement partner to take responsibility for other members of the engagement team, having been made aware of relevant ethical requirements that are applicable given the nature and circumstances of the audit engagement, and the firm's related policies or procedures. This includes the firm's policies or procedures that address circumstances that may cause a breach of relevant ethical requirements, including those related to independence, and the responsibilities of members of the engagement team when they become aware of breaches. The firm's policies or procedures also may address breaches of independence requirements by component auditors and actions the group auditor may take in those circumstances in accordance with the relevant ethical requirements. In addition, relevant ethical requirements or law or regulation may also specify particular communications to those charged with governance in circumstances when breaches of independence requirements have been identified.[58]

.A80 If there has been a breach by a component auditor of the relevant ethical requirements that apply to the group audit engagement, including those related to independence, and the breach has not been satisfactorily addressed in accordance with provisions of the relevant ethical requirements, the group auditor cannot use the work of that component auditor.

.A81 Serious concerns are those concerns that in the group auditor's professional judgment cannot be overcome. The group engagement partner may be able to overcome less-than-serious concerns about the component auditor's professional competency (for example, lack of industry-specific knowledge), or the fact that the component auditor does not operate in an environment that actively oversees auditors, by the group auditor being more involved in the work of the component auditor or by directly performing further audit procedures on the financial information of the component.

Engagement Performance (Ref: par. .30)

.A82 Section 220[59]requires the engagement partner to determine that the nature, timing, and extent of direction, supervision, and review is planned and performed in accordance with the firm's policies or procedures, professional standards, and applicable legal and

[56]Paragraph .A65 of section 220.

[57]Paragraph .17 of section 220.

[58]Paragraph .A17 of section 260, *The Auditor's Communication With Those Charged With Governance*.

[59]Paragraph .30 of section 220.

regulatory requirements and is responsive to the nature and circumstances of the audit engagement and the resources assigned or made available to the engagement team. For a group audit, the approach to direction, supervision, and review will generally include a combination of addressing the group auditor's firm policies or procedures and group audit engagement-specific responses.

.A83 For a group audit, particularly when the engagement team includes a large number of component auditors that may be located in multiple locations, the group engagement partner may assign the design or performance of procedures, tasks, or actions to other members of the engagement team to assist the group engagement partner in fulfilling the responsibility for the nature, timing, and extent of the direction and supervision of component auditors and the review of their work (see also paragraph .13).

.A84 If component auditors are from a firm other than the group auditor's firm, the firm's policies or procedures may be different, or different actions may need to be taken, respectively, in relation to the nature, timing, and extent of direction and supervision of those members of the engagement team, and the review of their work. In particular, firm policies or procedures may require the firm or the group engagement partner to take different actions from those applicable to members of the engagement team within the firm or the network (for example, in relation to the form, content, and timing of communications with component auditors, including the use of group auditor instructions to component auditors). Section 220 provides examples of actions that may need to be taken in such circumstances.[60]

.A85 The nature, timing, and extent of direction and supervision of component auditors and review of their work may be tailored based on the nature and circumstances of the engagement and, for example, the following factors:

- The assessed risks of material misstatement. For example, if the group auditor has identified a component that includes a significant risk, an increase in the extent of direction and supervision of the component auditor and a more detailed review of the component auditor's audit documentation may be appropriate.
- The competence and capabilities of the component auditors performing the audit work. For example, if the group auditor has no previous experience working with a component auditor, the group auditor may communicate more detailed instructions, increase the frequency of discussions or other interactions with the component auditor, or assign more experienced individuals to oversee the component auditor as the work is performed.
- The location of engagement team members, including the extent to which engagement team members are dispersed across multiple locations, including when service delivery centers are used.
- Access to component auditor audit documentation. For example, when law or regulation precludes component auditor audit documentation from being transferred out of the component auditor's jurisdiction, the group auditor may be able to

[60]Paragraphs .A24–.A25 of section 220.

review the audit documentation at the component auditor's location or remotely through the use of technology, when not prohibited by law or regulation (see also paragraphs .A222–.A223).

.A86 The following are examples of different ways in which the group engagement partner may take responsibility for directing and supervising component auditors and reviewing their work:

- Communications with component auditors throughout the course of the group audit, including communications required by this section
- Meetings or calls with component auditors to discuss identified and assessed risks, findings or issues, and conclusions
- Reviews of the component auditor's audit documentation in person or remotely when permitted by law and regulation
- Participating in closing or other key meetings between the component auditors and component management

.A87 In applying section 220,[61] the group engagement partner is required to review audit documentation at appropriate points in time during the audit engagement, including audit documentation relevant to the group audit relating to

- significant matters;
- significant judgments, including those relating to difficult or contentious matters identified during the audit engagement, and the conclusions reached; and
- other matters that, in the engagement partner's professional judgment, are relevant to the engagement partner's responsibilities.

The group engagement partner's identification of areas of significant judgment made by component auditors[62] involves the exercise of professional judgment. Audit documentation related to communications with component auditors, such as those indicated in paragraphs .47–.49 of this section, may assist with fulfilling the requirement in paragraph .31 of section 220. The review of such audit documentation by the group engagement partner often takes place during the course of the group audit, including the review of relevant component auditor audit documentation (also see paragraph .A163). The group engagement partner exercises professional judgment in determining the nature and extent of the review of component auditor audit documentation.[63]Such review may constitute reviewing component auditor communications.

Communications With Component Auditors (Ref: par. .31)

.A88 Clear and timely communication between the group auditor and the component auditors about their respective responsibilities, along with clear direction to the component

[61]Paragraphs .31 and .A92–.A93 of the section 220.

[62]Paragraph .A93 of section 220.

[63]Paragraph .A91 of section 220.

auditors about the nature, timing, and extent of the work to be performed and the matters expected to be communicated to the group auditor, helps establish the basis for effective two-way communication. Effective two-way communication between the group auditor and the component auditors also helps to set expectations for component auditors and facilitates the group auditor's direction and supervision of them and the review of their work. Such communication also provides an opportunity for the group engagement partner to reinforce the need for component auditors to maintain professional skepticism in the work performed for purposes of the group audit.

.A89 The following are examples of other factors that may also contribute to effective two-way communication:

- Clarity of the instructions to the component auditor, particularly when the component auditor is from another firm and may not be familiar with the policies or procedures of the group auditor's firm.
- A mutual understanding that the component auditor may discuss the audit work requested to be performed, based on the component auditor's knowledge and understanding of the component.
- A mutual understanding of relevant issues and the expected actions arising from the communication process.
- The form of communications. For example, matters that need timely attention may be more appropriately discussed in a meeting, rather than by exchanging emails.
- A mutual understanding of the persons from the group auditor and component auditors who have responsibility for managing communications regarding particular matters.
- The process for the component auditor to take action and report back on matters communicated by the group auditor.

.A90 The communications between the group auditor and component auditors depend on the facts and circumstances of the group audit engagement, including the nature and extent of involvement of the component auditors and the degree to which the group auditor and component auditors are subject to common systems of quality management or common network requirements or network services.

Form of Communications

.A91 The form of the communications between the group auditor and component auditors may vary based on factors such as the nature of the audit work the component auditors have been requested to perform and the extent to which communication capabilities are integrated into the audit tools used for the group audit.

.A92 The form of communications also may be affected by such factors as the following:

- The significance, complexity, or urgency of the matter

- Whether the matter has been or is expected to be communicated to group management and those charged with governance of the group
- Whether the group auditor and component auditor are from the same firm or network firms

.A93 Communication between the group auditor and the component auditor may not necessarily be in writing. However, the group auditor's verbal communications with the component auditors may be supplemented by written communication, such as a set of instructions regarding the work to be performed, when the group auditor wants to give particular attention to, or promote a mutual understanding about, certain matters. In addition, the group auditor may meet with the component auditor to discuss significant matters or to review relevant parts of the component auditor's audit documentation.

.A94 Paragraph .47 requires the group auditor to request of the component auditor to communicate matters relevant to the group auditor's conclusion with regard to the group audit. As explained in paragraph .A161, the form and content of the component auditor's deliverables are influenced by the nature and extent of the audit work the component auditor has been requested to perform.

.A95 Regardless of the form of communications between the group auditor and component auditors, the documentation requirements of this section and other AU-C sections apply.

Timing of Communications

.A96 The appropriate timing of communications will vary with the circumstances of the engagement. Relevant circumstances may include the nature, timing, and extent of work to be performed by the component auditor and the action expected to be taken by the component auditor. For example, communications regarding planning matters may often be made early in the audit engagement and, for an initial group audit, may be made as part of agreeing the terms of the engagement.

Noncompliance With Laws or Regulations (Ref: par. .27, .31)

.A97 In applying section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*, the group engagement partner may become aware of information about noncompliance or suspected noncompliance with laws or regulations. In such circumstances, the group engagement partner may have an obligation under relevant ethical requirements, laws, or regulations to communicate the matter to the component auditor.[64]

[64] See, for example, paragraphs .22–.23 of the "Responding to Noncompliance With Laws and Regulations" interpretation (ET sec. 1.180.010) of the AICPA Code of Professional Conduct.

Understanding the Group and Its Environment, the Applicable Financial Reporting Framework, and the Group's System of Internal Control (Ref: par. .32)

.A98[65]contains requirements and guidance regarding the auditor's responsibility to obtain an understanding of the entity and its environment, the applicable financial reporting framework, and the entity's system of internal control. Appendix A, "Understanding the Group's System of Internal Control," of this section provides examples of matters related to controls that may be helpful in obtaining an understanding of the system of internal control in the context of a group environment and expands on how section 315A is to be applied to an audit of group financial statements.

.A99 The group auditor's understanding of the group and its environment, the applicable financial reporting framework, and the group's system of internal control with respect to the components for which a referred-to auditor performs an audit may vary as compared to the components for which a component auditor performs audit procedures.

.A100 The understanding of the group and its environment, the applicable financial reporting framework, and the group's system of internal control may be obtained through communications with

- group management, component management, or other appropriate individuals within the entity, including individuals within the internal audit function (if the function exists) and individuals who have knowledge of the group's system of internal control, accounting policies and practices, and the consolidation process;
- component auditors or referred-to auditors; or
- auditors that perform an audit for legal, regulatory, or other reasons of the financial statements of an entity or business unit that is part of the group.

.A101 Obtaining an understanding of the group, identifying risks of material misstatement, and assessing inherent risk and control risk may be performed in different ways depending on preferred audit techniques or methodologies and may be expressed in different ways. Accordingly, when component auditors are involved in the design and performance of risk assessment procedures, the group auditor may communicate its preferred approach with component auditors or provide instructions.

Engagement Team Discussion (Ref: par. .32)

.A102 In applying section 315,[66] the group engagement partner and other key engagement team members are required to discuss the application of the applicable financial reporting framework and the susceptibility of the group's financial statements to material misstatement. The group engagement partner's determination of which members of the engagement team to include in the discussion and the topics to be discussed is affected

[65]Paragraphs .19–.31 and .A58–.A212 of section 315A.

[66]Paragraph .17 of section 315.

by matters such as initial expectations about the risks of material misstatement and the preliminary expectation of whether to involve component auditors.

.A103 The discussion provides an opportunity to do the following:

- Share knowledge of the components and their environments, including which components' activities are centralized.
- Exchange information about the business risks of the components or the group and how inherent risk factors may affect susceptibility to misstatement of classes of transactions, account balances, and disclosures.
- Exchange ideas about how and where the group financial statements may be susceptible to material misstatement due to fraud or error. Section 240[67]requires the engagement team discussion to place particular emphasis on how and where the entity's financial statements may be susceptible to material misstatement due to fraud, including how fraud may occur.
- Identify policies followed by group or component management that may be biased or designed to manage earnings that could lead to fraudulent financial reporting.
- Consider known external and internal factors affecting the group that may create an incentive or pressure for group management, component management, or others to commit fraud, provide the opportunity for fraud to be perpetrated, or indicate a culture or environment that enables group management, component management, or others to rationalize committing fraud.
- Consider the risk that group or component management may override controls.
- Discuss fraud that has been identified or information that indicates existence of fraud.
- Identify risks of material misstatement relevant to components in which there may be impediments to the maintenance of professional skepticism.
- Consider whether uniform accounting policies are used to prepare the financial information of the components for the group financial statements and, if not, how differences in accounting policies are identified and adjusted (when required by the applicable financial reporting framework).
- Share information about risks of material misstatement of the financial information of a component that may apply more broadly to some, or all, of the other components.
- Share information that may indicate noncompliance with national laws or regulations, for example, payments of bribes and improper transfer pricing practices.
- Discuss events or conditions identified by group management, component management, or the engagement team that may raise substantial doubt about the group's ability to continue as a going concern for a reasonable period of time.

[67]Paragraph .15 of section 240.

- Discuss related party relationships or transactions identified by group management or component management and any other related parties of which the engagement team is aware.

The Group and Its Environment (Ref: par. .32a)

.A104 An understanding of the group's organizational structure and its business model may enable the group auditor to understand such matters as the following:

- *The complexity of the group's structure.*A group may be more complex than a single entity because a group may have several subsidiaries, divisions, or other business units, including in multiple locations. Also, a group's legal structure may be different from the operating structure, for example, for tax purposes. Complex structures often introduce factors that may give rise to increased susceptibility to material misstatements, such as whether goodwill, joint ventures, or variable interest entities are accounted for appropriately and whether adequate disclosures have been made.
- *The geographic locations of the group's operations.*Having a group that is located in multiple geographical locations may give rise to increased susceptibility to material misstatements. For example, different geographical locations may involve different languages, cultures, and business practices.
- *The structure and complexity of the group's IT environment.* A complex IT environment often introduces factors that may give rise to increased susceptibility to material misstatements. For example, a group may have a complex IT environment because of multiple IT systems that are not integrated due to recent acquisitions or mergers. Therefore, it may be particularly important to obtain an understanding of the complexity of the security over the IT environment, including vulnerability of the IT applications, databases, and other aspects of the IT environment. A group may also use one or more external service providers for aspects of its IT environment.
- *Relevant regulatory factors, including the regulatory environment.* Different laws or regulations may introduce factors that may give rise to increased susceptibility to material misstatements. A group may have operations that are subject to a high degree of complex laws or regulations in multiple jurisdictions, or entities or business units in the group that operate in multiple industries that are subject to different types of laws or regulations.
- *The ownership, and relationships between owners and other people or entities, including related parties.* Understanding the ownership and relationships can be more complex in a group that operates across multiple jurisdictions and when there are changes in ownership through formation, acquisition, disposal, or joint venture. These factors may give rise to increased susceptibility to material misstatements.

.A105 Obtaining an understanding of the degree to which the group's operations or activities are similar may help to identify similar risks of material misstatement across components and design an appropriate response.

.A106 The financial results of entities or business units are ordinarily measured and reviewed by group management. Inquiries of group management may reveal that group management relies on certain key indicators to evaluate the financial performance of the group's entities and business units and take action. The understanding of such performance measures may help to identify

- areas where there is increased susceptibility to material misstatements (for example, due to pressures on component management to meet certain performance measures).
- controls over the group's financial reporting process.

The Group's System of Internal Control

The Nature and Extent of Commonality of Controls (Ref: par. .32c(i))

.A107 Group management may design controls that are intended to operate in a common manner across multiple entities or business units (that is, common controls). For example, group management may design common controls for inventory management, which operate using the same IT system and are implemented across all entities or business units in the group. Common controls may exist in each component of the group's system of internal control, and they may be implemented at different levels within the group (for example, at the level of the consolidated group as a whole or for other levels of aggregation within the group). Common controls may be direct controls or indirect controls. *Direct controls* are controls that are precise enough to address risks of material misstatement at the assertion level. *Indirect controls* are controls that support direct controls.[68]

.A108 Understanding the components of the group's system of internal control includes understanding the commonality of tasks and actions, structures, processes, or controls within those components across the group. In understanding the commonality of a control across the group, considerations that may be relevant include whether

- the control is designed centrally and is required to be implemented as designed (that is, without modification) at some or all components;
- the control is implemented and, if applicable, monitored by individuals with similar responsibilities and capabilities at all the components where the control is implemented;
- if a control uses information from IT applications, the IT applications and other aspects of the IT environment that generate the information are the same across the components or locations; or
- if the control is automated, it is configured in the same way in each IT application across the components.

.A109 Judgment may often be needed to determine whether a control is a common control. For example, group management may require that all entities and business units perform a monthly evaluation of the aging of customers' accounts that is generated from a specific IT application. When the aging reports are generated from different IT applications or the

[68]Paragraph .A5 of section 315.

implementation of the IT application differs across entities or business units, there may be a need to consider whether the control can be determined to be common. This is because of differences in the design of the control that may exist due to the existence of different IT applications (for example, whether the IT application is configured in the same manner across components and whether there are effective general IT controls across different IT applications).

.A110 Consideration of the level at which controls are performed within the group (for example, at the level of the consolidated group as a whole or for other levels of aggregation within the group) and the degree of centralization and commonality may be important to the understanding of how information is processed and controlled. In some circumstances, controls may be performed centrally (for example, performed only at a single entity or business unit) but may have a pervasive effect on other entities or business units (for example, a shared service center that processes transactions on behalf of other entities or business units within the group). The processing of transactions and related controls at a shared service center may operate in the same way for those transactions being processed by the shared service center, regardless of the entity or business unit (for example, the processes, risks of material misstatement, and controls may be the same, regardless of the source of the transaction). In such cases, it may be appropriate to identify the controls and evaluate the design and determine the implementation of the controls, and, if applicable, test operating effectiveness, as a single population.

Centralized Activities (Ref: par. .32c(i)–(ii))

.A111 Group management may centralize some of its activities. For example, financial reporting or accounting functions may be performed for a particular group of common transactions or other financial information in a consistent and centralized manner for multiple entities or business units (for example, when the initiation, authorization, recording, processing, or reporting of revenue transactions is performed at a shared service center).

.A112 Obtaining an understanding of how centralized activities fit into the overall group structure, and the nature of the activities undertaken, may help to identify and assess risks of material misstatement and appropriately respond to such risks. For example, controls at a shared service center may operate independently from other controls, or they may be dependent upon controls at an entity or business unit from which financial information is derived (for example, sales transactions may be initiated and authorized at an entity or business unit, but the processing may occur at the shared service center).

.A113 The group auditor may involve component auditors in testing the operating effectiveness of common controls or controls related to centralized activities. In such circumstances, effective collaboration between the group auditor and component auditors is important because the audit evidence obtained through testing the operating effectiveness of common controls or controls related to centralized activities supports the determination of the nature, timing, and extent of substantive procedures to be performed across the group.

Communications About Significant Matters That Support the Preparation of the Group Financial Statements (Ref: par. .32c(iv))

.A114 Entities or business units may use a financial reporting framework for legal, regulatory, or other reasons that is different from the financial reporting framework used for the group's financial statements. In such circumstances, an understanding of group management's financial reporting processes to align accounting policies and, when relevant, financial reporting period-ends that differ from that of the group, enables the group auditor to understand how adjustments, reconciliations, and reclassifications are made and whether they are made centrally by group management or by the entity or business unit.

Instructions by Group Management to Entities or Business Units

.A115 In applying section 315,[69]the group auditor is required to understand how group management communicates significant matters that support the preparation of the group financial statements. To achieve uniformity and comparability of financial information, group management may issue instructions (for example, communicate financial reporting policies) to the entities or business units that include details about financial reporting processes or may have policies that are common across the group. Obtaining an understanding of group management's instructions may affect the identification and assessment of the risks of material misstatement of the group financial statements. For example, inadequate instructions may increase the likelihood of misstatements due to the risk that transactions are incorrectly recorded or processed, or that accounting policies are incorrectly or inconsistently applied.

.A116 The group auditor's understanding of the instructions or policies may include the following:

- The clarity and practicality of the instructions for completing the reporting package
- Whether the instructions
  - — adequately describe the characteristics of the applicable financial reporting framework and the accounting policies to be applied;
  - — address information necessary to prepare disclosures that are sufficient to comply with the requirements of the applicable financial reporting framework, for example, disclosure of related party relationships and transactions, and segment information;
  - — address information necessary for making consolidation adjustments, for example, intra-group transactions and unrealized profits, and intra-group account balances; and
  - — include a reporting timetable.

[69]Paragraph .25*b* of section 315.

Considerations When Component Auditors Are Involved in Understanding the Group and Its Environment, the Applicable Financial Reporting Framework, and the Group's System of Internal Control (Ref: par. .33–.34)

.A117 During the course of the group audit, the group auditor may communicate the matters in paragraph .33 to other component auditors, if these matters are relevant to the work of those component auditors. Paragraph .A159 includes examples of other matters that may need to be communicated timely in the course of the component auditor's work.

.A118 The nature of related party relationships and transactions may, in some circumstances, give rise to higher risks of material misstatement of the financial statements than transactions with unrelated parties.[70]In a group audit, there may be a higher risk of material misstatement of the group financial statements, including due to fraud, associated with related party relationships when

- the group structure is complex;
- the group's information systems are not integrated and therefore less effective in identifying and recording related party relationships and transactions; and
- there are numerous or frequent related party transactions between entities and business units.

Planning and performing the audit with professional skepticism, as required by section 200,[71]is therefore particularly important when these circumstances exist.

.A119 A component auditor may identify related party relationships or transactions that were not previously identified by group management or the group auditor. The group auditor is required by paragraph .33*b* to communicate to any other component auditors those related party relationships or transactions if they are relevant to the work of the other component auditors.

Identifying and Assessing the Risks of Material Misstatement (Ref: par. .35)

.A120 The process to identify and assess the risks of material misstatement of the group financial statements is iterative and dynamic, and may be challenging, particularly when the component's activities are complex or specialized or when there are many components across multiple locations. In applying section 315,[72]the auditor develops initial expectations about the potential risks of material misstatement and an initial identification of the significant classes of transactions, account balances, and disclosures of the group financial statements based on their understanding of the group and its environment, the applicable financial reporting framework, and the group's system of internal control.

.A121 The initial expectations about the potential risks of material misstatement take into account the auditor's understanding of the group, including its entities or business

[70]Paragraph .03 of section 550.

[71]Paragraph .17 of section 200.

[72]Paragraph .A143 of section 315.

units, and the environments and industries in which they operate. Based on the initial expectations, the group auditor may, and often will, involve component auditors in risk assessment procedures because they may have direct knowledge and experience with the entities or business units that may be helpful in understanding the activities and related risks, and where risks of material misstatement of the group financial statements may arise in relation to those entities or business units.

.A122 For identified risks of material misstatement at the assertion level, the group auditor is required to take responsibility for assessing inherent risk. Such assessment involves assessing the likelihood and magnitude of misstatement, which takes into account how, and the degree to which[73]

- inherent risk factors affect the susceptibility of relevant assertions to misstatement.
- the risks of material misstatement at the group financial statement level affect the assessment of inherent risk for risks of material misstatement at the assertion level.

.A123 Based on the risk assessment procedures performed, the group auditor may determine that an assessed risk of material misstatement of the group financial statements only arises in relation to financial information of certain components. For example, the risk of material misstatement relating to a legal claim may only exist in entities or business units that operate in a certain jurisdiction or in entities or business units that have similar operations or activities.

.A124 Appendix B, "Examples of Events or Conditions That May Give Rise to Risks of Material Misstatement of the Group Financial Statements," of this section sets out examples of events and conditions that, individually or together, may indicate risks of material misstatement of the group financial statements, whether due to fraud or error, including with respect to the consolidation process.

Fraud

.A125 In applying section 240,[74]the auditor is required to identify and assess the risks of material misstatement of the financial statements due to fraud and to design and perform further audit procedures whose nature, timing, and extent are responsive to the assessed risks of material misstatement due to fraud at the assertion level. Information used to identify and assess the risks of material misstatement of the group financial statements due to fraud may include the following:

- Group management's assessment of the risk that the group financial statements may be materially misstated due to fraud
- Group management's process for identifying and responding to the risks of fraud in the group financial statements, including any specific fraud risks identified by group

[73]Paragraph .35 of section 315.

[74]Paragraphs .26 and .31 of section 240.

management, or classes of transactions, account balances, or disclosures for which a risk of fraud is higher

- Whether there are particular components that are more susceptible to risks of material misstatement due to fraud
- Whether any fraud risk factors or indicators of management bias exist in the consolidation process
- How those charged with governance of the group monitor group management's processes for identifying and responding to the risks of fraud in the group, and the controls group management has established to mitigate these risks
- Responses of those charged with governance of the group, group management, appropriate individuals within the internal audit function (and when appropriate, component management, the component auditors, and others) to the group auditor's inquiry about whether they have knowledge of any actual, suspected, or alleged fraud affecting a component or the group

Considerations When Component Auditors Are Involved (Ref: par. .36)

.A126 Regardless of whether component auditors are involved in the design and performance of risk assessment procedures, paragraph .39 of section 315 is applicable. When the group auditor involves component auditors in the design and performance of risk assessment procedures, the group auditor remains responsible for having an understanding of the group and its environment, the applicable financial reporting framework, and the group's system of internal control to have a sufficient basis for the identification and assessment of the risks of material misstatement of the group financial statements in accordance with paragraph .35.

.A127 When the audit evidence obtained from the risk assessment procedures does not provide an appropriate basis for the identification and assessment of the risks of material misstatement, section 315[75]requires the auditor to perform additional risk assessment procedures until audit evidence has been obtained to provide such a basis.

Materiality

Component Performance Materiality (Ref: par. .37a)

.A128 Paragraph .37*a* requires the group auditor to determine component performance materiality for each of the components where the group auditor or component auditor will perform audit procedures on financial information that is disaggregated. The component performance materiality amount may be different for each component. Also, the component performance materiality amount for an individual component need not be an arithmetical portion of the group performance materiality and, consequently, the aggregate of component performance materiality amounts may exceed group performance materiality.

[75]Paragraph .39 of section 315.

.A129 This section does not require component performance materiality to be determined for components that are audited by referred-to auditors and for which the group auditor plans to make reference to the audit of the referred-to auditor in the auditor's report on the group financial statements.

.A130 This section does not require component performance materiality to be determined for each class of transactions, account balance, or disclosure for components at which audit procedures are performed. However, if in the specific circumstances of the group, there is one or more particular classes of transactions, account balances, or disclosures for which misstatements of lesser amounts than materiality for the group financial statements as a whole could reasonably be expected to influence the economic decisions of users taken on the basis of the group financial statements, section 320[76]requires a determination of the materiality level or levels to be applied to those particular classes of transactions, account balances, or disclosures. In these circumstances, the group auditor may need to consider whether a component performance materiality lower than the amount communicated to the component auditor may be appropriate for those particular classes of transactions, account balances, or disclosures.[77]

.A131 The determination of component performance materiality is not a simple mechanical calculation and involves the exercise of professional judgment. Factors the group auditor may take into account in setting component performance materiality include the following:

- The extent of disaggregation of the financial information across components (for example, as the extent of disaggregation across components increases, a lower component performance materiality ordinarily would be appropriate to address aggregation risk). The relative significance of the component to the group may affect the extent of disaggregation (for example, if a single component represents a large portion of the group, there likely may be less disaggregation across components).
- Expectations about the nature, frequency, and magnitude of misstatements in the component financial information, for example
  - — whether there are risks that are unique to the financial information of the component (for example, industry-specific accounting matters, or unusual or complex transactions)
  - — the nature and extent of misstatements identified at the component in prior audits

.A132 To address aggregation risk, paragraph .37*a* requires component performance materiality to be lower than group performance materiality. As explained in paragraph .A131, as the extent of disaggregation across components increases, a lower component performance materiality amount ordinarily would be appropriate to address aggregation risk. In some circumstances, however, component performance materiality may be set at an amount closer to group performance materiality because there is less aggregation risk, such as when the financial information for one component represents

[76]Paragraphs .10 and .A13–.A14 of section 320.

[77]Paragraph .A15 of section 320.

a substantial portion of the group financial statements. When determining component performance materiality for a noncontrolling interest in an entity that is accounted for by the equity method and for which the group auditor or component auditor will perform audit procedures, the group auditor may take into account the group's ownership percentage and the share of the investee's profits and losses.

.A133 In some cases, further audit procedures may be performed by the group auditor or a component auditor on a significant class of transactions or significant account balance as a single population (that is, not disaggregated across components). In such cases, group performance materiality often will be used for purposes of performing these procedures.

.A134 When the component is subject to an audit required by law or regulation or performed for another reason, the performance materiality used by the component auditor for purposes of such audit ordinarily can be expected to be less than the group performance materiality and, accordingly, the lower component performance materiality would be acceptable for purposes of the group audit.

"Clearly Trivial" Threshold (Ref: par: .37b)

.A135 The threshold for communicating misstatements to the group auditor is set at an amount equal to, or lower than, the amount regarded as clearly trivial for the group financial statements. In accordance with section 450,[78]this threshold is the amount below which misstatements would not need to be accumulated because the group auditor expects that the accumulation of such amounts clearly would not have a material effect on the group financial statements.

Considerations When Component Auditors Are Involved

Communicating Component Performance Materiality (Ref: par. .38)

.A136 In some cases, it may be appropriate for the group auditor to involve the component auditor in determining an appropriate component performance materiality amount, in view of the component auditor's knowledge of the component and potential sources of misstatement of the component financial information. In this regard, the group auditor also may consider communicating group performance materiality to the component auditor to support collaboration in determining whether component performance materiality, in relation to group performance materiality, is appropriate in the circumstances.

.A137 Component performance materiality is based, at least in part, on expectations about the nature, frequency, and magnitude of misstatements in the component financial information. Therefore, ongoing communication between the component auditor and the group auditor is important, particularly if the number and magnitude of misstatements identified by the component auditor are higher than expected.

[78]Paragraph .A3 of section 450.

Responding to the Assessed Risks of Material Misstatement (Ref: par. .39)

Performing Further Audit Procedures

Performing Further Audit Procedures Centrally

.A138 Further audit procedures may be designed and performed centrally if the audit evidence to be obtained from performing further audit procedures on one or more significant classes of transactions, account balances, or disclosures in the aggregate will respond to the assessed risks of material misstatement, for example, if the accounting records for the revenue transactions of the entire group are maintained centrally (for example, at a shared service center). Factors that may be relevant to the auditor's determination of whether to perform further audit procedures centrally include

- the level of centralization of activities relevant to financial reporting,
- the nature and extent of commonality of controls, and
- the similarity of the group's activities and business lines.

.A139 The group auditor may determine that the financial information of several components can be considered as one population for the purpose of performing further audit procedures (for example, when transactions are considered to be homogeneous because they share the same characteristics, the related risks of material misstatement are the same, and controls are designed and operating in a consistent way).

.A140 When further audit procedures are performed centrally, component auditors may still be involved. For example, when the group has multiple shared service centers, the group auditor may involve component auditors in the performance of further audit procedures for these shared service centers.

Performing Further Audit Procedures at the Component Level

.A141 In other circumstances, procedures to respond to the risks of material misstatement of the group financial statements that are related to the financial information of a component may be more effectively performed at the component level. This may be the case when the group has

- different revenue streams,
- multiple lines of business,
- operations across multiple locations, or
- decentralized systems of internal control.

Large Number of Components Whose Financial Information Is Individually Immaterial but Material in the Aggregate to the Group Financial Statements

.A142 A group may comprise a large number of components whose financial information is individually immaterial but material in the aggregate to the group financial statements.

Circumstances such as these in which the significant classes of transactions, account balances, or disclosures in the group financial statements are disaggregated over a large number of components may present additional challenges for the group auditor in planning and performing further audit procedures.

.A143 In some cases, it may be possible to obtain sufficient appropriate audit evidence by performing further audit procedures centrally on these significant classes of transactions, account balances, or disclosures (for example, if they are homogeneous, subject to common controls, and access to appropriate information can be obtained). Further audit procedures may also include substantive analytical procedures in accordance with section 520, *Analytical Procedures*. Depending on the circumstances of the engagement, the financial information of the components may be aggregated at appropriate levels for purposes of developing expectations and determining the amount of any difference of recorded amounts from expected values in performing the substantive analytical procedures. The use of automated tools and techniques may be helpful in these circumstances.

.A144 In other cases, it may be necessary to perform further audit procedures at selected components to address the risks of material misstatement of the group financial statements. The determination of the components at which audit procedures are to be performed, and the nature, timing, and extent of further audit procedures to be performed at the selected components, are matters of professional judgment. In these circumstances, introducing an element of unpredictability in the components selected for testing also may be helpful in relation to the risks of material misstatement of the group financial statements due to fraud (also see paragraph .A151).

The Nature and Extent of Further Audit Procedures

.A145 In applying section 330,[79]the nature, timing, and extent of further audit procedures performed on the financial information of components is based on, and is responsive to, the assessed risks of material misstatement of the group financial statements. In response to the assessed risks of material misstatement, the group auditor may determine the following scope of work to be appropriate at a component (with the involvement of component auditors, as applicable):

- Design and perform further audit procedures on the entire financial information of the component (for example, when a component auditor is requested to perform an audit, adapted as necessary, of the component financial information for purposes of the group audit)
- Design and perform further audit procedures on one or more classes of transactions, account balances, or disclosures
- Perform specific further audit procedures (for example, procedures designed by the group auditor)

.A146 Although the group auditor takes responsibility for the nature, timing, and extent of further audit procedures to be performed, component auditors can be and often are involved

[79]Paragraph .06 of section 330.

in all phases of the group audit, including in the design and performance of further audit procedures.

.A147 The group auditor may determine that obtaining the audit report of a referred-to auditor with respect to one or more components may be appropriate audit evidence. In that case, the group auditor follows the requirements in this section when making reference to the audit of the referred-to auditor in the auditor's report on the group financial statements.

Design and Perform Further Audit Procedures on the Entire Financial Information of the Component

.A148 The group auditor may determine that designing and performing further audit procedures on the entire financial information of a component is an appropriate approach, including when

- audit evidence needs to be obtained on all or a significant proportion of a component's financial information to respond to the assessed risks of material misstatement of the group financial statements.
- there is a pervasive risk of material misstatement of the group financial statements due to the existence of events or conditions at the component that may be relevant to the group auditor's evaluation of group management's assessment of the group's ability to continue as a going concern for a reasonable period of time.

Design and Perform Further Audit Procedures on One or More Classes of Transactions, Account Balances, or Disclosures

.A149 The group auditor may determine that designing and performing further audit procedures on one or more particular classes of transactions, account balances, or disclosures of the financial information of a component is an appropriate approach to address assessed risks of material misstatement of the group financial statements. For example, a component may have limited operations but hold a significant portion of the land and buildings of the group or have significant tax balances.

Perform Specific Further Audit Procedures

.A150 The group auditor may determine that designing and performing specific further audit procedures on the financial information of a component is an appropriate approach, such as when audit evidence needs to be obtained for one or more relevant assertions only. For example, the group auditor may do the following:

- Centrally test the class of transaction, account balance, or disclosure and may require the component auditor to perform specific further audit procedures at the component (for example, specific further audit procedures related to the valuation of claims or litigation in the component's jurisdiction or the existence of an asset)
- Design specific further audit procedures and request the component auditor to perform those specific further audit procedures at the component (for example,

perform substantive procedures to address risks of material misstatement related to revenue), including specifying the sample sizes to be used

- Request one or more component auditors to perform tests of controls related to certain significant classes of transactions, account balances, and disclosures
- Request a component auditor to perform procedures to obtain audit evidence related to one or more relevant assertions

Element of Unpredictability

.A151 Incorporating an element of unpredictability in the type of work to be performed, the entities or business units at which procedures are performed, and the extent to which the group auditor is involved in the work, may increase the likelihood of identifying a material misstatement of the components' financial information that may give rise to a material misstatement of the group financial statements due to fraud.[80]

Operating Effectiveness of Controls

.A152 The group auditor may rely on the operating effectiveness of controls that operate throughout the group in determining the nature, timing, and extent of substantive procedures to be performed at either the group level or at the components. Section 330[81]requires the auditor to design and perform tests of controls to obtain sufficient appropriate audit evidence regarding the operating effectiveness of those controls. Component auditors may be involved in designing and performing such tests of controls.

.A153 If deviations from controls upon which the auditor intends to rely are detected, section 330[82]requires the auditor to make specific inquiries to understand these matters and their potential consequences. If more deviations than expected are detected as a result of testing the operating effectiveness of the controls, the group auditor may need to revise the group audit plan. Possible revisions to the group audit plan may include the following:

- Performing additional substantive procedures at certain components
- Identifying and testing the operating effectiveness of other relevant controls that are designed and implemented effectively
- Increasing the number of components selected for further audit procedures

.A154 When the operating effectiveness of controls is tested centrally (for example, controls at a shared service center or testing of common controls), the group auditor may need to communicate information about the audit work performed to the component auditors. For example, when a component auditor is requested to design and perform substantive procedures on the entire financial information of the component, or design and perform substantive procedures on one or more classes of transactions, account balances, or

[80]Paragraph .29*c* of section 240.

[81]Paragraph .08 of section 330.

[82]Paragraph .17 of section 330.

disclosures, the component auditor may discuss with the group auditor about the control testing performed centrally to determine the nature, timing, and extent of the substantive procedures.

Consolidation Process

Consolidation Procedures (Ref: par. .40)

.A155 Further audit procedures on the consolidation process, including sub-consolidations, may include

- determining that the necessary journal entries are reflected in the consolidation, and
- evaluating the operating effectiveness of the controls over the consolidation process and responding appropriately if any controls are determined to be ineffective.

Consolidation Adjustments and Reclassifications (Ref: par. .40b)

.A156 The consolidation process may require adjustments and reclassifications to amounts reported in the group financial statements[83]that do not pass through the usual IT applications and may not be subject to the same controls to which other financial information is subject. The group auditor's evaluation of the appropriateness, completeness, and accuracy of the adjustments and reclassifications may include the following:

- Evaluating whether significant adjustments appropriately reflect the events and transactions underlying them
- Determining whether those entities or business units whose financial information has been included in the group financial statements were appropriately included
- Determining whether significant adjustments have been correctly calculated, processed, and authorized by group management and, when applicable, by component management
- Determining whether significant adjustments are properly supported and sufficiently documented
- Evaluating the reconciliation and elimination of intra-group transactions, unrealized profits or losses, and intra-group account balances

Considerations When Component Auditors Are Involved (Ref: par. .44–.45)

.A157 When the group auditor involves component auditors in the design or performance of further audit procedures, the component auditor may determine that the use of the work of an auditor's specialist is appropriate and communicate this to the group auditor. In such circumstances, when determining whether the component auditor's design and performance of further audit procedures is appropriate, the group auditor may, for example, discuss the following with the component auditor:

---

[83]Paragraph .21*b* of section 330.

- The nature, scope, and objectives of the auditor's specialist's work
- The component auditor's evaluation of the adequacy of the work of the auditor's specialist for the group auditor's purposes

.A158 The appropriate level of the group auditor's involvement may depend on the circumstances and the structure of the group and other factors, such as the group auditor's previous experience with the component auditors, and the circumstances of the group audit engagement (for example, if the financial information of an entity or business unit has not been prepared in accordance with the same accounting policies applied to the group financial statements). The group auditor's evaluation in accordance with paragraph .44 may be undertaken in a number of ways (for example, through communications with component auditors or review of selected component auditor audit documentation) (see paragraphs .A163–.A164).

Evaluating the Component Auditor's Communications and the Adequacy of Their Work

Communication About Matters Relevant to the Group Auditor's Conclusion With Regard to the Group Audit (Ref: par. .47)

.A159 Although the matters required to be communicated in accordance with paragraph .47 are relevant to the group auditor's conclusion with regard to the group audit, certain matters may be communicated during the course of the component auditor's procedures. In addition to the matters in paragraphs .34 and .68, such matters may include, for example

- information about breaches of relevant ethical requirements, including identified breaches of independence provisions;
- information about instances of noncompliance with laws or regulations;
- newly arising significant risks of material misstatement, including risks of fraud;
- actual, suspected, or alleged fraud involving component management or employees that could have a material effect on the group financial statements;
- significant or unusual transactions;
- differences of opinion that arise within the component auditor or between the component auditor and the component engagement quality reviewer; or
- the nature and scope of, and conclusions resulting from, consultations undertaken by the component auditor and how such conclusions were implemented.

Communication of Misstatements of Component Financial Information (Ref: par. .47e)

.A160 Knowledge about corrected and uncorrected misstatements across components may alert the group auditor to potential pervasive control deficiencies, when considered along with the communication of deficiencies in accordance with paragraph .47*g*. In addition, a higher-than-expected number of identified misstatements (uncorrected or corrected) may indicate a higher risk of undetected misstatements, which may lead the group auditor to conclude that additional audit procedures need to be performed at certain components.

Component Auditor's Overall Findings or Conclusions (Ref: par. .47k)

.A161 The form and content of the deliverables from the component auditor are influenced by the nature and extent of the audit work the component auditor has been requested to perform. The group auditor's firm policies or procedures may address the form or specific wording of an overall conclusion from the component auditor on the audit work performed for purposes of the group audit.

Evaluating Whether Communications With the Component Auditor Are Adequate for the Group Auditor's Purposes (Ref: par. .48b)

.A162 If the group auditor determines that the component auditor's communications are not adequate for the group auditor's purposes, the group auditor may consider whether, for example

- further information can be obtained from the component auditor (for example, through further discussions or meetings).
- it is necessary to review additional component auditor audit documentation in accordance with paragraph .49.
- additional audit procedures may need to be performed in accordance with paragraph .50.
- there are any concerns about the component auditor's competence or capabilities.

Reviewing Additional Component Auditor Audit Documentation (Ref: par. .49)

.A163 Paragraph .A85 provides guidance for the group auditor in tailoring the nature, timing, and extent of the direction and supervision of the component auditor, and the review of their work, based on the facts and circumstances of the group audit and other matters (for example, the assessed risks of material misstatement of the group financial statements). The group auditor's consideration in accordance with paragraph .49*c* also may be affected by the following matters relevant to the group auditor's ongoing involvement in the work of the component auditor:

- Communications from the component auditor, including those in accordance with paragraph .47 of this section
- The review of component auditor audit documentation by the group auditor during the course of the group audit (for example, to fulfill the requirements of paragraphs .36, .44, and .45) or by the group engagement partner in accordance with paragraph .31 of section 220

.A164 Other factors that may affect the group auditor's determination about whether, and the extent to which, it is necessary to review additional component auditor audit documentation in the circumstances include the following:

- The degree to which the component auditor was involved in risk assessment procedures and in the identification and assessment of the risks of material misstatement of the group financial statements
- The significant judgments made by, and the findings or conclusions of, the component auditor about matters that are material to the group financial statements
- The competence and capabilities of more experienced engagement team members from the component auditor responsible for reviewing the work of less experienced individuals
- Whether the component auditor and group auditor are subject to common policies or procedures for review of audit documentation

Considerations Regarding Making Reference to the Audit of a Referred-to Auditor in the Auditor's Report on the Group Financial Statements

.A165 The requirements in paragraphs .51–.65 and the related application material in paragraphs .A166–.A187 apply only when the group engagement partner plans to obtain audit evidence through making reference to the audit of a referred-to auditor in the auditor's report on the group financial statements. (Ref: Exhibit A, "Relevancy of Requirements in Various Group Audit Scenarios" and par. .10)

Understanding the Referred-to Auditor

Relevant Ethical Requirements, Including Those Related to Independence, for Referred-to Auditors (Ref: par. .51)

.A166 When the group engagement partner determines to make reference to the audit of a referred-to auditor in the auditor's report on the group financial statements, the referred-to auditor is subject to ethical requirements, including those related to independence, that are relevant to the group audit. Such requirements may be different or in addition to those applying to a referred-to auditor when performing an audit on the financial statements of an entity or business unit that is part of the group for legal, regulatory, or other reasons in the referred-to auditor's jurisdiction. When the referred-to auditor is not subject to the AICPA Code of Professional Conduct, compliance by the referred-to auditor with the ethics and independence requirements set forth in the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants (including International Independence Standards)* is sufficient to fulfill the referred-to auditor's ethical responsibilities in the group audit. [Revised, October 2023, to reflect the updated title of the IESBA Code of Ethics for Professional Accountants.]

Competence and Capabilities of Referred-to Auditors (Ref: par. .52–.53)

.A167 Determining whether referred-to auditors have the appropriate competence and capabilities is a matter of professional judgment and is influenced by the nature and circumstances of the group audit engagement.

.A168 In determining whether referred-to auditors have the appropriate competence and capabilities, the group engagement partner may consider matters such as the following:

- Previous experience with or knowledge of the referred-to auditor
- The referred-to auditor's specialized skills (for example, industry-specific knowledge or knowledge of relevant financial reporting requirements for statements and schedules to be filed with regulatory agencies)
- The referred-to auditor's understanding of the auditing and other standards applicable to the group audit that is sufficient to fulfill the referred-to auditor's responsibilities
- Whether a referred-to auditor operates in a regulatory environment that actively oversees auditors

.A169 The procedures to determine the referred-to auditor's competency and capability may include, for example, the following:

- Requesting the referred-to auditor to confirm the matter referred to in paragraph .52 in writing
- Obtaining published external inspection reports, peer review reports on the referred-to auditor's firm, and other relevant publicly available information relating to the professional reputation and standing of a referred-to auditor

.A170 If there has been a breach by a referred-to auditor of the relevant ethical requirements that apply to the group audit engagement, including those related to independence, and the breach has not been satisfactorily addressed in accordance with provisions of the relevant ethical requirements, the group auditor cannot make reference in the auditor's report on the group financial statements to the audit of the referred-to auditor. The group auditor also cannot use the work of that auditor in the capacity of a component auditor as described by this section.

.A171 Serious concerns are those concerns that in the group engagement partner's professional judgment cannot be overcome. The group engagement partner may be able to overcome less-than-serious concerns about the referred-to auditor's professional competency or the fact that the referred-to auditor does not operate in an environment that actively oversees auditors, by, for example, the group auditor directly performing further audit procedures on the financial information of the component.

*Determining Whether to Make Reference to the Audit of a Referred-to Auditor (Ref: **par. .55–.56**)*

.A172 The group engagement partner determines, individually for each component, whether to

- be involved in the work of the component auditor, insofar as that work relates to the expression of an audit opinion on the group financial statements, or

- make reference to the audit of a referred-to auditor in the auditor's report on the group financial statements.

.A173 In group audits with two or more components, the decision to make reference is made individually for each potential referred-to auditor. The group auditor may make reference to any, all, or none of the potential referred-to auditors. For example, if one component is audited by an auditor from a network firm and another component is audited by a non-network firm, the group engagement partner may decide to be involved in the work of the auditor from the network firm and to make reference to the work of the auditor from the non-network firm.

.A174 The determination of whether to be involved in the work of the component auditor or make reference to the audit of a referred-to auditor may include factors related to the group being audited or factors related to the performance of audit procedures for the group audit. Factors that may affect the group engagement partner's determination of whether to make reference to the audit of a potential referred-to auditor in the auditor's report on the group financial statements include the following:

- The group auditor's understanding of the group and its environment and the group's system of internal control
- Differences in the financial reporting framework applied in preparing the financial statements of the component and that applied in preparing the group financial statements
- Whether the audit of the financial statements of the component will be completed in time to meet the group reporting timetable
- Differences in the auditing and other standards applied by the potential referred-to auditor and those applied in the audit of the group financial statements
- Whether it is impracticable for the group auditor to be involved in the audit of the component financial statements

.A175 If the group has a noncontrolling interest in an entity that is accounted for by the equity method and audited financial statements of the noncontrolled entity are available, in applying the requirements in paragraphs .51–.65, the group engagement partner may determine to make reference to the audit of the noncontrolled entity's auditor in the auditor's report on the group financial statements. Alternatively, in applying the guidance in paragraphs .A188–.A190, the group auditor may determine the audited financial statements of the noncontrolled entity provide sufficient appropriate audit evidence regarding the noncontrolled entity's financial results. In this situation, the requirements in paragraph .66 are applicable and the group engagement partner does not make reference to the audit of the noncontrolled entity's auditor in the auditor's report on the group financial statements.

Determining Whether the Audit of the Referred-to Auditor Was Conducted in Accordance With GAAS (Ref: par. .56a)

.A176 An auditor's report stating that the audit was conducted in accordance with GAAS or, if applicable, the auditing standards promulgated by the PCAOB, is sufficient to make the determination required by paragraph .56*a*.[84] When the auditor has performed an audit of the component financial statements in accordance with auditing standards other than GAAS or, if applicable, the auditing standards promulgated by the PCAOB, the group engagement partner may evaluate, exercising professional judgment, whether the audit performed by the auditor meets the relevant requirements of GAAS. For the purposes of complying with paragraph .56*a*, relevant requirements of GAAS are those that pertain to planning and performing the audit of the component financial statements and do not include those related to the form of the auditor's report. Audits performed in accordance with International Standards on Auditing (ISAs) promulgated by the International Auditing and Assurance Standards Board (IAASB) are more likely to meet the relevant requirements of GAAS than audits performed in accordance with auditing standards promulgated by bodies other than the IAASB. The group auditor may provide the referred-to auditor with AU-C appendix B, "Substantive Differences Between the International Standards on Auditing and Generally Accepted Auditing Standards," that identifies substantive requirements of GAAS that are not requirements in the ISAs. The referred-to auditor may perform additional procedures in order to meet the relevant requirements of GAAS. The communication requested of the referred-to auditor required by paragraphs .62–.63 may address whether the audit met the relevant requirements of GAAS. The group engagement partner, having determined that all relevant requirements of GAAS have been met by the referred-to auditor, may decide to make reference to the audit of that referred-to auditor in the auditor's report on the group financial statements.

Determining Whether to Make Reference to the Audit of a Referred-to Auditor When the Financial Reporting Framework Is Not the Same (Ref: par. .57)

.A177 When the component's financial statements are prepared using a financial reporting framework that differs from the financial reporting framework used to prepare the group financial statements, the group auditor is required by this section to evaluate whether the financial information of the component has been appropriately adjusted for purposes of the preparation and fair presentation of the group financial statements in accordance with the applicable financial reporting framework. Evaluating whether the financial statements of the component have been appropriately adjusted to conform with the financial reporting framework used by the group is based on a depth of understanding of the component's financial statements that ordinarily is not obtained unless the group auditor is involved in the audit of the component financial statements. In rare circumstances, however, the group engagement partner may conclude that the group auditor can reasonably expect to obtain sufficient appropriate audit evidence for purposes of evaluating the appropriateness of the adjustments to convert the component's financial statements to the financial reporting framework used by the group without the need to be involved in the audit of the component financial statements.

---

[84] Paragraphs .44–.46 of section 700, *Forming an Opinion and Reporting on Financial Statements*.

.A178 The greater the number of differences or the greater the significance of the differences between the criteria used for measurement, recognition, presentation, and disclosure of material items in the component's financial statements under the financial reporting framework used by the component and the financial reporting framework used by the group, the less similar they are. Financial statements prepared and presented in accordance with International Financial Reporting Standards (IFRSs) and International Financial Reporting Standards for Small and Medium-Sized Entities, as issued by the International Accounting Standards Board, are generally viewed as more similar to financial statements prepared and presented in accordance with accounting principles generally accepted in the United States of America (GAAP) than financial statements prepared and presented in accordance with jurisdiction-specific reporting frameworks or adaptations of IFRSs. In most cases, special purpose frameworks set forth in section 800, *Special Considerations — Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks*, are not similar to GAAP.[85]

.A179 When the component prepares financial statements using a different financial reporting framework than that used by the group, additional considerations in determining whether it may be appropriate to make reference to the audit of a potential referred-to auditor in the auditor's report on the group financial statements include the following:

- The effectiveness of controls related to financial reporting and the adequacy of the consolidation process specifically related to the adjustments to convert the component's financial statements to the financial reporting framework used by the group, including the financial reporting competencies of personnel involved in the adjustments
- The depth of the group auditor's understanding of the component and its environment, including the complexity of the events and transactions subject to the differing financial reporting requirements and the assessed risk of material misstatement related to the adjustments
- The extent of the group auditor's knowledge of the financial reporting framework used to prepare the component financial statements
- The group auditor's ability to obtain information from group or component management that is relevant to the adjustments
- The need and ability to seek, as necessary, the assistance of professionals possessing specialized skills or knowledge related to the adjustments

Considerations for Governmental Entities

.A180 When the applicable financial reporting framework used by the group provides for the inclusion of component financial statements that are prepared in accordance with a different financial reporting framework, the component financial statements are deemed to be in accordance with the applicable financial reporting framework used for the group financial statements. For example, both the financial reporting framework

[85]Paragraph .06 of section 700.

established by GASB and the financial reporting framework established by the Federal Accounting Standards Advisory Board have such provisions. Accordingly, when the provisions established by the applicable financial reporting framework for inclusion of those component financial statements have been followed, the requirements in paragraphs .57 and .59*c* are not relevant.

Making Reference to the Audit of a Referred-to Auditor (Ref: par. .59–.61)

.A181 Reference in the auditor's report on the group financial statements to the fact that part of the audit was conducted by a referred-to auditor is not to be construed as a qualification of the opinion but, rather, is intended to communicate (*a*) that the group auditor was not involved in the work of the referred-to auditor, and (*b*) the source of the audit evidence with respect to those components for which reference to the audit of referred-to auditors is made.

.A182 The disclosure of the magnitude of the portion of the financial statements audited by a referred-to auditor may be achieved by stating the dollar amounts or percentages of one or more of the following: total assets, total revenues, or other appropriate criteria, whichever most clearly describes the portion of the financial statements audited by a referred-to auditor. When two or more referred-to auditors are referred to, the dollar amounts or percentages covered by the referred-to auditors may be stated in the aggregate.

.A183 Exhibit B contains examples of appropriate reporting in the auditor's report on the group financial statements when reference is made to the audit of a referred-to auditor in the auditor's report on the group financial statements.

.A184 If there is a modified opinion, emphasis-of-matter paragraph, other-matter paragraph, or going concern section in the referred-to auditor's report, but it does not affect the report on the group financial statements and the referred-to auditor's report is not presented, the group auditor need not make reference to those paragraphs or that section in the auditor's report on the group financial statements. If the referred-to auditor's report is presented, the group auditor may make reference to those paragraphs or that section and their disposition.

Communications With the Referred-to Auditor (Ref: par. .62–.65)

.A185 The communications between the group auditor and referred-to auditor regarding the matters in paragraphs .62–.63 support the group engagement partner taking overall responsibility for managing and achieving quality on the group audit engagement without the group auditor being involved in the work of the referred-to auditor. Therefore, for this purpose, when a referred-to auditor's audit is not yet completed, the referred-to auditor may request the group auditor to communicate, or the group auditor may otherwise communicate, additional information that may be relevant to the referred-to auditor's work (for example, identified significant risks of the group financial statements).

.A186 The form of the communications between the group auditor and referred-to auditors may vary and may not necessarily be in writing. However, verbal communications between the group auditor and referred-to auditors may be supplemented by written communication, such as the group auditor obtaining written representations from the referred-to auditor confirming that the referred-to auditor has complied with the ethical requirements that are relevant to the group audit engagement, including independence, or communicating matters related to the referred-to auditor's competence and capabilities.

.A187 The referred-to auditor may identify related party relationships or transactions that were not previously identified by group management or the group auditor. The group auditor is required by paragraph .62*b* to communicate to any other referred-to auditors those related party relationships or transactions if they are relevant to the work of the other referred-to auditors.

Considerations Regarding Using Audited Financial Statements of a Noncontrolled Entity That Is Accounted for by the Equity Method as Audit Evidence (Ref: par. .66)

.A188 It is a matter of professional judgment, particularly in view of the assessed risks of material misstatement of the group financial statements, whether audited financial statements of the noncontrolled entity, including the accompanying audit report, are satisfactory to be used as audit evidence regarding the noncontrolled entity's financial results. Obtaining and reading the audited financial statements may be sufficient for the purpose of obtaining sufficient appropriate audit evidence regarding the noncontrolled entity's financial results. In making this determination, the group auditor may consider the following:

- The professional competence and independence of the noncontrolled entity's auditor (investee's auditor)
- The adequacy of the standards under which the investee's auditor's report was issued
- Whether there is a difference between the financial statement periods of the group and the noncontrolled entity, and if so, whether such a difference has or could have a material effect on the group financial statements (for example, due to a change in the fiscal year-end lag period between the financial statement period-ends of the group and the noncontrolled entity, the prior period comparative statements are no longer consistent, or a significant transaction occurring during the time period between the financial statement period-ends of the group and the noncontrolled entity has a material effect on the group financial statements).

.A189 After obtaining and reading the audited financial statements of the noncontrolled entity, the group auditor may conclude that additional audit procedures (see paragraph .A190) are necessary to obtain sufficient appropriate audit evidence regarding the noncontrolled entity's financial results, for example, due to the significance of the investment to the group financial statements or when

- there are concerns about the professional competence or independence of the investee's auditor.
- there are significant differences in fiscal year-ends between the group financial statements and the noncontrolled entity financial statements (for example, there is

a fiscal year-end lag period, a change in the fiscal year-end lag period, or a significant transaction occurs during the time period between the financial statement period-ends of the group and the noncontrolled entity).

- there are significant differences in the auditor's report dates between the group auditor's report and the investee's auditor's report (for example, there are subsequent events between the investee's auditor's report date and the group auditor's report date).
- there are significant differences in accounting principles between the group financial statements and the noncontrolled entity financial statements.
- there are significant differences between the carrying amount of the noncontrolled entity on the group financial statements and the underlying equity in net assets of the noncontrolled entity on the noncontrolled entity financial statements.
- there are changes in ownership of the noncontrolled entity.
- there are changes in conditions affecting the use of the equity method.
- there are material transactions between the group and the noncontrolled entity.

.A190 To obtain sufficient appropriate audit evidence regarding the noncontrolled entity's financial results through using the audited financial statements, the group auditor may perform additional procedures such as the following:

- Evaluating information regarding the professional reputation and standing of the investee's auditor
- Interacting with the investee's auditor
- Discussing the audit procedures performed by the investee's auditor and the results thereof
- Reviewing the audit plan and audit documentation of the investee's auditor
- Reviewing information in group management's files that relates to the noncontrolled entity such as minutes, budgets, cash flow information, and information regarding the time period between the date of the noncontrolled entity financial statements and the date of the group financial statement, if different
- Making inquiries of group management about the noncontrolled entity's financial results
- Reading available interim financial statements of the noncontrolled entity and making inquiries of management of the noncontrolled entity regarding subsequent events or transactions of the noncontrolled entity
- Obtaining audit evidence regarding significant differences between the carrying amount of the noncontrolled entity on the group financial statements and the underlying equity in net assets of the noncontrolled entity on the noncontrolled entity financial statements, if applicable

.A191 If in applying the guidance in paragraphs .A188–.A190 the group auditor determines that the audited financial statements of the noncontrolled entity, including the accompanying audit report, are not satisfactory or do not provide sufficient appropriate audit evidence regarding the noncontrolled entity's financial results, the requirements in this section regarding obtaining sufficient appropriate audit evidence regarding the noncontrolled entity's (that is, a component's) financial results, without making reference to the audit of the noncontrolled entity's auditor in the auditor's report on the group financial statements, are applicable. Furthermore, if the group auditor involves the noncontrolled entity's auditor in the group audit (that is, in the capacity of a component auditor), the requirements related to being involved in the work of the noncontrolled entity's auditor are applicable. In this situation, the noncontrolled entity's auditor is considered a component auditor and is a part of the engagement team for a group audit.

Subsequent Events (Ref: par. .67–.68)

.A192 When component auditors are involved, the group auditor may

- request a component auditor to perform subsequent events procedures to assist the group auditor to identify events that occur between the dates of the financial information of the components and the date of the auditor's report on the group financial statements.
- perform procedures to cover the period between the date of communication of subsequent events by the component auditor and the date of the auditor's report on the group financial statements, if applicable.

.A193 When the group engagement partner determines to make reference to the audit of a referred-to auditor in the auditor's report on the group financial statements, procedures designed to identify subsequent events between the date of the referred-to auditor's report and the date of the auditor's report on the group financial statements may include the following:

- Obtaining an understanding of any procedures that group management has established to ensure that such subsequent events are identified
- Requesting the referred-to auditor to update subsequent events procedures to the date of the auditor's report on the group financial statements
- Requesting specific written representations from component management regarding subsequent events
- Reading available interim financial information of the component and making inquiries of group management
- Reading minutes of meetings of the governing board, or any other administrative board with management oversight, held since the financial statement date
- Reading the subsequent year's capital and operating budgets

- Inquiring of group management regarding currently known facts, decisions, or conditions that are expected to have a significant effect on financial position or results of operations for items that represent subsequent events

.A194 In applying section 330, if the group auditor is unable to obtain sufficient appropriate audit evidence, including with regard to subsequent events that require adjustment of, or disclosure in, the group financial statements, the auditor is required to express a qualified opinion or disclaim an opinion on the financial statements.[86]

Evaluating the Sufficiency and Appropriateness of Audit Evidence Obtained

Sufficiency and Appropriateness of Audit Evidence (Ref: par. .69)

.A195 The audit of group financial statements is a cumulative and iterative process. As the group auditor performs planned audit procedures, the audit evidence obtained may cause the group auditor to modify the nature, timing, or extent of other planned audit procedures because information may come to the group auditor's attention that differs significantly from the information on which the risk assessment was based, for example

- the misstatements identified at a component may need to be considered in relation to other components, or
- the group auditor may become aware of access restrictions to information or people at a component because of changes in the environment (for example, war, civil unrest, or outbreaks of disease).

In such circumstances, the group auditor may need to reevaluate the planned audit procedures, based on the revised consideration of assessed risks for all or some of the significant classes of transactions, account balances, or disclosures and related relevant assertions.

.A196 The evaluation required by paragraph .69 assists the group auditor in determining whether the overall group audit strategy and group audit plan developed to respond to the assessed risks of material misstatement of the group financial statements continues to be appropriate. The requirement in section 330[87] for the auditor, irrespective of the assessed risks of material misstatement, to design and perform substantive procedures for each relevant assertion of each significant class of transactions, account balance, and disclosure also may be helpful for purposes of this evaluation in the context of the group financial statements.

.A197 The group auditor may consider the engagement team's maintenance of professional skepticism when evaluating the sufficiency and appropriateness of audit evidence obtained. For example, the group auditor may consider whether matters such as those described in paragraph .A17 have inappropriately led the engagement team to

---

[86] Paragraphs .08–.10 of section 705, *Modifications to the Opinion in the Independent Auditor's Report*, address qualified, adverse, and disclaimer of opinions.

[87] Paragraph .18 of section 330.

- obtain audit evidence that is easier to access without giving appropriate consideration to its relevance and reliability,
- obtain less persuasive evidence than is necessary in the circumstances, or
- design and perform audit procedures in a manner that is biased towards obtaining evidence that is corroborative or excluding evidence that is contradictory.

.A198 Section 220[88]requires the engagement partner to determine, on or before the date of the auditor's report, through review of audit documentation and discussion with the engagement team, that sufficient appropriate audit evidence has been obtained to support the conclusions reached and for the auditor's report to be issued. Information that may be relevant to the group auditor's evaluation of the audit evidence obtained from the work performed by component auditors or through making reference to the audit of referred-to auditors in the auditor's report on the group financial statements depends on the facts and circumstances of the group audit and may include the following:

- Communications from the component auditors required by paragraph .47, including the overall findings or conclusions of the component auditors on the work performed for purposes of the group audit
- Other communications from the component auditors throughout the group audit, including those required by paragraph .34
- The group auditor's direction and supervision of the component auditors, and review of their work, including, as applicable, the group auditor's review of additional component auditor audit documentation in accordance with paragraph .49
- The referred-to auditor's report on the component's financial statements, including, as applicable, if the opinion of a referred-to auditor is modified or if that report includes an emphasis-of-matter paragraph, an other-matter paragraph, or a going concern section
- Communications from the referred-to auditors required by this section

.A199 In some circumstances, an overall summary memorandum describing the work performed and the results thereof may provide a basis on its own for the group auditor to conclude that the work performed and audit evidence obtained by the component auditor is sufficient for purposes of the group audit. This may be the case, for example, when the component auditor has been requested to perform specific further audit procedures as identified and communicated by the group auditor.

Evaluating the Effect on the Group Audit Opinion (Ref: par. .70)

.A200 The group engagement partner's evaluation may include a consideration of whether corrected and uncorrected misstatements communicated by component auditors indicate a systemic issue (for example, regarding transactions subject to common accounting policies or common controls) that may affect other components.

[88]Paragraph .32 of section 220.

Auditor's Report

Considerations When Component Auditors Are Involved (Ref: par. .71)

.A201 When component auditors are involved in the group audit, no reference is made to the component auditor in the auditor's report on the group financial statements because to do so may cause a reader to misinterpret the degree of responsibility of the group auditor.

.A202 When the group audit opinion is modified because the group auditor was unable to obtain sufficient appropriate audit evidence in relation to the financial information of one or more components, the "Basis for Qualified Opinion" or "Basis for Disclaimer of Opinion" section in the auditor's report on the group financial statements describes the reasons for that inability. In some circumstances, the group auditor may decide a reference to a component auditor or referred-to auditor is necessary to adequately describe the reasons for the modified opinion, for example, when the component auditor is unable to perform or complete the work requested on the component financial information due to circumstances beyond the control of component management.

Communication With Group Management and Those Charged With Governance of the Group

Communication With Group Management (Ref: par. .72–.74)

.A203 The group audit may be complex due to the number and nature of the entities and business units comprising the group. In addition, as explained in paragraph .A7, the group auditor may determine that certain entities or business units may be considered together as a component for purposes of planning and performing the group audit. Therefore, discussing with group management an overview of the planned scope and timing may help in coordinating the work performed at components, including when component auditors are involved or reference is made to the audit of referred-to auditors in the auditor's report on the group financial statements, and in identifying component management (see paragraph .A27).

.A204 Section 240[89]contains requirements and guidance on the communication of fraud to management and, when management may be involved in the fraud, to those charged with governance.

.A205 Group management may need to keep certain material sensitive information confidential. Examples of matters that may be significant to the financial statements of the component of which component management may be unaware include the following:

- Potential litigation
- Plans for abandonment of material operating assets
- Subsequent events

[89]Paragraphs .40–.42 of section 240.

- Significant legal agreements

.A206 Group management may inform the group auditor about noncompliance or suspected noncompliance with laws or regulations in entities or business units within the group. Paragraph .A97 provides guidance for the group engagement partner in these circumstances.

Communication With Those Charged With Governance of the Group (Ref: par. .75)

.A207 The matters the group auditor communicates to those charged with governance of the group may include those brought to the attention of the group auditor by component auditors or referred-to auditors that the group auditor judges to be significant to the responsibilities of those charged with governance of the group. Communication with those charged with governance of the group may take place at various times during the group audit. For example, the matter referred to in paragraph .75*a* may be communicated after the group auditor has determined the work to be performed on the financial information of the components. On the other hand, the matter referred to in paragraph .75*b* may be communicated at the end of the audit, and the matters referred to in paragraph .75*c–d* may be communicated when they occur.

.A208 Section 260[90]requires the auditor to communicate with those charged with governance an overview of the planned scope and timing of the audit. For a group audit, this communication helps those charged with governance understand the group auditor's determination of the components at which audit work will be performed, including whether certain of the group's entities or business units will be considered together as a component, the planned involvement of component auditors, and the basis for the decision to make reference to the audit of a referred-to auditor in the auditor's report on the group financial statements. This communication also helps to enable a mutual understanding of and discussion about the group and its environment (see paragraph .32) and areas, if any, in which those charged with governance may request the group auditor to undertake additional procedures.

Communication of Identified Deficiencies in Internal Control (Ref: par. .76)

.A209 The group auditor is responsible for determining, on the basis of the audit work performed, whether one or more identified deficiencies, individually or in combination, constitute significant deficiencies or material weaknesses.[91]The group auditor may request input from the component auditor about whether an identified deficiency or combination of deficiencies at the component is a significant deficiency or material weakness in internal control.

Documentation (Ref: par. .77)

.A210 Other AU-C sections contain specific documentation requirements that are intended to clarify the application of section 230 in the particular circumstances of those other

[90]Paragraph .11 of section 260.

[91]Paragraph .09 of section 265, *Communicating Internal Control Related Matters Identified in an Audit*.

AU-C sections. The exhibit to section 230 lists other AU-C sections that contain specific documentation requirements and guidance.

.A211 The audit documentation for the group audit supports the group auditor's evaluation in accordance with paragraph .69 about whether sufficient appropriate audit evidence has been obtained on which to base the group audit opinion. Also see paragraph .A198.

.A212 The final assembly and retention of the audit documentation for a group audit is subject to the policies or procedures of the group auditor's firm in accordance with QM section 10.[92]The group auditor may provide specific instructions to component auditors regarding the assembly and retention of the documentation of work performed by them for purposes of the group audit.

Basis for the Group Auditor's Determination of Components (Ref: par. .77b)

.A213 The basis for the group auditor's determination of components may be documented in various ways, including, for example, documentation related to the fulfillment of the requirements in paragraphs .24, .35, and .75*a* of this section.

Basis for the Group Auditor's Determination of the Competence and Capabilities of Component Auditors (Ref: par: .77d)

.A214 QM section 10[93]provides guidance on matters that the firm's policies or procedures may address regarding the competence and capabilities of the engagement team members. Such policies or procedures may describe or provide guidance about how to document the determination of the competence and capabilities of the engagement team, including component auditors. For example, the confirmation obtained from the component auditor in accordance with paragraph .26 may include information about the component auditor's relevant industry experience. The group auditor also may ask for confirmation that the component auditor has sufficient time to perform the assigned audit procedures.

Documentation of the Direction and Supervision of Component Auditors and the Review of Their Work (Ref: par. .77f)

.A215 As described in paragraph .A85, the approach to direction, supervision, and review in a group audit will be tailored by the group auditor based on the facts and circumstances of the engagement and will generally include a combination of addressing the group auditor's firm policies or procedures and responses specific to the group audit. Such policies or procedures may also describe or provide guidance about the documentation of the group auditor's direction and supervision of the engagement team and the review of their work.

.A216 Section 300[94]requires the auditor to develop an audit plan that includes a description of the nature, timing, and extent of the planned direction and supervision of engagement team members and the review of their work. When component auditors are involved, the

---

[92]Paragraphs .32*f* and .A87–.A89 of QM section 10.

[93]Paragraph .A100 of QM section 10.

[94]Paragraph .09 of section 300.

extent of such descriptions will often vary by component, recognizing that the planned nature, timing, and extent of direction and supervision of component auditors, and review of their work, may be influenced by the matters described in paragraph .A59.

.A217 The group auditor's documentation of the direction and supervision of component auditors and the review of their work may include, for example, the following:

- Required communications with component auditors, including any instructions issued and other confirmations required by this section.
- The rationale for the selection of visits to component auditor sites, attendees at meetings, and the nature of the matters discussed.
- Matters discussed in meetings with component auditors or component management.
- The rationale for the group auditor's determination of component auditor audit documentation selected for review.
- Changes in the planned nature and extent of involvement with component auditors and the reasons why. This may include circumstances in which the group auditor modified the nature, timing, or extent of the direction and supervision of the component auditors, and the review of their work, in areas of the audit that are more complex or subjective than initially anticipated.

.A218 Paragraph .49 requires the group auditor to determine whether, and the extent to which it is necessary, to review additional component auditor audit documentation. Paragraphs .A163–.A164 provide guidance for the group auditor in making this determination.

.A219 Component auditor audit documentation ordinarily need not be replicated in the group auditor's audit file. However, the group auditor may decide to summarize, replicate, or retain copies of certain component auditor documentation in the group auditor's audit file to supplement the description of a particular matter in communications from the component auditor, including the matters required to be communicated by this section. Examples of such component auditor documentation may include

- summary of the significant judgments made by the component auditor, and the conclusions reached thereon, that are relevant to the group audit,
- matters that may need to be communicated to those charged with governance of the group, or
- matters that may be determined to be key audit matters to be communicated in the auditor's report on the group financial statements, when engaged to do so.

.A220 When required by law or regulation, certain component auditor documentation may need to be included in the group auditor's audit file, for example, to respond to the request of a regulatory authority to review documentation related to work performed by a component auditor.

.A221 Policies or procedures established by the firm in accordance with the firm's system of quality management, or resources provided by the firm or a network, may assist the group auditor in documenting the direction and supervision of component auditors and the review of their work. For example, an electronic audit tool may be used to facilitate communications between the group auditor and component auditors. The electronic audit tool also may be used for audit documentation, including providing information about the reviewers and the dates and extent of their review.

Additional Considerations When Access to Component Auditor Audit Documentation Is Restricted (Ref: par. .77)

.A222 Audit documentation for a group audit may present some additional complexities or challenges in certain circumstances. This may be the case, for example, when law or regulation restrict the component auditor from providing documentation outside of its jurisdiction, or when war, civil unrest, or outbreaks of disease restrict access to relevant component auditor audit documentation.

.A223 The group auditor may be able to overcome such restrictions by, for example

- visiting the location of the component auditor, or meeting with the component auditor in a location different from where the component auditor is located, to review the component auditor's audit documentation;
- reviewing the relevant audit documentation remotely through the use of technology, when not prohibited by law or regulation;
- requesting the component auditor to prepare and provide a memorandum that addresses the relevant information and holding discussions with the component auditor, if necessary, to discuss the contents of the memorandum; or
- discussing with the component auditor the procedures performed, the evidence obtained, and the conclusions reached by the component auditor

It is a matter of professional judgment whether one or more of the preceding actions may be sufficient to overcome the restrictions, depending on the facts and circumstances of the group audit.

.A224 When access to component auditor audit documentation is restricted, the group auditor's documentation nonetheless needs to comply with the requirements of GAAS, including those relating to the documentation of the nature, timing, and extent of the group auditor's direction and supervision of component auditors and the review of their work. The guidance in paragraphs .A163–.A164 may be helpful in determining the extent of the group auditor's review of the component auditor audit documentation in these circumstances. Paragraphs .A219–.A220 provide examples of circumstances in which certain component auditor audit documentation may be included in the group auditor's audit file.

.A225 If the group auditor is unable to overcome restrictions on access to the component auditor audit documentation, the group auditor may need to consider whether a scope limitation exists that may require a modification to the opinion on the group financial statements. See paragraph .A52.

Exhibit A — Relevancy of Requirements in Various Group Audit Scenarios (Ref: par. .10, .12, .58*a*, .A7, and .A165)

.A226 The requirements of this section are intended to be applied in the context of the nature and circumstances of each group audit. The following are various scenarios related to how a group audit may be carried out. Depending on the involvement of component auditors or whether reference is made to the audit of a referred-to auditor in the auditor's report on the group financial statements, certain requirements in this section may not be relevant due to their conditionality. The following table provides examples of the requirements in this section that are relevant for various group audit scenarios.

Regardless of the scenario, as required by paragraph .21 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*, the group auditor is required to have an understanding of the entire text of this section, including its application and other explanatory material, to understand its objectives and apply its requirements properly. Paragraphs .01–.17 of this section, which include the introduction, objectives, and definitions, are applicable for all the following scenarios.

Group Audit Scenario	Relevant Requirements
Scenario 1 – Group Auditor *The group audit is carried out entirely by the group auditor, including when only one component has been identified.*	• Paragraphs .18–.24 • Paragraph .32 • Paragraph .35 • Paragraph .37 • Paragraphs .39–.42 • Paragraphs .66–.67 • Paragraphs .69–.70 • Paragraphs .72–.73 • Paragraphs .75–.77
Scenario 2 – Group Auditor and Component Auditors *Component auditors are involved in the group audit.*	• Paragraphs .18–.50 • Paragraphs .66–.77
Scenario 3 – Group Auditor and Referred-to Auditors *The group auditor makes reference to the audit of a referred-to auditor in the auditor's report on the group financial statements (component auditors are not involved).*	• Paragraphs .18–.24 • Paragraph .32 • Paragraph .35 • Paragraph. 37 • Paragraphs .39–.42 • Paragraphs .51–.67 • Paragraphs .69–.70 • Paragraphs .72–.77
Scenario 4 – Group Auditor, Component Auditors, and Referred-to Auditor *Component auditors are involved in the group audit, and the group auditor makes reference to the audit of a referred-to auditor in the auditor's report on the group financial statements.*	• Paragraphs .18–.77

Exhibit B — Illustrative Auditor's Reports on Group Financial Statements (Ref: par. .A52)

.A227

Illustration 1: Independent Auditor's Report With a Qualified Opinion When the Group Auditor Is Not Able to Obtain Sufficient Appropriate Audit Evidence on Which to Base the Group Auditor's Opinion

Circumstances include the following:

- Audit of a complete set of consolidated general purpose financial statements.
- Management is responsible for the preparation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America as promulgated by FASB.
- The terms of the audit engagement reflect the description of management's responsibility for the consolidated financial statements in section 210, *Terms of Engagement*.
- The group auditor is unable to obtain sufficient appropriate audit evidence relating to a component accounted for by the equity method because the group auditor was unable to obtain the audited financial statements of the component as of December 31, 20X1 and 20X0, including the auditor's report thereon. In this example, the auditor of the group financial statements is not making reference to the report of a referred-to auditor. In the auditor's professional judgment, the effect on the group financial statements of this inability to obtain sufficient appropriate audit evidence is material but not pervasive. Accordingly, the auditor's report contains a qualified opinion.
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events considered in the aggregate that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- The auditor has not been engaged to communicate key audit matters in accordance with section 701, *Communicating Key Audit Matters in the Independent Auditor's Report*.
- The auditor has obtained all the other information prior to the date of the auditor's report, and the qualified opinion on the consolidated financial statements also affects the other information included in the annual report.

<u>Independent Auditor's Report</u>

[*Appropriate Addressee*]

Report on the Audit of the Consolidated Financial Statements[1]

Qualified Opinion

We have audited the consolidated financial statements of ABC Company and its subsidiaries (the Company or ABC Company), which comprise the consolidated balance sheets as of December 31, 20X1 and 20X0, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for the years then ended, and the related notes to the consolidated financial statements.

In our opinion, except for the possible effects of the matter described in the Basis for Qualified Opinion section of our report, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 20X1 and 20X0, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Qualified Opinion

We were unable to obtain audited financial statements supporting the Company's investment in a foreign affiliate stated at $__ and $__ at December 31, 20X1 and 20X0, respectively, or its equity in earnings of that affiliate of $__ and $__, which is included in net income for the years then ended as described in Note X to the consolidated financial statements; nor were we able to satisfy ourselves as to the carrying value of the investment in the foreign affiliate or the equity in its earnings by other auditing procedures.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are required to be independent of ABC Company and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

[1]The subtitle, "Report on the Audit of the Consolidated Financial Statements," is unnecessary in circumstances when the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the consolidated financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.[2]
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the consolidated financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

***Other Information* [*or another title, if appropriate, such as* "Information Other Than the Financial Statements and Auditor's Report Thereon"]**

[2]In circumstances in which the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the consolidated financial statements, omit the following: "but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed."

[*Reporting in accordance with the reporting requirements in section 720,* The Auditor's Responsibilities Relating to Other Information Included in Annual Reports, *for when there is a qualified opinion due to limitation of scope*.]

Report on Other Legal and Regulatory Requirements

[*The form and content of this section of the auditor's report would vary depending on the nature of the auditor's other reporting responsibilities.*]

[*Signature of auditor's firm]*

[*City and state where the auditor's report is issued*]

[*Date of the auditor's report*]

Illustration 2: A Report in Which the Auditor of the Group Financial Statements Is Making Reference to the Audit of the Financial Statements of a Component Prepared Using the Same Financial Reporting Framework as That Used for the Group Financial Statements and Performed by a Referred-to Auditor in Accordance With Generally Accepted Auditing Standards

Circumstances include the following:

- Audit of a complete set of consolidated general purpose financial statements (comparative).
- Management is responsible for the preparation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America as promulgated by FASB.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210, *Terms of Engagement*.
- The auditor of the group financial statements is making reference to the audit of the financial statements of a component prepared using the same financial reporting framework as that used for the group financial statements and performed by a referred-to auditor in accordance with generally accepted auditing standards (GAAS).
- The auditor has concluded that an unmodified (that is, "clean") opinion is appropriate based on the audit evidence obtained.
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- The auditor has obtained all the other information prior to the date of the auditor's report and has not identified an uncorrected material misstatement of the other information included in the annual report.
- The auditor has not been engaged to communicate key audit matters.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Consolidated Financial Statements[1]

Opinion

[1]The subtitle, "Report on the Consolidated Financial Statements," is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

We have audited the consolidated financial statements of ABC Company and its subsidiaries (the Company or ABC Company), which comprise the consolidated balance sheets as of December 31, 20X1 and 20X0, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for the years then ended, and the related notes to the consolidated financial statements.

In our opinion, based on our audits and the report of the other auditors, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 20X1 and 20X0, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

We did not audit the financial statements of B Company, a wholly owned subsidiary, whose statements reflect total assets constituting 20 percent and 22 percent, respectively, of consolidated total assets at December 31, 20X1 and 20X0, and total revenues constituting 18 percent and 20 percent, respectively, of consolidated total revenues for the years then ended. Those statements were audited by other auditors, whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for B Company, is based solely on the report of the other auditors.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the consolidated financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.[2]
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the consolidated financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Illustration 3: A Report in Which the Auditor of the Group Financial Statements Is Making Reference to the Audit of the Financial Statements of a Component Prepared Using a Different Financial Reporting Framework From That Used for the Group Financial Statements and Performed by a Referred-to Auditor in Accordance With GAAS

Circumstances are the same as in illustration 2, except in this example, the auditor of the group financial statements is making reference to the audit of the financial statements of a component prepared using a different financial reporting framework than that used for the group financial statements and performed by a referred-to auditor in accordance with GAAS.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Consolidated Financial Statements[1]

Opinion

We have audited the consolidated financial statements of ABC Company and its subsidiaries (the Company or ABC Company), which comprise the consolidated balance sheets as of December 31, 20X1 and 20X0, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for the years then ended, and the related notes to the consolidated financial statements.

In our opinion, based on our audits and the report of the other auditors, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 20X1 and 20X0, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

We did not audit the financial statements of B Company, a wholly owned subsidiary, whose statements reflect total assets constituting 20 percent and 22 percent, respectively, of consolidated total assets at December 31, 20X1 and 20X0, and total revenues constituting 18 percent and 20 percent, respectively, of consolidated total revenues for the years then ended. Those statements, which were prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board, were audited by other auditors, whose report has been furnished to us. We have applied audit procedures on the conversion adjustments to the financial statements of B Company, which conform those financial statements to accounting principles generally accepted in the United States of America. Our opinion, insofar as it relates to the amounts included for B Company, prior to these conversion adjustments, is based solely on the report of the other auditors.

[1] The subtitle, "Report on the Consolidated Financial Statements," is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for Audit of the Financial Statements section of our report. We are required to be independent of ABC Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the consolidated financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose

of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.[2]

- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the consolidated financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Illustration 4: A Report in Which the Auditor of the Group Financial Statements Is Making Reference to the Audit of the Financial Statements of a Component Prepared Using the Same Financial Reporting Framework as That Used for the Group Financial Statements and Performed by a Referred-to Auditor in Accordance With Auditing Standards Other Than GAAS

Circumstances are the same as in illustration 2, except in this example, the auditor of the group financial statements is making reference to the audit of the financial statements of a component prepared using the same financial reporting framework as that used for the group financial statements and performed by a referred-to auditor in accordance with auditing standards other than GAAS or standards promulgated by the PCAOB. The group engagement partner has determined that the referred-to auditor performed additional audit procedures to meet the relevant requirements of GAAS. If additional procedures were not necessary for the audit of the referred-to auditor to meet the relevant requirements of GAAS, illustration 2 is applicable.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Consolidated Financial Statements[1]

Opinion

We have audited the consolidated financial statements of ABC Company and its subsidiaries (the Company or ABC Company), which comprise the consolidated balance sheets as of December 31, 20X1 and 20X0, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for the years then ended, and the related notes to the consolidated financial statements.

In our opinion, based on our audits and the report of and additional audit procedures performed by the other auditors, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 20X1 and 20X0, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

We did not audit the financial statements of B Company, a wholly owned subsidiary, whose statements reflect total assets constituting 20 percent and 22 percent, respectively, of consolidated total assets at December 31, 20X1 and 20X0, and total revenues constituting 18 percent and 20 percent, respectively, of consolidated total revenues for the years then ended. Those statements were audited by other auditors in accordance with [*describe the set of auditing standards*], whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for B Company, is based solely on the report of

[1]The subtitle, "Report on the Consolidated Financial Statements," is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

and additional audit procedures to meet the relevant requirements of auditing standards generally accepted in the United States of America performed by the other auditors.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.
In preparing the consolidated financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the consolidated financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.[2]
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the consolidated financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

***Other Information* [*or another title, if appropriate, such as* "Information Other Than the Financial Statements and Auditor's Report Thereon"]**

[*Reporting in accordance with the reporting requirements in section 720,* The Auditor's Responsibilities Relating to Other Information Included in Annual Reports]

Report on Other Legal and Regulatory Requirements

[*The form and content of this section of the auditor's report would vary depending on the nature of the auditor's other reporting responsibilities.*]

[*Signature of auditor's firm*]

[*City and state where the auditor's report is issued*]

[*Date of the auditor's report*]

[2] In circumstances in which the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the consolidated financial statements, omit the following: "but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed."

Appendix A — Understanding the Group's System of Internal Control (Ref: par. .A98)

.A228

1. This appendix provides examples of matters related to internal control that may be helpful in obtaining an understanding of the system of internal control in the context of a group environment and expands on how section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*,[1] is to be applied in relation to an audit of group financial statements. The examples may not be relevant to every group audit engagement, and the list of examples is not necessarily complete.

Control Environment

2. The group auditor's understanding of the control environment may include matters such as the following:

- The structure of the governance and management functions across the group, and group management's oversight responsibilities, including arrangements for assigning authority and responsibility to management of entities or business units in the group
- How oversight over the group's system of internal control by those charged with governance is structured and organized
- How ethical and behavioral standards are communicated and reinforced in practice across the group (for example, group-wide programs, such as codes of conduct and fraud prevention programs)
- The consistency of policies and procedures across the group, including a group financial reporting procedures manual

The Group's Risk Assessment Process

3. The group auditor's understanding of the group's risk assessment process may include matters such as group management's risk assessment process, that is, the process for identifying, analyzing, and managing business risks, including the risk of fraud, that may result in material misstatement of the group financial statements. It may also include an understanding of how sophisticated the group's risk assessment process is and the involvement of entities and business units in this process.

The Group's Process to Monitor the System of Internal Control

4. The group auditor's understanding of the group's process to monitor the system of internal control may include matters such as monitoring of controls, including how the controls are monitored across the group and, when relevant, activities of the internal audit function across the group, including its nature, responsibilities, and activities in respect of

[1] Appendix C of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

monitoring of controls at entities or business units in the group. section 610, *Using the Work of Internal Auditors*,[2]requires the auditor to evaluate the extent to which the internal audit function's organizational status and relevant policies and procedures support the objectivity of internal auditors, the level of competence of the internal audit function, and whether the internal audit function applies a systematic and disciplined approach, including quality control.

The Information System and Communication

5. The group auditor's understanding of the group's information system and communication may include matters such as the following:

- The extent of centralization in the group's IT environment and the commonality of IT applications, IT processes, and IT infrastructure
- Group management's monitoring of operations and the financial results of entities or business units in the group, including regular reporting routines, which enables group management to monitor performance against budgets and to take appropriate action
- Monitoring, controlling, reconciling, and eliminating intra-group transactions and unrealized profits, and intra-group account balances at the group level
- A process for monitoring the timeliness and evaluating the accuracy and completeness of financial information received from entities or business units in the group

Consolidation Process

6. The group auditor's understanding of the consolidation process may include matters such as the following:

Matters Relating to the Applicable Financial Reporting Framework:

- The extent to which management of entities or business units in the group have an understanding of the applicable financial reporting framework
- The process for identifying and accounting for entities or business units in the group in accordance with the applicable financial reporting framework
- The process for identifying reportable segments for segment reporting in accordance with the applicable financial reporting framework
- The process for identifying related party relationships and related party transactions for reporting in accordance with the applicable financial reporting framework

  The accounting policies applied to the group financial statements, changes from those of the previous financial year, and changes resulting from new or revised standards under the applicable financial reporting framework

[2]Paragraph .13 of section 610, *Using the Work of Internal Auditors.*

- The procedures for dealing with entities or business units in the group with financial year-ends different from the group's year-end

Matters Relating to the Consolidation Process:

- Group management's process for obtaining an understanding of the accounting policies used by entities or business units in the group, and, when applicable, ensuring that uniform accounting policies are used to prepare the financial information of the entities or business units in the group for the group financial statements, and that differences in accounting policies are identified and adjusted when required in terms of the applicable financial reporting framework. *Uniform accounting policies* are the specific principles, bases, conventions, rules, and practices adopted by the group, based on the applicable financial reporting framework, that the entities or business units in the group use to report similar transactions consistently. These policies are ordinarily described in the financial reporting procedures manual and reporting package issued by group management.
- Group management's process for ensuring complete, accurate, and timely financial reporting by the entities or business units in the group for the consolidation.
- The process for translating the financial information of foreign entities or business units in the group into the currency of the group financial statements.
- How the group's IT environment is organized for the consolidation and the policies that define the flows of information in the consolidation process, including the IT applications involved.
- Group management's process for obtaining information on subsequent events.

Matters Relating to Consolidation Adjustments and Reclassifications:

- The process for recording consolidation adjustments, including the preparation, authorization, and processing of related journal entries, and the experience of personnel responsible for the consolidation
- The consolidation adjustments required by the applicable financial reporting framework
- The business rationale for the events and transactions that gave rise to the consolidation adjustments
- Frequency, nature, and size of transactions between entities or business units in the group
- The procedures for monitoring, controlling, reconciling, and eliminating intra-group transactions and unrealized profits, and intra-group account balances
- Steps taken to arrive at the fair value of acquired assets and liabilities, procedures for amortizing goodwill (when applicable), and impairment testing of goodwill, in accordance with the applicable financial reporting framework

- Arrangements with a majority owner or minority interests regarding losses incurred by an entity or business unit in the group (for example, an obligation of the minority interest to make good such losses)

Control Activities

7. The group auditor's understanding of the control activities component may include matters such as the following:

- The commonality of information-processing controls and general IT controls for all or part of the group
- The extent of the commonality of the design of controls for all or part of the group that address risks of material misstatement of the group financial statements at the assertion level
- The extent to which commonly designed controls have been implemented consistently for all or part of the group

Appendix B — Examples of Events or Conditions That May Give Rise to Risks of Material Misstatement of the Group Financial Statements (Ref: par. .A124)

.A229 The following are examples of events (including transactions) and conditions that may indicate the existence of risks of material misstatement of the group financial statements, whether due to fraud or error, including with respect to the consolidation process. The examples provided by inherent risk factor cover a broad range of events and conditions; however, not all events and conditions are relevant to every group audit engagement and the list of examples is not exhaustive. The events and conditions have been categorized by the inherent risk factor that may have the greatest effect in the circumstances. Importantly, due to the interrelationships among inherent risk factors, the example events and conditions also are likely to be subject to or affected by other inherent risk factors to varying degrees. Also see appendix B, "Understanding Inherent Risk Factors," of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

Inherent Risk Factor	Examples of Events or Conditions That May Give Rise to the Existence of Risks of Material Misstatement of the Group Financial Statements at the Assertion Level:
Complexity	• The existence of complex transactions that are accounted for in more than one entity or business unit in the group • The application of accounting policies by entities or business units in the group that differ from those applied to the group financial statements • Accounting measurements or disclosures that involve complex processes used by entities or business units in the group, such as accounting for complex financial instruments • Operations that are subject to a high degree of complex regulation in multiple jurisdictions, or entities or business units in the group that operate in multiple industries that are subject to different types of regulation
Subjectivity	• Judgments regarding which entities or business units in the group require incorporation of their financial information in the group financial statements in accordance with the applicable financial reporting framework, for example, whether any variable interest entities or non-trading entities exist and require incorporation • Judgments regarding the correct application of the requirements of the applicable financial reporting framework by entities or business units in the group
Change	• Frequent acquisitions, disposals, or reorganizations
Uncertainty	• Entities or business units in the group operating in foreign jurisdictions that may be exposed to factors such as unexpected government intervention in areas such as trade and fiscal policy, restrictions on currency and dividend movements, and fluctuations in exchange rates
Susceptibility to Misstatement Due to Management Bias or Other Fraud Risk Factors Insofar as They Affect Inherent Risk	• Unusual related party relationships and transactions • Entities or business units in the group with different financial year-ends, which may be used to manipulate the timing of transactions • Prior occurrences of unauthorized or incomplete consolidation adjustments • Aggressive tax planning within the group or large cash transactions with entities in tax havens • Prior occurrences of intra-group account balances that did not balance or reconcile on consolidation • Large or unusual cash transfers within the group, particularly to newly incorporated entities or business units operating in locations with a significant or heightened fraud risk

Indicators that the control environment, the group's risk assessment process, or the group's process to monitor the group's system of internal control are not appropriate to the group's circumstances, considering the nature and complexity of the group, and do not provide an appropriate foundation for the other components of the group's system of internal control, include the following:

- Poor corporate governance structures, including decision-making processes that are not transparent
- Nonexistent or ineffective controls over the group's financial reporting process, including inadequate group management information on monitoring of operations and financial results of entities or business units in the group

Appendix C — Amendments to Various Statements on Auditing Standards (SASs), as Amended, and to Various Sections in SAS No. 122, Statements on Auditing Standards: Clarification and Recodification, as Amended

.A230

(***Boldface italics*** denotes new language. Deleted text is shown in ~~strikethrough~~.)

Amendment to SAS No. 117, *Compliance Audits*, as Amended (AU-C sec. 935)

1. The amendment to AU-C section 935 is effective for compliance audits for fiscal periods ending on or after December 15, 2026.

AU-C Section 935, *Compliance Audits*

[No amendment to paragraphs .01–.14.]

Using the Work of Another Auditor

.15 When the auditor expects to use the work of another auditor, the auditor should (Ref: par. .A12–.A13)

a. ***confirm whether the other auditor understands and will comply with the relevant ethical requirements, including those related to independence, that apply to the engagement.***

b. ***determine that the other auditor has appropriate professional competence and capabilities.***

c. ***determine whether to make reference to the compliance audit of the other auditor in the auditor's report.***

d. ***when the auditor involves another auditor to perform audit work to fulfill the requirements of this section***

i. communicate clearly with the other auditor about the other auditor's respective responsibilities and the auditor's expectations, including the scope and timing of the other auditor's work and the matters expected to be communicated by the other auditor that are relevant to the auditor's conclusions with regard to the compliance audit;

ii. determine that the other auditor has sufficient time to perform assigned audit procedures; and

iii. be sufficiently and appropriately involved in the work of the other auditor.

e. ***evaluate whether the other auditor's work is adequate for the auditor's purposes.***

[Subsequent paragraphs renumbered. No amendment to renumbered paragraphs .16–.49. No amendment to paragraphs .A1–.A11.]

Using the Work of Another Auditor (Ref: par. .15)

.A12 Section 220,* Quality Management in an Engagement Conducted in Accordance With Generally Accepted Auditing Standards, fn 15 *requires the engagement partner to determine that sufficient and appropriate resources to perform the engagement are assigned or made available to the engagement team in a timely manner. Accordingly, the auditor may involve another auditor to perform audit work to fulfill the requirements of this section. The engagement partner may also determine to use work completed by another auditor or to make reference to the compliance audit of another auditor in the auditor's report.

fn 15 Paragraph .25 of section 220, *Quality Management in an Engagement Conducted in Accordance With Generally Accepted Auditing Standards.*

.A13 Regardless of whether the auditor uses the work of another auditor (including making reference to the compliance audit of another auditor in the auditor's report) as a basis for forming an opinion at the level specified by the governmental audit requirement, the engagement partner remains ultimately responsible and therefore accountable for compliance with the requirements of this section. SAS No. 149,* Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors and Audits of Referred-to Auditors)*, adapted as necessary in the circumstances, may be useful in fulfilling the requirements in paragraph .15 of this section when using the work of another auditor.

[Subsequent paragraphs and footnotes renumbered. No amendment to renumbered paragraphs .A14–.A46.]

Appendix — AU-C Sections That Are Not Applicable to Compliance Audits*[fn 1]*

.A~~45~~*47* The following AU-C sections and individually enumerated requirement paragraphs of specific AU-C sections are not applicable to a compliance audit performed under this section either because (*a*) they are not relevant to a compliance audit environment, (*b*) the procedures and guidance would not contribute to meeting the objectives of a compliance audit, or (*c*) the subject matter is specifically covered in this section. Where the table in this appendix specifies individual requirement paragraphs rather than an entire AU-C section, the application and other explanatory material paragraphs related to such requirement paragraphs also do not apply. However, an auditor may apply these AU-C sections and paragraphs if the auditor believes doing so will provide appropriate audit evidence in the specific circumstances to support the auditor's opinion on compliance.

[fn 1] [Footnote omitted for purposes of this SAS.]

AU-C Section	Paragraphs Not Applicable to Compliance Audits
...	
600, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors* **and Audits of Referred-to Auditors***)*	~~Paragraphs .26, .39, .41c, .41d, .55, and .56c~~ ***All***
...	

[No further amendment to AU-C section 935.]

Amendments to Various Sections in SAS No. 122, as Amended (AU-C secs. 230, 260, 300, 320, 402, 450, 501, 510, 550, 805, 920, and 930)

AU-C Section 230, Audit Documentation

2. The amendment to AU-C section 230 is effective for audits of financial statements for periods ending on or after December 15, 2026.

[No amendment to paragraphs .01–.A29.]

Exhibit — Audit Documentation Requirements in Other AU-C Sections

.A30 The following lists the main paragraphs in other AU-C sections that contain specific documentation requirements. This list is not a substitute for knowledge of the AU-C sections:

...

q. Paragraphs **77**~~.49 and .64~~ of ~~section 600,~~ ***SAS No. 149,*** *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors* **and Audits of Referred-to Auditors***)*

...

[No further amendment to AU-C section 230.]

AU-C Section 260, The Auditor's Communication With Those Charged With Governance

3. The amendment to AU-C section 260 is effective for audits of financial statements for periods ending on or after December 15, 2026.

[No amendment to paragraphs .01–.A8.]

Those Charged With Governance

...

.A9 ~~Section 600,~~ ***SAS No. 149,*** *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors* **and Audits of Referred-to Auditors***)*, includes specific matters to be communicated by ***the*** group auditors with those charged with governance ***of the group***. *fn 3* ***The matters communicated may include***

those brought to the attention of the group auditor by component auditors that the group auditor judges to be significant to the responsibilities of those charged with governance of the group. Component auditors also may communicate matters to those charged with governance of the component. **fn 4** When the entity being audited is a component of a group, the appropriate person(s) with whom to communicate is dependent on the nature of the matter to be communicated and the terms of the engagement.

fn 3 Paragraphs **75** *~~.46–.49~~ of ~~section 600~~* **SAS No. 149,** Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors ***and Audits of Referred-to Auditors****).*

fn 4 Paragraph 47 *i* of SAS No. 149.

[Subsequent footnotes renumbered. No amendment to paragraphs .A10–.A57.]

Exhibit — Requirements to Communicate With Those Charged With Governance in Other AU-C Sections

.A58 Requirements for the auditor to communicate with those charged with governance are included in other AU-C sections. This section does not change the requirements in

…

i. paragraphs ~~.46–.49~~ ***75*** of ~~section 600,~~ ***SAS No. 149,*** *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors* **and Audits of Referred-to Auditors***)*

…

[No further amendment to AU-C section 260.]

AU-C Section 300, Planning an Audit

4. The amendment to AU-C section 300 is effective for audits of financial statements for periods ending on or after December 15, 2026.

Scope of This Section

.01 This section addresses the auditor's responsibility to plan an audit of financial statements. This section is written in the context of recurring audits. Additional considerations in an initial audit engagement are separately identified in this section. Matters related to planning audits of group financial statements are addressed in ~~section 600,~~ ***SAS No. 149,*** *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors* **and Audits of Referred-to Auditors***)*. (Ref: par. .A1–.A4)

[No amendment to paragraphs .02–.A9.]

Planning Activities

The Overall Audit Strategy (Ref: par. .07–.08)

.A10 The process of establishing the overall audit strategy, subject to the completion of the auditor's risk assessment procedures, may include such matters as the following:

- The nature of resources (human, technological, or intellectual) to be deployed for specific audit areas, for example, the deployment of experienced team members for high risk areas or the assignment of specialists to address complex matters
- The amount of resources to be allocated to specific audit areas, for example, the number of team members assigned to attend the physical inventory count at multiple locations, the ***nature and*** extent of ***direction and supervision of component auditors and the*** review of ***their*** ~~component auditors'~~ work in the case of group audits, or the audit budget (in hours) to allocate to high risk areas
- When these resources are to be deployed, such as whether at an interim audit stage or at key cut-off dates
- How such resources are directed, supervised, or used, for example, when team briefing and debriefing meetings are expected to be held, how the engagement partner and manager reviews are expected to take place (for example, on-site or off-site)
- ***The components for which, if any, the auditor's report on the group financial statements will make reference to the audit of a referred-to auditor***

[No amendment to paragraphs .A11–.A29.]

Appendix — Considerations in *Managing Quality at the Engagement Level* (Ref: par. .07–.08, .A9–.A12)

.A30 This appendix provides examples of matters the auditor may consider in managing quality at the engagement level. Many of these matters will influence the auditor's overall audit strategy and detailed audit plan. The examples provided cover a broad range of matters applicable to many engagements. Although some of the following matters may be required by other AU-C sections, not all matters are relevant to every audit engagement, and the list is not necessarily complete.

Characteristics of the Engagement

…

- The expected audit ~~coverage~~ ***scope***, including the ~~number and locations of~~ components ***at which audit work is expected to be performed for purposes of a group audit, the extent to which component auditors will be involved, and the components that are audited by referred-to auditors for which the group auditor plans to make reference to the audit of the referred-to auditor in the auditor's report on the group financial statements*** ~~to be included~~
- The nature of the control relationships between a parent and its ***entities or business units*** ~~components~~ that determine how the group is to be consolidated

- ~~The extent to which components are audited by other auditors~~
- The nature of the ***entities or*** business ***units*** ~~divisions~~ to be audited, including the need for specialized ***skills or*** knowledge
- The reporting currency to be used, including any need for currency translation for the audited financial information
- The ***requirement*** ~~need~~ for ***an audit of financial statements for legal,*** ~~statutory or~~ regulatory***, or other reasons*** ~~audit requirements~~ (for example, ***Title 2 U.S.* Code of Federal Regulations *[CFR] Part 200,* Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards *[Uniform Guidance]***~~the Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*~~)

…

Reporting Objectives, Timing of the Audit, and Nature of Communications

…

- Communication with ***component*** auditors ~~of components~~ regarding the expected types and timing of ~~reports to be issued and other~~ communications in connection with the audit ***work performed for purposes of the group audit*** ~~of components~~
- ***Communication with referred-to auditors regarding the expected types and timing of communications in connection with making reference to the audit of a referred-to auditor in the auditor's report on the group financial statements***
- The expected nature and timing of communications among engagement team members, including the nature and timing of team meetings and timing of the review of ***audit*** work performed

…

Significant Factors, Preliminary Engagement Activities, and Knowledge Gained on Other Engagements

The following examples illustrate significant factors, preliminary engagement activities, and knowledge gained on other engagements:

- The determination of materiality, in accordance with section 320, *Materiality in Planning and Performing an Audit*, and, when applicable, the following:
  - The determination of ***component performance*** materiality ~~for components~~ and ***the threshold above which misstatements identified in the component financial information are to be communicated to the group auditor and*** communication thereof to component auditors in accordance with ~~section 600,~~ ***SAS No. 149,*** *Special Considerations — Audits of Group Financial*

Statements (Including the Work of Component Auditors ***and Audits of Referred-to Auditors****)*

— The ***initial expectations about the*** ~~preliminary identification of significant components and material~~ classes of transactions, account balances, and disclosures ***that may be significant***

...

[No further amendment to AU-C section 300.]

AU-C Section 320, Materiality in Planning and Performing an Audit

5. The amendment to AU-C section 320 is effective for audits of financial statements for periods ending on or after December 15, 2026.

[No amendment to paragraphs .01–.08.]

Definitions

.09 For purposes of generally accepted auditing standards (GAAS), the following ~~term has~~ ***terms have*** the ~~meaning~~ ***meanings*** attributed as follows:

*Aggregation risk****. The probability that the aggregate of uncorrected and undetected misstatements exceeds materiality for the financial statements as a whole.***

Performance materiality. The amount or amounts set by the auditor at less than materiality for the financial statements as a whole to reduce ***aggregation risk*** to an appropriately low level ~~the probability that the aggregate of uncorrected and undetected misstatements exceeds materiality for the financial statements as a whole~~. If applicable, *performance materiality* also refers to the amount or amounts set by the auditor at less than the materiality level or levels for particular classes of transactions, account balances, or disclosures. Performance materiality is to be distinguished from tolerable misstatement. (Ref: par. .A3)

[No amendment to paragraphs .10–.A14.]

Determining Materiality and Performance Materiality When Planning the Audit

...

Performance Materiality (Ref: par. .11)

.A15 Planning the audit solely to detect individual material misstatements overlooks the fact that the aggregate of individually immaterial misstatements may cause the financial statements to be materially misstated and leaves no margin for possible undetected misstatements. *Performance materiality* (which, as defined, is one or more amounts) is set ***at less than materiality for the financial statements as a whole*** to reduce ***aggregation risk*** to an appropriately low level ~~the probability that the aggregate of~~

~~uncorrected and undetected misstatements in the financial statements exceeds materiality for the financial statements as a whole~~. Similarly, performance materiality relating to a materiality level determined for a particular class of transactions, account balance, or disclosure is set to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements in that particular class of transactions, account balance, or disclosure exceeds the materiality level for that particular class of transactions, account balance, or disclosure. The determination of performance materiality is not a simple mechanical calculation and involves the exercise of professional judgment. It is affected by the auditor's understanding of the entity, updated during the performance of the risk assessment procedures, and the nature and extent of misstatements identified in previous audits and, thereby, the auditor's expectations regarding misstatements in the current period.

[No further amendment to AU-C section 320.]

AU-C Section 402, Audit Considerations Relating to an Entity Using a Service Organization

6. The amendment to AU-C section 402 is effective for audits of financial statements for periods ending on or after December 15, 2026.

[No amendment to paragraphs .01–.A18.]

Obtaining an Understanding of the Services Provided by a Service Organization, Including Internal Control

…

Further Procedures When a Sufficient Understanding Cannot Be Obtained From the User Entity (Ref: par. .12)

…

.A19 Another auditor may be used to perform procedures that will provide the necessary information about the controls at the service organization related to services provided to the user entity. If a type 1 or type 2 report has been issued, the user auditor may use the service auditor to perform these procedures as the service auditor has an existing relationship with the service organization. The user auditor using the work of another auditor may find the guidance in section ***220,* Quality Management for Engagements Conducted in Accordance With Generally Accepted Auditing Standards** ~~600~~, ~~*Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*~~, useful as it relates to ***determining the competence and capabilities of the other*** ~~understanding another~~ auditor (including that auditor's independence~~ and professional competence~~); ***the direction and supervision*** ~~involvement in the work~~ of ***the other*** ~~another~~ auditor***;*** ~~in planning~~ the nature, ***timing, and*** extent~~, and timing~~ of ~~such~~ ***the*** work ***assigned to the other auditor***; and ~~in~~ evaluating the sufficiency and appropriateness of the audit evidence obtained. *fn 9*

fn 9 **See section 220, *Quality Management for Engagements Conducted in Accordance With Generally Accepted Auditing Standards.*** ~~*Paragraphs .02 and .22 of*~~

~~*section 600,* Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors).~~

[No further amendment to AU-C section 402.]

AU-C Section 450, Evaluation of Misstatements Identified During the Audit

7. The amendment to AU-C section 450 is effective for audits of financial statements for periods ending on or after December 15, 2026.

[No amendment to paragraphs .01–.A24.]

Evaluating the Effect of Uncorrected Misstatements (Ref: par. .10–.11)

…

.A25 The auditor is required by ~~section 600,~~ ***SAS No. 149,*** *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors* **and Audits of Referred-to Auditors***)*, to evaluate the effect on the group audit opinion of any uncorrected misstatement identified by the group ***auditor*** ~~engagement team~~ or communicated by the component auditors. *fn 18*

fn 18 *Paragraph* **70**~~*.44*~~ *of* ~~*section 600,*~~**SAS No. 149,** Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors ***and Audits of Referred-to Auditors***).

[No further amendment to AU-C section 450.]

AU-C Section 501, Audit Evidence — Specific Considerations for Selected Items

8. The amendment to AU-C section 501 is effective for audits of financial statements for periods ending on or after December 15, 2026.

[No amendment to paragraphs .01–.A4.]

Investments in Securities and Derivative Instruments (Ref: par. .05–.06)

…

Investments in Securities When Valuations Are Based on the Investee's Financial Results (Excluding Investments Accounted for Using the Equity Method of Accounting) (Ref: par. .05–.06)

.A5 ~~Section 600~~ ***SAS No. 149,*** *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors* **and Audits of Referred-to Auditors***)*, addresses auditing investments accounted for using the equity method of accounting.

[No amendment to paragraphs .A6–.A22.]

Inventory

***Attendance at Physical Inventory Counting (Ref: par. .12* a)**

...

.A23 Matters relevant in planning attendance at physical inventory counting (or in designing and performing audit procedures pursuant to paragraphs .12–.16) include, for example, the following:

...

- The locations at which inventory is held, including the materiality of the inventory and the risks of material misstatement at different locations, in deciding at which locations attendance is appropriate. ~~Section 600 addresses the involvement of component auditors and, accordingly, may be relevant if such involvement is with regard to attendance of physical inventory counting at a remote location.~~

...

[No further amendment to AU-C section 501.]

AU-C Section 510, Opening Balances — Initial Audit Engagements, Including Reaudit Engagements

9. The amendment to AU-C section 510 is effective for audits of financial statements for periods ending on or after December 15, 2026.

[No amendment to paragraphs .01–.A7.]

Audit Procedures (Ref: par. .07)

...

.A8 If the predecessor auditor permits access to the audit documentation, the auditor may review the predecessor auditor's audit documentation for information relevant to planning and performing the audit. The auditor's determination whether to use information resulting from such review as part of the auditor's risk assessment procedures or as evidence regarding the opening balances is influenced by the auditor's assessment of the professional competence and independence of the predecessor auditor. Although the predecessor auditor is not a component auditor ***or referred-to auditor***, as defined in ~~section 600,~~ ***SAS No. 149,*** *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors* **and Audits of Referred-to Auditors***)*, the auditor may ***perform procedures*** ~~make inquiries~~ similar to those ***included*** ~~listed~~ in ~~section 600~~ ***SAS No. 149*** concerning the ~~professional~~ competence ***and capabilities*** and independence of the predecessor auditor. *fn1* (Ref: par. .07 and .08*c*)

fn 1 *Paragraph***s** ~~*.22*~~**27, 28, 51, and 52** *of* ~~*section 600,*~~ **SAS No. 149,** Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors ***and Audits of Referred-to Auditors***).

[No further amendment to AU-C section 510.]

AU-C Section 550, Related Parties

10. The amendment to AU-C section 550 is effective for audits of financial statements for periods ending on or after December 15, 2026.

[No amendment to paragraphs .01–.A10.]

Risk Assessment Procedures and Related Activities

Understanding the Entity's Related Party Relationships and Transactions

…

The Identity of the Entity's Related Parties (Ref: par. .14a)

…

.A11 In the context of a group audit, ~~section 600~~***SAS No. 149,*** *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors* **and Audits of Referred-to Auditors***)*, requires the group ***auditor*** ~~engagement team~~ to ***request component auditors and referred-to auditors to communicate related party relationships not previously identified by group management or the group auditor on a timely basis*** ~~provide each component auditor with information about related parties prepared by group management and any other related parties of which the group engagement team is aware, including the nature of the entity's relationships and transactions with those related parties~~. *fn 24* ~~When the entity is a component within a group, this~~ ***Such*** information provides a useful basis for the ***group*** auditor's inquiries of management regarding the identity of ~~the entity's~~ related parties.

fn 24 *Paragraph***s 34*b*~~.41c~~ and 62*c*(ii)** *of* ~~*section 600*~~ **SAS No. 149,** Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors ***and Audits of Referred-to Auditors***).

[No amendment to paragraphs .A12–.A30.]

Sharing Related Party Information With the Engagement Team (Ref: par. .19 and .25 **a*)***

…

.A31 ~~Section 600~~ ***SAS No. 149*** addresses the communications that apply to group audits, particularly those that involve component auditors ***or when reference is made to referred-to auditors.*** **fn 30**

fn 30 Paragraphs 33b, 34b, 62b, and 62c(ii) of SAS No. 149.

AU-C Section 805, Special Considerations — Audits of Single Financial Statements and Specific Elements, Accounts, or Items of a Financial Statement

11. The amendment to AU-C section 805 is effective for audits of single financial statements or specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2026.

Scope of This Section

[No amendment to paragraph .01.]

.02 This section does not apply to ***circumstances in which*** ~~the report~~ ***audit procedures are performed by*** ~~of~~ a component auditor ~~issued as a result of work performed~~ on the financial information of a component ~~at the request of a group engagement team~~ for purposes of an audit of group financial statements (see ~~section 600,~~ ***SAS No. 149,*** *Special Considerations — Audits of Group Financial Statements [Including the Work of Component Auditors* **and Audits of Referred-to Auditors***]*).

[No further amendment to AU-C section 805.]

AU-C Section 920, Letters for Underwriters and Certain Other Requesting Parties

12. The amendment to AU-C section 920 is effective for comfort letters issued on or after December 15, 2026.

[No amendment to paragraphs .01–.20.]

Agreeing Upon the Scope of Services

...

.21 Situations may exist in which one or more component auditor's ***or referred-to auditor's*** report is included in the securities offering. When comfort letters are issued to requesting parties by those component auditors ***or referred-to auditors***, the auditor of the group financial statements should read those comfort letters. The auditor of the group financial statements should state in the comfort letter that the procedures relating to those components consisted solely of reading the component auditors' ***or referred-to auditors'*** comfort letters.

[No amendment to paragraphs .22–.A18.]

Agreeing Upon the Scope of Services (Ref: par. .15–.23)

...

.A19 Comfort letters are requested occasionally from more than one auditor, for example, in connection with securities offerings to be used in the subsequent sale of shares issued in recently effected mergers and from predecessor auditors. In such circumstances, it is the entity's responsibility, at the earliest practicable date, to inform any other auditors who may be involved about any letter that may be requested of them and arrange for them to receive a draft of the underwriting agreement so that they may make arrangements at an early date for the preparation of a draft of their letter and for the performance of their procedures. The entity or requesting party is also responsible for arranging for a copy of the comfort letters of component auditors ***or referred-to auditors*** in draft and final form to be provided to the auditor of the group financial statements.

[No amendment to paragraphs .A20–.A26.]

Format and Contents of Comfort Letters

...

Addressee (Ref: par. .26)

.A27 An example of an appropriate form of address for this purpose is "The Blank Company and XYZ & Company, as Representative of the Several Underwriters." Copies of a comfort letter addressed in accordance with the requirements in paragraph .26 may be provided to the auditor of the group financial statements when a comfort letter related to a component included in group financial statements is issued by a component auditor ***or referred-to auditor***.

[No amendment to paragraphs .A28–.A69.]

Commenting in a Comfort Letter on Information Other Than Audited Financial Statements

...

Subsequent Changes (Ref: par. .58–.64)

…

.A70 When more than one auditor is involved, the auditor of the group financial statements may comment that there were no decreases in the consolidated financial statement items, when appropriate, despite the possibility that decreases have been mentioned in a comfort letter issued by a component auditor ***or referred-to auditor***. Exhibit B, example J, "Alternate Wording When Component Auditors Are Involved ***or When Making Reference to the Audit of a Referred-to Auditor***," contains an illustration of wording when more than one auditor is involved.

[No amendment to paragraphs .A71–.A92.]

Exhibit B — Examples of Comfort Letters

.A93

…

Example J — Alternate Wording When Component Auditors Are Involved ***or When Making Reference to the Audit of a Referred-to Auditor***

…

…

Example J — Alternate Wording When Component Auditors Are Involved *or When Making Reference to the Audit of a Referred-to Auditor*

.A93-14 Example J applies when one or more component auditors are involved in the audit of group financial statements ***or when reference is made to the audit of a referred-to auditor in the auditor's report on group financial statements***, and the group engagement team has obtained a copy of the comfort letter of the component auditors ***or referred-to auditors*** (see paragraph .21). Example J consists of an addition to paragraph 4, a substitution for the applicable part of paragraph 5, and an addition to paragraph 6 of example A-1 and corresponding changes to paragraphs 3, 4, and 5 of example A-2, respectively.

Amendment to SAS No. 128, *Using the Work of Internal Auditors*, as Amended (AU-C sec. 610)

14. The amendment to AU-C section 610 is effective for audits of financial statements for periods ending on or after December 15, 2026.

AU-C Section 610, *Using the Work of Internal Auditors*

[No amendment to paragraphs .01–.A19.]

Determining Whether, in Which Areas, and to What Extent the Work of the Internal Audit Function Can Be Used in Obtaining Audit Evidence

...

Determining the Nature and Extent of Work of the Internal Audit Function That Can Be Used in Obtaining Audit Evidence

Factors Affecting the Determination of the Nature and Extent of the Work of the Internal Audit Function That Can Be Used (Ref: par. .15–.18)

...

.A20

...

The internal audit function's plan may also include procedures related to financial information of components of a group. The external auditor may coordinate work with the internal auditors (in accordance with paragraph .20 of this section) ***in determining the components at which audit work will be performed*** ~~and reduce the number of the entity's components at which the external auditor would otherwise need to perform audit procedures~~ in accordance with the requirements of ***SAS No. 149,*** ~~section 600,~~ *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors* **and Audits of Referred-to Auditors***)*.

[No further amendment to AU-C section 610.]

Amendment to SAS No. 130, *An Audit of Internal Control Over Financial Reporting That Is Integrated With an Audit of Financial Statements*, as Amended (AU-C sec. 940)

15. The amendment to AU-C section 940 is effective for integrated audits for periods ending on or after December 15, 2026.

AU-C Section 940, *An Audit of Internal Control Over Financial Reporting That Is Integrated With an Audit of Financial Statements*

[No amendment to paragraphs .01–.66.]

Report Modifications

.67 The auditor should modify the report on ICFR if any of the following conditions exist:

a. One or more material weaknesses exist.

b. Elements of management's report are incomplete or improperly presented.

c. There is a limitation on the scope of the engagement. (Ref: par. .A119)

d. The auditor decides to refer to the report of a ***referred-to*** ~~component~~ auditor as the basis, in part, for the auditor's own opinion.

e. There is other information contained in management's report.

[No amendment to paragraphs .68–.77.]

…

***Making Reference to a* Referred-to ~~*Component*~~ *Auditor and* Involving ~~*Assuming Responsibility for the Work of a*~~ *Component Auditors* in the Group Audit**

.78 ***In a group audit*** ~~When an entity includes one or more components~~, the group engagement partner should ***determine*** ~~evaluate~~ whether ~~the group engagement team will be able to obtain~~ sufficient appropriate audit evidence ***can reasonably be expected to be obtained (including through involving component auditors or through making reference to the audit of a referred-to auditor in the auditor's report on the ICFR over the group financial statements)*** ~~through the group engagement team's work or use of the work of component auditors (that is, through assuming responsibility for the work of component auditors or making reference to the audit of ICFR of a component auditor in the auditor's report)~~ to ***provide a basis for forming an opinion on*** ~~act as the auditor of the ICFR over the group financial statements and report as such on~~ the ICFR over the group financial statements, as required by ~~section 600,~~ ***SAS No. 149,*** *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors* **and Audits of Referred-to Auditors**). *fn 9* (Ref: par. .A128) *fn 9 Paragraph* **19**~~*14*~~ *of* **SAS No. 149,** ~~*section 600,*~~ Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors ***and Audits of Referred-to Auditors***).

.79 As required by ~~section 600,~~ ***SAS No. 149,*** the group engagement partner should determine whether to make reference to ***the audit of*** a ***referred-to*** ~~component~~ auditor in the ***auditor's*** report on the ICFR over the group financial statements. *fn 10* Reference to the audit of a ***referred-to*** ~~component~~ auditor in the auditor's report on the ICFR over the group financial statements should not be made unless

a. the ***group*** engagement partner has determined that the ***referred-to*** ~~component~~ auditor has performed an audit of the component's ICFR in accordance with the relevant requirements of GAAS ~~(~~or~~, if applicable,~~ the standards promulgated by the PCAOB~~)~~ and

b. the ***referred-to*** ~~component~~ auditor has issued an auditor's report on ICFR that is not restricted as to use. (Ref: par. .A129–.A130) **fn 11**

fn 10 Paragraph ~~*.24*~~**55** *of* ~~*section 600,*~~ **SAS No. 149**.

fn 11 Paragraph 56 of SAS No. 149.

[Subsequent footnotes renumbered. No amendment to paragraph .80.]

Special Topics

Entities With Multiple Components

.81 In determining the components at which to perform tests of controls, the group ***auditor*** ~~engagement team~~ should ***take responsibility for the identification and*** assess***ment of*** the risk of material misstatement to the ***group*** financial statements associated with the component and correlate the amount of attention devoted to the component with the degree of risk. (Ref: par. .A133–.A135)

.82 In assessing and responding to risk, the group ***auditor*** ~~engagement team~~ should ***take responsibility for*** test***ing***~~, or have a component auditor test on the group engagement team's behalf,~~ controls over specific risks that present a reasonable possibility of material misstatement to the group financial statements. (Ref: par. .A136)

.83 In applying the requirement in paragraph .42 regarding special considerations for subsequent years' audits, the group ***auditor*** ~~engagement team~~ should vary the nature, timing, and extent of tests of controls at components from year to year.

[No amendment to paragraphs .84–.A127.]

Report Modifications (Ref: par. .67)

…

Making Reference to a **Referred-to** ~~***Component***~~ ***Auditor and*** **Involving** ~~***Assuming Responsibility for the Work of a***~~ ***Component Auditor*****s in the Group Audit** ***(Ref: par. .78–.79)***

.A128 ~~Section 600,~~***SAS No. 149*** addresses special considerations that apply to group audits, in particular those that involve component auditors ***or when reference is made to referred-to auditors***. ~~Section 600~~ ***SAS No. 149*** is applicable, adapted as necessary, to the audit of ICFR, considering the requirements and guidance related to multiple components discussed beginning in paragraphs .28 and .81.

.A129 The group engagement partner may ***determine*** ~~decide~~ to ***involve*** ~~assume responsibility for the work of the~~ component auditor***s*** or to make reference to the ***audit of a referred-to*** ~~component~~ auditor in the report on the ICFR over the group financial statements. The decision about whether to make reference to ***the audit of*** a ***referred-to*** ~~component~~ auditor in the report on the audit of ICFR might differ from the corresponding decision as it relates to the audit of the financial statements. For example, the audit report on the group financial statements may make reference to the audit of a significant equity investment performed by a ***referred-to*** ~~component~~ auditor, but the report on the ICFR over the group financial statements might not make a similar reference because management's assessment about ICFR ordinarily would not extend to controls at the equity method investee. See paragraph .84 for further discussion of the evaluation of the controls for an equity method investment.

.A130 ~~Section 600~~ ***SAS No. 149*** establishes requirements and provides guidance when ***involving*** ~~assuming responsibility for the work of a~~ component auditor***s in a group audit*** and when making reference to ***the audit of*** a ***referred-to*** ~~component~~ auditor in the auditor's report on the ***group*** financial statements that are adapted and applied, as necessary, to the audit of ICFR. Exhibit A of this section includes an illustration of the application of the reporting requirements in ~~section 600~~ ***SAS No. 149***. *fn 32*

fn 32 Illustration 4, "Unmodified Opinion on ICFR Making Reference to **the Audit of** *a* **Referred-to** ~~*Component*~~ *Auditor," of exhibit A.*

[No amendment to paragraphs .A131–.A132.]

Special Topics

Entities With Multiple Components (Ref: par. .81–.83)

.A133 As indicated in paragraph .A128 of this section, ~~section~~ ***SAS No. 149*** is applicable, adapted as necessary, to the audit of ICFR, considering the requirements and guidance related to components discussed in this section.

.A134 In determining the components at which ~~to perform~~ tests of controls ***will be performed***, the group ***auditor*** ~~engagement team~~ may also take into account work performed by the internal audit function or others on behalf of management. For example, if the internal audit function's planned procedures include relevant audit work at various components, the ***group*** auditor may ***decide to use that work in accordance***

with section 610~~coordinate work with the internal auditors and reduce the number of components at which the group engagement team, or a component auditor on the group engagement team's behalf, would otherwise need to perform audit procedures~~.

.A135 ~~The group engagement team may eliminate from further consideration components that, individually or when aggregated with others, do not present a reasonable possibility of material misstatement to the group financial statements.~~ ***In the context of a group audit, the phrase "the group auditor should take responsibility for..." is used for those requirements when the group auditor is permitted to assign the design or performance of procedures, tasks, or actions to other appropriately skilled or suitably experienced members of the engagement team, including component auditors***.

.A136 ~~In lower risk components,~~ ***T***~~t~~he group ***auditor*** ~~engagement team first might~~ ***may*** evaluate whether testing entity-level controls, including controls in place to provide assurance that appropriate controls exist throughout the organization, provides sufficient appropriate audit evidence ***for one or more relevant assertions for a significant class of transactions, account balance, or disclosure***. ~~The group engagement team or a component auditor on the group engagement team's behalf may test the operating effectiveness of controls over specific risks or group-wide controls.~~

[No amendment to paragraphs .A137–.A155.]

Exhibit A — Illustrative Reports

.A156 The following illustrate the report elements described in this section. The illustrations assume that the audit of internal control over financial reporting (ICFR) and the audit of the financial statements were performed by the same auditor. [No amendment to paragraphs .01–.A1.]

Scope of This Section (Ref: par. .02 and .09)

...

.A2 Other AU-C sections provide requirements and guidance with respect to information in certain documents other than annual reports. For example, section 925, *Filings With the U.S. Securities and Exchange Commission Under the Securities Act of 1933*; section 945, *Auditor Involvement With Exempt Offering Documents*; and ~~Statement on Auditing Standards No. 136~~ ***section 703***, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA* ~~(sec. 703)~~. ~~*fn 3*~~

~~*fn 3* *Statement on Auditing Standards (SAS) No. 136,* Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA *(sec. 703), is effective for audits of financial statements for periods ending on or after December 15, 2021.*~~

[No amendment to paragraphs .A3–.A35.]

...

Reading and Considering the Other Information (Ref: par. .16–.17)

...

.A36 In the case of a group audit, though the group auditor is required to read the entirety of the other information if, in accordance with ~~section 600,~~ ***SAS No. 149,*** *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors* **and Audits of Referred-to Auditors***)*, the group auditor decides to make reference to ***the audit of*** a ***referred-to*** ~~component~~ auditor in the auditor's report on the group financial statements, *fn 10* the group auditor's knowledge does not extend beyond that obtained by the group auditor during the audit of the group financial statements.

fn 10 *Paragraph* ~~*.24*~~**55** *of* ~~*section 600,*~~ **SAS No. 149,**Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors ***and Audits of Referred-to Auditors***).

[No amendment to paragraphs .A37–.A38.]

.A39 The manner in which an auditor resolves a concern regarding whether other information is materially inconsistent with the auditor's knowledge obtained in the audit, is a matter of professional judgment. The auditor may determine that referring to relevant audit documentation or making inquiries of relevant members of the engagement team**,** ***including*** ~~or~~ relevant component auditors**,** is appropriate as a basis for the auditor's consideration of whether a material misstatement exists. Whether, and if so, the extent to which, the auditor refers to relevant audit documentation or makes inquiries of relevant members of the engagement team**,** ***including*** ~~or~~ relevant component auditors**,** is a matter of professional judgment.

.A40 It may not be necessary for the auditor to refer to relevant audit documentation or to make inquiries of relevant members of the engagement team**,** ***including*** ~~or~~ relevant component auditors**,** about any matter included in the other information. This may be the case, for example, when the group auditor decides to make reference to ***the audit of*** a ***referred-to*** ~~component~~ auditor in the auditor's report in accordance with ~~section 600~~ ***SAS No. 149,****fn11* and the group auditor has obtained sufficient knowledge in connection with the group audit about matters in the other information relating to the ~~significant~~ component with respect to which the ***referred-to*** ~~component~~ auditor has performed an audit of the financial statements.

fn 11 *Paragraph ~~.24~~***55** *of ~~section 600~~* **SAS No. 149**.

[No further amendment to AU-C section 720.]

Amendment to SAS No. 145, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AU-C sec. 315)

20. The amendment to SAS No. 145 is effective for audits of financial statements for periods ending on or after December 15, 2026.

AU-C Section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*

[No amendment to paragraphs .01–.A16.]

Risk Assessment Procedures and Related Activities (Ref: par. .13–.18)

.A17 The risks of material misstatement to be identified and assessed include both those due to fraud and those due to error, and both are covered by this section. However, the significance of fraud is such that further requirements and guidance are included in section 240 in relation to risk assessment procedures and related activities to obtain information that is used to identify and assess the risks of material misstatement due to fraud. *fn 19* In addition, the following AU-C sections provide further requirements and guidance on identifying and assessing risks of material misstatement regarding specific matters or circumstances:

- Section 540, *Auditing Accounting Estimates and Related Disclosures*, with regard to accounting estimates

- Section 550, *Related Parties*, with regard to related party relationships and transaction***s***
- Section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, with regard to going concern
- ~~Section 600,~~ ***SAS No. 149,*** *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors* **and Audits of Referred-to Auditors** *)*, with regard to group financial statements

fn 19 [Footnote omitted for purposes of this SAS.]

[No amendment to paragraphs .A18–.A52.]

Engagement Team Discussion (Ref: par. .17–.18)

...

Scalability

...

.A53 When an engagement is carried out by a large engagement team, such as for an audit of group financial statements, it is not always necessary or practical for the discussion to include all members in a single discussion (for example, in a multi-location audit), nor is it necessary for all the members of the engagement team to be informed of all the decisions reached in the discussion. The engagement partner may discuss matters with key members of the engagement team, including, if considered appropriate, those with specific skills or knowledge and those ~~responsible for the~~ ***performing work at*** ~~audits of~~ components, while delegating discussion with others, taking into account the extent of communication considered necessary throughout the engagement team. A communications plan, agreed to by the engagement partner, may be useful.

[No amendment to paragraphs .A54–.A246.]

Identifying and Assessing the Risks of Material Misstatement (Ref: par. .32–.41)

...

Assessing Risks of Material Misstatement at the Assertion Level

...

Significant Risks (Ref: par. .36)

Why Significant Risks Are Determined and the Implications for the Audit

.A247 The determination of significant risks allows for the auditor to focus more attention on those risks that are close to the upper end of the spectrum of inherent risk, through the performance of certain required responses, including the following:

...

- ~~Section 600~~ ***SAS No. 149*** requires ***the group auditor to evaluate the appropriateness of the design and performance of further audit procedures for areas of higher assessed risks of material misstatement of the group financial statements, or significant risks, on which a component auditor is determining the further audit procedures to be performed*** ~~more involvement by the group engagement partner if the significant risk relates to a component in a group audit and for the group engagement team to direct the work required at the component by the component auditor~~. *fn 65*

Amendment to SAS No. 146, *Quality Management for Engagements Conducted in Accordance With Generally Accepted Auditing Standards* (AU-C sec. 220)

21. The amendment to AU-C section 220 is effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025.

AU-C Section 220, *Quality Management for Engagements Conducted in Accordance With Generally Accepted Auditing Standards*

[No amendment to paragraphs .01–.41.]

Scope of This Section (Ref: par. .01)

.A1 This section applies to all audits of financial statements, including audits of group financial statements. ~~Section 600,~~ ***SAS No. 149,****Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors* **and Audits of Referred-to Auditors***), **addresses*** ~~deals with~~ special considerations that apply to an audit of group financial statements, including when component auditors are involved ***or when the group auditor makes reference to the audit of a referred-to auditor***. ~~Section 600~~ ***SAS No. 149*** also provides guidance on how to adapt and apply the requirements of this section in an audit of group financial statements involving component auditors. ~~Section 600~~ ***SAS No. 149,*** adapted as necessary in the circumstances, may also be useful in an audit of financial statements when the engagement team includes individuals from another firm. For example, ~~section 600~~ ***SAS No. 149*** may be useful when involving such an individual to attend a physical inventory count; inspect property, plant, and equipment; or perform audit procedures at a shared service center at a remote location.

[No amendment to paragraphs .A2–.A21.]

Definitions

Engagement Team (Ref: par. 12)

...

.A22 When joint auditors conduct an audit, the joint engagement partners and their engagement teams collectively constitute the "engagement partner" and "engagement team" for purposes of GAAS. This section does not, however, deal with the relationship between joint auditors or the work that one joint auditor performs in relation to the work of the other joint auditor.

.A23 Referred-to auditors are not members of the engagement team. Referred-to auditors are not component auditors. **fn 25**

fn 25 Paragraph 16 of SAS No. 149, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors and Audits of Referred-to Auditors).*

[Subsequent paragraphs and footnotes renumbered. No amendment to renumbered paragraphs .A24–.A25.]

The Application of Firm Policies or Procedures by Members of the Engagement Team (Ref: par. .08 and .17)

...

~~**.A24**~~ ***.A26*** In particular, the firm's policies or procedures may require the firm or the engagement partner to take different actions from those applicable to personnel when obtaining an understanding of whether an individual from another firm

- has the appropriate competence and capabilities to perform the audit engagement. For example, the individual would not be subject to the firm's recruitment and training processes, and therefore, the firm's policies or procedures may state that this determination can be made through other actions such as obtaining information from the other firm or a licensing or oversight body. ~~Paragraphs .22 and A47–A48 of section 600~~ ***SAS No. 149*** **fn 26** contain***s*** guidance on obtaining an understanding of the competence and capabilities of component auditors.

fn 26 Paragraphs 28 and A72–A76 of SAS No. 149.

...

[Subsequent footnotes further renumbered.]

~~**.A25**~~ ***.A27*** When firm policies or procedures require specific activities to be undertaken in certain circumstances (for example, consultation on a particular matter), it may be necessary to communicate with individuals who are not personnel about what is expected of them to enable the engagement partner to comply with the firm's policies or procedures.

For example, in a group audit engagement, communicating the group auditor's policies and procedures about matters subject to consultation to a component auditor enables the component auditor to determine which identified difficult or contentious matters that are relevant to the group financial statements to bring to the attention of the group ***auditor*** ~~engagement team~~.

[No amendment to renumbered paragraphs .A28–.A54.]

Acceptance and Continuance of Client Relationships and Audit Engagements (Ref: par. .22–.24)

...

~~**.A53**~~ ***.A55*** Information obtained during the acceptance and continuance process may assist the engagement partner in complying with the requirements of this section and making informed decisions about appropriate courses of action. Such information may include the following:

- Information about the size, complexity, and nature of the entity, including whether it is a group audit, the industry in which it operates, and the applicable financial reporting framework
- The entity's timetable for reporting, such as at interim and final stages
- In relation to group audits, the nature of the control relationships between the parent and its ***entities or business units*** ~~components~~
- Whether there have been changes in the entity or in the industry in which the entity operates since the previous audit engagement that may affect the nature of resources required, as well as the manner in which the work of the engagement team will be directed, supervised, and reviewed

~~**.A54**~~ ***.A56*** Information obtained during acceptance and continuance may also be relevant in complying with the requirements of other sections, as well as this section, for example, with respect to the following:

- Establishing an understanding of the terms of the audit engagement, as required by section 210, *Terms of Engagement fn* ~~*29*~~ **31**
- Identifying and assessing risks of material misstatement, whether due to error or fraud, in accordance with section 315 and section 240, *Consideration of Fraud in a Financial Statement Audit*
- Understanding the group~~, its components,~~ and ***its*** ~~their~~ environments, in the case of an audit of group financial statements in accordance with ~~section 600~~ ***SAS No. 149***, and directing, supervising, and reviewing the work of component auditors
- Determining whether, and how, to involve an auditor's specialist in accordance with section 620

- The entity's governance structure in accordance with section 260, *The Auditor's Communication With Those Charged With Governance*, and section 265, *Communicating Internal Control Related Matters Identified in an Audit*

fn ~~29~~ **31** *[Footnote omitted for purposes of this SAS.]*

[No amendment to renumbered paragraphs .A57–.A61.]

Engagement Resources (Ref: par. .25–.28)

...

~~**.A60**~~ ***.A62*** Resources for an audit engagement are primarily assigned or made available by the firm, although there may be circumstances in which the engagement team directly obtains resources for the audit engagement. For example, this may be the case when a component auditor is required by statute, regulation, or for another reason to express an audit opinion on the financial statements of a component, and the component auditor is also appointed by component management to perform audit procedures on behalf of the group ***auditor*** ~~engagement team~~. *fn ~~30~~* **32** In such circumstances, the firm's policies or procedures may require the engagement partner to take different actions, such as requesting information from the component auditor, to determine whether sufficient and appropriate resources are assigned or made available.

fn ~~30~~ **32** *See paragraph ~~.03~~* **.A10** *of ~~section 600,~~* **SAS No. 149**.

[No amendment to renumbered paragraphs .A63–.A78.]

Insufficient or Inappropriate Resources (Ref: par. .27)

...

~~**.A77** ***.A79*** In an audit of group financial statements, when there are insufficient or inappropriate resources in relation to work being performed at a component by a component auditor, the engagement partner may discuss the matter with the component auditor, management, or the firm to make sufficient and appropriate resources available.~~

[No amendment to renumbered paragraphs .A80–.A93.]

Engagement Performance

...

The Engagement Partner's Review (Ref: par. .30–.34)

...

~~**.A93**~~ ***.A95*** The engagement partner exercises professional judgment in identifying the areas of significant judgment made by the engagement team. The firm's policies or procedures may specify certain matters that are commonly expected to be significant judgments. Significant judgments in relation to the audit engagement may include matters related to the overall audit strategy and audit plan for undertaking the engagement, the execution of the engagement, and the overall conclusions reached by the engagement team. Examples follow:

...

- In group audit situations,
  - — the overall group audit strategy and group audit plan;
  - — decisions about the involvement of component auditors, including how to direct and supervise them and review their work~~, including, for example, when there are areas of higher assessed risk of material misstatement of the financial information of a component~~; and
  - — the evaluation of work performed by component auditors and the conclusions drawn therefrom

...

[No further amendment to renumbered paragraphs .A96–.A100.]

...

Review of Communications to Management, Those Charged With Governance, or Regulatory Authorities (Ref: par. 34)

~~**.A99**~~ ***.A101*** The engagement partner uses professional judgment in determining which written communications to review, taking into account the nature and circumstances of the audit engagement. For example:

- It may not be necessary for the engagement partner to review communications between the engagement team and management in the ordinary course of the audit.
- ***In group audit situations, the engagement partner may determine to review formal written communications to group management, those charged with governance of the group, or regulatory authorities relevant to the group.***

[No further amendment to AU-C section 220.]

Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors)

Source: SAS No. 122; SAS No. 127; SAS No. 128; SAS No. 130; SAS No. 134; SAS No. 135; SAS No. 137; SAS No. 138; SAS No. 145.

See section 9600A for interpretations of this section.

Effective for audits of group financial statements for periods ending on or after December 15, 2012, unless otherwise indicated.

Note

In June 2022, the ASB issued SAS No. 146, *Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, which contains amendments to this section.

The amendments are effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025, and can be viewed in the appendix of section 220 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 Generally accepted auditing standards (GAAS) apply to group audits. This section addresses special considerations that apply to group audits, in particular those that involve component auditors.

.02 An auditor may find this section, adapted as necessary in the circumstances, useful when that auditor involves other auditors in the audit of financial statements that are not group financial statements. For example, an auditor may involve another auditor to observe the inventory count or inspect physical fixed assets at a remote location.

.03 A component auditor may be required by law or regulation or may have been engaged by component management for another reason to express an audit opinion on the financial statements of a component. The requirements of this section apply, nonetheless, regardless of whether the group engagement partner decides to make reference to the component auditor in the auditor's report on the group financial statements or to assume responsibility for the work of component auditors.

.04 Governmental entities frequently prepare group financial statements. The AICPA Audit and Accounting Guide *State and Local Governments* provides guidance to assist auditors in auditing and reporting on those financial statements in accordance with GAAS, including the requirements of this section.

.05 In accordance with section 220A, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, the group engagement partner is required to be satisfied that those performing the group audit engagement, including component auditors, collectively possess the appropriate competence and capabilities.[1] The group engagement partner also is responsible for the direction, supervision, and performance of the group audit engagement. In this section, requirements to be undertaken by the group engagement partner are addressed to the group engagement partner. When the group engagement team may assist the group engagement partner in fulfilling a requirement, the requirement is addressed to the group engagement team. When it may be appropriate in the circumstances for the firm to fulfill a requirement, the requirement is addressed to the auditor of the group financial statements.

.06 The requirements of section 220A apply regardless of whether the group engagement team or a component auditor performs the work on the financial information of a component. This section assists the group engagement partner to meet the requirements of section 220A when component auditors perform work on the financial information of components.

.07 Audit risk is a function of the risk of material misstatement of the financial statements and the risk that the auditor will not detect such misstatements.[2] In a group audit, detection risk includes the risk that a component auditor may not detect a misstatement in the financial information of a component that could cause a material misstatement of the group financial statements and the risk that the group engagement team may not detect this misstatement. This section explains the matters that the group engagement team considers when determining the nature, timing, and extent of its involvement in the risk assessment procedures and further audit procedures performed by the component auditors on the financial information of the components. The purpose of this involvement is to obtain sufficient appropriate audit evidence on which to base the audit opinion on the group financial statements.

.08 The group engagement partner is responsible for deciding, individually for each component, to either

---

[1]Paragraph .16 of section 220A, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*.

[2]Paragraph .A36 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

- assume responsibility for, and thus be required to be involved in, the work of a component auditor, insofar as that work relates to the expression of an opinion on the group financial statements, or
- not assume responsibility for, and accordingly make reference to, the audit of a component auditor in the auditor's report on the group financial statements.

The requirements in paragraphs .51–.65 are applicable only when the auditor of the group financial statements is assuming responsibility for the work of component auditors. All other requirements in this section apply to all audits of group financial statements.

Effective Date

.09 This section is effective for audits of group financial statements for periods ending on or after December 15, 2012.

Objectives

.10 The objectives of the auditor are to determine whether to act as the auditor of the group financial statements and, if so, to

a. determine whether to make reference to the audit of a component auditor in the auditor's report on the group financial statements;

b. communicate clearly with component auditors; and

c. obtain sufficient appropriate audit evidence regarding the financial information of the components and the consolidation process to express an opinion about whether the group financial statements are prepared, in all material respects, in accordance with the applicable financial reporting framework.

Definitions

.11 For purposes of GAAS, the following terms have the meanings attributed as follows:

Component. An entity or business activity for which group or component management prepares financial information that is required by the applicable financial reporting framework to be included in the group financial statements. (Ref: par. .A1–.A5)

Component auditor. An auditor who performs work on the financial information of a component that will be used as audit evidence for the group audit. A component auditor may be part of the group engagement partner's firm, a network firm of the group engagement partner's firm, or another firm. (Ref: par. .A9–.A11)

Component management. Management responsible for preparing the financial information of a component.

Component materiality. The materiality for a component determined by the group engagement team for the purposes of the group audit.

Group. All the components whose financial information is included in the group financial statements. A group always has more than one component.

Group audit. The audit of group financial statements.

Group audit opinion. The audit opinion on the group financial statements.

Group engagement partner. The partner or other person in the firm[3] who is responsible for the group audit engagement and its performance and for the auditor's report on the group financial statements that is issued on behalf of the firm. When joint auditors conduct the group audit, the joint engagement partners and their engagement teams collectively constitute the group engagement partner and the group engagement team. This section does not, however, address the relationship between joint auditors or the work that one joint auditor performs in relation to the work of the other joint auditor.

Group engagement team. Partners, including the group engagement partner, and staff who establish the overall group audit strategy, communicate with component auditors, perform work on the consolidation process, and evaluate the conclusions drawn from the audit evidence as the basis for forming an opinion on the group financial statements.

Group financial statements. Financial statements that include the financial information of more than one component. The term *group financial statements* also refers to combined financial statements aggregating the financial information prepared by components that are under common control.

Group management. Management responsible for the preparation and fair presentation of the group financial statements.

Group-wide controls. Controls designed, implemented, and maintained by group management over group financial reporting.

Significant component. A component identified by the group engagement team (i) that is of individual financial significance to the group, or (ii) that, due to its specific nature or circumstances, is likely to include significant risks of material misstatement of the group financial statements. (Ref: par. .A6–.A8)

.12 Reference to *the applicable financial reporting framework* means the financial reporting framework that applies to the group financial statements. Reference to *the consolidation process* includes the following:

a. The recognition, measurement, presentation, and disclosure of the financial information of the components in the group financial statements by way of inclusion, consolidation, proportionate consolidation, or the equity or cost methods of accounting (Ref: par. .A12)

b. The aggregation in combined financial statements of the financial information of components that are under common control

[3]*Group engagement partner* and *firm* refer to their governmental equivalents when relevant.

Requirements

Responsibility

.13 In accordance with section 220A, the group engagement partner is responsible for (1) the direction, supervision, and performance of the group audit engagement in compliance with professional standards, applicable regulatory and legal requirements, and the firm's policies and procedures; and (2) determining whether the auditor's report that is issued is appropriate in the circumstances.[4] (Ref: par. .A13–.A14)

Acceptance and Continuance

.14 The group engagement partner should determine whether sufficient appropriate audit evidence can reasonably be expected to be obtained regarding the consolidation process and the financial information of the components on which to base the group audit opinion. For this purpose, the group engagement team should obtain an understanding of the group, its components, and their environments that is sufficient to identify components that are likely to be significant components. (Ref: par. .A15–.A17)

.15 The group engagement partner should evaluate whether the group engagement team will be able to obtain sufficient appropriate audit evidence through the group engagement team's work or use of the work of component auditors (that is, through assuming responsibility for the work of component auditors or through making reference to the audit of a component auditor in the auditor's report), to act as the auditor of the group financial statements and report as such on the group financial statements. (Ref: par. .A18–.A21)

.16 In some circumstances, the group engagement partner may conclude that it will not be possible, due to restrictions imposed by group management, for the group engagement team to obtain sufficient appropriate audit evidence through the group engagement team's work or use of the work of component auditors, and the possible effect of this inability, will result in a disclaimer of opinion on the group financial statements.[5] In such circumstances, the auditor of the group financial statements should

- in the case of a new engagement, not accept the engagement, or, in the case of a continuing engagement, withdraw from the engagement when withdrawal is possible under applicable law or regulation, or
- when the entity is required by law or regulation to have an audit, having performed the audit of the group financial statements to the extent possible, disclaim an opinion on the group financial statements. (Ref: par. .A22–.A27)

---

[4]Paragraph .17 of section 220A.

[5]Paragraphs .11–.14 of section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

Terms of Engagement

.17 The auditor of the group financial statements is required, in accordance with section 210A, *Terms of Engagement*, to agree upon the terms of the group audit engagement.[6] (Ref: par. .A28–.A29)

Overall Audit Strategy and Audit Plan

.18 The group engagement team should establish an overall group audit strategy and should develop a group audit plan. In developing the group audit plan, the group engagement team should assess the extent to which the group engagement team will use the work of component auditors and whether the auditor's report on the group financial statements will make reference to the audit of a component auditor, as discussed in paragraphs .24–.30.

.19 The group engagement partner should review and approve the overall group audit strategy and group audit plan. (Ref: par. .A30)

Understanding the Group, Its Components, and Their Environments

.20 The auditor is required to identify and assess the risks of material misstatement through obtaining an understanding of the entity and its environment, the applicable reporting framework, and the system of internal control.[7] The group engagement team should

a. enhance its understanding of the group, its components, and their environments, including group-wide controls, obtained during the acceptance or continuance stage.

b. obtain an understanding of the consolidation process, including the instructions issued by group management to components. (Ref: par. .A31–.A37)

[As amended, effective for audits of group financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.21 The group engagement team should obtain an understanding that is sufficient to

a. confirm or revise its initial identification of components that are likely to be significant.

b. assess the risks of material misstatement of the group financial statements, whether due to fraud or error.[8] (Ref: par. .A38–.A39)

---

[6]Paragraph .09 of section 210A, *Terms of Engagement*.

[7]See section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

[8]See section 315A.

Understanding a Component Auditor

.22 Regardless of whether reference will be made in the auditor's report on the group financial statements to the audit of a component auditor, the group engagement team should obtain an understanding of the following: (Ref: par. .A40–.A44)

a. Whether a component auditor understands and will comply with the ethical requirements that are relevant to the group audit and, in particular, is independent (Ref: par. .A46)

b. A component auditor's professional competence (Ref: par. .A47–.A48)

c. The extent, if any, to which the group engagement team will be able to be involved in the work of the component auditor

d. Whether the group engagement team will be able to obtain information affecting the consolidation process from a component auditor

e. Whether a component auditor operates in a regulatory environment that actively oversees auditors (Ref: par. .A45)

.23 When a component auditor does not meet the independence requirements that are relevant to the group audit or the group engagement team has serious concerns about the other matters listed in paragraph .22*a–b*, the group engagement team should obtain sufficient appropriate audit evidence relating to the financial information of the component without making reference to the audit of that component auditor in the auditor's report on the group financial statements or otherwise using the work of that component auditor. (Ref: par. .A49–.A51)

Determining Whether to Make Reference to a Component Auditor in the Auditor's Report on the Group Financial Statements

.24 Having gained an understanding of each component auditor, the group engagement partner should decide whether to make reference to a component auditor in the auditor's report on the group financial statements. (Ref: par. .A52)

.25 Reference to the audit of a component auditor in the auditor's report on the group financial statements should not be made unless

a. the group engagement partner has determined that the component auditor has performed an audit of the financial statements of the component in accordance with the relevant requirements of GAAS (Ref: par. .A53), and

b. the component auditor has issued an auditor's report that is not restricted as to use.[9]

[As amended, effective for audits of group financial statements for periods ending on or after December 15, 2012, by SAS No. 127.]

[9] See section 905, *Alert That Restricts the Use of the Auditor's Written Communication*. [Footnote revised, August 2012, to reflect conforming changes necessary due to the issuance of SAS No. 125.]

.26 If the component's financial statements are prepared using a different financial reporting framework from that used for the group financial statements, reference to the audit of a component auditor in the auditor's report on the group financial statements should not be made unless

a. the measurement, recognition, presentation, and disclosure criteria that are applicable to all material items in the component's financial statements under the financial reporting framework used by the component are similar to the criteria that are applicable to all material items in the group's financial statements under the financial reporting framework used by the group, and

b. the group engagement team has obtained sufficient appropriate audit evidence for purposes of evaluating the appropriateness of the adjustments to convert the component's financial statements to the financial reporting framework used by the group without the need to assume responsibility for, and, thus, be involved in, the work of the component auditor. (Ref: par. .A54–.A57)

[Paragraph added, effective for audits of group financial statements for periods ending on or after December 15, 2012, by SAS No. 127.]

.27 When the group engagement partner decides to make reference in the auditor's report on the group financial statements to the audit of a component auditor, the group engagement team should obtain sufficient appropriate audit evidence with regard to such components by performing the following procedures:

a. The procedures required by this section, except for those required by paragraphs .51–.65

b. Reading the component's financial statements and the component auditor's report thereon to identify significant findings and issues and, when considered necessary, communicating with the component auditor in this regard

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Making Reference in the Auditor's Report

.28 When the group engagement partner decides to make reference to the audit of a component auditor in the auditor's report on the group financial statements, the report on the group financial statements should clearly indicate

a. that the component was not audited by the auditor of the group financial statements but was audited by the component auditor.

b. the magnitude of the portion of the financial statements audited by the component auditor.

c. when the component's financial statements are prepared using a different financial reporting framework from that used for the group financial statements

i. the financial reporting framework used by the component and

ii. that the auditor of the group financial statements is taking responsibility for evaluating the appropriateness of the adjustments to convert the component's financial statements to the financial reporting framework used by the group.

d. when

i. the component auditor's report on the component's financial statements does not state that the audit of the component's financial statements was performed in accordance with GAAS or the standards promulgated by the PCAOB, and

ii. the group engagement partner has determined that the component auditor performed additional audit procedures in order to meet the relevant requirements of GAAS

1. the set of auditing standards used by the component auditor and

2. that additional audit procedures were performed by the component auditor to meet the relevant requirements of GAAS. (Ref: par. .A58–.A60)

[Paragraph renumbered and amended, effective for audits of group financial statements for periods ending on or after December 15, 2012, by SAS No. 127.]

.29 If the group engagement partner decides to name a component auditor in the auditor's report on the group financial statements

a. the component auditor's express permission should be obtained.

b. the component auditor's report should be presented together with that of the auditor's report on the group financial statements.

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.30 If the opinion of a component auditor is modified or that report includes an emphasis-of-matter or other-matter paragraph, the auditor of the group financial statements should determine the effect that this may have on the auditor's report on the group financial statements. When deemed appropriate, the auditor of the group financial statements should modify the opinion on the group financial statements or include an emphasis-of-matter paragraph or an other-matter paragraph in the auditor's report on the group financial statements. (Ref: par. .A61) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.31 If the group engagement partner decides to assume responsibility for work of a component auditor, no reference should be made to the component auditor in the auditor's report on the group financial statements. (Ref: par. .A62) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Materiality

.32 The group engagement team should determine the following: (Ref: par. .A63)

a. Materiality, including performance materiality, for the group financial statements as a whole when establishing the overall group audit strategy.[10]

b. Whether, in the specific circumstances of the group, particular classes of transactions, account balances, or disclosures in the group financial statements exist for which there is a substantial likelihood that misstatements of lesser amounts than materiality for the group financial statements as a whole would influence the judgment made by a reasonable user based on the group financial statements. In such circumstances, the group engagement team should determine materiality to be applied to those particular classes of transactions, account balances, or disclosures.

c. Component materiality for those components on which the group engagement team will perform, or for which the auditor of the group financial statements will assume responsibility for the work of a component auditor who performs, an audit or a review. Component materiality should be determined taking into account all components, regardless of whether reference is made in the auditor's report on the group financial statements to the audit of a component auditor. To reduce the risk that the aggregate of uncorrected and undetected misstatements in the group financial statements exceeds the materiality for the group financial statements as a whole, component materiality should be lower than the materiality for the group financial statements as a whole, and component performance materiality should be lower than performance materiality for the group financial statements as a whole. (Ref: par. .A64–.A66)

d. The threshold above which misstatements cannot be regarded as clearly trivial to the group financial statements. (Ref: par. .A67)

See paragraph .51 for additional requirements that apply when the auditor of the group financial statements is assuming responsibility for the work of a component auditor. [Paragraph renumbered and amended, effective for audits of group financial statements for periods ending on or after December 15, 2012, by SAS No. 127. As amended, effective for audits of group financial statements for periods ending on or after December 15, 2021, by SAS No. 138.]

Responding to Assessed Risks

.33 The auditor is required to design and implement appropriate responses to address the assessed risks of material misstatement of the financial statements.[11] If the nature, timing, and extent of the work to be performed on the consolidation process or the financial information of the components is based on an expectation that group-wide controls

[10]See section 320, *Materiality in Planning and Performing an Audit*.

[11]See section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

are operating effectively or when substantive procedures alone cannot provide sufficient appropriate audit evidence at the assertion level, the group engagement team should test, or have a component auditor test on the group engagement team's behalf, the operating effectiveness of those controls. See paragraphs .52–.58 for additional requirements that apply when the auditor of the group financial statements is assuming responsibility for the work of a component auditor. (Ref: par. .A68) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Consolidation Process

.34 In accordance with paragraph .20, the group engagement team obtains an understanding of group-wide controls and the consolidation process, including the instructions issued by group management to components. In accordance with paragraph .33, the group engagement team, or component auditor at the request of the group engagement team, tests the operating effectiveness of group-wide controls if the nature, timing, and extent of the work to be performed on the consolidation process are based on an expectation that group-wide controls are operating effectively or when substantive procedures alone cannot provide sufficient appropriate audit evidence at the assertion level. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.35 The group engagement team should design and perform further audit procedures on the consolidation process to respond to the assessed risks of material misstatement of the group financial statements arising from the consolidation process. This should include evaluating whether all components have been included in the group financial statements. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.36 The group engagement team should evaluate the appropriateness, completeness, and accuracy of consolidation adjustments and reclassifications and should evaluate whether any fraud risk factors or indicators of possible management bias exist. (Ref: par. .A69) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.37 If the financial information of a component has not been prepared in accordance with the same accounting policies applied to the group financial statements, the group engagement team should evaluate whether the financial information of that component has been appropriately adjusted for purposes of the preparation and fair presentation of the group financial statements in accordance with the applicable financial reporting framework. (Ref: par. .A57) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.38 The group engagement team should determine whether the financial information identified in a component auditor's communication (see paragraph .42*b*) is the financial information that is incorporated in the group financial statements. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.39 If the group financial statements include the financial statements of a component with a financial reporting period-end that differs from that of the group, the group engagement team should evaluate whether appropriate adjustments have been made to those financial statements in accordance with the applicable financial reporting framework. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Subsequent Events

.40 When the group engagement team or component auditors perform audits on the financial information of components, the group engagement team or the component auditors should perform procedures designed to identify events at those components that occur between the dates of the financial information of the components and the date of the auditor's report on the group financial statements and that may require adjustment to, or disclosure in, the group financial statements. See paragraph .59 for additional requirements that apply when the auditor of the group financial statements is assuming responsibility for the work of a component auditor. (Ref: par. .A70) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Communication With a Component Auditor

.41 The group engagement team should communicate its requirements to a component auditor on a timely basis. This communication should include the following:

a. A request that the component auditor, knowing the context in which the group engagement team will use the work of the component auditor, confirm that the component auditor will cooperate with the group engagement team.

b. The ethical requirements that are relevant to the group audit and, in particular, the independence requirements.

c. A list of related parties prepared by group management and any other related parties of which the group engagement team is aware, including the nature of the entity's relationships and transactions with those related parties. The group engagement team should request the component auditor to communicate on a timely basis related parties not previously identified by group management or the group engagement team. The group engagement team should identify such additional related parties to other component auditors.

d. Identified significant risks of material misstatement of the group financial statements, due to fraud or error, that are relevant to the work of the component auditor.

[Paragraph renumbered by the issuance of SAS No. 127, January 2013. As amended, effective for audits of group financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

.42 The group engagement team should request a component auditor to communicate matters relevant to the group engagement team's conclusion, with regard to the group audit. Such communication should include the following:

a. Whether the component auditor has complied with ethical requirements relevant to the group audit, including independence and professional competence

b. Identification of the financial information of the component on which the component auditor is reporting

c. The component auditor's overall findings, conclusions, or opinion

See paragraphs .60–.61 for additional requirements that apply when the auditor of the group financial statements is assuming responsibility for the work of a component auditor. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Evaluating the Sufficiency and Appropriateness of Audit Evidence Obtained

Evaluating a Component Auditor's Communication and Adequacy of Their Work

.43 The group engagement team should evaluate a component auditor's communication (see paragraph .42). The group engagement team should discuss significant findings and issues arising from that evaluation with the component auditor, component management, or group management, as appropriate. See paragraphs .60–.63 for additional requirements that apply when the auditor of the group financial statements is assuming responsibility for the work of a component auditor. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Sufficiency and Appropriateness of Audit Evidence

.44 The auditor is required to obtain sufficient appropriate audit evidence on which to base the audit opinion.[12] The group engagement team should evaluate whether sufficient appropriate audit evidence on which to base the group audit opinion has been obtained from the audit procedures performed on the consolidation process and the work performed by the group engagement team and the component auditors on the financial information of the components. (Ref: par. .A71) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.45 The group engagement partner should evaluate the effect on the group audit opinion of any uncorrected misstatements (either identified by the group engagement team or communicated by component auditors) and any instances in which there has been an inability to obtain sufficient appropriate audit evidence. (Ref: par. .A72) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Communication With Group Management and Those Charged With Governance of the Group

Communication With Group Management and Those Charged With Governance

.46 The group engagement team should communicate to group management and those charged with governance of the group material weaknesses and significant deficiencies in internal control that are relevant to the group (either identified by the group engagement team or brought to its attention by a component auditor during the audit), in accordance with section 265, *Communicating Internal Control Related Matters Identified in an Audit*. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

[12] Paragraph .19 of section 200.

.47 If fraud has been identified by the group engagement team or brought to its attention by a component auditor or information indicates that a fraud may exist, the group engagement team should communicate this on a timely basis to the appropriate level of group management in order to inform those with primary responsibility for the prevention and detection of fraud of matters relevant to their responsibilities. (Ref: par. .A73) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.48 When a component auditor has been engaged to express an audit opinion on the financial statements of a component, the group engagement team should request group management to inform component management of any matter of which the group engagement team becomes aware that may be significant to the financial statements of the component, but of which component management may be unaware. If group management refuses to communicate the matter to component management, the group engagement team should discuss the matter with those charged with governance of the group. If the matter remains unresolved, the group engagement team, subject to legal and professional confidentiality considerations, should consider whether to advise the component auditor not to issue the auditor's report on the financial statements of the component until the matter is resolved and whether to withdraw from the engagement. (Ref: par. .A74) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Communication With Those Charged With Governance of the Group

.49 The group engagement team should communicate the following matters with those charged with governance of the group, in addition to those required by section 260, *The Auditor's Communication With Those Charged With Governance*, and other AU-C sections: (Ref: par. .A75)

a. An overview of the type of work to be performed on the financial information of the components, including the basis for the decision to make reference to the audit of a component auditor in the auditor's report on the group financial statements

b. An overview of the nature of the group engagement team's planned involvement in the work to be performed by the component auditors on the financial information of significant components

c. Instances in which the group engagement team's evaluation of the work of a component auditor gave rise to a concern about the quality of that auditor's work

d. Any limitations on the group audit (for example, when the group engagement team's access to information may have been restricted)

e. Fraud or suspected fraud involving group management, component management, employees who have significant roles in group-wide controls, or others in which a material misstatement of the group financial statements has or may have resulted from fraud

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Documentation

.50 The group engagement team should include in the audit documentation the following:[13]

a. An analysis of components indicating those that are significant and the type of work performed on the financial information of the components

b. Those components for which reference to the reports of component auditors is made in the auditor's report on the group financial statements

c. Written communications between the group engagement team and the component auditors about the group engagement team's requirements

d. For those components for which reference is made in the auditor's report on the group financial statements to the audit of a component auditor

   i. the financial statements of the component and the report of the component auditor thereon

   ii. when the component auditor's report on the component's financial statements does not state that the audit of the component's financial statements was performed in accordance with GAAS or the standards promulgated by the PCAOB, the basis for the group engagement partner's determination that the audit performed by the component auditor met the relevant requirements of GAAS

See paragraph .65 for additional requirements that apply when the auditor of the group financial statements is assuming responsibility for the work of a component auditor. [Paragraph renumbered and amended, effective for audits of group financial statements for periods ending on or after December 15, 2012, by SAS No. 127.]

Additional Requirements Applicable When Assuming Responsibility for the Work of a Component Auditor

Materiality (See paragraph .32)

.51 In the case of an audit of the financial information of a component in which the auditor of the group financial statements is assuming responsibility for the component auditor's work, the group engagement team should evaluate the appropriateness of performance materiality at the component level. (Ref: par. .A76–.A77) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Determining the Type of Work to Be Performed on the Financial Information of Components (See paragraph .33)

.52 For components for which the auditor of the group financial statements is assuming responsibility for the work of component auditors, the group engagement team should

[13]Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*.

determine the type of work to be performed by the group engagement team or by component auditors on its behalf on the financial information of the components (see paragraphs .53–.56). The group engagement team also should determine the nature, timing, and extent of its involvement in the work of component auditors. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Significant Components

.53 For a component that is significant due to its individual financial significance to the group, the group engagement team, or a component auditor on its behalf, should perform an audit of the financial information of the component, adapted as necessary to meet the needs of the group engagement team, using component materiality. (Ref: par. .A78) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.54 For a component that is significant not due to its individual financial significance but because it is likely to include significant risks of material misstatement of the group financial statements due to its specific nature or circumstances, the group engagement team, or a component auditor on its behalf, should perform one or more of the following: (Ref: par. .A79)

a. An audit, adapted as necessary to meet the needs of the group engagement team, of the financial information of the component, using component materiality
b. An audit, adapted as necessary to meet the needs of the group engagement team, of one or more account balances, classes of transactions, or disclosures relating to the likely significant risks of material misstatement of the group financial statements (Ref: par. .A80)
c. Specified audit procedures relating to the likely significant risks of material misstatement of the group financial statements (Ref: par. .A81)

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Components That Are Not Significant Components

.55 For components that are not significant components, the group engagement team should perform analytical procedures at the group level. (Ref: par. .A82) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.56 In some circumstances, the group engagement team may determine that sufficient appropriate audit evidence on which to base the group audit opinion will not be obtained from the following:

a. The work performed on the financial information of significant components
b. The work performed on group-wide controls and the consolidation process
c. The analytical procedures performed at group level

In such circumstances, the group engagement team should select additional components that are not significant components and should perform or request a component auditor to perform one or more of the following on the financial information of the individual components selected: (Ref: par. .A83–.A86)

- An audit, adapted as necessary to meet the needs of the group engagement team, of the financial information of the component, using component materiality
- An audit, adapted as necessary to meet the needs of the group engagement team, of one or more account balances, classes of transactions, or disclosures
- A review of the financial information of the component, adapted as necessary to meet the needs of the group engagement team, using component materiality
- Specified audit procedures

The group engagement team should vary the selection of such individual components over a period of time. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Involvement in the Work Performed by Component Auditors (Ref: par. .A87–.A88)

Significant Components — Risk Assessment

.57 When a component auditor performs an audit or other specified audit procedures of the financial information of a significant component for which the auditor of the group financial statements is assuming responsibility for the component auditor's work, the group engagement team should be involved in the risk assessment of the component to identify significant risks of material misstatement of the group financial statements. The nature, timing, and extent of this involvement are affected by the group engagement team's understanding of the component auditor but, at a minimum, should include the following:

a. Discussing with the component auditor or component management the component's business activities of significance to the group.
b. Discussing with the component auditor the susceptibility of the component to material misstatement of the financial information due to fraud or error.
c. Reviewing the component auditor's documentation of identified significant risks of material misstatement of the group financial statements. Such documentation may take the form of a memorandum that reflects the component auditor's conclusion with regard to the identified significant risks.

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Identified Significant Risks of Material Misstatement of the Group Financial Statements — Further Audit Procedures

.58 When significant risks of material misstatement of the group financial statements have been identified in a component for which the auditor of the group financial statements is assuming responsibility for the work of a component auditor, the group engagement team should evaluate the appropriateness of the further audit procedures to be performed to respond to the identified significant risks of material misstatement of the group financial statements. Based on its understanding of the component auditor, the group engagement team should determine whether it is necessary to be involved in the further audit procedures. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Subsequent Events (See paragraph .40)

.59 When component auditors perform work other than audits of the financial information of components at the request of the group engagement team, the group engagement team should request the component auditors to notify the group engagement team if they become aware of events at those components that occur between the dates of the financial information of the components and the date of the auditor's report on the group financial statements that may require an adjustment to, or disclosure in, the group financial statements. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Communication With a Component Auditor (See paragraph .42)

.60 When the auditor of the group financial statements is assuming responsibility for the work of a component auditor, the communication required in paragraph .41 should set out the work to be performed and the form and content of the component auditor's communication with the group engagement team. It also should include, in the case of an audit or review of the financial information of the component, component materiality (and the amount or amounts lower than the materiality for particular classes of transactions, account balances, or disclosures, if applicable) and the threshold above which misstatements cannot be regarded as clearly trivial to the group financial statements. (Ref: par. .A89–.A92) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.61 When the auditor of the group financial statements is assuming responsibility for the work of a component auditor, the communication requested from the component auditor, as required in paragraph .42, also should include the following:

a. Whether the component auditor has complied with the group engagement team's requirements.

b. Information on instances of noncompliance with laws or regulations at the component or group level that could give rise to a material misstatement of the group financial statements.

c. Significant risks of material misstatement of the group financial statements, due to fraud or error, identified by the component auditor in the component and the component auditor's responses to such risks. The group engagement team should request the component auditor to communicate such significant risks on a timely basis.

d. A list of corrected and uncorrected misstatements of the financial information of the component (the list need not include misstatements that are below the threshold for clearly trivial misstatements communicated by the group engagement team).

e. Indicators of possible management bias regarding accounting estimates and the application of accounting principles.

f. Description of any identified material weaknesses and significant deficiencies in internal control at the component level.

g. Other significant findings and issues that the component auditor communicated or expects to communicate to those charged with governance of the component, including fraud or suspected fraud involving component management, employees who have significant roles in internal control at the component level, or others that resulted in a material misstatement of the financial information of the component.

h. Any other matters that may be relevant to the group audit or that the component auditor wishes to draw to the attention of the group engagement team, including exceptions noted in the written representations that the component auditor requested from component management.

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Evaluating a Component Auditor's Communication and Adequacy of Their Work (See paragraph .43)

.62 The group engagement team should determine, based on the evaluation required in paragraph .43, whether it is necessary to review other relevant parts of a component auditor's audit documentation. (Ref: par. .A93) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.63 If the group engagement team concludes that the work of a component auditor is insufficient, the group engagement team should determine additional procedures to be performed and whether they are to be performed by the component auditor or by the group engagement team. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Communication With Group Management and Those Charged With Governance of the Group (See paragraphs .46–.49)

.64 The group engagement team should determine which material weaknesses and significant deficiencies in internal control that component auditors have brought to the attention of the group engagement team should be communicated to group management and those charged with governance of the group. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Documentation (See paragraph .50)

.65 The group engagement team should include in the audit documentation the nature, timing, and extent of the group engagement team's involvement in the work performed by the component auditors on significant components, including, when applicable, the group engagement team's review of relevant parts of the component auditors' audit documentation and conclusions thereon. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Application and Other Explanatory Material

Definitions

Component (Ref: par. .11)

.A1 The structure of a group affects how components are identified. For example, the group financial reporting system may be based on an organizational structure that provides for financial information to be prepared by a parent and one or more subsidiaries, joint ventures, or investees accounted for by the equity or cost methods of accounting; by a head office and one or more divisions or branches; or by a combination of both. Some groups, however, may organize their financial reporting system by function, process, product or service (or by groups of products or services), or geographical locations. In these cases, the entity or business activity for which group or component management prepares financial information that is included in the group financial statements may be a function, process, product or service (or group of products or services), or geographical location.

.A2 An investment accounted for under the equity method constitutes a component for purposes of this section. Investments accounted for under the cost method may be analogous to a component for purposes of this section when the work and reports of other auditors constitute a major element of evidence for such investments.

.A3 Various levels of components may exist within the group financial reporting system, in which case it may be more appropriate to identify components at certain levels of aggregation rather than individually.

.A4 Components aggregated at a certain level may constitute a component for purposes of the group audit; however, such a component also may prepare group financial statements that incorporate the financial information of the components it encompasses (that is, a subgroup). This section may, therefore, be applied by different group engagement partners and teams for different subgroups within a larger group.

Considerations Specific to Audits of Governmental Entities

.A5 In audits of state and local governments, a component may be a separate legal entity reported as a component unit or part of the governmental entity, such as a business activity, department, or program.

Significant Component (Ref: par. .11)

.A6 As the individual financial significance of a component increases, the risks of material misstatement of the group financial statements ordinarily increase. The group engagement team may apply a percentage to a chosen benchmark as an aid to identify components that are of individual financial significance. Identifying a benchmark and determining a percentage to be applied to it involve the exercise of professional judgment. Depending on the nature and circumstances of the group, appropriate benchmarks might include group assets, liabilities, cash flows, revenues, expenditures, or net income. For example, the group engagement team may consider that components exceeding a specified percentage of the chosen benchmark are significant components.

.A7 The group engagement team also may identify a component as likely to include significant risks of material misstatement of the group financial statements due to its specific nature or circumstances.[14] For example, a component could be responsible for foreign exchange trading and, thus, expose the group to a significant risk of material misstatement, even though the component is not otherwise of individual financial significance to the group. [As amended, effective for audits of group financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Considerations Specific to Governmental Entities

.A8 In audits of governmental entities, appropriate quantitative benchmarks for identifying significant components might include net costs or total budget. Qualitative considerations in audits of governmental entities may involve matters of heightened public sensitivity, such as national security issues, donor funded projects, or reporting of tax revenue.

Component Auditor (Ref: par. .11)

.A9 For purposes of this section, auditors who do not meet the definition of a member of the group engagement team are considered to be component auditors. However, an auditor who performs work on a component when the group engagement team will not use that work to provide audit evidence for the group audit is not considered a component auditor.

.A10 When two or more component auditors exist, the provisions of this section are applicable to each component auditor.

.A11 A member of the group engagement team may perform work on the financial information of a component for the group audit at the request of the group engagement team. When this is the case, such a member of the group engagement team also is a component auditor.

Consolidation Process (Ref: par. .12)

Considerations Specific to Governmental Entities

.A12 In audits of state and local governments, the applicable financial reporting framework may be based on multiple reporting units. Therefore, the consolidation process may involve the inclusion, but separate presentation, of the financial statements of each reporting unit in the governmental entity.

Responsibility (Ref: par. .13)

.A13 Component auditors may perform work on the financial information of the components for the group audit and, as such, are responsible for their overall findings, conclusions, or opinions. However, regardless of whether reference is made in the auditor's report on the group financial statements to the report of a component auditor, the auditor of the group financial statements is responsible for the group audit opinion.

[14] [Footnote deleted by the issuance of SAS No. 145, October 2021.]

Considerations Specific to Governmental Entities

.A14 When the auditor of the group financial statements is engaged to express opinions on both the group financial statements and the separate financial statements of the components presented in the group financial statements, the auditor's reporting responsibilities with respect to the separate financial statements are the same as the auditor's responsibilities with respect to the group financial statements.

Acceptance and Continuance

Obtaining an Understanding at the Acceptance or Continuance Stage (Ref: par. .14)

.A15 In the case of a new engagement, the group engagement team's understanding of the group, its components, and their environments may be obtained from the following:

- Information provided by group management
- Communication with group management
- When applicable, communication with the previous group engagement team, component management, or component auditors

.A16 The group engagement team's understanding may include matters such as the following:

- The group structure, including both the legal and organizational structure (that is, how the group financial reporting system is organized)
- Components' business activities that are significant to the group, including the industry and regulatory, economic, and political environments in which those activities take place
- The use of service organizations, including shared service centers
- A description of group-wide controls
- The complexity of the consolidation process
- Whether component auditors that are not from the group engagement partner's firm or network will perform work on the financial information of any of the components and group management's rationale for engaging more than one auditor, if applicable
- Whether the group engagement team
    - — will have unrestricted access to those charged with governance of the group, group management, those charged with governance of the component, component management, component information, and the component auditors (including relevant audit documentation sought by the group engagement team)
    - — will be able to perform necessary work on the financial information of the components

.A17 In the case of a continuing engagement, the group engagement team's ability to obtain sufficient appropriate audit evidence may be affected by significant changes, such as the following:

- Changes in the group structure (for example, acquisitions, disposals, reorganizations, or changes in how the group financial reporting system is organized)
- Changes in components' business activities that are significant to the group
- Changes in the composition of those charged with governance of the group, group management, or key management of significant components
- Concerns the group engagement team has with regard to the integrity and competence of group or component management
- Changes in group-wide controls
- Changes in the applicable financial reporting framework

Expectation to Obtain Sufficient Appropriate Audit Evidence (Ref: par. .15)

.A18 Relevant factors in determining whether to act as the auditor of the group financial statements include, among other things, the following:

- The individual financial significance of the components, as determined in accordance with the guidance in paragraph .A6, for which the auditor of the group financial statements will be assuming responsibility
- The extent to which significant risks of material misstatement of the group financial statements are included in the components for which the auditor of the group financial statements will be assuming responsibility
- The extent of the group engagement team's knowledge of the overall financial statements

.A19 A group may consist only of components not considered significant components. In these circumstances, the group engagement partner can reasonably expect to obtain sufficient appropriate audit evidence on which to base the group audit opinion if the group engagement team will be able to

a. perform the work on the financial information of some of these components.

b. use the work performed by component auditors on the financial information of other components to the extent necessary to obtain sufficient appropriate audit evidence.

.A20 When the auditor of the group financial statements is assuming responsibility for the work performed by a component auditor, the group engagement team is required by the provisions of this section to be involved in the work of the component auditor. Paragraph .27 describes the procedures to be followed to obtain sufficient appropriate audit evidence when the group engagement partner decides to make reference in the auditor's report on the group financial statements to the audit of a component auditor.

Considerations Specific to Governmental Entities

.A21 Additional factors in determining whether to act as the auditor of the group financial statements in audits of state and local governments include, the following:

- Engagement by the primary government as the auditor of the financial reporting entity
- Responsibility for auditing the primary government's general fund (or other primary operating fund)

Access to Information (Ref: par. .16)

.A22 The group engagement team's access to information may be restricted by group management, or it may be restricted by circumstances that cannot be overcome by group management (for example, laws relating to confidentiality and data privacy or denial by a component auditor of access to relevant audit documentation sought by the group engagement team).

.A23 When access to information is restricted by circumstances, the group engagement team may still be able to obtain sufficient appropriate audit evidence; however, this is less likely as the significance of the component increases. For example, the group engagement team may not have access to those charged with governance, management, or the auditor (including relevant audit documentation sought by the group engagement team) of a component that is accounted for by the equity method of accounting. If the component is not a significant component and the group engagement team has a complete set of financial statements of the component, including the auditor's report thereon, and has access to information kept by group management regarding that component, the group engagement team may conclude that this information constitutes sufficient appropriate audit evidence regarding that component. If the component is a significant component, however, and the auditor of the group financial statements is not making reference to the audit of a component auditor in the auditor's report on the group financial statements, then the group engagement team will not be able to comply with the requirements of this section that are relevant in the circumstances of the group audit. For example, the group engagement team will not be able to comply with the requirement in paragraphs .57–.58 to be involved in the work of a component auditor. Therefore, the group engagement team will not be able to obtain sufficient appropriate audit evidence regarding that component. The effect on the auditor's report of the group engagement team's inability to obtain sufficient appropriate audit evidence is considered in terms of section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

.A24 The group engagement team will not be able to obtain sufficient appropriate audit evidence if group management restricts the access of the group engagement team or a component auditor to the information of a significant component.

.A25 Although the group engagement team may be able to obtain sufficient appropriate audit evidence if such restriction relates to a component considered not a significant component, the reason for the restriction may affect the group audit opinion. For example, it may affect the reliability of group management's responses to the group engagement team's inquiries and group management's representations to the group engagement team.

.A26 Section 210A addresses circumstances when an entity is required by law or regulation to have an audit.[15] In these circumstances, this section still applies to the group audit, and the effect of the group engagement team's inability to obtain sufficient appropriate audit evidence is considered in terms of section 705.

.A27 Exhibit A, "Illustrations of Auditor's Reports on Group Financial Statements," contains an example of an auditor's report containing a qualified opinion based on the group engagement team's inability to obtain sufficient appropriate audit evidence regarding a significant component accounted for by the equity method of accounting when, in the group engagement team's professional judgment, the effect is material but not pervasive.

Terms of Engagement (Ref: par. .17)

.A28 The terms of engagement identify the applicable financial reporting framework.[16] Additional matters that may be included in the terms of a group audit engagement include whether reference will be made to the audit of a component auditor in the auditor's report on the group financial statements, when relevant, or arrangements to facilitate the following:

- Unrestricted communication between the group engagement team and component auditors to the extent permitted by law or regulation
- Communication to the group engagement team of important communications between
  - — the component auditors, those charged with governance of the component, and component management, including communications on significant deficiencies and material weaknesses in internal control
  - — regulatory authorities and components related to financial reporting matters
- To the extent the group engagement team considers necessary
  - — access to component information, those charged with governance of components, component management, and the component auditors (including relevant audit documentation sought by the group engagement team)
  - — permission to perform work, or request a component auditor to perform work, on the financial information of the components

.A29 Certain restrictions imposed after acceptance of the group audit engagement result in an inability to obtain sufficient appropriate audit evidence that may affect the group audit opinion including, specifically, restrictions imposed on the following:

---

[15] Paragraphs .07 and .A19 of section 210A.

[16] Paragraph .10 of section 210A.

- The group engagement team's access to component information, those charged with governance of components, component management, or the component auditors (including relevant audit documentation sought by the group engagement team)
- The work to be performed on the financial information of the components

These restrictions may even lead to withdrawal from the engagement unless that is not possible under law or regulation. Section 705 addresses the auditor's responsibilities when management has imposed a limitation on the scope of the audit after the auditor has accepted the engagement.[17]

Overall Audit Strategy and Audit Plan (Ref: par. .19)

.A30 The group engagement partner's review of the overall group audit strategy and group audit plan is an important part of fulfilling the group engagement partner's responsibility for the direction of the group audit engagement.

Understanding the Group, Its Components, and Their Environments

Matters About Which the Group Engagement Team Obtains an Understanding (Ref: par. .20)

.A31 Section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, contains guidance on matters the auditor may consider when obtaining an understanding of the industry, regulatory, and other external factors that affect the entity, including the applicable financial reporting framework; the nature of the entity; objectives and strategies and related business risks; and measurement and review of the entity's financial performance.[18]Appendix A, "Understanding the Group, Its Components, and Their Environments — Examples of Matters About Which the Group Engagement Team Obtains an Understanding," of this section contains guidance on matters specific to a group, including the consolidation process.

Instructions Issued by Group Management to Components (Ref: par. .20)

.A32 To achieve uniformity and comparability of financial information, group management ordinarily issues instructions to components. Such instructions specify the requirements for financial information of the components to be included in the group financial statements and often include financial reporting procedures manuals and a reporting package. A reporting package ordinarily consists of standard formats for providing financial information for incorporation in the group financial statements. Reporting packages generally do not, however, take the form of complete financial statements prepared and presented in accordance with the applicable financial reporting framework.

.A33 The instructions ordinarily cover the following:

[17] Paragraphs .11–.14 and .A15–.A16 of section 705.

[18] Paragraphs .A17–.A41 of section 315A.

- The accounting policies to be applied
- Statutory and other disclosure requirements applicable to the group financial statements, including the following:
  - — The identification and reporting of segments
  - — Related party relationships and transactions
  - — Intragroup transactions and unrealized profits or losses
  - — Intragroup account balances
- A reporting timetable

.A34 The group engagement team's understanding of the instructions may include the following:

- The clarity and practicality of the instructions for completing the reporting package
- Whether the instructions
  - — adequately describe the characteristics of the applicable financial reporting framework
  - — provide for disclosures that are sufficient to comply with the requirements of the applicable financial reporting framework (for example, disclosure of related party relationships, related party transactions, and segment information)
  - — provide for the identification of consolidation adjustments (for example, intragroup account balances, transactions, and unrealized profits or losses)
  - — provide for the approval of the financial information by component management

Fraud (Ref: par. .20)

.A35 The auditor is required to identify and assess the risks of material misstatement of the financial statements due to fraud and to design and implement appropriate responses to the assessed risks.[19] Information used to identify the risks of material misstatement of the group financial statements due to fraud may include the following:

- Group management's assessment of the risks that the group financial statements may be materially misstated as a result of fraud
- Group management's process for identifying and responding to the risks of fraud in the group, including any specific fraud risks identified by group management or account balances, classes of transactions, or disclosures for which a risk of fraud is likely
- Whether particular components exist for which a risk of fraud is likely

---

[19]See section 240, *Consideration of Fraud in a Financial Statement Audit*.

- How those charged with governance of the group monitor group management's processes for identifying and responding to the risks of fraud in the group and the controls group management has established to mitigate these risks
- Responses of those charged with governance of the group, group management, appropriate individuals within the internal audit function (and, if considered appropriate, component management, the component auditors, and others) to the group engagement team's inquiry whether they have knowledge of any actual, suspected, or alleged fraud affecting a component or the group

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2014, by SAS No. 128.]

Discussion Among Group Engagement Team Members and Component Auditors Regarding the Risks of Material Misstatement of the Group Financial Statements, Including Risks of Fraud (Ref: par. .20)

.A36 The key members of the engagement team are required to discuss the susceptibility of an entity to material misstatement of the financial statements due to fraud or error, specifically emphasizing the risks due to fraud. In a group audit, these discussions also may include the component auditors.[20,21] The group engagement partner's determination of who to include in the discussions, how and when they occur, and their extent is affected by factors, such as prior experience with the group.

.A37 The discussions provide an opportunity to

- share knowledge of the components and their environments, including group-wide controls.
- exchange information about the business risks of the components or the group.
- exchange ideas about how and where the group financial statements may be susceptible to material misstatement due to fraud or error; how group management and component management could perpetrate and conceal fraudulent financial reporting; and how assets of the components could be misappropriated.
- identify practices followed by group or component management that may be biased or designed to manage earnings that could lead to fraudulent financial reporting (for example, revenue recognition practices that do not comply with the applicable financial reporting framework).
- consider known external and internal factors affecting the group that may create an incentive or pressure for group management, component management, or others to commit fraud; provide the opportunity for fraud to be perpetrated; or indicate a culture or environment that enables group management, component management, or others to rationalize committing fraud.

---

[20]Paragraph .15 of section 240.

[21]Paragraph .11 of section 315A.

- consider the risk that group or component management may override controls.
- consider whether uniform accounting policies are used to prepare the financial information of the components for the group financial statements and, if not, how differences in accounting policies are identified and adjusted (when required by the applicable financial reporting framework).
- discuss fraud that has been identified in components or information that indicates the existence of a fraud in a component.
- share information that may indicate noncompliance with laws or regulations (for example, payments of bribes and improper transfer pricing practices).

Risk Factors (Ref: par. .21)

.A38 Appendix B, "Examples of Conditions or Events That May Indicate Risks of Material Misstatement of the Group Financial Statements," sets out examples of conditions or events that, individually or together, may indicate risks of material misstatement of the group financial statements, including risks due to fraud.

Risk Assessment (Ref: par. .21)

.A39 The group engagement team's assessment at group level of the risks of material misstatement of the group financial statements is based on information, such as the following:

- Information obtained from the understanding of the group, its components, and their environments and of the consolidation process, including audit evidence obtained in evaluating the design and implementation of group-wide controls and controls that are relevant to the consolidation
- Information obtained from the component auditors

Understanding a Component Auditor (Ref: par. .22)

Group Engagement Team's Procedures to Obtain an Understanding of a Component Auditor and Sources of Audit Evidence (Ref: par. .22)

.A40 Factors that may affect the group engagement partner's decisions whether to use the work of a component auditor to provide audit evidence for the group audit and whether to make reference to the audit of a component auditor in the auditor's report on the group financial statements include the following:

- Differences in the financial reporting framework applied in preparing the financial statements of the component and that applied in preparing the group financial statements
- Whether the audit of the financial statements of the component will be completed in time to meet the group reporting timetable

- Differences in the auditing and other standards applied by the component auditor and those applied in the audit of the group financial statements
- Whether it is impracticable for the group engagement team to be involved in the work of a component auditor

.A41 It will not be necessary to obtain an understanding of the auditors of those components for which the group engagement team plans to perform analytical procedures at group level only.

.A42 The nature, timing, and extent of the group engagement team's procedures to obtain an understanding of a component auditor are affected by factors, such as previous experience with, or knowledge of, the component auditor and the degree to which the group engagement team and the component auditor are subject to common policies and procedures, such as the following:

- Whether the group engagement team and a component auditor share the following:
  - — Common policies and procedures for performing the work (for example, audit methodologies)
  - — Common quality control policies and procedures
  - — Common monitoring policies and procedures
- The consistency or similarity of the following:
  - — Laws and regulations or legal system
  - — Professional oversight, discipline, and external quality assurance
  - — Education and training
  - — Professional organizations and standards
  - — Language and culture

.A43 These factors interact and are not mutually exclusive. For example, the extent of the group engagement team's procedures to obtain an understanding of component auditor A, who consistently applies common quality control and monitoring policies and procedures and a common audit methodology or operates in the same jurisdiction as the auditor of the group financial statements, may be less than the extent of the group engagement team's procedures to obtain an understanding of component auditor B, who does not consistently apply common quality control and monitoring policies and procedures and a common audit methodology or operates in a different jurisdiction. The nature of the procedures performed regarding component auditors A and B also may be different.

.A44 The group engagement team may obtain an understanding of a component auditor in a number of ways. In the first year of involving a component auditor, the group engagement team may, for example

- determine through communication with a component auditor that
  - — the component auditor is aware that
    - the financial statements of the component are to be included in the group financial statements on which the auditor of the group financial statements will report.
    - the component auditor's report thereon will be relied upon by the auditor of the group financial statements.
    - either the auditor of the group financial statements will make reference to the component auditor's report in the opinion on the group financial statements or the group engagement team will be involved in the work of the component auditor.
- a review will be made of matters affecting elimination of intercompany transactions and accounts and, if appropriate in the circumstances, the uniformity of accounting practices among the components included in the financial statements.
- evaluate the results of the quality control monitoring system when the group engagement team and component auditor are from a firm or network that operates under, and complies with, common monitoring policies and procedures.[22]
- visit a component auditor to discuss the matters in paragraph .22*a–d*.
- request a component auditor to confirm the matters referred to in paragraph .22*a–d* in writing. Exhibit B, "Illustrative Component Auditor's Confirmation Letter," contains an example of written confirmations by a component auditor.
- request a component auditor to complete questionnaires about the matters in paragraph .22*a–d*.
- discuss a component auditor with colleagues in the group engagement partner's firm or with a reputable third party that has knowledge of the component auditor, such as other practitioners or bankers and other credit grantors.

In subsequent years, the understanding of a component auditor may be based on the group engagement team's previous experience with that component auditor. The group engagement team may request the component auditor to confirm whether anything regarding the matters listed in paragraph .22*a–d* has changed since the previous year.

.A45 Where independent oversight bodies have been established to oversee the auditing profession and monitor the quality of audits, awareness of the regulatory environment may assist the group engagement team in evaluating the independence and competence of a component auditor. Information about the regulatory environment and the public results of any inspections performed by oversight bodies may be obtained from the component auditor or information provided by the independent oversight bodies.

[22]Paragraph .57 of QM section 10A, *A Firm's System of Quality Control*.

Ethical Requirements That Are Relevant to the Group Audit (Ref: par. .22a)

.A46 When performing work on the financial information of a component for a group audit, the component auditor is subject to ethical requirements that are relevant to the group audit. Such requirements may be different or in addition to those applying to the component auditor when performing an audit in the component auditor's jurisdiction. The group engagement team, therefore, obtains an understanding about the component auditor's understanding of, and compliance with, the ethical requirements that are relevant to the group audit and whether that is sufficient to fulfill the component auditor's responsibilities in the group audit. When the component auditor is not subject to the AICPA Code of Professional Conduct, compliance by the component auditor with the ethics and independence requirements set forth in the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants (including International Independence Standards)* is sufficient to fulfill the component auditor's ethical responsibilities in the group audit.[23] [Revised, October 2023, to reflect the updated title of the IESBA Code of Ethics for Professional Accountants.]

A Component Auditor's Professional Competence (Ref: par. .22b)

.A47 Inquiries about the professional reputation and standing of a component auditor may be made of the AICPA, the state board of accountancy by which the component auditor is licensed, the applicable state society of CPAs, or the local chapter, or, in the case of an auditor from a foreign jurisdiction, the corresponding professional organization, and if applicable, the PCAOB. The group engagement team may obtain the peer review report, if available, on the component auditor's firm. Exhibit C, "Sources of Information," provides information about specific inquires that may be directed to the AICPA.

.A48 The group engagement team's understanding of a component auditor's professional competence may include whether the component auditor

- possesses an understanding of the auditing and other standards applicable to the group audit, such as U.S. GAAS, that is sufficient to fulfill the component auditor's responsibilities.
- possesses the special skills (for example, industry-specific knowledge or knowledge of relevant financial reporting requirements for statements and schedules to be filed with regulatory agencies) necessary to perform the work on the financial information of the particular component.
- when relevant, possesses an understanding of the applicable financial reporting framework that is sufficient to fulfill the component auditor's responsibilities in the

---

[23]ET section 0.200.020, *Application of the AICPA Code*, of the AICPA Code of Professional Conduct explains that an AICPA member who is the group engagement partner of a U.S. consolidated entity should be considered to have performed an audit in accordance with generally accepted auditing standards, and in compliance with the AICPA Code of Professional Conduct, provided that component auditors that are not subject to the AICPA Code are in compliance with the ethics and independence requirements set forth in the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants (including International Independence Standards)*. [Footnote revised, January 2015, to reflect conforming changes necessary due to the issuance of the revised AICPA Code of Professional Conduct, effective December 15, 2014. Footnote revised, October 2023, to reflect the updated title of the IESBA Code of Ethics for Professional Accountants.]

group audit (instructions issued by group management to components often describe the characteristics of the applicable financial reporting framework).

Application of the Group Engagement Team's Understanding of a Component Auditor (Ref: par. .23)

.A49 The group engagement team cannot overcome the fact that a component auditor is not independent by being involved in the work of the component auditor or by performing additional risk assessment or further audit procedures on the financial information of the component or by making reference in the auditor's report on the group financial statements to the audit of the component auditor.

.A50 However, the group engagement team may be able to overcome less than serious concerns about a component auditor's professional competency (for example, lack of industry-specific knowledge) or the fact that a component auditor does not operate in an environment that actively oversees auditors by being involved in the work of that component auditor or by performing additional risk assessment or further audit procedures on the financial information of the component.

.A51 When law or regulation prohibits access to relevant parts of the audit documentation of a component auditor, the group engagement team may request the component auditor to overcome this by preparing a memorandum that covers the relevant information.

Determining Whether to Make Reference to a Component Auditor in the Auditor's Report on the Group Financial Statements (Ref: par. .24)

.A52 In group audits involving two or more component auditors, the decision to make reference to the audit of a component auditor is made individually for each component auditor, regardless of the decision whether to refer to any other component auditor. The auditor of the group financial statements may make reference to any, all, or none of the component auditors. For example, if significant components are audited by a component auditor from a network firm and one component is audited by another firm, the group engagement partner may decide to assume responsibility for the work of the component auditor from the network firm and to make reference to the work of the component auditor from the other firm.

Determining Whether the Audit Was Conducted in Accordance With GAAS (Ref: par. .25a)

.A53 A component auditor's report stating that the audit was conducted in accordance with GAAS or, if applicable, the auditing standards promulgated by the PCAOB is sufficient to make the determination required by paragraph .25*a*. When the component auditor has performed an audit of the component financial statements in accordance with auditing standards other than GAAS or, if applicable, the auditing standards promulgated by the PCAOB, the group engagement partner may evaluate, exercising professional judgment, whether the audit performed by the component auditor meets the relevant requirements of GAAS. For the purposes of complying with paragraph .25*a*, relevant requirements of GAAS are those that pertain to planning and performing the audit of the component financial statements and do not include those related to the form of the auditor's report. Audits performed in accordance with International Standards on Auditing (ISAs) promulgated by the International Auditing and Assurance Standards Board (IAASB) are more likely to meet the relevant requirements of GAAS than audits performed in accordance with auditing standards promulgated by bodies other than the IAASB. The group engagement team may provide the component auditor with appendix B, *Substantive Differences Between the International Standards on Auditing and Generally Accepted Auditing Standards*, that identifies substantive requirements of GAAS that are not requirements in the ISAs. The component auditor may perform additional procedures in order to meet the relevant requirements of GAAS. The communication requested of the component auditor required by paragraph .42 may address whether the audit of the component auditor met the relevant requirements of GAAS. The group engagement partner, having determined that all relevant requirements of GAAS have been met by the component auditor, may decide to make reference to the audit of that component auditor in the auditor's report on the group financial statements. [Paragraph renumbered and amended, effective for audits of group financial statements for periods ending on or after December 15, 2012, by SAS No. 127.]

Determining Whether to Make Reference When the Financial Reporting Framework Is Not the Same (Ref: par. .26)

.A54 When the component's financial statements are prepared using a financial reporting framework that differs from the financial reporting framework used to prepare the group financial statements, the group engagement team is required by paragraph .37 to evaluate whether the financial information of the component has been appropriately adjusted for purposes of the preparation and fair presentation of the group financial statements in accordance with the applicable financial reporting framework. Evaluating whether the financial statements of the component have been appropriately adjusted to conform with the financial reporting framework used by the group is based on a depth of understanding of the component's financial statements that ordinarily is not obtained unless the auditor of the group financial statements assumes responsibility for, and, thus, is involved in, the work of the component auditor. In rare circumstances, however, the group engagement partner may conclude that the group engagement team can reasonably expect to obtain sufficient appropriate audit evidence for purposes of evaluating the appropriateness of the adjustments to convert the component's financial statements to the financial reporting framework used by the group without the need to assume responsibility for, and, thus, be involved in, the work of the component auditor. [Paragraph added, effective for audits of group financial statements for periods ending on or after December 15, 2012, by SAS No. 127.]

.A55 The greater the number of differences or the greater the significance of the differences between the criteria used for measurement, recognition, presentation, and disclosure of all material items in the component's financial statements under the financial reporting framework used by the component and the financial reporting framework used by the group, the less similar they are. Financial statements prepared and presented in accordance with International Financial Reporting Standards (IFRSs) and *International Financial Reporting Standard for Small and Medium-sized Entities*, as issued by the International Accounting Standards Board, are generally viewed as more similar to financial statements prepared and presented in accordance with accounting principles generally accepted in the United States of America (GAAP) than financial statements prepared and presented in accordance with jurisdiction-specific reporting frameworks or adaptations of IFRSs. In most cases, special purpose frameworks set forth in section 800, *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks*, are not similar to GAAP. [Paragraph added, effective for audits of group financial statements for periods ending on or after December 15, 2012, by SAS No. 127.]

.A56 Additional considerations in determining whether it may be appropriate to make reference to the audit of a component auditor in the auditor's report on the group financial statements when the component prepares financial statements using a different financial reporting framework than that used by the group include the

- effectiveness of groupwide controls and the adequacy of the consolidation process specifically related to the adjustments to convert the component's financial statements to the financial reporting framework used by the group, including the financial reporting competencies of personnel involved in the adjustments.
- depth of the group engagement team's understanding of the component and its environment, including the complexity of the events and transactions subject to the differing financial reporting requirements and the assessed risk of material misstatement related to the adjustments.
- extent of the group engagement team's knowledge of the financial reporting framework used to prepare the component financial statements.
- group engagement team's ability to obtain information from group or component management that is relevant to the adjustments.
- need and ability to seek, as necessary, the assistance of professionals possessing specialized skills or knowledge related to the adjustments.

[Paragraph added, effective for audits of group financial statements for periods ending on or after December 15, 2012, by SAS No. 127.]

Considerations for Governmental Entities

.A57 When the applicable financial reporting framework used by the group provides for the inclusion of component financial statements that are prepared in accordance with a different financial reporting framework, the component financial statements are deemed to be in accordance with the applicable financial reporting framework used for the group financial statements. For example, both the financial reporting framework established by the Governmental Accounting Standards Board and the financial reporting framework established by the Federal Accounting Standards Advisory Board have such provisions. Accordingly, when the provisions established by the applicable financial reporting framework for inclusion of those component financial statements have been followed, the requirements in paragraphs .26 and .28*c* are not relevant. [Paragraph renumbered and amended, effective for audits of group financial statements for periods ending on or after December 15, 2012, by SAS No. 127.]

Making Reference in the Auditor's Report (Ref: par. .28–.31)

.A58 The disclosure of the magnitude of the portion of the financial statements audited by a component auditor may be achieved by stating the dollar amounts or percentages of one or more of the following: total assets, total revenues, or other appropriate criteria, whichever most clearly describes the portion of the financial statements audited by a component auditor. When two or more component auditors participate in the audit, the dollar amounts or the percentages covered by the component auditors may be stated in the aggregate. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A59 Reference in the auditor's report on the group financial statements to the fact that part of the audit was conducted by a component auditor is not to be construed as a qualification of the opinion, but rather is intended to communicate (1) that the auditor of the group financial statements is not assuming responsibility for the work of the component auditor, and (2) the source of the audit evidence with respect to those components for which reference to the audit of component auditors is made. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A60 Exhibit A contains examples of appropriate reporting in the auditor's report on the group financial statements when reference is made to the audit of a component auditor. [Paragraph renumbered and amended, effective for audits of group financial statements for periods ending on or after December 15, 2012, by SAS No. 127.]

.A61 If the modified opinion, emphasis-of-matter paragraph, or other-matter paragraph in the component auditor's report does not affect the report on the group financial statements and the component auditor's report is not presented, the auditor of the group financial statements need not make reference to those paragraphs in the auditor's report on the group financial statements. If the component auditor's report is presented, the auditor of the group financial statements may make reference to those paragraphs and their disposition. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A62 When the auditor of the group financial statements is assuming responsibility for the work of a component auditor, no reference is made to the component auditor in the report on the group audit because to do so may cause a reader to misinterpret the degree of responsibility being assumed. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Materiality (Ref: par. .32)

.A63 The auditor is required[24]

a. when establishing the overall audit strategy

   i. to determine materiality for the financial statements as a whole.

   ii. to consider whether, in the specific circumstances of the entity, particular classes of transactions, account balances, or disclosures exist for which there is

[24]Paragraphs .10–.11 of section 320.

a substantial likelihood that misstatements of lesser amounts than materiality for the financial statements as a whole would influence the judgment made by a reasonable user based on the financial statements. In such circumstances, the auditor determines materiality to be applied to those particular classes of transactions, account balances, or disclosures.

b. to determine performance materiality for purposes of assessing the risks of material misstatement and designing further audit procedures to respond to assessed risks.

In the context of a group audit, materiality is established for both the group financial statements as a whole and the financial information of those components on which the group engagement team will perform, or request a component auditor to perform, an audit or review. Materiality for the group financial statements as a whole is used when establishing the overall group audit strategy. [Paragraph renumbered by the issuance of SAS No. 127, January 2013. As amended, effective for audits of group financial statements for periods ending on or after December 15, 2021, by SAS No. 138.]

.A64 Different materiality may be established for different components. The aggregate of component materiality may exceed group materiality. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A65 Consideration of all components, regardless of whether reference is made in the auditor's report on the group financial statements to the audit of a component auditor, is necessary when determining component materiality to reduce the risk that the aggregate of detected and undetected misstatements in the group financial statements exceeds materiality for the group financial statements as a whole. Determining component materiality is necessary for the group engagement team to determine the overall group audit plan for the components for which the auditor of the group financial statements is not making reference to the component auditor. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A66 When the component is subject to an audit required by law or regulation or performed for another reason, the materiality used by the component auditor for purposes of such audit ordinarily can be expected to be less than the group materiality and, accordingly, be acceptable for purposes of the group audit. In the case of an equity method investment, the investee may be larger than the investor, and the auditor's evidence to support the investor's share of earnings from the investment may consist largely of the audited financial statements of the investee. In such cases, the materiality used by the investee's auditor may be larger than the materiality used by the investor's auditor. When such circumstances exist, the group engagement team may take into consideration matters such as the group's ownership percentage and its share of the investee's profits and losses when determining whether the component materiality used by the investee's auditor is appropriate for purposes of the audit of the group financial statements. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A67 A threshold for misstatements is determined in addition to component materiality. Misstatements identified in the financial information of the component that are above the threshold for misstatements of the group are communicated to the group engagement team. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Responding to Assessed Risks (Ref: par. .33)

.A68 In an audit of group financial statements, appropriate responses to assessed risks of material misstatement for some or all classes of transactions or account balances may be implemented at the group level, without the involvement of component auditors. [Paragraph renumbered by the issuance of SAS No. 127, January 2013. As amended, effective for audits for periods ending on or after December 15, 2016, by SAS No. 130.]

Consolidation Process

Consolidation Adjustments and Reclassifications (Ref: par. .36)

.A69 The consolidation process may require adjustments to amounts reported in the group financial statements that do not pass through the usual transaction processing systems and may not be subject to the same internal controls to which other financial information is subject. The group engagement team's evaluation of the appropriateness, completeness, and accuracy of the adjustments may include the following:

- Evaluating whether significant adjustments appropriately reflect the events and transactions underlying them
- Determining whether significant adjustments have been correctly calculated, processed, and authorized by group management and, when applicable, by component management
- Determining whether significant adjustments are properly supported and sufficiently documented
- Checking the reconciliation and elimination of intragroup account balances, transactions, and unrealized profits or losses
- Communicating with the component auditor, regardless of whether reference is made in the auditor's report on the group financial statements to the audit of the component auditor.

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Subsequent Events (Ref: par. .40)

.A70 When the auditor's report on the group financial statements will make reference to the audit of a component auditor, procedures designed to identify subsequent events between the date of the component auditor's report and the date of the auditor's report on the group financial statements may include

- obtaining an understanding of any procedures that group management has established to ensure that such subsequent events are identified.

- requesting the component auditor to update subsequent events procedures to the date of the auditor's report on the group financial statements.
- requesting written representation from component management regarding subsequent events.
- reading available interim financial information of the component and making inquiries of group management.
- reading minutes of meetings of the governing board, or any other administrative board with management oversight, held since the financial statement date.
- reading the subsequent year's capital and operating budgets.
- inquiring of group management regarding currently known facts, decisions, or conditions that are expected to have a significant effect on financial position or results of operations for items that represent subsequent events.
- considering the implications for the auditor's report on the group financial statements if the group engagement team has been unable to obtain sufficient appropriate audit evidence regarding subsequent events.

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Evaluating the Sufficiency and Appropriateness of Audit Evidence Obtained

Sufficiency and Appropriateness of Audit Evidence (Ref: par. .44–.45)

.A71 If the group engagement team concludes that sufficient appropriate audit evidence on which to base the group audit opinion has not been obtained, the group engagement team may request a component auditor to perform additional procedures. Alternatively, the group engagement team may perform its own procedures on the financial information of the component. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A72 The group engagement partner's evaluation of the aggregate effect of any misstatements (either identified by the group engagement team or communicated by component auditors) allows the group engagement partner to determine whether the group financial statements as a whole are materially misstated. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Communication With Group Management and Those Charged With Governance of the Group

Communication With Group Management (Ref: par. .46–.48)

.A73 Section 240, *Consideration of Fraud in a Financial Statement Audit*, contains requirements and guidance on communication of fraud to management and, when management may be involved in the fraud, those charged with governance.[25] [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A74 Group management may need to keep certain material sensitive information confidential. Examples of matters that may be significant to the financial statements of the component of which component management may be unaware include the following:

- Potential litigation
- Plans for abandonment of material operating assets
- Subsequent events
- Significant legal agreements

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Communication With Those Charged With Governance of the Group (Ref: par. .49)

.A75 The matters the group engagement team communicates to those charged with governance of the group may include those brought to the attention of the group engagement team by component auditors that the group engagement team judges to be significant to the responsibilities of those charged with governance of the group. Communication with those charged with governance of the group takes place at various times during the group audit. For example, the matters referred to in paragraph .49*a–b* may be communicated after the group engagement team has determined the work to be performed on the financial information of the components. On the other hand, the matter referred to in paragraph .49*c* may be communicated at the end of the audit, and the matters referred to in paragraph .49*d–e* may be communicated when they occur. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Additional Requirements Applicable When Assuming Responsibility for the Work of a Component Auditor

Materiality (Ref: par. .51)

.A76 Component materiality for those components whose financial information will be audited or reviewed as part of the group audit in accordance with paragraphs .53, .54*a*, and .56, is communicated to the component auditor and is used by the component auditor to evaluate whether uncorrected detected misstatements are material, individually or in the aggregate. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A77 In the case of an audit of the financial information of a component, section 320, *Materiality in Planning and Performing an Audit*, requires the component auditor (or group engagement team) to determine performance materiality for purposes of assessing the risks of material misstatement of the financial information of the component and to design further audit procedures in response to assessed risks.[26] This is necessary to reduce the risk that the aggregate of detected and undetected misstatements in the financial information of the component exceeds component materiality. In practice, the group engagement team may

[25] Paragraphs .39–.41 of section 240.

[26] Paragraph .11 of section 320.

set component materiality at the level of performance materiality for the component. When this is the case, the component auditor uses component materiality for purposes of assessing the risks of material misstatement of the financial information of the component and to design further audit procedures in response to assessed risks, as well as for evaluating whether detected misstatements are material individually or in the aggregate. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Determining the Type of Work to Be Performed on the Financial Information of Components

Significant Components (Ref: par. .53–.54)

.A78 Adapting an audit of the financial information of a significant component to meet the specific needs of the group engagement team may include requesting the component auditor to

- perform an audit, using component materiality, in accordance with GAAS, with the exception of performing audit procedures on, for example, tax accounts or litigation, claims, and assessments because those procedures are performed at the group level.
- communicate the results of the audit in a form that is responsive to the needs of the group engagement team.

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A79 The group engagement team's determination of the type of work to be performed on the financial information of a component and its involvement in the work of the component auditor is affected by the following:

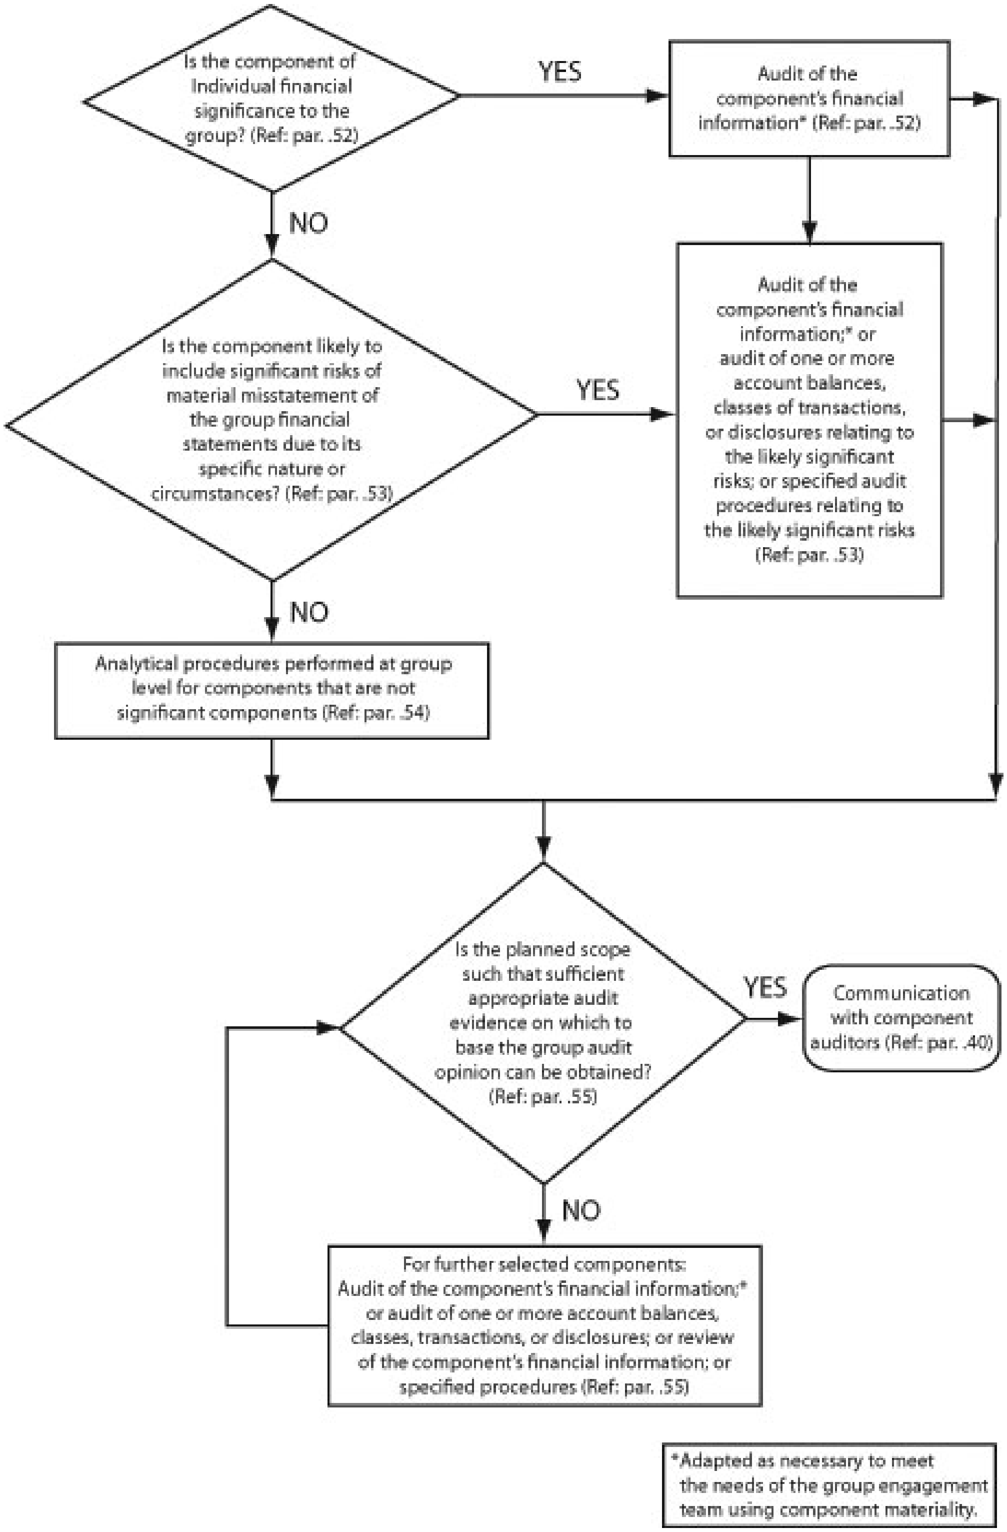
a. The significance of the component

b. The identified significant risks of material misstatement of the group financial statements

c. The group engagement team's evaluation of the design of group-wide controls and the determination of whether they have been implemented

d. The group engagement team's understanding of the component auditor

The following diagram shows how the significance of the component affects the group engagement team's determination of the type of work to be performed on the financial information of the component.



[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A80 The group engagement team may identify a component as a significant component because that component is likely to include significant risks of material misstatement of the group financial statements due to its specific nature or circumstances. In that case, the group engagement team may be able to identify the account balances, classes of transactions, or disclosures affected by the likely significant risks. When this is the case, the group engagement team may decide to perform or request a component auditor to perform an audit, adapted as necessary to meet the needs of the group engagement team, of only those account balances, classes of transactions, or disclosures. For example, in the situation described in paragraph .A7, the work on the financial information of the component may be limited to an audit of the account balances, classes of transactions, and disclosures affected by the foreign exchange trading of that component. When the group engagement team requests a component auditor to perform an audit of one or more specific account balances, classes of transactions, or disclosures, the communication of the group engagement team (see paragraph .41) takes account of the fact that many financial statement items are interrelated. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A81 The group engagement team may design audit procedures that respond to a likely significant risk of material misstatement of the group financial statements. For example, in the case of a likely significant risk of inventory obsolescence, the group engagement team may perform or request a component auditor to perform specified audit procedures on the valuation of inventory at a component that holds a large volume of potentially obsolete inventory but that is not otherwise significant. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Components That Are Not Significant Components (Ref: par. .55–.56)

.A82 Depending on the circumstances of the engagement, the financial information of the components may be aggregated at various levels for purposes of the analytical procedures. The results of the analytical procedures corroborate the group engagement team's conclusions that no significant risks of material misstatement exist of the aggregated financial information of components that are not significant components. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A83 The group engagement team's decision about how many components to select in accordance with paragraph .56, which components to select, and the type of work to be performed on the financial information of the individual components selected may be affected by factors, such as the following:

- The extent of audit evidence expected to be obtained on the financial information of the significant components
- Whether the component has been newly formed or acquired
- Whether significant changes have taken place in the component
- Whether the internal audit function has performed work at the component and any effect of that work on the group audit
- Whether the components apply common systems and processes
- The operating effectiveness of group-wide controls

- Abnormal fluctuations identified by analytical procedures performed at group level
- The individual financial significance of, or the risk posed by, the component in comparison with other components within this category
- Whether the component is subject to an audit required by law or regulation or performed for another reason

Including an element of unpredictability in selecting components in this category may increase the likelihood of identifying material misstatement of the components' financial information. The selection of components is often varied on a cyclical basis. [Paragraph renumbered by the issuance of SAS No. 127, January 2013. As amended, effective for audits of financial statements for periods ending on or after December 15, 2014, by SAS No. 128.]

.A84 An audit of a component that is not a significant component may have already been performed. Once the group engagement team decides to use that work to provide audit evidence for the group audit, the provisions of this section apply. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A85 A review of the financial information of a component may be performed in accordance with Statements on Standards for Accounting and Review Services, adapted as necessary in the circumstances. A review is designed to obtain only limited assurance that there are no material modifications that should be made to the financial statements in order for the statements to be in conformity with the applicable financial reporting framework. The group engagement team also may specify additional procedures to supplement this work. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A86 As explained in paragraph .A19, a group may consist only of components that are not significant components. In these circumstances, the group engagement team can obtain sufficient appropriate audit evidence on which to base the group audit opinion by determining the type of work to be performed on the financial information of the components, in accordance with paragraph .56. It is unlikely that the group engagement team will obtain sufficient appropriate audit evidence on which to base the group audit opinion if the group engagement team or a component auditor only tests group-wide controls and performs analytical procedures on the financial information of the components. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Involvement in the Work Performed by Component Auditors (Ref: par. .57–.58)

.A87 Factors that may affect the group engagement team's involvement in the work of a component auditor include the following:

a. The significance of the component
b. The identified significant risks of material misstatement of the group financial statements
c. The group engagement team's understanding of the component auditor

In the case of a significant component or identified significant risks, the group engagement team performs the procedures described in paragraphs .57–.58. In the case of a component that is not a significant component, the nature, timing, and extent of the group engagement team's involvement in the work of the component auditor will vary based on the group engagement team's understanding of that component auditor. The fact that the component is not a significant component becomes secondary. For example, even though a component is not considered a significant component, the group engagement team, nevertheless, may decide to be involved in the component auditor's risk assessment because it has concerns (although less than serious concerns) about the component auditor's professional competency (for example, lack of industry-specific knowledge), or the component auditor does not operate in an environment that actively oversees auditors. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A88 Forms of involvement in the work of a component auditor other than those described in paragraphs .43 and .57–.58 may, based on the group engagement team's understanding of the component auditor, include one or more of the following:

- Meeting with component management or the component auditor to obtain an understanding of the component and its environment.
- Reviewing the component auditor's overall audit strategy and audit plan.
- Performing risk assessment procedures to identify and assess the risks of material misstatement at the component level. These may be performed with the component auditor or by the group engagement team.
- Designing and performing further audit procedures. These may be designed and performed with the component auditor or by the group engagement team.
- Participating in the closing and other key meetings between the component auditor and component management.
- Reviewing other relevant parts of the component auditor's audit documentation.

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Communication With a Component Auditor (Ref: par. .60)

.A89 If effective two-way communication does not exist between the group engagement team and component auditors, whose work the auditor of the group financial statements is assuming responsibility for, a risk exists that the group engagement team may not obtain sufficient appropriate audit evidence on which to base the group audit opinion. Clear and timely communication of the group engagement team's requirements forms the basis of effective two-way communication between the group engagement team and a component auditor. This two-way communication also may be initiated by the component auditor regarding matters that may be significant to the component audit such as

- transactions, adjustments, or other matters that have come to the group engagement team's attention that it believes require adjustment to or disclosure in the financial statements of the component being audited by the component auditor.
- any relevant limitation on the scope of the audit performed by the group engagement team.

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A90 The group engagement team's requirements often are communicated in a letter of instruction. Appendix C, "Required and Additional Matters Included in the Group Engagement Team's Letter of Instruction," contains guidance on required and additional matters that may be included in such a letter of instruction. A component auditor's communication with the group engagement team often takes the form of a memorandum or report of work performed. Communication between the group engagement team and a component auditor, however, may not necessarily be in writing. For example, the group engagement team may visit the component auditor to discuss identified significant risks or review relevant parts of the component auditor's audit documentation. Nevertheless, the documentation requirements of this section and other AU-C sections apply. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A91 In cooperating with the group engagement team, a component auditor, for example, would provide the group engagement team with access to relevant audit documentation, if not prohibited by law or regulation. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A92 When a member of the group engagement team is also a component auditor, the objective for the group engagement team to communicate clearly with the component auditor often can be achieved by means other than specific written communication. For example

- access by the component auditor to the overall audit strategy and audit plan may be sufficient to communicate the group engagement team's requirements set out in paragraph .41.
- a review of the component auditor's audit documentation by the group engagement team may be sufficient to communicate matters relevant to the group engagement team's conclusion set out in paragraph .42.

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Evaluating the Sufficiency and Appropriateness of Audit Evidence Obtained

Reviewing a Component Auditor's Audit Documentation (Ref: par. .62)

.A93 The parts of the audit documentation of a component auditor that will be relevant to the group audit may vary depending on the circumstances. Often, the focus is on audit documentation that is relevant to the significant risks of material misstatement of the group financial statements. The extent of the review may be affected by the fact that a component auditor's audit documentation has been subjected to the review procedures of the component auditor's firm. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Appendix A — Understanding the Group, Its Components, and Their Environments — Examples of Matters About Which the Group Engagement Team Obtains an Understanding (Ref: par. .A31)

.A94 The examples provided cover a broad range of matters; however, not all matters are relevant to every group audit engagement, and the list of examples is not necessarily complete.

Group-Wide Controls

Group-wide controls may include a combination of the following:

- Regular meetings between group and component management to discuss business developments and review performance
- Monitoring of components' operations and their financial results, including regular reporting routines, which enables group management to monitor components' performance against budgets and take appropriate action
- Group management's risk assessment process (that is, the process for identifying, analyzing, and managing business risks, including the risk of fraud, that may result in material misstatement of the group financial statements)
- Monitoring, controlling, reconciling, and eliminating intragroup account balances, transactions, and unrealized profits or losses at group level
- A process for monitoring the timeliness and assessing the accuracy and completeness of financial information received from components
- A central IT system controlled by the same general IT controls for all or part of the group
- Controls within an IT system that are common for all or some components
- Controls within the group's process to monitor the system of internal control, including activities of the internal audit function and self-assessment programs
- Consistent policies and procedures, including a group financial reporting procedures manual
- Group-wide programs, such as codes of conduct and fraud prevention programs
- Arrangements for assigning authority and responsibility to component management

The internal audit function may be regarded as part of group-wide controls, for example, when the function is centralized. Section 610, *Using the Work of Internal Auditors*, addresses the group engagement team's evaluation of whether the internal audit function's organizational status and relevant policies and procedures adequately support the objectivity of internal auditors, the level of competence of the internal audit function, and whether the function applies a systematic and disciplined approach when the group engagement team expects to use the function's work.[1]

Consolidation Process

The group engagement team's understanding of the consolidation process may include matters such as the following:

- Matters relating to the applicable financial reporting framework, such as the following:
  - — The extent to which component management has an understanding of the applicable financial reporting framework
  - — The process for identifying and accounting for components, in accordance with the applicable financial reporting framework
  - — The process for identifying reportable segments for segment reporting, in accordance with the applicable financial reporting framework
  - — The process for identifying related party relationships and related party transactions for reporting, in accordance with the applicable financial reporting framework
  - — The accounting policies applied to the group financial statements, changes from those of the previous financial year, and changes resulting from new or revised standards under the applicable financial reporting framework
  - — The procedures for dealing with components with financial year-ends different from the group's year-end
- Matters relating to the consolidation process, such as the following:
  - — Group management's process for obtaining an understanding of the accounting policies used by components and, when applicable, ensuring that uniform accounting policies are used to prepare the financial information of the components for the group financial statements and that differences in accounting policies are identified and adjusted, when required, in terms of the applicable financial reporting framework. Uniform accounting policies are the specific principles, bases, conventions, rules, and practices adopted by the group, based on the applicable financial reporting framework, that the components use to report similar transactions consistently. These policies are ordinarily described in the financial reporting procedures manual and reporting package issued by group management.
  - — Group management's process for ensuring complete, accurate, and timely financial reporting by the components for the consolidation.

[1]Paragraphs .14–.15 of section 610, *Using the Work of Internal Auditors*. [Footnote amended, effective for audits of financial statements for periods ending on or after December 15, 2014, by SAS No. 128.]

- — The process for translating the financial information of foreign components into the currency of the group financial statements.
- — How IT is organized for the consolidation, including the manual and automated stages of the process and the manual and programmed controls in place at various stages of the consolidation process.
- — Group management's process for obtaining information on subsequent events.

- Matters relating to consolidation adjustments, such as the following:
  - — The process for recording consolidation adjustments, including the preparation, authorization, and processing of related journal entries and the experience of personnel responsible for the consolidation
  - — The consolidation adjustments required by the applicable financial reporting framework
  - — Business purpose for the events and transactions that gave rise to the consolidation adjustments
  - — Frequency, nature, and size of transactions between components
  - — Procedures for monitoring, controlling, reconciling, and eliminating intragroup account balances, transactions, and unrealized profits or losses
  - — Steps taken to arrive at the fair value of acquired assets and liabilities, procedures for amortizing goodwill (when applicable), and impairment testing of goodwill, in accordance with the applicable financial reporting framework
  - — Arrangements with a controlling interest or noncontrolling interest regarding losses incurred by a component (for example, an obligation of the noncontrolling interest to compensate such losses)

[Paragraph renumbered by the issuance of SAS No. 127, January 2013. As amended, effective for audits of financial statements for periods ending on or after December 15, 2014, by SAS No. 128. As amended, effective for audits of group financial statements for periods ending on or after December 15, 2021, by SAS No. 135. As amended, effective for audits of group financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Appendix B — Examples of Conditions or Events That May Indicate Risks of Material Misstatement of the Group Financial Statements (Ref: par. .A38)

.A95 The examples provided cover a broad range of conditions or events; however, not all conditions or events are relevant to every group audit engagement, and the following list of examples is not necessarily complete:

- A complex group structure, especially when there are frequent acquisitions, disposals, or reorganizations
- Poor corporate governance structures, including decision-making processes, that are not transparent
- Nonexistent or ineffective group-wide controls, including inadequate group management information on monitoring of components' operations and their results
- Components operating in foreign jurisdictions that may be exposed to factors, such as unusual government intervention in areas such as trade and fiscal policy, restrictions on currency and dividend movements, and fluctuations in exchange rates
- Business activities of components that involve high risk, such as long-term contracts or trading in innovative or complex financial instruments
- Uncertainties regarding which components' financial information requires incorporation in the group financial statements, in accordance with the applicable financial reporting framework (for example, whether any special purpose entities or nontrading entities exist and require incorporation)
- Unusual related party relationships and transactions
- Prior occurrences of intragroup account balances that did not balance or reconcile on consolidation
- The existence of complex transactions that are accounted for in more than one component
- Components' application of accounting policies that differ from those applied to the group financial statements
- Components with different financial year-ends, which may be utilized to manipulate the timing of transactions
- Prior occurrences of unauthorized or incomplete consolidation adjustments
- Aggressive tax planning within the group or large cash transactions with entities in tax havens
- Frequent changes of auditors engaged to audit the financial statements of components

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Appendix C — Required and Additional Matters Included in the Group Engagement Team's Letter of Instruction (Ref: par. .A90)

.A96 The following matters are relevant to the planning of the work of a component auditor:

[*Required matters are italicized.*]

- *A request for the component auditor, knowing the context in which the group engagement team will use the work of the component auditor, to confirm that the component auditor will cooperate with the group engagement team*
- The timetable for completing the audit
- Dates of planned visits by group management and the group engagement team and dates of planned meetings with component management and the component auditor
- A list of key contacts
- *The work to be performed by the component auditor, the use to be made of that work,* and arrangements for coordinating efforts at the initial stage of and during the audit, including the group engagement team's planned involvement in the work of the component auditor
- *The ethical requirements that are relevant to the group audit and, in particular, the independence requirements*
- *In the case of an audit or review of the financial information of the component, component materiality*
- *In the case of an audit or review of, or specified audit procedures performed on, the financial information of the component, the threshold above which misstatements cannot be regarded as clearly trivial to the group financial statements*
- *A list of related parties prepared by group management and any other related parties of which the group engagement team is aware and a request that the component auditor communicates on a timely basis to the group engagement team related parties not previously identified by group management or the group engagement team*
- Work to be performed on intragroup account balances, transactions, and unrealized profits or losses
- Guidance on other statutory reporting responsibilities (for example, reporting on group management's assertion on the effectiveness of internal control)
- When a time lag between completion of the work on the financial information of the components and the group engagement team's conclusion on the group financial statements is likely, specific instructions for a subsequent events review

The following matters are relevant to the conduct of the work of the component auditor:

- The findings of the group engagement team's tests of controls of a processing system that is common for all or some components and tests of controls to be performed by the component auditor
- *Identified significant risks of material misstatement of the group financial statements, due to fraud or error, that are relevant to the work of the component auditor and a request that the component auditor communicates on a timely basis any other significant risks of material misstatement of the group financial statements, due to fraud or error, identified in the component and the component auditor's response to such risks*
- The findings of the internal audit function, based on work performed on controls at or relevant to components
- A request for timely communication of audit evidence obtained from performing work on the financial information of the components that contradicts the audit evidence on which the group engagement team originally based the risk assessment performed at group level
- A request for a written representation on component management's compliance with the applicable financial reporting framework or a statement that differences between the accounting policies applied to the financial information of the component and those applied to the group financial statements have been disclosed
- Matters to be documented by the component auditor

Other information, such as the following:

- A request that the following be reported to the group engagement team on a timely basis:
  - Significant accounting, financial reporting, and auditing matters, including accounting estimates and related judgments
  - Matters relating to the going concern status of the component
  - Matters relating to litigation and claims
  - Material weaknesses in controls that have come to the attention of the component auditor during the performance of the work on the financial information of the component and information that indicates the existence of fraud
- A request that the group engagement team be notified of any significant or unusual events as early as possible
- A request that the matters listed in paragraph .49 be communicated to the group engagement team when the work on the financial information of the component is completed

[Paragraph renumbered by the issuance of SAS No. 127, January 2013. As amended, effective for audits of financial statements for periods ending on or after December 15, 2014, by SAS No. 128. As amended, effective for audits of group financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Exhibit A — Illustrations of Auditor's Reports on Group Financial Statements

.A97

Illustration 1 — A Report With a Qualified Opinion When the Group Engagement Team Is Not Able to Obtain Sufficient Appropriate Audit Evidence on Which to Base the Group Audit Opinion (Ref: par. .A27)

Illustration 2 — A Report in Which the Auditor of the Group Financial Statements Is Making Reference to the Audit of the Financial Statements of a Component Prepared Using the Same Financial Reporting Framework as That Used for the Group Financial Statements and Performed by a Component Auditor in Accordance With Generally Accepted Auditing Standards (Ref: par. .A60)

Illustration 3 — A Report in Which the Auditor of the Group Financial Statements Is Making Reference to the Audit of the Financial Statements of a Component Prepared Using a Different Financial Reporting Framework Than That Used for the Group Financial Statements and Performed by a Component Auditor in Accordance With GAAS (Ref: par. .A60)

Illustration 4 — A Report in Which the Auditor of the Group Financial Statements Is Making Reference to the Audit of the Financial Statements of a Component Prepared Using the Same Financial Reporting Framework as That Used for the Group Financial Statements and Performed by a Component Auditor in Accordance With Auditing Standards Other Than GAAS (Ref: par. .A60)

Illustration 1 — A Report With a Qualified Opinion When the Group Engagement Team Is Not Able to Obtain Sufficient Appropriate Audit Evidence on Which to Base the Group Audit Opinion

Circumstances include the following:

- Audit of a complete set of consolidated general purpose financial statements (comparative).
- Management is responsible for the preparation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America as promulgated by the Financial Accounting Standards Board.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210A, *Terms of Engagement*.
- The group engagement team is unable to obtain sufficient appropriate audit evidence relating to a significant component accounted for by the equity method because the group engagement team was unable to obtain the audited financial statements of the component as of December 31, 20X1 and 20X0, including the auditor's report thereon. In this example, the auditor of the group financial statements is not making reference to the report of a component auditor. In the auditor's professional judgment, the effect on the group financial statements of this inability to obtain sufficient appropriate audit evidence is material but not pervasive. Accordingly, the auditor's report contains a qualified opinion.
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- The auditor has obtained all the other information prior to the date of the auditor's report, and the qualified opinion on the consolidated financial statements also affects the other information included in the annual report.
- The auditor has not been engaged to communicate key audit matters.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Consolidated Financial Statements[1]

Qualified Opinion

---

[1]The subtitle "Report on the Audit of Consolidated Financial Statements" is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

We have audited the consolidated financial statements of ABC Company and its subsidiaries, which comprise the consolidated balance sheets as of December 31, 20X1 and 20X0, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, except for the possible effects of the matter described in the Basis for Qualified Opinion section of our report, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of ABC Company and its subsidiaries as of December 31, 20X1 and 20X0, and the results of their operations and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Qualified Opinion

We were unable to obtain audited financial statements supporting the Company's investment in a foreign affiliate stated at $_______ and $_______ at December 31, 20X1 and 20X0, respectively, or its equity in earnings of that affiliate of $_______ and $_______, which is included in net income for the years then ended as described in Note X to the consolidated financial statements; nor were we able to satisfy ourselves as to the carrying value of the investment in the foreign affiliate or the equity in its earnings by other auditing procedures.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC Company and its subsidiaries and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the consolidated financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risk. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.[2]
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the consolidated financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Illustration 2 — A Report in Which the Auditor of the Group Financial Statements Is Making Reference to the Audit of the Financial Statements of a Component Prepared Using the Same Financial Reporting Framework as That Used for the Group Financial Statements and Performed by a Component Auditor in Accordance With Generally Accepted Auditing Standards

Circumstances include the following:

- Audit of a complete set of consolidated general purpose financial statements (comparative).
- Management is responsible for the preparation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America as promulgated by the Financial Accounting Standards Board.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210A, *Terms of Engagement*.
- The auditor of the group financial statements is making reference to the audit of the financial statements of a component prepared using the same financial reporting framework as that used for the group financial statements and performed by a component auditor in accordance with generally accepted auditing standards (GAAS).
- The auditor has concluded that an unmodified (that is, "clean") opinion is appropriate based on the audit evidence obtained.
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- The auditor has obtained all the other information prior to the date of the auditor's report and has not identified an uncorrected material misstatement of the other information included in the annual report.
- The auditor has not been engaged to communicate key audit matters.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Consolidated Financial Statements[1]

Opinion

[1]The subtitle "Report on the Consolidated Financial Statements" is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

We have audited the consolidated financial statements of ABC Company and its subsidiaries, which comprise the consolidated balance sheets as of December 31, 20X1 and 20X0, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, based on our audits and the report of the other auditors, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of ABC Company and its subsidiaries as of December 31, 20X1 and 20X0, and the results of their operations and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

We did not audit the financial statements of B Company, a wholly owned subsidiary, which statements reflect total assets constituting 20 percent and 22 percent, respectively, of consolidated total assets at December 31, 20X1 and 20X0, and total revenues constituting 18 percent and 20 percent, respectively, of consolidated total revenues for the years then ended. Those statements were audited by other auditors, whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for B Company, is based solely on the report of the other auditors.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the consolidated financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risk. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.[2]
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the consolidated financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Consolidated Financial Statements[1]

Opinion

We have audited the consolidated financial statements of ABC Company and its subsidiaries, which comprise the consolidated balance sheets as of December 31, 20X1 and 20X0, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, based on our audits and the report of the other auditors, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of ABC Company and its subsidiaries as of December 31, 20X1 and 20X0, and the results of their operations and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

We did not audit the financial statements of B Company, a wholly owned subsidiary, which statements reflect total assets constituting 20 percent and 22 percent, respectively, of consolidated total assets at December 31, 20X1 and 20X0, and total revenues constituting 18 percent and 20 percent, respectively, of consolidated total revenues for the years then ended. Those statements, which were prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board, were audited by other auditors, whose report has been furnished to us. We have applied audit procedures on the conversion adjustments to the financial statements of B Company, which conform those financial statements to accounting principles generally accepted in the United States of America. Our opinion, insofar as it relates to the amounts included for B Company, prior to these conversion adjustments, is based solely on the report of the other auditors.

[1]The subtitle "Report on the Consolidated Financial Statements" is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the consolidated financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risk. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose

of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.[2]

- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the consolidated financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Report on Other Legal and Regulatory Requirements

[*Date of the auditor's report*]

[2] In circumstances in which the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the consolidated financial statements, omit the following: "but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed." [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Illustration 4 — A Report in Which the Auditor of the Group Financial Statements Is Making Reference to the Audit of the Financial Statements of a Component Prepared Using the Same Financial Reporting Framework as That Used for the Group Financial Statements and Performed by a Component Auditor in Accordance With Auditing Standards Other Than GAAS

Circumstances are the same as in illustration 2, except in this example, the auditor of the group financial statements is making reference to the audit of the financial statements of a component prepared using the same financial reporting framework as that used for the group financial statements and performed by a component auditor in accordance with auditing standards other than GAAS or standards promulgated by the Public Company Accounting Oversight Board. The group engagement partner has determined that the component auditor performed additional audit procedures to meet the relevant requirements of GAAS. If additional procedures were not necessary for the audit of the component auditor to meet the relevant requirements of GAAS, illustration 2 is applicable.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Consolidated Financial Statements[1]

Opinion

We have audited the consolidated financial statements of ABC Company and its subsidiaries, which comprise the consolidated balance sheets as of December 31, 20X1 and 20X0, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, based on our audits and the report of, and additional audit procedures performed by, the other auditors, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of ABC Company and its subsidiaries as of December 31, 20X1 and 20X0, and the results of their operations and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

We did not audit the financial statements of B Company, a wholly owned subsidiary, which statements reflect total assets constituting 20 percent and 22 percent, respectively, of consolidated total assets at December 31, 20X1 and 20X0, and total revenues constituting 18 percent and 20 percent, respectively, of consolidated total revenues for the years then ended. Those statements were audited by other auditors in accordance with [describe the set of auditing standards], whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for B Company, is based solely on the report of,

[1]The subtitle "Report on the Consolidated Financial Statements" is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

and additional audit procedures to meet the relevant requirements of auditing standards generally accepted in the United States of America performed by, the other auditors.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the consolidated financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risk. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.[2]
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the consolidated financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

AU-C Section 9600A

Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors): Auditing Interpretations of Section 600A

New GASB Pension Standards

In June 2012, the Governmental Accounting Standards Board (GASB) issued two new standards that will substantially change the accounting and financial reporting of public employee pension plans and the state and local governments that participate in such plans. GASB Statement No. 67, *Financial Reporting for Pension Plans*, revises existing guidance for the financial reports of most governmental pension plans. GASB Statement No. 68, *Accounting and Financial Reporting for Pensions*, revises and establishes new financial reporting requirements for most governments that provide their employees with pension benefits. GASB Statement No. 67 is effective for financial statements for periods beginning after June 15, 2013. GASB Statement No. 68 is effective for financial statements for fiscal years beginning after June 15, 2014.

Interpretation No. 1, "Auditor of Participating Employer in a Governmental Pension Plan," (paragraphs .01–.02) is intended to assist both plan and employer auditors who are auditing entities that have implemented the new accounting standards.

1. Auditor of Participating Employer in a Governmental Pension Plan

.01 *Question*—Many governmental entities (employers) provide pension benefits to their employees through governmental pension plans. In order to report pension amounts in accordance with GASB Statement No. 68, employers obtain certain information (for example, net pension liability) from the governmental pension plan. In this circumstance, is the governmental pension plan considered a component of the employer for purposes of section 600A, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*?

.02 *Interpretation*—No. In this circumstance, a governmental pension plan is not a component of the employer for purposes of section 600A. Accordingly, it would not be appropriate for an employer auditor to make reference to the audit report of the governmental pension plan auditor.

[Issue Date: April 2014.]

AU-C Section 610

Using the Work of Internal Auditors

Source: SAS No. 128; SAS No. 145.

Effective for audits of financial statements for periods ending on or after December 15, 2014.

Note

In March 2023, the ASB issued SAS No. 149, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors and Audits of Referred-to Auditors)*, which contains amendments to this section.

The amendments are effective for audits of financial statements for periods ending on or after December 15, 2026, and can be viewed in appendix C of section 600 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the external auditor's responsibilities if using the work of internal auditors. Using the work of internal auditors includes (*a*) using the work of the internal audit function in obtaining audit evidence and (*b*) using internal auditors to provide direct assistance under the direction, supervision, and review of the external auditor.

.02 This section does not apply if the entity does not have an internal audit function. (Ref: par. .A1–.A2)

.03 If the entity has an internal audit function, the requirements in this section relating to using the work of the internal audit function in obtaining audit evidence do not apply if

a. the responsibilities and activities of the function are not relevant to the audit, or

b. based on the external auditor's preliminary understanding of the function obtained as a result of procedures performed under section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, the external auditor does not expect to use the work of the function in obtaining audit evidence.

Nothing in this section requires the external auditor to use the work of the internal audit function to modify the nature or timing, or reduce the extent, of audit procedures to be performed directly by the external auditor; it remains the external auditor's decision to establish the overall audit strategy.

.04 Furthermore, the requirements in this section relating to using internal auditors to provide direct assistance do not apply if the external auditor does not plan to use internal auditors to provide direct assistance.

Relationship Between Section 315 and This Section

.05 Many entities establish internal audit functions as part of their internal control and governance structures. The objectives and scope of an internal audit function, the nature of its responsibilities, and its organizational status, including the function's authority and accountability, vary widely and depend on the size and structure of the entity and the requirements of management and those charged with governance. Statement on Auditing Standards No. 145, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, addresses how the knowledge and experience of the internal audit function can inform the external auditor's understanding of the entity and its environment, the applicable financial reporting framework and the entity's system of internal control, and identification and assessment of risks of material misstatement. SAS No. 145[1] also explains how effective communication between the internal and external auditors creates an environment in which the external auditor can be informed by the internal auditor of significant matters that may affect the external auditor's work. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.06 The external auditor may be able to use the work of the internal audit function in obtaining audit evidence in a constructive and complementary manner depending on

- the level of competency of the internal audit function,
- whether the internal audit function's organizational status and relevant policies and procedures adequately support the objectivity of the internal auditors, and
- whether the function applies a systematic and disciplined approach, including quality control.

This section addresses the external auditor's responsibilities when, based on the external auditor's understanding of the internal audit function obtained as a result of procedures performed under section 315, the external auditor expects to use the work of the internal audit function in obtaining audit evidence (see paragraphs .13–.24 of this section). Such use of that work modifies the nature or timing, or reduces the extent, of audit procedures to be performed directly by the external auditor.

[1]Paragraph .A120 of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

.07 This section also addresses the external auditor's responsibilities if the external auditor is considering using internal auditors to provide direct assistance under the direction, supervision, and review of the external auditor (see paragraphs .25–.32).

.08 There may be individuals in an entity that perform procedures similar to those performed by an internal audit function. However, unless performed by an objective and competent function that applies a systematic and disciplined approach, including quality control, such procedures would be considered control activities, and obtaining evidence regarding the effectiveness of such controls would be part of the external auditor's responses to assessed risks in accordance with section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

The External Auditor's Responsibility for the Audit

.09 The external auditor has sole responsibility for the audit opinion expressed, and that responsibility is not reduced by the external auditor's use of the work of the internal audit function in obtaining audit evidence or use of internal auditors to provide direct assistance on the engagement. Although the function may perform audit procedures similar to those performed by the external auditor, neither the internal audit function nor the internal auditors are independent of the entity as is required of the external auditor in an audit of financial statements in accordance with section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.[2] This section, therefore, defines the conditions that are necessary for the external auditor to be able to use the work of internal auditors. It also defines the necessary work effort to obtain sufficient appropriate evidence that the work of the internal audit function or internal auditors providing direct assistance is adequate for the purposes of the audit. The requirements are designed to provide a framework for the external auditor's judgments regarding the use of the work of internal auditors to prevent over or undue use of such work.

Effective Date

.10 This section is effective for audits of financial statements for periods ending on or after December 15, 2014.

Objectives

.11 The objectives of the external auditor, when the entity has an internal audit function and the external auditor expects to use the work of internal auditors to modify the nature or timing, or reduce the extent, of audit procedures to be performed directly by the external auditor, are as follows:

---

[2]Paragraph .15 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

a. To determine whether to use the work of the internal audit function in obtaining audit evidence or to use internal auditors to provide direct assistance, and if so, in which areas and to what extent

b. If using the work of the internal audit function in obtaining audit evidence, to determine whether that work is adequate for purposes of the audit

c. If using internal auditors to provide direct assistance, to appropriately direct, supervise, and review their work

Definitions

.12 For purposes of generally accepted auditing standards, the following terms have the meaning attributed as follows:

Direct assistance. The use of internal auditors to perform audit procedures under the direction, supervision, and review of the external auditor.

Internal audit function. A function of an entity that performs assurance and consulting activities designed to evaluate and improve the effectiveness of the entity's governance, risk management, and internal control processes. (Ref: par. .A1–.A4)

Requirements

Determining Whether, in Which Areas, and to What Extent the Work of the Internal Audit Function Can Be Used in Obtaining Audit Evidence

Evaluating the Internal Audit Function

.13 The external auditor should determine whether the work of the internal audit function can be used in obtaining audit evidence by evaluating

a. the extent to which the internal audit function's organizational status and relevant policies and procedures support the objectivity of the internal auditors; (Ref: par. .A5–.A11)

b. the level of competence of the internal audit function; and (Ref: par. .A5–.A9)

c. the application by the internal audit function of a systematic and disciplined approach, including quality control. (Ref: par. .A12–.A14)

.14 The external auditor should not use the work of the internal audit function in obtaining audit evidence if the external auditor determines that

a. the function's organizational status and relevant policies and procedures do not adequately support the objectivity of internal auditors;

b. the function lacks sufficient competence; or

c. the function does not apply a systematic and disciplined approach, including quality control. (Ref: par. .A15–.A17)

Determining the Nature and Extent of Work of the Internal Audit Function That Can Be Used in Obtaining Audit Evidence

.15 As a basis for determining the areas and the extent to which the work of the internal audit function can be used, the external auditor should consider the nature, timing, and extent of the work that has been performed, or is planned to be performed, by the internal audit function and its relevance to the external auditor's overall audit strategy and audit plan. (Ref: par. .A18–.A23)

.16 The external auditor should make all significant judgments in the audit engagement, including when using the work of the internal audit function in obtaining audit evidence. (Ref: par. .A18)

.17 To prevent undue use of the internal audit function in obtaining audit evidence, the external auditor should plan to use less of the work of the function and perform more of the work directly: (Ref: par. .A19–.A24)

a. The more judgment is involved in
    i. planning and performing relevant audit procedures or
    ii. evaluating the audit evidence obtained (Ref: par. .A24)
b. the higher the assessed risk of material misstatement at the assertion level, with special consideration given to significant risks; (Ref: par. .A25–.A27)
c. the less the internal audit function's organizational status and relevant policies and procedures adequately support the objectivity of the internal auditors; and
d. the lower the level of competence of the internal audit function.

.18 The external auditor should also evaluate whether, in aggregate, using the work of the internal audit function in obtaining audit evidence to the extent planned, together with any planned use of internal auditors to provide direct assistance, would result in the external auditor still being sufficiently involved in the audit, given the external auditor's sole responsibility for the audit opinion expressed. (Ref: par. .A18–.A27 and .A44)

Communicating With Those Charged With Governance

.19 In communicating an overview of the planned scope and timing of the audit to those charged with governance in accordance with section 260, *The Auditor's Communication With Those Charged With Governance*,[3] the external auditor should communicate how the external auditor has planned to use the work of the internal audit function in obtaining audit evidence. (Ref: par. .A28)

[3]Paragraph .11 of section 260, *The Auditor's Communication With Those Charged With Governance*.

Using the Work of the Internal Audit Function in Obtaining Audit Evidence

.20 If the external auditor plans to use the work of the internal audit function in obtaining audit evidence, the external auditor should discuss the planned use of the work with the function as a basis for coordinating their respective activities. (Ref: par. .A29–.A32)

.21 The external auditor should read the reports of the internal audit function, which relate to the work of the function that the external auditor plans to use to obtain an understanding of the nature and extent of audit procedures the internal audit function performed and the related findings.

.22 The external auditor should perform sufficient audit procedures on the body of work of the internal audit function as a whole that the external auditor plans to use to determine its adequacy for purposes of the audit, including evaluating whether

a. the work of the function was properly planned, performed, supervised, reviewed, and documented;

b. sufficient appropriate evidence was obtained to enable the function to draw reasonable conclusions; and

c. conclusions reached are appropriate in the circumstances, and the reports prepared by the function are consistent with the results of the work performed. (Ref: par. .A33–.A36)

.23 The nature and extent of the external auditor's audit procedures should be responsive to the external auditor's evaluation of

a. the amount of judgment involved in

   i. planning and performing relevant audit procedures and

   ii. evaluating the audit evidence obtained;

b. the assessed risk of material misstatement;

c. the extent to which the internal audit function's organizational status and relevant policies and procedures support the objectivity of the internal auditors; and

d. the level of competence of the function. (Ref: par. .A33–.A35) (see paragraphs .16–.17)

The external auditor should also reperform some of the body of work of the internal audit function that the external auditor intends to use in obtaining audit evidence. (Ref: par. .A36)

.24 Before the conclusion of the audit, the external auditor should evaluate whether the external auditor's conclusions regarding the internal audit function in paragraph .13 and the determination of the nature and extent of use of the work of the function for purposes of the audit in paragraphs .16–.18 remain appropriate.

Determining Whether, in Which Areas, and to What Extent Internal Auditors Can Be Used to Provide Direct Assistance

Determining Whether Internal Auditors Can Be Used to Provide Direct Assistance for Purposes of the Audit

.25 If the external auditor plans to use internal auditors to provide direct assistance on the audit, the external auditor should evaluate the existence and significance of threats to the objectivity of the internal auditors who will be providing direct assistance, as well as any safeguards applied to reduce or eliminate the threats, and the level of competence of the internal auditors who will be providing such assistance. (Ref: par. .A37–.A41)

.26 The external auditor should not use an internal auditor to provide direct assistance if

a. the internal auditor lacks the necessary objectivity to perform the proposed work, or

b. the internal auditor lacks the necessary competence to perform the proposed work. (Ref: par. .A37–.A41)

Determining the Nature and Extent of Work That Can Be Assigned to Internal Auditors Providing Direct Assistance

.27 In determining the nature and extent of work that may be assigned to internal auditors providing direct assistance and the nature, timing, and extent of direction, supervision, and review that is appropriate in the circumstances, the external auditor should consider

a. the external auditor's evaluation of the existence and significance of threats to the internal auditors' objectivity, the effectiveness of the safeguards applied to reduce or eliminate the threats, and the level of competence of the internal auditors who will be providing such assistance;

b. the assessed risk of material misstatement; and

c. the amount of judgment involved in

    i. planning and performing relevant audit procedures and

    ii. evaluating the audit evidence obtained. (Ref: par. .A42–.A43)

Communicating With Those Charged With Governance

.28 In communicating an overview of the planned scope and timing of the audit with those charged with governance in accordance with section 260,[4] the external auditor should communicate how the external auditor plans to use internal auditors to provide direct assistance.

---

[4]See footnote 3.

Using Internal Auditors to Provide Direct Assistance

.29 The external auditor should evaluate whether, in aggregate, using internal auditors to provide direct assistance to the extent planned, together with any planned use of the work of the internal audit function in obtaining audit evidence, would result in the external auditor still being sufficiently involved in the audit, given the external auditor's sole responsibility for the audit opinion expressed. (Ref: par. .A44)

.30 Prior to using internal auditors to provide direct assistance, the external auditor should obtain written acknowledgment from management or those charged with governance, as appropriate, that internal auditors providing direct assistance to the external auditor will be allowed to follow the external auditor's instructions, and that the entity will not intervene in the work the internal auditor performs for the external auditor. (Ref: par. .A45)

.31 The external auditor should direct, supervise, and review the work performed by internal auditors on the engagement in accordance with section 220A, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*. In so doing

a. the nature, timing, and extent of direction, supervision, and review should be responsive to the outcome of the evaluation of the factors in paragraph .27 of this section;

b. the external auditor should instruct the internal auditors to bring accounting and auditing issues identified during the audit to the attention of the external auditor; and

c. the review procedures should include the external auditor testing some of the work performed by the internal auditors. (Ref: par. .A46–.A47)

.32 When directing, supervising, and reviewing the work performed by internal auditors, the external auditor should remain alert for indications that the external auditor's evaluations in paragraphs .25 and .29 are no longer appropriate.

Documentation

.33 If the external auditor uses the work of the internal audit function in obtaining audit evidence, the external auditor should include the following in the audit documentation:[5]

a. The results of the evaluation of

   i. the function's organizational status and relevant policies and procedures to adequately support the objectivity of the internal auditors;

   ii. the level of competence of the function; and

[5]Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*.

iii. the application by the function of a systematic and disciplined approach, including quality control

b. The nature and extent of the work used (including the period covered by, and the results of, such work) and the basis for that decision

c. The audit procedures performed by the external auditor to evaluate the adequacy of the work used, including the procedures performed by the external auditor to reperform some of the body of work of the internal audit function in obtaining audit evidence

.34 If the external auditor uses internal auditors to provide direct assistance on the audit, the external auditor should include the following in the audit documentation:

a. The evaluation of the existence and significance of threats to the objectivity of the internal auditors, as well as any safeguards applied to reduce or eliminate the threats, and the level of competence of the internal auditors used to provide direct assistance

b. The basis for the decision regarding the nature and extent of the work performed by the internal auditors

c. The nature and extent of the external auditor's review of the internal auditors' work (including the testing, by the external auditor, of some of the work performed by the internal auditors) in accordance with section 230, *Audit Documentation*

d. The working papers prepared by the internal auditors who provided direct assistance on the audit engagement

.35 If the external auditor uses either the work of the internal audit function in obtaining audit evidence or internal auditors to provide direct assistance, or both, the external auditor should include in the audit documentation the external auditor's evaluation of (see paragraphs .18 and .29) whether, either individually or in aggregate as applicable, using the work of the internal audit function in obtaining audit evidence and use of internal auditors to provide direct assistance resulted in the external auditor still being sufficiently involved in the audit, given the external auditor's sole responsibility for the audit opinion expressed.

Application and Other Explanatory Material

Definition of *Internal Audit Function* (Ref: par. .02 and .12)

.A1 The objectives and scope of internal audit functions typically include assurance and consulting activities designed to evaluate and improve the effectiveness of the entity's governance, risk management, and internal control processes, such as the following:

Activities Relating to Governance Process

- The internal audit function may assess the governance process in its accomplishment of objectives on ethics and values, performance management and accountability, communicating risk and control information to appropriate areas of the organization, and effectiveness of communication among those charged with governance, external and internal auditors, and management.

Activities Relating to Risk Management Process

- The internal audit function may assist the entity by identifying and evaluating significant exposures to risk and contributing to the improvement of risk management and internal control (including effectiveness of the financial reporting process).
- The internal audit function may perform procedures to assist the entity in the detection of fraud.

Activities Relating to Internal Control Process

- *Evaluation of internal control*. The internal audit function may be assigned specific responsibility for reviewing controls, evaluating their operation, and recommending improvements thereto. In doing so, the internal audit function provides assurance on the control. For example, the internal audit function might plan and perform tests or other procedures to provide assurance to management and those charged with governance regarding the design, implementation, and operating effectiveness of internal control, including those controls that are relevant to the audit.
- *Examination of financial and operating information*. The internal audit function may be assigned to review the means used to identify, recognize, measure, classify, and report financial and operating information and to make specific inquiry into individual items, including detailed testing of transactions, balances, and procedures.
- *Review of operating activities*. The internal audit function may be assigned to review the economy, efficiency, and effectiveness of operating activities, including nonfinancial activities of an entity.
- *Review of compliance with laws and regulations*. The internal audit function may be assigned to review compliance with laws, regulations, and other external requirements and with management policies and directives and other internal requirements.

Not all the activities discussed in this paragraph need to be present for an internal audit function to be used in the audit of the financial statements. The external auditor may be able to use the work of the internal audit function to modify the nature or timing, or reduce the extent, of audit procedures to be performed directly by the external auditor in obtaining audit evidence if the nature of the internal audit function's responsibilities and assurance activities is related to the entity's financial reporting, as further discussed in section 315A.[6]

.A2 Activities similar to those performed by an internal audit function may be conducted by functions with other titles within an entity. Some or all of the activities of an internal audit function may also be outsourced to a third-party service provider. Neither the title of the function nor whether it is performed by the entity or a third-party service provider are

[6]Paragraph .A117 of section 315A.

sole determinants of whether the external auditor can use the work of internal auditors. Rather, it is the nature of the activities, the extent to which the internal audit function's organizational status and relevant policies and procedures support the objectivity of the internal auditors, competence of the internal auditors, and systematic and disciplined approach of the function that are relevant. References in this section to the work of the internal audit function include relevant activities of other functions or third-party providers that have these characteristics.

.A3 However, those in the entity with operational and managerial duties and responsibilities outside of the internal audit function would ordinarily face threats to their objectivity that would preclude them from being treated as part of an internal audit function for the purpose of this section, although they may perform controls that can be tested in accordance with section 330.[7] For this reason, monitoring controls performed by an owner-manager would not be considered equivalent to an internal audit function. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A4 Although the objectives of an entity's internal audit function and the external auditor differ, the function may perform audit procedures similar to those performed by the external auditor in an audit of financial statements. If so, the external auditor may make use of the function for purposes of the audit in one or both of the following ways:

- To obtain information that is relevant to the external auditor's assessments of the risks of material misstatement due to error or fraud. In this regard, section 315A[8] requires the external auditor to obtain an understanding of the nature of the internal audit function's responsibilities, its status within the organization, and the activities performed, or to be performed, and make inquiries of appropriate individuals within the internal audit function (if the entity has such a function).
- The external auditor, after appropriate evaluation, may decide to use work that has been performed by the internal audit function that is relevant to the period being audited to modify the nature or timing, or reduce the extent, of audit procedures to be performed directly by the external auditor (that is, the external auditor can use the work of the internal audit function in partial substitution for audit evidence to be obtained directly by the external auditor) (see paragraphs .13–.24 of this section).

In addition, the external auditor may use internal auditors to perform audit procedures under the direction, supervision, and review of the external auditor (referred to as *direct assistance* in this section) (see paragraphs .25–.32 of this section).

[7]Paragraph .10 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

[8]Paragraphs .06*a* and .24 of section 315A.

Determining Whether, in Which Areas, and to What Extent the Work of the Internal Audit Function Can Be Used in Obtaining Audit Evidence

Evaluating the Internal Audit Function

Objectivity and Competence (Ref: par. .13a–b)

.A5 The external auditor exercises professional judgment in determining whether the work of the internal audit function can be used in obtaining audit evidence and the nature and extent to which the work of the internal audit function can be used in the circumstances.

.A6 The extent to which the internal audit function's organizational status and relevant policies and procedures support the objectivity of the internal auditors and the level of competence of the function are particularly important in determining whether to use the work of the internal audit function in obtaining audit evidence and, if so, the nature and extent of the use of the work of the function that is appropriate in the circumstances.

.A7 *Objectivity* refers to the ability to perform tasks without allowing bias, conflict of interest, or undue influence of others to override professional judgments. Factors that may affect the external auditor's evaluation of objectivity include the following:

- Whether the organizational status of the internal audit function, including the function's authority and accountability, supports the ability of the function to be free from bias, conflict of interest, or undue influence of others to override professional judgments (for example, whether the internal audit function reports to those charged with governance or an officer with appropriate authority, or if the function reports to management, whether it has direct access to those charged with governance)
- Whether the internal audit function is free of any conflicting responsibilities (for example, having managerial or operational duties or responsibilities that are outside of the internal audit function)
- Whether those charged with governance oversee employment decisions related to the internal audit function (for example, determining the appropriate remuneration policy)
- Whether any constraints or restrictions placed on the internal audit function by management or those charged with governance exist (for example, in communicating the internal audit function's findings to the external auditor)
- Whether the internal auditors are members of relevant professional bodies and their memberships obligate their compliance with relevant professional standards relating to objectivity or whether their internal policies achieve the same objectives

.A8 *Competence* of the internal audit function refers to the attainment and maintenance of knowledge and skills of the function as a whole at the level required to enable assigned tasks to be performed diligently and with the appropriate level of quality. Factors that may affect the external auditor's determination about competence include the following:

- Whether the internal audit function is adequately and appropriately resourced relative to the size of the entity and the nature of its operations.
- Whether established policies for hiring, training, and assigning internal auditors to internal audit engagements exist.
- Whether the internal auditors have adequate technical training and proficiency in auditing. Relevant criteria that may be considered by the external auditor in making the assessment may include, for example, the internal auditors' possession of a relevant professional designation and experience.
- Whether the internal auditors possess the required knowledge relating to the entity's financial reporting and the applicable financial reporting framework and whether the internal audit function possesses the necessary skills (for example, industry-specific knowledge) to perform work related to the entity's financial statements.
- Whether the internal auditors are members of relevant professional bodies or have certifications that oblige them to comply with the relevant professional standards, including continuing professional education requirements.

.A9 Objectivity and competence may be viewed as a continuum. The more the internal audit function's organizational status and relevant policies and procedures adequately support the objectivity of the internal auditors and the higher the level of competence of the function, the more likely the external auditor may make use of the work of the function in obtaining audit evidence and make use of it in more areas. However, an organizational status and relevant policies and procedures that provide strong support for the objectivity of the internal auditors cannot compensate for the lack of sufficient competence of the internal audit function. Equally, a high level of competence of the internal audit function cannot compensate for an organizational status and policies and procedures that do not adequately support the objectivity of the internal auditors. Additionally, neither a high level of competence nor strong support for the objectivity of the internal auditors compensate for the lack of a systematic and disciplined approach.

Considerations Specific to Governmental Entities (Ref: par. .13a)

.A10 *Generally Accepted Government Auditing Standards* (GAGAS), established by the U.S. Government Accountability Office, addresses the evaluation of the internal audit function in a government environment, including consideration of whether the internal audit function

- reports to senior management, such as a city manager or finance director,
- reports to the governing body,
- is elected, and, thus, is accountable to the citizens, or
- reports to an audit committee, which may comprise the governing body or a subcommittee thereof, members of senior management, appointed citizens, or any combination thereof.

.A11 The GAGAS conceptual framework approach provides auditors a practicable approach to address threats to independence and can be applied to varying circumstances that could potentially create threats to independence. The GAGAS conceptual framework may be useful in evaluating the objectivity of the internal audit function of a governmental entity.

Application of a Systematic and Disciplined Approach, Including Quality Control (Ref: par. .13c)

.A12 The application of a systematic and disciplined approach to planning, performing, supervising, reviewing, and documenting its activities distinguishes the activities of the internal audit function from other monitoring controls that may be performed within the entity. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A13 Factors that may affect the external auditor's determination of whether the internal audit function applies a systematic and disciplined approach include the following:

- The existence, adequacy, and use of documented internal audit procedures or guidance covering such areas as risk assessments, work programs, documentation, and reporting, the nature and extent of which is commensurate with the nature and size of the internal audit function relative to the complexity of the entity.
- Whether the internal audit function has appropriate quality control policies and procedures (for example, those relating to leadership, human resources, and engagement performance) or quality control requirements in standards set by relevant professional bodies for internal auditors. Such bodies may also establish other appropriate requirements, such as conducting periodic external quality assessments.

.A14 The external auditor's determination of whether the internal audit function applies a systematic and disciplined approach is intended to address the risk that the external auditor inappropriately uses internal audit-like work performed in an informal, unstructured, or ad hoc manner. However, the level of formality of an acceptable approach may vary depending on the nature and size of the internal audit function relative to the complexity of the entity.

Circumstances in Which Work of the Internal Audit Function Cannot Be Used (Ref: par. .14)

.A15 The external auditor's evaluation of whether the internal audit function's organizational status and relevant policies and procedures adequately support the objectivity of the internal auditors, the level of competence of the internal audit function, and whether it applies a systematic and disciplined approach may indicate that the risks to the quality of the work of the function are too significant and, therefore, it is not appropriate to use any of the work of the function as audit evidence.

.A16 Consideration of the factors in paragraphs .A7–.A8 and .A13, individually and in aggregate, is important because an individual factor is often not sufficient to conclude that the work of the internal audit function cannot be used for purposes of the audit. For example, the internal audit function's organizational status is particularly important in evaluating threats to the objectivity of the internal auditors. If the internal audit function reports to management other than in an administrative capacity, this may impair the function's objectivity absent safeguards applied to reduce or eliminate the threat (for example, having direct access and performance accountability to those charged with governance).

.A17 In addition, when the external auditor accepts an engagement to provide internal audit services to an audit client, and the results of those services will be used in conducting the audit, a self-review threat is created in regards to the external auditor's independence. This is because of the possibility that the engagement team will use the results of the internal audit service without properly evaluating those results or without exercising the same level of professional skepticism as would be exercised when the internal audit work is performed by individuals who are not members of the firm.

Determining the Nature and Extent of Work of the Internal Audit Function That Can Be Used in Obtaining Audit Evidence

Factors Affecting the Determination of the Nature and Extent of the Work of the Internal Audit Function That Can Be Used (Ref: par. .15–.18)

.A18 Because the external auditor has sole responsibility for the audit opinion expressed, the external auditor is required to make the significant judgments in the audit engagement in accordance with paragraph .16. Significant judgments include, but are not limited to, the following:

- Assessing the risks of material misstatement
- Evaluating the sufficiency of tests performed
- Evaluating the appropriateness of management's use of the going concern assumption and whether substantial doubt exists about the entity's ability to continue as a going concern for a reasonable period of time
- Evaluating significant accounting estimates
- Evaluating the adequacy of disclosures in the financial statements and other matters affecting the external auditor's report

.A19 Once the external auditor has determined that the work of the internal audit function can be used for purposes of the audit, a first consideration is whether the planned nature and scope of the work of the internal audit function that has been performed, or is planned to be performed, is relevant to the overall audit strategy and audit plan that the external auditor has established in accordance with section 300, *Planning an Audit*.

.A20 In accordance with section 330, the external auditor is required to design and perform further audit procedures whose nature, timing, and extent are based on, and responsive to, the assessed risks of material misstatement at the relevant assertion level.[9] Further audit procedures comprise tests of controls and substantive procedures. Procedures planned or performed by the internal audit function may be the same as, or be similar to, the

[9]Paragraph .06 of section 330.

further audit procedures that the external auditor would design and perform. Accordingly, subject to the requirements of this section, the external auditor may determine that it is appropriate to use the work of the internal audit function to modify the nature or timing, or reduce the extent, of further audit procedures to be performed directly by the external auditor. The internal audit function may have performed, or may be planning to perform

- tests of relevant controls upon which the external auditor intends to rely in determining the nature, timing, and extent of substantive procedures. For example, the work of the internal audit function may include tests of relevant controls that address the risks of material misstatement related to the completeness of accounts payable. The results of the internal audit function's tests may provide evidence about the effectiveness of controls and, accordingly, the external auditor may be able to use such tests of controls performed by the internal audit function to modify the nature or timing, or reduce the extent of, testing of controls the external auditor would otherwise have performed directly.
- substantive procedures. For example, the internal audit function, as part of its work, may confirm certain accounts receivable and observe certain physical inventories. By using such work of the internal audit function in obtaining audit evidence, the external auditor may be able to change the timing of the confirmation procedures, the number of accounts receivable to be confirmed, or the number of locations of physical inventories to be observed.

The internal audit function's plan may also include procedures related to financial information of components of a group. The external auditor may coordinate work with the internal auditors (in accordance with paragraph .20 of this section) and reduce the number of the entity's components at which the external auditor would otherwise need to perform audit procedures in accordance with the requirements of section 600A, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors)*.

.A21 Other examples of work of the internal audit function that can be used in obtaining audit evidence by the external auditor include the following:

- Tracing transactions through the information system relevant to financial reporting
- Testing of compliance with regulatory requirements

.A22 The external auditor's determination of the planned nature and extent of use of the work of the internal audit function in obtaining audit evidence will be influenced by the external auditor's evaluation of the extent to which the internal audit function's organizational status and relevant policies and procedures adequately support the objectivity of the internal auditors and the level of competence of the internal audit function in paragraph .13. In addition, the amount of judgment needed in planning, performing, and evaluating such work and the assessed risk of material misstatement at the assertion level are inputs to the external auditor's determination. Further, as described in paragraph .14, circumstances exist in which the external auditor cannot use the work of the internal audit function in obtaining audit evidence for purpose of the audit.

.A23 When evaluating whether, in aggregate, using the work of the internal audit function to the extent planned, together with any use of internal auditors to provide direct assistance, would result in the external auditor still being sufficiently involved in the audit, the external auditor may consider the external auditor's responsibility to address all relevant requirements of this section, as well as the other standards (for example, in accordance with paragraph .16, the external auditor is required to make all significant judgments). It is not anticipated that the external auditor's evaluation of using work of the internal audit function would be based on a quantitative analysis (for example, percentage of hours spent by internal audit personnel in respect of the work being used by the external auditor relative to total engagement hours).

Judgments in Planning and Performing Audit Procedures and Evaluating Results (Ref: par. .17a)

.A24 As the degree of judgment involved in planning and performing the audit procedures or evaluating the audit evidence increases, the need for the external auditor to perform more procedures directly in accordance with paragraph .17 increases.

Assessed Risk of Material Misstatement (Ref: par. .17b)

.A25 For a particular account balance, class of transaction, or disclosure, the higher an assessed risk of material misstatement at the assertion level, the more judgment is often involved in planning and performing the audit procedures and evaluating the results thereof. In such circumstances, the external auditor will need to perform more procedures directly in accordance with paragraph .17 and, accordingly, make less use of the work of the internal audit function in obtaining sufficient appropriate audit evidence. Furthermore, as explained in section 200,[10] the higher the assessed risks of material misstatement, the more persuasive the audit evidence required by the external auditor will need to be and, therefore, the external auditor will need to perform more of the work directly.

.A26 As explained in SAS No. 145,[11] significant risks are risks assessed close to the upper end of the spectrum of inherent risk and, therefore, the external auditor's ability to use the work of the internal audit function in relation to significant risks will be restricted to procedures that involve limited judgment. In addition, when the risks of material misstatement is other than low, the use of the work of the internal audit function in obtaining audit evidence alone is unlikely to reduce audit risk to an acceptably low level and eliminate the need for the external auditor to perform some tests directly. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A27 Carrying out procedures in accordance with this section may cause the external auditor to reevaluate the assessment of the risks of material misstatement. Consequently, this may affect the external auditor's determination of whether and how to use the work of the internal audit function in obtaining audit evidence.

---

[10]Paragraph .A33 of section 200.

[11]Paragraph .04 of section 315.

Communicating With Those Charged With Governance (Ref: par. .19)

.A28 In accordance with section 260,[12] the external auditor is required to communicate an overview of the planned scope and timing of the audit with those charged with governance. The planned use of the work of the internal audit function in obtaining audit evidence is an integral part of the external auditor's overall audit strategy and, therefore, is relevant to those charged with governance for their understanding of the proposed audit approach.

Using the Work of the Internal Audit Function in Obtaining Audit Evidence

Discussion and Coordination With the Internal Audit Function in Obtaining Audit Evidence (Ref: par. .20)

.A29 In discussing the planned use of the work of the internal audit function in obtaining audit evidence, as a basis for coordinating the respective activities, it may be useful to address the following:

- The timing of such work
- The nature of the work performed
- The extent of audit coverage
- Materiality for the financial statements as a whole (and, if applicable, materiality level or levels for particular classes of transactions, account balances, or disclosures) and performance materiality
- Proposed methods of item selection and sample sizes
- Documentation of the work performed
- Review and reporting procedures

.A30 Coordination between the external auditor and the internal audit function is effective when, for example

- discussions take place at appropriate intervals throughout the period.
- the external auditor informs the internal audit function of significant matters that may affect the function.
- the external auditor is advised of, and has access to, relevant reports of the internal audit function and is informed of any significant matters that come to the attention of the function when such matters may affect the work of the external auditor so that the external auditor is able to consider the implications of such matters for the audit engagement.

Although the external auditor is not precluded from using work that the internal audit function has already performed, coordination of activities between the external auditor and

[12] Paragraph .11 of section 260.

internal audit function is likely to be most effective when appropriate interaction occurs before the internal audit function performs the work.

.A31 Section 200[13] addresses the importance of the external auditor planning and performing the audit with professional skepticism, including being alert to information that brings into question the reliability of documents and responses to inquiries to be used as audit evidence.

.A32 Communication with the internal audit function throughout the engagement may provide opportunities for internal auditors to bring matters that may affect the work of the external auditor to the external auditor's attention.[14] The external auditor is then able to take such information into account in the external auditor's identification and assessment of risks of material misstatement. In addition, if such information may be indicative of a heightened risk of a material misstatement of the financial statements or may be regarding any actual, suspected, or alleged fraud, the external auditor can take this into account in the external auditor's identification of risk of material misstatement due to fraud in accordance with section 240, *Consideration of Fraud in a Financial Statement Audit*.

Procedures to Determine the Adequacy of the Work of the Internal Audit Function (Ref: par. .22–.23)

.A33 The external auditor's audit procedures on the body of work of the internal audit function as a whole that the external auditor plans to use provide a basis for evaluating the overall quality of the function's work and the objectivity with which it has been performed.

.A34 The procedures the external auditor may perform to evaluate the quality of the work performed and the conclusions reached by the internal audit function, in addition to reperformance in accordance with paragraph .23, include the following:

- Making inquiries of appropriate individuals within the internal audit function
- Observing procedures performed by the internal audit function
- Reviewing the internal audit function's work program and working papers

.A35 The more judgment involved, the higher the assessed risk of material misstatement, the less the internal audit function's organizational status and relevant policies and procedures adequately support the objectivity of the internal auditors, or the lower the level of competence of the internal audit function, the more audit procedures are needed to be performed by the external auditor on the overall body of work of the internal audit function to support the decision to use the work of the function in obtaining sufficient appropriate audit evidence on which to base the audit opinion.

Reperformance (Ref: par. .23)

.A36 For purposes of this section, *reperformance* involves the external auditor's independent execution of procedures to validate the conclusions reached by the internal audit function.

[13]Paragraphs .17 and .A22 of section 200.

[14]Paragraph .A120 of section 315A.

This objective may be accomplished by examining items already examined by the internal audit function or sufficient other similar items not actually examined by the internal audit function. Reperformance provides more persuasive evidence regarding the adequacy of the work of the internal audit function compared to other procedures the external auditor may perform, as described in paragraph .A34. Although it is not necessary for the external auditor to reperform some of the work of the internal audit function in each area that is being used, some reperformance is required on the body of work of the internal audit function as a whole that the external auditor intends to use in accordance with paragraph .23. The external auditor is more likely to focus reperformance in those areas where more judgment was exercised by the internal audit function in planning, performing, and evaluating the results of the audit procedures and in areas of higher risk of material misstatement.

Determining Whether, in Which Areas, and to What Extent Internal Auditors Can Be Used to Provide Direct Assistance

Determining Whether Internal Auditors Can Be Used to Provide Direct Assistance for Purposes of the Audit (Ref: par. .25–.26)

.A37 The external auditor may obtain direct assistance from the internal auditors to carry out audit procedures that otherwise would be performed directly by the external auditors themselves. In such circumstances, the internal auditors are under the direction, supervision, and review of the external auditor.

.A38 In accordance with paragraph .25, the external auditor evaluates the existence and significance of any threats to the objectivity and level of competence of the internal auditors who will be providing direct assistance on the audit before assigning them to specific tasks. Evaluating the existence and significance of threats to objectivity includes evaluating safeguards applied to reduce or eliminate the threats.

.A39 As stated in paragraph .A7, *objectivity* refers to the ability to perform the proposed work without allowing bias, conflict of interest, or undue influence of others to override professional judgments. In evaluating the existence and significance of any threats to the objectivity of an individual internal auditor, the external auditor may consider the extent to which the internal audit function's organizational status and relevant policies and procedures support the objectivity of the internal auditors, including, for example, policies and procedures addressing association with the division or department in the entity to which the work relates. Additionally, other matters may come to the external auditor's attention that may be relevant to the external auditor's evaluation of the objectivity of the internal auditor.

.A40 In evaluating the level of competence of an internal auditor, many of the factors in paragraph .A8 may also be relevant but in the context of individual internal auditors and the work to which they may be assigned.

.A41 The external auditor may determine it is necessary to specifically instruct the internal auditors to keep confidential specific matters, as instructed by the external auditor, and to inform the external auditor of any threat to their objectivity. In some situations, the external auditor may determine it to be necessary to request written acknowledgment from the internal auditors of having understood such instruction by the external auditor.

Determining the Nature and Extent of Work That Can Be Assigned to Internal Auditors Providing Direct Assistance (Ref: par. .27)

.A42 Paragraphs .A18–.A27 also provide relevant guidance in determining the nature and extent of work that may be assigned to the internal auditors providing direct assistance. As the materiality of the financial statement amounts increases and either the assessed risks of material misstatement or the amount of judgment involved increases, the need for the external auditor to perform procedures directly increases. As these factors decrease, the need for the external auditor to perform procedures directly decreases.

.A43 In determining the nature of work that may be assigned to internal auditors providing direct assistance, the external auditor is careful to limit such work to those areas that would be appropriate for internal auditors to be assigned. Examples of activities and tasks that would not be appropriate for internal auditors to provide direct assistance include the following:

- Making required inquiries of entity personnel or those charged with governance related to the identification of fraud risks and determining the procedures to respond to such risks[15]
- Determination of unpredictable audit procedures as addressed in section 240

Using Internal Auditors to Provide Direct Assistance (Ref: par. .18 and .29–.31)

.A44 If the external auditor plans to use the internal audit function in obtaining audit evidence and also plans to use internal auditors to provide direct assistance, only one evaluation would be necessary to address the requirements of paragraphs .18 and .29.

.A45 The written acknowledgment required by paragraph .30 may be included within the audit engagement letter (or other suitable form of written agreement of the terms of engagement)[16] or could be included in a separate document prepared by the external auditor and acknowledged in writing by management or those charged with governance, as appropriate.

.A46 The direction, supervision, and review by the external auditor of the audit procedures performed by the internal auditors need to be sufficient in order for the external auditor to be satisfied that sufficient appropriate audit evidence has been obtained to support the conclusions based on that work. Because individuals in the internal audit function are not independent of the entity as is required of the external auditor when expressing an opinion on financial statements, the external auditor's involvement in these circumstances may be of a different nature or more extensive than if members of the engagement team perform the work.

---

[15]Paragraphs .17–.21 of section 240, *Consideration of Fraud in a Financial Statement Audit*.

[16]See paragraph .10 of section 210A, *Terms of Engagement*.

.A47 The nature, timing, and extent of direction, supervision, and review of the audit procedures performed by the internal auditors is also dependent on the outcome of the external auditor's evaluation of the objectivity and the level of competence of, and the nature and extent of audit procedures to be performed by, the internal auditors. Directing and supervising the internal auditors involves informing them of their responsibilities, the objectives of the procedures they are to perform, and matters that may affect the nature, timing, and extent of audit procedures, such as possible accounting and auditing issues. In reviewing the work performed by the internal auditors, the external auditor's considerations include whether the evidence obtained is sufficient and appropriate in the circumstances, and that it supports the conclusions reached.

AU-C Section 620

Using the Work of an Auditor's Specialist

Source: SAS No. 122; SAS No. 144; SAS No. 145.

See section 9620 for interpretations of this section.

Effective for audits of financial statements for periods ending on or after December 15, 2012, unless otherwise indicated.

Note

In June 2022, the Auditing Standards Board issued Statement on Auditing Standards No. 146, *Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, which contains amendments to this section.

The amendments are effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025, and can be viewed in the appendix of section 220 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibilities relating to the work of an individual or organization possessing expertise in a field other than accounting or auditing when that work is used to assist the auditor in obtaining sufficient appropriate audit evidence.

.02 This section does not address

a. situations in which the engagement team includes a member or consults an individual or organization with expertise in a specialized area of accounting or auditing, which are addressed in section 220A, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, and section 300, *Planning an Audit*,[1,2] or

[1]Paragraphs .A10 and .A20–.A22 of section 220A, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards.*

b. the auditor's use of the work of an individual or organization possessing expertise in a field other than accounting or auditing, whose work in that field is used by the entity to assist the entity in preparing the financial statements (a management's specialist), which is addressed in section 501, *Audit Evidence — Specific Considerations for Selected Items*.[3]

[Revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142.]

The Auditor's Responsibility for the Audit Opinion

.03 The auditor has sole responsibility for the audit opinion expressed, and that responsibility is not reduced by the auditor's use of the work of an auditor's specialist. Nonetheless, if the auditor using the work of an auditor's specialist, having followed this section, concludes that the work of that specialist is adequate for the auditor's purposes, the auditor may accept that specialist's findings or conclusions in the specialist's field as appropriate audit evidence.

Effective Date

.04 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objectives

.05 The objectives of the auditor are

a. to determine whether to use the work of an auditor's specialist and

b. if using the work of an auditor's specialist, to determine whether that work is adequate for the auditor's purposes.

Definitions

.06 For purposes of generally accepted auditing standards, the following terms have the meanings attributed as follows:

Auditor's specialist. An individual or organization possessing expertise in a field other than accounting or auditing, whose work in that field is used by the auditor to assist the auditor in obtaining sufficient appropriate audit evidence. An auditor's specialist may be either an auditor's internal specialist (who is a partner[4] or staff, including temporary staff, of the auditor's firm or a network firm) or an auditor's external specialist. (Ref: par. .A1–.A4)

---

[2]Paragraph .12 of section 300, *Planning an Audit*.

[3]Paragraph .27 of section 501, *Audit Evidence — Specific Considerations for Selected Items*. [Footnote revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142.]

[4]*Partner* and *firm* should be read as referring to their governmental equivalents when relevant.

Expertise. Skills, knowledge, and experience in a particular field.

Management's specialist. An individual or organization possessing expertise in a field other than accounting or auditing, whose work in that field is used by the entity to assist the entity in preparing the financial statements.

Requirements

Determining the Need for an Auditor's Specialist

.07 If expertise in a field other than accounting or auditing is necessary to obtain sufficient appropriate audit evidence, the auditor should determine whether to use the work of an auditor's specialist. (Ref: par. .A5–.A10)

Nature, Timing, and Extent of Audit Procedures

.08 The nature, timing, and extent of the auditor's procedures with respect to the requirements in paragraphs .09–.13 will vary depending on the circumstances. In determining the nature, timing, and extent of those procedures, the auditor should consider matters including (Ref: par. .A11)

a. the nature of the matter to which the work of the auditor's specialist relates;

b. the risks of material misstatement in the matter to which the work of the auditor's specialist relates;

c. the significance of the work of the auditor's specialist in the context of the audit;

d. the auditor's knowledge of, and experience with, previous work performed by the auditor's specialist; and

e. whether the auditor's specialist is subject to the auditor's firm's quality control policies and procedures. (Ref: par. .A12–.A14)

The Competence, Capabilities, and Objectivity of the Auditor's Specialist

.09 The auditor should evaluate whether the auditor's specialist has the necessary competence, capabilities, and objectivity for the auditor's purposes. In the case of an auditor's external specialist, the evaluation of objectivity should include inquiry regarding interests and relationships that may create a threat to the objectivity of the auditor's specialist. (Ref: par. .A15–.A22)

Obtaining an Understanding of the Field of Expertise of the Auditor's Specialist

.10 The auditor should obtain a sufficient understanding of the field of expertise of the auditor's specialist to enable the auditor to (Ref: par. .A23–.A24)

a. determine the nature, scope, and objectives of the work of the auditor's specialist for the auditor's purposes and

b. evaluate the adequacy of that work for the auditor's purposes.

Agreement With the Auditor's Specialist

.11 The auditor should agree, in writing when appropriate, with the auditor's specialist regarding (Ref: par. .A25–.A29)

a. the nature, scope, and objectives of the work of the auditor's specialist; (Ref: par. .A30)

b. the respective roles and responsibilities of the auditor and the auditor's specialist; (Ref: par. .A31–.A32)

c. the nature, timing, and extent of communication between the auditor and the auditor's specialist, including the form of any report to be provided by the auditor's specialist; and (Ref: par. .A33)

d. the need for the auditor's specialist to observe confidentiality requirements. (Ref: par. .A34)

Evaluating the Adequacy of the Work of the Auditor's Specialist

.12 The auditor should evaluate the adequacy of the work of the auditor's specialist for the auditor's purposes, including

a. the relevance and reasonableness of the findings and conclusions of the auditor's specialist and their consistency with other audit evidence. (Ref: par. .A35–.A37)

b. If the work of the auditor's specialist involves the use of significant assumptions and methods,

    i. obtaining an understanding of those assumptions and methods and

    ii. evaluating the relevance and reasonableness of those assumptions and methods in the circumstances, giving consideration to the rationale and support provided by the specialist, and in relation to the auditor's other findings and conclusions. (Ref: par. .A38–.A40)

c. If the work of the auditor's specialist involves the use of source data that is significant to the work of the auditor's specialist, the relevance, completeness, and accuracy of that source data. (Ref: par. .A41–.A42)

.13 If the auditor determines that the work of the auditor's specialist is not adequate for the auditor's purposes, the auditor should (Ref: par. .A44)

a. agree with the auditor's specialist on the nature and extent of further work to be performed by the auditor's specialist or

b. perform additional audit procedures appropriate to the circumstances.

Reference to the Auditor's Specialist in the Auditor's Report

.14 The auditor should not refer to the work of an auditor's specialist in an auditor's report containing an unmodified opinion.

.15 If the auditor makes reference to the work of an auditor's external specialist in the auditor's report because such reference is relevant to an understanding of a modification to the auditor's opinion, the auditor should indicate in the auditor's report that such reference does not reduce the auditor's responsibility for that opinion. (Ref: par. .A46)

Application and Other Explanatory Material

Definitions

Auditor's Specialist (Ref: par. .06)

.A1 Expertise in a field other than accounting or auditing may include expertise regarding such matters as the following:

- The valuation of complex financial instruments and nonfinancial assets and liabilities measured at fair value such as land and buildings, plant and machinery, jewelry, works of art, antiques, intangible assets, assets acquired and liabilities assumed in business combinations, and assets that may have been impaired
- The actuarial calculation of liabilities associated with insurance contracts or employee benefit plans
- The estimation of oil and other mineral reserves
- The valuation of environmental liabilities and site cleanup costs
- The interpretation of contracts, laws, and regulations
- The analysis of complex or unusual tax compliance issues
- The determination of physical characteristics relating to quantity on hand or condition (for example, quantity or condition of minerals, or materials stored in stockpiles)

.A2 In many cases, distinguishing between expertise in accounting or auditing and expertise in another field will be straightforward, even when this involves a specialized area of accounting or auditing.[5] For example, an individual with expertise in applying methods of accounting for deferred income tax can often be easily distinguished from a specialist in taxation law. The former is not a specialist for the purposes of this section because this constitutes accounting expertise; the latter is a specialist for the purposes of this

[5]Paragraphs .A18–.A19 of section 300 address the auditor's determination of the extent of involvement of professionals possessing specialized skills.

section because this constitutes legal expertise. Similar distinctions also may be able to be made in other areas (for example, between expertise in methods of accounting for financial instruments and expertise in complex modeling for the purpose of valuing financial instruments). However, in some cases, particularly those involving an emerging area of accounting or auditing expertise, distinguishing between specialized areas of accounting or auditing and expertise in another field will be a matter of professional judgment. Applicable professional rules and standards regarding education and competency requirements for accountants and auditors may assist the auditor in exercising that judgment.

.A3 An individual may possess expertise in accounting or auditing, as well as expertise in a field other than accounting or auditing (for example, an actuary also may be an accountant). In that circumstance, the determination of whether that individual is an auditor or an auditor's specialist depends on the nature of the work performed by that individual that the auditor is using for purposes of the audit.

.A4 It is necessary to apply professional judgment when considering how the requirements of this section are affected by the fact that an auditor's specialist may be either an individual or an organization. For example, when evaluating the competence, capabilities, and objectivity of an auditor's specialist, it may be that the specialist is an organization the auditor has previously used, but the auditor has no prior experience with the individual specialist assigned by the organization for the particular engagement, or it may be the reverse (that is, the auditor may be familiar with the work of an individual specialist but not with the organization that specialist has joined). In either case, both the personal attributes of the individual and the managerial attributes of the organization (such as systems of quality control the organization implements) may be relevant to the auditor's evaluation.

Determining the Need for an Auditor's Specialist (Ref: par. .07)

.A5 An auditor's specialist may be needed to assist the auditor in one or more of the following:

- Obtaining an understanding of the entity and its environment, the applicable financial reporting framework, and the entity's system of internal control
- Identifying and assessing the risks of material misstatement
- Determining and implementing overall responses to assessed risks at the financial statement level
- Designing and performing additional audit procedures to respond to assessed risks at the relevant assertion level, which may comprise tests of controls or substantive procedures
- Evaluating the sufficiency and appropriateness of audit evidence obtained in forming an opinion on the financial statements

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A6 The risks of material misstatement may increase when expertise in a field other than accounting is needed for management to prepare the financial statements, for example, because this may indicate some complexity or because management may not possess knowledge of the field of expertise. If, in preparing the financial statements, management does not possess the necessary expertise, a management's specialist may be used in addressing those risks. Relevant controls, including controls that relate to the work of a management's specialist, if any, also may reduce the risks of material misstatement.

.A7 If the preparation of the financial statements involves the use of expertise in a field other than accounting, the auditor, who is skilled in accounting and auditing, may not possess the necessary expertise to audit those financial statements. The engagement partner is required by section 220A to be satisfied that the engagement team and any external auditor's specialists who are not part of the engagement team, collectively, have the appropriate competence and capabilities to perform the audit engagement.[6] Further, the auditor is required by section 300 to ascertain the nature, timing, and extent of resources necessary to perform the engagement.[7] The auditor's determination of whether to use the work of an auditor's specialist, and, if so, when and to what extent, assists the auditor in meeting these requirements. As the audit progresses or as circumstances change, the auditor may need to revise earlier decisions about using the work of an auditor's specialist.

.A8 An auditor who is not a specialist in a relevant field other than accounting or auditing may nevertheless be able to obtain a sufficient understanding of that field to perform the audit without an auditor's specialist. This understanding may be obtained through, for example

- experience in auditing entities that require such expertise in the preparation of their financial statements.
- education or professional development in the particular field. This may include formal courses or discussion with individuals possessing expertise in the relevant field for the purpose of enhancing the auditor's own capacity to deal with matters in that field. Such discussion differs from consultation with an auditor's specialist regarding a specific set of circumstances encountered on the engagement in which that specialist is given all the relevant facts that will enable the specialist to provide informed advice about the particular matter (see section 220A).[8]

.A9 In other cases, however, the auditor may determine that it is necessary, or may choose, to use an auditor's specialist to assist in obtaining sufficient appropriate audit evidence. Considerations when deciding whether to use an auditor's specialist may include the following:

- Whether management has used a specialist in preparing the financial statements (see paragraph .A10)

[6]Paragraph .16 of section 220A.

[7]Paragraph .08*e* of section 300.

[8]Paragraph .A21 of section 220A.

- The nature and significance of the matter, including its complexity
- The risks of material misstatement of the matter
- The expected nature of procedures to respond to identified risks, including the auditor's knowledge of, and experience with, the work of specialists regarding such matters and the availability of alternative sources of audit evidence

.A10 When management uses a management's specialist in preparing the financial statements, the auditor's decision on whether to use an auditor's specialist also may be influenced by such factors as the following:

- The nature, scope, and objectives of the work of the management's specialist
- Whether the management's specialist is employed by the entity or is a party engaged by it to provide relevant services
- The extent to which management can exercise control or influence over the management's specialist (including, when applicable, the organization that employs the individual specialist), thereby influencing the work of the management's specialist
- The competence and capabilities of the management's specialist
- Whether the management's specialist is subject to technical performance standards or other professional or industry requirements
- Any controls within the entity over the work of the management's specialist
- The auditor's ability to evaluate the work and findings of the management's specialist without the assistance of an auditor's specialist.

Section 501 addresses the effect of the competence, capabilities, and objectivity of management's specialists on the reliability of audit evidence.[9] [Revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

Nature, Timing, and Extent of Audit Procedures (Ref: par. .08)

.A11 The following factors may suggest the need for different or more extensive procedures than would otherwise be the case:

- The work of the auditor's specialist relates to a significant finding or issue that involves subjective and complex judgments.
- The auditor has not previously used the work of the auditor's specialist and has no prior knowledge of that specialist's competence, capabilities, and objectivity.

[9]Paragraph .27 of section 501. [Footnote revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142.]

- The auditor's specialist is performing procedures that are integral to the audit rather than being consulted to provide advice on an individual matter.
- The specialist is an auditor's external specialist and is not, therefore, subject to the firm's quality control policies and procedures.

The Auditor's Firm's Quality Control Policies and Procedures (Ref: par. .08e)

.A12 An auditor's internal specialist may be a partner or staff, including temporary staff, of the auditor's firm and, therefore, subject to the quality control policies and procedures of that firm in accordance with QM section 10A, *A Firm's System of Quality Control*.[10] An auditor's internal specialist also may be a partner or staff, including temporary staff, of a network firm, which may share common quality control policies and procedures with the auditor's firm.

.A13 In accordance with section 220A, engagement teams are entitled to rely on the firm's system of quality control unless the engagement partner determines that it is inappropriate to do so based on information provided by the firm or other parties.[11] The extent of that reliance will vary with the circumstances and may affect the nature, timing, and extent of the auditor's procedures with respect to such matters as the following:

- Competence and capabilities through recruitment and training programs.
- Objectivity. The auditor's internal specialists are subject to relevant ethical requirements, including those pertaining to independence.
- Agreement with the auditor's specialist.
- The auditor's evaluation of the adequacy of the work of the auditor's specialist. For example, the firm's training programs may provide the auditor's internal specialists with an appropriate understanding of the interrelationship of their expertise with the audit process. Reliance on such training and other firm processes, such as protocols for scoping the work of the auditor's internal specialists, may affect the nature, timing, and extent of the auditor's procedures to evaluate the adequacy of the work of the auditor's specialist.
- Adherence to regulatory and legal requirements through monitoring processes.

Such reliance does not reduce the auditor's responsibility to meet the requirements of this section.

.A14 An auditor's external specialist is not a member of the engagement team and is not subject to quality control policies and procedures in accordance with QM section 10A.[12]

---

[10]Paragraph .13 of QM section 10A, *A Firm's System of Quality Control* .

[11]Paragraph .05 of section 220A.

[12]Paragraph .13 of QM section 10A.

The Competence, Capabilities, and Objectivity of the Auditor's Specialist (Ref: par. .09)

.A15 The competence, capabilities, and objectivity of an auditor's specialist are factors that significantly affect whether the work of the auditor's specialist will be adequate for the auditor's purposes. Competence relates to the nature and level of expertise of the auditor's specialist. Capability relates to the ability of the auditor's specialist to exercise that competence in the circumstances of the engagement. Factors that influence capability may include, for example, geographic location and the availability of time and resources. Objectivity relates to the possible effects that bias, conflict of interest, or the influence of others may have on the professional or business judgment of the auditor's specialist.

.A16 Information regarding the competence, capabilities, and objectivity of an auditor's specialist may come from a variety of sources, such as the following:

- Personal experience with previous work of that specialist
- Discussions with that specialist
- Discussions with other auditors or others who are familiar with that specialist's work
- Knowledge of that specialist's qualifications, membership in a professional body or industry association, license to practice, or other forms of external recognition
- Published papers or books written by that specialist
- The quality control policies and procedures of the auditor's firm and such other procedures the auditor considers necessary in the circumstances (see paragraphs .A12–.A13).

.A17 Matters relevant to evaluating the competence, capabilities, and objectivity of the auditor's specialist include whether that specialist's work is subject to technical performance standards or other professional or industry requirements (for example, ethical standards and other membership requirements of a professional body or industry association, accreditation standards of a licensing body, or requirements imposed by law or regulation).

.A18 Other matters that may be relevant include the following:

- The relevance of the competence of the auditor's specialist to the matter for which that specialist's work will be used, including any areas of specialty within that specialist's field. For example, a particular actuary may specialize in property and casualty insurance but have limited expertise regarding pension calculations.
- The competence of the auditor's specialist with respect to relevant accounting and auditing requirements (for example, knowledge of assumptions and methods, including models, when applicable, that are consistent with the applicable financial reporting framework).
- Whether unexpected events, changes in conditions, or the audit evidence obtained from the results of audit procedures indicate that it may be necessary to reconsider

the initial evaluation of the competence, capabilities, and objectivity of the auditor's specialist as the audit progresses.

.A19 A broad range of circumstances may threaten objectivity (for example, self-interest threats, advocacy threats, familiarity threats, self-review threats, and intimidation threats). Safeguards may eliminate or reduce such threats and may be created by external structures (for example, the profession, legislation, or regulation of the auditor's specialist) or by the work environment of the auditor's specialist (for example, quality control policies and procedures). There also may be safeguards specific to the audit engagement.

.A20 The evaluation of the significance of threats to objectivity and of whether a need exists for safeguards may depend upon the role of the auditor's specialist and the significance of the specialist's work in the context of the audit. There may be some circumstances in which safeguards cannot reduce threats to an acceptable level (for example, if a proposed auditor's specialist is an individual or organization that has played a significant role in preparing the information that is being audited [that is, if the proposed auditor's specialist is a management's specialist]). [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

.A21 When evaluating the objectivity of an auditor's external specialist, in addition to considering information obtained from procedures performed in accordance with section 550, *Related Parties*, the auditor may

a. inquire of the entity and the auditor's specialist about any known interests or relationships that the entity has with the auditor's external specialist (including, when applicable, the organization that employs the individual specialist) that may affect that specialist's objectivity

b. discuss with that specialist any applicable safeguards, including any professional requirements that apply to that specialist, and evaluate whether the safeguards are adequate to reduce threats to an acceptable level. Interests and relationships that may be relevant to discuss with the auditor's specialist include the following:

   i. Financial interests

   ii. Business and personal relationships between the entity and the individual specialist and between the entity and the organization that employs the individual specialist

   iii. Provision of other services to the entity by the specialist, including by the organization in the case of an external specialist that is an organization

In some cases, the auditor may obtain a written representation from the auditor's external specialist about any interests or relationships with the entity of which that specialist is aware. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

.A22 If the auditor believes a relationship between the entity and the auditor's external specialist might impair the objectivity of that specialist, the auditor may perform, or engage another auditor's specialist to perform, additional procedures with respect to some or all of the assumptions, methods, or findings of the auditor's external specialist to determine that the findings are reasonable. The nature and extent of the additional procedures depend on the degree of objectivity of the auditor's external specialist. The need for additional procedures to obtain sufficient appropriate audit evidence increases as the degree of objectivity decreases. For example, if the auditor's external specialist has a low degree of objectivity, it may be necessary for the auditor to perform procedures similar to those used to evaluate the appropriateness of the work of a management's specialist as audit evidence.[13] [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

Obtaining an Understanding of the Field of Expertise of the Auditor's Specialist (Ref: par. .10)

.A23 The auditor may obtain an understanding of the field of expertise of the auditor's specialist through the means described in paragraph .A8 or through discussion with the auditor's specialist.

.A24 Aspects of the field of the auditor's specialist relevant to the auditor's understanding may include the following:

- Whether that field of the auditor's specialist has areas of specialty within it that are relevant to the audit (see paragraph .A18)
- Whether any professional or other standards and regulatory or legal requirements apply
- What assumptions and methods, including models, when applicable, are used by the auditor's specialist, and whether they are generally accepted within that field of the auditor's specialist and appropriate for financial reporting purposes
- The nature of internal and external data or information the auditor's specialist uses

Agreement With the Auditor's Specialist (Ref: par. .11)

.A25 The following matters may vary considerably with the circumstances:

a. The nature, scope, and objectives of the work of the auditor's specialist

b. The respective roles and responsibilities of the auditor and the auditor's specialist

c. The nature, timing, and extent of communication between the auditor and the auditor's specialist.

[13] See paragraphs .26 and .A69–.A83 of section 501, *Audit Evidence — Specific Considerations for Selected Items*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

Therefore, it is required that these matters are agreed between the auditor and the auditor's specialist regardless of whether the specialist is an auditor's external specialist or internal specialist.

.A26 The matters noted in paragraph .08 may affect the level of detail and formality of the agreement between the auditor and the auditor's specialist, including whether it is appropriate that the agreement be in writing. For example, the following factors may suggest the need for a more detailed agreement than would otherwise be the case or for the agreement to be in writing:

- The auditor's specialist will have access to sensitive or confidential entity information.
- The respective roles or responsibilities of the auditor and the auditor's specialist are different from those normally expected.
- Multijurisdictional legal or regulatory requirements apply.
- The matter to which the work of the auditor's specialist relates is highly complex.
- The auditor has not previously used work performed by the auditor's specialist.
- The auditor's use of the work of the auditor's specialist and its significance in the context of the audit is extensive.

.A27 In establishing the agreement with the auditor's specialist, an important consideration is whether the work of the auditor's specialist is subject to any reservation, limitation, or restriction and whether this has implications for the auditor.

.A28 The agreement between the auditor and an auditor's external specialist is generally in the form of an engagement letter. The appendix "Considerations for Agreement Between the Auditor and an Auditor's External Specialist" lists matters that the auditor may consider for inclusion in such an engagement letter or in any other form of agreement with an auditor's external specialist.

.A29 When no written agreement exists between the auditor and the auditor's specialist, evidence of the agreement may be included in, for example

- planning memoranda or related working papers, such as the audit program.
- the policies and procedures of the auditor's firm. In the case of an auditor's internal specialist, the established policies and procedures to which the auditor's specialist is subject may include particular policies and procedures regarding the work of the auditor's specialist. The extent of documentation in the auditor's working papers depends on the nature of such policies and procedures. For example, no documentation may be required in the auditor's working papers if the auditor's firm has detailed protocols covering the circumstances in which the work of such an auditor's specialist is used.

Nature, Scope, and Objectives of Work (Ref: par. .11a)

.A30 It often may be relevant when agreeing on the nature, scope, and objectives of the work of the auditor's specialist to include discussion of any relevant technical performance standards or other professional or industry requirements that the auditor's specialist will follow. Other matters that could affect the nature, scope, and objectives of the auditor's specialist's work include, as applicable, information about the entity and its environment, the entity's processes for developing the related accounting estimate, the entity's use of specialists in developing the estimate, relevant requirements of the applicable financial reporting framework, and possible accounting and auditing issues. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

Respective Roles and Responsibilities (Ref: par. .11b)

.A31 Agreement on the respective roles and responsibilities of the auditor and the auditor's specialist may include the following:

- The degree of responsibility of the auditor's specialist for the following:
  - — Testing of source data, for example, testing data produced by the entity, or evaluating the relevance and reliability of data from sources external to the entity
  - — Evaluating the significant assumptions used by the entity or management's specialist, or developing the auditor's specialist's own assumptions
  - — Evaluating the methods used by the entity or management's specialist, or using the auditor's specialist's own methods
- Consent for the auditor to discuss the findings or conclusions of the auditor's specialist with the entity and others and to include details of the findings or conclusions of the auditor's specialist in the basis for a modified opinion in the auditor's report, if necessary (see paragraph .A46)
- Any agreement to inform the auditor's specialist of the auditor's conclusions concerning the work of the auditor's specialist

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

Working Papers

.A32 Agreement on the respective roles and responsibilities of the auditor and the auditor's specialist also may include agreement about access to, and retention of, each other's working papers. When the auditor uses the work of an internal specialist, the working papers of the auditor's specialist form part of the audit documentation. Subject to any agreement to the contrary, the auditor's external specialist's working papers are its own and do not form part of the audit documentation.

Communication (Ref: par. .11c)

.A33 Effective two way communication facilitates the proper integration of the nature, timing, and extent of the procedures of the auditor's specialist with other work on the audit and appropriate modification of the objectives of the auditor's specialist during the course of the audit. For example, when the work of the auditor's specialist relates to the auditor's conclusions regarding a significant risk, both a formal written report at the conclusion of the work of the auditor's specialist and oral reports as the work progresses may be appropriate. Identification of specific partners or staff who will interact with the auditor's specialist and procedures for communication between the auditor's specialist and the entity assist timely and effective communication, particularly on larger engagements.

Confidentiality (Ref: par. .11d)

.A34 It is necessary for the confidentiality provisions of relevant ethical requirements that apply to the auditor also to apply to the auditor's specialist.[14] Additional requirements may be imposed by law or regulation. The entity also may have requested that specific confidentiality provisions be agreed with the auditor's external specialists.

Evaluating the Adequacy of the Work of the Auditor's Specialist (Ref: par. .12)

.A35 The auditor's evaluation of the competence, capabilities, and objectivity of the auditor's specialist; the auditor's familiarity with the field of expertise of the auditor's specialist; the risk of material misstatement in the matter to which the specialist's work relates; the nature of the work performed by the auditor's specialist; and the significance of the auditor's specialist's work in the context of the audit affect the nature, timing, and extent of audit procedures to evaluate the adequacy of the work of the auditor's specialist for the auditor's purposes. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

The Findings and Conclusions of the Auditor's Specialist (Ref: par. .12a)

.A36 Specific procedures to evaluate the adequacy of the work of the auditor's specialist for the auditor's purposes may include the following:

- Making inquiries of the auditor's specialist
- Reviewing the working papers and reports of the auditor's specialist
- Performing corroborative procedures, such as
  - — observing the work of the auditor's specialist;
  - — examining published data, such as statistical reports from reputable, authoritative sources;
  - — confirming relevant matters with third parties;
  - — performing detailed analytical procedures; and

[14]ET section 1.700.040, *Disclosing Information to a Third-Party Service Provider*. [Footnote revised, January 2015, to reflect conforming changes necessary due to the issuance of the revised AICPA Code of Professional Conduct, effective December 15, 2014. Footnote renumbered by the issuance of SAS No. 144, June 2021.]

   — reperforming calculations

- Engaging in discussion with another specialist with relevant expertise when, for example, the findings or conclusions of the auditor's specialist are not consistent with other audit evidence

- Discussing the report of the auditor's specialist with management

.A37 Relevant factors when evaluating the relevance and reasonableness of the findings or conclusions of the auditor's specialist, whether in a report or other form, may include whether they are

- presented in a manner that is consistent with any standards of the profession or industry of the auditor's specialist;

- clearly expressed, including reference to the objectives agreed with the auditor, the scope of the work performed, and standards applied;

- based on an appropriate period and take into account subsequent events, when relevant; and

- based on appropriate consideration of errors or deviations encountered by the auditor's specialist.

Assumptions, Methods, and Source Data

Assumptions and Methods (Ref: par. .12b)

.A38 When the purpose of the work of the auditor's specialist is to evaluate underlying assumptions and methods, including models, when applicable, used by management in developing an accounting estimate, the auditor's procedures are likely to be primarily directed to evaluating whether the auditor's specialist has adequately reviewed those assumptions and methods. When the purpose of the work of the auditor's specialist is to develop an auditor's point estimate or an auditor's range for comparison with management's point estimate, the auditor's procedures may be primarily directed to evaluating the assumptions and methods, including models, when appropriate, used by the auditor's specialist.

.A39 Section 540A, *Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures*, discusses the assumptions and methods used by management in making accounting estimates, including the use, in some cases, of highly specialized, entity-developed models.[15] Although that discussion is written in the context of the auditor obtaining sufficient appropriate audit evidence regarding management's assumptions and methods, it also may assist the auditor when evaluating the assumptions and methods of an auditor's specialist.

[15]Paragraphs .08, .13, and .15 of section 540A, *Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures*. [Footnote renumbered by the issuance of SAS No. 144, June 2021.]

.A40 When the work of an auditor's specialist involves the use of significant assumptions and methods, the appropriateness and reasonableness of those assumptions and methods used and their application are the responsibility of the auditor's specialist. The auditor is responsible for obtaining an understanding of those assumptions and methods and evaluating the relevance and reasonableness of those assumptions and methods in the circumstances.[16] Factors relevant to the auditor's evaluation of those assumptions and methods include whether they are

- generally accepted within the field of the auditor's specialist;
- consistent with the requirements of the applicable financial reporting framework;
- dependent on the use of specialized models;[17] and
- consistent with those of management and, if not, the reason for, and effects of, the differences.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

Source Data Used by the Auditor's Specialist (Ref: par. .12c)

.A41 Section 500 discusses the auditor's responsibility to consider the relevance and reliability of information to be used as audit evidence, including its source.[18] When the work of an auditor's specialist involves the use of source data that is significant to the work of the auditor's specialist, procedures such as the following may be used to test that data:

- Verifying the origin of the data, including obtaining an understanding of and, when applicable, testing the internal controls over the data and, when relevant, its transmission to the auditor's specialist
- Reviewing the data for completeness and internal consistency

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

.A42 In many cases, the auditor may test source data. However, in other cases, when the nature of the source data used by an auditor's specialist is highly technical in relation to the field of the auditor's specialist, that specialist may test the source data. If the auditor's specialist has tested the source data, inquiry of the auditor's specialist by the auditor or supervision or review of the test of the auditor's specialist may be an appropriate way for the auditor to evaluate that data's relevance, completeness, and accuracy.

---

[16]Paragraph .13 of section 540, *Auditing Accounting Estimates and Related Disclosures*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

[17]Paragraph .14 of section 540A addresses the auditor's consideration of whether specialized skills or knowledge with regard to one or more aspects of the accounting estimates is required in order to obtain sufficient appropriate audit evidence. [Footnote renumbered by the issuance of SAS No. 144, June 2021.]

[18]Paragraphs .07 and .A12–.A24 of section 500, *Audit Evidence*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

Inadequate Work (Ref: par. .13)

.A43 Examples of situations in which the auditor may conclude that the work of the auditor's specialist is not adequate for the auditor's purposes include the following:

- The specialist's use of data or significant assumptions was not based on consideration of relevant information available to the specialist.
- The methods used by the specialist were not appropriate.
- The specialist's work was not performed in accordance with the auditor's instructions.
- The specialist's findings and conclusions are inconsistent with
  - — the results of the work performed by the specialist,
  - — other evidence obtained by the auditor, or
  - — the auditor's understanding of the entity and its environment.
- The specialist's report, or equivalent documentation, contains restrictions, disclaimers, or limitations that affect the auditor's use of the report or work.

[Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

.A44 If the auditor concludes that the work of the auditor's specialist is not adequate for the auditor's purposes and the auditor cannot resolve the matter through the additional audit procedures required by paragraph .13, which may involve additional work being performed by both the auditor's specialist and the auditor or include employing or engaging another specialist, it may be necessary to express a modified opinion in the auditor's report in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*. [Paragraph renumbered by the issuance of SAS No. 144, June 2021.]

Reference to the Auditor's Specialist in the Auditor's Report (Ref: par. .14–.15)

.A45 When key audit matters are included in the auditor's report, the auditor may decide to refer to the work of an auditor's specialist in the description of a key audit matter (for example, in describing the auditor's approach to an accounting estimate that has been identified as having high estimation uncertainty, such as the valuation of complex financial instruments, the auditor may highlight that the auditor used an auditor's internal or external specialist). Such a reference does not reduce the auditor's responsibility for the opinion on the financial statements and is, therefore, not inconsistent, in and of itself, with paragraphs .14–.15.[19] [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

[19] See paragraph .A48 of section 701, *Communicating Key Audit Matters in the Independent Auditor's Report*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

.A46 It may be appropriate to refer to the auditor's external specialist in an auditor's report containing a modified opinion to explain the nature of the modification. In such circumstances, the auditor may need the permission of the auditor's specialist before making such a reference. [Paragraph renumbered by the issuance of SAS No. 144, June 2021.]

Appendix — Considerations for Agreement Between the Auditor and an Auditor's External Specialist (Ref: par. .A28)

.A47 This appendix lists matters that the auditor may consider for inclusion in any agreement with an auditor's external specialist. The following list is illustrative and is not exhaustive; it is intended only to be a guide that may be used in conjunction with the considerations outlined in this section. Whether to include particular matters in the agreement depends on the circumstances of the engagement. The list also may be of assistance in considering the matters to be included in an agreement with an auditor's internal specialist.

Nature, Scope, and Objectives of the Auditor's External Specialist's Work

The following matters are examples of the nature, scope, and objectives of the auditor's external specialist's work:

- The nature and scope of the procedures to be performed by the auditor's external specialist
- The objectives of the auditor's external specialist's work in the context of materiality and risk considerations concerning the matter to which the auditor's external specialist's work relates and, when relevant, the applicable financial reporting framework
- Any relevant technical performance standards or other professional or industry requirements the auditor's external specialist will follow
- The assumptions and methods, including models, when applicable, the auditor's external specialist will use and their authority
- The effective date of, or, when applicable, the testing period for, the subject matter of the auditor's external specialist's work and requirements regarding subsequent events

The Respective Roles and Responsibilities of the Auditor and the Auditor's External Specialist

The following matters are examples of the respective roles and responsibilities of the auditor and the auditor's external specialist:

- Relevant auditing and accounting standards and relevant regulatory or legal requirements
- The consent of the auditor's external specialist to the auditor's intended use of the report of the auditor's specialist, including any reference to it or disclosure of it to others (for example, reference to it in the basis for a modified opinion in the auditor's report, if necessary, or disclosure of it to management or an audit committee)
- The nature and extent of the auditor's review of the auditor's external specialist's work
- Whether the auditor or the auditor's external specialist will test source data

- The auditor's external specialist's access to the entity's records, files, personnel, and specialists engaged by the entity
- Procedures for communication between the auditor's external specialist and the entity
- The auditor's and the auditor's external specialist's access to each other's working papers
- Ownership and control of working papers during and after the engagement, including any file retention requirements
- The auditor's external specialist's responsibility to perform work with due skill and care
- The auditor's external specialist's competence and capability to perform the work
- The expectation that the auditor's external specialist will use all knowledge that the specialist has that is relevant to the audit or, if not, will inform the auditor
- Any restriction on the auditor's external specialist's association with the auditor's report
- Any agreement to inform the auditor's external specialist of the auditor's conclusions concerning the work of the auditor's external specialist

Communications and Reporting

The following matters are examples of communications and reporting:

- Methods and frequency of communications, including the following:
  - — How the auditor's external specialist's findings or conclusions will be reported (for example, written report, oral report, ongoing input to the engagement team)
  - — Identification of specific persons within the engagement team who will liaise with the auditor's external specialist
- When the auditor's external specialist will complete the work and report findings or conclusions to the auditor
- The auditor's external specialist's responsibility to communicate promptly any potential delay in completing the work and any potential reservation or limitation on the findings and conclusions of the auditor's specialist
- The auditor's external specialist's responsibility to communicate promptly instances in which the entity restricts the access to records, files, personnel of the auditor's external specialist, or management's specialists engaged by the entity
- The auditor's external specialist's responsibility to communicate to the auditor all information that the auditor's external specialist believes may be relevant to the audit, including any changes in circumstances previously communicated

- The auditor's external specialist's responsibility to communicate circumstances that may create threats to the objectivity of the auditor's external specialist and any relevant safeguards that may eliminate or reduce such threats to an acceptable level

Confidentiality

The following matters are examples of confidentiality:

- The need for the auditor's specialist to observe confidentiality requirements, including the following:
  - — The confidentiality provisions of relevant ethical requirements that apply to the auditor
  - — Additional requirements that may be imposed by law or regulation, if any (for example, specific confidentiality provisions requested by the entity)

[Paragraph renumbered by the issuance of SAS No. 144, June 2021.]

AU-C Section 9620

Using the Work of an Auditor's Specialist: Auditing Interpretations of Section 620

Interpretation No. 1, "The Use of Legal Interpretations as Audit Evidence to Support Management's Assertion That a Transfer of Financial Assets Has Met the Isolation Criterion in Paragraphs 7–14 of Financial Accounting Standards Board *Accounting Standards Codification* 860-10-40," has not been updated to reflect the issuance of Financial Accounting Standards Board (FASB) Statement No. 166, *Accounting for Transfers of Financial Assets*. FASB Statement No. 166 was incorporated into FASB *Accounting Standards Codification* (ASC) by FASB Accounting Standards Update No. 2009-16, *Transfers and Servicing (Topic 860): Accounting for Transfers of Financial Assets*, and is discussed in FASB ASC 860, *Transfers and Servicing*.

In addition, this interpretation has not been updated for changes to the Federal Deposit Insurance Corporation's (FDIC's) safe harbor for financial assets transferred in connection with securitizations and participations. The FDIC's final amendments to the safe harbor, *Treatment by the Federal Deposit Insurance Corporation as Conservator or Receiver of Financial Assets Transferred by an Insured Depository Institution in Connection With a Securitization or Participation After September 30, 2010* (www.fdic.gov/news/news/press/2010/pr10216.html), were issued in September 2010. The safe harbor provides important protections for securitizations and participations by confirming that in the event of a bank failure, the FDIC would not try to reclaim loans transferred into such transactions.

In light of the issuance of FASB Statement No. 166 and the FDIC's changes to the safe harbor, the AICPA's Auditing Standards Board is currently in the process of revising this interpretation. Auditors should be alert for such revisions; however, the guidance in this interpretation continues to be relevant.

1. The Use of Legal Interpretations as Audit Evidence to Support Management's Assertion That a Transfer of Financial Assets Has Met the Isolation Criterion in Paragraphs 7–14 of Financial Accounting Standards Board *Accounting Standards Codification* 860-10-40

.01 *Introduction* — Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 860,[1] *Transfers and Servicing*, requires that a transferor of financial assets must surrender control over the financial assets to account for the transfer as a sale. According to FASB ASC 860-10-40-5(a), one of several conditions that must be met to provide evidence of surrender of control is that the transferred assets have been isolated from the transferor—put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership.

Paragraphs 8–10 of FASB ASC 860-10-40 describe in greater detail the evidence required to support management's assertion that transferred financial assets have been isolated:

> Derecognition of transferred assets is appropriate only if the available evidence provides reasonable assurance that the transferred assets would be beyond the reach of the powers of a bankruptcy trustee or other receiver for the transferor or any *consolidated affiliate of the transferor*[2] that is not a special-purpose corporation or other entity designed to make remote the possibility that it would enter bankruptcy or other receivership (see FASB ASC 860-10-55-23[c]).The nature and extent of supporting evidence required for an assertion in financial statements that transferred financial assets have been isolated—put presumptively beyond the reach of the transferor and its creditors, either by a single transaction or a series of transactions taken as a whole—depend on the facts and circumstances. FASB ASC 860 does not provide guidance as to the type and amount of evidence that must be obtained to conclude that transferred financial assets have been isolated from the transferor. All available evidence that either supports or questions an assertion shall be considered. That consideration includes making judgments about whether the contract or circumstances permit the transferor to revoke the transfer. It also may include making judgments about the kind of bankruptcy or other receivership into which a transferor or SPE might be placed, whether a transfer of financial assets would likely be deemed a true sale at law, whether the transferor is affiliated with the transferee, and other factors pertinent under applicable law.

A determination about whether the isolation criterion has been met to support a conclusion regarding surrender of control is largely a matter of law. This aspect of surrender of control, therefore, is assessed primarily from a legal perspective.

.02 *Effective Date and Applicability* — This interpretation is effective for auditing procedures related to transfers of financial assets that are required to be accounted for under FASB ASC 860.[3]

.03 *Question* — What are the auditor's responsibilities in determining whether to use the work of a legal specialist[4] to obtain persuasive evidence to support management's assertion that a transfer of financial assets meets the isolation criterion of FASB ASC 860-10-40-5(a)?

---

[1][Footnote deleted, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[2]The Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) glossary defines *consolidated affiliate of the transferor* as "an entity whose assets and liabilities are included with those of the transferor in the consolidated, combined, or other financial statements being presented." [Footnote added, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[3][Footnote renumbered and deleted, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.04 *Interpretation* — Section 501, *Audit Evidence — Specific Considerations for Selected Items*, states that the "preparation of an entity's financial statements may require expertise in a field other than accounting or auditing, such as actuarial calculations, valuations, or engineering data. The entity uses a management's specialist in these fields to obtain the needed expertise to prepare the financial statements."[5]

.05 Use of a management's specialist may not be necessary to obtain appropriate audit evidence to support management's assertion that the isolation criterion is met in certain situations, such as when there is a routine transfer of financial assets that does not result in any continuing involvement by the transferor.[6]

.06 Many transfers of financial assets involve complex legal structures, continuing involvement by the transferor, or other legal issues that, in the auditor's judgment, make it difficult to determine whether the isolation criterion is met. In these situations, use of a legal specialist usually is necessary. A legal specialist formulating an opinion about whether a transfer isolates the transferred assets beyond the reach of the transferor and its creditors may consider, among other things, the structure of the transaction taken as a whole, the nature of any continuing involvement, the type of insolvency or other receivership proceedings to which the transferor might become subject, and other factors pertinent under applicable law.

.07 If a legal opinion is used as evidence to support the accounting conclusion related to multiple transfers under a single structure, and such transfers occur over an extended period of time under that structure, the auditor is required to evaluate the appropriateness of the legal opinion,[7] which includes evaluating the need for management to obtain periodic updates of that opinion to confirm that there have been no subsequent changes in relevant law or applicable regulations that may change the applicability of the previous opinion to such transfers. The auditor also is required to evaluate the need for management to obtain periodic updates of an opinion to confirm that there have been no subsequent changes in relevant law or applicable regulations that may affect the conclusions reached in the previous opinion in the case of other transfers (see FASB ASC 860-10-40-41 and FASB ASC 860-20-25).

---

[4]Client's internal or external attorney who is knowledgeable about relevant sections of the U.S. Bankruptcy Code and other federal, state, or foreign laws, as applicable. [Footnote renumbered, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[5]Paragraph .A70 of section 501, *Audit Evidence — Specific Considerations for Selected Items*. [Footnote revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142.]

[6]FASB ASC 860-10-55-28 characterizes no continuing involvement with the transferred assets as "no servicing responsibilities, no participation in future cash flows, no recourse obligations other than standard representations and warranties that the financial assets transferred met the delivery requirements under the arrangement, no further involvement of any kind. The transferee is significantly limited in its ability to pledge or exchange the transferred assets."

If a contractual provision (such as a call or removal of accounts provision) gives the transferor the unilateral ability to require the return of specific financial assets, the auditor should consider the effect of FASB ASC 860-10-40-5(c). [Footnote renumbered and revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[7]Paragraph .27*c* of section 501. [Footnote revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142.]

.08 If management's assertion with respect to a new transaction is that the transaction structure is the same as a prior structure for which a legal opinion that complies with this interpretation was used as evidence to support an assertion that the transfer of assets met the isolation criterion, the auditor is required[8] to determine whether management needs to obtain an update of that opinion to confirm that there have been no changes in relevant law, applicable regulations, or in the pertinent facts of the transaction that may affect the applicability of the previous opinion to the new transaction.

.09 *Question* — If the auditor determines that the use of a management's legal specialist is required, what should he or she consider in assessing the adequacy of the legal opinion?

.10 *Interpretation* — In assessing the adequacy of the legal opinion, the auditor is required to evaluate the competence and capabilities[9] of the legal specialist to determine whether the legal specialist has experience with relevant matters, including knowledge of the U.S. Bankruptcy Code, and other federal, state, or foreign law, as applicable, as well as knowledge of the transaction upon which management's assertion is based. For transactions that may be affected by provisions of the Federal Deposit Insurance Act (FDIA), it is important to consider whether the legal specialist has experience with the rights and powers of receivers, conservators, and liquidating agents under that act. The auditor is required to obtain an understanding of the work of the specialist,[10] which includes obtaining an understanding of the assumptions that are used by the legal specialist, and make appropriate tests of any information that management provides to the legal specialist and upon which the specialist indicates it relied. For example, testing management's information underlying a legal specialist's assumption regarding the adequacy of consideration received may depend on the nature of the transaction and the relationship of the parties. When the legal specialist's opinion has assumed the adequacy of consideration for transfers from a particular legal entity to its wholly owned subsidiary, changes in the subsidiary's capital accounts plus other consideration generally would be sufficient audit evidence about the adequacy of consideration. In the case of other transfers, such as those that are not to a wholly owned subsidiary of a particular legal entity that is the transferor, obtaining additional audit evidence may be necessary to evaluate management's assertion with regard to the adequacy of consideration upon which the legal specialist relied, because changes in the transferee's capital accounts do not solely benefit the transferring entity.

.11 The auditor also is required to evaluate the appropriateness of that specialist work as audit evidence for the relevant assertion,[11] which includes considering the form and content of the documentation that the legal specialist provides and evaluating whether the legal specialist's findings support management's assertions with respect to the isolation criterion.

---

[8]Paragraph .10 of section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

[9]Paragraph .27*a* of section 501. [Footnote revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142.]

[10]Paragraph .27*b* of section 501. [Footnote revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142.]

[11]Paragraph .27*c* of section 501. [Footnote revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142.]

The requirement in FASB ASC 860 regarding reasonable assurance that the transferred assets would be isolated provides the basis for what the auditor is required to consider in evaluating the work of a legal specialist.

.12 Findings of a legal specialist that relate to the isolation of transferred financial assets are often in the form of a reasoned legal opinion that is restricted to particular facts and circumstances relevant to the specific transaction. The reasoning of such opinion may rely upon analogy to legal precedents that may not involve facts and circumstances that are comparable to that specific transaction. It is important to consider the effect of any limitations or disclaimers of opinion in assessing the adequacy of any legal opinion.

.13 An example of the conclusions in a legal opinion for an entity that is subject to the U.S. Bankruptcy Code that provides persuasive evidence, in the absence of contradictory evidence, to support management's assertion that the transferred financial assets have been put presumptively beyond the reach of the entity and its creditors, even in bankruptcy or other receivership, follows:

> *We believe (or it is our opinion) that* in a properly presented and argued case, as a legal matter, in the event the Seller were to become a Debtor, the transfer of the Financial Assets from the Seller to the Purchaser *would be considered to be a sale* (or a true sale) of the Financial Assets from the Seller to the Purchaser and not a loan and, accordingly, the Financial Assets and the proceeds thereof transferred to the Purchaser by the Seller in accordance with the Purchase Agreement would not be deemed to be property of the Seller's estate for purposes of [the relevant sections] of the U.S. Bankruptcy Code.

The following additional paragraph addressing substantive consolidation applies when the entity to which the assets are sold (as described in the opinion) is an affiliate of the selling entity and may also apply in other situations as noted by the legal specialist. For example, if a so-called two-step structure has been used to achieve isolation, this paragraph usually will be required with respect to the transferee in the first step of such structure (see paragraph .15 [and related footnotes] of this interpretation for additional guidance on the second step of a two-step structure as described in paragraphs 22–23 of FASB ASC 860-10-55). When the transferor has entered into transactions with an affiliate that could affect the issue of substantive consolidation, the opinion should address the effect of that involvement on the opinion.

> Based upon the assumptions of fact and the discussion set forth previously, and on a reasoned analysis of analogous case law, *we are of the opinion that* in a properly presented and argued case, as a legal matter, in a proceeding under the U.S. Bankruptcy Code,[12] in which the Seller is a Debtor, a court *would not* grant an order consolidating the assets and liabilities of the Purchaser with those of the Seller in a case involving the insolvency of the Seller under the doctrine of substantive consolidation.

In the case of a transferor that is not entitled to become a debtor under the U.S. Bankruptcy Code, a legal opinion regarding whether the isolation criterion is met would consider whether isolation is satisfactorily achieved under the insolvency or receivership laws that apply to the transferor.

.14 Following are two examples of the conclusions in a legal opinion for an entity that is subject to receivership or conservatorship under provisions of the Federal Deposit Insurance Corporation (FDIC). The conclusions in these two examples provide persuasive evidence, in the absence of contradictory evidence, to support management's assertion that the transferred financial assets have been put presumptively beyond the reach of the entity and its creditors, even in conservatorship or receivership. Insolvency and receivership laws applicable to depository institutions, and how those laws affect the legal isolation criterion, differ depending upon the nature of the depository institution and its chartering authority. Accordingly, legal opinions addressing the legal isolation criterion may be formulated in different ways to accommodate those differences.[13]

> Example 1. *We believe (or it is our opinion) that* in a properly presented and argued case, as a legal matter, in the event the Seller were to become subject to receivership or conservatorship, the transfer of the Financial Assets from the Seller to the Purchaser *would be considered to be a sale* (or a true sale) of the Financial Assets from the Seller to the Purchaser and not a loan and, accordingly, the Financial Assets and the proceeds thereof transferred to the Purchaser by the Seller in accordance with the Purchase Agreement would not be deemed to be property of, or subject to repudiation, reclamation, recovery, or recharacterization by, the receiver or conservator appointed with respect to the Seller.[14]

---

[12]For an entity subject to additional regulation (for example, a broker-dealer subject to the Securities Investor Protection Act), the legal opinion also generally should address the effect of such regulation and the policies of the regulators implementing such regulations (for example, the Securities Investor Protection Corporation). [Footnote renumbered, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[13]For an entity subject to conservatorship or liquidation under the National Credit Union Act, the examples and discussion in this paragraph would be modified to make appropriate references to "liquidation" and "liquidating agent" and additional information relating to rights and regulations of the National Credit Union Administration. [Footnote renumbered, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[14]When the opinion indicates that isolation is achieved without reference to a true sale, the opinion also should provide reasonable assurance that the transferred assets are beyond the reach of the transferor and its creditors other than the transferee to the same extent that is provided in paragraph B of example 2. [Footnote renumbered, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

Example 2. The Federal Deposit Insurance Corporation (FDIC) has issued a regulation, 'Treatment by the Federal Deposit Insurance Corporation as Conservator or Receiver of Financial Assets Transferred by an Insured Depository Institution in Connection with a Securitization or Participation,' 12 CFR section 360.6 (the Rule). Based on and subject to the discussion, assumptions, and qualifications herein, it is our opinion that:

A. Following the appointment of the FDIC as the conservator or receiver for the Bank:

   i. The Rule will apply to the Transfers,

   ii. Under the Rule, the FDIC acting as conservator or receiver for the Bank could not, by exercise of its authority to disaffirm or repudiate contracts under 12 U.S.C. §1821(e), reclaim or recover the Transferred Assets from the Issuer or recharacterize the Transferred Assets as property of the Bank or of the conservatorship or receivership for the Bank,

   iii. Neither the FDIC (acting for itself as a creditor or as representative of the Bank or its shareholders or creditors) nor any creditor of the Bank would have the right, under any bankruptcy or insolvency law applicable in the conservatorship or receivership of the Bank, to avoid the Transfers, to recover the Transferred Assets, or to require the Transferred Assets to be turned over to the FDIC or such creditor, and

   iv. There is no other power exercisable by the FDIC as conservator or receiver for the Bank that would permit the FDIC as such conservator or receiver to reclaim or recover the Transferred Assets from the Issuer, or to recharacterize the Transferred Assets as property of the Bank or of the conservatorship or receivership for the Bank; provided, however, that we offer no opinion as to whether, in receivership, the FDIC or any creditor of the Bank may take any such actions if the Holders [*holders of beneficial interests in the transferred assets*] receive payment of the principal amount of the Interests and the interest earned thereon (at the contractual yield) through the date the Holders are so paid; and

B. Prior to the appointment of the FDIC as conservator or receiver for the Bank, the Bank and its other creditors would not have the right to reclaim or recover the Transferred Assets from the Issuer, except by the exercise of a contractual provision [insert appropriate citation] to require the transfer, or return, of the Transferred Assets that exists solely as a result of the contract between the Bank and the Issuer.[15]

The following additional paragraph addressing substantive consolidation applies when the entity to which the assets are sold or transferred (as described in the opinion) is an

[15] See the second paragraph of footnote 6.

Paragraph B is not required if the opinion includes both a conclusion, as set forth in example 1, that the transfer constitutes a "true sale" and the conclusions set forth in paragraph A of example 2. It is not necessary to include any provision of example 2 if the opinion is as set forth in example 1. [Footnote renumbered and revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

affiliate of the selling entity and may also apply in other situations as noted by the legal specialist.[16] For example, if a so-called two-step structure has been used to achieve isolation, the following paragraph usually will be required with respect to the transferee in the first step of the structure (see paragraph .15 [and related footnotes] of this interpretation for additional guidance on the second step of a two-step structure as described in paragraphs 22–23 of FASB ASC 860-10-55). When the transferor has entered into transactions with an affiliate that could affect the issue of substantive consolidation, the opinion should address the effect of that involvement on the opinion:

> Based upon the assumptions of fact and the discussion set forth previously, and on a reasoned analysis of analogous case law, *we are of the opinion that* in a properly presented and argued case, as a legal matter, in a receivership, conservatorship, or liquidation proceeding in respect of the Seller, a court *would not* grant an order consolidating the assets and liabilities of the Purchaser with those of the Seller.

Certain powers to repudiate contracts, recover, reclaim, or recharacterize transferred assets as property of a transferor that are exercisable by the FDIC under the FDIA may, as of the date of the transfer, be limited by a regulation that may be repealed or amended only in respect of transfers occurring on or after the effective date of such repeal or amendment.[17] With respect to the powers of a receiver or conservator that may not be exercised under that regulation, it is acceptable for attorneys to rely upon the effectiveness of the limitation on such powers set forth in the applicable regulation, provided that the attorney states, based on reasonable assumptions, that (*a*) the affected transfer of financial assets meets all qualification requirements of the regulation, and (*b*) the regulation had not, as of the date of the opinion, been amended, repealed, or held inapplicable by a court with jurisdiction with respect to such transfer. The opinion should separately address any powers of repudiation, recovery, reclamation, or recharacterization exercisable by a receiver or conservator notwithstanding that regulation (for example, rights, powers, or remedies regarding transfers specifically excluded from the regulation) in a manner that provides the same level of assurance as would be provided in the case of opinions that conform with requirements of paragraph .13 of this interpretation, except that such opinion shall address powers arising under the FDIA. The considerations in the immediately preceding three sentences are adequately addressed either by the example 1 opinion or the example 2 opinion described in this paragraph or by the variations described in the second paragraph of footnote 15 and in footnote 16 of this interpretation.

.15 A legal letter that includes an inadequate opinion, inappropriate limitations, or a disclaimer of opinion, or that effectively limits the scope of the opinion to facts and circumstances that are not applicable to the transaction, does not provide persuasive

---

[16]An additional substantive consolidation opinion is not required if the opinion states that its conclusion includes the inability to recover the transferred financial assets or recharacterize the transfer by application of the doctrine of "substantive consolidation." [Footnote renumbered, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[17]The applicable regulation is 12 U.S. *Code of Federal Regulations* 360.6, effective September 11, 2000. [Footnote renumbered, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

evidence to support the entity's assertion that the transferred assets have been put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership. Likewise, a legal letter that includes conclusions that are expressed using some of the following language would not provide persuasive evidence that a transfer of financial assets has met the isolation criterion of FASB ASC 860-10-40-5(a) (see paragraphs .20–.21 of this interpretation):

- "We are unable to express an opinion..."
- "It is our opinion, based upon limited facts..."
- "We are of the view..." or "it appears..."
- "There is a reasonable basis to conclude that..."
- "In our opinion, the transfer would *either* be a sale *or* a grant of a perfected security interest..."[18]
- "In our opinion, there is a reasonable possibility..."
- "In our opinion, the transfer *should* be considered a sale..."
- "It is our opinion that the company will be able to assert meritorious arguments..."
- "In our opinion, it is more likely than not ..."
- "In our opinion, the transfer would *presumptively* be..."
- "In our opinion, it is probable that..."

Furthermore, conclusions about hypothetical transactions may not be relevant to the transaction that is the subject of management's assertions. Section 500 states that "in evaluating information to be used as audit evidence, the auditor should consider whether the results of audit procedures provide a basis for concluding on the sufficiency and appropriateness of audit evidence obtained."[19] Additionally, conclusions about hypothetical transactions may not contemplate all of the facts and circumstances or the provisions in the agreements of the transaction that is the subject of management's assertions, and generally would not provide persuasive evidence.[20]

---

[18]Certain transferors are subject only to receivership (and not to proceedings under the U.S. Bankruptcy Code or the Federal Deposit Insurance Act) under laws that do not allow a receiver to reach assets in which a security interest has been granted. In such circumstances, an opinion that concludes that the transfer would either be a sale or a grant of a security interest that puts the transferred assets beyond the reach of such receiver and other creditors would provide persuasive evidence that the isolation criterion is met.

In certain circumstances, a legal specialist may provide an opinion on both steps of a two-step structure. Such language would be acceptable in an opinion for a transfer of assets in the second step of a two-step structure as described in paragraphs 22–23 of FASB ASC 860-10-55 provided that the opinion on the transfer in the first step is consistent with paragraphs .13 or .14 of this interpretation. [Footnote renumbered and revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[19]Paragraph .09 of section 500. [Footnote revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142.]

.16 *Question* — Are legal opinions that restrict the use of the opinion to the client, or to third parties other than the auditor, acceptable audit evidence?

.17 *Interpretation* — No. In some cases, the auditor may decide it is necessary to contact the specialist to determine that the specialist is aware that his or her work will be used for evaluating the assertions in the financial statements.[21] Given the importance of the legal opinion to the assertion in this case, and the precision that legal specialists use in drafting such opinions, an auditor should not use as evidence a legal opinion that he or she deems otherwise adequate if the letter restricts use of the findings expressed therein to the client or to third parties other than the auditor. In that event, the auditor requests that the client obtain the legal specialist's written permission for the auditor to use the opinion for the purpose of evaluating management's assertion that a transfer of financial assets meets the isolation criterion of FASB ASC 860-10-40-5(a).

.18 An example of a letter from a legal specialist to a client that adequately communicates permission for the auditor to use the legal specialist's opinion for the purpose of evaluating management's assertion that a transfer of financial assets meets the isolation criterion of FASB ASC 860-10-40-5(a) is as follows:

> Notwithstanding any language to the contrary in our opinions of even date with respect to certain bankruptcy issues relating to the previously referenced transaction, you are authorized to make available to your auditors such opinions solely as audit evidence in support of their evaluation of management's assertion that the transfer of the receivables meets the isolation criterion of Financial Accounting Standards Board *Accounting Standards Codification* 860-10-40-5(a), provided a copy of this letter is furnished to them in connection therewith. In authorizing you to make copies of such opinions available to your auditors for such purpose, we are not undertaking or assuming any duty or obligation to your auditors or establishing any lawyer-client relationship with them. Further, we do not undertake or assume any responsibility with respect to financial statements of you or your affiliates.[22]

.19 A letter from a legal specialist to a client might authorize the client to make copies of the legal opinion available to the auditor to use in his or her evaluation of management's assertion that a transfer of financial assets meets the isolation criterion of FASB ASC 860-10-40-5(a) but then state that the auditor is not authorized to rely thereon. Such "use but not rely on" language, or other language that similarly restricts the auditor's use of the

[20]For example, a memorandum of law from a legal specialist usually analyzes (and may make conclusions about) a transaction that may be completed subsequently. Such memorandum generally would not provide persuasive evidence unless the conclusions conform with this interpretation and a legal specialist opines that such conclusions apply to a completed transaction that is the subject of management's assertion. [Footnote renumbered, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[21]Paragraph .A74 of section 501. [Footnote revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142.]

[22]This language may appear in the legal specialist's opinion rather than in a separate letter. In that case, the wording would be modified slightly to indicate the context. [Footnote renumbered, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

legal specialist's opinion, does not adequately communicate permission for the auditor to use the legal specialist's opinion as audit evidence. The auditor may consider consulting with his or her legal counsel in circumstances in which it is not clear that the auditor may use the legal specialist's opinion.

.20 *Question* — If the auditor determines that it is appropriate to use the work of a legal specialist, and either the resulting legal response does not provide persuasive evidence that a transfer of assets has met the isolation criterion or the legal specialist does not grant permission for the auditor to use a legal opinion that is restricted to the client or to third parties other than the auditor, what other steps might an auditor consider?

.21 *Interpretation* — When other relevant audit evidence exists, the auditor should consider it before reaching a conclusion about the appropriateness of management's accounting for a transfer.[23] However, because the isolation aspect of surrender of control is assessed primarily from a legal perspective, the auditor usually will not be able to obtain persuasive evidence in a form other than a legal opinion. In the absence of persuasive evidence that a transfer has met the isolation criterion, derecognition of the transferred assets is not in conformity with generally accepted accounting principles and the auditor may need to express a qualified or adverse opinion in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*.[24] However, if permission for the auditor to use a legal opinion that he or she deems otherwise adequate is not granted, this would be a scope limitation and the auditor should consider the need to express a qualified opinion or to disclaim an opinion in accordance with section 705.[25]

[Issue Date: December 2001; Revised: March 2006; Revised: June 2009; Revised: October 2011, effective for audits of financial statements for periods ending on or after December 15, 2012; Revised: December 2022.]

AUDIT CONCLUSIONS AND REPORTING

AU-C Section 700

Forming an Opinion and Reporting on Financial Statements

(Supersedes SAS No. 122 section 700; SAS No. 131.)

Source: SAS No. 134; SAS No. 137; SAS No. 138; SAS No. 141; SAS No. 143.

Effective for audits of financial statements for periods ending on or after December 15, 2021, unless otherwise indicated.

Note
In June 2022, the ASB issued SAS No. 146, *Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, which contains amendments to this section.

The amendments are effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025, and can be viewed in the appendix of section 220 until the effective date, when they will be applied to this section.

In March 2023, the ASB issued SAS No. 149, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors and Audits of Referred-to Auditors)*, which contains amendments to this section.

The amendments are effective for audits of financial statements for periods ending on or after December 15, 2026, and can be viewed in appendix C of section 600 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility to form an opinion on the financial statements. It also addresses the form and content of the auditor's report issued as a result of an audit of financial statements.

.02 This section applies to an audit of a complete set of general purpose financial statements and is written in that context.

.03 This section is not applicable when the auditor is forming an opinion and reporting on financial statements of employee benefit plans subject to the Employee Retirement Income Security Act of 1974 (ERISA). In such circumstances, section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA* applies.

.04 Section 705, *Modifications to the Opinion in the Independent Auditor's Report*, and section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report*, address how the form and content of the auditor's report are affected when the auditor expresses a modified opinion (a qualified opinion, an adverse opinion, or a disclaimer of opinion) or includes an emphasis-of-matter paragraph or other-matter paragraph in the auditor's report.

.05 This section does not require the communication of key audit matters. Section 701, *Communicating Key Audit Matters in the Independent Auditor's Report*, addresses the auditor's responsibility to communicate key audit matters when the auditor is engaged to do so.

.06 Section 800, *Special Considerations — Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks*, addresses special considerations when financial statements are prepared in accordance with a special purpose framework.[1]Section 805, *Special Considerations — Audits of Single Financial Statements and Specific Elements, Accounts, or Items of a Financial Statement*, addresses special considerations relevant to an audit of a single financial statement or of a specific element, account, or item of a financial statement. (Ref: par. .A1–.A2)

.07 The requirements of this section promote consistency and comparability in auditor reporting. Consistency in the auditor's report, when the audit has been conducted in accordance with generally accepted auditing standards (GAAS), promotes credibility in the marketplace by making more readily identifiable those audits that have been conducted in accordance with recognized standards. Consistency also helps promote users' understanding and identification of unusual circumstances when they occur.

Effective Date

.08 This section is effective for audits of financial statements for periods ending on or after December 15, 2021. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 141.]

Objectives

.09 The objectives of the auditor are to do the following:

a. Form an opinion on the financial statements based on an evaluation of the audit evidence obtained, including evidence obtained about comparative financial statements or comparative financial information.

---

[1]See section 800, *Special Considerations — Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks*, for a definition of *special purpose framework*.

b. Express clearly the opinion on the financial statements through a written report. (Ref: par. .A3)

Definitions

.10 For purposes of GAAS, the following terms have the meanings attributed as follows:

Comparative financial statements. A complete set of financial statements[2] for one or more prior periods included for comparison with the financial statements of the current period.

Comparative information. Prior period information presented for purposes of comparison with current period amounts or disclosures that is not in the form of a complete set of financial statements. Comparative information includes prior period information presented as condensed financial statements or summarized financial information.

Condensed financial statements. Historical financial information[3] that is presented in less detail than a complete set of financial statements, in accordance with an appropriate financial reporting framework. Condensed financial statements may be separately presented as unaudited financial information or may be presented as comparative information.

General purpose financial statements. Financial statements prepared in accordance with a general purpose framework. (Ref: par. .A4)

General purpose framework. A financial reporting framework designed to meet the common financial information needs of a wide range of users.

Unmodified opinion. The opinion expressed by the auditor when the auditor concludes that the financial statements are presented fairly, in all material respects, in accordance with the applicable financial reporting framework.[4]

.11 Reference to *financial statements* in this section means a complete set of general purpose financial statements. The requirements of the applicable financial reporting framework determine the presentation, structure, and content of the financial statements and what constitutes a complete set of financial statements.

---

[2]See section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*, for a definition of *financial statements*.

[3]Paragraph .14 of section 200 defines the term *historical financial information*.

[4]Paragraph .14 of section 200 defines the term *applicable financial reporting framework*.

Requirements

Forming an Opinion on the Financial Statements

.12 The auditor should form an opinion on whether the financial statements are presented fairly, in all material respects, in accordance with the applicable financial reporting framework. (Ref: par. .A5)

.13 In order to form that opinion, the auditor should conclude whether the auditor has obtained reasonable assurance[5] about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error. That conclusion should take into account the following: (Ref: par. .A6)

a. The auditor's conclusion, in accordance with section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, about whether sufficient appropriate audit evidence has been obtained[6]

b. The auditor's conclusion, in accordance with section 450, *Evaluation of Misstatements Identified During the Audit*, about whether uncorrected misstatements are material, individually or in the aggregate[7]

c. The evaluations required by paragraphs .14–.17

.14 The auditor should evaluate whether the financial statements are prepared, in all material respects, in accordance with the requirements of the applicable financial reporting framework. This evaluation should include consideration of the qualitative aspects of the entity's accounting practices, including indicators of possible bias in management's judgments. (Ref: par. .A7–.A9)

.15 In particular, in view of the requirements of the applicable financial reporting framework, the auditor should evaluate whether

a. the financial statements appropriately disclose the significant accounting policies selected and applied. In making this evaluation, the auditor should consider the relevance of the accounting policies to the entity and whether they have been presented in an understandable manner. (Ref: par. .A10)

b. the accounting policies selected and applied are consistent with the applicable financial reporting framework and are appropriate.

c. the accounting estimates and related disclosures made by management are reasonable.

d. the information presented in the financial statements is relevant, reliable, comparable, and understandable. In making this evaluation, the auditor should

---

[5] Paragraph .14 of section 200 defines the term *reasonable assurance*.

[6] Paragraph .28 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

[7] Paragraph .11 of section 450, *Evaluation of Misstatements Identified during the Audit*.

consider whether all required information has been included, and whether such information is appropriately classified, aggregated or disaggregated, and presented. (Ref: par. .A11)

e. the financial statements provide adequate disclosures to enable the intended users to understand the effect of material transactions and events on the information conveyed in the financial statements. (Ref: par. .A12)

f. the terminology used in the financial statements, including the title of each financial statement, is appropriate.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 143.]

.16 The auditor's evaluation about whether the financial statements achieve fair presentation should also include consideration of the following: (Ref: par. .A13–.A15)

a. The overall presentation, structure, and content of the financial statements

b. Whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation (Ref: par. .A16)

.17 The auditor should evaluate whether the financial statements adequately refer to or describe the applicable financial reporting framework. (Ref: par. .A17–.A20)

Form of Opinion

.18 The auditor should express an unmodified opinion when the auditor concludes that the financial statements are presented fairly, in all material respects, in accordance with the applicable financial reporting framework.

.19 The auditor should modify the opinion in the auditor's report, in accordance with section 705, in the following circumstances:

a. The auditor concludes that, based on the audit evidence obtained, the financial statements as a whole are materially misstated.

b. The auditor is unable to obtain sufficient appropriate audit evidence to conclude that the financial statements as a whole are free from material misstatement.

.20 If the auditor concludes that the financial statements do not achieve fair presentation, the auditor should discuss the matter with management and, depending on how the matter is resolved, should determine whether it is necessary to modify the opinion in the auditor's report in accordance with section 705. (Ref: par. .A21–.A22)

Auditor's Report

.21 The auditor's report should be in writing. (Ref: par. .A23–.A24)

Auditor's Report for Audits Conducted in Accordance With GAAS

Title

.22 The auditor's report should have a title that clearly indicates that it is the report of an independent auditor. (Ref: par. .A25)

Addressee

.23 The auditor's report should be addressed, as appropriate, based on the circumstances of the engagement. (Ref: par. .A26)

Auditor's Opinion

.24 The first section of the auditor's report should include the auditor's opinion and should have the heading "Opinion."

.25 The "Opinion" section of the auditor's report should also do the following: (Ref: par. .A27–.A29)

a. Identify the entity whose financial statements have been audited.

b. State that the financial statements have been audited.

c. Identify the title of each statement that the financial statements comprise.

d. Refer to the notes.

e. Specify the dates of or periods covered by each financial statement that the financial statements comprise.

.26 When expressing an unmodified opinion on financial statements, the auditor's opinion should state that, in the auditor's opinion, the accompanying financial statements present fairly, in all material respects, [...] in accordance with [*the applicable financial reporting framework*]. (Ref: par. .A17 and .A30–.A33)

.27 The auditor's opinion should identify the applicable financial reporting framework and its origin. (Ref: par. .A34)

Basis for Opinion

.28 The auditor's report should include a section, directly following the "Opinion" section, with the heading "Basis for Opinion," that does the following: (Ref: par. .A35)

a. States that the audit was conducted in accordance with generally accepted auditing standards and identifies the United States of America as the country of origin of those standards (Ref: par. .A36–.A37)

b. Refers to the section of the auditor's report that describes the auditor's responsibilities under GAAS

c. Includes a statement that the auditor is required to be independent of the entity and to meet the auditor's other ethical responsibilities, in accordance with the relevant ethical requirements relating to the audit (Ref: par. .A38–.A39)

d. States whether the auditor believes that the audit evidence the auditor has obtained is sufficient and appropriate to provide a basis for the auditor's opinion

Going Concern

.29 When applicable, the auditor should report in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.

Key Audit Matters

.30 When the auditor is engaged to communicate key audit matters, the auditor should do so in accordance with section 701. (Ref: par. .A40)

Responsibilities of Management for the Financial Statements

.31 The auditor's report should include a section with the heading "Responsibilities of Management for the Financial Statements."

.32 This section of the auditor's report should describe management's responsibility for the following:

a. The preparation and fair presentation of the financial statements in accordance with the applicable financial reporting framework, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error (Ref: par. .A41)

b. When required by the applicable financial reporting framework, the evaluation of whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern [*for the time period set by the applicable financial reporting framework*, as applicable].

.33 The description about management's responsibility for the financial statements in the auditor's report should not reference a separate statement by management about such responsibilities, even if such a statement is included in a document containing the auditor's report. (Ref: par. .A42)

Auditor's Responsibilities for the Audit of the Financial Statements

.34 The auditor's report should include a section with the heading "Auditor's Responsibilities for the Audit of the Financial Statements."

.35 This section of the auditor's report should do the following: (Ref: par. .A43)

a. State that the objectives of the auditor are to

  i. obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and (Ref: par. .A44)

  ii. issue an auditor's report that includes the auditor's opinion.

b. State that reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. (Ref: par. .A45)

c. State that the risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

d. State that misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.[8] (Ref: par. .A46)

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 138.]

.36 The "Auditor's Responsibilities for the Audit of the Financial Statements" section of the auditor's report should further describe an audit by stating that, in performing an audit in accordance with GAAS, the auditor's responsibilities are to:

a. Exercise professional judgment and maintain professional skepticism throughout the audit.

b. Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

c. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, no such opinion is expressed.

   In circumstances in which the auditor also has a responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, the auditor should omit the following: "but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, no such opinion is expressed."

d. Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.

---

[8]Paragraph .02 of section 320, *Materiality in Planning and Performing an Audit.*

e. Conclude whether, in the auditor's judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time.

.37 The "Auditor's Responsibilities for the Audit of the Financial Statements" section of the auditor's report should also state that the auditor is required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that the auditor identified during the audit.

Other Information

.38 When applicable, the auditor should report in accordance with section 720, *The Auditor's Responsibilities Relating to Other Information Included in Annual Reports*. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 137.]

Other Reporting Responsibilities

.39 If the auditor addresses other reporting responsibilities in the auditor's report on the financial statements that are in addition to the auditor's responsibility under GAAS, these other reporting responsibilities should be addressed in a separate section in the auditor's report with the heading "Report on Other Legal and Regulatory Requirements" or another heading that is appropriate to the content of the section. (Ref: par. .A47–.A48) [Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

.40 If the auditor's report contains a separate section that addresses other reporting responsibilities, the requirements of paragraphs .22–.37 of this section should be included under a section with the heading "Report on the Audit of the Financial Statements." The "Report on Other Legal and Regulatory Requirements" should follow the "Report on the Audit of the Financial Statements." (Ref: par. .A49) [Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

Signature of the Auditor

.41 The auditor's report should include the manual or printed signature of the auditor's firm. (Ref: par. .A50–.A52) [Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

Auditor's Address

.42 The auditor's report should name the city and state where the auditor's report is issued. (Ref: par. .A53) [Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

Date of the Auditor's Report

.43 The auditor's report should be dated no earlier than the date on which the auditor has obtained sufficient appropriate audit evidence on which to base the auditor's opinion on the financial statements, including evidence of the following: (Ref: par. .A54)

a. All the statements and disclosures that the financial statements comprise have been prepared.

b. Management has asserted that it has taken responsibility for those financial statements. (Ref: par. .A55–.A57)

[Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

Auditor's Report for Audits Conducted in Accordance With Both GAAS and Another Set of Auditing Standards

.44 Paragraph .28 requires that the auditor's report state that the audit was conducted in accordance with GAAS and identify the United States of America as the country of origin of those standards. However, an auditor may indicate that the audit was also conducted in accordance with another set of auditing standards (for example, International Standards on Auditing [ISAs] or Government Auditing Standards). The auditor should not refer to having conducted an audit in accordance with another set of auditing standards in addition to GAAS unless the audit was conducted in accordance with both sets of standards in their entirety. (Ref: par. .A58) [Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

.45 When the auditor's report refers to both GAAS and another set of auditing standards, the auditor's report should identify the other set of auditing standards as well as its origin.

[Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

Auditor's Report for Audits Conducted in Accordance With the Standards of the PCAOB and GAAS When the Audit Is Not Within the Jurisdiction of the PCAOB

.46 When conducting an audit of financial statements in accordance with the standards of the PCAOB and the audit is not within the jurisdiction of the PCAOB, the auditor is required to also conduct the audit in accordance with GAAS. In such circumstances, when the auditor refers to the standards of the PCAOB in addition to GAAS in the auditor's report, the auditor should use the form of report required by the standards of the PCAOB, amended to state that the audit was also conducted in accordance with GAAS. (Ref: par. .A59–.A65) [Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

Comparative Financial Statements and Comparative Information

.47 Comparative financial statements may be required by the applicable financial reporting framework, or management may elect to provide such information. When comparative financial statements are presented, the auditor's report should refer to each period for which financial statements are presented and on which an audit opinion is expressed. (Ref: par. .A66–.A67) [Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

.48 When expressing an opinion on all periods presented, a continuing auditor should update the report on the financial statements of one or more prior periods presented on a comparative basis with those of the current period. The auditor's report on comparative financial statements should not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence on which to support the opinion for the most recent audit. (Ref: par. .A68–.A69) [Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

.49 If comparative information is presented but not covered by the auditor's opinion, the auditor should clearly indicate in the auditor's report the character of the auditor's work, if any, and the degree of responsibility the auditor is taking. (Ref: par. .A70–.A71) [Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

.50 If comparative information is presented and the entity requests the auditor to express an opinion on all periods presented, the auditor should consider whether the information included for the prior periods contains sufficient detail to constitute a fair presentation in accordance with the applicable financial reporting framework. (Ref: par. .A72) [Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

Audit Procedures

.51 The auditor should perform the procedures required by paragraphs .52–.54 if comparative financial statements or comparative information is presented for the prior periods. [Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

.52 The auditor should determine whether the comparative financial statements or comparative information has been presented in accordance with the relevant requirements, if any, of the applicable financial reporting framework. [Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

.53 The auditor should evaluate the following:

a. Whether the comparative financial statements or comparative information agrees with the amounts and other disclosures presented in the prior period or, when appropriate, has been restated for the correction of a material misstatement or adjusted for the retrospective application of an accounting principle

b. Whether the accounting policies reflected in the comparative financial statements or comparative information are consistent with those applied in the current period or, if there have been changes in accounting policies, whether those changes have been properly accounted for and adequately presented and disclosed[9]

[Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

.54 If the auditor becomes aware of a possible material misstatement in the comparative financial statements or comparative information while performing the current period audit, the auditor should perform such additional audit procedures as are necessary in the circumstances to obtain sufficient appropriate audit evidence to determine whether a material misstatement exists. If the auditor audited the prior period's financial statements and becomes aware of a material misstatement in those financial statements, the auditor should also follow the relevant requirements of section 560, *Subsequent Events and*

[9]See section 708, *Consistency of Financial Statements*.

Subsequently Discovered Facts. If the prior period financial statements are restated, the auditor should determine that the comparative financial statements or comparative information agrees with the restated financial statements. [Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

.55 As required by section 580, *Written Representations*, the auditor should request written representations for all periods referred to in the auditor's opinion. The auditor also should obtain a specific written representation regarding any restatement made to correct a material misstatement in a prior period that affects the comparative financial statements. (Ref: par. .A73) [Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

.56 When reporting on prior period financial statements in connection with the current period's audit, if the auditor's opinion on such prior period financial statements differs from the opinion the auditor previously expressed, the auditor should disclose the following matters in an emphasis-of-matter or other-matter paragraph, in accordance with section 706:

a. The date of the auditor's previous report

b. The type of opinion previously expressed

c. The substantive reasons for the different opinion

d. That the auditor's opinion on the amended financial statements is different from the auditor's previous opinion (Ref: par. .A74)

[Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

Prior Period Financial Statements Audited by a Predecessor Auditor

.57 If the financial statements of the prior period were audited by a predecessor auditor, and the predecessor auditor's report on the prior period's financial statements is not reissued,[10] in addition to expressing an opinion on the current period's financial statements, the auditor should state the following in an other-matter paragraph:[11]

a. That the financial statements of the prior period were audited by a predecessor auditor

b. The type of opinion expressed by the predecessor auditor and, if the opinion was modified, the reasons therefore

c. The nature of an emphasis-of-matter paragraph, other-matter paragraph, or a going concern section included in the predecessor auditor's report, if any

d. The date of that report

[Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

[10] Paragraphs .19–.20 of section 560, *Subsequent Events and Subsequently Discovered Facts*.

[11] See section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report*.

.58 If the auditor concludes that a material misstatement exists that affects the prior period financial statements on which the predecessor auditor had previously reported without modification, the auditor should follow the communication requirements in section 510, *Opening Balances — Initial Audit Engagements, Including Reaudit Engagements*.[12] If the prior period financial statements are restated, and the predecessor auditor agrees to issue a new auditor's report on the restated financial statements of the prior period, the auditor should express an opinion only on the current period. (Ref: par. .A75) [Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

Prior Period Financial Statements Not Audited

.59 When current period financial statements are audited and presented in comparative form with financial statements for the prior period for which a compilation or review was performed, and the report on the prior period is not reissued, the auditor should include an other-matter paragraph[13] in the current period auditor's report that includes the following with respect to the prior period:

a. The service performed in the prior period

b. The date of the report on that service

c. A description of any material modifications noted in that report

d. For a review engagement, a statement that the service was substantially less in scope than an audit and does not provide the basis for the expression of an opinion on the financial statements as a whole (Ref: par. .A76)

e. For a compilation engagement, a statement that no opinion or other form of assurance is expressed on the financial statements (Ref: par. .A77)

[Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

.60 If the prior period financial statements were not audited, reviewed, or compiled, the financial statements should be clearly marked to indicate their status, and the auditor's report should include an other-matter paragraph to indicate that the auditor has not audited, reviewed, or compiled the prior period financial statements and that the auditor assumes no responsibility for them. (Ref: par. .A78) [Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

Information Presented in the Financial Statements

.61 Information that is not required by the applicable financial reporting framework but is nevertheless presented as part of the basic financial statements should be covered by the auditor's opinion if it cannot be clearly differentiated. (Ref: par. .A79–.A80) [Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

[12] Paragraphs .12–.13 of section 510, *Opening Balances — Initial Audit Engagements, Including Reaudit Engagements*.

[13] See section 706.

Application and Other Explanatory Material

Scope of This Section (Ref par. .06)

.A1 Section 800 also addresses the auditor's responsibilities when the auditor is reporting on financial statements prepared in accordance with a special purpose framework and is required by law or regulation to use a specific layout, form, or wording of the auditor's report. When reporting on financial statements prepared in accordance with a general purpose framework, and law or regulation requires a specific layout, form, or wording of the auditor's report, the auditor may adapt and apply the requirements in section 800.

.A2 Other AU-C sections that also contain reporting requirements include, but are not limited to, the following:

- Section 510, *Opening Balances — Initial Audit Engagements, Including Reaudit Engagements*
- Section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*
- Section 720, *The Auditor's Responsibilities Relating to Other Information Included in Annual Reports*
- Section 725, *Supplementary Information in Relation to the Financial Statements as a Whole*
- Section 730, *Required Supplementary Information*
- Section 810, *Engagements to Report on Summary Financial Statements*
- Section 910, *Financial Statements Prepared in Accordance With a Financial Reporting Framework Generally Accepted in Another Country*

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 137.]

Objectives

Considerations Specific to Governmental Entities (Ref: par. .09)

.A3 For audits of governmental entities, the objectives of a financial statement audit are often broader than forming and expressing an opinion on the financial statements. Paragraph .A47 discusses the auditor's other reporting responsibilities.

Definitions

General Purpose Financial Statements

Considerations Specific to Governmental Entities (Ref: par. .10)

.A4 For audits of governmental entities, the term *general purpose financial statements*, in the context of this section, would be considered or referred to as basic financial statements using the terms in the governmental entity's applicable financial reporting framework.

Forming an Opinion on the Financial Statements (Ref: par. .12)

.A5 As described in section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*, a financial reporting framework is a set of criteria used to determine measurement, recognition, presentation, and disclosure of all material items appearing in the financial statements.

Considerations Specific to Governmental Entities (Ref: par. .13)

.A6 For most state or local governmental entities, the applicable financial reporting framework is based on multiple reporting units and, therefore, requires the presentation of financial statements for the governmental entity's activities in various reporting units. Consequently, a reporting unit, or aggregation of reporting units, of the governmental entity represents an opinion unit to the auditor. In the context of this section, the auditor is responsible for forming an opinion on the financial statements for each opinion unit within a governmental entity.

Qualitative Aspects of the Entity's Accounting Practices (Ref: par. .14)

.A7 Management makes a number of judgments about the amounts and disclosures in the financial statements.

.A8 Section 260, *The Auditor's Communication With Those Charged With Governance*, contains a discussion of the qualitative aspects of accounting practices.[14] In considering the qualitative aspects of the entity's accounting practices, the auditor may become aware of possible bias in management's judgments. The auditor may conclude that the cumulative effect of a lack of neutrality, together with the effect of uncorrected misstatements, causes the financial statements as a whole to be materially misstated. Indicators of a lack of neutrality that may affect the auditor's evaluation of whether the financial statements as a whole are materially misstated include the following:

- The selective correction of misstatements brought to management's attention during the audit (for example, correcting misstatements with the effect of increasing reported earnings but not correcting misstatements that have the effect of decreasing reported earnings)

[14]The appendix "Qualitative Aspects of Accounting Practices" of section 260, *The Auditor's Communication With Those Charged With Governance*.

- Possible management bias in the making of accounting estimates

.A9 Section 540, *Auditing Accounting Estimates and Related Disclosures*, addresses possible management bias in making accounting estimates. Indicators of possible management bias, themselves, do not constitute misstatements for purposes of drawing conclusions on the reasonableness of individual accounting estimates. They may, however, affect the auditor's evaluation of whether the financial statements as a whole are free from material misstatement.

Accounting Policies Appropriately Disclosed in the Financial Statements (Ref: par. .15a)

.A10 In evaluating whether the financial statements appropriately disclose the significant accounting policies selected and applied, the auditor's consideration may include matters such as the following:

- Whether the financial statements include all disclosures related to the significant accounting policies that are required by the applicable financial reporting framework
- Whether the information about the significant accounting policies that has been disclosed is relevant and therefore reflects how the recognition, measurement, and presentation criteria in the applicable financial reporting framework have been applied to classes of transactions, account balances, and disclosures in the financial statements in the particular circumstances of the entity's operations and its environment
- The clarity with which the significant accounting policies have been presented

Information Presented in the Financial Statements Is Relevant, Reliable, Comparable, and Understandable (Ref: par. .15d)

.A11 Evaluating the understandability of the financial statements may include consideration of whether the information in the financial statements is presented in a manner that facilitates users' ability to identify necessary information. This may include whether the disclosures are appropriately labeled and cross-referenced.

Disclosure of the Effect of Material Transactions and Events on the Information Conveyed in the Financial Statements (Ref: par. .15e)

.A12 It is common for financial statements prepared in accordance with a general purpose framework to present an entity's financial position, results of operations, and cash flows. Evaluating whether, in view of the applicable financial reporting framework, the financial statements provide adequate disclosures to enable the intended users to understand the effect of material transactions and events on the entity's financial position, results of operations, and cash flows may include consideration of such matters as the following:

- The extent to which the information in the financial statements is relevant and specific to the circumstances of the entity

- Whether the disclosures are adequate to assist the intended users in understanding the following:
  — The nature and extent of the entity's assets and liabilities arising from transactions or events that do not meet the criteria for recognition (or the criteria for derecognition) established by the applicable financial reporting framework
  — The methods used and the assumptions and judgments made, and changes to them, that affect amounts presented or otherwise disclosed, including relevant sensitivity analyses

Evaluating Whether the Financial Statements Achieve Fair Presentation (Ref: par. .16)

.A13 Some financial reporting frameworks acknowledge explicitly or implicitly the concept of fair presentation. As noted in section 200, a *fair presentation financial reporting framework*[15] not only requires compliance with the requirements of the framework but also acknowledges explicitly or implicitly that it may be necessary for management to provide disclosures beyond those specifically required by the framework.

.A14 The auditor's evaluation about whether the financial statements achieve fair presentation, considering both presentation and disclosure, is a matter of professional judgment. This evaluation takes into account such matters as the facts and circumstances of the entity, including changes thereto, based on the auditor's understanding of the entity and the audit evidence obtained during the audit. The evaluation also may include consideration, for example, of the disclosures needed to achieve a fair presentation arising from matters that could be material, such as the effect of evolving financial reporting requirements or the changing economic environment. In general, misstatements are considered material if there is a substantial likelihood that, individually, or in the aggregate, they would influence the judgement made by a reasonable user based on the financial statements.[16] [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 138.]

.A15 Evaluating whether the financial statements achieve fair presentation may include, for example, discussions with management and those charged with governance about their views on why a particular presentation was chosen, as well as alternatives that may have been considered. The discussions may include, for example, the following:

- The degree to which the amounts in the financial statements are aggregated or disaggregated, and whether the presentation of amounts or disclosures obscures useful information or results in misleading information
- Consistency with appropriate industry practice, or whether any departures are relevant to the entity's circumstances and therefore warranted

.A16 The auditor's professional judgment concerning the fairness of the presentation of the financial statements is applied within the context of the financial reporting framework.

[15] Paragraph .14 of section 200.

[16] See section 320.

Without that framework, the auditor would have no consistent standard for evaluating the presentation of financial position, results of operations, and cash flows in financial statements.

Description of the Applicable Financial Reporting Framework (Ref: par. .17)

.A17 As explained in section 200, the preparation and fair presentation of the financial statements by management and, when appropriate, those charged with governance requires the inclusion of an adequate description of the applicable financial reporting framework in the financial statements.[17] That description is important because it advises users of the financial statements of the framework on which the financial statements are based.

.A18 The description may indicate that the financial statements have been prepared in accordance with that framework. Such a statement is appropriate only when the financial statements comply with all the requirements of that framework that are effective during the period covered by the financial statements.

.A19 Financial statements that are prepared in accordance with one financial reporting framework and that contain a note or supplementary statement reconciling the results to those that would be shown under another framework are not prepared in accordance with that other framework. This is because the financial statements do not include all the information in the manner required by that other framework.

.A20 The financial statements may, however, be prepared in accordance with one applicable financial reporting framework and, in addition, describe in the notes to the financial statements the extent to which the financial statements comply with another framework. Such information may not be required by the applicable financial reporting framework but may be presented as part of the basic financial statements. As discussed in paragraph .61, such information is considered an integral part of the financial statements if it cannot be clearly differentiated and, accordingly, is covered by the auditor's opinion.

Form of Opinion (Ref: par. .20)

.A21 In some instances, the financial statements, although prepared in accordance with the requirements of a fair presentation framework, do not achieve fair presentation. When this is the case, it may be possible for management to include additional disclosures in the financial statements beyond those specifically required by the framework or, in unusual circumstances, to depart from a requirement in the framework in order to achieve fair presentation of the financial statements, which would be extremely rare.

.A22 The "Accounting Principles Rule" (ET sec. 1.320.001) of the AICPA Code of Professional Conduct states the following:

> A member shall not (1) express an opinion or state affirmatively that the financial statements or other financial data of any entity are presented in conformity with generally accepted accounting principles or (2) state that

[17] Paragraphs .A2–.A3 of section 200.

he or she is not aware of any material modifications that should be made to such statements or data in order for them to be in conformity with generally accepted accounting principles, if such statements or data contain any departure from an accounting principle promulgated by bodies designated by Council to establish such principles that has a material effect on the statements or data taken as a whole. If, however, the statements or data contain such a departure and the member can demonstrate that due to unusual circumstances the financial statements or data would otherwise have been misleading, the member can comply with the rule by describing the departure, its approximate effects, if practicable, and the reasons why compliance with the principle would result in a misleading statement.

Auditor's Report (Ref: par. .21)

.A23 A written report encompasses reports issued in hard copy format and those using an electronic medium.

.A24 The exhibit "Illustrations of Auditor's Reports on Financial Statements" contains illustrations of auditor's reports on financial statements incorporating the elements required by paragraphs .22–.43. With the exception of the "Opinion" and "Basis for Opinion" sections, this section does not establish requirements for ordering the elements of the auditor's report. However, this section requires the use of specific headings, which are intended to assist in making auditor's reports that refer to audits that have been conducted in accordance with GAAS more recognizable, particularly in situations in which the elements of the auditor's report are presented in an order that differs from the illustrative auditor's reports in the exhibit to this section.

Auditor's Report for Audits Conducted in Accordance With GAAS

Title (Ref: par. .22)

.A25 Section 200 provides guidance on reporting when the auditor is not independent.[18]

Addressee (Ref: par. .23)

.A26 The auditor's report is normally addressed to those for whom the report is prepared. The report may be addressed to the entity whose financial statements are being audited or to those charged with governance. A report on the financial statements of an unincorporated entity may be addressed as circumstances dictate (for example, to the partners, general partner, or proprietor). Occasionally, an auditor may be retained to audit the financial statements of an entity that is not a client; in such a case, the report may be addressed to the client and not to those charged with governance of the entity whose financial statements are being audited.

[18] Paragraph .A18 of section 200.

Auditor's Opinion (Ref: par. .25–.27)

.A27 The auditor's report states, for example, that the auditor has "audited the financial statements of ABC Company, which comprise the balance sheet as of December 31, 20X1, and the related statements of income, changes in stockholders' equity, and cash flows for the year then ended, and the related notes to the financial statements." If the financial statements include a separate statement of changes in stockholders' equity accounts or a separate statement of comprehensive income, paragraph .25*c* requires such statements to be identified in the "Opinion" section, but they need not be referred to separately in the opinion paragraph because changes in stockholders' equity accounts and comprehensive income are considered part of the presentation of financial position, results of operations, and cash flows.

.A28 The identification of the title and the dates of, or periods covered by, each statement that the financial statements comprise may also be achieved by referencing the table of contents in a document bound with or accompanying the financial statements and auditor's report thereon.

.A29 When the auditor is aware that the audited financial statements will be included in a document that contains information in addition to the financial statements and the auditor's report thereon, the auditor may consider, if the form of presentation allows, identifying the page numbers on which the audited financial statements are presented. This helps users identify the financial statements to which the auditor's report relates.

.A30 When the auditor expresses an unmodified opinion, it is not appropriate to use phrases such as "with the foregoing explanation" or "subject to" in relation to the opinion because these suggest a conditional opinion or a weakening or modification of the opinion.

.A31 The auditor's opinion covers the complete set of financial statements, as defined by the applicable financial reporting framework. For example, in the case of many general purpose frameworks, the financial statements include a balance sheet, an income statement, a statement of changes in equity, and a cash flow statement, including related notes. In some circumstances, additional or different statements, schedules, or information also might be considered an integral part of the financial statements.

.A32 The reports in the exhibit "Illustrations of Auditor's Reports on Financial Statements" include example wording that may be used to replace the [...] based on the applicable financial reporting framework.

.A33 The title of the financial statements identified in the "Opinion" section (see paragraph .25*c*) describes the information that is the subject of the auditor's opinion.

.A34 *Description of the applicable financial reporting framework and how it may affect the auditor's opinion (Ref: par. .27).* The identification of the applicable financial reporting framework in the auditor's opinion is intended to advise users of the auditor's report of the context in which the auditor's opinion is expressed; it is not intended to limit the evaluation required in paragraph .16. For example, the applicable financial reporting framework may be identified as accounting principles generally accepted in the United

States of America or U.S. generally accepted accounting principles or International Financial Reporting Standards promulgated by the International Accounting Standards Board (IASB) or *International Financial Reporting Standard for Small- and Medium-Sized Entities* promulgated by the IASB.

Basis for Opinion (Ref: par. .28)

.A35 The "Basis for Opinion" section provides important context about the auditor's opinion. Accordingly, this section requires the "Basis for Opinion" section to directly follow the "Opinion" section in the auditor's report.

.A36 The reference to the standards used conveys to the users of the auditor's report that the audit has been conducted in accordance with established standards. For example, the auditor's report may refer to auditing standards generally accepted in the United States of America or U.S. generally accepted auditing standards.

.A37 In accordance with section 200, the auditor does not represent compliance with GAAS in the auditor's report unless the auditor has complied with the requirements of section 200 and all other AU-C sections relevant to the audit.[19]

.A38 *Relevant Ethical Requirements (Ref: par. .28c).*Section 200 explains that ethical requirements consist of the AICPA Code of Professional Conduct together with rules of state boards of accountancy and applicable regulatory agencies that are more restrictive.[20] When the AICPA Code of Professional Conduct applies, the auditor's other ethical responsibilities relate to the principles of professional conduct (ET sec. 0.300, "Principles of Professional Conduct").

.A39 Relevant ethical requirements may exist in several different sources, such as ethical codes and additional rules and requirements within law and regulation. When independence and other relevant ethical requirements are contained in a limited number of sources, the auditor may choose to name the relevant sources (for example, the AICPA Code of Professional Conduct, when applicable; the rule or applicable regulation; or *Government Auditing Standards* promulgated by the Comptroller General of the United States) or may refer to a term that appropriately describes those sources. Relevant ethical requirements, including those pertaining to independence, in a group audit situation may be complex. Section 600A, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors)*,[21] provides guidance for auditors in performing work on the financial information of a component for a group audit, including those situations in which the component auditor does not meet the independence requirements that are relevant to the group audit.

---

[19] Paragraph .22 of section 200.

[20] Paragraph .A15 of section 200.

[21] Paragraphs .22–.23 of section 600A, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors)*.

Key Audit Matters (Ref. par. .30)

.A40 Section 210, *Terms of Engagement*, requires the audit engagement letter or other suitable form of written agreement to include reference to the expected form and content of any reports to be issued by the auditor.[22]

Responsibilities of Management for the Financial Statements (Ref: par. .31–.33)

.A41 Section 200 explains the premise relating to the responsibilities of management and, when appropriate, those charged with governance on which an audit in accordance with GAAS is conducted.[23] Management and, when appropriate, those charged with governance accept responsibility for the preparation of the financial statements in accordance with the applicable financial reporting framework, including their fair presentation. Management also accepts responsibility for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. The description of management's responsibilities in the auditor's report includes reference to both of these responsibilities because it helps explain to users the premise on which an audit is conducted. Section 260 uses the term *those charged with governance* to describe the persons or organizations with responsibility for overseeing the entity, and provides a discussion about the diversity of governance structures among entities.

.A42 In some instances, a document containing the auditor's report may include a separate statement by management or those charged with governance regarding their responsibility for the preparation of the financial statements. Any elaboration in the auditor's report about the responsibilities of management or those charged with governance regarding the preparation of the financial statements, or reference to a separate statement by management or those charged with governance about such responsibilities if one is included in a document containing the auditor's report, may lead users to erroneously believe that the auditor is providing assurances about representations made by management or those charged with governance about their responsibility for financial reporting, internal control, and other matters that might be discussed in the management report.

Auditor's Responsibilities for the Audit of the Financial Statements (Ref: par. .34–.37)

.A43 The description of the auditor's responsibilities as required by paragraphs .34–.37 of this section may be tailored to reflect the specific nature of the entity, for example, when the auditor's report addresses consolidated financial statements.

.A44 *Objectives of the Auditor (Ref: par. .35*a–c*)*. The auditor's report explains that the objectives of the auditor are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes the auditor's opinion. These objectives are in contrast to management's responsibilities for the preparation and fair presentation of the financial statements.

[22]Paragraph .10 of section 210, *Terms of Engagement*.

[23]Paragraphs .05 and .A2 of section 200.

.A45 Because the auditor's opinion is based on obtaining reasonable assurance, the auditor's report does not constitute a guarantee. Because of the inherent limitation of an audit, there is an unavoidable risk that some material misstatements of the financial statements may not be detected, even though the audit is properly planned and performed in accordance with GAAS. Accordingly, the subsequent discovery of a material misstatement of the financial statements resulting from fraud or error does not by itself indicate a failure to conduct an audit in accordance with GAAS.[24]

.A46 When the applicable financial reporting framework defines materiality differently from the definition in section 320, *Materiality in Planning and Performing an Audit*, the auditor's report may need to reflect the definition or description of materiality from the applicable financial reporting framework.

Other Reporting Responsibilities (Ref: par. .39–.40)

.A47 In some circumstances, the auditor may have additional responsibilities to report on other matters that are supplementary to the auditor's responsibility under GAAS to report on the financial statements. The form and content of the "Other Reporting Responsibilities" section of the auditor's report described in paragraph .39 will vary depending on the nature of the auditor's other reporting responsibilities. For example, for audits conducted under *Government Auditing Standards*, the auditor may be required to report on internal control over financial reporting and compliance with laws, regulations, and provisions of contracts or grant agreements, which may be included in the "Other Reporting Responsibilities" section of the auditor's report.[25] However, when the auditor is engaged or required by law or regulation to perform a compliance audit in accordance with GAAS, *Government Auditing Standards*, and a governmental audit requirement, reporting requirements in section 935, *Compliance Audits*, apply.

.A48 In some cases, the relevant law or regulation may require or permit the auditor to report on these other responsibilities within the auditor's report on the financial statements. In other cases, the auditor may be required or permitted to report on them in a separate report.

.A49 These other reporting responsibilities are addressed in a separate section of the auditor's report in order to clearly distinguish them from the auditor's responsibility under GAAS to report on the financial statements. When relevant, this section of the auditor's report may contain subheadings that describe the content of the other reporting responsibility paragraphs.

Signature of the Auditor (Ref: par. .41)

.A50 In some cases, law or regulation may allow for the use of electronic signatures in the auditor's report.

---

[24]Paragraph .A56 of section 200 and paragraph .10*d* of section 210.

[25]See AICPA Audit and Accounting Guide Government Auditing Standards *and Single Audits* for illustrative auditor reports.

.A51 In certain situations, the auditor's report may be required by law or regulation to include the personal name and signature of the auditor, in addition to the auditor's firm.

.A52 *Considerations specific to governmental entities.* This section would not preclude a governmental auditor from including the personal name and signature of the auditor in the auditor's report when, in certain situations, the governmental auditor is required by law or regulation or chooses to do so.

Auditor's Address (Ref: par. .42)

.A53 In the United States, the location of the issuing office is the city and state. In another country, it may be the city and country.

Date of the Auditor's Report (Ref. par. .43)

.A54 Section 220A, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, requires that, on or before the date of the auditor's report, the engagement partner, through a review of the audit documentation and discussion with the engagement team, be satisfied that sufficient appropriate audit evidence has been obtained to support the conclusions reached and for the auditor's report to be issued.[26] When an engagement quality control review is performed, section 220A requires that the auditor's report not be released prior to the completion of the engagement quality control review.[27]

.A55 The date of the auditor's report informs the user of the auditor's report that the auditor has considered the effect of events and transactions of which the auditor became aware and that occurred up to that date. The auditor's responsibility for events and transactions after the date of the auditor's report is addressed in section 560.

.A56 Because the auditor's opinion is provided on the financial statements, and the financial statements are the responsibility of management, the auditor is not in a position to conclude that sufficient appropriate audit evidence has been obtained until evidence is obtained that all the statements and disclosures that the financial statements comprise have been prepared, and management has accepted responsibility for them.

Considerations Specific to Governmental Entities

.A57 In some circumstances, final approval of the financial statements by governmental legislative bodies (or subsets of such legislative bodies) is required before the financial statements are issued. In these circumstances, final approval by such legislative bodies (or subsets of such legislative bodies) is not necessary for the auditor to conclude that sufficient appropriate audit evidence has been obtained. The date of approval of the financial statements, for purposes of GAAS, is the earlier date on which those with the recognized authority determine that all the statements and disclosures that the financial

[26]See paragraph .19 of section 220A, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, for further discussion.

[27]Paragraph .21 of section 220A.

statements comprise have been prepared and that those with the recognized authority have asserted that they have taken responsibility for them.

Auditor's Report for Audits Conducted in Accordance With Both GAAS and Another Set of Auditing Standards (Ref: par. .43)

.A58 If the audit is performed in accordance with both GAAS and the ISAs, the auditor may find it helpful to refer to appendix B, "Substantive Differences Between the International Standards on Auditing and Generally Accepted Auditing Standards." This appendix summarizes substantive differences between the ISAs and GAAS to assist the auditor in planning and performing an engagement in accordance with the ISAs.

Auditor's Report for Audits Conducted in Accordance With the Standards of the PCAOB and GAAS When the Audit Is Not Within the Jurisdiction of the PCAOB (Ref: par. .46)

.A59 Auditors of financial statements of entities whose audits are within the jurisdiction of the PCAOB, which include issuers (as defined by the SEC) and nonissuer brokers and dealers registered with the SEC, are required to be registered with, and subject to inspection by, the PCAOB. In such circumstances, the AICPA Code of Professional Conduct requires AICPA members to conduct the audit in accordance with the standards of the PCAOB, and the audit is not required to also be conducted in accordance with GAAS.[28]

.A60 As discussed in paragraph .46, because the auditor is required to also conduct the audit in accordance with GAAS, it would be inappropriate for the auditor to issue a report that refers only to the standards of the PCAOB without also referring to GAAS.

.A61 When the auditor follows the standards of the PCAOB regarding the form of the auditor's report, PCAOB reporting requirements for specific circumstances, such as reporting on an integrated audit or supplementary information, may also be applicable.

.A62 The form of the auditor's report required by the standards of the PCAOB states that the audit was conducted in accordance with "the standards of the Public Company Accounting Oversight Board (United States)." A reference to "the standards" of the PCAOB indicates that the auditor has complied not only with the PCAOB's auditing standards but also with the related professional practice standards of the PCAOB, including its independence rules; whereas a reference to "the auditing standards of the Public Company Accounting Oversight Board (United States)" indicates compliance with only the auditing standards of the PCAOB. The auditor of financial statements of an entity whose audits are not within the jurisdiction of the PCAOB may, nevertheless, be responsible for complying with the independence and other related professional practice standards of the PCAOB if, for example, the engagement is subject to regulatory oversight that requires compliance with those rules. Whether the auditor conducts an audit of financial statements in accordance with the standards of the PCAOB or the auditing standards of the PCAOB depends on the circumstances of the engagement.[29]

---

[28]See the "Compliance With Standards Rule" (ET sec. 1.310.001) and appendix A, "Council Resolution Designating Bodies to Promulgate Technical Standards," of the AICPA Code of Professional Conduct.

.A63 Examples of situations in which an auditor may be engaged to conduct an audit in accordance with the standards (or auditing standards) of the PCAOB for an entity whose audit is not within the jurisdiction of the PCAOB include audits for clearing agencies and futures commission merchants registered with the U.S. Commodities Futures Trading Commission (CFTC), as well as other entities registered with the CFTC; audits of financial statements included in certain securities offering documents pursuant to Regulation A of the Securities Act of 1933; and circumstances in which a nonissuer company desires, or is required by contractual agreement, to obtain an audit of its financial statements in accordance with the standards of the PCAOB.

.A64 When an audit is being conducted in accordance with the standards of the PCAOB, the auditor would follow the relevant requirements in the PCAOB standards regarding the determination and reporting of critical audit matters. This would not affect the requirement for the auditor to state in the auditor's report that the audit was also conducted in accordance with GAAS, as required by paragraph .46 of this section.

.A65 The exhibit "Illustrations of Auditor's Reports on Financial Statements" contains an example of an auditor's report for the situation described in paragraph .46.

Comparative Financial Statements and Comparative Information (Ref: par. .47–.48)

.A66 The level of information included for the prior periods in comparative financial statements is comparable with that of the financial statements of the current period.

.A67 Because the auditor's report on comparative financial statements applies to the financial statements for each of the periods presented, the auditor may express a qualified opinion or an adverse opinion, disclaim an opinion, or include an emphasis-of-matter paragraph with respect to one or more financial statements for one or more periods while expressing a different auditor's opinion on one or more financial statements of another period presented.

Updating the Report

.A68 An updated report on prior period financial statements is distinguished from a reissuance of a previous report.[30] When issuing an updated report, the information considered by the continuing auditor is that which the auditor has become aware of during the audit of the current period financial statements. In addition, an updated report is issued in conjunction with the auditor's report on the current period financial statements.

Other Considerations Relating to Comparative Financial Statements

.A69 If one firm of independent auditors merges with another firm, and the new firm becomes the auditor of a former client of one of the two former firms, the new firm may

[29]See Staff Question and Answer, *Audits of Financial Statements of Non-Issuers Performed Pursuant to the Standards of the Public Company Accounting Oversight Board* (PCAOB Staff Guidance, sec. 100.01), dated June 30, 2004, in *PCAOB Standards and Related Rules*.

[30]See section 560, *Subsequent Events and Subsequently Discovered Facts*.

accept responsibility and express an opinion on the financial statements for the prior periods, as well as on those for the current period. In such circumstances, paragraphs .47–.60 apply. The new firm may indicate in the auditor's report or as part of the signature that a merger took place and may name the firm of independent auditors that was merged with it. If the new firm decides not to express an opinion on the prior period financial statements, the guidance for the reissuance of reports in section 560 would apply.

Comparative Information (Ref: par. .49–.50)

.A70 Comparative information, which may be condensed financial statements or prior period summarized financial information, is not considered comparative financial statements because it is not a complete set of financial statements. For example, entities such as state and local governmental units frequently present total-all-funds information for the prior periods rather than information by individual funds because of space limitations or to avoid cumbersome or confusing formats. Also, not-for-profit organizations frequently present certain summarized financial information for the prior periods in total rather than by net asset class. Accordingly, the auditor need not opine on comparative information in accordance with this section.

.A71 Paragraph .49 requires the auditor to clearly indicate the character of the auditor's work, if any, and the degree of responsibility the auditor is taking in the auditor's report when comparative information is presented but not covered by the auditor's opinion on the financial statements of the current period. The requirements and guidance in section 930, *Interim Financial Information*, may be adapted to report on condensed financial statements or prior period summarized financial information that is derived from audited financial statements and is presented comparatively with the complete set of financial statements of the current period.[31,32] The exhibit to this section provides examples of auditor's reports when comparative summarized financial information for the prior period is presented.[33]

.A72 If an entity requests the auditor to express an opinion on all periods presented, and comparative information is presented for one or more prior periods, in most cases, this will necessitate including additional columns or separate detail by fund or net asset class, or the auditor may need to modify the auditor's opinion, as required by section 705.

Written Representations (Ref: par. .55)

.A73 In the case of comparative financial statements, the written representations are requested for all periods referred to in the auditor's opinion because management needs to reaffirm that the written representations it previously made with respect to the prior period remain appropriate.

---

[31]Paragraph .33 of section 930, *Interim Financial Information*.

[32]See the AICPA Audit and Accounting Guides *State and Local Governments* and *Not-for-Profit Entities* for further guidance on reporting on summarized comparative financial information.

[33]Illustration 5, "An Auditor's Report on Financial Statements for a Single Year Prepared in Accordance With Accounting Principles Generally Accepted in the United States of America When Comparative Summarized Financial Information Derived From Audited Financial Statements for the Prior Year is Presented," of the exhibit "Illustrations of Auditor's Reports on Financial Statements."

*Opinion on Prior Period Financial Statements Different From Previous Opinion (Ref: **par. .56**)*

.A74 When reporting on the prior period financial statements in connection with the current period's audit, the opinion expressed on the prior period financial statements may be different from the opinion previously expressed if, during the course of the audit of the current period, the auditor becomes aware of circumstances or events that materially affect the financial statements of a prior period. In some circumstances, the auditor may have additional reporting responsibilities designed to prevent future reliance on the auditor's previously issued report on the prior period financial statements.[34]

*Prior Period Financial Statements Audited by a Predecessor Auditor (Ref: **par. .58**)*

.A75 The predecessor auditor may be unable or unwilling to reissue the auditor's report on the prior period financial statements that have been restated. In this situation, provided that the auditor has audited the adjustments to the prior period financial statements, the auditor may include an other-matter paragraph[35] in the auditor's report indicating that the predecessor auditor reported on the financial statements of the prior period before restatement. In addition, if the auditor is engaged to audit the adjustments and obtains sufficient appropriate audit evidence to be satisfied about the appropriateness of the restatement, the auditor's report may also include the following within the other-matter paragraph:

> As part of our audit of the 20X2 financial statements, we also audited the adjustments described in Note X that were applied to restate the 20X1 financial statements. In our opinion, such adjustments are appropriate and have been properly applied. We were not engaged to audit, review, or apply any procedures to the 20X1 financial statements of the Company other than with respect to the adjustments, and, accordingly, we do not express an opinion or any other form of assurance on the 20X1 financial statements as a whole.

*Prior Period Financial Statements Not Audited (Ref: **par. .59–.60**)*

.A76 The following is an example of an other-matter paragraph when a review was performed on the prior period financial statements:

> *Other Matter*
>
> The 20X1 financial statements were reviewed by us (other accountants) and our (their) report thereon, dated March 1, 20X2, stated we (they) were not aware of any material modifications that should be made to those statements for them to be in accordance with accounting principles generally accepted in the United States of America. A review is substantially less in scope than an audit and does not provide a basis for the expression of an opinion on the financial statements as a whole.

---

[34] See section 560.

[35] See section 706.

.A77 The following is an example of an other-matter paragraph when a compilation was performed on the prior period financial statements:

> *Other Matter*
>
> We (other accountants) performed a compilation engagement with respect to the 20X1 financial statements and our (their) report thereon, dated March 1, 20X2, stated we (they) did not audit or review those financial statements and, accordingly, express no opinion or other form of assurance on them.

.A78 If the prior period financial statements were not audited, reviewed, or compiled, the following is an example of an other-matter paragraph:

> *Other Matter*
>
> The accompanying balance sheet of X Company as of December 31, 20X1, and the related statements of income and cash flows for the year then ended were not audited, reviewed, or compiled by us, and, accordingly, we do not express an opinion or any other form of assurance on them.

Information Presented in the Financial Statements (Ref: par. .61)

.A79 In some circumstances, the entity may be required by law, regulation, or standards, or may voluntarily choose, to include in the basic financial statements information that is not required by the applicable financial reporting framework. The auditor's opinion covers information that cannot be clearly differentiated from the financial statements because of its nature and how it is presented.

.A80 If the information included in the basic financial statements is not required by the applicable financial reporting framework and is not necessary for fair presentation but is clearly differentiated, then such information may be identified as "unaudited" or as "not covered by the auditor's report."

Illustration 1— An Auditor's Report on Comparative Financial Statements Prepared in Accordance With Accounting Principles Generally Accepted in the United States of America

Circumstances include the following:

- Audit of a complete set of general purpose financial statements (comparative). The audit is not a group audit.
- Management is responsible for the preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America as promulgated by the Financial Accounting Standards Board.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210, *Terms of Engagement*.
- The auditor has concluded that an unmodified (that is, "clean") opinion is appropriate based on the audit evidence obtained.
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- The auditor has obtained all the other information prior to the date of the auditor's report and has not identified an uncorrected material misstatement of the other information included in the annual report.
- The auditor has not been engaged to communicate key audit matters.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Audit of the Financial Statements[1]

Opinion

We have audited the financial statements of ABC Company, which comprise the balance sheets as of December 31, 20X1 and 20X0, and the related statements of income, changes in stockholders' equity, and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X1 and 20X0, and

[1]The subtitle "Report on the Audit of the Financial Statements" is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.[2]
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Other Information [or another title, if appropriate, such as "Information Other Than the Financial Statements and Auditor's Report Thereon"]

[*Reporting in accordance with the reporting requirements in section 720,* The Auditor's Responsibilities Relating to Other Information Included in Annual Reports *(refer to illustration 1, "The Auditor Has Not Identified an Uncorrected Material Misstatement of the Other Information," in the exhibit of section 720)*]

Report on Other Legal and Regulatory Requirements

[*The form and content of this section of the auditor's report would vary depending on the nature of the auditor's other reporting responsibilities.*]

[*Signature of the auditor's firm*]

[*City and state where the auditor's report is issued*]

[*Date of the auditor's report*]

[2] In circumstances in which the auditor also has a responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, omit the following: "but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed."

Illustration 2 — An Auditor's Report on Comparative Financial Statements Prepared in Accordance With Accounting Principles Generally Accepted in the United States of America, Including Communication of Key Audit Matters

Circumstances include the following:

- Audit of a complete set of general purpose financial statements (comparative). The audit is not a group audit.
- Management is responsible for the preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America as promulgated by the Financial Accounting Standards Board.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210, *Terms of Engagement*.
- The auditor has concluded that an unmodified (that is, "clean") opinion is appropriate based on the audit evidence obtained.
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- The auditor has obtained all the other information prior to the date of the auditor's report and has not identified an uncorrected material misstatement of the other information included in the annual report.
- The auditor has been engaged to communicate key audit matters.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Audit of the Financial Statements[3]

Opinion

We have audited the financial statements of ABC Company, which comprise the balance sheets as of December 31, 20X1 and 20X0, and the related statements of income, changes in stockholders' equity, and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X1 and 20X0, and

[3] The subtitle "Report on the Audit of the Financial Statements" is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Key Audit Matters

Key audit matters are those matters that were communicated with those charged with governance and, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

[*Description of each key audit matter in accordance with section 701,* Communicating Key Audit Matters in the Independent Auditor's Report]

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.[4]
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Other Information [or another title, if appropriate, such as "Information Other Than the Financial Statements and Auditor's Report Thereon"]

[*Reporting in accordance with the reporting requirements in section 720,* The Auditor's Responsibilities Relating to Other Information Included in Annual Reports *(refer to illustration 1, "The Auditor Has Not Identified an Uncorrected Material Misstatement of the Other Information," in the exhibit of section 720)*]

Report on Other Legal and Regulatory Requirements

[*The form and content of this section of the auditor's report would vary depending on the nature of the auditor's other reporting responsibilities.*]

[*Signature of the auditor's firm*]

[*Date of the auditor's report*]

[4]In circumstances in which the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, omit the following: "but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed."

Illustration 3 — An Auditor's Report on Financial Statements for a Single Year Prepared in Accordance With Accounting Principles Generally Accepted in the United States of America

Circumstances include the following:

- Audit of a complete set of general purpose financial statements (single year). The audit is not a group audit.
- Management is responsible for the preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America as promulgated by the Financial Accounting Standards Board.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210, *Terms of Engagement*.
- The auditor has concluded that an unmodified (that is, "clean") opinion is appropriate based on the audit evidence obtained.
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- The auditor has obtained all the other information prior to the date of the auditor's report and has not identified an uncorrected material misstatement of the other information included in the annual report.
- The auditor has not been engaged to communicate key audit matters.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Audit of the Financial Statements[5]

Opinion

We have audited the financial statements of ABC Company, which comprise the balance sheet as of December 31, 20X1, and the related statements of income, changes in stockholders' equity, and cash flows for the year then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X1, and the results

[5]The subtitle "Report on the Audit of the Financial Statements" is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

of its operations and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.[6]
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Other Information [or another title, if appropriate, such as "Information Other Than the Financial Statements and Auditor's Report Thereon"]

[*Reporting in accordance with the reporting requirements in section 720,* The Auditor's Responsibilities Relating to Other Information Included in Annual Reports *(see illustration 1, "The Auditor Has Not Identified an Uncorrected Material Misstatement of the Other Information," in the exhibit of section 720)*]

Report on Other Legal and Regulatory Requirements

[*The form and content of this section of the auditor's report would vary depending on the nature of the auditor's other reporting responsibilities.*]

[*Signature of the auditor's firm*]

[*City and state where the auditor's report is issued*]

[*Date of the auditor's report*]

[6] In circumstances in which the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, omit the following: "but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed."

Illustration 4 — An Auditor's Report on Comparative Financial Statements Prepared in Accordance With Accounting Principles Generally Accepted in the United States of America When the Audit Has Been Conducted in Accordance With Both Auditing Standards Generally Accepted in the United States of America and International Standards on Auditing

Circumstances include the following:

- Audit of a complete set of general purpose financial statements (comparative). The audit is a group audit. The auditor is not making reference to a component auditor in the auditor's report.
- Management is responsible for the preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America as promulgated by the Financial Accounting Standards Board.
- The financial statements are audited in accordance with auditing standards generally accepted in the United States of America and International Standards on Auditing (ISAs).[7]
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210, *Terms of Engagement,* and ISA 210, *Agreeing the Terms of Audit Engagements*.
- The auditor has concluded that an unmodified (that is, "clean") opinion is appropriate based on the audit evidence obtained.
- The relevant ethical requirements that apply to the audit comprise relevant ethical requirements in the United States of America and the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants (including International Independence Standards)*.
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- Those responsible for oversight of the financial statements differ from those responsible for the preparation of the financial statements.

---

[7]Paragraph 50 of International Standard on Auditing (ISA) 700 (Revised), *Forming an Opinion and Reporting on Financial Statements*, allows the auditor to use the layout or wording of the national auditing standards (in this case, GAAS), provided that (1) there are no conflicts between the requirements in GAAS and the ISAs that would lead to a different conclusion with respect to the opinion, and (2) the layout or wording addresses, and is not inconsistent with, certain of the required minimum reporting elements in ISA 700 (Revised).

- The auditor has obtained all the other information prior to the date of the auditor's report and has not identified an uncorrected material misstatement of the other information included in the annual report.
- The auditor has not been engaged to communicate key audit matters.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Audit of the Financial Statements[8]

Opinion

We have audited the financial statements of ABC Company, which comprise the balance sheets as of December 31, 20X1 and 20X0, and the related statements of income, changes in stockholders' equity, and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X1 and 20X0, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS) and in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of ABC Company, and have fulfilled our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits, which include relevant ethical requirements in the United States of America and the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants (including International Independence Standards)*. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management and Those Charged With Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

[8] The subtitle "Report on the Audit of the Financial Statements" is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*]; to disclose, as applicable, matters related to going concern; and to use the going concern basis of accounting unless management either intends to liquidate ABC Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing ABC Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS and ISAs will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS and ISAs, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.[9]
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.

[9] In circumstances in which the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, omit the following: "but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed."

- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the ABC Company to express an opinion on the financial statements. We are responsible for the direction, supervision, and performance of the group audit of ABC Company. We remain solely responsible for our audit opinion.[10]

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Other Information [or another title, if appropriate, such as "Information Other Than the Financial Statements and Auditor's Report Thereon"]

[*Reporting in accordance with the reporting requirements in section 720,* The Auditor's Responsibilities Relating to Other Information Included in Annual Reports *(see illustration 1, "The Auditor Has Not Identified an Uncorrected Material Misstatement of the Other Information," in the exhibit of section 720)*]

Illustration 5 — An Auditor's Report on Financial Statements for a Single Year Prepared in Accordance With Accounting Principles Generally Accepted in the United States of America When Comparative Summarized Financial Information Derived From Audited Financial Statements for the Prior Year Is Presented

Circumstances include the following:

- Audit of a complete set of general purpose financial statements (single year). The audit is not a group audit.
- Prior year summarized comparative financial information derived from audited financial statements is presented.
- Management is responsible for the preparation of financial statements in accordance with accounting principles generally accepted in the United States of America as promulgated by the Financial Accounting Standards Board.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210, *Terms of Engagement*.
- The auditor has concluded that an unmodified (that is, "clean") opinion is appropriate based on the audit evidence obtained.
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- The auditor has obtained all the other information prior to the date of the auditor's report and has not identified an uncorrected material misstatement of the other information included in the annual report.
- The auditor has not been engaged to communicate key audit matters.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Audit of the Financial Statements[11]

Opinion

We have audited the financial statements of XYZ Not-for-Profit Organization, which comprise the statement of financial position as of September 30, 20X1, and the related

[11]The subtitle "Report on the Audit of the Financial Statements" is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

statements of activities and cash flows for the year then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of XYZ Not-for-Profit Organization as of September 30, 20X1, and the changes in its net assets and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of XYZ Not-for-Profit Organization and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about XYZ Not-for-Profit Organization's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of XYZ Not-for-Profit Organization's internal control. Accordingly, no such opinion is expressed.[12]
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about XYZ Not-for-Profit Organization's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Report on Summarized Comparative Information

We have previously audited XYZ Not-for-Profit Organization's 20X0 financial statements, and we expressed an unmodified audit opinion on those audited financial statements in our report dated December 15, 20X0. In our opinion, the summarized comparative information presented herein as of and for the year ended September 30, 20X0, is consistent, in all material respects, with the audited financial statements from which it has been derived.

Other Information [or another title, if appropriate, such as "Information Other Than the Financial Statements and Auditor's Report Thereon"]

[12]In circumstances in which the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, omit the following: "but not for the purpose of expressing an opinion on the effectiveness of XYZ Not-for-Profit Organization's internal control. Accordingly, no such opinion is expressed."

[*Date of the auditor's report*]

Illustration 6 — An Auditor's Report on Financial Statements for a Single Year Prepared in Accordance With Accounting Principles Generally Accepted in the United States of America When Comparative Summarized Financial Information Derived From Unaudited Financial Statements for the Prior Year Is Presented

Circumstances include the following:

- Audit of a complete set of general purpose financial statements (single year). The audit is not a group audit.
- Prior year summarized comparative financial information derived from unaudited financial statements is presented.
- Management is responsible for the preparation of financial statements in accordance with accounting principles generally accepted in the United States of America as promulgated by the Financial Accounting Standards Board.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210, *Terms of Engagement*.
- The auditor has concluded that an unmodified (that is, "clean") opinion is appropriate based on the audit evidence obtained.
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- The auditor has obtained all the other information prior to the date of the auditor's report and has not identified an uncorrected material misstatement of the other information included in the annual report.
- The auditor has not been engaged to communicate key audit matters.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Audit of the Financial Statements[13]

Opinion

We have audited the financial statements of XYZ Not-for-Profit Organization, which comprise the statement of financial position as of September 30, 20X1, and the related

[13]The subtitle "Report on the Audit of the Financial Statements" is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

statements of activities and cash flows for the year then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of XYZ Not-for-Profit Organization as of September 30, 20X1, and the changes in its net assets and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of XYZ Not-for-Profit Organization and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about XYZ Not-for-Profit Organization's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of XYZ Not-for-Profit Organization's internal control. Accordingly, no such opinion is expressed.[14]
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about XYZ Not-for-Profit Organization's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Report on Summarized Comparative Information

The summarized comparative information presented herein as of and for the year ended September 30, 20X0, derived from those unaudited financial statements, has not been audited, reviewed, or compiled, and, accordingly, we express no opinion on it.

Accordingly, no such opinion is expressed."

Illustration 7 — An Auditor's Report on Comparative Financial Statements Prepared in Accordance With Accounting Principles Generally Accepted in the United States of America When the Audit Has Been Conducted by a Registered Firm in Accordance With Both Auditing Standards Generally Accepted in the United States of America and the Auditing and Professional Practice Standards of the Public Company Accounting Oversight Board

Circumstances include the following:

- Audit of a complete set of general purpose financial statements (comparative) of an entity whose audit is not within the jurisdiction of the PCAOB as defined by the Sarbanes-Oxley Act of 2002, as amended. The audit is not a group audit.
- The firm is registered with the PCAOB and for purposes of this engagement is required by regulation to be in compliance with the independence standards and other professional practice standards of the PCAOB and SEC.
- Management is not required to report on the entity's internal control over financial reporting.
- The financial statements are prepared in accordance with accounting principles generally accepted in the United States of America.

Report of Independent Registered Public Accounting Firm

[*To the Shareholders and the Board of Directors of X Company*][15]

Opinion on the Financial Statements

We have audited the accompanying balance sheets of X Company (the Company) as of December 31, 20X2 and 20X1, the related statements of income, changes in stockholders' equity, and cash flows for each of the three years in the period ended December 31, 20X2, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial

---

[15]See paragraph .07 of PCAOB Auditing Standard (AS) 3101, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*, in *PCAOB Standards and Related Rules*. Staff Guidance *Changes to the Auditor's Report Effective for Audits of Fiscal Years Ending on or After December 15, 2017* (PCAOB Staff Guidance sec. 300.04), states that

> AS 3101 requires the auditor's report to be addressed to the shareholders and the board of directors, or equivalents for companies not organized as corporations. For example, if a company is not organized as a corporation, the auditor's report would generally be addressed to (1) the plan administrator and plan participants for a benefit plan; (2) the directors (or equivalent) and equity owners for a broker or dealer; and (3) the trustees and unit holders or other investors for an investment company organized as a trust. The auditor's report may include additional addressees. Since inclusion of additional addressees is voluntary, auditors can assess, based on the individual circumstances, whether to include additional addressees in the auditor's report.

All AS sections can be found in *PCAOB Standards and Related Rules*.

position of the Company as of [*at*] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 20X2, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB and in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.[16]

Critical Audit Matters (if Applicable)

---

[16]As described in paragraphs .59–.60 of AS 3105, *Departures from Unqualified Opinions and Other Reporting Circumstances*, this section should be revised in situations in which management is required to report on the effectiveness of internal control over financial reporting but such report is not required to be audited, and the auditor has not been engaged to perform an audit of management's assessment of the effectiveness of internal control over financial reporting. The following paragraphs should replace the second paragraph in the "Basis for Opinion" section in those circumstances. A similar paragraph may voluntarily be included in the auditor's report in situations in which management is not required to report on internal control over financial reporting and neither is the auditor.

> We conducted our audits in accordance with the standards of the PCAOB and in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.
>
> Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

The critical audit matters communicated below are matters arising from the current period audit of the financial statements that were communicated or required to be communicated to the audit committee[17] and that: (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

[*Include critical audit matters*]

[*Signature*]

We have served as the Company's auditor since [*year*].[18]

[*City and State or Country*]

[*Date*]

---

[17] AS 1301, *Communications with Audit Committees*, defines "audit committee" as

> A committee (or equivalent body) established by and among the board of directors of a company for the purpose of overseeing the accounting and financial reporting processes of the company and audits of the financial statements of the company; if no such committee exists with respect to the company, the entire board of directors of the company.
>
> For audits of nonissuers, if no such committee or board of directors (or equivalent body) exists with respect to the company, the person(s) who oversee the accounting and financial reporting processes of the company and audits of the financial statements of the company.

[18] As discussed in Staff Guidance *Changes to the Auditor's Report Effective for Audits of Fiscal Years Ending on or After December 15, 2017*, AS 3101 does not specify a required location within the auditor's report for the statement on auditor tenure. The sample auditor's report includes the statement on auditor tenure at the end of the report; however, auditors have discretion to present auditor tenure in the part of the auditor's report they consider appropriate.

Illustration 8 — An Auditor's Report on Comparative Financial Statements Prepared in Accordance With Accounting Principles Generally Accepted in the United States of America When the Audit Has Been Conducted by a Nonregistered Firm in Accordance With Both Auditing Standards Generally Accepted in the United States of America and the Auditing Standards of the Public Company Accounting Oversight Board

Circumstances include the following:

- Audit of a complete set of general purpose financial statements (comparative) of an entity whose audit is not within the jurisdiction of the PCAOB as defined by the Sarbanes-Oxley Act of 2002, as amended.
- The firm is not registered with the PCAOB and for purposes of this engagement is not required to be in compliance with the independence standards and other professional practice standards of the PCAOB and SEC.
- Management is not required to report on the entity's internal control over financial reporting.
- The financial statements are prepared in accordance with accounting principles generally accepted in the United States of America.

Report of Independent Public Accounting Firm

[*To the Shareholders and the Board of Directors of X Company*][19]

Opinion on the Financial Statements

We have audited the accompanying balance sheets of X Company (the Company) as of December 31, 20X2 and 20X1, the related statements of income, changes in stockholders' equity, and cash flows for each of the three years in the period ended December 31, 20X2, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of [*at*] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for each of the three years in the period ended December 31,

[19]See paragraph .07 of PCAOB Auditing Standard (AS) 3101, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*, in *PCAOB Standards and Related Rules*. Staff Guidance *Changes to the Auditor's Report Effective for Audits of Fiscal Years Ending on or After December 15, 2017* (PCAOB Staff Guidance sec. 300.04), states that

> AS 3101 requires the auditor's report to be addressed to the shareholders and the board of directors, or equivalents for companies not organized as corporations. For example, if a company is not organized as a corporation, the auditor's report would generally be addressed to (1) the plan administrator and plan participants for a benefit plan, (2) the directors (or equivalent) and equity owners for a broker or dealer, and (3) the trustees and unit holders or other investors for an investment company organized as a trust. The auditor's report may include additional addressees. Since inclusion of additional addressees is voluntary, auditors can assess, based on the individual circumstances, whether to include additional addressees in the auditor's report.

20X2, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are required to be independent with respect to the Company in accordance with the relevant ethical requirements relating to our audits.

We conducted our audits in accordance with the auditing standards of the Public Company Accounting Oversight Board (United States) and in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.[20]

Critical Audit Matters (if applicable)

The critical audit matters communicated below are matters arising from the current period audit of the financial statements that were communicated or required to be communicated

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 137. Revised, January 2020, to reflect conforming changes necessary due to the issuance of SAS No. 138. Revised, October 2023, to reflect the updated title of the IESBA Code of Ethics for Professional Accountants.]

[21]AS 1301, *Communications with Audit Committees,* defines "audit committee" as

> A committee (or equivalent body) established by and among the board of directors of a company for the purpose of overseeing the accounting and financial reporting processes of the company and audits of the financial statements of the company; if no such committee exists with respect to the company, the entire board of directors of the company.
>
> For audits of nonissuers, if no such committee or board of directors (or equivalent body) exists with respect to the company, the person(s) who oversee the accounting and financial reporting processes of the company and audits of the financial statements of the company.

[22]As discussed in Staff Guidance *Changes To The Auditor's Report Effective For Audits of Fiscal Years Ending On or After December 15, 2017*, AS 3101 does not specify a required location within the auditor's report for the statement on auditor tenure. The example auditor's report includes the statement on auditor tenure at the end of the report; however, auditors have discretion to present auditor tenure in the part of the auditor's report they consider appropriate.

AU-C Section 9700

Forming an Opinion and Reporting on Financial Statements: Auditing Interpretations of Section 700

1. Reporting on Financial Statements Prepared on a Liquidation Basis of Accounting

.01 *Question* — An entity prepares its financial statements using the liquidation basis of accounting in accordance with FASB *Accounting Standards Codification* (ASC) 205, *Presentation of Financial Statements*, because the entity is either in liquidation or liquidation is imminent. Is the auditor permitted to issue an unmodified opinion on such financial statements?

.02 *Interpretation* — Yes. A liquidation basis of accounting is considered generally accepted accounting principles (GAAP) for entities in liquidation or for which liquidation is imminent. Therefore, the auditor is permitted to issue an unmodified opinion on such financial statements, provided that the liquidation basis of accounting has been properly applied and that adequate disclosures are made in the financial statements in accordance with FASB ASC 205-30.

.03 Typically, the financial statements of entities using the liquidation basis of accounting are presented along with financial statements of a period prior to adoption of a liquidation basis that were prepared on the going concern basis in accordance with GAAP. Section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report*, requires the auditor to include an emphasis-of-matter paragraph when a matter that is appropriately presented or disclosed in the financial statements is of such importance, in the auditor's professional judgment, that it is fundamental to users' understanding of the financial statements. If the auditor determines an emphasis-of-matter paragraph is appropriate, the emphasis-of-matter paragraph would state that the entity has changed the basis of accounting used to determine the amounts at which assets and liabilities are carried from the going concern basis to a liquidation basis.

.04 Two examples of auditor's reports with such an emphasis-of-matter paragraph follow.

Example 1— Report on the Audit of Single-Year Financial Statements in Year of Adoption of Liquidation Basis

Independent Auditor's Report

[*Appropriate Addressee*]

Opinion

We have audited the financial statements of XYZ Company, which comprise the statement of net assets in liquidation as of December 31, 20X2, the related statement of changes in net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2, and the statements of income, changes in stockholders' equity, and cash flows for the period from January 1, 20X2 to April 25, 20X2, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the net assets in liquidation of XYZ Company as of December 31, 20X2, the changes in its net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2, and the results of its operations and its cash flows for the period from January 1, 20X2 to April 25, 20X2, in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of XYZ Company, and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Emphasis of Matter

As discussed in Note X to the financial statements, the stockholders of XYZ Company approved a plan of liquidation on April 25, 20X2, and the Company determined liquidation is imminent. As a result, the Company changed its basis of accounting on April 25, 20X2 from the going concern basis to a liquidation basis. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered to be material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of XYZ Company's internal control.[1] Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

[*Signature of the auditor's firm*]

[*City and state where report is issued*]

[*Date of the auditor's report*]

[1]In circumstances in which the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, omit the following: "but not for the purpose of expressing an opinion on the effectiveness of XYZ Company's internal control. Accordingly, no such opinion is expressed."

Example 2 — Report on the Audit of Comparative Financial Statements in Year of Adoption of Liquidation Basis

Independent Auditor's Report

[*Appropriate Addressee*]

Opinion

We have audited the financial statements of XYZ Company, which comprise the balance sheet as of December 31, 20X1, the related statements of income, changes in stockholders' equity, and cash flows for the year then ended, the statements of income, changes in stockholders' equity, and cash flows for the period from January 1, 20X2 to April 25, 20X2, the statement of net assets in liquidation as of December 31, 20X2, the related statement of changes in net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of XYZ Company as of December 31, 20X1, the results of its operations and its cash flows for the year then ended and for the period from January 1, 20X2 to April 25, 20X2, its net assets in liquidation as of December 31, 20X2, and the changes in its net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2, in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of XYZ Company, and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Emphasis of Matter

As discussed in Note X to the financial statements, the stockholders of XYZ Company approved a plan of liquidation on April 25, 20X2, and the Company determined liquidation is imminent. As a result, the Company changed its basis of accounting on April 25, 20X2 from the going concern basis to a liquidation basis. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered to be material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of XYZ Company's internal control.[2] Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

[*Signature of the auditor's firm*]

[*City and state where report is issued*]

[*Date of the auditor's report*]

[2]In circumstances in which the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, omit the following: "but not for the purpose of expressing an opinion on the effectiveness of XYZ Company's internal control. Accordingly, no such opinion is expressed."

.05 The auditor may, in subsequent years, continue to include an emphasis-of-matter paragraph in the auditor's report to emphasize that the financial statements are presented on a liquidation basis of accounting.

[Issue Date: December 1984; Revised: June 1993; Revised: February 1997; Revised: October 2000; Revised: June 2009; Revised: October 2011, effective for audits of financial statements for periods ending on or after December 15, 2012; Revised: May 2014; Revised: September 2014; Revised: March 2020.]

2. Sustainability Financial Statements Under Federal Financial Accounting Standards — Auditor Reporting

.06 *Question* — The Federal Accounting Standards Advisory Board issued Statement of Federal Financial Accounting Standards (SFFAS) No. 36, *Reporting Comprehensive Long-Term Fiscal Projections for the U.S. Government*. SFFAS No. 36, as amended, requires that the statement of long-term fiscal projections be presented in the consolidated financial report of the U.S. government as a basic financial statement starting in fiscal year 2015. The focus of this standard is on forward-looking information intended to aid users in assessing whether future resources will likely be sufficient to sustain public services and to meet obligations as they come due. The statement of long-term fiscal projections presents the actuarial present value of the U.S. government's estimated future income to be received and future expenditures to be paid. The statement of long-term fiscal projections includes information drawn from the current statement of social insurance (SFFAS No. 17, *Accounting for Social Insurance*, as amended, a basic statement since fiscal year 2006) and statement of changes in social insurance amounts (SFFAS No. 37, *Social Insurance: Additional Requirements for Management's Discussion and Analysis and Basic Financial Statements*, a basic statement since fiscal year 2011). Collectively, the statement of long-term fiscal projections, the statement of social insurance, and the statement of changes in social insurance amounts are referred to herein as sustainability financial statements. May an auditor report on these basic financial statements in accordance with auditing standards generally accepted in the United States of America (GAAS)? If so, how would an auditor report on these statements?

.07 *Interpretation* — Yes, consistent with Statement of Position 04-1, *Auditing the Statement of Social Insurance* (AUD sec. 35), an auditor may report on the basic financial statements, which include the statements of social insurance, changes in social insurance amounts, and long-term fiscal projections, in accordance with GAAS. Section 700, *Forming an Opinion and Reporting on Financial Statements*, provides requirements and guidance on forming an opinion on the basic financial statements. An illustration of an auditor's report containing an unmodified opinion on the U.S. government-wide financial statements follows[3] (footnotes are provided for necessary adjustments when reporting on component financial statements containing sustainability financial statements):

---

[3]The sustainability financial statements do not articulate with the consolidated financial statements. For that reason, the opinion on the sustainability financial statements ordinarily will not affect the opinion on the consolidated financial statements. For example, the opinion on the sustainability financial statements may be modified, whereas the opinion on the consolidated financial statements may be unmodified.

<u>Independent Auditor's Report</u>

[*Appropriate Addressee*]

Report on the Audit of the Financial Statements

Opinions on the Financial Statements

We have audited the financial statements of *the U.S. government*,[4] which comprise the consolidated financial statements and the sustainability financial statements. The consolidated financial statements comprise the *consolidated balance sheets as of September 30, 20XX and 20YY, and the related consolidated statements of net cost, of operations and changes in net position, reconciliations of net operating cost and budget deficit, and changes in cash balance from budget and other activities*[5] for the years then ended, and the related notes to the consolidated financial statements.

The sustainability financial statements comprise the statements of social insurance as of [*dates — five years presented*], the statements of changes in social insurance amounts for the periods [*dates — two periods presented*]*, and the statements of long-term fiscal projections as of September 30, 20XX and 20YY*, and the related notes to the sustainability financial statements.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, *the financial position of the U.S. government as of September 30, 20XX and 20YY, and its net cost, operations, and changes in net position; reconciliations of net operating cost and budget deficit, and changes in cash balance from budget and other activities*[6] for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Also, in our opinion, the sustainability financial statements referred to above present fairly, in all material respects, the *U.S. government's social insurance information as of* [*dates — five years presented*], its changes in social insurance amounts for the periods [*dates — two periods presented*], *and the long-term fiscal projections as of September 30, 20XX and 20YY*, in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

---

[4]Italicized text would be applicable only to reports on the consolidated financial statements of the U.S. government. Where appropriate, alternative text applicable to reports on component entity financial statements are provided in other footnotes.

[5]For reports on component entity financial statements, the financial statements would be tailored to the financial statements presented, for example "...the balance sheets as of September 30, 20XX and 20YY and the related statements of net cost, *(and)* changes in net position, *(and custodial activity),* and combined statements of budgetary resources...".

[6]For reports on component entity financial statements, this language would be tailored to the financial statements presented, for example "... the financial position of [*name of entity*] as of September 30, 20XX and 20YY, and its net cost, changes in net position, *(and)* and budgetary resources *(, and custodial activity)*...."

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States [*include Office of Management and Budget (OMB) Bulletin No. and title, if applicable*]. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the U.S. government, and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives under GAAS and *Government Auditing Standards* are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS and *Government Auditing Standards* [*include OMB Bulletin, if applicable*] will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered to be material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the U.S. Government's internal control. Accordingly, no such opinion is expressed.

- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about U.S. Government's ability to continue as a going concern for a reasonable period of time.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Emphasis of Matter

As discussed in Note X to the financial statements, the sustainability financial statements are based on management's assumptions. These sustainability financial statements present the actuarial present value of the U.S. government's estimated future income to be received and future expenditures to be paid using a projection period sufficient to illustrate long-term sustainability. The sustainability financial statements are intended to aid users in assessing whether future resources will likely be sufficient to sustain public services and to meet obligations as they come due. The statements of social insurance and changes in social insurance amounts are based on income and benefit formulas in current law and assume that scheduled benefits will continue after any related trust funds are exhausted. *The statements of long-term fiscal projections are based on the continuation of current policy.* The sustainability financial statements are not forecasts or predictions. The sustainability financial statements are not intended to imply that current policy or law is sustainable. In preparing the sustainability financial statements, management considers and selects assumptions and data that it believes provide a reasonable basis to illustrate whether current policy or law is sustainable. Assumptions underlying such sustainability information do not consider changes in policy or all potential future events that could affect future income, future expenditures, and sustainability, for example, implementation of policy changes to avoid trust fund exhaustion *or unsustainable debt levels*. Because of the large number of factors that affect the sustainability financial statements and the fact that future events and circumstances cannot be estimated with certainty, even if current policy is continued, there will be differences between the estimates in the sustainability financial statements and the actual results, and those differences may be material. Our opinion is not modified with respect to this matter.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the information in the Management's Discussion and Analysis and Required Supplementary Information (RSI) be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Federal Accounting Standards Advisory Board, who considers it to be an essential part of financial reporting for placing the financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the RSI in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audits of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Management is responsible for the other information [*included in the annual report*]. The other information comprises the [*information included in the annual report*] but does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated [*date of report*] on our consideration of the *U.S. government's* internal control over financial reporting and our report dated [*report date*] on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of those reports is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. Those reports are an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the *U.S. government's* internal control over financial reporting and compliance.

3. Reporting on Audits Conducted in Accordance With Auditing Standards Generally Accepted in the United States of America and International Standards on Auditing

[.08–.13] [Withdrawn March 2020 due to the issuance of SAS No. 134, as amended.]

Introduction

On June 1, 2017, the PCAOB adopted AS 3101, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*.[7] The SEC approved AS 3101 and related amendments on October 23, 2017. AS 3101 retains the pass or fail opinion of the existing PCAOB auditor's report but makes significant changes to the existing PCAOB auditor's report, including the following:

- Requiring communication of critical audit matters (CAMs). Any matter arising from the audit of the financial statements that was communicated or required to be communicated to the audit committee and that

— relates to accounts or disclosures that are material to the financial statements and

— involved especially challenging, subjective, or complex auditor judgment

- Requiring disclosure of auditor tenure. The year in which the auditor began serving consecutively as the company's auditor
- Other improvements to the auditor's report. Clarification of the auditor's role and responsibilities, such as a statement regarding the requirement for the auditor to be independent with respect to the company, and making the auditor's report easier to read

Among the other revisions, AS 3101 specifies the form of the report, including requirements related to the order of presentation and section titles. All the changes, except those relating to CAMs, are effective for audits of fiscal years ending on or after December 15, 2017.[8]

As noted in PCAOB Release No. 2017-001, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion and Related Amendments to PCAOB Standards*,

> There are situations in which an auditor may be required by law or regulation, or voluntarily agrees, to perform an audit engagement in accordance with PCAOB standards for a company whose audit is not subject to PCAOB oversight.[112] For example, SEC rules permit audits under PCAOB standards in connection with offerings under Regulation A and Regulation Crowdfunding. In these situations, certain elements of the auditor's report required under the final standard, such as the use of "registered public

[7]All PCAOB auditing standards can be found in *PCAOB Standards and Related Rules*.

[8]PCAOB Release No. 2017-001, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion and Related Amendments to PCAOB Standards*, was issued June 1, 2017, and was approved by the SEC on October 23, 2017. Staff Guidance *Changes to the Auditor's Report Effective for Audits of Fiscal Years Ending on or After December 15, 2017* (PCAOB Staff Guidance, sec. 300.04) (updated as of December 28, 2017), was prepared by PCAOB staff to help firms when implementing changes to the auditor's report effective for audits of fiscal years ending on or after December 15, 2017.

accounting firm" in the title or the statement regarding independence requirements, may not apply.

[112] Under the Sarbanes-Oxley Act, as amended by the Dodd-Frank Wall Street Reform and Consumer Protection Act, the PCAOB oversees the audits of "issuers" and brokers and dealers reporting under Exchange Act Rule 17a-5. See Sarbanes-Oxley Act Section 101. An "issuer" under the Sarbanes-Oxley Act is an entity whose securities are registered under Section 12 of the Exchange Act, or that is required to file reports under Section 15(d) of the Exchange Act, or that files or has filed a Securities Act registration statement that has not yet become effective and that it has not withdrawn. See Sarbanes-Oxley Section 2(a).

GAAS currently address the appropriate form of report when an auditor issues a report referencing both GAAS and the standards of the PCAOB. Section 700, *Forming an Opinion and Reporting on Financial Statements*,[9] states

When conducting an audit of financial statements in accordance with the standards of the PCAOB and the audit is not within the jurisdiction of the PCAOB as defined by the Sarbanes-Oxley Act of 2002 (the Act), as amended, the auditor is required to also conduct the audit in accordance with GAAS. In such circumstances, when the auditor refers to the standards of the PCAOB in addition to GAAS in the auditor's report, the auditor should use the form of report required by the standards of the PCAOB, amended to state that the audit was also conducted in accordance with GAAS.

Interpretation No. 4, "Reporting on Audits Conducted in Accordance With Auditing Standards Generally Accepted in the United States of America and the Standards of the PCAOB" (par. .14–.21), provides guidance on how an auditor complies with section 700[10] in the context of the revised reporting standards adopted by the PCAOB and approved by the SEC. Because of the phased approach of the effective dates of AS 3101, Interpretation No. 4 does not address the changes relating to CAMs.

Interpretation No. 5, “Communicating Critical Audit Matters When Reporting on Audits Conducted in Accordance With Auditing Standards Generally Accepted in the United States of America and the Standards of the PCAOB” (par. .22–.26), provides guidance on how an auditor complies with section 700 in the context of the PCAOB reporting standards when the communication of CAMs is required.

Although Interpretation No. 4 and Interpretation No. 5 have been determined to be consistent with GAAS, the interpretations should not be construed to be interpretations of PCAOB standards. Moreover, Interpretation No. 4 and Interpretation No. 5 have not been approved or acted upon by the PCAOB.

[9]Paragraph .46 of section 700, *Forming an Opinion and Reporting on Financial Statements*.

[10]See footnote 9.

4. Reporting on Audits Conducted in Accordance With Auditing Standards Generally Accepted in the United States of America and the Standards of the PCAOB

.14 *Question* — Section 700[11] states, in part, that the auditor should use the form of report required by the standards of the PCAOB. Are there any elements of the auditor's report required by the standards of the PCAOB whose presentation may need to be revised in order to comply with the PCAOB reporting requirements?

.15 *Interpretation* — Yes. To appropriately apply the requirement in section 700[12] to follow the PCAOB form of the report, the auditor will need to evaluate the circumstances of the engagement and also may need to modify the report as described in the following paragraphs to avoid making an untrue statement.

.16 *Question* — Paragraph .06 of AS 3101 states that the auditor "must include the title, 'Report of Independent Registered Public Accounting Firm'" and the related description in the "Basis for Opinion" section of the report required by paragraph .09*g* of AS 3101. Is it appropriate for an auditor to revise the report by removing the references to "registered" if the firm is not registered with the PCAOB?

.17 *Interpretation* — Yes, removing the reference to "registered" from the title and from the "Basis for Opinion" section of the report is appropriate if the firm is not registered with the PCAOB. As noted in Staff Questions and Answers *Audits of Financial Statements of Non-Issuers Performed Pursuant to the Standards of the Public Company Accounting Oversight Board*,[13] dated June 30, 2004, a public accounting firm does not need to be registered with the PCAOB to perform an audit of a nonissuer in accordance with PCAOB standards.

.18 *Question* — How should the auditor address the requirement in paragraph .09*g* of AS 3101 that notes that the auditor "is required to be independent with respect to the company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the SEC and the PCAOB"?

.19 *Interpretation* — Generally, GAAS do not require the auditor to be independent under SEC and PCAOB standards unless required by law or regulation. Therefore, it would be appropriate in those circumstances for the auditor to revise the statement in the report regarding independence to reflect the circumstances of the engagement. For example, if the auditor is not required to be independent under U.S. federal securities laws and the applicable rules and regulations of the SEC and the PCAOB, this statement may be amended to read, "We are required to be independent with respect to the Company in accordance with the relevant ethical requirements relating to our audit."[14]Section 200,

[11]See footnote 9.

[12]See footnote 9.

[13]PCAOB Staff Guidance, sec. 100.01.

[14]See illustration 8, "An Auditor's Report on Comparative Financial Statements Prepared in Accordance With Accounting Principles Generally Accepted in the United States of America When the Audit Has Been Conducted by a Nonregistered Firm in Accordance With Both Auditing Standards Generally Accepted in the United States

Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards, explains that relevant ethical requirements consist of the AICPA Code of Professional Conduct together with rules of state boards of accountancy and applicable regulatory agencies that are more restrictive.[15] Relevant ethical requirements may exist in several different sources, such as ethical codes and additional rules and requirements within law and regulation. Depending on the circumstances, for example, when independence and ethical requirements are contained in a limited number of sources, the auditor may choose to name the relevant sources (such as the AICPA Code of Professional Conduct) or rule or applicable regulation or may refer to a term that appropriately describes those sources.

.20 In addition, the auditor may need to revise the reference to "the standards" of the PCAOB as described in section 700.[16] As noted in section 700,[17] reference to "the standards" of the PCAOB indicates that the auditor has complied not only with the PCAOB's auditing standards but also with the related professional practice standards of the PCAOB, including its independence rules, whereas a reference to "the auditing standards of the Public Company Accounting Oversight Board (United States)" is limited to compliance with the auditing standards of the PCAOB. The auditor of financial statements of an entity whose audits are not within the jurisdiction of the PCAOB may, nevertheless, be responsible for complying with the independence and other related professional practice standards of the PCAOB if, for example, the engagement is subject to regulatory oversight that requires compliance with those rules. Whether the auditor conducts an audit of financial statements in accordance with the standards of the PCAOB or the auditing standards of the PCAOB depends on the circumstances of the engagement.

.21 The exhibit to section 700[18] contains examples of auditor's reports on comparative financial statements when the audits are conducted in accordance with both GAAS and either the standards of the PCAOB or the auditing standards of the PCAOB.

[Issue Date: March 2018; Revised: March 2020.]

---

of America and the Auditing Standards of the Public Company Accounting Oversight Board," in the exhibit to section 700.

[15] Paragraph .A15 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

[16] Paragraph .A62 of section 700.

[17] See footnote 10 and paragraph .A62.

[18] See illustration 7, "An Auditor's Report on Comparative Financial Statements Prepared in Accordance With Accounting Principles Generally Accepted in the United States of America When the Audit Has Been Conducted by a Registered Firm in Accordance With Both Auditing Standards Generally Accepted in the United States of America and the Auditing and Professional Practice Standards of the Public Company Accounting Oversight Board," and illustration 8.

5. Communicating Critical Audit Matters When Reporting on Audits Conducted in Accordance With Auditing Standards Generally Accepted in the United States of America and the Standards of the PCAOB

.22 *Question* — When reporting on audits of nonissuer entities that are not within the jurisdiction of the PCAOB as defined by the Sarbanes-Oxley Act of 2002, as amended, but conducted in accordance with the standards of the PCAOB and GAAS, is the auditor required to communicate critical audit matters (CAMs) in accordance with paragraphs .11–.17 of AS 3101?

.23 *Interpretation* — Section 700[19] states that the auditor should not refer to having conducted an audit in accordance with another set of auditing standards in addition to GAAS unless the audit was conducted in accordance with both sets of standards in their entirety. Section 700[20] also states that "…when the auditor refers to the standards of the PCAOB in addition to GAAS in the auditor's report, the auditor should use the form of report required by the standards of the PCAOB, amended to state that the audit was also conducted in accordance with GAAS."

.24 Accordingly, the auditor would follow the relevant requirements in the PCAOB standards regarding the determination and reporting of critical audit matters. This would not affect the requirement for the auditor to state in the auditor's report that the audit was also conducted in accordance with GAAS, as required by section 700.[21]

.25 Note that paragraph .05*b* of AS 3101 lists entities for which communication of CAMs is not required, including brokers and dealers, investment companies registered under the Investment Company Act of 1940, employee stock purchases, savings and similar plans, and emerging growth companies. Whether a nonissuer is such an entity is a matter for management to determine, and may involve consultation with management's legal counsel, based on the entity's circumstances.

.26 Accordingly, an auditor should apply all the requirements for CAMs set forth in AS 3101 unless it is determined by management that the entity is not subject to CAM reporting as described previously.

AU-C Section 701

Communicating Key Audit Matters in the Independent Auditor's Report

Source: SAS No. 134; SAS No. 141; SAS No. 143; SAS No. 145.

Effective for audits of financial statements for periods ending on or after December 15, 2021.

Note

In June 2022, the ASB issued SAS No. 146, *Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, which contains amendments to this section.

The amendments are effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025, and can be viewed in the appendix of section 220 until the effective date, when they will be applied to this section.

In March 2023, the ASB issued SAS No. 149, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors and Audits of Referred-to Auditors)*, which contains amendments to this section.

The amendments are effective for audits of financial statements for periods ending on or after December 15, 2026, and can be viewed in appendix C of section 600 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility to communicate key audit matters in the auditor's report when the auditor is engaged to do so. It is intended to address both the auditor's judgment about what to communicate in the auditor's report and the form and content of such communication. This section does not require the communication of key audit matters. (Ref: par. .A1)

.02 The purpose of communicating key audit matters is to provide greater transparency about the audit that was performed. The communication of key audit matters in the auditor's report may also provide intended users of the financial statements (intended users) with a basis to further engage with management and those charged with governance about certain matters relating to the entity, the audited financial statements, or the audit that was performed. (Ref: par. .A2–.A3)

.03 Communicating key audit matters in the auditor's report is done in the context of the auditor having formed an opinion on the financial statements as a whole. Communicating key audit matters in the auditor's report does *not* constitute the following:

a. A substitute for disclosures in the financial statements that the applicable financial reporting framework requires management to make or that are otherwise necessary to achieve fair presentation

b. A substitute for the auditor expressing a modified opinion when required to do so by the circumstances of a specific audit engagement in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*

c. A substitute for reporting in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, if, after considering identified conditions or events and management's plans, the auditor concludes that substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains

d. A separate opinion on individual matters (Ref: par. .A4–.A6)

.04 This section applies to an audit of a complete set of general purpose financial statements when the auditor is engaged to communicate key audit matters. Section 705 prohibits the auditor from communicating key audit matters when the auditor expresses an adverse opinion or disclaims an opinion on the financial statements, unless such reporting is required by law or regulation.[1]

Effective Date

.05 This section is effective for audits of financial statements for periods ending on or after December 15, 2021. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 141.]

Objectives

.06 The objectives of the auditor are to determine key audit matters and communicate those matters by describing them in the auditor's report.

Definition

.07 For purposes of generally accepted auditing standards (GAAS), the following term has the meaning attributed as follows:

[1]Paragraph .30 of section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

Key audit matters. Those matters that, in the auditor's professional judgment, were of most significance in the audit of the financial statements of the current period. Key audit matters are selected from matters communicated with those charged with governance.

Requirements

Determining Key Audit Matters

.08 The auditor should determine, from the matters communicated with those charged with governance, those matters that required significant auditor attention in performing the audit. In making this determination, the auditor should take into account the following: (Ref: par. .A7–.A16)

a. Areas of higher assessed risk of material misstatement, or significant risks identified in accordance with section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (Ref: par. .A17–.A20)

b. Significant auditor judgments relating to areas in the financial statements that involved significant management judgment, including accounting estimates that are subject to a high degree of uncertainty (Ref: par. .A21–.A22)

c. The effect on the audit of significant events or transactions that occurred during the period (Ref: par. .A23–.A24)

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 143.]

.09 The auditor should determine which of the matters determined in accordance with paragraph .08 were of most significance in the audit of the financial statements of the current period and therefore are the key audit matters. (Ref: par. .A7–.A9, .A25–.A30)

Communicating Key Audit Matters

.10 The auditor should describe each key audit matter, using an appropriate subheading, in a separate section of the auditor's report under the heading "Key Audit Matters," unless the circumstances in paragraphs .13–.14 apply. The introductory language in this section of the auditor's report should state the following:

a. Key audit matters are those matters that were communicated with those charged with governance and, in the auditor's professional judgment, were of most significance in the audit of the financial statements of the current period.

b. These matters were addressed in the context of the audit of the financial statements as a whole, and in forming the auditor's opinion thereon, and the auditor does not provide a separate opinion on these matters. (Ref: par. .A31–.A33)

Key Audit Matters Not a Substitute for Expressing a Modified Opinion

.11 The auditor should not communicate a matter in the "Key Audit Matters" section of the auditor's report when the auditor would be required to modify the opinion in accordance with section 705 as a result of the matter. (Ref: par. .A4)

Descriptions of Individual Key Audit Matters

.12 The description of each key audit matter in the "Key Audit Matters" section of the auditor's report should include a reference to the related disclosures, if any, in the financial statements and should address the following: (Ref: par. .A34–.A41)

a. Why the matter was considered to be one of most significance in the audit and therefore determined to be a key audit matter (Ref: par. .A42–.A44)

b. How the matter was addressed in the audit (Ref: par. .A45–.A50)

Circumstances in Which a Matter Determined to Be a Key Audit Matter Is Not Communicated in the Auditor's Report

.13 The auditor should describe each key audit matter in the auditor's report unless either of the following applies:

a. Law or regulation precludes disclosure about the matter. (Ref: par. .A51)

b. In extremely rare circumstances, the auditor determines that the matter should not be communicated in the auditor's report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication. This does not apply if information about the matter is available outside the entity. (Ref: par. .A52–.A55)

Interaction Between Descriptions of Key Audit Matters and Other Elements Required to Be Included in the Auditor's Report

.14 Matters giving rise to a qualified opinion in accordance with section 705, or when substantial doubt exists about an entity's ability to continue as a going concern for a reasonable period of time in accordance with section 570, are by their nature key audit matters. However, these matters should not be described in the "Key Audit Matters" section of the auditor's report, and the requirements in paragraphs .12–.13 do not apply. Rather, the auditor should do the following:

a. Report on these matters in accordance with the applicable AU-C sections.

b. Include a reference to the "Basis for Qualified Opinion" or "Going Concern" section in the "Key Audit Matters" section. (Ref: par. .A5)

Form and Content of the "Key Audit Matters" Section in Other Circumstances

.15 If the auditor determines, depending on the facts and circumstances of the entity and the audit, that there are no key audit matters to communicate or that the only key audit matters communicated are those matters addressed by paragraph .14, the auditor should include a statement to this effect in a separate section of the auditor's report under the heading "Key Audit Matters." (Ref: par. .A56–.A57)

Communication With Those Charged With Governance

.16 The auditor should communicate the following with those charged with governance:

a. Those matters the auditor has determined to be the key audit matters, or

b. If applicable, depending on the facts and circumstances of the entity and the audit, the auditor's determination that there are no key audit matters to communicate in the auditor's report (Ref: par. .A58–.A61)

Documentation

.17 The auditor should include the following in the audit documentation:[2] (Ref: par. .A62)

a. The matters that required significant auditor attention as determined in accordance with paragraph .08, and the rationale for the auditor's determination about whether or not each of the matters is a key audit matter in accordance with paragraph .09

b. When applicable, the rationale for the auditor's determination that there are no key audit matters to communicate in the auditor's report or that the only key audit matters to communicate are those matters addressed by paragraph .14

c. When applicable, the rationale for the auditor's determination not to communicate in the auditor's report a matter determined to be a key audit matter

Application and Other Explanatory Material

Scope of This Section (Ref: par. .01–.02)

.A1 Paragraph .45 and related application material in section 700, *Forming an Opinion and Reporting on Financial Statements*, address reporting on audits conducted in accordance with the standards of the PCAOB and GAAS when the audit is not within the jurisdiction of the PCAOB.

.A2 Communicating key audit matters provides additional information to intended users to assist them in understanding those matters that, in the auditor's professional judgment, were of most significance in the audit of the financial statements of the current period. Communicating key audit matters may also assist intended users in understanding the entity and areas of significant management judgment in the audited financial statements.

.A3 Section 320, *Materiality in Planning and Performing an Audit*, explains that the auditor may assume the following regarding reasonable users of the financial statements:[3]

[2]Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*.

a. Users have a reasonable knowledge of business and economic activities and accounting and a willingness to study the information in the financial statements with reasonable diligence.

b. Users understand that the financial statements are prepared, presented, and audited to levels of materiality.

c. Users recognize the uncertainties inherent in the measurement of amounts based on the use of estimates, judgment, and the consideration of future events.

d. Users make reasonable judgments based on the information in the financial statements.

Because the auditor's report accompanies the audited financial statements, the users of the auditor's report are considered to be the same as the intended users of the financial statements.

[Revised, April 2021, to reflect conforming changes necessary due to the issuance of SAS No. 138.]

Relationship Between Key Audit Matters, the Auditor's Opinion, and Other Elements of the Auditor's Report (Ref: par. .03, .11, .14)

.A4 Sections 700 and 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, establish requirements and provide guidance on forming an opinion on the financial statements.[4] Communicating key audit matters is not a substitute for disclosures in the financial statements that the applicable financial reporting framework requires management to make or that are otherwise necessary to achieve fair presentation. Section 705 addresses circumstances in which the auditor concludes that there is a material misstatement relating to the appropriateness or adequacy of disclosures in the financial statements.[5]

.A5 When the auditor expresses a qualified opinion in accordance with section 705, communicating key audit matters would still be relevant to enhancing intended users' understanding of the audit. In these circumstances, presenting the description of the matter giving rise to a qualified opinion in the "Basis for Qualified Opinion" section gives the matter the appropriate prominence in the auditor's report (see paragraph .14) and separates the communication of this matter from any other key audit matters described in the "Key Audit Matters" section. The exhibit in section 705 includes illustrative examples of how the introductory language in the "Key Audit Matters" section is affected when the auditor expresses a qualified opinion and other key audit matters are communicated in the auditor's report. Paragraph .A57 of this section illustrates how the "Key Audit Matters" section is presented when the auditor has determined that there are no other key audit matters to be

[5]Paragraph .A7 of section 705.

communicated in the auditor's report beyond matters addressed in the "Basis for Qualified Opinion" or "Going Concern" sections of the auditor's report.

.A6 Section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report*, establishes mechanisms for auditors of financial statements of all entities to include additional communication in the auditor's report through the use of emphasis-of-matter paragraphs and other-matter paragraphs when the auditor considers it necessary to do so. However, when this section applies, the use of an emphasis-of-matter or other-matter paragraph is not a substitute for including a matter in the "Key Audit Matters" section of the auditor's report if the matter meets the definition of a key audit matter. Section 706 provides further guidance on the relationship between key audit matters and emphasis-of-matter and other-matter paragraphs.[6]

Determining Key Audit Matters (Ref: par. .08–.09)

.A7 The auditor's decision-making process in determining key audit matters begins with selecting, from among the matters communicated with those charged with governance, those matters that required significant auditor attention in performing the audit of the financial statements of the current period.

.A8 From the matters that required significant auditor attention, the auditor then determines those matters that, in the auditor's judgment, were of most significance in the audit of the financial statements of the current period and that, therefore, are the key audit matters. The auditor's determination of key audit matters is limited to those matters of most significance in the audit of the financial statements of the current period, even when comparative financial statements are presented (that is, even when the auditor's opinion refers to each period for which financial statements are presented).

.A9 This section does not require the auditor to update key audit matters included in the prior period's auditor's report. However, it may nevertheless be useful for the auditor to consider whether a matter that was a key audit matter in the audit of the financial statements of the prior period continues to be a key audit matter in the audit of the financial statements of the current period.

Matters That Required Significant Auditor Attention (Ref: par. .08)

.A10 The concept of significant auditor attention recognizes that an audit is risk based and focuses on identifying and assessing the risks of material misstatement of the financial statements, designing and performing audit procedures responsive to those risks, and obtaining audit evidence that is sufficient and appropriate to provide a basis for the auditor's opinion. For a particular account balance, class of transactions or disclosure, the higher an assessed risk of material misstatement at the assertion level, the more judgment is often involved in planning and performing the audit procedures and evaluating the results thereof.

[6]Paragraphs .A1–.A2 of section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report*.

.A11 Accordingly, matters that pose challenges to the auditor in obtaining sufficient appropriate audit evidence or pose challenges to the auditor in forming an opinion on the financial statements may be particularly relevant in the auditor's determination of key audit matters.

.A12 Areas of significant auditor attention often relate to areas of complexity and significant management judgment in the financial statements and therefore often involve difficult or complex auditor judgments. In turn, this often affects the auditor's overall audit strategy, the allocation of resources, and the extent of audit effort in relation to such matters. These effects may include, for example, the extent of involvement of senior personnel on the audit engagement or the involvement of an auditor's expert or individuals with expertise in a specialized area of accounting or auditing, whether engaged or employed by the firm to address these areas.

.A13 Certain AU-C sections, such as the following, require specific communications with those charged with governance and others that may relate to areas of significant auditor attention:

a. Section 260, *The Auditor's Communication With Those Charged With Governance*, requires the auditor to communicate significant difficulties, if any, encountered during the audit with those charged with governance.[7] For example, there may be potential difficulties relating to the following:

   i. *Related party transactions.* In particular, there may be limitations on the auditor's ability to obtain audit evidence that all other aspects of a related party transaction (other than price) are equivalent to those of a similar arm's-length transaction.[8]

   ii. *Limitations on the group audit.* For example, the group engagement team's access to information may be restricted.[9]

b. Section 220A, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, establishes requirements for the engagement partner in relation to undertaking appropriate consultation on difficult or contentious matters.[10] For example, the auditor may have consulted with others within the firm or outside the firm on a significant technical matter, which may be an indicator that it is a key audit matter. The engagement partner is also required to discuss, among other things, significant matters arising during the audit engagement with the engagement quality control reviewer.

---

[7]Paragraphs .12*b* and .A26 of section 260, *The Auditor's Communication With Those Charged With Governance*.

[8]Paragraph .A46 of section 550, *Related Parties*.

[9]Paragraph .49*d* of section 600A, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors)*.

[10]Paragraph .20 of section 220A, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*.

Considerations in Determining Those Matters That Required Significant Auditor Attention (Ref: par. .08)

.A14 The auditor may develop a preliminary view at the planning stage about matters that are likely to be areas of significant auditor attention in the audit and therefore may be key audit matters. The auditor may communicate this with those charged with governance when discussing the planned scope and timing of the audit in accordance with section 260. However, the auditor's determination of key audit matters is based on the results of the audit or evidence obtained throughout the audit.

.A15 Paragraph .08 includes specific required considerations in the auditor's determination of those matters that required significant auditor attention. These considerations focus on the nature of matters communicated with those charged with governance that are often linked to matters disclosed in the financial statements and are intended to reflect areas of the audit of the financial statements that may be of particular interest to intended users. The fact that these considerations are required is not intended to imply that matters related to them are always key audit matters; rather, matters related to such specific considerations are key audit matters only if they are determined to be of most significance in the audit in accordance with paragraph .09. Because the considerations may be interrelated (for example, matters relating to the circumstances described in paragraphs .08*b–c* may also be identified as significant risks), the applicability of more than one of the considerations to a particular matter communicated with those charged with governance may increase the likelihood of the auditor identifying that matter as a key audit matter.

.A16 In addition to matters that relate to the specific required considerations in paragraph .08, there may be other matters communicated with those charged with governance that required significant auditor attention and that therefore may be determined to be key audit matters in accordance with paragraph .09. Such matters may include, for example, matters that are relevant to the audit that was performed but that may not be required to be disclosed in the financial statements. For example, the implementation of a new IT system (or significant changes to an existing IT system) during the period may be an area of significant auditor attention, particularly if such a change had a significant effect on the auditor's overall audit strategy or related to a significant risk (for example, changes to a system affecting revenue recognition).

Areas of Higher Assessed Risk of Material Misstatement, or Significant Risks Identified in Accordance With Section 315 (Ref: par. .08a)

.A17 Section 260 requires the auditor to communicate with those charged with governance about the significant risks identified by the auditor.[11] Section 260 explains that the auditor may also communicate with those charged with governance about areas of higher assessed risks of material misstatement.[12]

.A18 SAS No. 145 defines a *significant risk* as an identified risk of material misstatement for which the assessment of inherent risk is close to the upper end of the spectrum of

[11] Paragraph .11 of section 260.

[12] Paragraph .A20 of section 260.

inherent risk due to the degree to which the inherent risk factors affect the combination of the likelihood of a misstatement occurring and the magnitude of the potential misstatement should that misstatement occur.[13] Areas of significant management judgment and significant unusual transactions may often be identified as significant risks. Significant risks are therefore often areas that require significant auditor attention. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A19 However, this may not be the case for all significant risks. For example, section 240, *Consideration of Fraud in a Financial Statement Audit*, presumes that there are risks of fraud in revenue recognition and requires the auditor to treat those assessed risks of material misstatement due to fraud as significant risks.[14] In addition, section 240 indicates that, due to the unpredictable way in which management override of controls could occur, it is a risk of material misstatement due to fraud and thus a significant risk.[15] Depending on their nature, these risks may not require significant auditor attention and therefore would not be considered in the auditor's determination of key audit matters in accordance with paragraph .09.

.A20 Section 315 explains that the auditor's assessment of the risks of material misstatement at the assertion level may change during the course of the audit as additional audit evidence is obtained.[16] Revision to the auditor's risk assessment and reevaluation of the planned audit procedures with respect to a particular area of the financial statements may result in an area being determined to be one requiring significant auditor attention, particularly when the revision results in a higher assessed risk of material misstatement. For example, the auditor's risk assessment may have been based on an expectation that certain controls were operating effectively, but the audit evidence obtained may indicate that such controls were not operating effectively throughout the audit period, leading to a change in audit strategy and additional audit effort.

Significant Auditor Judgments Relating to Areas in the Financial Statements That Involved Significant Management Judgment, Including Accounting Estimates That Are Subject to a High Degree of Estimation Uncertainty (Ref: par. .08b)

.A21 Section 260 requires the auditor to communicate with those charged with governance the auditor's views about significant qualitative aspects of the entity's accounting practices, including accounting policies, accounting estimates, and financial statement disclosures.[17] In particular, this may include accounting policies that have a significant effect on the

---

[17]Paragraph .12*a* of section 260. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

financial statements (and significant changes to those policies), especially in circumstances in which an entity's accounting policies are not consistent with others in its industry.

.A22 In many cases, the auditor's communication with those charged with governance relates to accounting estimates and related disclosures. Among other things, estimates may be highly dependent on management judgment and are often the most complex areas of the financial statements, and the estimates may require the involvement of both a management's expert and an auditor's expert. Such estimates are often areas of significant auditor attention, and they may be identified as significant risks.

The Effect on the Audit of Significant Events or Transactions That Occurred During the Period (Ref: par. .08c)

.A23 Events or transactions that had a significant effect on the financial statements or the audit may be areas of significant auditor attention and may be identified as significant risks. For example, the auditor may have had extensive discussions with management and those charged with governance at various stages throughout the audit about the effect on the financial statements of significant transactions with related parties or significant transactions that are outside the normal course of business for the entity or that otherwise appear to be unusual.[18] Management may have made difficult or complex judgments in relation to recognition, measurement, presentation, or disclosure of such transactions, which may have had a significant effect on the auditor's overall strategy.

.A24 Significant economic, accounting, regulatory, industry, or other developments that affected management's assumptions or judgments may also affect the auditor's overall approach to the audit and result in a matter requiring significant auditor attention.

Matters of Most Significance (Ref: par. .09)

.A25 The concept of matters of most significance is applicable in the context of the entity and the audit that was performed. As such, the intent is for the auditor to identify matters specific to the audit and to make a judgment about their relative importance.

.A26 Matters that required significant auditor attention also may have resulted in significant interaction with those charged with governance. The nature and extent of communication about such matters with those charged with governance often provides an indication of which matters are of most significance in the audit. For example, the auditor may have had more in-depth, frequent, or robust interactions with those charged with governance on more difficult and complex matters, such as the application of significant accounting policies that were the subject of significant auditor or management judgment.

.A27 The importance of a matter to intended users' understanding of the financial statements as a whole and, in particular, the matter's materiality to the financial statements is relevant to determining whether the matter is a key audit matter.

[18]Paragraphs .12*a*, .14, and .A32 of section 260, and the appendix, "Qualitative Aspects of Accounting Practices," of section 260. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

.A28 Other considerations that may be relevant to determining the relative significance of a matter and whether such a matter is a key audit matter include the following:

- The nature of the underlying accounting policy relating to the matter or the complexity or subjectivity involved in management's selection of an appropriate policy compared to other entities within its industry
- The nature and materiality, quantitative or qualitative, of corrected and accumulated uncorrected misstatements due to fraud or error related to the matter, if any
- The nature and extent of audit effort needed to address the matter, including the following:
  - — The extent of specialized skill or knowledge needed to apply audit procedures to address the matter or evaluate the results of those procedures, if any
  - — The nature of consultations outside the engagement team regarding the matter
- The nature and severity of difficulties in applying audit procedures, evaluating the results of those procedures, and obtaining relevant and reliable evidence on which to base the auditor's opinion, particularly as the auditor's judgments become more subjective
- The severity of any control deficiencies identified that are relevant to the matter
- Whether the matter involved a number of separate, but related, auditing considerations (For example, long-term contracts may involve significant auditor attention with respect to revenue recognition, litigation, or other contingencies and may have an effect on other accounting estimates.)

.A29 Determining which, and how many, of those matters that required significant auditor attention were of most significance in the audit of the financial statements of the current period is a matter of professional judgment. The number of key audit matters to be included in the auditor's report may be affected by the size and complexity of the entity, the nature of its business and environment, and the facts and circumstances of the audit engagement. In general, the greater the number of matters initially determined to be key audit matters, the more the auditor may need to reconsider whether each of these matters meets the definition of a key audit matter. Lengthy lists of key audit matters may be contrary to the notion of such matters being those of most significance in the audit.

.A30 Paragraph .15 addresses the form and content of the "Key Audit Matters" section of the auditor's report when the auditor determines that there are no key audit matters to be communicated.

Communicating Key Audit Matters

Separate "Key Audit Matters" Section in the Auditor's Report (Ref: par. .10)

.A31 Placing the separate "Key Audit Matters" section in close proximity to the "Opinion" and "Basis for Opinion" sections may give prominence to such information.

.A32 The order of presentation of individual matters within the "Key Audit Matters" section is a matter of professional judgment. For example, such information may be organized in order of relative importance, may be based on the auditor's judgment, or may correspond to the manner in which matters are disclosed in the financial statements. The requirement in paragraph .10 to include subheadings is intended to further differentiate the matters.

.A33 When comparative financial information is presented, the introductory language of the "Key Audit Matters" section is tailored to draw attention to the fact that the key audit matters described relate to only the audit of the financial statements of the current period and may include reference to the specific period covered by those financial statements (for example, "for the year ended December 31, 20X1").

Descriptions of Individual Key Audit Matters (Ref: par. .12)

.A34 The adequacy of the description of a key audit matter is a matter of professional judgment. The description of a key audit matter is meant to provide a succinct and balanced explanation to enable intended users to understand why the matter was one of most significance in the audit and how the matter was addressed in the audit. Limiting the use of highly technical auditing terms also helps enable intended users, who may not have a reasonable knowledge of auditing, to understand the basis for the auditor's focus on particular matters during the audit. The nature and extent of information provided by the auditor is intended to be balanced in the context of the responsibilities of the respective parties (that is, for the auditor to provide useful information in a concise and understandable form while not inappropriately being the provider of original information about the entity).

.A35 Original information is any information about the entity that has not otherwise been made publicly available by the entity (for example, the information has not been included in the financial statements or other information available at the date of the auditor's report and has not been addressed in other oral or written communications by management or those charged with governance). Such information is the responsibility of the entity's management and those charged with governance.

.A36 Although the auditor seeks to avoid providing original information about the entity, it may be necessary for the auditor to do so in the description of a key audit matter. Such information may be necessary to appropriately explain why the matter was considered to be one of most significance in the audit, and therefore determined to be a key audit matter, and how the matter was addressed in the audit, provided that disclosure of such information is not precluded by law or regulation. When the auditor determines that it is necessary to include such information in the description of a key audit matter, management may elect to expand or supplement the entity's disclosures, rather than having the auditor provide original information in the auditor's report.

.A37 Management or those charged with governance may decide to include new or enhanced disclosures in the financial statements or elsewhere in the annual report relating to a key audit matter in light of the fact that the matter will be communicated in the auditor's report. Such new or enhanced disclosures, for example, may be included to provide more robust information about the sensitivity of key assumptions used in accounting estimates or the entity's rationale for a particular accounting practice or policy when acceptable alternatives exist under the applicable financial reporting framework. Additional disclosures by management may also be helpful when the auditor considers it necessary to include additional information to explain why a matter was determined to be a key audit matter and how the matter was addressed in the audit.

.A38 Although the auditor's opinion on the financial statements does not extend to the other information addressed by section 720, *The Auditor's Responsibilities Relating to Other Information Included in Annual Reports*, the auditor may consider this information, as well as other publicly available communications by the entity or other credible sources, in formulating the description of a key audit matter. [Revised, December 2021, to reflect conforming changes necessary due to the issuance of SAS No. 137.]

.A39 Audit documentation prepared during the audit can also be useful to the auditor in formulating the description of a key audit matter. For example, written communications, or the auditor's documentation of oral communications, with those charged with governance and other audit documentation provide a useful basis for the auditor's communication in the auditor's report. This is because audit documentation in accordance with section 230, *Audit Documentation*, is intended to address the significant matters arising during the audit, the conclusions reached thereon, and significant professional judgments made in reaching those conclusions, and serves as a record of the nature, timing, and extent of the audit procedures performed, the results of those procedures, and the audit evidence obtained. Such documentation may assist the auditor in developing a description of key audit matters that explains the significance of the matters and may also assist in applying the requirement in paragraph .17.

Reference to Where the Matter Is Disclosed in the Financial Statements (Ref: par. .12)

.A40 Paragraph .12 requires the description of each key audit matter to address why the auditor considered the matter to be one of most significance in the audit and how the matter was addressed in the audit. Accordingly, the description of key audit matters is not a mere reiteration of what is disclosed in the financial statements. However, a reference to any related disclosures enables intended users to further understand how management has addressed the matter in preparing the financial statements.

.A41 In addition to referring to related disclosures, the auditor may draw attention to key aspects of them. The extent of disclosure by management about specific aspects or factors in relation to how a particular matter is affecting the financial statements of the current period may help the auditor pinpoint particular aspects of how the matter was addressed in the audit such that intended users can understand why the matter is a key audit matter, such as in the following examples:

- When an entity includes robust disclosure about accounting estimates, the auditor may draw attention to the disclosure of key assumptions, the disclosure of the range of possible outcomes, and other qualitative and quantitative disclosures relating to key sources of estimation uncertainty or critical accounting estimates as part of addressing why the matter was one of most significance in the audit and how the matter was addressed in the audit.

- When the auditor concludes, in accordance with section 570, that substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time has been alleviated by management's plans, the auditor may nevertheless determine that one or more matters relating to this conclusion arising from the auditor's work effort under section 570 are key audit matters. In such circumstances, the auditor's description of such key audit matters in the auditor's report could include aspects of the identified events or conditions disclosed in the financial statements, such as substantial operating losses, available borrowing facilities and possible debt refinancing, or noncompliance with loan agreements, and related mitigating factors.[19]

Why the Auditor Considered the Matter to Be One of Most Significance in the Audit (Ref: par. .12a)

.A42 The description of a key audit matter in the auditor's report is intended to provide insight regarding why the matter was determined to be a key audit matter. Accordingly, the requirements in paragraphs .08–.09 and the application material in paragraphs .A10–.A28 related to determining key audit matters may also be helpful for the auditor in considering how such matters are to be communicated in the auditor's report. For example, explaining the factors that led the auditor to conclude that a particular matter required significant auditor attention and was of most significance in the audit is likely to be of interest to intended users.

.A43 Relating a matter directly to the specific circumstances of the entity may also help minimize the potential that such descriptions become overly standardized and less useful over time. For example, certain matters may be determined to be key audit matters in a particular industry across a number of entities due to the circumstances of the industry or the underlying complexity in financial reporting. In describing why the auditor considered a matter to be one of most significance, it may be useful for the auditor to highlight aspects of the matter that are specific to the entity (for example, circumstances that affected the underlying judgments made in the financial statements of the current period) in order to make the description more relevant for intended users. This may also be important in describing a key audit matter that recurs over periods.

.A44 The description may also make reference to the principal considerations that led the auditor, in the circumstances of the audit, to determine the matter to be one of most significance. The following are examples of such considerations:

- Economic conditions that affected the auditor's ability to obtain audit evidence, for example, illiquid markets for certain financial instruments
- New or emerging accounting policies, for example, entity-specific or industry-specific matters on which the engagement team consulted
- Changes in the entity's strategy or business model that had a material effect on the financial statements

---

[19]Section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

How the Matter Was Addressed in the Audit (Ref: par. .12b)

.A45 The amount of detail to be provided in the auditor's report to describe how a key audit matter was addressed in the audit is a matter of professional judgment. In accordance with paragraph .12*b*, the auditor may describe the following elements, or some combination thereof:

- Aspects of the auditor's response or approach that were most relevant to the matter or specific to the assessed risk of material misstatement
- A brief overview of procedures performed
- An indication of the outcome of the auditor's procedures
- Key observations with respect to the matter

Law or regulation may prescribe a specific form or content for the description of a key audit matter or may specify the inclusion of one or more of these elements.

.A46 In order for intended users to understand the significance of a key audit matter in the context of the audit of the financial statements as a whole, as well as the relationship between key audit matters and other elements of the auditor's report, including the auditor's opinion, care may be necessary so that language used in the description of a key audit matter does the following:

- Does not imply that the matter has not been appropriately resolved by the auditor in forming the opinion on the financial statements
- Relates the matter directly to the specific circumstances of the entity, while avoiding generic or standardized language
- Takes into account how the matter is addressed in the related disclosures in the financial statements, if any
- Does not contain or imply discrete opinions on separate elements of the financial statements

.A47 Describing aspects of the auditor's response or approach to a matter, particularly when the audit approach required significant tailoring to the facts and circumstances of the entity, may assist intended users in understanding unusual circumstances and significant auditor judgments required to address the risk of material misstatement. In addition, the audit approach in a particular period may have been influenced by entity-specific circumstances, economic conditions, or industry developments. It may also be useful for the auditor to make reference to the nature and extent of communications with those charged with governance about the matter.

.A48 For example, in describing the auditor's approach to an accounting estimate that has been identified as having high estimation uncertainty, such as the valuation of complex financial instruments, the auditor may wish to highlight that the auditor employed or engaged an auditor's expert. Such a reference to the use of an auditor's expert does not reduce the auditor's responsibility for the opinion on the financial statements and is therefore not inconsistent with paragraphs .14–.15 of section 620, *Using the Work of an Auditor's Specialist*.

.A49 There may be challenges in describing the auditor's procedures, particularly in complex, judgmental areas of the audit. In particular, it may be difficult to summarize the procedures performed in a succinct way that adequately communicates the nature and extent of the auditor's response to the assessed risk of material misstatement and the significant auditor judgments involved. Nonetheless, the auditor may consider it necessary to describe certain procedures that were performed to explain how a matter was addressed in the audit. Such description may typically be at a high level, rather than a detailed description of all procedures performed regarding the matter; that is, the auditor may describe just those procedures that are most relevant to the unique facts and circumstances of the entity and the current period audit.

.A50 As noted in paragraph .A45, the auditor may also provide an indication of the outcome of the auditor's response in the description of the key audit matter in the auditor's report. However, if this is done, care is needed to avoid the auditor giving the impression that the description is conveying a separate opinion on an individual key audit matter or that the description in any way may call into question the auditor's opinion on the financial statements as a whole.

Circumstances in Which a Matter Determined to Be a Key Audit Matter Is Not Communicated in the Auditor's Report (Ref: par. .13)

.A51 Law or regulation may preclude disclosure by either management or the auditor about a specific matter determined to be a key audit matter. For example, disclosure about a matter related to a government contractor may be precluded due to the nature of the matter and security clearance provisions that may apply to the auditor.

.A52 As indicated by paragraph .13*b*, it will be extremely rare for a matter determined to be a key audit matter not to be communicated in the auditor's report. This is because there is presumed to be a public interest benefit in providing greater transparency about the audit for intended users. Accordingly, the judgment not to communicate a key audit matter is appropriate only in cases in which the adverse consequences to the entity or the public as a result of such communication are viewed as so significant that they would reasonably be expected to outweigh the public interest benefits of communicating the matter.

.A53 The determination not to communicate a key audit matter takes into account the facts and circumstances related to the matter. Communication with management and those charged with governance helps the auditor understand management's views about the significance of the adverse consequences that may arise as a result of communicating a matter. In particular, communication with management and those charged with governance helps inform the auditor's judgment in determining whether to communicate the matter in the following ways:

- Assisting the auditor in understanding why the matter has not been disclosed by the entity (for example, if law, regulation, or certain financial reporting frameworks permit delayed disclosure or nondisclosure of the matter) and understanding management's views regarding the adverse consequences, if any, of disclosure. Management may draw attention to certain aspects in law or regulation or other authoritative sources that may be relevant to the consideration of adverse consequences (for example, such consequences may include harm to the entity's commercial negotiations or competitive position). However, management's views about the adverse consequences alone do not alleviate the need for the auditor to determine whether the adverse consequences would reasonably be expected to outweigh the public interest benefits of communication in accordance with paragraph .13*b*.

- Highlighting whether there have been any communications with applicable regulatory, enforcement, or supervisory authorities in relation to the matter and, in particular, whether such discussions would appear to support management's assertion about why public disclosure about the matter is not appropriate.
- Enabling the auditor, when appropriate, to encourage management and those charged with governance to disclose relevant information about the matter. In particular, this may be possible if the concerns of management and those charged with governance about communicating the matter are limited to specific aspects of the matter, such that certain information about the matter may be less sensitive and could be communicated.

The auditor also may consider it necessary to obtain a written representation from management explaining why disclosure of the matter is not appropriate, including management's view about the significance of the adverse consequences that may arise as a result of such communication.

.A54 It may also be necessary for the auditor to consider the implications of communicating about a matter determined to be a key audit matter in light of relevant ethical requirements. In addition, the auditor may be required by law or regulation to communicate with applicable regulatory, enforcement, or supervisory authorities in relation to the matter, regardless of whether the matter is communicated in the auditor's report. Such communication may also help inform the auditor's consideration of the adverse consequences that may arise from communicating about the matter.

.A55 The issues considered by the auditor regarding a decision to not communicate a matter are complex and involve significant auditor judgment. Accordingly, the auditor may consider it appropriate to obtain legal advice.

*Form and Content of the "Key Audit Matters" Section in Other Circumstances (Ref: **par. .15**)*

.A56 The requirement in paragraph .15 applies in three circumstances:

- In the rare circumstance that the auditor determines, in accordance with paragraph .09, that there are no key audit matters. This may be the case because there were no matters that required significant auditor attention.

- The auditor determines, in accordance with paragraph .13, that a key audit matter will not be communicated in the auditor's report and no other matters have been determined to be key audit matters.
- The only matters determined to be key audit matters are those communicated in accordance with paragraph .14.

.A57 The following illustrates the presentation in the auditor's report if the auditor has determined there are no key audit matters to communicate:

Key Audit Matters

[*Except for the matter described in the Basis for Qualified Opinion section or Going Concern section*,] We have determined that there are no [*other*] key audit matters to communicate in our report.

Communication With Those Charged With Governance (Ref: par. .16)

.A58 Section 260 requires the auditor to communicate with those charged with governance on a timely basis. The appropriate timing for communications with those charged with governance about key audit matters will vary with the circumstances of the engagement. However, the auditor may communicate preliminary views about key audit matters when discussing the planned scope and timing of the audit and may further discuss such matters when communicating about audit findings. Doing so may help to alleviate the practical challenges of attempting to have a robust two-way dialogue about key audit matters at the time the financial statements are being finalized for issuance.

.A59 Communication with those charged with governance enables them to be made aware of the key audit matters that the auditor intends to communicate in the auditor's report and provides them with an opportunity to obtain further clarification when necessary. The auditor may consider it useful to provide those charged with governance with a draft of the auditor's report to facilitate this discussion. Communication with those charged with governance recognizes their important role in overseeing the financial reporting process and provides them the opportunity to understand the basis for the auditor's decisions in relation to key audit matters and how these matters will be described in the auditor's report. It also enables those charged with governance to consider whether new or enhanced disclosures may be useful in light of the fact that these matters will be communicated in the auditor's report.

.A60 The communication with those charged with governance required by paragraph .16*a* also addresses the extremely rare circumstances in which a matter determined to be a key audit matter is not communicated in the auditor's report (see paragraphs .13 and .A53).

.A61 The requirement in paragraph .16*b* to communicate with those charged with governance when the auditor has determined that there are no key audit matters to communicate in the auditor's report may provide an opportunity for the auditor to have further discussion with others who are familiar with the audit and the significant matters that may have arisen (including the engagement quality control reviewer, when one has been appointed). These discussions may cause the auditor to reevaluate the auditor's determination that there are no key audit matters.

Documentation (Ref: par. .17)

.A62 Paragraph .08 of section 230 requires the auditor to prepare audit documentation that is sufficient to enable an experienced auditor, having no previous connection with the audit, to understand, among other things, significant professional judgments. In the context of key audit matters, these professional judgments include the determination, from the matters communicated with those charged with governance, of the matters that required significant auditor attention and whether or not each of those matters is a key audit matter. The auditor's judgments in this regard are likely to be supported by the documentation of the auditor's communications with those charged with governance and the audit documentation relating to each individual matter (see paragraph .A39), as well as by certain other audit documentation of the significant matters arising during the audit (for example, a completion memorandum). However, this section does not require the auditor to document why other matters communicated with those charged with governance were not matters that required significant auditor attention.

AU-C Section 703

Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA

Source: SAS No. 136; SAS No. 138; SAS No. 140; SAS No. 141; SAS No. 143; SAS No. 145.

Effective for audits of ERISA plan financial statements for periods ending on or after December 15, 2021. Exhibit B provides transitional implementation reporting guidance upon initial implementation by the auditor of this section.

Note

In June 2022, the ASB issued SAS No. 146, *Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, which contains amendments to this section.

The amendments are effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025, and can be viewed in the appendix of section 220 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility to form an opinion on the financial statements of employee benefit plans (EBPs) subject to the Employee Retirement Income Security Act of 1974 (ERISA), hereinafter referred to as ERISA plans. It also addresses the form and content of the auditor's report issued as a result of an audit of ERISA plan financial statements. This section applies to audits of single employer, multiple employer, and multiemployer plans subject to ERISA. This section should not be adapted for plans that are not subject to ERISA. (Ref: par. .A1)

.02 This section applies to an audit of a complete set of general purpose financial statements of EBPs subject to ERISA and is written in that context.

.03 The Department of Labor (DOL), IRS, and the Pension Benefit Guaranty Corporation (PBGC) jointly developed the Form 5500 series so EBPs could use the Form 5500 series forms to satisfy annual reporting requirements under Title I and Title IV of ERISA and the IRC. The Form 5500 series is part of ERISA's overall reporting and disclosure framework, which is intended to assure that EBPs are operated and managed in accordance with certain prescribed standards and that participants and beneficiaries, as well as regulators, are provided or have access to sufficient information to protect the rights and benefits of participants and beneficiaries under EBPs. The Form 5500 series includes Form 5500, *Annual Return/Report for Employee Benefit Plan, and related schedules* (hereinafter referred to as *Form 5500*). (Ref: par. .A2–.A5)

.04 ERISA requires that certain supplemental schedules accompany the ERISA plan financial statements (hereinafter referred to as *ERISA-required supplemental schedules*), if applicable. Paragraphs .127–.135 address the auditor's responsibilities relating to reporting on the ERISA-required supplemental schedules, and paragraphs .22–.24 address the auditor's responsibilities relating to prohibited transactions.

.05 The requirements in this section are specific to ERISA plan audit engagements and are intended to be performed as part of the audit of ERISA plan financial statements in accordance with generally accepted auditing standards (GAAS); however, this section does not contain all the requirements necessary to form an opinion and report on ERISA plan financial statements.

.06 When performing an audit of ERISA plan financial statements, all AU-C sections apply, except for the following sections or portions thereof, which are not applicable to an audit of ERISA plan financial statements because those requirements and related application material are specifically covered in this section:

a. Section 700, *Forming an Opinion and Reporting on Financial Statements*

b. Paragraph .09 of section 725, *Supplementary Information in Relation to the Financial Statements as a Whole*

In addition, this section contains incremental requirements to section 210A, *Terms of Engagement*; section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*; section 260, *The Auditor's Communication With Those Charged With Governance*; and section 580, *Written Representations*.

.07 This section also addresses the auditor's responsibilities for forming an opinion on ERISA plan financial statements, including the form and content of the report when management elects to have an audit performed pursuant to ERISA Section 103(a)(3)(C) (hereinafter referred to as an *ERISA Section 103(a)(3)(C) audit)*.

.08 When management elects an ERISA Section 103(a)(3)(C) audit, as discussed in paragraph .07, the audit need not extend to any statements or information related to assets held for investment of the plan (hereinafter referred to as *investment information*) by a bank or similar institution or an insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with the Code of Federal Regulations (CFR), *Labor*, Title 29, Section 2520.103-5 of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA (hereinafter referred to as a *qualified institution*). Paragraphs .29–.35 contain required procedures when an ERISA Section 103(a)(3)(C) audit is performed. (Ref: par. .A6–.A10)

.09 Reference to *ERISA plan financial statements* in this section means a complete set of general purpose financial statements[1] for an EBP subject to ERISA. The requirements of the applicable financial reporting framework determine the presentation, structure, and content of the financial statements and what constitutes a complete set of financial statements. (Ref: par. .A11–.A12)

.10 Section 705, *Modifications to the Opinion in the Independent Auditor's Report*, and section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report*, address how the form and content of the auditor's report are affected when the auditor expresses a modified opinion (a qualified opinion, an adverse opinion, or a disclaimer of opinion) or includes an emphasis-of-matter paragraph or other-matter paragraph in the auditor's report. (Ref: par. .A13)

.11 This section does not require the communication of key audit matters. Section 701, *Communicating Key Audit Matters in the Independent Auditor's Report*, addresses the auditor's responsibility to communicate key audit matters when the auditor is engaged to do so.

.12 Section 800, *Special Considerations — Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks*, addresses special considerations when financial statements are prepared in accordance with a special purpose framework.[2]Section 805, *Special Considerations — Audits of Single Financial Statements and Specific Elements, Accounts, or Items of a Financial Statement*, addresses special considerations relevant to an audit of a single financial statement or of a specific element, account, or item of a financial statement. (Ref. par. .A14–.A15)

Effective Date

.13 This section is effective for audits of ERISA plan financial statements for periods ending on or after December 15, 2021. Exhibit B, "Implementation Guidance for ERISA Section 103(a)(3)(C) Audits," provides transitional implementation reporting guidance upon initial implementation by the auditor of this section. [As amended, effective for audits of ERISA plan financial statements for periods ending on or after December 15, 2021, by SAS No. 141.]

---

[1]See the AU-C Glossary for a definition of *general purpose financial statements*.

[2]See section 800, *Special Considerations — Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks*, for a definition of *special purpose framework*.

Objectives

.14 The objectives of the auditor are to do the following:

a. Accept an ERISA plan audit engagement when the basis upon which it is to be performed has been agreed upon through establishing whether the preconditions for the audit are present (Ref: par. .A5)

b. Appropriately plan and perform the audit of ERISA plan financial statements, including procedures required by this section on the certified investment information when management elects an ERISA Section 103(a)(3)(C) audit

c. Form an opinion on the ERISA plan financial statements based on an evaluation of the audit evidence obtained, including evidence obtained about comparative financial statements[3]

d. Express clearly the opinion on the ERISA plan financial statements through a written report

e. Perform procedures and report on the presentation of the supplementary information in accordance with this section

f. Appropriately communicate to management and those charged with governance reportable findings that the auditor has identified during the audit of the ERISA plan financial statements

Requirements

Engagement Acceptance

.15 In addition to the preconditions for an audit in section 210A, the auditor should obtain the agreement of management that it acknowledges and understands its responsibility for the following: (Ref: par. .A16)

a. Maintaining a current plan instrument, including all plan amendments (Ref: par. .A22)

b. Administering the plan and determining that the plan's transactions that are presented and disclosed in the ERISA plan financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants to determine the benefits due or which may become due to such participants (Ref: par. .A60)

c. When management elects to have an ERISA Section 103(a)(3)(C) audit, determining whether

    i. an ERISA Section 103(a)(3)(C) audit is permissible under the circumstances,

[3]See the AU-C Glossary for a definition of *comparative financial statements*.

ii. the investment information is prepared and certified by a qualified institution as described in 29 CFR 2520.103-8,

iii. the certification meets the requirements in 29 CFR 2520.103-5, and

iv. the certified investment information is appropriately measured, presented, and disclosed in accordance with the applicable financial reporting framework

.16 When management elects to have an ERISA Section 103(a)(3)(C) audit, the auditor should inquire of management about how management determined that the entity preparing and certifying the investment information is a qualified institution, as discussed in paragraphs .08 and .A6.

.17 The auditor should also obtain the agreement of management or those charged with governance to provide to the auditor, prior to the dating of the auditor's report, a draft of Form 5500 that is substantially complete (hereinafter referred to as the *draft Form 5500*). (Ref: par. .A17)

Audit Risk Assessment and Response in an Audit of ERISA Plan Financial Statements

.18 SAS No. 145, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, addresses the auditor's responsibility to identify and assess the risks of material misstatement in the financial statements through understanding the entity and its environment, the applicable financial reporting framework, and its internal control. The plan instrument is essential to understanding the plan and identifying and performing audit procedures that are responsive to assessed risks. (Ref: par. .A18–.A21) [As amended, effective for audits of ERISA plan financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.19 The auditor should obtain and read the most current plan instrument for the audit period, including effective amendments (hereinafter referred to as the *plan instrument*), as part of obtaining an understanding of the entity sufficient to perform risk assessment procedures. (Ref: par. .A22–.A24)

.20 When designing and performing audit procedures, the auditor should consider relevant plan provisions that affect the risk of material misstatement at the relevant assertion level for significant classes of transactions, account balances, and disclosures. (Ref: par. .A25–.A28) [As amended, effective for audits of ERISA plan financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Plan Tax Status

.21 As part of the auditor's responsibilities in accordance with section 250 relating to the plan's tax status, the auditor should consider whether management has performed the relevant IRC compliance tests, including but not limited to, discrimination testing, and has corrected or intends to correct failures, as applicable. (Ref: par. .A29–.A32)

Prohibited Transactions

.22 The auditor should evaluate whether prohibited transactions identified by management or as part of the audit have been appropriately reported in the applicable ERISA-required supplemental schedules (see paragraph .A5). (Ref: par. .A33–.A35)

.23 If the auditor becomes aware that the plan has entered into a prohibited transaction with a party in interest, and the prohibited transaction has not been properly reported in the applicable ERISA-required supplemental schedule, the auditor should discuss the matter with management. If management does not revise the ERISA-required supplemental schedule, the auditor should discuss the matter with those charged with governance (unless all those charged with governance are involved in managing the plan). If the ERISA-required supplemental schedule is not revised, the auditor should modify the auditor's opinion on the ERISA-required supplemental schedule, when the effect of the transaction is material based on the financial statements as a whole. When the effect of the prohibited transaction is not material to the financial statements, then the auditor should include additional discussion in the other-matter paragraph in the auditor's report on the ERISA-required supplemental schedules describing the prohibited transaction. (Ref: par. .A36)

.24 If a material prohibited party-in-interest transaction that is not disclosed in the ERISA-required supplemental schedule is also considered a related party transaction and that transaction is not properly disclosed in the notes to the ERISA plan financial statements, the auditor should modify the auditor's opinion on the financial statements in accordance with section 705 due to a departure from the applicable financial reporting framework.

Evaluation and Documentation

.25 When the audit work performed results in the identification of items that are not in accordance with the criteria specified (for example, not in accordance with the plan instrument), the auditor should evaluate whether the matters are reportable findings. Reportable findings are matters that are one or more of the following:

a. An identified instance of noncompliance or suspected noncompliance with laws or regulations in accordance with section 250

b. A finding arising from the audit that is, in the auditor's professional judgment, significant and relevant to those charged with governance regarding their responsibility to oversee the financial reporting process in accordance with section 260

c. An indication of deficiencies in internal control identified during the audit that have not been communicated to management by other parties and that, in the auditor's professional judgment, are of sufficient importance to merit management's attention in accordance with section 265, *Communicating Internal Control Related Matters Identified in an Audit*

.26 The auditor should prepare audit documentation in accordance with section 230, *Audit Documentation*. If the auditor has determined that it is not necessary to test any relevant plan provisions as described in paragraph .20, the auditor should document the considerations in reaching such conclusion. (Ref: par. .A37)

Communication With Management or Those Charged With Governance

.27 Based on the evaluation required by paragraph .25, the auditor should communicate in writing to those charged with governance, on a timely basis, reportable findings from the audit procedures performed relating to the matters included in paragraph .20. Such communication should be included with the required communication with those charged with governance in accordance with sections 250, 260, or 265, as appropriate, either in a separate section or placed in such communications as the auditor deems appropriate. The written communication should include the following:

a. A description of the reportable finding

b. Sufficient information to enable those charged with governance and management to understand the context of the communication

c. An explanation of the potential effects of the reportable findings on the financial statements or to the plan

(Ref: par. .A38–.A45)

.28 The auditor should not issue a written communication stating that no reportable findings were identified during the audit. (Ref: par. .A46)

Procedures for an ERISA Section 103(a)(3)(C) Audit

.29 When management elects to have an ERISA Section 103(a)(3)(C) audit as discussed in paragraph .08, the auditor should evaluate management's assessment of whether the entity issuing the certification is a qualified institution under DOL rules and regulations. (Ref: par. .A47–.A48)

.30 If, as a result of the procedures performed in paragraph .29, the auditor has concerns about whether the entity preparing and certifying the investment information is a qualified institution, the auditor should discuss his or her concerns with management. If management does not provide sufficient information that supports its determination that the entity preparing and certifying the investment information is a qualified institution, then the auditor should discuss his or her concerns with those charged with governance and determine the implications for the audit. (Ref: par. .A49)

.31 The auditor should identify which investment information is certified.

.32 The auditor should perform the following procedures on the certified investment information: (Ref: par. .A50)

a. Obtain from management and read the certification as it relates to investment information prepared and certified by a qualified institution (Ref: par. .A6–.A7 and .A50–.A52)

b. Compare the certified investment information with the related information presented and disclosed in the ERISA plan financial statements and ERISA-required supplemental schedules (Ref: par. .A53)

c. Read the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of the applicable financial reporting framework

.33 If, as part of the procedures performed in paragraphs .31–.32, the auditor becomes aware that the certified investment information in the financial statements and related disclosures is incomplete, inaccurate, or otherwise unsatisfactory, the auditor should discuss the matter with management and perform additional procedures to determine the appropriate course of action. (Ref: par. .A54–.A57)

.34 The auditor should perform audit procedures on the financial statement information, including the disclosures, not covered by the certification as well as noninvestment-related information based on the assessed risk of material misstatement. Plans may hold investments in which only a portion are covered by a certification by a qualified institution. In that case, the auditor should perform audit procedures on the investment information that has not been certified. (Ref: par. .A58)

.35 For all audits of ERISA plan financial statements, including an ERISA Section 103(a)(3)(C) audit, the auditor should perform the procedures necessary to become satisfied that received and disbursed amounts (for example, employer or employee contributions and benefit payments) reported by the trustee or custodian were determined in accordance with the plan provisions (also see paragraph .17).

Written Representations

.36 In addition to the requirements in section 580, the auditor should request the following written representations from management in an audit of ERISA plan financial statements: (Ref: par. .A59)

a. That management has provided the auditor with the most current plan instrument for the audit period, including all plan amendments

b. Acknowledgement of its responsibility for administering the plan and determining that the plan's transactions that are presented and disclosed in the ERISA plan financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants to determine the benefits due or which may become due to such participants (Ref: par. .A60)

c. When management elects to have an ERISA Section 103(a)(3)(C) audit, acknowledgement that management's election of the ERISA Section 103(a)(3)(C) audit does not affect its responsibility for the financial statements and for determining whether

i. an ERISA Section 103(a)(3)(C) audit is permissible under the circumstances,

ii. the investment information is prepared and certified by a qualified institution as described in 29 CFR 2520.103-8,

iii. the certification meets the requirements in 29 CFR 2520.103-5, and

iv. the certified investment information is appropriately measured, presented, and disclosed in accordance with the applicable financial reporting framework

Forming an Opinion on the ERISA Plan Financial Statements

.37 The auditor should form an opinion on whether the ERISA plan financial statements are presented fairly, in all material respects, in accordance with the applicable financial reporting framework. (Ref: par. .A61)

.38 In order to form that opinion, the auditor should conclude whether the auditor has obtained reasonable assurance[4] about whether the ERISA plan financial statements as a whole are free from material misstatement, whether due to fraud or error. That conclusion should take into account the following:

a. The auditor's conclusion, in accordance with section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, about whether sufficient appropriate audit evidence has been obtained[5]

b. The auditor's conclusion, in accordance with section 450, *Evaluation of Misstatements Identified During the Audit*, about whether uncorrected misstatements are material, individually or in the aggregate[6]

c. The evaluations required by paragraphs .39–.42 of this section

.39 The auditor should evaluate whether the ERISA plan financial statements are prepared, in all material respects, in accordance with the requirements of the applicable financial reporting framework. This evaluation should include consideration of the qualitative aspects of the plan's accounting practices, including indicators of possible bias in management's judgments. (Ref: par. .A62–.A64)

.40 In particular, in view of the requirements of the applicable financial reporting framework, the auditor should evaluate whether

a. the ERISA plan financial statements appropriately disclose the significant accounting policies selected and applied. In making this evaluation, the auditor should consider the relevance of the accounting policies to the plan and whether they have been presented in an understandable manner. (Ref: par. .A65)

---

[4]Paragraph .14 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*, defines the term *reasonable assurance*.

[5]Paragraph .28 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

[6]Paragraph .11 of section 450, *Evaluation of Misstatements Identified During the Audit*.

b. the accounting policies selected and applied are consistent with the applicable financial reporting framework and are appropriate.

c. the accounting estimates and related disclosures made by management are reasonable.

d. the information presented in the ERISA plan financial statements is relevant, reliable, comparable, and understandable. In making this evaluation, the auditor should consider whether all required information has been included, and whether such information is appropriately classified, aggregated or disaggregated, and presented; (Ref: par. .A66)

e. the ERISA plan financial statements provide adequate disclosures to enable the intended users to understand the effect of material transactions and events on the information conveyed in the ERISA plan financial statements. (Ref: par. .A67)

f. the terminology used in the ERISA plan financial statements, including the title of each financial statement, is appropriate.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 143.]

.41 The auditor's evaluation about whether the ERISA plan financial statements achieve fair presentation should also include consideration of the following: (Ref: par. .A68–.A70)

a. The overall presentation, structure, and content of the ERISA plan financial statements

b. Whether the ERISA plan financial statements represent the underlying transactions and events in a manner that achieves fair presentation (Ref: par. .A71)

.42 The auditor should evaluate whether the ERISA plan financial statements adequately refer to or describe the applicable financial reporting framework. (Ref: par. .A72–.A75)

Form of Opinion

Auditor's Opinion on ERISA Plan Financial Statements

.43 The auditor should express an unmodified opinion[7] when the auditor concludes that the ERISA plan financial statements are presented fairly, in all material respects, in accordance with the applicable financial reporting framework.

.44 The auditor should modify the opinion in the auditor's report, in accordance with section 705, in the following circumstances:

[7]See the AU-C Glossary for a definition of *unmodified opinion*.

a. The auditor concludes that, based on the audit evidence obtained, the ERISA plan financial statements as a whole are materially misstated.

b. The auditor is unable to obtain sufficient appropriate audit evidence to conclude that the ERISA plan financial statements as a whole are free from material misstatement.

Auditor's Opinion on ERISA Plan Financial Statements When Performing an ERISA Section 103(a)(3)(C) Audit

.45 When management elects an ERISA Section 103(a)(3)(C) audit, the auditor should follow the requirements in paragraphs .98–.126 of this section. (Ref: par. .A13)

Fair Presentation

.46 If the auditor concludes that the ERISA plan financial statements do not achieve fair presentation, the auditor should discuss the matter with management and, depending on how the matter is resolved, should determine whether it is necessary to modify the opinion in the auditor's report in accordance with section 705. (Ref: par. .A76–.A77)

Considerations Relating to Form 5500 Filing

Reading the Draft Form 5500

.47 The auditor should make appropriate arrangements with management to obtain the draft Form 5500. The auditor should obtain and read the draft Form 5500 prior to dating the auditor's report. (Ref: par. .A78)

.48 The auditor should read the draft Form 5500 in order to identify material inconsistencies, if any, with the audited ERISA plan financial statements. (Ref: par. .A79–.A80)

.49 The auditor should communicate with those charged with governance the auditor's responsibility with respect to Form 5500, procedures performed relating to Form 5500, and the results of those procedures.

Material Inconsistencies With the Draft Form 5500

.50 If, on reading the draft Form 5500, the auditor identifies a material inconsistency, the auditor should determine whether the audited ERISA plan financial statements or the draft Form 5500 needs to be revised.

.51 *Material Inconsistencies With the Draft Form 5500 Identified Prior to the Date of the Auditor's Report That Require Revision of the Audited ERISA Plan Financial Statements.* When the auditor identifies a material inconsistency between the draft Form 5500 and the ERISA plan financial statements that requires revision of the audited ERISA plan financial statements prior to the date of the auditor's report, and management refuses to make the revision, the auditor should discuss the matter with those charged with governance (unless all those charged with governance are involved in managing the plan). If the revisions are not made, the auditor should determine whether it is necessary to modify the opinion in the auditor's report in accordance with section 705.

.52 *Material Inconsistencies With the Draft Form 5500 Identified After the Date of the Auditor's Report But Prior to the Report Release Date That Require Revision of the Audited ERISA Plan Financial Statements.* When the auditor identifies a material inconsistency between the draft Form 5500 and the ERISA plan financial statements after the date of the auditor's report but prior to the report release date that requires revision of the audited ERISA plan financial statements, the auditor should apply the relevant requirements in section 560, *Subsequent Events and Subsequently Discovered Facts*.

.53 *Material Inconsistencies With the Draft Form 5500 Identified Prior to the Report Release Date That Require Revision of the Draft Form 5500.* When the auditor identifies a material inconsistency prior to the report release date that requires revision of the information in the draft Form 5500, and management refuses to make the revision, the auditor should communicate this matter to those charged with governance and (Ref: par. .A81)

a. include in the auditor's report an other-matter paragraph describing the material inconsistency, in accordance with section 706,

b. withhold the auditor's report, or

c. when withdrawal is possible under applicable law or regulation, withdraw from the engagement.

.54 *Material Inconsistencies Identified Subsequent to the Report Release Date.* When revision of the audited ERISA plan financial statements is necessary as a result of a material inconsistency with the information in Form 5500 and the auditor's report on the ERISA plan financial statements has already been released, the auditor should apply the relevant requirements in section 560.

.55 When revision of Form 5500 is necessary after the report release date and management agrees to make the revision, the auditor should carry out the procedures necessary under the circumstances. (Ref: par. .A82)

.56 When revision of Form 5500 is necessary after the report release date but management refuses to make the revision, the auditor should notify those charged with governance of the auditor's concerns regarding Form 5500 and take any further appropriate action. (Ref: par. .A83)

Material Misstatement of Fact

.57 If, on reading the draft Form 5500 for the purpose of identifying material inconsistencies between Form 5500 and the ERISA plan financial statements, the auditor becomes aware of an apparent material misstatement of fact in the draft Form 5500, the auditor should discuss the matter with management. (Ref: par. .A84)

.58 When, following such discussions as described in paragraph .57, the auditor still considers that there is an apparent material misstatement of fact, the auditor should request management to consult with a qualified third party, such as the entity's legal counsel, and the auditor should consider the advice received by the entity in determining whether such matter is a material misstatement of fact.

.59 When the auditor concludes that there is a material misstatement of fact that management refuses to correct, the auditor should notify those charged with governance of the auditor's concerns regarding the information in the draft Form 5500 and take any further appropriate action. (Ref: par. .A85)

Auditor's Report on ERISA Plan Financial Statements (Other Than for an ERISA Section 103(a)(3)(C) Audit)[8]

.60 The auditor's report should be in writing. (Ref: par. .A86–.A87)

Title

.61 The auditor's report should have a title that clearly indicates that it is the report of an independent auditor. (Ref: par. .A88)

Addressee

.62 The auditor's report should be addressed, as appropriate, based on the circumstances of the engagement. (Ref: par. .A89–.A90)

Auditor's Opinion

.63 The first section of the auditor's report should include the auditor's opinion and should have the heading "Opinion."

.64 The "Opinion" section of the auditor's report should also do the following: (Ref: par. .A91–.A93)

a. Identify the plan whose financial statements have been audited

b. State that the financial statements have been audited, and the plan is an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA),

c. Identify the title of each statement that the financial statements comprise

d. Refer to the notes

e. Specify the dates of or periods covered by each financial statement that the financial statements comprise

.65 When expressing an unmodified opinion on the ERISA plan financial statements, the auditor's opinion should state that, in the auditor's opinion, the accompanying financial

[8] For ERISA Section 103(a)(3)(C) audits, paragraphs .98–.126 apply instead of paragraphs .60–.82.

statements present fairly, in all material respects, [...] in accordance with [*the applicable financial reporting framework*]. (Ref: par. .A94–.A97)

.66 The auditor's opinion should identify the applicable financial reporting framework and its origin. (Ref: par. .A98)

Basis for Opinion

.67 The auditor's report should include a section, directly following the "Opinion" section, with the heading "Basis for Opinion" that does the following: (Ref: par. .A99)

a. States that the audit was conducted in accordance with generally accepted auditing standards and identifies the United States of America as the country of origin of those standards (Ref: par. .A100–.A101)

b. Refers to the section of the auditor's report that describes the auditor's responsibilities under GAAS

c. Includes a statement that the auditor is required to be independent of the plan and to meet the auditor's other ethical responsibilities, in accordance with the relevant ethical requirements relating to the audit (Ref: par. .A102–.A103)

d. States whether the auditor believes that the audit evidence the auditor has obtained is sufficient and appropriate to provide a basis for the auditor's opinion

Going Concern

.68 When applicable, the auditor should report in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.

Key Audit Matters

.69 When the auditor is engaged to communicate key audit matters, the auditor should do so in accordance with section 701. (Ref: par. .A104)

Responsibilities of Management for the Financial Statements

.70 The auditor's report should include a section with the heading "Responsibilities of Management for the Financial Statements."

.71 This section of the auditor's report should describe management's responsibility for the following:

a. The preparation and fair presentation of the financial statements in accordance with the applicable financial reporting framework, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. (Ref: par. .A105–.A106)

b. When required by the applicable financial reporting framework, the evaluation of whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the plan's ability to continue as a going concern [*for the time period set by the applicable financial reporting framework, as applicable*.]

c. Maintaining a current plan instrument, including all plan amendments

d. Administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants

.72 The description about management's responsibility for the financial statements in the auditor's report should not reference a separate statement by management about such responsibilities, even if such a statement is included in a document containing the auditor's report. (Ref: par. .A107)

Auditor's Responsibilities for the Audit of the Financial Statements

.73 The auditor's report should include a section with the heading "Auditor's Responsibilities for the Audit of the Financial Statements."

.74 This section of the auditor's report should do the following: (Ref: par. .A108)

a. State that the objectives of the auditor are to

  i. obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and (Ref: par. .A109)

  ii. issue an auditor's report that includes the auditor's opinion

b. State that reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. (Ref: par. .A110)

c. State that the risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control

d. State that misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.[9](Ref: par. .A111)

[As amended, effective for audits of ERISA plan financial statements for periods ending on or after December 15, 2021, by SAS No. 138.]

---

[9]Paragraph .02 of section 320, *Materiality in Planning and Performing an Audit*.

.75 The "Auditor's Responsibilities for the Audit of the Financial Statements" section of the auditor's report should further describe an audit by stating that, in performing an audit in accordance with GAAS, the auditor's responsibilities are to:

a. Exercise professional judgment and maintain professional skepticism throughout the audit.

b. Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

c. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the plan's internal control. Accordingly, no such opinion is expressed.

   In circumstances in which the auditor also has a responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, the auditor should omit the following: "but not for the purpose of expressing an opinion on the effectiveness of the plan's internal control. Accordingly, no such opinion is expressed."

d. Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.

e. Conclude whether, in the auditor's judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the plan's ability to continue as a going concern for a reasonable period of time.

.76 The "Auditor's Responsibilities for the Audit of the Financial Statements" section of the auditor's report should also state that the auditor is required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that the auditor identified during the audit.

ERISA-Required Supplemental Schedules

.77 As discussed in paragraph .127, when auditing ERISA plan financial statements, the auditor is required to report on whether the ERISA-required supplemental schedules are fairly stated, in all material respects, in relation to the financial statements as a whole, in accordance with section 725 and paragraphs .129–.130 of this section, as applicable.

Other Reporting Responsibilities

.78 If the auditor addresses other reporting responsibilities in the auditor's report on the ERISA plan financial statements that are in addition to the auditor's responsibility under GAAS, these other reporting responsibilities should be addressed in a separate section in the auditor's report with the heading "Report on Other Legal and Regulatory

Requirements" or another heading that is appropriate to the content of the section. (Ref: par. .A112–.A113)

.79 If the auditor's report contains a separate section that addresses other reporting responsibilities, the requirements in paragraphs .61–.77 of this section should be included under a section with the heading "Report on the Audit of the Financial Statements." The "Report on Other Legal and Regulatory Requirements" should follow the "Report on the Audit of the Financial Statements." (Ref: par. .A114)

Signature of the Auditor

.80 The auditor's report should include the manual or printed signature of the auditor's firm. (Ref: par. .A115–.A116)

Auditor's Address

.81 The auditor's report should name the city and state where the auditor's report is issued. (Ref: par. .A117–.A118)

Date of the Auditor's Report

.82 The auditor's report should be dated no earlier than the date on which the auditor has obtained sufficient appropriate audit evidence on which to base the auditor's opinion on the ERISA plan financial statements, including evidence of the following: (Ref: par. .A119)

a. All the statements and disclosures that the ERISA plan financial statements comprise have been prepared.

b. Management has asserted that it has taken responsibility for those ERISA plan financial statements. (Ref: par. .A120–.A121)

c. The procedures relating to the draft Form 5500 have been performed.

Auditor's Report for Audits Conducted in Accordance With Both GAAS and Another Set of Auditing Standards

.83 Paragraph .67 requires that the auditor's report state that the audit was conducted in accordance with GAAS and identify the United States of America as the country of origin of those standards. However, an auditor may indicate that the audit was also conducted in accordance with another set of auditing standards (for example, International Standards on Auditing [ISAs], or *Government Auditing Standards*). The auditor should not refer to having conducted an audit in accordance with another set of auditing standards in addition to GAAS, unless the audit was conducted in accordance with both sets of standards in their entirety.

.84 When the auditor's report refers to both GAAS and another set of auditing standards, the auditor's report should identify the other set of auditing standards as well as its origin.

Comparative Financial Statements

.85 Comparative financial statements may be required by the applicable financial reporting framework, or management may elect to provide such information. When comparative financial statements are presented, the auditor's report should refer to each period for which financial statements are presented and on which an audit opinion is expressed. (Ref: par. .A122–.A124)

.86 When expressing an opinion on all periods presented, a continuing auditor should update the report on the financial statements of one or more prior periods presented on a comparative basis with those of the current period. The auditor's report on comparative financial statements should not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence on which to support the opinion for the most recent audit. (Ref: par. .A125–.A126)

Audit Procedures

.87 The auditor should perform the procedures required by paragraphs .88–.90 if comparative financial statements are presented for the prior periods.

.88 The auditor should determine whether the comparative financial statements have been presented in accordance with the relevant requirements, if any, of the applicable financial reporting framework.

.89 The auditor should evaluate the following:

a. Whether the comparative financial statements agree with the amounts and other disclosures presented in the prior period or, when appropriate, has been restated for the correction of a material misstatement or adjusted for the retrospective application of an accounting principle

b. Whether the accounting policies reflected in the comparative financial statements are consistent with those applied in the current period or, if there have been changes in accounting policies, whether those changes have been properly accounted for and adequately presented and disclosed[10]

.90 If the auditor becomes aware of a possible material misstatement in the comparative financial statements while performing the current period audit, the auditor should perform such additional audit procedures as are necessary in the circumstances to obtain sufficient appropriate audit evidence to determine whether a material misstatement exists. If the auditor audited the prior period's financial statements and becomes aware of a material misstatement in those financial statements, the auditor should also follow the relevant requirements of section 560. If the prior period financial statements are restated, the auditor should determine that the comparative financial statements agree with the restated financial statements.

[10]See section 708, *Consistency of Financial Statements*.

.91 As required by section 580, the auditor should request written representations for all periods referred to in the auditor's opinion. The auditor also should obtain a specific written representation regarding any restatement made to correct a material misstatement in a prior period that affects the comparative financial statements. (Ref: par. .A127)

.92 When reporting on prior period financial statements in connection with the current period's audit, if the auditor's opinion on such prior period financial statements differs from the opinion the auditor previously expressed, the auditor should disclose the following matters in an emphasis-of-matter or other-matter paragraph, in accordance with section 706:

a. The date of the auditor's previous report

b. The type of opinion previously expressed

c. The substantive reasons for the different opinion

d. That the auditor's opinion on the amended financial statements is different from the auditor's previous opinion (Ref: par. .A128)

Prior Period Financial Statements Audited by a Predecessor Auditor

.93 If the financial statements of the prior period were audited by a predecessor auditor, and the predecessor auditor's report on the prior period's financial statements is not reissued,[11]in addition to expressing an opinion on the current period's financial statements, the auditor should state the following in an other-matter paragraph:[12]

a. That the financial statements of the prior period were audited by a predecessor auditor

b. The type of opinion expressed by the predecessor auditor and, if the opinion was modified, the reasons therefore

c. The nature of an emphasis-of-matter paragraph, other-matter paragraph, or a going concern section included in the predecessor auditor's report, if any

d. The date of that report

.94 If the auditor concludes that a material misstatement exists that affects the prior period financial statements on which the predecessor auditor had previously reported without modification, the auditor should follow the communication requirements in section 510, *Opening Balances — Initial Audit Engagements, Including Reaudit Engagements*.[13] If the prior period financial statements are restated, and the predecessor auditor agrees to issue

[11]Paragraphs .19–.20 of section 560, *Subsequent Events and Subsequently Discovered Facts*.

[12]See section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report*.

[13]Paragraphs .12–.13 of section 510, *Opening Balances — Initial Audit Engagements, Including Reaudit Engagements*.

a new auditor's report on the restated financial statements of the prior period, the auditor should express an opinion only on the current period. (Ref: par. .A129)

Prior Period Financial Statements Not Audited

.95 When current period financial statements are audited and presented in comparative form with financial statements for the prior period for which a compilation or review was performed, and the report on the prior period is not reissued, the auditor should include an other-matter paragraph[14]in the current period auditor's report that includes the following with respect to the prior period: (Ref: par. .A130)

a. The service performed in the prior period

b. The date of the report on that service

c. A description of any material modifications noted in that report

d. For a review engagement, a statement that the service was substantially less in scope than an audit and does not provide the basis for the expression of an opinion on the financial statements as a whole (Ref: par. .A131)

e. For a compilation engagement, a statement that no opinion or other form of assurance is expressed on the financial statements (Ref: par. .A132)

.96 If the prior period financial statements were not audited, reviewed, or compiled, the financial statements should be clearly marked to indicate their status, and the auditor's report should include an other-matter paragraph to indicate that the auditor has not audited, reviewed, or compiled the prior period financial statements and that the auditor assumes no responsibility for them. (Ref: par. .A133)

Information Presented in the Financial Statements

.97 Information that is not required by the applicable financial reporting framework but is nevertheless presented as part of the basic financial statements should be covered by the auditor's opinion if it cannot be clearly differentiated. (Ref: par. .A134–.A136)

Auditor's Report for an ERISA Section 103(a)(3)(C) Audit

.98 The auditor's report should be in writing. (Ref: par. .A86–.A87)

.99 The auditor should apply the provisions in paragraphs .83–.97, when applicable. (Ref: par. .A137)

Title

.100 The auditor's report should have a title that clearly indicates that it is the report of an independent auditor. (Ref: par. .A88)

---

[14]See footnote 12.

Addressee

.101 The auditor's report should be addressed, as appropriate, based on the circumstances of the engagement. (Ref: par. .A89–.A90)

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

.102 The first section of the auditor's report should include a description of the scope and nature of the ERISA Section 103(a)(3)(C) audit and should have the heading "Scope and Nature of the ERISA Section 103(a)(3)(C) Audit."

.103 The "Scope and Nature of the ERISA Section 103(a)(3)(C) Audit" section of the auditor's report should also do the following:

a. Identify the plan whose financial statements have been audited

b. State that the auditor performed an audit of the financial statements of an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit) (Ref: par. .A138)

c. Identify the title of each statement that the financial statements comprise

d. Refer to the notes

e. Specify the dates of or periods covered by each financial statement that the financial statements comprise

f. State that management, having determined it is permissible in the circumstances, has elected to have the audit of the plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA (Ref: par. .A139)

g. State that as permitted by ERISA Section 103(a)(3)(C), the audit need not extend to any statements or information related to assets held for investment of the plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution) (Ref: par. .A140)

h. State that management has obtained a certification [*or certifications*] from a qualified institution as of [*date or dates*], and for the [*period or year ended date*], stating that the certified investment information, as described in [*insert note reference*] to the financial statements is complete and accurate

Auditor's Opinion

.104 The auditor's report should include the "Opinion" section, directly following the "Scope and Nature of the ERISA Section 103(a)(3)(C) Audit" section, with the heading "Opinion."

.105 When the auditor has not identified any material misstatements of the financial statements and no scope limitations exist, the auditor's report should include a statement that, in the auditor's opinion, based on the audit and on the procedures performed as described in the "Auditor's Responsibilities for the Audit of the Financial Statements" section

a. the amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with the applicable financial reporting framework.

b. the information in the accompanying financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C). (Ref: par. .A140)

.106 The auditor's opinion should identify the applicable financial reporting framework and its origin. (Ref: par. .A98)

Basis for Opinion

.107 The auditor's report should include a section, directly following the "Opinion" section, with the heading "Basis for Opinion" that does the following: (Ref: par. .A99)

a. States that the audit was conducted in accordance with generally accepted auditing standards (GAAS) and identifies the United States of America as the country of origin of those standards (Ref: par. .A100–.A101)

b. Refers to the section of the auditor's report that describes the auditor's responsibilities for GAAS

c. Includes a statement that the auditor is required to be independent of the plan and to meet the auditor's other ethical responsibilities, in accordance with the relevant ethical requirements relating to the audit (Ref: par. .A102–.A103)

d. States whether the auditor believes that the audit evidence the auditor has obtained is sufficient and appropriate to provide a basis for the ERISA Section 103(a)(3)(C) audit opinion.

Going Concern

.108 When applicable, the auditor should report in accordance with section 570.

Key Audit Matters

.109 When the auditor is engaged to communicate key audit matters, the auditor should do so in accordance with section 701. (Ref: par. .A104)

Responsibilities of Management for the Financial Statements

.110 The auditor's report should include a section with the heading "Responsibilities of Management for the Financial Statements."

.111 This section of the auditor's report should describe management's responsibility for the following:

a. The preparation and fair presentation of the financial statements in accordance with the applicable financial reporting framework, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. (Ref: par. .A105–.A106)

b. The election of the ERISA Section 103(a)(3)(C) audit and that the election does not affect management's responsibility for the financial statements.

c. When required by the applicable financial reporting framework, the evaluation of whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the plan's ability to continue as a going concern [*for the time period set by the applicable financial reporting framework*, as applicable.]

d. Maintaining a current plan instrument, including all plan amendments

e. Administering the plan and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

.112 The description about management's responsibility for the financial statements in the auditor's report should not reference a separate statement by management about such responsibilities, even if such a statement is included in a document containing the auditor's report. (Ref: par. .A107)

Auditor's Responsibilities for the Audit of the Financial Statements

.113 The auditor's report should include a section with the heading "Auditor's Responsibilities for the Audit of the Financial Statements."

.114 This section of the auditor's report should do the following: (Ref: par. .A108)

a. State that except as described in the "Scope and Nature of the ERISA Section 103(a)(3)(C) Audit" section of the report, the objectives of the auditor are to

   i. obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error and (Ref: par. .A109)

   ii. issue an auditor's report that includes the auditor's opinion.

b. State that reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. (Ref: par. .A110)

c. State that the risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

d. State that misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.[15](Ref: par. .A111)

[As amended, effective for audits of ERISA plan financial statements for periods ending on or after December 15, 2021, by SAS No. 138.]

.115 The "Auditor's Responsibilities for the Audit of the Financial Statements" section of the auditor's report should further describe an audit by stating that, in performing an audit in accordance with GAAS, the auditor's responsibilities are to:

a. Exercise professional judgment and maintain professional skepticism throughout the audit

b. Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

c. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the plan's internal control. Accordingly, no such opinion is expressed.

   In circumstances in which the auditor also has a responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, the auditor should omit the following "but not for the purpose of expressing an opinion on the effectiveness of the plan's internal control. Accordingly, no such opinion is expressed."

d. Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.

[15]See footnote 9.

e. Conclude whether, in the auditor's judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the plan's ability to continue as a going concern for a reasonable period of time.

.116 The auditor's report should state that the audit did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of the applicable financial reporting framework.

.117 The auditor's report should state that, accordingly, the objective of the ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with the applicable financial reporting framework.

.118 The "Auditor's Responsibilities for the Audit of the Financial Statements" section of the auditor's report should also state that the auditor is required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal-control-related matters that the auditor identified during the audit.

Modifications to the Opinion

.119 Section 705 addresses the auditor's responsibility to issue an appropriate report in circumstances when, in forming an opinion in accordance with this SAS, the auditor concludes that a modification to the auditor's opinion on the ERISA plan financial statements is necessary. In the case of an ERISA Section 103(a)(3)(C) audit, the auditor should apply the requirements in section 705, adapted as necessary in the circumstances of the engagement, including the following: (Ref: par. .A141–.A142)

a. When the auditor expresses a qualified opinion due to a material misstatement of the financial statements, the auditor should amend the "Opinion" section as required by paragraph .105, to state that, in the auditor's opinion, except for the effects of the matters described in the "Basis for Qualified Opinion" section, based on the audit and on the procedures performed as described in the "Auditor's Responsibilities for the Audit of the Financial Statements" section

    i. the amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with the applicable financial reporting framework.

    ii. the information in the accompanying financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C). (Ref: par. .A140)

When the modification arises from an inability to obtain sufficient appropriate audit evidence, the auditor should use the corresponding phrase *except for the possible effects of the matter(s)...* for the modified opinion.

b. When the auditor expresses an adverse opinion, the requirements in paragraph .105 do not apply, and the auditor should state in the opinion paragraph that, in the auditor's opinion, because of the significance of the matters described in the "Basis for Adverse Opinion" section, the financial statements are not presented fairly in accordance with the applicable financial reporting framework.

c. When the auditor expresses a qualified or an adverse opinion, the auditor should amend the description in the "Basis for Opinion" section to state whether the auditor believes that the audit evidence the auditor has obtained is sufficient and appropriate to provide a basis for the auditor's modified ERISA Section 103(a)(3)(C) audit opinion.

d. When the auditor disclaims an opinion, the auditor should amend the statement required by paragraph .103*b*, which indicates that the auditor performed an audit of the financial statements, to state that the auditor was engaged to perform an audit of the financial statements. The auditor should also amend the description of the auditor's responsibility for the audit of the financial statements and the description of the scope of the audit to state only the following: "Our responsibility is to conduct an audit of the plan's financial statements in accordance with auditing standards generally accepted in the United States of America and to issue an auditor's report. However, because of the matters described in the "Basis for Disclaimer of Opinion" section of our report, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on these financial statements."

e. When the auditor disclaims an opinion due to an inability to obtain sufficient appropriate audit evidence, the requirements in paragraph .105 do not apply, and the auditor should state in the "Disclaimer of Opinion" section that

    i. because of the significance of the matters described in the "Basis for Disclaimer of Opinion" section, the auditor has not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion and

    ii. accordingly, the auditor does not express an opinion on the financial statements.[16]

ERISA-Required Supplemental Schedules

.120 The auditor's report should include an other-matter paragraph with the heading "Other Matter — Supplemental Schedules Required by ERISA."

.121 The auditor should report on ERISA-required supplemental schedules in accordance with paragraph .132 of this section.

[16]Paragraph .20 of section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

Other Reporting Responsibilities

.122 If the auditor addresses other reporting responsibilities in the auditor's report on the ERISA plan financial statements that are in addition to the auditor's responsibility under GAAS, these other reporting responsibilities should be addressed in a separate section in the auditor's report with the heading "Report on Other Legal and Regulatory Requirements" or another heading that is appropriate to the content of the section. (Ref: par. .A143–.A144)

.123 If the auditor's report contains a separate section that addresses other reporting responsibilities, the requirements in paragraphs .102–.121 of this section should be included under a section with the heading "Report on the Audit of the Financial Statements." The "Report on Other Legal and Regulatory Requirements" should follow the "Report on the Audit of the Financial Statements." (Ref: par. .A145)

Signature of the Auditor

.124 The auditor's report should include the manual or printed signature of the auditor's firm. (Ref: par. .A115–.A116)

Auditor's Address

.125 The auditor's report should name the city and state where the auditor's report is issued. (Ref: par. .A117–.A118)

Date of the Auditor's Report

.126 The auditor's report should be dated no earlier than the date on which the auditor has obtained an appropriate certification and has obtained sufficient appropriate audit evidence on which to base the auditor's opinion on the ERISA plan financial statements, including evidence of the following: (Ref: par. .A119)

a. All the statements and disclosures that the ERISA plan financial statements comprise have been prepared.

b. Management has asserted that they have taken responsibility for those ERISA plan financial statements. (Ref: par. .A120–.A121)

c. The procedures relating to the draft Form 5500 have been performed.

Reporting on Supplemental Schedules

.127 As discussed in paragraph .04, ERISA requires that certain supplemental schedules accompany the ERISA plan financial statements (referred to as *ERISA-required supplemental schedules*), if applicable. In addition, ERISA plan financial statements may have accompanying supplementary information that is not required by ERISA. Except as discussed in paragraph .132, when auditing ERISA plan financial statements, the auditor should report on whether the ERISA-required supplemental schedules are fairly stated, in all material respects, in relation to the financial statements as a whole, in accordance with section 725 and paragraphs .129–.130 of this section. Section 725 addresses the performance requirements as well as the form and content of the report on supplementary information in relation to the financial statements as a whole. Section 725 requires the auditor to report on the supplementary information in either (*a*) a separate section in the auditor's report on the financial statements with the heading "Supplementary Information" or other appropriate heading or (*b*) in a separate report on the supplementary information. Paragraphs .22–.24 address additional considerations related to reporting on the ERISA-required supplemental schedules when prohibited transactions with a party in interest exist. (Ref: par. .A146–.A147) [As amended, effective for audits of ERISA plan financial statements for periods ending on or after December 15, 2021, by SAS No. 140.]

.128 When the auditor is also engaged to report on supplementary information accompanying the ERISA plan financial statements that is not required by ERISA, and that is not required by the applicable financial reporting framework, section 725 applies. (Ref: par. .A148)

ERISA-Required Supplemental Schedules

.129 *Reporting on ERISA-Required Supplemental Schedules When Performing an Audit of ERISA Plan Financial Statements Not Subject to ERISA Section 103(a)(3)(C).*[17] When reporting on the ERISA-required supplemental schedules in accordance with section 725, the reporting elements discussed in paragraph .09 of section 725 should be replaced with the following (see paragraph .132 when performing an ERISA Section 103(a)(3)(C) audit):

a. A statement that the audit was conducted for the purpose of forming an opinion on the financial statements as a whole

b. The title of the supplemental schedules and the periods covered

c. A statement that the supplemental schedules are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA

d. A statement that such information is the responsibility of management and was derived from, and relates directly to, the underlying accounting and other records used to prepare the financial statements

e. A statement that the information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America

f. A statement that in forming the auditor's opinion on the supplemental schedules, the auditor evaluated whether the supplemental schedules, including their form

[17]For ERISA Section 103(a)(3)(C) audits, paragraphs .131–.132 apply instead of paragraphs .129–.130.

and content, are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA

g. When the auditor's report on the audited ERISA plan financial statements contains an unmodified opinion and the auditor has concluded that the ERISA-required supplemental schedules are fairly stated, in all material respects, in relation to the financial statements as a whole, a statement that, in the auditor's opinion, the information in the accompanying schedules is fairly stated, in all material respects, in relation to the financial statements as a whole, and the form and content are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. (Ref: par. .A149–.A152)

h. When the auditor's report on the audited ERISA plan financial statements contains a qualified opinion and the qualification has an effect on the ERISA-required supplemental schedules, a statement that, in the auditor's opinion, except for the effects or possible effects on the supplemental schedules of (refer to the paragraph in the auditor's report explaining the qualification), the information in the accompanying supplemental schedules is fairly stated, in all material respects, in relation to the financial statements as a whole, and the form and content are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA

.130 When the auditor's report on the audited ERISA plan financial statements contains an adverse opinion or a disclaimer of opinion, the auditor is precluded from expressing an opinion on the ERISA-required supplemental schedules. When permitted by law or regulation, the auditor may withdraw from the engagement to report on the ERISA-required supplemental schedules. If the auditor does not withdraw, the reporting elements in paragraph .11 of section 725 should be replaced with the following:

a. If the auditor's report on the audited ERISA plan financial statements contains an adverse opinion, a statement that the audit was conducted for the purpose of forming an opinion on the financial statements as a whole, or if the auditor's report contains a disclaimer of opinion, a statement that the auditor was engaged for the purpose of forming an opinion on the financial statements as a whole

b. A statement that the supplemental schedules are presented for the purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.

c. A statement that because of the significance of the matter described in the auditor's report (refer to the "Basis for Adverse Opinion" or "Basis for Disclaimer of Opinion" sections, as applicable), it is inappropriate to, and the auditor does not, express an opinion on the supplemental schedules

.131 *Reporting on ERISA-Required Supplemental Schedules When Reporting Under an ERISA Section 103(a)(3)(C) Audit.* In addition to the procedures performed during the audit of the ERISA plan financial statements (including the procedures required by paragraph

.32), in order to report on the ERISA-required supplemental schedules when reporting under an ERISA Section 103(a)(3)(C) audit, the auditor should perform the following procedures using the same materiality level used in the audit of the financial statements:

a. Determine whether the form and content of the ERISA-required supplemental schedules, other than the information that agreed to or is derived from the certified investment information, is presented in conformity with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA

b. Compare and reconcile the information included in the ERISA-required supplemental schedules, other than that agreed to or derived from the certified investment information, to the underlying accounting and other records used in preparing the financial statements or to the financial statements themselves

c. Obtain written representations from management

   i. that it acknowledges its responsibility for the presentation of the ERISA-required supplemental schedules in accordance with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA and

   ii. that it believes the ERISA-required supplemental schedules, including their form and content, are presented in conformity with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA

.132 When management elects to have an ERISA Section 103(a)(3)(C) audit, the auditor should include an other-matter paragraph in the ERISA Section 103(a)(3(C) audit report that contains the following elements:

a. The title of the supplemental schedules and the periods covered.

b. A statement that the supplemental schedules are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

c. A statement that such information is the responsibility of management and was derived from, and relates directly to, the underlying accounting and other records used to prepare the financial statements.

d. A statement that the information included in the supplemental schedules, other than that agreed to or derived from the certified investment information, has been subjected to auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America.

e. A statement that, for information included in the supplemental schedules that agreed to or is derived from the certified investment information, the auditor compared such information to the related certified investment information.

f. A statement that, in forming the auditor's opinion on the supplemental schedules, the auditor evaluated whether the supplemental schedules, other than the information agreed to or derived from the certified investment information, including their form and content, are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

g. A statement whether, in the auditor's opinion

    i. the form and content of the supplemental schedules, other than the information in the supplemental schedules that agreed to or is derived from the certified investment information, are presented, in all material respects, in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

    ii. the information in the supplemental schedules related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

h. If the auditor issues a qualified ERISA Section 103(a)(3)(C) opinion on the ERISA plan financial statements and the qualification has an effect on the ERISA-required supplemental schedules, a statement that, in the auditor's opinion, except for the effects of [*describe the matters by referring to the section in the auditor's report explaining the qualification*] on the supplemental schedules of [*identify the schedules*]

    i. the form and content of the supplemental schedules, other than the information in the supplemental schedules that agreed to or is derived from the certified investment information, are presented, in all material respects, in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

    ii. the information in the supplemental schedules related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

    When the modification arises from an inability to obtain sufficient appropriate audit evidence, the auditor should use the corresponding phrase *except for the possible effects of the matter(s)...* for the modified opinion.

i. If the auditor's report on the ERISA plan financial statements subject to ERISA Section 103(a)(3)(C) contains an adverse opinion or a disclaimer of opinion, the auditor is precluded from expressing an opinion on the supplemental schedules. When permitted by law or regulation, the auditor may withdraw from the engagement to report on the ERISA-required supplemental schedules. If the auditor does not withdraw, the auditor should do the following:

i. Include a statement that the supplemental schedules are presented for the purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA

ii. Include a statement that such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements

iii. Include a statement that because of the significance of the matter described in [*refer to the Basis for Adverse Opinion or Basis for Disclaimer of Opinion sections, as applicable*], it is inappropriate to and the auditor does not express an opinion on the supplemental schedules.

.133 *Errors, Omissions, or Inconsistencies in ERISA-Required Supplemental Schedules (Ref: par. .A149–.A152)*. When the auditor concludes, on the basis of the procedures performed, that the information in the ERISA-required supplemental schedules is materially inconsistent with the certified investment information, the auditor should discuss the matters with management and propose appropriate revision of the ERISA-required supplemental schedules. If management does not revise the ERISA-required supplemental schedules, the auditor should discuss the matter with those charged with governance (unless all those charged with governance are involved in managing the plan). If the ERISA-required supplemental schedules are not revised, the auditor should modify the auditor's opinion regarding the ERISA-required supplemental schedules and describe the inconsistency in the auditor's report.

.134 When the auditor concludes, on the basis of the procedures performed, that the information in the ERISA-required supplemental schedules is materially misstated in relation to the financial statements, the auditor should discuss the matters with management and propose appropriate revision of the ERISA-required supplemental schedules. If management does not revise the ERISA-required supplemental schedules, the auditor should discuss the matter with those charged with governance (unless all those charged with governance are involved in managing the plan). If the ERISA-required supplemental schedules are not revised, the auditor should modify the auditor's opinion regarding the ERISA-required supplemental schedules and describe the misstatement in the auditor's report. (Ref: par. .A149)

.135 If a material prohibited party-in-interest[18] transaction that is not disclosed in the ERISA-required supplemental schedule is also considered a related party transaction and if that transaction is not properly disclosed in the notes to the ERISA plan financial statements, the requirements in paragraph .24 apply.

[18]*Party in interest* is defined in Section 3(14) of ERISA.

Application and Other Explanatory Material

Scope of This Section (Ref: par. .01–.12)

.A1 The AICPA Audit and Accounting Guide *Employee Benefit Plans* provides interpretive guidance to apply this section, including example audit procedures for performing an audit of ERISA plan financial statements. Section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*, requires the auditor to consider applicable interpretive publications in planning and performing the audit.[19]

.A2 ERISA provides for federal government oversight of management's operating and reporting practices for EBPs. In addition to establishing reporting requirements for covered plans, ERISA establishes minimum standards for participation, vesting, and funding for defined benefit and defined contribution plans sponsored by private entities. It also establishes standards of fiduciary conduct and imposes specific restrictions and responsibilities on fiduciaries.

.A3 The plan administrator is identified in the plan document as having responsibility for managing the day-to-day administration and decisions for the plan. This section uses the term management to include the plan administrator as described in the DOL's Rules and Regulations for Reporting and Disclosure under ERISA as well as other members of management.

.A4 Under ERISA, the DOL and IRS have the authority to issue regulations governing the administration of EBPs, including reporting and disclosure requirements to be included in an annual filing with the DOL. The DOL does not establish the financial reporting framework, for example, the DOL does not set generally accepted accounting principles for ERISA plan financial statements. The selection of an acceptable financial reporting framework is the responsibility of management. The PBGC guarantees participants in most private-sector defined benefit pension plans certain minimum pension benefits if the plan terminates without sufficient money to pay all benefits, and it administers terminated plans in certain circumstances. The IRS, DOL, and PBGC have consolidated their reporting and disclosure requirements into Form 5500 to minimize the filing burden for plan management.

.A5 ERISA contains a requirement for annual audits of EBP financial statements by an independent qualified public accountant. Generally, plans with 100 or more participants (as defined in the Form 5500 instructions) are subject to the audit requirement. ERISA and DOL regulations require additional information to be disclosed in the financial statements or presented in supplemental schedules. ERISA also contains a requirement for the auditor to report on whether certain supplemental schedules, as identified in ERISA Section 103, are presented fairly, in all material respects, in relation to the financial statements as a whole.

[19]Paragraph .27 of section 200.

.A6 A qualified institution is an organization as defined in accordance with 29 CFR 2520.103-5 and 29 CFR 2520.103-8 as a bank or similar institution that holds plan assets, or an insurance carrier which provides benefits under the plan or holds plan assets, that is regulated, supervised, and subject to periodic examination by a state or federal agency that prepares and certifies the investment information. The DOL's Rules and Regulations for Reporting and Disclosure under ERISA are outlined in 29 CFR 2520.103-1. Investment companies and broker-dealers are not considered qualified institutions as it relates to providing a certification.

.A7 An ERISA Section 103(a)(3)(C) audit may be elected by management only when a qualified institution certifies both the accuracy and completeness of the investment information submitted to the plan administrator. Certifications that address only accuracy or only completeness, but not both, do not comply with the DOL's regulation and, therefore, are not adequate to allow plan management to elect an ERISA Section 103(a)(3)(C) audit.

.A8 When performing an ERISA Section 103(a)(3)(C) audit, although the audit need not extend to investment information as discussed in paragraph .08, areas such as participant data; contributions; benefit payments; participant account balances, including related earnings and other allocations to such account balances; or other information would be subject to audit procedures, regardless of whether such information is included in the certified statement or information.

.A9 An ERISA Section 103(a)(3)(C) audit may relate to the audit of the plan's investment in an entity, as permitted by 29 CFR 2520.103-12 (a 103-12 investment entity), provided the 103-12 investment entity properly filed its report with the DOL. Accordingly, the guidance in this section is applicable whether an ERISA Section 103(a)(3)(C) audit is being performed pursuant to 29 CFR 2520.103-8 or 29 CFR 2520.103-12. However, the wording in the auditor's report may need to be revised to adapt to the circumstances of the engagement.

.A10 Sometimes, the plan's recordkeeper certifies the investment information on behalf of the plan's qualified institution as "agent for." In this situation, such certification generally would be acceptable when there is a contractual arrangement between a qualified institution and the recordkeeper such that the recordkeeper is able to provide the certification on the qualified institution's behalf.

.A11 ERISA requires certain comparative financial statements to be presented.

.A12 Paragraph .32 describes the auditor's responsibilities with respect to the disclosures in the financial statements covered by the certification.

.A13 As discussed in paragraph .A47, an ERISA Section 103(a)(3)(C) audit is unique to EBPs and is not considered a scope limitation as discussed in section 705. For an ERISA Section 103(a)(3)(C) audit, paragraph .119 requires the auditor to apply the requirements in section 705, adapted as necessary in the circumstances of the engagement, and provides further guidance on how section 705 should be adapted.

.A14 Section 800 also addresses the auditor's responsibilities when the auditor is reporting on financial statements prepared in accordance with a special purpose framework and is required by law or regulation to use a specific layout, form, or wording of the auditor's report. When reporting on financial statements prepared in accordance with a general purpose framework, and law or regulation requires a specific layout, form, or wording of the auditor's report, the auditor may adapt and apply the requirements in section 800.

.A15 Other AU-C sections that also contain reporting requirements include, but are not limited to, the following:

- Section 510, *Opening Balances — Initial Audit Engagements, Including Reaudit Engagements*
- Section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*
- Section 725, *Supplementary Information in Relation to the Financial Statements as a Whole*
- Section 730, *Required Supplementary Information*

Engagement Acceptance (Ref: par. .15)

.A16 The concept of an independent audit requires that the auditor not assume management's responsibility for the preparation and fair presentation of the financial statements. When the auditor assists in drafting the financial statements, in whole or in part, based on information provided by management during the performance of the audit, such assistance is considered a nonattest service under the "Nonattest Services" interpretation (ET sec 1.295) under the "Independence Rule" (ET sec. 1.200.001) of the AICPA Code of Professional Conduct. Before performing nonattest services, the auditor is required to establish and document in writing the auditor's understanding with the client regarding the objectives of the engagement, services to be performed, client's acceptance of its responsibilities, auditor's responsibilities, and any limitations of the engagement.

.A17 A draft of Form 5500 that is substantially complete includes the forms and schedules that could have a material effect, involving both qualitative and quantitative considerations, on the information in the financial statements and ERISA-required supplemental schedules.

Audit Risk Assessment and Response in an Audit of ERISA Plan Financial Statements (Ref: par. .18–.20)

.A18 Section 300, *Planning an Audit*, requires the auditor to establish an overall audit strategy that sets the scope, timing, and direction of the audit and that guides the development of the audit plan.[20] The audit plan should include a description of the nature and extent of planned risk assessment procedures as determined under section 315A; the nature, timing, and extent of planned further audit procedures at the relevant assertion level as determined under section 330; and other planned audit procedures that are required to be carried out so that the engagement complies with GAAS.[21]

[20]Paragraph .07 of section 300, *Planning an Audit*.

.A19 Obtaining an understanding of the plan and its environment, the applicable financial reporting framework, and its internal control, is a continuous, dynamic process of gathering, updating, and analyzing information throughout the audit. The auditor's understanding of the plan establishes a frame of reference for planning the audit and exercising professional judgment throughout the audit when the auditor does the following:

- Assesses the risks of material misstatement of the financial statements, including the related disclosures
- Determines materiality in accordance with section 320, *Materiality in Planning and Performing an Audit*
- Considers the appropriateness of the selection and application of accounting policies and the adequacy of financial statement disclosures
- Identifies areas for which special audit consideration may be necessary
- Develops expectations for use when performing analytical procedures
- Responds to the assessed risks of material misstatement, including designing and performing further audit procedures to obtain sufficient appropriate audit evidence
- Evaluates the sufficiency and appropriateness of audit evidence obtained[22]

[As amended, effective for audits of ERISA plan financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A20 SAS No. 145 requires the auditor to perform risk assessment procedures to provide a basis for the identification and assessment of risks of material misstatement at the financial statement and assertion levels.[23] The consideration of risks of material misstatement at the relevant assertion level for significant classes of transactions, account balances, and disclosures directly assists in determining the nature, timing, and extent of further audit procedures at the assertion level necessary to obtain sufficient appropriate audit evidence. [As amended, effective for audits of ERISA plan financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A21 Section 330 requires the auditor to design and perform further audit procedures whose nature, timing, and extent are based on, and are responsive to, the assessed risks of material misstatement at the relevant assertion level.[24]Further audit procedures consist of tests of the operating effectiveness of controls and substantive procedures. Additionally, section 330 requires the auditor to evaluate whether the overall presentation of the financial statements, including the related disclosures, is in accordance with the applicable financial reporting framework.[25]

---

[21]Paragraph .09 of section 300.

[22]Paragraph .A1 of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

[23]Paragraph .05 of section 315.

[24]Paragraph .06 of section 330.

.A22 ERISA Section 402 requires that EBPs be established and maintained pursuant to a written plan instrument. The IRC requires that the provisions in the plan document satisfy the requirements of the IRC; therefore, the plan provisions are required to be followed. The plan instrument for defined benefit pension plans and defined contribution pension plans is generally referred to as a plan document. Multiple documents for such plans, as well as health and welfare plans, may comprise the plan instrument. Among other requirements, for a plan to be qualified, the plan instrument must be in writing and communicated to employees. The terms of the plan instrument generally deal with matters such as eligibility of participants, entitlement to benefits, funding, plan amendments, operation and administration of plan provisions, identification of the plan's fiduciary, allocation of responsibilities among those who serve in a capacity as a fiduciary, and delegation of fiduciary duties in connection with the administration of the plan.

.A23 Management is responsible for determining that the plan's transactions that are presented and disclosed in the ERISA plan financial statements are in accordance with the plan instrument. Although some of the provisions of the plan instrument may not relate directly to accounts that are presented as financial statement account balances, they could affect matters such as disclosures, the tax qualified status of the plan, or the benefits that will be paid to participants when they become eligible for a distribution. For example, participant account balances are an accumulation of transactions and represent the amount that the participant is entitled to receive as a benefit payment. Overstated or understated participant account balances may result in errors in allocations or benefits paid to participants.

.A24 Participant data plays an important role in determining many of the account balances in the financial statements. The types of participant data that are tested in an ERISA plan audit will vary from plan to plan, depending upon the bases on which contributions, participant elections, participant allocations, and benefits are determined. In general, the data tested may include demographic data, such as birth date, marital status, date of hire, date of termination, and other demographic data that determines eligibility and vesting; payroll data, such as hours worked, earnings, and contributions to the plan; benefit data for participants receiving benefits; and participant elections for salary deferral percentage and investment elections. The procedures for testing payroll and participant data may be coordinated with those for plan contributions.

.A25 Many of the financial statement amounts in ERISA plan financial statements are determined from provisions specified in the plan instrument. For example, conditions relating to participation and eligibility provisions need to be met for employees to participate in the plan and receive contributions. Participation and eligibility provisions may be tested as part of the auditor's testing of contributions and individual participant accounts.

.A26 Other typical plan provisions include types of contributions and distributions, timing of the contributions, contribution limitations, investment of contributions, forms of distributions, benefit commencement dates, vesting and forfeitures, service requirements and credits, participant loans, transfers, and administration of plan.

[25] Paragraph .26 of section 330.

.A27 Because of the nature of ERISA plan engagements, it would be rare for the auditor, based upon the assessed risks of material misstatement at the relevant assertion level, not to test any relevant plan provisions.

.A28 Appendix A to this section provides some examples of plan provisions often included in a plan instrument by audit area.

Plan Tax Status (Ref: par. .21)

.A29 When plans are granted special tax status for the contributions and earnings on plan investments to be exempt from taxation (tax-exempt status), such plans are required to be designed and operated in accordance with IRC requirements in order to maintain their tax-exempt status. Accordingly, the plan's tax status is fundamental to the plan.

.A30 To determine if a plan is operating within the specific guidelines established by the plan instrument in accordance with the IRC, management is responsible for conducting certain nondiscrimination and other compliance tests, which are required to be performed at least annually, unless otherwise provided by the IRC.

.A31 The auditor's consideration of whether the plan has performed and passed, corrected, or intends to correct failures of relevant IRC compliance tests may include inquiry and inspection.

.A32 The AICPA Audit and Accounting Guide *Employee Benefit Plans* discusses the tax status of EBPs, including nondiscrimination and other operating tests for plan qualification.

Prohibited Transactions (Ref: par. .22–.24)

.A33 A party in interest is defined in Section 3(14) of ERISA. The AICPA Audit and Accounting Guide *Employee Benefit Plans* contains common examples of parties that may be related parties, parties in interest, or both.

.A34 Certain plan transactions with parties in interest are prohibited under Sections 406 and 407 of ERISA (referred to as *prohibited transactions*) and are required, without regard to their materiality, to be disclosed to the DOL in the plan's Form 5500 if they occur.

.A35 Evaluating whether identified prohibited transactions have been appropriately reported in the ERISA-required supplemental schedule is often performed in conjunction with reading the draft Form 5500 and performing procedures on the ERISA-required supplemental schedule as discussed in paragraphs .127–.135.

.A36 ERISA requires that all transactions with parties in interest (excluding any transactions exempted from prohibited transaction rules) be disclosed in the ERISA-required supplemental schedule without regard to their materiality. For example, information on all delinquent participant contributions are required to be reported on Schedule H of Form 5500. Large plans with delinquent participant contributions are required to attach a Schedule of Delinquent Participant Contributions. All other prohibited transactions are reported on the Schedule of Nonexempt Transactions.

Evaluation and Documentation (Ref: par. .25)

.A37 Paragraph .27 of this section requires the auditor to communicate to those charged with governance the reportable findings from the audit procedures performed relating to the plan provisions. Section 230[26] requires the auditor to prepare audit documentation that is sufficient to enable an experienced auditor, having no previous connection with the audit, to understand

a. the nature, timing, and extent of the audit procedures performed to comply with GAAS and applicable legal and regulatory requirements;

b. the results of the audit procedures performed and the audit evidence obtained; and

c. significant findings or issues arising during the audit, the conclusions reached thereon, and significant professional judgments made in reaching those conclusions.

Communication With Management or Those Charged With Governance (Ref: par. .27–.28)

.A38 The requirements of section 250 are designed to assist the auditor in identifying material misstatement of the financial statements due to noncompliance with laws and regulations. Section 250 requires the auditor to communicate with those charged with governance matters involving noncompliance with laws and regulations that come to the auditor's attention during the course of the audit, other than when the matters are clearly inconsequential, unless all those charged with governance are involved in management of the entity and aware of matters involving identified or suspected noncompliance already communicated by the auditor.[27]

.A39 Section 260[28] requires the auditor to communicate with those charged with governance significant findings or issues from the audit. Such communication includes findings or issues arising from the audit that are, in the auditor's professional judgment, significant and relevant to those charged with governance regarding their responsibility to oversee the financial reporting process. For an ERISA plan, this may include operational errors that have been identified by the auditor as part of the audit when testing the plan provisions of the plan instrument.

.A40 It is important for the plan administrator, as part of his or her fiduciary responsibilities, to be informed about reportable findings identified during the audit so that the plan administrator can decide whether to participate in the IRS or DOL correction programs, if applicable. The auditor may want to discuss his or her reportable findings with the plan administrator prior to the written communication so that the plan administrator can take corrective action in a timely manner.

.A41 For the purposes of communications with those charged with governance, section 260 requires the auditor to determine the appropriate person or persons within the entity's

---

[26]Paragraph .08 of section 230, *Audit Documentation*.

[27]Paragraph .21 of section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*.

[28]Paragraph .12 of section 260, *The Auditor's Communication With Those Charged With Governance*.

governance structure with whom to communicate. When the appropriate person or persons with whom to communicate is not clearly identifiable, the auditor and the engaging party may need to discuss and agree on the relevant persons within the entity's governance structure with whom the auditor will communicate.

.A42 For an ERISA plan, the appropriate person or persons with whom to communicate may not be clearly identifiable from the engagement circumstances. Some plans have a formal board of trustees (or other formal governing body), and others do not. For a single-employer employee benefit plan, the individual charged with governance may include the individual with the level of authority and responsibility equivalent to an audit committee, such as the named fiduciary, which is often the plan sponsor or an officer thereof; the sponsor's board of directors or audit committee; or a committee overseeing the activities of the employee benefit plan, such as the employee benefit committee, employee benefit administrative committee, employee benefit investment committee, plan administrator, or other responsible party.

.A43 Section 265 requires the auditor to communicate in writing to those charged with governance on a timely basis significant deficiencies and material weaknesses identified during the audit, including those that were remediated during the audit.[29] The auditor is required to communicate to management at an appropriate level of responsibility, on a timely basis, in writing or orally, other deficiencies in internal control identified during the audit that have not been communicated to management by other parties and that, in the auditor's professional judgment, are of sufficient importance to merit management's attention.[30]

.A44 For an ERISA plan, instances identified by the auditor in which the plan is not operating in accordance with the plan's provisions may be indicative of a deficiency in internal control at the plan. If this is the case, the auditor is required to communicate such deficiency in accordance with section 265 when, in the auditor's professional judgment, the deficiency is of such importance to merit management's attention.

.A45 The communication of reportable findings relating to audit work performed that involved the testing of plan provisions may describe the plan provision relating to the reportable finding and may provide more details, or an explanation, about the reportable finding and its effect on the financial statements, if any. When explaining the potential effect of the reportable finding, the auditor need not quantify those effects.

.A46 Written communication indicating that no reportable findings were identified during the audit is precluded by paragraph .28 because such a communication has the potential to be misunderstood or misused.

Procedures for an ERISA Section 103(a)(3)(C) Audit (Ref: par. .29–.35)

.A47 The ERISA Section 103(a)(3)(C) audit is unique to EBPs and, as set forth in this standard, is not considered a scope limitation under section 705. The ability of management

[29]Paragraph .11 of section 265, *Communicating Internal Control Related Matters Identified in an Audit*.

[30]Paragraph .12 of section 265.

to make this election is dependent on the qualifications of the institution preparing and certifying the investment information. However, if the institution is not qualified, the auditor is precluded from performing the ERISA Section 103(a)(3)(C) audit.

.A48 The nature of procedures necessary to evaluate management's assessment may vary depending upon the auditor's knowledge of the plan and types of investments held. In some instances, inquiry of management may be sufficient.

.A49 Implications for the audit, as discussed in paragraph .30, may include withdrawing from the audit when withdrawal is possible under applicable law or regulation or considering a change in the terms of the audit engagement in accordance with section 210A because the auditor is precluded from performing an ERISA Section 103(a)(3)(C) audit.

.A50 When planning and performing the audit procedures for an ERISA Section 103(a)(3)(C) audit, the materiality considerations apply to the financial statements as a whole.

.A51 A qualified institution may certify all plan activity. However, as discussed in paragraph .A8, the ERISA Section 103(a)(3)(C) audit and corresponding required procedures in paragraph .32 extend only to investment information certified by a qualified institution.

.A52 The certification and results of the procedures performed by the auditor in paragraphs .32–.33 are considered part of audit evidence relating to the certified investment information when determining whether the form of opinion required by paragraphs .98–.126 is appropriate.

.A53 Comparing involves agreeing or reviewing reconciliations of the certified investment information with the amounts included in the ERISA plan financial statements and related investment disclosures as well as the investment information included in the ERISA-required supplemental schedules. To the extent that the investment information in the ERISA plan financial statements and related disclosures and ERISA-required supplemental schedules cannot be agreed to or derived from the certified information, appropriate audit procedures would need to be performed on such information.

.A54 Additional procedures typically include further inquiry, which might result in additional testing. The auditor may want to consider the implications such additional procedures may have on the nature, timing, and extent of other audit procedures, including consideration for revisions to the engagement letter and risk assessment. Depending upon how the matter is resolved, the additional procedures may result in a modification to the auditor's opinion in accordance with section 705.

.A55 If the auditor becomes aware that the certified investment information has not been appropriately measured, presented, or disclosed and, therefore, the financial statements may not be prepared in accordance with the applicable financial reporting framework, it is important for the auditor to communicate the matter to management. It is management's responsibility to prepare the financial statements and disclosures in conformity with the applicable financial reporting framework and with the DOL Rules and Regulations for Reporting and Disclosure under ERISA. Management may request that the trustee or custodian recertify or amend the certification to exclude investments that are not appropriately measured or to reflect the appropriate investment valuation.

.A56 If the trustee or custodian amends the certification to exclude such investments from the certification, management is responsible for valuing such investments as of the plan year-end, and the auditor would need to perform audit procedures on the investments excluded from the certification.

.A57 If the certified information is inaccurate, incomplete, or otherwise unsatisfactory and the certification is not amended, management is still responsible for determining whether the financial statements and disclosures related to such investment information are prepared in accordance with the applicable financial reporting framework and in conformity with the DOL Rules and Regulations for Reporting and Disclosure under ERISA and may need to engage the auditor to perform audit procedures on such information.

.A58 Performing an ERISA Section 103(a)(3)(C) audit of ERISA plan financial statements does not eliminate the requirement for the auditor to plan and perform the audit in accordance with GAAS.

Written Representations (Ref: par. .36)

.A59 The AICPA Audit and Accounting Guide *Employee Benefit Plans* provides interpretative guidance on representations that may be appropriate when auditing ERISA plan financial statements. Section 725 requires specific written representations from management.[31]

.A60 Administering the plan is covered by ERISA Sections 401–404, which establish responsibilities and imposes restrictions on plan fiduciaries. ERISA Section 209 (29 USC 1027 *Retention of Records*) requires the maintenance of records by employers relating to individual benefit reporting. ERISA Section 107 (29 USC 1059 *Recordkeeping and Reporting Requirements*) provides general record retention requirements for EBPs. ERISA requires that records be maintained in sufficient detail to permit the benefits to be properly calculated and paid when due.

Forming an Opinion on the ERISA Plan Financial Statements (Ref: par. .37)

.A61 As described in section 200, a financial reporting framework is a set of criteria used to determine measurement, recognition, presentation, and disclosure of all material items appearing in the financial statements.

Qualitative Aspects of the Entity's Accounting Practices (Ref: par. .39)

.A62 Management makes a number of judgments about the amounts and disclosures in the ERISA plan financial statements.

.A63 Section 260 contains a discussion of the qualitative aspects of accounting practices.[32] In considering the qualitative aspects of the plan's accounting practices, the auditor may become aware of possible bias in management's judgments. The auditor may conclude

[31]Paragraph .07 of section 725, *Supplementary Information in Relation to the Financial Statements as a Whole*.

[32]See the appendix, "Qualitative Aspects of Accounting Practices," in section 260.

that the cumulative effect of a lack of neutrality, together with the effect of uncorrected misstatements, causes the financial statements as a whole to be materially misstated. Indicators of a lack of neutrality that may affect the auditor's evaluation of whether the financial statements as a whole are materially misstated include the following:

a. The selective correction of misstatements brought to management's attention during the audit

b. Possible management bias in the making of accounting estimates

.A64 Section 540A, *Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures*, addresses possible management bias in making accounting estimates. Indicators of possible management bias themselves do not constitute misstatements for purposes of drawing conclusions on the reasonableness of individual accounting estimates. They may, however, affect the auditor's evaluation of whether the financial statements as a whole are free from material misstatement.

.A65 *Accounting Policies Appropriately Disclosed in the ERISA Plan Financial Statements (Ref: par. 40*a). In evaluating whether the ERISA plan financial statements appropriately disclose the significant accounting policies selected and applied, the auditor's consideration may include matters such as the following:

- Whether the financial statements include all disclosures related to the significant accounting policies that are required by the applicable financial reporting framework
- Whether the information about the significant accounting policies that has been disclosed is relevant and therefore reflects how the recognition, measurement, and presentation criteria in the applicable financial reporting framework have been applied to classes of transactions, account balances, and disclosures in the financial statements in the particular circumstances of the plan's operations and its environment
- The clarity with which the significant accounting policies have been presented

.A66 *Information Presented in the Financial Statements Is Relevant, Reliable, Comparable, and Understandable (Ref: par. .40*d). Evaluating the understandability of the ERISA plan financial statements may include consideration of whether the information in the ERISA plan financial statements is presented in a manner that facilitates users' ability to identify necessary information. This may include whether the disclosures are appropriately labeled and cross-referenced.

Disclosure of the Effect of Material Transactions and Events on the Information Conveyed in the ERISA Plan Financial Statements (Ref: par. .40)

.A67 It is common for ERISA plan financial statements prepared in accordance with a general purpose framework to present a plan's net assets available for benefits and changes in net assets available for benefits. For defined benefit pension plans, the financial statements may also present accumulated plan benefits and changes in accumulated plan benefits. For defined benefit health and welfare plans, the financial statements may also present plan benefit obligations and changes in plan benefit obligations. Evaluating whether, in view of the applicable financial reporting framework, the financial statements provide adequate disclosures to enable the intended users to understand the effect of material transactions and events on (*a*) the plan's net assets available for benefits, (*b*) changes in net assets available for benefits, (*c*) accumulated plan benefits and changes in accumulated plan benefits (for defined benefit pension plans), and (*d*) plan benefit obligations and changes in plan benefit obligations (for defined benefit health and welfare plans) may include consideration of such matters as the following:

- The extent to which the information in the ERISA plan financial statements is relevant and specific to the circumstances of the plan
- Whether the disclosures are adequate to assist the intended users in understanding the following:
  - — The nature and extent of the plan's assets and liabilities arising from transactions or events that do not meet the criteria for recognition (or the criteria for derecognition) established by the applicable financial reporting framework
  - — The methods used and the assumptions and judgments made, and changes to them, that affect amounts presented or otherwise disclosed, including relevant sensitivity analyses

Evaluating Whether the ERISA Plan Financial Statements Achieve Fair Presentation (Ref: par. .41)

.A68 Some financial reporting frameworks acknowledge explicitly or implicitly the concept of fair presentation. As noted in section 200, a *fair presentation financial reporting framework*[33] not only requires compliance with the requirements of the framework but also acknowledges explicitly or implicitly that it may be necessary for management to provide disclosures beyond those specifically required by the framework.

.A69 The auditor's evaluation about whether the ERISA plan financial statements achieve fair presentation, considering both presentation and disclosure, is a matter of professional judgment. This evaluation takes into account such matters as the facts and circumstances of the plan, including changes thereto, based on the auditor's understanding of the plan and the audit evidence obtained during the audit. The evaluation also may include consideration, for example, of the disclosures needed to achieve a fair presentation arising from matters that could be material, such as the effect of evolving financial reporting requirements or the changing economic environment. In general, misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements as a whole.[34] [As amended, effective for audits of ERISA plan financial statements for periods ending on or after December 15, 2021, by SAS No. 138.]

[33]Paragraph .14 of section 200.

[34]See section 320.

.A70 Evaluating whether the ERISA plan financial statements achieve fair presentation may include, for example, discussions with management and those charged with governance about their views on why a particular presentation was chosen, as well as alternatives that may have been considered. The discussions may include, for example, the following:

- The degree to which the amounts in the ERISA plan financial statements are aggregated or disaggregated, and whether the presentation of amounts or disclosures obscures useful information, or results in misleading information
- Consistency with appropriate industry practice, or whether any departures are relevant to the entity's circumstances and therefore warranted

.A71 The auditor's professional judgment concerning the fairness of the presentation of the financial statements is applied within the context of the financial reporting framework. Without that framework, the auditor would have no consistent standard for evaluating the presentation of the following in the financial statements:

- Net assets available for benefits
- Accumulated plan benefits (for defined benefit pension plans)
- Plan benefit obligations (for defined benefit health and welfare plans)
- Changes in net assets available for benefits
- Changes in accumulated plan benefits (for defined benefit pension plans)
- Changes in plan benefit obligations (for defined benefit health and welfare plans)

Description of the Applicable Financial Reporting Framework (Ref: par. .42)

.A72 As explained in section 200, the preparation and fair presentation of the financial statements by management and, when appropriate, those charged with governance requires the inclusion of an adequate description of the applicable financial reporting framework in the financial statements.[35] That description is important because it advises users of the financial statements of the framework on which the financial statements are based.

.A73 The description may indicate that the financial statements have been prepared in accordance with that framework. Such a statement is appropriate only when the financial statements comply with all the requirements of that framework that are effective during the period covered by the financial statements.

.A74 Financial statements that are prepared in accordance with one financial reporting framework and that contain a note or supplementary statement reconciling the results to those that would be shown under another framework are not prepared in accordance with that other framework. This is because the financial statements do not include all the information in the manner required by that other framework.

[35] Paragraphs .A2–.A3 of section 200.

.A75 The financial statements may, however, be prepared in accordance with one applicable financial reporting framework and, in addition, describe in the notes to the financial statements the extent to which the financial statements comply with another framework. Such information may not be required by the applicable financial reporting framework but may be presented as part of the basic financial statements. As discussed in paragraph .97, such information is considered an integral part of the financial statements if it cannot be clearly differentiated and, accordingly, is covered by the auditor's opinion.

Form of Opinion

Fair Presentation (Ref: par. .46)

.A76 In some instances, the ERISA plan financial statements, although prepared in accordance with the requirements of a fair presentation framework, do not achieve fair presentation. When this is the case, it may be possible for management to include additional disclosures in the financial statements beyond those specifically required by the framework or, in unusual circumstances, to depart from a requirement in the framework in order to achieve fair presentation of the financial statements, which would be extremely rare.

.A77 The "Accounting Principles Rule" (ET sec. 1.320.001) of the AICPA Code of Professional Conduct states the following:

> A member shall not (1) express an opinion or state affirmatively that the financial statements or other financial data of any entity are presented in conformity with generally accepted accounting principles or (2) state that he or she is not aware of any material modifications that should be made to such statements or data in order for them to be in conformity with generally accepted accounting principles, if such statements or data contain any departure from an accounting principle promulgated by bodies designated by Council to establish such principles that has a material effect on the statements or data taken as a whole. If, however, the statements or data contain such a departure and the member can demonstrate that due to unusual circumstances the financial statements or data would otherwise have been misleading, the member can comply with the rule by describing the departure, its approximate effects, if practicable, and the reasons why compliance with the principle would result in a misleading statement.

Considerations Relating to Form 5500 Filing

Reading the Draft Form 5500 (Ref: par. .47–.49)

.A78 Paragraph .47 requires the auditor to obtain and read the draft Form 5500 prior to dating the auditor's report. Obtaining a draft Form 5500 prior to dating the auditor's report enables the auditor to resolve possible material inconsistencies and apparent material misstatements of facts with management on a timely basis. An agreement with management regarding when the Form 5500 will be filed may be helpful. A *misstatement of fact* is information contained in the Form 5500 unrelated to matters appearing in the audited ERISA plan financial statements that is incorrectly stated or presented.

Misstatements of fact may be identified by the auditor upon reading the draft Form 5500 for the purpose of identifying material inconsistencies, as discussed in paragraph .57.

.A79 Information in the draft Form 5500 may be relevant to an independent audit or the continuing propriety of the auditor's report. Information contained in the Form 5500 that conflicts with information contained in the audited ERISA plan financial statements is considered an inconsistency. A material inconsistency may raise doubt about the audit conclusions drawn from audit evidence previously obtained and, possibly, about the basis for the auditor's opinion on the ERISA plan financial statements.

.A80 Certain differences may exist between the Form 5500 Schedule H, *Financial Information*, and the ERISA plan financial statements. DOL rules and regulations require the notes to the ERISA plan financial statements to include an explanation of differences, if any, between the information contained in the separate ERISA plan financial statements and the net assets, liabilities, income, expense, and changes in net assets as required to be reported on the Form 5500 Schedule H. There are some differences that are not considered inconsistencies with Form 5500, for example, differences resulting from accruals recorded in the ERISA plan financial statements that are not reported in Form 5500 when Form 5500 is on a cash basis or benefits payable required to be reported on Form 5500 but not recorded in the ERISA plan financial statements. In contrast, a difference in investment categories may be due to a misclassification that may require correction in either the ERISA plan financial statements or Form 5500.

.A81 *Material Inconsistencies With the Draft Form 5500 Identified Prior to the Report Release Date That Require Revision of the Draft Form 5500 (Ref: par. .53)*. When management refuses to revise the information in the draft Form 5500, the auditor may base any decision on what further action to take on advice from the auditor's legal counsel.

.A82 *Material Inconsistencies Identified Subsequent to the Report Release Date (Ref: par. .54–.56)*. When revision of the information in Form 5500 is necessary after the report release date and management agrees to make the revision, the auditor's procedures may include reviewing the steps taken by management to ensure that individuals in receipt of the previously issued ERISA plan financial statements, the auditor's report thereon, and Form 5500 are informed of the need for revision.

.A83 When revision of information in the Form 5500 is necessary after the report release date but management refuses to make the revision, appropriate further actions by the auditor may include obtaining legal advice.

Material Misstatement of Fact (Ref: par. .57–.59)

.A84 When discussing an apparent material misstatement of fact in the draft Form 5500 with management, the auditor may not be able to evaluate the validity of some disclosures included within the draft Form 5500 and management's responses to the auditor's inquiries and may conclude that valid differences of judgment or opinion exist.

.A85 When the auditor concludes that there is a material misstatement of fact that management refuses to correct, appropriate further actions by the auditor may include obtaining legal advice from the auditor's legal counsel, withholding the auditor's report if such report has not been released, or withdrawing from the engagement when withdrawal is possible under applicable law or regulation.

Auditor's Report on ERISA Plan Financial Statements (Other Than for an ERISA Section 103(a)(3)(C) Audit) (Ref: par. .60–.82)

.A86 A written report encompasses reports issued in hard copy format and those using an electronic medium.

.A87 Exhibit A, "Illustrations of Auditor's Reports on Financial Statements of Employee Benefit Plans Subject to ERISA," contains illustrations of auditor's reports on financial statements for ERISA plans. With the exception of the "Opinion"[36] and "Basis for Opinion" sections, this section does not establish requirements for ordering the elements of the auditor's report. However, this section requires the use of specific headings, which are intended to assist in making auditor's reports that refer to audits that have been conducted in accordance with GAAS more recognizable, particularly in situations in which the elements of the auditor's report are presented in an order that differs from the illustrative auditor's reports in the exhibit to this section.

Title (Ref: par. .61 and .100)

.A88 Section 200 provides guidance on reporting when the auditor is not independent.[37]

Addressee (Ref: par. .62 and .101)

.A89 The auditor's report is normally addressed to those for whom the report is prepared. The report may be addressed to the entity whose financial statements are being audited or to those charged with governance. Occasionally, an auditor may be retained to audit the financial statements of an entity that is not a client; in such a case, the report may be addressed to the client and not to those charged with governance of the entity whose financial statements are being audited.

.A90 For ERISA plans, the report may be addressed to the plan or trust whose ERISA plan financial statements are being audited, the plan administrator or board of trustees, or participants and beneficiaries.

Auditor's Opinion (Ref: par. .64)

.A91 The auditor's report states, for example, that the auditor has "audited the financial statements of ABC Plan, an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), which comprise the statements of net assets available for benefits as of December 31, 20X1 and 20X2, and the related statement of changes in net assets available for benefits for the year ended December 31, 20X2, and the related notes to the financial statements."

---

[36]For an ERISA Section 103(a)(3)(C) audit this relates to the "Scope and Nature of the ERISA Section 103(a)(3)(C) Audit" section, the "Opinion" section, and the "Basis for Opinion" section of the report.

[37]Paragraph .A18 of section 200.

.A92 The identification of the title and the dates of, or periods covered by, each statement that the financial statements comprise may also be achieved by referencing the table of contents in a document bound with or accompanying the financial statements and auditor's report thereon.

.A93 When the auditor is aware that the audited financial statements will be included in a document that contains information in addition to the financial statements and the auditor's report thereon, the auditor may consider, if the form of presentation allows, identifying the page numbers on which the audited financial statements are presented. This helps users identify the financial statements to which the auditor's report relates.

.A94 When the auditor expresses an unmodified opinion, it is not appropriate to use phrases such as "with the foregoing explanation" or "subject to" in relation to the opinion because these suggest a conditional opinion or a weakening or modification of the opinion.

.A95 The auditor's opinion covers the complete set of ERISA plan financial statements, as defined by the applicable financial reporting framework. For example, in the case of many general purpose frameworks, the ERISA plan financial statements include statements of net assets available for benefits and a statement of changes in net assets available for benefits; for defined benefit pension plans, a statement of accumulated plan benefits and a statement of changes in accumulated plan benefits; and for a defined benefit health and welfare plan, a statement of benefit obligations and statement of changes in benefit obligations, including related notes. In some circumstances, additional or different statements, schedules, or information also might be considered to be an integral part of the ERISA plan financial statements.

.A96 The reports in exhibit A include example wording that may be used to replace the [...] based on the applicable financial reporting framework.

.A97 The title of the financial statements identified in the "Opinion" section (see paragraph .64*c*) describes the information that is the subject of the auditor's opinion. For example, in the case of ERISA plan financial statements prepared in accordance with U.S. GAAP, these may include statements of net assets available for benefits (and of accumulated plan benefits) as of the end of the period and the statement of changes in net assets available for benefits (and of changes in accumulated plan benefits) for the period then ended. For defined benefit pension plans, the accumulated plan benefits and changes in accumulated plan benefits may be presented in the notes to the financial statements. The notes to the financial statements are an integral part of the financial statements, so the auditor's opinion covers these amounts regardless of whether they are presented in separate statements or in the notes to the financial statements. Therefore, the auditor is not required to make specific reference to the benefit information in the opinion paragraph of the auditor's report when the benefit information is presented in the notes to the financial statements.

.A98 *Description of the applicable financial reporting framework and how it may affect the auditor's opinion (Ref: par. .66).* The identification of the applicable financial reporting framework in the auditor's opinion is intended to advise users of the auditor's report of the context in which the auditor's opinion is expressed; it is not intended to limit the evaluation required in paragraph .41. For example, the applicable financial reporting framework may be identified as accounting principles generally accepted in the United States of America or U.S. generally accepted accounting principles.

Basis for Opinion (Ref: par. .67 and .107)

.A99 The "Basis for Opinion" section provides important context about the auditor's opinion. Accordingly, this section requires the "Basis for Opinion" section to directly follow the "Opinion" section in the auditor's report.

.A100 The reference to the standards used conveys to the users of the auditor's report that the audit has been conducted in accordance with established standards. For example, the auditor's report may refer to auditing standards generally accepted in the United States of America or U.S. GAAS.

.A101 In accordance with section 200, the auditor does not represent compliance with GAAS in the auditor's report unless the auditor has complied with the requirements of section 200 and all other AU-C sections relevant to the audit.[38]

Relevant Ethical Requirements (Ref: par. .67c and .107c)

.A102 Section 200 explains that ethical requirements consist of the AICPA Code of Professional Conduct together with rules of state boards of accountancy and applicable regulatory agencies that are more restrictive.[39] When the AICPA Code of Professional Conduct applies, the auditor's other ethical responsibilities relate to the principles of professional conduct (ET sec. 0.300, *Principles of Professional Conduct*). ERISA Section 103(a)(3)(A) requires that the accountant retained by an employee benefit plan be "independent" for purposes of examining plan financial information and rendering an opinion on the financial statements schedules required to be contained in the annual report. The DOL has issued guidelines (29 CFR 2509.75-9) for determining when an auditor is independent for purposes of auditing and rendering an opinion on the annual report.

.A103 Relevant ethical requirements may exist in several different sources, such as ethical codes and additional rules and requirements within law and regulation. When independence and other relevant ethical requirements are contained in a limited number of sources, the auditor may choose to name the relevant sources (for example, the AICPA Code of Professional Conduct, when applicable, the rule or applicable regulation, or *Government Auditing Standards* promulgated by the Comptroller General of the United States) or may refer to a term that appropriately describes those sources.

Key Audit Matters (Ref: par. .69 and .109)

.A104 Section 210A requires the audit engagement letter or other suitable form of written agreement to include reference to the expected form and content of any reports to be issued by the auditor.[40]

[38] Paragraph .22 of section 200.

[39] Paragraph .A15 of section 200.

Responsibilities of Management for the Financial Statements (Ref: par. .70–.72 and .110–.112)

.A105 Section 200 explains the premise relating to the responsibilities of management and, when appropriate, those charged with governance on which an audit in accordance with GAAS is conducted.[41] Management and, when appropriate, those charged with governance accept responsibility for the preparation of the financial statements in accordance with the applicable financial reporting framework, including their fair presentation. Management also accepts responsibility for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. The description of management's responsibilities in the auditor's report includes reference to both of these responsibilities because it helps explain to users the premise on which an audit is conducted. Section 260 uses the term *those charged with governance* to describe the persons or organizations with responsibility for overseeing the plan, and provides a discussion about the diversity of governance structures among entities.

.A106 Management has additional responsibilities when arranging for an audit of ERISA plan financial statements due to the regulatory nature of such plans.

.A107 In some instances, a document containing the auditor's report may include a separate statement by management or those charged with governance regarding their responsibility for the preparation of the financial statements. Any elaboration in the auditor's report about the responsibilities of management or those charged with governance regarding the preparation of the financial statements, or reference to a separate statement by management or those charged with governance about such responsibilities if one is included in a document containing the auditor's report, may lead users to erroneously believe that the auditor is providing assurances about representations made by management or those charged with governance about their responsibility for financial reporting, internal control, and other matters that might be discussed in the management report.

Auditor's Responsibilities for the Audit of the Financial Statements (Ref: par. .73–.76 and .113–.118)

.A108 The description of the auditor's responsibilities as required by paragraphs .73–.76 or .113–.118 of this section may be tailored to reflect the specific nature of the plan.

.A109 *Objectives of the Auditor (Ref. par. .74 and .114).* The auditor's report explains that the objectives of the auditor are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes the auditor's opinion.[42] These objectives are

---

[40]Paragraph .10 of section 210A, *Terms of Engagement*.

[41]Paragraphs .05 and .A2 of section 200.

[42]For an ERISA Section 103(a)(3)(C) audit, the auditor's report explains that, except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of the auditor's report, the objectives of the auditor are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatements, whether due to fraud or error, and to issue an auditor's report that includes the auditor's opinion.

in contrast to management's responsibilities for the preparation and fair presentation of the financial statements.

.A110 Because the auditor's opinion is based on obtaining reasonable assurance, the auditor's report does not constitute a guarantee. Because of the inherent limitation of an audit, there is an unavoidable risk that some material misstatements of the financial statements may not be detected, even though the audit is properly planned and performed in accordance with GAAS. Accordingly, the subsequent discovery of a material misstatement of the financial statements resulting from fraud or error does not by itself indicate a failure to conduct an audit in accordance with GAAS.[43]

.A111 When the applicable financial reporting framework defines materiality differently from the definition in section 320, the auditor's report may need to reflect the definition or description of materiality from the applicable financial reporting framework.

Other Reporting Responsibilities (Ref: par. .78–.79)

.A112 In some circumstances, the auditor may have additional responsibilities to report on other matters that are supplementary to the auditor's responsibility under GAAS to report on the financial statements. The form and content of the "Other Reporting Responsibilities" section of the auditor's report described in paragraph .78 will vary depending on the nature of the auditor's other reporting responsibilities.

.A113 In some cases, the relevant law or regulation may require or permit the auditor to report on these other responsibilities within the auditor's report on the financial statements. In other cases, the auditor may be required or permitted to report on them in a separate report.

.A114 These other reporting responsibilities are addressed in a separate section of the auditor's report in order to clearly distinguish them from the auditor's responsibility under GAAS to report on the financial statements. When relevant, this section of the auditor's report may contain subheadings that describe the content of the other reporting responsibility paragraphs.

Signature of the Auditor (Ref: par. .80 and .124)

.A115 In certain situations, the auditor's report may be required by law or regulation to include the personal name and signature of the auditor, in addition to the auditor's firm.

.A116 The DOL's Rules and Regulations for Reporting and Disclosure under ERISA contain requirements for how the accountant's report is to be signed for filing with the DOL.

Auditor's Address (Ref: par. .81 and .125)

.A117 In the United States, the location of the issuing office is the city and state. In another country, it may be the city and country.

---

[43]Paragraph .A56 of section 200 and paragraph .10*d* of section 210A.

.A118 In accordance with 29 CFR 2520.103-1(b)(5)(i)(C) of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA, the auditor's report is required to indicate the city and state where it is issued.

Date of the Auditor's Report (Ref: par. .82 and .126)

.A119 Section 220A, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, requires that, on or before the date of the auditor's report, the engagement partner, through a review of the audit documentation and discussion with the engagement team, be satisfied that sufficient appropriate audit evidence has been obtained to support the conclusions reached and for the auditor's report to be issued.[44] When an engagement quality control review is performed, section 220A requires that the auditor's report not be released prior to the completion of the engagement quality control review.[45]

.A120 The date of the auditor's report informs the user of the auditor's report that the auditor has considered the effect of events and transactions of which the auditor became aware and that occurred up to that date. The auditor's responsibility for events and transactions after the date of the auditor's report is addressed in section 560.

.A121 Because the auditor's opinion is provided on the ERISA plan financial statements, and the financial statements are the responsibility of management, the auditor is not in a position to conclude that sufficient appropriate audit evidence has been obtained until evidence is obtained that all the statements and disclosures that the financial statements comprise have been prepared, and management has accepted responsibility for them.

Comparative Financial Statements (Ref: par. .85)

.A122 The level of information included for the prior periods in comparative financial statements is comparable with that of the financial statements of the current period.

.A123 Because the auditor's report on comparative financial statements applies to the financial statements for each of the periods presented, the auditor may express a qualified opinion or an adverse opinion, disclaim an opinion, use the ERISA Section 103(a)(3)(C) audit report, or include an emphasis-of-matter paragraph with respect to one or more financial statements for one or more periods while expressing a different auditor's opinion on one or more financial statements of another period presented.

.A124 ERISA requires a statement of assets and liabilities of the plan to be displayed in comparative form. This may be achieved by presenting the statement of net assets available for benefits in comparative form.

Updating the Report (Ref: par. .86)

.A125 An updated report on prior period financial statements is distinguished from a reissuance of a previous report.[46] When issuing an updated report, the information

[44]See paragraph .19 of section 220A, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, for further discussion.

[45]Paragraph .21 of section 220A.

considered by the continuing auditor is that which the auditor has become aware of during the audit of the current period financial statements. In addition, an updated report is issued in conjunction with the auditor's report on the current period financial statements.

Other Considerations Relating to Comparative Financial Statements (Ref: par. .86)

.A126 If one firm of independent auditors merges with another firm, and the new firm becomes the auditor of a former client of one of the two former firms, the new firm may accept responsibility and express an opinion on the financial statements for the prior periods, as well as on those for the current period. In such circumstances, paragraphs .85–.96 of this section apply. The new firm may indicate in the auditor's report or as part of the signature that a merger took place and may name the firm of independent auditors that was merged with it. If the new firm decides not to express an opinion on the prior period financial statements, the guidance for the reissuance of reports in section 560 would apply.

Written Representations (Ref: par. .91)

.A127 In the case of comparative financial statements, the written representations are requested for all periods referred to in the auditor's opinion because management needs to reaffirm that the written representations it previously made with respect to the prior period remain appropriate.

Opinion on Prior Period Financial Statements Different From Previous Opinion (Ref: par. .92)

.A128 When reporting on the prior period financial statements in connection with the current period's audit, the opinion expressed on the prior period financial statements may be different from the opinion previously expressed if, during the course of the audit of the current period, the auditor becomes aware of circumstances or events that materially affect the financial statements of a prior period. In some circumstances, the auditor may have additional reporting responsibilities designed to prevent future reliance on the auditor's previously issued report on the prior period financial statements.[47]

Prior Period Financial Statements Audited by a Predecessor Auditor (Ref: par. .94)

.A129 The predecessor auditor may be unable or unwilling to reissue the auditor's report on the prior period financial statements that have been restated. In this situation, provided that the auditor has audited the adjustments to the prior period financial statements, the auditor may include an other-matter paragraph[48] in the auditor's report indicating that the predecessor auditor reported on the financial statements of the prior period before restatement. In addition, if the auditor is engaged to audit the adjustments and obtains sufficient appropriate audit evidence to be satisfied about the appropriateness of the restatement, the auditor's report may also include the following paragraph within the other-matter paragraph:

---

[46] See section 560.

[47] See footnote 46.

[48] See section 706.

As part of our audit of the 20X2 financial statements, we also audited the adjustments described in Note X that were applied to restate the 20X1 financial statements. In our opinion, such adjustments are appropriate and have been properly applied. We were not engaged to audit, review, or apply any procedures to the 20X1 financial statements of the Plan other than with respect to the adjustments and, accordingly, we do not express an opinion or any other form of assurance on the 20X1 financial statements as a whole.

Prior Period Financial Statements Not Audited (Ref: par. .95–.96)

.A130 When the auditor is auditing a plan that previously was not subject to audit, section 510 applies.

.A131 The following is an example of an other-matter paragraph when a review was performed on the prior period financial statements:

Other Matter

The 20X1 financial statements were reviewed by us (other accountants) and our (their) report thereon, dated March 1, 20X2, stated we (they) were not aware of any material modifications that should be made to those statements for them to be in accordance with accounting principles generally accepted in the United States of America. A review is substantially less in scope than an audit and does not provide a basis for the expression of an opinion on the financial statements as a whole.

.A132 The following is an example of an other-matter paragraph when a compilation was performed on the prior period financial statements:

Other Matter

We (other accountants) performed a compilation engagement with respect to the 20X1 financial statements and our (their) report thereon, dated March 1, 20X2, stated we (they) did not audit or review those financial statements and, accordingly, express no opinion or other form of assurance on them.

.A133 If the prior period financial statements were not audited, reviewed, or compiled, the following is an example of an other-matter paragraph:

Other Matter

The accompanying statement of net assets available for benefits of XYZ Plan as of December 31, 20X1, and the related statement of changes in net assets available for benefits for the year then ended were not audited, reviewed, or compiled by us and, accordingly, we do not express an opinion or any other form of assurance on them.

Information Presented in the Financial Statements (Ref: par. .97)

.A134 In some circumstances, the plan may be required by law, regulation, or standards, or may voluntarily choose, to include in the basic financial statements information that is not required by the applicable financial reporting framework. The auditor's opinion covers information that cannot be clearly differentiated from the financial statements because of its nature and how it is presented.

.A135 ERISA requires certain items to be disclosed in the notes to the financial statements that may not also be required to be disclosed by the applicable financial reporting framework. Appendix A of the AICPA Audit and Accounting Guide *Employee Benefit Plans* contains a list of the disclosure items required by ERISA.

.A136 If the information included in the basic financial statements is not required by the applicable financial reporting framework and is not necessary for fair presentation but is clearly differentiated, then such information may be identified as *unaudited* or as *not covered by the auditor's report*.

Auditor's Report for an ERISA Section 103(a)(3)(C) Audit (Ref: par. .98–.126)

.A137 ERISA requires certain comparative financial statements to be presented; therefore, paragraphs .85–.96 apply even when performing an ERISA Section 103(a)(3)(C) audit.

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit (Ref: par. .103)

.A138 The auditor's report states, for example, that the auditor has "performed audits of the financial statements of ABC 401(k) Plan, an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits as of December 31, 20X1 and 20X2, and the related statement of changes in net assets available for benefits for the year ended December 31, 20X2, and the related notes to the financial statements."

.A139 Management may also elect to have an ERISA Section 103(a)(3)(C) audit when management has elected to file its audited financial statements in accordance with 29 CFR 2520.103-12 of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA. In such circumstances, the report wording may need to be changed to reflect the circumstances of the engagement.

.A140 In accordance with ERISA, insurance entities may provide benefits under the plan or hold plan assets. Accordingly, the wording in the "Scope and Nature of the ERISA Section 103(a)(3)(C) Audit" section in paragraph .103*g* and the opinion in paragraph .104*b* may need to be revised.

Modifications to the Opinion (Ref: par. .119)

.A141 As discussed in paragraphs .A13 and .A47, an ERISA Section 103(a)(3)(C) audit is unique to EBPs and is not considered a scope limitation as discussed in section 705.

.A142 When performing an ERISA Section 103(a)(3)(C) audit, the auditor may encounter situations in which the financial statements are materially misstated or a limitation on the scope of the audit exists. For example, if the plan has not maintained sufficient accounting records and supporting documents and the auditor is unable to apply certain auditing procedures, the auditor may need to disclaim an opinion on the ERISA plan financial statements and ERISA-required supplemental schedules.

Other Reporting Responsibilities (Ref: par. .122–.123)

.A143 In some circumstances, the auditor may have additional responsibilities to report on other matters that are supplementary to the auditor's responsibility under GAAS to report on the financial statements. The form and content of the "Other Reporting Responsibilities" section of the auditor's report described in paragraph .123 will vary depending on the nature of the auditor's other reporting responsibilities.

.A144 In some cases, the relevant law or regulation may require or permit the auditor to report on these other responsibilities within the auditor's report on the financial statements. In other cases, the auditor may be required or permitted to report on them in a separate report.

.A145 These other reporting responsibilities are addressed in a separate section of the auditor's report in order to clearly distinguish them from the auditor's responsibility under GAAS to report on the financial statements. When relevant, this section of the auditor's report may contain subheadings that describe the content of the other reporting responsibility paragraphs.

Reporting on Supplemental Schedules (Ref: par. .127–.135)

.A146 According to 29 CFR 2520.103-10, the administrator of a plan filing an annual report pursuant to ERISA Section 2520.103-1(a)(2) should, as provided in the instructions to Form 5500, include as part of the annual report certain separate financial schedules.

.A147 Such schedules are required to be attached to the Form 5500 filing.[49]These schedules are covered by the auditor's report on whether such ERISA-required supplemental schedules are fairly stated, in all material respects, in relation to the financial statements as a whole, in accordance with section 725. Form 5500 is updated annually and, therefore, Form 5500 contains the most current information about the required schedules.

.A148 The requirements in paragraphs .129–.135 apply only to the ERISA-required supplemental schedules, as applicable. When supplementary information that is not required by ERISA accompanies the financial statements, the auditor may also be engaged to report on whether the supplementary information not required by ERISA is fairly stated, in all material respects, in relation to the financial statements as a whole. In such circumstances, the auditor is required to follow the requirements in section 725 in its entirety, and the requirements in paragraphs .129–.135 of this section do not apply.

[49]Appendix A of the AICPA Audit and Accounting Guide *Employee Benefit Plans* provides a listing of the required ERISA schedules.

This may result in the inclusion of a separate section (as required by paragraph .129) or an other-matter paragraph (as required by paragraph .132) in the auditor's report, as applicable, relating to the ERISA-required supplemental schedules and a separate section relating to the other supplementary information accompanying the ERISA plan financial statements presented in accordance with section 725. [As amended, effective for audits of ERISA plan financial statements for periods ending on or after December 15, 2021, by SAS No. 140.]

Errors, Omissions, or Inconsistencies in ERISA-Required Supplemental Schedules

.A149 When the auditor concludes, on the basis of the procedures performed, that the ERISA-required supplemental schedules are materially misstated in relation to the financial statements as a whole, section 725 requires the auditor to discuss the matters with management and propose appropriate revision of the ERISA-required supplemental schedules. If management does not revise the ERISA-required supplemental schedules, the auditor is required to modify the auditor's opinion on the ERISA-required supplemental schedules and describe the misstatement in the auditor's report. If a separate report is being issued on the ERISA-required supplemental schedules, the auditor is required to withhold the auditor's report on the supplemental schedules.[50]

.A150 During the audit, the auditor may become aware of a departure from DOL requirements relating to the ERISA-required supplemental schedules that is not also a departure from the applicable financial reporting framework. In such circumstances, the auditor may consider including an additional discussion in the ERISA-required supplemental schedules section of the auditor's report (or for an ERISA Section 103(a)(3)(C) audit, the other-matter paragraph relating to the ERISA-required supplemental schedules) that describes the error, omission, or inconsistency. When the departure relates to a prohibited transaction with a party in interest, see paragraphs .22–.24.

.A151 When the auditor concludes that the supplemental schedules do not contain all required information or contain information that is inaccurate or inconsistent with the ERISA plan financial statements and the omission or inconsistency is not considered a material misstatement, the auditor may decide to include a discussion in the ERISA-required supplemental schedules section of the auditor's report (or for an ERISA Section 103(a)(3)(C) audit, the other-matter paragraph relating to the ERISA-required supplemental schedules) that describes the omission or inconsistency of the information.

.A152 Departures from the DOL requirements relating to the ERISA-required supplemental schedules includes omitted required information, information that is inaccurate or inconsistent with the ERISA plan financial statements, or an omitted ERISA-required supplemental schedule.

[50]Paragraph .13 of section 725.

Appendix A — Examples of Plan Provisions by Audit Area (Not All-Inclusive)

.A153

Paragraph .20 of this section requires the auditor to consider relevant plan provisions that affect the risk of material misstatement at the relevant assertion level for significant classes of transactions, account balances, and disclosures when designing and performing audit procedures. The relevant plan provisions will vary for each type of plan and the circumstances of each engagement. When designing audit procedures, the testing of relevant plan provisions may be coordinated among the various audit areas to which they relate.

The following are some examples of plan provisions often included in a plan instrument by audit area (this list is not all-inclusive).

- *Individual Participant Accounts*
  - — Participation and eligibility requirements
  - — Types of contributions and distributions
  - — Timing of contributions
  - — Contribution limitations
  - — Investment of contributions
  - — Allocations to participant accounts
  - — Forms of distributions
  - — Benefit commencement dates
  - — Vesting and forfeitures
  - — Service requirements and credits
  - — Participant loans
  - — Transfers
  - — Administration of the plan
- *Contributions and Contributions Receivable*
  - — Participation and eligibility requirements
  - — Types of contributions
  - — Timing of contributions
  - — Contribution limitations

  - Investment of contributions
  - Use of forfeitures
  - Service requirements and credits
  - Allocations to participant accounts
- *Distributions and Related Obligations*
  - Eligibility requirements (distributable events)
  - Types of distributions
  - Forms of distribution
  - Benefit commencement dates
  - Determination of benefits
  - Vesting
  - Service requirements and credits
  - Allocations to participant accounts
- *Claims* (in a health and welfare plan)
  - Eligibility requirements
  - Types of claims
  - Claims coverage
  - Determination of claims
- *Loans to Participants*
  - Eligibility requirements
  - Loan terms
  - Allocations to participant accounts
- *Investments and Investment Income*
  - Investment of contributions
  - Administrative provisions
  - Direction of investments
  - Allocations to participant accounts
- *Expenses*
  - Administrative provisions

— Allocations to participant accounts

[As amended, effective for audits of ERISA plan financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Illustration 6 — An Auditor's Report Containing a Disclaimer of Opinion, Due to the Auditor's Inability to Obtain Sufficient Appropriate Audit Evidence Because the Plan Has Not Maintained Sufficient Accounting Records, on Financial Statements of a Defined Contribution Retirement Plan Subject to ERISA When the Auditor Has Performed an ERISA Section 103(a)(3)(C) Audit

Illustration 1 — An Auditor's Report on Financial Statements for a Defined Contribution Retirement Plan Subject to ERISA

Circumstances include the following:

- Audit of a complete set of general purpose financial statements for a 401(k) plan subject to ERISA (comparative statements of net assets available for benefits and a single-year statement of changes in net assets available for benefits).
- Management is responsible for the preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America as promulgated by the Financial Accounting Standards Board.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210A, *Terms of Engagement*.
- The auditor has concluded that an unmodified (that is, "clean") opinion on the ERISA plan financial statements is appropriate based on the audit evidence obtained.
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events, considered in the aggregate, that raise substantial doubt about the plan's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- The auditor has not been engaged to communicate key audit matters.
- The report on the ERISA-required supplemental schedules is presented as a separate section in accordance with paragraphs .129–.130. The auditor has concluded that the information in the ERISA-required supplemental schedules is fairly stated, in all material respects, in relation to the financial statements as a whole, and the form and content are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

Independent Auditor's Report

[*Appropriate Addressee*]

Opinion

We have audited the financial statements of ABC 401(k) Plan, an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), which comprise the statements of net assets available for benefits as of December 31, 20X2 and 20X1, and the related statement of changes in net assets available for benefits for the year ended December 31, 20X2, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the net assets available for benefits of ABC 401(k) Plan as of December 31, 20X2 and 20X1, and the changes in its net assets available for benefits for the year ended

December 31, 20X2, in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC 401(k) Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC 401(k) Plan's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC 401(k) Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC 401(k) Plan's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Supplemental Schedules Required by ERISA

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedules of [*identify title of supplemental schedules and periods covered*] are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, including their form and content, are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion, the information in the accompanying schedules is fairly stated, in all material respects, in relation to the financial statements as a whole, and the form and content are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

[*Signature of the auditor's firm*]

[*Date of the auditor's report*]

Illustration 2 — An Auditor's Report on Financial Statements for a Defined Benefit Pension Plan Subject to ERISA

Circumstances include the following:

- Audit of a complete set of general purpose financial statements for a defined benefit pension plan subject to ERISA (comparative statements of net assets available for benefits and accumulated plan benefits [end-of-year benefit information date] and a single-year statement of changes in net assets available for benefits and changes in accumulated plan benefits).
- The information regarding the actuarial present value of accumulated plan benefits and changes therein is presented in separate statements within the financial statements (paragraph .A91 provides guidance when the accumulated plan benefit information is presented in the notes to the financial statements).
- Management is responsible for the preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America as promulgated by Financial Accounting Standards Board.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210A, *Terms of Engagement*.
- The auditor has concluded that an unmodified (that is, "clean") opinion on the ERISA plan financial statements is appropriate based on the audit evidence obtained.
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- The auditor has not been engaged to communicate key audit matters.
- The report on the ERISA-required supplemental schedules is presented as a separate section in accordance with paragraphs .129–.130. The auditor has concluded that the information in the ERISA-required supplemental schedules is fairly stated, in all material respects, in relation to the financial statements as a whole, and the form and content are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

<u>Independent Auditor's Report</u>

[*Appropriate Addressee*]

Opinion

We have audited the financial statements of XYZ Pension Plan, an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), which comprise the statements of net assets available for benefits and of accumulated plan benefits as of December 31, 20X2 and 20X1, and the related statements of changes in net assets available for benefits and of changes in accumulated plan benefits for the year ended December 31, 20X2, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the net assets available for benefits and accumulated plan benefits of XYZ Pension Plan as of December 31, 20X2 and 20X1, and the changes in its net assets available for benefits and changes in its accumulated plan benefits for the year ended December 31, 20X2, in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of XYZ Pension Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC 401(k) Plan ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than

for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of XYZ Pension Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about XYZ Pension Plan's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Supplemental Schedules Required by ERISA

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedules of [*identify title of supplemental schedules and periods covered*] are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, including their form and content, are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion, the information in the accompanying schedules is fairly stated, in all material respects, in relation to the financial statements as a whole, and the form and content are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

[*Date of the auditor's report*]

Illustration 3 — An Auditor's Report on Financial Statements for a Defined Contribution Retirement Plan Subject to ERISA When Management Elects an ERISA Section 103(a)(3)(C) Audit

Circumstances include the following:

- Management elected an ERISA Section 103(a)(3)(C) audit, as permitted by Code of Federal Regulations (CFR), *Labor*, Title 29, Section 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.[1]
- The auditor performed an ERISA Section 103(a)(3)(C) audit of a complete set of general purpose financial statements for a 401(k) plan subject to ERISA (comparative statements of net assets available for benefits and a single-year statement of changes in net assets available for benefits).
- Management is responsible for the preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America, as promulgated by Financial Accounting Standards Board.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210A, *Terms of Engagement*.
- There are no limitations on the scope of the audit, and the auditor has not identified any material misstatements of the ERISA plan financial statements.
- The auditor has concluded that the ERISA Section 103(a)(3)(C) report is appropriate based on the audit evidence obtained.
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events, considered in the aggregate, that raise substantial doubt about the plan's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- The auditor has not been engaged to communicate key audit matters.
- The report on the ERISA-required supplemental schedules is presented as an other-matter paragraph in accordance with paragraph .132. The auditor has concluded that the form and content of the supplemental schedules, other than the information in the supplemental schedules that agreed to or is derived from the certified investment information, is presented, in all material respects, in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. The information in the supplemental schedules related to assets held by and certified to by a qualified institution agreed to or is derived from, in all material respects, the

[1]Although not as common, an ERISA Section 103(a)(3)(C) audit may relate to the audit of a 103-12 entity as permitted by 29 CFR 2520.103-12. Accordingly, the wording in this illustrative report may need to be revised to fit the circumstances of the engagement.

information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Independent Auditor's Report

[*Appropriate Addressee*]

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed audits of the financial statements of ABC 401(k) Plan, an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits as of December 31, 20X2 and 20X1, and the related statement of changes in net assets available for benefits for the year ended December 31, 20X2, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of ABC 401(k) Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of December 31, 20X2 and 20X1, and for the year ended December 31, 20X2, stating that the certified investment information, as described in Note X to the financial statements, is complete and accurate.[2]

Opinion

In our opinion, based on our audits and on the procedures performed as described in the Auditor's Responsibilities for the Audit of the Financial Statements section

- the amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.
- the information in the accompanying financial statements related to assets held by[3] and certified to by a qualified institution agrees to, or is derived from, in all material

[2]If the note to the financial statements does not identify the names of the qualified certifying institutions and periods covered, then such information may be included in the auditor's report.

respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC 401(k) Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC 401(k) Plan's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal

[3]This sentence may need to be modified when the certification is provided by an insurance entity, which provides benefits under the plan or holds plan assets.

control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the ABC 401(k) Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC 401(k) Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Other Matter — Supplemental Schedules Required by ERISA

The supplemental schedules of [*identify the title of supplemental schedules and periods covered*] are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information included in the supplemental schedules, other than that agreed to or derived from the certified investment information, has been subjected to auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS. For information included in the supplemental schedules that agreed to or is derived from the certified investment information, we compared such information to the related certified investment information.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, other than the information agreed to or derived from the certified investment information, including their form and content, are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion

- the form and content of the supplemental schedules, other than the information in the supplemental schedules that agreed to or is derived from the certified investment information, are presented, in all material respects, in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.
- the information in the supplemental schedules related to assets held by[4] and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

[4]See footnote 3.

Illustration 4 — An Auditor's Report Containing a Qualified Opinion on Financial Statements for a Defined Contribution Retirement Plan Subject to ERISA When Management Elects an ERISA Section 103(a)(3)(C) Audit

Circumstances include the following:

- Management elected an ERISA Section 103(a)(3)(C) audit, as permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.[5]
- The auditor performed an ERISA Section 103(a)(3)(C) audit of a complete set of general purpose financial statements for a 401(k) plan subject to ERISA (comparative statements of net assets available for benefits and a single-year statement of changes in net assets available for benefits).
- Management is responsible for the preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America, as promulgated by Financial Accounting Standards Board.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210A, *Terms of Engagement*.
- The financial statements have inadequate disclosures. The auditor has concluded that (*a*) it is not practicable to present the required information, and (*b*) the effects are such that an adverse opinion is not appropriate. Accordingly, the auditor's report contains a qualified ERISA Section 103(a)(3)(C) audit opinion. [Note: For this example, the form of modified opinion is appropriate in the circumstances; however, generally, the DOL will reject Form 5500 filings that contain modified opinions.]
- There are no limitations on the scope of the audit.
- The auditor has concluded that a qualified ERISA Section 103(a)(3)(C) report is appropriate based on the audit evidence obtained.
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events, considered in the aggregate, that raise substantial doubt about the plan's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- The auditor has not been engaged to communicate key audit matters.
- The report on the ERISA-required supplemental schedules is presented as an other-matter paragraph in accordance with paragraph .132. The auditor has concluded that the qualification has an effect on the supplemental schedules because it is information also required by DOL Rules and Regulations for Reporting and Disclosure under

[5] See footnote 1.

ERISA. The auditor has included a discussion in the other-matter paragraph that describes the matter as discussed in paragraph .A151 of this section.

Independent Auditor's Report

[*Appropriate Addressee*]

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed audits of the financial statements of ABC 401(k) Plan, an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits as of December 31, 20X2 and 20X1, and the related statement of changes in net assets available for benefits for the year ended December 31, 20X2, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of ABC 401(k) Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of December 31, 20X2 and 20X1, and for the year ended December 31, 20X2, stating that the certified investment information, as described in Note X to the financial statements, is complete and accurate.[6]

Qualified Opinion

In our opinion, except for the omission of the information described in the Basis for Qualified Opinion section of our report, based on our audits and on the procedures performed as described in the Auditor's Responsibilities for the Audit of the Financial Statements section

- the amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.
- the information in the accompanying financial statements related to assets held by[7] and certified to by a qualified institution agrees to, or is derived from, in all material

[6]See footnote 2.

respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for Qualified Opinion

ABC 401(k) Plan's financial statements do not disclose [*describe the nature of the omitted information that is not practicable to present in the auditor's report*]. In our opinion, disclosure of this information is required by accounting principles generally accepted in the United States of America.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC 401(k) Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC 401(k) Plan's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is

[7] See footnote 3.

not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC 401(k) Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC 401(k) Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Other Matter — Supplemental Schedules Required by ERISA

The supplemental schedules of [*identify title of supplemental schedules and periods covered*] are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information included in the supplemental schedules, other than that agreed to or derived from the certified investment information, has been subjected to auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS. For information included in the supplemental schedules that agreed to or is derived from the certified investment information, we compared such information to the related certified investment information.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, other than the information agreed to or derived from the certified investment information, including their form and content, are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

Schedule [*identify supplemental schedule*] that accompanies ABC 401(k) Plan's financial statements does not disclose [*describe the nature of the omitted information*]. Disclosure of this information is required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion, except for the effects of [*describe the nature of the omitted information*] as described in the Basis for Qualified Opinion section, on Schedule [*identify the schedule*]

- the form and content of the supplemental schedules, other than the information in the supplemental schedules that agreed to or is derived from the certified investment information, are presented, in all material respects, in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.
- the information in the supplemental schedules related to assets held by[8] and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

[*Signature of the auditor's firm*]

[*City and state where the auditor's report is issued*]

[*Date of the auditor's report*]

[8] See footnote 3.

Illustration 5 — An Auditor's Report Containing an Adverse Opinion on Financial Statements for a Defined Contribution Retirement Plan Subject to ERISA When Management Elects an ERISA Section 103(a)(3)(C) Audit

Circumstances include the following:

- Management elected an ERISA Section 103(a)(3)(C) audit, as permitted by 29 CFR 2520.103-8 of the Department of Labor's (DOL) Rules and Regulations for Reporting and Disclosure under ERISA.[9]
- The auditor performed an ERISA Section 103(a)(3)(C) audit of a complete set of general purpose financial statements for a 401(k) plan subject to ERISA (comparative statements of net assets available for benefits and a single-year statement of changes in net assets available for benefits).
- Management is responsible for the preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America, as promulgated by Financial Accounting Standards Board.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210A, *Terms of Engagement*.
- The financial statements are materially misstated. The material misstatement is deemed to be pervasive to the financial statements. Accordingly, the auditor's report contains an adverse opinion. The effects of the misstatement on the financial statements have not been determined because it was not practicable to do so. [Note: For this example, the form of modified opinion is appropriate in the circumstances; however, generally, the DOL will reject Form 5500 filings that contain modified opinions.]
- There are no limitations on the scope of the audit.
- The auditor has concluded that an adverse ERISA Section 103(a)(3)(C) report is appropriate based on the audit evidence obtained.
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events, considered in the aggregate, that raise substantial doubt about the plan's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- The auditor is precluded from communicating key audit matters when issuing an adverse opinion.
- The report on the ERISA-required supplemental schedules is presented as an other-matter paragraph in accordance with paragraph .132. Because the auditor has issued

[9]See footnote 1.

an adverse ERISA Section 103(a)(3)(C) audit opinion, the auditor is precluded from issuing an opinion on the supplemental schedules.

Independent Auditor's Report

[*Appropriate Addressee*]

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed audits of the financial statements of ABC 401(k) Plan, an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits as of December 31, 20X2 and 20X1, and the related statement of changes in net assets available for benefits for the year ended December 31, 20X2, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of ABC 401(k) Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of December 31, 20X2 and 20X1, and for the year ended December 31, 20X2, stating that the certified investment information, as described in Note X to the financial statements, is complete and accurate.[10]

Adverse Opinion

In our opinion, because of the significance of the matter described in the Basis for Adverse Opinion section of our report, the accompanying financial statements do not present fairly the net assets available for benefits of ABC 401(k) Plan as of December 31, 20X2 and 20X1, and the changes in net assets available for benefits for the year ended December 31, 20X2, in accordance with accounting principles generally accepted in the United States of America.

Basis for Adverse Opinion

As described in Note X, ABC 401(k) Plan [*describe the material misstatement of the financial statements*]. Under accounting principles generally accepted in the United States of America [*describe how the matter should have been accounted for in accordance with accounting*

[10]See footnote 2.

principles generally accepted in the United States of America]. The effects on the financial statements have not been determined.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC 401(k) Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our adverse ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC 401(k) Plan's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC 401(k) Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC 401(k) Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Other Matter — ERISA-Required Supplemental Schedules

The supplemental schedules of [*identify title of supplemental schedules and periods covered*] are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. Because of the significance of the matter described in the Basis for Adverse Opinion section of our report, it is inappropriate to and we do not express an opinion on the supplemental schedules referred to above.

[*Signature of the auditor's firm*]

[*City and state where the auditor's report is issued*]

[*Date of the auditor's report*]

Illustration 6 — An Auditor's Report Containing a Disclaimer of Opinion, Due to the Auditor's Inability to Obtain Sufficient Appropriate Audit Evidence Because the Plan Has Not Maintained Sufficient Accounting Records, on Financial Statements of a Defined Contribution Retirement Plan Subject to ERISA When Management Elects an ERISA Section 103(a)(3)(C) Audit

Circumstances include the following:

- Management elected an ERISA Section 103(a)(3)(C) audit, as permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.[11]
- The auditor was engaged to perform an ERISA Section 103(a)(3)(C) audit of a complete set of general purpose financial statements for a 401(k) plan subject to ERISA (comparative statements of net assets available for benefits and a single-year statement of changes in net assets available for benefits).
- Management is responsible for the preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210A, *Terms of Engagement*.
- There are no known material misstatements to the financial statements.
- The auditor was unable to obtain sufficient appropriate audit evidence for certain participant account balances that merged into the plan in 20XX. This is a limitation on the scope of the audit in accordance with section 705. The possible effects of this inability to obtain sufficient appropriate audit evidence are deemed to be both material and pervasive to the financial statements. Accordingly, the auditor's report contains a disclaimer of opinion. [Note: For this example, the form of modified opinion is appropriate in the circumstances; however, generally, the DOL will reject Form 5500 filings that contain modified opinions.]
- The auditor has concluded that a disclaimer of opinion relating to the ERISA Section 103(a)(3)(C) audit is appropriate based on the audit evidence obtained.
- The auditor is precluded from communicating key audit matters when issuing a disclaimer of opinion.
- A more limited description of the Auditor's Responsibilities section is required because of the disclaimer of opinion.
- The report on the ERISA-required supplemental schedules is presented as an other-matter paragraph in accordance with paragraph .132. Because the auditor

[11]See footnote 1.

has disclaimed an opinion on the ERISA plan financial statements, the auditor is precluded from issuing an opinion on the supplemental schedules.

Independent Auditor's Report

[*Appropriate Addressee*]

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We were engaged to perform audits of the financial statements of ABC 401(k) Plan, an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits as of December 31, 20X2 and 20X1, and the related statement of changes in net assets available for benefits for the year ended December 31, 20X2, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of ABC 401(k) Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of December 31, 20X2 and 20X1, and for the year ended December 31, 20X2, stating that the certified investment information, as described in Note X to the financial statements, is complete and accurate.[12]

Disclaimer of Opinion

We do not express an opinion on the accompanying financial statements of ABC 401(k) Plan. Because of the significance of the matter described in the Basis for Disclaimer of Opinion section of our report, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on the financial statements.

Basis for Disclaimer of Opinion

ABC 401(k) Plan does not have sufficient accounting records and supporting documents relating to certain participant account balances that merged into ABC 401(k) Plan in 20XX. Accordingly, we were unable to apply auditing procedures sufficient to determine the extent to which the accompanying financial statements may have been affected by these conditions.

[12]See footnote 2.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC 401(k) Plan's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Our responsibility is to conduct an audit of ABC 401(k) Plan's financial statements in accordance with auditing standards generally accepted in the United States of America and to issue an auditor's report. However, because of the matter described in the Basis for Disclaimer of Opinion section of our report, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on these financial statements.

We are required to be independent of ABC 401(k) Plan, and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits.

Other Matter — Supplemental Schedules Required by ERISA

The supplemental schedules of [*identify the title of supplemental schedules and periods covered*] are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. Because of the significance of the matter described in the Basis for Disclaimer of Opinion section, it is inappropriate to and we do not express an opinion on the supplemental schedules referred to above.

[*Signature of the auditor's firm*]

[*City and state where the auditor's report is issued*]

[*Date of the auditor's report*]

[Revised, January 2020, to reflect conforming changes necessary due to the issuance of SAS No. 138. As amended, effective for audits of ERISA plan financial statements for periods ending on or after December 15, 2021, by SAS No. 140.]

Exhibit B — Implementation Guidance for ERISA Section 103(a)(3)(C) Audits

.A155

ERISA requires a statement of assets and liabilities of the plan to be displayed in comparative form. Typically, a plan will present comparative statements of net assets available for benefits and a single-year statement of changes in net assets available for benefits (see paragraph .A95 for typical plan financial statements by type of plan). Accordingly, when this SAS is adopted, the auditor may be asked to perform an ERISA Section 103(a)(3)(C) audit for the current year when the auditor disclaimed an opinion on the financial statements in the prior year.

Paragraphs .A123–.A125 explain that because the auditor's report on comparative financial statements applies to the financial statements for each of the periods presented, the auditor may express a qualified opinion or an adverse opinion, disclaim an opinion, use the ERISA Section 103(a)(3)(C) audit report, or include an emphasis-of-matter paragraph with respect to one or more financial statements for one or more periods while expressing a different auditor's opinion on one or more financial statements of another period presented. Further, when issuing an updated report, the information considered by the continuing auditor is that which the auditor has become aware of during the audit of the current period financial statements. In addition, an updated report is issued in conjunction with the auditor's report on the current period financial statements.

The following illustration contains example reports for when the auditor has adopted this SAS for the first time and is performing an ERISA Section 103(a)(3)(C) audit for the current year and updating their audit from the prior year.

Illustration B-1 — Auditor's Reports on Financial Statements for a Defined Contribution Retirement Plan Subject to ERISA When Management Elects an ERISA Section 103(a)(3)(C) Audit in the Current Year (2020) and the Auditor Disclaimed an Opinion on the Financial Statements in the Prior Year (2019)

Circumstances include the following:

- Management elected an ERISA Section 103(a)(3)(C) audit for the 2020 plan financial statements, as permitted by Code of Federal Regulations (CFR), *Labor*, Title 29, Section 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.[1]
- The audit is for a complete set of general purpose financial statements for a 401(k) plan subject to ERISA that is presenting comparative statements of net assets

[1]Although not as common, an ERISA Section 103(a)(3)(C) audit may relate to the audit of a 103-12 entity as permitted by 29 CFR 2520.103-12. Accordingly, the wording in this illustrative report may need to be revised to fit the circumstances of the engagement.

available for benefits and a single-year statement of changes in net assets available for benefits.

- The auditor performed an ERISA Section 103(a)(3)(C) audit as of and for the year ended December 31, 2020.
- The auditor disclaimed an opinion on the prior year financial statements (for the year ended December 31, 2019).
- The auditor is issuing two separate reports.
- Management is responsible for the preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America, as promulgated by the Financial Accounting Standards Board.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210A, *Terms of Engagement*.
- There are no limitations on the scope of the audit for the current year, and the auditor has not identified any material misstatements of the ERISA plan financial statements in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*.
- The auditor has concluded that the ERISA Section 103(a)(3)(C) report is appropriate as of and for the year ended December 31, 2020 based on the audit evidence obtained.
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events, considered in the aggregate, that raise substantial doubt about the plan's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- The auditor has not been engaged to communicate key audit matters.
- The report on the ERISA-required supplemental schedules is presented as an other-matter paragraph for the year ended December 31, 2020.

Independent Auditor's Report

[*Appropriate Addressee*]

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed an audit of the financial statements of ABC 401(k) Plan, an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statement of net assets available for benefits as of December 31, 2020, and the related statement of changes in net assets available for benefits for the year then ended, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audit of ABC 401(k) Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audit need not extend to any statements or information related to assets held for investment of the plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained a certification from a qualified institution as of and for the year ended December 31, 2020, stating that the certified investment information, as described in Note X to the financial statements, is complete and accurate.[2]

Opinion

In our opinion, based on our audit and on the procedures performed as described in the Auditor's Responsibilities for the Audit of the Financial Statements section

- the amounts and disclosures in the financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.
- the information in the financial statements related to assets held by[3] and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

[2]If the note to the financial statements does not identify the names of the qualified certifying institutions and periods covered, then such information may be included in the auditor's report.

[3]This sentence may need to be modified when the certification is provided by an insurance entity, which provides benefits under the plan or holds plan assets.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC 401(k) Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC 401(k) Plan's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC 401(k) Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC 401(k) Plan's ability to continue as a going concern for a reasonable period of time.

Our audit did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Other Matter — Supplemental Schedules Required by ERISA

The supplemental schedules of [*identify the title of supplemental schedules and periods covered*] are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information included in the supplemental schedules, other than that agreed to or derived from the certified investment information, has been subjected to auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS. For information included in the supplemental schedules that agreed to or is derived from the certified investment information, we compared such information to the related certified investment information.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, other than the information agreed to or derived from the certified investment information, including their form and content, are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion

- the form and content of the supplemental schedules, other than the information in the supplemental schedules that agreed to or is derived from the certified investment information, are presented, in all material respects, in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.
- the information in the supplemental schedules related to assets held by[4] and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

[*Signature of the auditor's firm*]

[*City and state where the auditor's report is issued*]

[*Date of the auditor's report*]

[4]See footnote 3.

<u>Independent Auditor's Report</u>

[*Appropriate Addressee*]

We were engaged to audit the accompanying statement of net assets available for benefits of ABC 401(k) Plan, as of December 31, 2019, and the related notes to the financial statement.

Management's Responsibility for the Financial Statement

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of a financial statement that is free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on the 2019 financial statement based on conducting the audit in accordance with auditing standards generally accepted in the United States of America. Because of the matter described in the Basis for Disclaimer of Opinion paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note X, which was certified by ABC Bank, the trustee of the Plan, except for comparing such information with the related information included in the financial statement. We have been informed by the plan administrator that the trustee (or custodian) holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee (or custodian) as of December 31, 2019 that the information provided to the plan administrator by the trustee (or custodian) is complete and accurate.

Disclaimer of Opinion

Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on the 2019 financial statement. Accordingly, we do not express an opinion on the 2019 financial statement.

Report on Form and Content in Compliance With DOL Rules and Regulations for 2019 Financial Statement

The form and content of the information included in the 2019 financial statement, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

AU-C Section 705

Modifications to the Opinion in the Independent Auditor's Report

(Supersedes SAS No. 122 section 705.)

Source: SAS No. 134; SAS No. 137; SAS No. 141.

Effective for audits of financial statements for periods ending on or after December 15, 2021.

Note

In March 2023, the Accounting Standards Board issued Statement on Auditing Standards No. 149, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors and Audits of Referred-to Auditors)*, which contains amendments to this section.

The amendments are effective for audits of financial statements for periods ending on or after December 15, 2026, and can be viewed in appendix C of section 600 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility to issue an appropriate report in circumstances in which, in forming an opinion in accordance with section 700, *Forming an Opinion and Reporting on Financial Statements*, or section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, the auditor concludes that a modification to the auditor's opinion on the financial statements is necessary. This section also deals with how the form and content of the auditor's report is affected when the auditor expresses a modified opinion. In all cases, the reporting requirements in section 700 or section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, apply; those requirements are not repeated in this section unless they are explicitly addressed or amended by the requirements of this section.

Types of Modified Opinions

.02 This section establishes three types of modified opinions, namely, a qualified opinion, an adverse opinion, and a disclaimer of opinion. The decision regarding which type of modified opinion is appropriate depends on the following:

a. The nature of the matter giving rise to the modification, that is, whether the financial statements are materially misstated or, in the case of an inability to obtain sufficient appropriate audit evidence, may be materially misstated

b. The auditor's judgment about the pervasiveness of the effects or possible effects of the matter on the financial statements (Ref: par. .A1)

.03 Section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report*, and section 701, *Communicating Key Audit Matters in the Independent Auditor's Report*, address additional communications in the auditor's report that are not modifications to the auditor's opinion.

Effective Date

.04 This section is effective for audits of financial statements for periods ending on or after December 15, 2021. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 141.]

Objective

.05 The objective of the auditor is to express clearly an appropriately modified opinion on the financial statements that is necessary in the following circumstances:

a. The auditor concludes, based on the audit evidence obtained, that the financial statements as a whole are materially misstated.

b. The auditor is unable to obtain sufficient appropriate audit evidence to conclude that the financial statements as a whole are free from material misstatement.

Definitions

.06 For purposes of generally accepted auditing standards, the following terms have the meanings attributed as follows:

Modified opinion. A qualified opinion, an adverse opinion, or a disclaimer of opinion on the financial statements.

Pervasive. A term used, in the context of misstatements, to describe the effects on the financial statements of misstatements or the possible effects on the financial statements of misstatements, if any, that are undetected due to an inability to obtain sufficient appropriate audit evidence. Pervasive effects on the financial statements are those that, in the auditor's judgment,

- are not confined to specific elements, accounts, or items of the financial statements;
- if so confined, represent or could represent a substantial proportion of the financial statements; or
- regarding disclosures, are fundamental to users' understanding of the financial statements.

Requirements

Circumstances in Which a Modification to the Auditor's Opinion Is Required

.07 The auditor should modify the opinion in the auditor's report when

a. the auditor concludes that, based on the audit evidence obtained, the financial statements as a whole are materially misstated or (Ref: par. .A2–.A8)

b. the auditor is unable to obtain sufficient appropriate audit evidence to conclude that the financial statements as a whole are free from material misstatement. (Ref: par. .A9–.A13)

Determining the Type of Modification to the Auditor's Opinion

Qualified Opinion

.08 The auditor should express a qualified opinion in the following circumstances:

a. The auditor, having obtained sufficient appropriate audit evidence, concludes that misstatements, individually or in the aggregate, are material but not pervasive to the financial statements.

b. The auditor is unable to obtain sufficient appropriate audit evidence on which to base the opinion, but the auditor concludes that the possible effects on the financial statements of undetected misstatements, if any, could be material but not pervasive.

Adverse Opinion

.09 The auditor should express an adverse opinion when the auditor, having obtained sufficient appropriate audit evidence, concludes that misstatements, individually or in the aggregate, are both material and pervasive to the financial statements.

Disclaimer of Opinion

.10 The auditor should disclaim an opinion when the auditor is unable to obtain sufficient appropriate audit evidence on which to base the opinion, and the auditor concludes that the possible effects on the financial statements of undetected misstatements, if any, could be both material and pervasive. (Ref. par. .A14–.A15)

Consequence of an Inability to Obtain Sufficient Appropriate Audit Evidence Due to a Management-Imposed Limitation After the Auditor Has Accepted the Engagement

.11 If, after accepting the engagement, the auditor becomes aware that management has imposed a limitation on the scope of the audit that the auditor considers likely to result in the need to express a qualified opinion or to disclaim an opinion on the financial statements, the auditor should request that management remove the limitation.

.12 If management refuses to remove the limitation referred to in paragraph .11, the auditor should communicate the matter to those charged with governance, unless all of those charged with governance are involved in managing the entity,[1] and, if appropriate, determine whether it is possible to perform alternative procedures to obtain sufficient appropriate audit evidence.

.13 If the auditor is unable to obtain sufficient appropriate audit evidence, the auditor should determine the implications as follows:

a. If the auditor concludes that the possible effects on the financial statements of undetected misstatements, if any, could be material but not pervasive, the auditor should qualify the opinion.

b. If the auditor concludes that the possible effects on the financial statements of undetected misstatements, if any, could be both material and pervasive so that a qualification of the opinion would be inadequate to communicate the severity of the situation, the auditor should

    i. disclaim an opinion on the financial statements or

    ii. withdraw from the audit, when practicable. (Ref: par. .A16–.A17)

.14 If the auditor decides to withdraw from the audit in accordance with paragraph .13*b*ii, before doing so, the auditor should communicate to those charged with governance any matters regarding misstatements identified during the audit that would have given rise to a modification of the opinion. (Ref: par. .A17)

Other Considerations Relating to an Adverse Opinion or Disclaimer of Opinion

.15 When the auditor considers it necessary to express an adverse opinion or disclaim an opinion on the financial statements as a whole, the auditor's report should not also include an unmodified opinion with respect to the same financial reporting framework on a single financial statement or one or more specific elements, accounts, or items of a financial statement (piecemeal opinion). To include such an unmodified opinion in the same report[2] in these circumstances would contradict the auditor's adverse opinion or disclaimer of opinion on the financial statements as a whole. (Ref: par. .A18–.A19)

---

[1]Paragraph .09 of section 260, *The Auditor's Communication With Those Charged With Governance*.

[2]Section 805, *Special Considerations — Audits of Single Financial Statements and Specific Elements, Accounts, or Items of a Financial Statement*, addresses special considerations relevant to an audit of a single financial statement or of a specific element, account, or item of a financial statement.

Auditor Is Not Independent But Is Required by Law or Regulation to Report on the Financial Statements

.16 When the auditor is not independent but is required by law or regulation to report on the financial statements, the auditor should disclaim an opinion and should specifically state that the auditor is not independent. The auditor is neither required to provide, nor precluded from providing, the reasons for the lack of independence; however, if the auditor chooses to provide the reasons for the lack of independence, the auditor should include all the reasons therefor. (Ref: par. .A20)

Form and Content of the Auditor's Report When the Opinion Is Modified

Auditor's Opinion

.17 When the auditor modifies the audit opinion, the auditor should use the heading "Qualified Opinion," "Adverse Opinion," or "Disclaimer of Opinion," as appropriate, for the "Opinion" section. (Ref: par. .A21–.A23)

Qualified Opinion

.18 When the auditor expresses a qualified opinion due to a material misstatement in the financial statements, the auditor should state that, in the auditor's opinion, except for the effects of the matters described in the "Basis for Qualified Opinion" section of the auditor's report, the accompanying financial statements present fairly, in all material respects, […] in accordance with [*the applicable financial reporting framework*]. When the modification arises from an inability to obtain sufficient appropriate audit evidence, the auditor should use the corresponding phrase "except for the possible effects of the matters…" for the modified opinion. (Ref: par. .A24–.A25)

Adverse Opinion

.19 When the auditor expresses an adverse opinion, the auditor should state that, in the auditor's opinion, because of the significance of the matters described in the "Basis for Adverse Opinion" section of the auditor's report, the accompanying financial statements do not present fairly […] in accordance with [*the applicable financial reporting framework*].

Disclaimer of Opinion

.20 When the auditor disclaims an opinion due to an inability to obtain sufficient appropriate audit evidence, the auditor should do the following:

a. State that the auditor does not express an opinion on the accompanying financial statements.

b. State that, because of the significance of the matters described in the "Basis for Disclaimer of Opinion" section of the auditor's report, the auditor has not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on the financial statements.

c. Amend the statement required by paragraph .25*b* of section 700, or paragraph .64*b* of section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, as applicable, which indicates that the financial statements have been audited, to state that the auditor was engaged to audit the financial statements.

Basis for Opinion

.21 When the auditor modifies the opinion on the financial statements, the auditor should, in addition to including the specific elements required by section 700 or section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, do the following: (Ref: par. .A26)

a. Amend the heading "Basis for Opinion" required by paragraph .28 of section 700 or paragraphs .67 or .107 of section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, as applicable, to "Basis for Qualified Opinion," "Basis for Adverse Opinion," or "Basis for Disclaimer of Opinion," as appropriate.

b. Within this section of the auditor's report, include a description of the matter giving rise to the modification.

.22 If there is a material misstatement of the financial statements that relates to specific amounts in the financial statements (including quantitative disclosures), the auditor should include in the "Basis for Opinion" section a description and quantification of the financial effects of the misstatement, unless impracticable. If it is not practicable to quantify the financial effects, the auditor should state that in the "Basis for Opinion" section. (Ref: par. .A27–.A28)

.23 If there is a material misstatement of the financial statements that relates to qualitative disclosures, the auditor should include an explanation of how the disclosures are misstated in the "Basis for Opinion" section.

.24 If there is a material misstatement of the financial statements that relates to the omission of information required to be presented or disclosed, the auditor should do the following:

a. Discuss the omission of such information with those charged with governance.

b. Describe in the "Basis for Opinion" section the nature of the omitted information.

c. Include the omitted information, provided that it is practicable to do so and the auditor has obtained sufficient appropriate audit evidence about the omitted information. (Ref: par. .A29–.A30)

.25 If the modification results from an inability to obtain sufficient appropriate audit evidence, the auditor should include the reasons for that inability in the "Basis for Opinion" section. (Ref. par. .A31)

.26 When the auditor expresses a qualified or an adverse opinion, the auditor should amend the statement required by paragraph .28*d* of section 700 or paragraphs .67 or .107 of section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, as applicable, about whether the audit evidence obtained is sufficient and appropriate to provide a basis for the auditor's opinion, to include the word "qualified" or "adverse," as appropriate.

.27 When the auditor disclaims an opinion on the financial statements, the auditor's report should not include the elements required by paragraphs .28*b* and .28*d* of section 700 or paragraphs .67*b* and .67*d* or .107*b* and .107*d* of section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, as applicable. Those elements are

a. a reference to the section of the auditor's report where the auditor's responsibilities are described and

b. a statement about whether the audit evidence obtained is sufficient and appropriate to provide a basis for the auditor's opinion.

.28 Even if the auditor has expressed an adverse opinion or disclaimed an opinion on the financial statements, the auditor should describe the reasons for any other matters of which the auditor is aware that would have required a modification to the opinion, and the effects thereof, in the "Basis for Opinion" section. (Ref: par. .A32–.A33)

Description of Auditor's Responsibilities for the Audit of the Financial Statements When the Auditor Disclaims an Opinion on the Financial Statements

.29 When the auditor disclaims an opinion on the financial statements due to an inability to obtain sufficient appropriate audit evidence, the auditor should amend the description of the auditor's responsibilities required by paragraphs .35–.37 of section 700 or paragraphs .74–.76 or .115–.119 of section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, as applicable, to include only the following: (Ref: par. .A34)

a. A statement that the auditor's responsibility is to conduct an audit of the entity's financial statements in accordance with auditing standards generally accepted in the United States of America and to issue an auditor's report

b. A statement that, however, because of the matters described in the "Basis for Disclaimer of Opinion" section of the auditor's report, the auditor was not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on the financial statements

c. A statement that the auditor is required to be independent and to meet other ethical responsibilities, in accordance with the relevant ethical requirements relating to the audit, required by paragraph .28*c* of section 700 or paragraph .67*c* or .107*c* of section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, as applicable

Considerations When the Auditor Expresses an Adverse Opinion or Disclaims an Opinion on the Financial Statements

.30 When the auditor expresses an adverse opinion or disclaims an opinion on the financial statements, the auditor's report should not include a "Key Audit Matters" section in accordance with section 701.[3] (Ref: par. .A35–.A36) Also, when the auditor disclaims an opinion on the financial statements, the auditor's report should not include an "Other Information" section in accordance with section 720, *The Auditor's Responsibilities Relating to Other Information Included in Annual Reports*. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 137.]

Communication With Those Charged With Governance

.31 When the auditor expects to modify the opinion in the auditor's report, the auditor should communicate with those charged with governance the circumstances that led to the expected modification and the wording of the modification. (Ref: par. .A37)

Application and Other Explanatory Material

Types of Modified Opinions (Ref: par. .02)

.A1 The following table illustrates how the auditor's professional judgment about the nature of the matter giving rise to the modification, and the pervasiveness of its effects or possible effects on the financial statements, affects the type of opinion to be expressed:

	Auditor's Professional Judgment About the Pervasiveness of the Effects or Possible Effects on the Financial Statements	
Nature of Matter Giving Rise to the Modification	**Material but Not Pervasive-Material but Not Pervasive**	**Material and Pervasive**
Financial statements are materially misstated	Qualified opinion	Adverse opinion
Inability to obtain sufficient appropriate audit evidence	Qualified opinion	Disclaimer of opinion

Circumstances in Which a Modification to the Auditor's Opinion Is Required

Nature of Material Misstatements (Ref: par. .07a)

.A2 Sections 700 and 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, require the auditor, in order to form an opinion on the financial statements, to conclude whether reasonable assurance has been obtained about whether the financial statements as a whole are free from material misstatement.[4] This conclusion takes into account the auditor's evaluation of uncorrected

[3]Paragraphs .10–.12 of section 701, *Communicating Key Audit Matters in the Independent Auditor's Report*.

[4]Paragraph .13 of section 700, *Forming an Opinion and Reporting on Financial Statements* and paragraph .38 of section 703,*Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*.

misstatements, if any, on the financial statements, in accordance with section 450, *Evaluation of Misstatements Identified During the Audit*.

.A3 Section 450 defines a *misstatement* as a difference between the reported amount, classification, presentation, or disclosure of a financial statement item and the amount, classification, presentation, or disclosure that is required for the item to be in accordance with the applicable financial reporting framework. Accordingly, a material misstatement of the financial statements may arise in relation to the following:

- The appropriateness of the selected accounting policies
- The application of the selected accounting policies
- The appropriateness of the financial statement presentation, or the appropriateness or adequacy of disclosures in the financial statements

Appropriateness of the Selected Accounting Policies

.A4 Regarding the appropriateness of the accounting policies management has selected, material misstatements of the financial statements may arise, for example, when

- the selected accounting policies are not consistent with the applicable financial reporting framework,
- the financial statements do not correctly describe an accounting policy relating to a significant item therein, or
- the financial statements do not represent or disclose the underlying transactions and events in a manner that achieves fair presentation.

.A5 Financial reporting frameworks often contain requirements for the accounting for, and disclosure of, changes in accounting policies. When the entity has changed its selection of significant accounting policies, a material misstatement of the financial statements may arise when the entity has not complied with these requirements. If a change in accounting policy does not meet the conditions described in section 708, *Consistency of Financial Statements*, then a material misstatement of the financial statements may arise.

Application of the Selected Accounting Policies

.A6 Regarding the application of the selected accounting policies, material misstatements of the financial statements may arise

- when management has not applied the selected accounting policies consistently with the financial reporting framework, including when management has not applied the selected accounting policies consistently between periods or to similar transactions and events (consistency in application).
- due to the method of application of the selected accounting policies (such as an unintentional error in application).

Appropriateness of the Financial Statement Presentation or Appropriateness or Adequacy of Disclosures in the Financial Statements

.A7 Regarding the appropriateness of the financial statement presentation or the appropriateness or adequacy of disclosures in the financial statements, material misstatements of the financial statements may arise when the following occur:

- The financial statements do not include all the disclosures required by the applicable financial reporting framework.
- The disclosures in the financial statements are not presented in accordance with the applicable financial reporting framework.
- The financial statements do not provide the additional disclosures necessary to achieve fair presentation beyond disclosures specifically required by the applicable financial reporting framework.
- Information required to be presented in accordance with the applicable financial reporting framework is omitted either because a required statement (for example, a statement of cash flows) has not been included or because the information has not otherwise been disclosed in the financial statements.

Paragraph .A23 of section 450 provides further examples of material misstatements that may arise in qualitative disclosures.

.A8 Adequate disclosures relate to the presentation of the financial statements and the related notes, including, for example, the terminology used, the amount of detail given, the classification of items in the statements, and the bases of amounts set forth.

*Nature of an Inability to Obtain Sufficient Appropriate Audit Evidence (Ref: **par. .07b**)*

.A9 The auditor's inability to obtain sufficient appropriate audit evidence (also referred to as a limitation on the scope of the audit) may arise from the following:

- Circumstances beyond the control of the entity
- Circumstances relating to the nature or timing of the auditor's work
- Limitations imposed by management

.A10 An inability to perform a specific procedure does not constitute a limitation on the scope of the audit if the auditor is able to obtain sufficient appropriate audit evidence by performing alternative procedures. If this is not possible, the requirements in paragraphs .08*b* and .10 apply as appropriate. Limitations imposed by management may have other implications for the audit, such as for the auditor's assessment of risks of material misstatement due to fraud and consideration of engagement continuance.

.A11 Examples of circumstances beyond the control of the entity include the following:

- The entity's accounting records have been destroyed.
- The accounting records of a significant component have been seized indefinitely by governmental authorities.

.A12 Examples of circumstances relating to the nature or timing of the auditor's work include the following:

- The entity is required to use the equity method of accounting for an investee, and the auditor is unable to obtain sufficient appropriate audit evidence about the latter's financial information to evaluate whether the equity method has been appropriately applied.
- The timing of the auditor's appointment is such that the auditor is unable to observe the counting of the physical inventories, and the auditor is unable to obtain sufficient appropriate audit evidence through other appropriate procedures, such as performing a rollback of inventory.
- The auditor determines that performing substantive procedures alone is not sufficient, but the entity's controls are not effective.

.A13 Examples of an inability to obtain sufficient appropriate audit evidence arising from a limitation on the scope of the audit imposed by management include the following:

- Management prevents the auditor from observing the counting of the physical inventory.
- Management prevents the auditor from requesting external confirmation of specific account balances.

Determining the Type of Modification to the Auditor's Opinion

Effect of Uncertainties (Ref: par. .10)

.A14 Absence of the existence of information related to the outcome of an uncertainty does not necessarily lead to a conclusion that the audit evidence supporting management's assertion is not sufficient. Rather, the auditor's professional judgment regarding the sufficiency of the audit evidence is based on the audit evidence that is, or should be, available. If, after considering the existing conditions and available evidence, the auditor concludes that sufficient appropriate audit evidence supports management's assertions about the nature of a matter involving an uncertainty and its presentation or disclosure in the financial statements, an unmodified opinion ordinarily is appropriate.

.A15 In cases involving multiple uncertainties, the auditor may conclude that it is not possible to form an opinion on whether the financial statements as a whole are fairly presented in accordance with the applicable financial reporting framework due to the interaction and possible cumulative effects of the uncertainties.

Consequence of an Inability to Obtain Sufficient Appropriate Audit Evidence Due to a Management-Imposed Limitation After the Auditor Has Accepted the Engagement (Ref: par. .13)

.A16 The practicality of withdrawing from the audit may depend on the stage of completion of the engagement at the time that management imposes the scope limitation. If the auditor has substantially completed the audit, the auditor may decide to complete the audit to the extent possible, disclaim an opinion, and explain the scope limitation in the "Basis for Disclaimer of Opinion" section.

.A17 In certain circumstances, withdrawal from the audit may not be possible if the auditor is required by law or regulation to continue the audit engagement. This may be the case for an auditor who is appointed or elected to audit the financial statements of governmental entities. It may also be the case in circumstances in which the auditor is appointed to audit the financial statements covering a specific period or is appointed for a specific period and is prohibited from withdrawing before the completion of the audit of those financial statements or before the end of that period. In such circumstances, the auditor may consider it necessary to include an other-matter paragraph in the auditor's report.[5]

Other Considerations Relating to an Adverse Opinion or Disclaimer of Opinion (Ref: par. .15)

.A18 The following are examples of reporting circumstances that would not contradict the auditor's adverse opinion or disclaimer of opinion:

- In an initial audit, the expression of an unmodified opinion regarding the financial position and a disclaimer of opinion regarding the results of operations and cash flows, when relevant. In this case, the auditor has not disclaimed an opinion on the financial statements as a whole.
- The expression of an unmodified opinion on financial statements prepared under a given financial reporting framework and, within the same report, the expression of an adverse opinion on the same financial statements under a different financial reporting framework.

Considerations Specific to Audits of Governmental Entities

.A19 Because the auditor of a state or local governmental entity expresses an opinion or disclaims an opinion for each opinion unit,[6] an auditor's report in these circumstances may include an unmodified opinion with respect to one or more opinion units and a modified opinion for one or more other opinion units.

[5] Paragraphs .10–.11 of section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report*.

[6] Paragraph .A6 of section 700, *Forming an Opinion and Reporting on Financial Statements*.

Auditor Is Not Independent but Is Required by Law or Regulation to Report on the Financial Statements (Ref: par. .16)

Considerations Specific to Governmental Entities

.A20 The nature of a government auditor's lack of independence may have a limited effect because the impairment may result from the government auditor's association with only a component of the overall governmental entity. A government auditor may determine that the lack of independence affects only one or more, but not all, of the governmental entity's opinion units, and in such circumstances, the auditor may disclaim an opinion on the affected opinion units while expressing unmodified, qualified, or adverse opinions on other opinion units. The more significant the affected opinion units are to the overall governmental entity, the more likely that it will be appropriate for the auditor to disclaim an opinion on the financial statements of the overall governmental entity.

Form and Content of the Auditor's Report When the Opinion Is Modified

Illustrative Auditor's Reports (Ref: par. .17)

.A21 Illustrations 1 and 3 in the exhibit to this section contain auditor's reports with qualified and adverse opinions, respectively, because the financial statements are materially misstated.

.A22 Illustration 4 in the exhibit contains an auditor's report with a qualified opinion because the auditor is unable to obtain sufficient appropriate audit evidence. Illustration 5 contains a disclaimer of opinion due to an inability to obtain sufficient appropriate audit evidence about a single element of the financial statements. Illustration 6 contains a disclaimer of opinion due to an inability to obtain sufficient appropriate audit evidence about multiple elements of the financial statements. In each of the latter two cases, the possible effects on the financial statements of the inability to obtain sufficient appropriate audit evidence are both material and pervasive. The exhibits to other AU-C sections that include reporting requirements also include illustrations of auditor's reports with modified opinions.

Auditor's Opinion (Ref: par. .17)

.A23 Amending the heading required by paragraph .17 makes it clear to the user that the auditor's opinion is modified and indicates the type of modification.

Qualified Opinion (Ref: par. .18)

.A24 When the auditor expresses a qualified opinion, it would not be appropriate to use phrases such as "with the foregoing explanation" or "subject to" in the "Opinion" section because these are not sufficiently clear or forceful. Because accompanying notes are part of the financial statements, wording such as "fairly presented, in all material respects, when read in conjunction with note 1" is likely to be misunderstood and would also not be appropriate.

.A25 When the auditor expresses a qualified opinion due to a scope limitation, paragraph .18 requires that the auditor state in the opinion paragraph that the qualification pertains to the possible effects of the matter on the financial statements and not to the scope limitation itself. Wording such as "In our opinion, except for the above-mentioned limitation on the scope of our audit…" bases the exception on the restriction itself rather than on the possible effects on the financial statements and, therefore, is unacceptable.

Basis for Opinion (Ref: par. .21, .22, .24, .28)

.A26 Consistency in the auditor's report helps promote users' understanding and helps users identify unusual circumstances when they occur. Accordingly, although uniformity in the wording of a modified opinion and the description of the reasons for the modification may not be possible, consistency in both the form and content of the auditor's report is desirable.

.A27 An example of the financial effects of misstatements that the auditor may describe within the "Basis for Opinion" section in the auditor's report is the quantification of the effects on income before taxes, income taxes, net income, and equity if inventory is overstated. If such disclosures are made in a note to the financial statements, the "Basis for Opinion" section may refer to the note.

.A28 In considering the adequacy of disclosure, and in other aspects of the audit, the auditor uses information received in confidence from management. Without such confidence, the auditor would find it difficult to obtain information necessary to form an opinion on the financial statements. The "Confidential Client Information Rule" (ET sec. 1.700.001)[b] of the AICPA Code of Professional Conduct states that the auditor should not disclose any confidential client information without the specific consent of the client. Accordingly, the auditor may not make available, without management's consent, information that is not required to be disclosed in the financial statements to comply with the applicable financial reporting framework.

.A29 *Practicable*, as used in the context of paragraphs .22 and .24*c*, means that the information is reasonably obtainable from management's accounts and records and that providing the information in the report does not require the auditor to assume the position of a preparer of financial information. For example, the auditor would not be expected to prepare a basic financial statement and include it in the auditor's report when management omits such information.

.A30 Disclosing the omitted information within the "Basis for Opinion" section would not be practicable if

- the information has not been prepared by management or the information is otherwise not readily available to the auditor or,
- in the auditor's judgment, the information would be unduly voluminous in relation to the auditor's report.

---

[b]All ET sections can be found in AICPA *Professional Standards*.

.A31 When the auditor modifies the opinion due to an inability to obtain sufficient appropriate audit evidence, it is not appropriate for the scope of the audit to be explained in a note to the financial statements because the description of the audit scope is the responsibility of the auditor and not that of management.

.A32 An adverse opinion or a disclaimer of opinion relating to a specific matter described within the "Basis for Opinion" section does not justify the omission of a description of other identified matters that would have otherwise required a modification of the auditor's opinion. In such cases, the disclosure of such other matters of which the auditor is aware may be relevant to users of the financial statements.

.A33 The auditor may consider whether there is a need to describe in an emphasis-of-matter or other-matter paragraph[7] any other matters of which the auditor is aware that would not require a modification of the auditor's opinion.

Description of Auditor's Responsibilities for the Audit of the Financial Statements When the Auditor Disclaims an Opinion on the Financial Statements (Ref: par. .29)

.A34 When the auditor disclaims an opinion on the financial statements, the following statements are better positioned within the "Auditor's Responsibilities for the Audit of the Financial Statements" section of the auditor's report, as illustrated in illustrations 5–6 of the exhibit to this section:

- The statement required by paragraph .28*a* of section 700 or paragraph .67*a* or .107*a* of section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, as applicable, amended to state that the auditor's responsibility is to conduct an audit of the entity's financial statements in accordance with auditing standards generally accepted in the United States of America
- The statement required by paragraph .28*c* of section 700 or paragraph .67*c* or .107*c* of section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, as applicable, about independence and other ethical responsibilities

Considerations When the Auditor Issues an Adverse Opinion or Disclaims an Opinion on the Financial Statements (Ref: par. .30)

.A35 Describing the reasons for the modification of the opinion within the "Basis for Opinion" section of the auditor's report provides information to users that is useful in understanding why the auditor has expressed an adverse opinion or disclaimed an opinion on the financial statements. Furthermore, describing these reasons may guard against inappropriate reliance on the financial statements. However, providing further details about the audit may overshadow the reasons for the modification of the opinion and may potentially be confusing to users.

.A36 When the auditor expresses an adverse opinion, the communication of any key audit matters other than the matters giving rise to the modified opinion may overshadow the

[7] See section 706.

fact that the financial statements as a whole are materially misstated. When the auditor disclaims an opinion, the communication of any key audit matters other than the matters giving rise to the disclaimer of opinion may suggest that the financial statements are more credible in relation to those matters than would be appropriate in the circumstances and would be inconsistent with the disclaimer of opinion on the financial statements as a whole. Similarly, it would not be appropriate for the auditor to make any statements about the auditor's consideration of the consistency of other information in an annual report with the financial statements. Accordingly, paragraph .30 of this section prohibits the inclusion of a "Key Audit Matters" section in the auditor's report when the auditor issues an adverse opinion or disclaims an opinion on the financial statements and also prohibits the inclusion of an "Other Information" section in the auditor's report when the auditor disclaims an opinion on the financial statements. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 137.]

Communication With Those Charged With Governance (Ref: par. .31)

.A37 Communicating with those charged with governance the circumstances that lead to an expected modification to the auditor's opinion and the proposed wording of the modification enables the following:

- The auditor to give notice to those charged with governance of the intended modification and the reasons (or circumstances) for the modification
- The auditor to seek the concurrence of those charged with governance regarding the facts of the matters giving rise to the expected modification, or to confirm matters of disagreement with management as such
- Those charged with governance to have an opportunity, when appropriate, to provide the auditor with further information and explanations regarding the matters giving rise to the expected modification

Illustration 1 — An Auditor's Report Containing a Qualified Opinion Due to a Material Misstatement of the Financial Statements

Circumstances include the following:

- Audit of a complete set of general purpose financial statements (comparative). The audit is not a group audit.
- Management is responsible for the preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America as promulgated by the Financial Accounting Standards Board.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210A, *Terms of Engagement*.
- Inventories are misstated. The misstatement is deemed to be material but not pervasive to the financial statements. Accordingly, the auditor's report contains a qualified opinion.
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- The auditor has obtained all the other information prior to the date of the auditor's report, and the matter giving rise to the qualified opinion on the financial statements also affects the other information included in the annual report.
- The auditor has not been engaged to communicate key audit matters.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Audit of the Financial Statements[1]

Qualified Opinion

We have audited the financial statements of ABC Company, which comprise the balance sheets as of December 31, 20X1 and 20X0, and the related statements of income, changes in stockholders' equity, and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, except for the effects of the matter described in the Basis for Qualified Opinion section of our report, the accompanying financial statements present fairly, in all

[1]The subtitle "Report on the Audit of the Financial Statements" is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

material respects, the financial position of ABC Company as of December 31, 20X1 and 20X0, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Qualified Opinion

ABC Company has stated inventories at cost in the accompanying balance sheets. Accounting principles generally accepted in the United States of America require inventories to be stated at the lower of cost or market. If the Company stated inventories at the lower of cost or market, a write down of $XXX and $XXX would have been required as of December 31, 20X1 and 20X0, respectively. Accordingly, cost of sales would have been increased by $XXX and $XXX, and net income, income taxes, and stockholders' equity would have been reduced by $XXX, $XXX, and $XXX, and $XXX, $XXX, and $XXX, as of and for the years ended December 31, 20X1 and 20X0, respectively.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.[2]
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Other Information [or another title, if appropriate, such as "Information Other Than the Financial Statements and Auditor's Report Thereon"]

[*Reporting in accordance with the reporting requirements in section 720,* The Auditor's Responsibilities Relating to Other Information Included in Annual Reports.]

Report on Other Legal and Regulatory Requirements

[*The form and content of this section of the auditor's report would vary depending on the nature of the auditor's other reporting responsibilities.*]

[*Signature of the auditor's firm*]

[*City and state where the auditor's report is issued*]

[*Date of the auditor's report*]

[2]In circumstances in which the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, omit the following: "but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed."

Illustration 2 — An Auditor's Report Containing a Qualified Opinion for Inadequate Disclosure

Circumstances include the following:

- Audit of a complete set of general purpose financial statements (comparative). The audit is not a group audit.
- Management is responsible for the preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America as promulgated by the Financial Accounting Standards Board.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210A, *Terms of Engagement*.
- The financial statements have inadequate disclosures. The auditor has concluded that (*a*) it is not practicable to present the required information and (*b*) the effects are such that an adverse opinion is not appropriate. Accordingly, the auditor's report contains a qualified opinion.
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- The auditor has obtained all the other information prior to the date of the auditor's report, and the matter giving rise to the qualified opinion on the financial statements also affects the other information included in the annual report.
- The auditor has been engaged to communicate key audit matters.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Audit of the Financial Statements[3]

Qualified Opinion

We have audited the financial statements of ABC Company, which comprise the balance sheets as of December 31, 20X1 and 20X0, and the related statements of income, changes in stockholders' equity, and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, except for the omission of the information described in the Basis for Qualified Opinion section of our report, the accompanying financial statements present

[3]The subtitle "Report on the Audit of the Financial Statements" is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

fairly, in all material respects, the financial position of ABC Company as of December 31, 20X1 and 20X0, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Qualified Opinion

ABC Company's financial statements do not disclose [*describe the nature of the omitted information that is not practicable to present in the auditor's report*]. In our opinion, disclosure of this information is required by accounting principles generally accepted in the United States of America.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified audit opinion.

Key Audit Matters

Key audit matters are those matters that were communicated with those charged with governance and, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. In addition to the matter described in the *Basis for Qualified Opinion* section, we have determined the matters described below to be the key audit matters to be communicated in our report.

[*Description of each key audit matter in accordance with section 701*, Communicating Key Audit Matters in the Independent Auditor's Report]

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.[4]
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Other Information [or another title, if appropriate, such as "Information Other Than the Financial Statements and Auditor's Report Thereon"]

[*Reporting in accordance with the reporting requirements in section 720,* The Auditor's Responsibilities Relating to Other Information Included in Annual Reports.]

Report on Other Legal and Regulatory Requirements

[*The form and content of this section of the auditor's report would vary depending on the nature of the auditor's other reporting responsibilities.*]

[4]In circumstances in which the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, omit the following: "but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed."

[*Date of the auditor's report*]

Illustration 3 — An Auditor's Report Containing an Adverse Opinion Due to a Material Misstatement of the Financial Statements

Circumstances include the following:

- Audit of a complete set of consolidated general purpose financial statements (single year). The audit is a group audit. The auditor is not making reference to a component auditor in the auditor's report.
- Management is responsible for the preparation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America as promulgated by the Financial Accounting Standards Board.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210A, *Terms of Engagement*.
- The financial statements are materially misstated due to the nonconsolidation of a subsidiary. The material misstatement is deemed to be pervasive to the financial statements. Accordingly, the auditor's report contains an adverse opinion. The effects of the misstatement on the financial statements have not been determined because it was not practicable to do so.
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- The auditor has obtained all the other information prior to the date of the auditor's report, and the matter giving rise to the qualified opinion on the financial statements also affects the other information included in the annual report.
- The auditor is precluded from communicating key audit matters when issuing an adverse opinion.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Audit of the Consolidated Financial Statements[5]

Adverse Opinion

We have audited the consolidated financial statements of ABC Company and its subsidiaries, which comprise the consolidated balance sheet as of December 31, 20X1, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for the year then ended, and the related notes to the financial statements.

[5]The subtitle "Report on the Audit of the Consolidated Financial Statements" is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

In our opinion, because of the significance of the matter discussed in the Basis for Adverse Opinion section of our report, the accompanying consolidated financial statements do not present fairly the financial position of ABC Company and its subsidiaries as of December 31, 20X1, or the results of their operations or their cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Adverse Opinion

As described in Note X, ABC Company has not consolidated the financial statements of subsidiary XYZ Company that it acquired during 20X1 because it has not yet been able to ascertain the fair values of certain of the subsidiary's material assets and liabilities at the acquisition date. This investment is therefore accounted for on a cost basis by the Company. Under accounting principles generally accepted in the United States of America, the subsidiary should have been consolidated because it is controlled by the Company. Had XYZ Company been consolidated, many elements in the accompanying consolidated financial statements would have been materially affected. The effects on the consolidated financial statements of the failure to consolidate have not been determined.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our adverse audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on consolidated financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.[6]
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the consolidated financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Other Information [or another title, if appropriate, such as "Information Other Than the Financial Statements and Auditor's Report Thereon"]

[*Reporting in accordance with the reporting requirements in section 720,* The Auditor's Responsibilities Relating to Other Information Included in Annual Reports.]

---

[6]In circumstances in which the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the consolidated financial statements, omit the following: "but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed."

[*Date of the auditor's report*]

Illustration 4 — An Auditor's Report Containing a Qualified Opinion Due to the Auditor's Inability to Obtain Sufficient Appropriate Audit Evidence

Circumstances include the following:

- Audit of a complete set of general purpose financial statements (single year). The audit is not a group audit.
- Management is responsible for the preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America as promulgated by the Financial Accounting Standards Board.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210A, *Terms of Engagement*.
- The auditor was unable to obtain sufficient appropriate audit evidence regarding an investment in a foreign affiliate. The possible effects of the inability to obtain sufficient appropriate audit evidence are deemed to be material but not pervasive to the financial statements. Accordingly, the auditor's report contains a qualified opinion.
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- The auditor has obtained all the other information prior to the date of the auditor's report, and the matter giving rise to the qualified opinion on the financial statements also affects the other information included in the annual report.
- The auditor has not been engaged to communicate key audit matters.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Audit of the Financial Statements[7]

Qualified Opinion

We have audited the financial statements of ABC Company, which comprise the balance sheet as of December 31, 20X1, and the related statements of income, changes in stockholders' equity, and cash flows for the year then ended, and the related notes to the financial statements.

In our opinion, except for the possible effects of the matter described in the Basis for Qualified Opinion section of our report, the accompanying financial statements present

[7] The subtitle "Report on the Audit of the Financial Statements" is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

fairly, in all material respects, the financial position of ABC Company as of December 31, 20X1, and the results of its operations and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Qualified Opinion

ABC Company's investment in XYZ Company, a foreign affiliate acquired during the year and accounted for under the equity method, is carried at $XXX on the balance sheet at December 31, 20X1, and ABC Company's share of XYZ Company's net income of $XXX is included in ABC Company's net income for the year then ended. We were unable to obtain sufficient appropriate audit evidence about the carrying amount of ABC Company's investment in XYZ Company as of December 31, 20X1, and ABC Company's share of XYZ Company's net income for the year then ended because we were denied access to the financial information, management, and the auditors of XYZ Company. Consequently, we were unable to determine whether any adjustments to these amounts were necessary.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.[8]
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Other Information [or another title, if appropriate, such as "Information Other Than the Financial Statements and Auditor's Report Thereon"]

[*Reporting in accordance with the reporting requirements in section 720,* The Auditor's Responsibilities Relating to Other Information Included in Annual Reports.]

Report on Other Legal and Regulatory Requirements

[*The form and content of this section of the auditor's report would vary depending on the nature of the auditor's other reporting responsibilities.*]

[*Signature of the auditor's firm*]

[*City and state where the auditor's report is issued*]

[*Date of the auditor's report*]

[8]In circumstances in which the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, omit the following: "but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed."

Illustration 5 — An Auditor's Report Containing a Disclaimer of Opinion Due to the Auditor's Inability to Obtain Sufficient Appropriate Audit Evidence About a Single Element of the Financial Statements

Circumstances include the following:

- Audit of a complete set of general purpose financial statements (single year). The audit is not a group audit.
- Management is responsible for the preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America as promulgated by the Financial Accounting Standards Board.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210A, *Terms of Engagement*.
- The auditor was unable to obtain sufficient appropriate audit evidence about a single element of the financial statements. That is, the auditor was unable to obtain audit evidence about the financial information of a joint venture investment accounted for under the proportionate consolidation approach. The investment represents over 90 percent of the Company's net assets. The possible effects of this inability to obtain sufficient appropriate audit evidence are deemed to be both material and pervasive to the financial statements. Accordingly, the auditor's report contains a disclaimer of opinion.
- The auditor concluded that it was unnecessary to include in the auditor's report specific amounts for the Company's proportional share of the assets, liabilities, income, and expenses of the joint venture investment because the investment represents over 90 percent of the Company's net assets, and that fact is disclosed in the auditor's report.
- The auditor is precluded from including an Other Information section in the auditor's report when disclaiming an opinion on the financial statements.
- The auditor is precluded from communicating key audit matters when disclaiming an opinion on the financial statements.
- A more limited description of the Auditor's Responsibilities section is required because of the disclaimer of opinion.

<u>Independent Auditor's Report</u>

[*Appropriate Addressee*]

Report on the Audit of the Financial Statements[9]

Disclaimer of Opinion

[9]The subtitle "Report on the Audit of the Financial Statements" is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

We were engaged to audit the financial statements of ABC Company, which comprise the balance sheet as of December 31, 20X1, and the related statements of income, changes in stockholders' equity, and cash flows for the year then ended, and the related notes to the financial statements.

We do not express an opinion on the accompanying financial statements of ABC Company. Because of the significance of the matter described in the Basis for Disclaimer of Opinion section of our report, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on the financial statements.

Basis for Disclaimer of Opinion

ABC Company's investment in XYZ Company, a joint venture, is carried at $XXX on the Company's balance sheet, which represents over 90 percent of the Company's net assets as of December 31, 20X1. We were not allowed access to the management and the auditors of XYZ Company. As a result, we were unable to determine whether any adjustments were necessary relating to the Company's proportional share of XYZ Company's assets that it controls jointly, its proportional share of XYZ Company's liabilities for which it is jointly responsible, its proportional share of XYZ Company's income and expenses for the year, and the elements making up the statements of changes in stockholders' equity and cash flows.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Auditor's Responsibilities for the Audit of the Financial Statements

Our responsibility is to conduct an audit of ABC Company's financial statements in accordance with auditing standards generally accepted in the United States of America and to issue an auditor's report. However, because of the matter described in the Basis for Disclaimer of Opinion section of our report, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on these financial statements.

We are required to be independent of ABC Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit.

Report on Other Legal and Regulatory Requirements

[*The form and content of this section of the auditor's report would vary depending on the nature of the auditor's other reporting responsibilities.*]

[*Signature of the auditor's firm*]

[*City and state where the auditor's report is issued*]

[*Date of the auditor's report*]

Illustration 6 — An Auditor's Report Containing a Disclaimer of Opinion Due to the Auditor's Inability to Obtain Sufficient Appropriate Audit Evidence About Multiple Elements of the Financial Statements

Circumstances include the following:

- Audit of a complete set of general purpose financial statements (single year). The audit is not a group audit.
- Management is responsible for the preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America as promulgated by the Financial Accounting Standards Board.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210A, *Terms of Engagement*.
- The auditor was unable to obtain sufficient appropriate audit evidence about multiple elements of the financial statements. That is, the auditor was unable to obtain audit evidence about the entity's inventories and accounts receivable at year-end because at that time the auditor had not been engaged. The possible effects of this inability to obtain sufficient appropriate audit evidence are deemed to be both material and pervasive to the financial statements. Accordingly, the auditor's opinion contains a disclaimer of opinion.
- The auditor is precluded from including an Other Information section in the auditor's report when disclaiming an opinion on the financial statements.
- The auditor is precluded from communicating key audit matters when disclaiming an opinion on the financial statements.
- A more limited description of the Auditor's Responsibilities section is required because of the disclaimer of opinion.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Audit of the Financial Statements[10]

Disclaimer of Opinion

We were engaged to audit the financial statements of ABC Company, which comprise the balance sheet as of December 31, 20X1, and the related statements of income, changes in stockholders' equity, and cash flows for the year then ended, and the related notes to the financial statements.

[10]The subtitle "Report on the Audit of the Financial Statements" is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

We do not express an opinion on the accompanying financial statements of ABC Company. Because of the significance of the matters described in the Basis for Disclaimer of Opinion section of our report, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on these financial statements.

Basis for Disclaimer of Opinion

We were not engaged as auditors of ABC Company until after December 31, 20X1, and, therefore, did not observe the counting of physical inventories at the beginning or end of the year. We were unable to satisfy ourselves by other auditing procedures concerning the inventory held at December 31, 20X1, which is stated in the balance sheet at $XXX. In addition, the introduction of a new computerized accounts receivable system in September 20X1 resulted in numerous misstatements in accounts receivable. As of the date of our audit report, management was still in the process of rectifying the system deficiencies and correcting the misstatements. We were unable to confirm or verify by alternative means accounts receivable included in the balance sheet at a total amount of $XXX at December 31, 20X1. As a result of these matters, we were unable to determine whether any adjustments might have been found necessary in respect of recorded or unrecorded inventories and accounts receivable, and the elements making up the statements of income, changes in stockholders' equity, and cash flows.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Auditor's Responsibilities for the Audit of the Financial Statements

Our responsibility is to conduct an audit of ABC Company's financial statements in accordance with auditing standards generally accepted in the United States of America and to issue an auditor's report. However, because of the matters described in the Basis for Disclaimer of Opinion section of our report, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on these financial statements.

We are required to be independent of ABC Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit.

Report on Other Legal and Regulatory Requirements

[*The form and content of this section of the auditor's report would vary depending on the nature of the auditor's other reporting responsibilities.*]

[*Signature of the auditor's firm*]

[*City and state where the auditor's report is issued*]

[*Date of the auditor's report*]

Illustration 7 — An Auditor's Report in Which the Auditor Is Expressing an Unmodified Opinion in the Prior Year and a Modified Opinion (Qualified Opinion) in the Current Year

Circumstances include the following:

- Audit of a complete set of general purpose financial statements (comparative). The audit is not a group audit.
- Management is responsible for the preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America as promulgated by the Financial Accounting Standards Board.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210A, *Terms of Engagement*.
- Certain lease obligations have been excluded from the financial statements in the current year. The effect of the exclusion is material but not pervasive. The auditor expressed an unmodified opinion in the prior year and is expressing a modified opinion (qualified opinion) in the current year.
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- The auditor has not been engaged to communicate key audit matters.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Audit of the Financial Statements[11]

Qualified Opinion

We have audited the financial statements of ABC Company, which comprise the balance sheets as of December 31, 20X1 and 20X0, and the related statements of income, changes in stockholders' equity, and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, except for the effects on the accompanying 20X1 financial statements of not capitalizing certain lease obligations as described in the Basis for Qualified Opinion section of our report, the financial statements present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X1 and 20X0, and the results of

[11]The subtitle "Report on the Audit of the Financial Statements" is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Qualified Opinion on the 20X1 Financial Statements

ABC Company has excluded, from property and debt in the accompanying 20X1 balance sheet, certain lease obligations that were entered into in 20X1 that, in our opinion, should be capitalized in accordance with accounting principles generally accepted in the United States of America. If these lease obligations were capitalized, property would be increased by $XXX, long-term debt by $XXX, and retained earnings by $XXX as of December 31, 20X1, and net income and earnings per share would be increased (decreased) by $XXX and $XXX, respectively, for the year then ended.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified audit opinion on the 20X1 financial statements and for our opinion on the 20X0 financial statements.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.[12]
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Report on Other Legal and Regulatory Requirements

[*The form and content of this section of the auditor's report would vary depending on the nature of the auditor's other reporting responsibilities.*]

[*Signature of the auditor's firm*]

[*City and state where the auditor's report is issued*]

[*Date of the auditor's report*]

[12]In circumstances in which the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, omit the following: "but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed."

Illustration 8 — An Auditor's Report in Which the Auditor Is Expressing an Unmodified Opinion in the Current Year and a Disclaimer of Opinion on the Prior-Year Statements of Income, Changes in Stockholders' Equity, and Cash Flows

Circumstances include the following:

- Audit of a complete set of general purpose financial statements (comparative). The audit is not a group audit.
- Management is responsible for the preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America as promulgated by the Financial Accounting Standards Board.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210A, *Terms of Engagement*.
- The auditor was unable to observe the physical inventory as of December 31, 20X0, because at that time the auditor had not been engaged. Accordingly, the auditor was unable to obtain sufficient appropriate audit evidence regarding the net income and cash flows for the year ended December 31, 20X1. The effects of the inability to obtain sufficient appropriate audit evidence are deemed material and pervasive.
- In accordance with paragraph .A26 of section 700, the opinion does not separately refer to the statement of changes in stockholders' equity because changes in stockholders' equity accounts are considered part of the presentation of financial position, results of operations, and cash flows.
- The auditor expressed an unmodified opinion on the December 31, 20X2 and 20X1, balance sheets and a disclaimer of opinion on the 20X1 statements of income, changes in stockholders' equity, and cash flows.
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- The auditor has not been engaged to communicate key audit matters.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Audit of the Financial Statements[13]

Opinion

[13]The subtitle "Report on the Audit of the Financial Statements" is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

We have audited the financial statements of ABC Company, which comprise the balance sheets as of December 31, 20X2 and 20X1, and the related statements of income, changes in stockholders' equity, and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, the accompanying balance sheets of ABC Company as of December 31, 20X2 and 20X1, and the statements of income, changes in stockholders' equity, and cash flows for the year ended December 31, 20X2, present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the year ended December 31, 20X2, in accordance with accounting principles generally accepted in the United States of America.

Disclaimer of Opinion on 20X1 Operations and Cash Flows

We do not express an opinion on the accompanying results of operations and cash flows for the year ended December 31, 20X1. Because of the significance of the matter described in the Basis for Disclaimer of Opinion section of our report, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on the results of operations and cash flows.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the balance sheets as of December 31, 20X2 and 20X1, and the statements of income, changes in stockholders' equity, and cash flows for the year ended December 31, 20X2.

Basis for Disclaimer of Opinion on 20X1 Operations and Cash Flows

We did not observe the taking of the physical inventory as of December 31, 20X0, because that date was prior to our engagement as auditors for ABC Company, and we were unable to satisfy ourselves regarding inventory quantities by means of other auditing procedures. Inventory amounts as of December 31, 20X0, enter into the determination of net income and cash flows for the year ended December 31, 20X1.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about

ABC Company's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.[14]
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Report on Other Legal and Regulatory Requirements

[14]In circumstances in which the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, omit the following: "but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed."

[*The form and content of this section of the auditor's report would vary depending on the nature of the auditor's other reporting responsibilities.*]

[*Signature of the auditor's firm*]

[*City and state where the auditor's report is issued*]

[*Date of the auditor's report*]

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 137. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SAS No. 138.]

AU-C Section 706

Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report

(Supersedes SAS No. 122 section 706.)

Source: SAS No. 134; SAS No. 137; SAS No. 140; SAS No. 141.

Effective for audits of financial statements for periods ending on or after December 15, 2021.

Introduction

Scope of This Section

.01 This section addresses additional communications in the auditor's report when the auditor considers it necessary to

a. draw users' attention to a matter or matters presented or disclosed in the financial statements that are of such importance that they are fundamental to users' understanding of the financial statements (emphasis-of-matter paragraph); or

b. draw users' attention to any matters other than those presented or disclosed in the financial statements that are relevant to users' understanding of the audit, the auditor's responsibilities or the auditor's report (other-matter paragraph).

.02 The communication of key audit matters is not required by section 700, *Forming an Opinion and Reporting on Financial Statements*, section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, or section 701, *Communicating Key Audit Matters in the Independent Auditor's Report*. However, when the auditor is engaged to communicate key audit matters, this section addresses the relationship between key audit matters and any additional communication in the auditor's report in accordance with this section. (Ref: par. .A1)

.03 Section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, and section 720, *The Auditor's Responsibilities Relating to Other Information Included in Annual Reports*, addresses communication in the auditor's report relating to going concern and other information, respectively. (Ref. par. .A2) [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 137.]

.04 Exhibit B, "List of AU-C Sections Containing Requirements for Emphasis-of-Matter Paragraphs," and exhibit C, "List of AU-C Sections Containing Requirements for Other-Matter Paragraphs," of this section identify AU-C sections containing specific requirements for the auditor to include an emphasis-of-matter paragraph or other-matter paragraph, respectively, in the auditor's report. When an emphasis-of-matter or other-matter paragraph is required, the requirements in this section regarding the form of such paragraphs apply. (Ref: par. .A3)

Effective Date

.05 This section is effective for audits of financial statements for periods ending on or after December 15, 2021. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 141.]

Objective

.06 The objective of the auditor, having formed an opinion on the financial statements, is to draw users' attention, when in the auditor's judgment it is necessary to do so, by way of clear additional communication in the auditor's report, to the following:

a. A matter, although appropriately presented or disclosed in the financial statements, that is of such importance that it is fundamental to users' understanding of the financial statements

b. As appropriate, any other matter that is relevant to users' understanding of the audit, the auditor's responsibilities, or the auditor's report

Definitions

.07 For purposes of generally accepted auditing standards (GAAS), the following terms have the meanings attributed as follows:

Emphasis-of-matter paragraph. A paragraph included in the auditor's report that is required by GAAS, or is included at the auditor's discretion, and that refers to a matter appropriately presented or disclosed in the financial statements that, in the auditor's professional judgment, is of such importance that it is fundamental to users' understanding of the financial statements.

Other-matter paragraph. A paragraph included in the auditor's report that is required by GAAS, or is included at the auditor's discretion, and that refers to a matter other than those presented or disclosed in the financial statements that, in the auditor's professional judgment, is relevant to users' understanding of the audit, the auditor's responsibilities, or the auditor's report.

Requirements

Emphasis-of-Matter Paragraphs in the Auditor's Report

.08 If the auditor considers it necessary to draw users' attention to a matter appropriately presented or disclosed in the financial statements that, in the auditor's professional judgment, is of such importance that it is fundamental to users' understanding of the financial statements, the auditor should include an emphasis-of-matter paragraph in the auditor's report, provided that the following apply: (Ref: par. .A4–.A5)

a. The auditor would not be required to modify the opinion in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*, as a result of the matter.

b. When section 701 applies, the matter has not been determined to be a key audit matter to be communicated in the auditor's report. (Ref: par. .A1)

.09 When the auditor includes an emphasis-of-matter paragraph in the auditor's report, the auditor should do the following:

a. Include the paragraph within a separate section of the auditor's report with an appropriate heading. When key audit matters are communicated in the auditor's report, the heading should include the term "Emphasis of Matter." (Ref. par. .A6)

b. Include in the paragraph a clear reference to the matter being emphasized and to where relevant disclosures that fully describe the matter can be found in the financial statements. The paragraph should refer only to information presented or disclosed in the financial statements.

c. Indicate that the auditor's opinion is not modified with respect to the matter emphasized. (Ref: par. .A7–.A8, .A14–.A15)

Other-Matter Paragraphs in the Auditor's Report

.10 If the auditor considers it necessary to communicate a matter other than those that are presented or disclosed in the financial statements that, in the auditor's professional judgment, is relevant to users' understanding of the audit, the auditor's responsibilities, or the auditor's report, the auditor should include an other-matter paragraph in the auditor's report, provided that, when section 701 applies, the matter has not been determined to be a key audit matter to be communicated in the auditor's report. (Ref: par. .A9–.A12)

.11 When the auditor includes an other-matter paragraph in the auditor's report, the auditor should include the paragraph within a separate section with the heading "Other Matter" or other appropriate heading. (Ref: par. .A13–.A15)

Communication With Those Charged With Governance

.12 If the auditor expects to include an emphasis-of-matter or other-matter paragraph in the auditor's report, the auditor should communicate with those charged with governance regarding this expectation and the wording of the paragraph. (Ref: par. .A16)

Application and Other Explanatory Material

Scope of This Section (Ref: par. .01–.04)

The Relationship Between Emphasis-of-Matter Paragraphs and Key Audit Matters in the Auditor's Report (Ref: par. .02–.04, .08b)

.A1 *Key audit matters* are defined in section 701 as those matters that, in the auditor's professional judgment, were of most significance in the audit of the financial statements of the current period. Key audit matters are selected from matters communicated with those charged with governance, which include significant findings from the audit of the financial statements of the current period.[1] Communicating key audit matters provides additional information to intended users of the financial statements to assist them in understanding those matters that, in the auditor's professional judgment, were of most significance in the audit and may also assist them in understanding the entity and areas of significant management judgment in the audited financial statements. When section 701 applies, the use of emphasis-of-matter paragraphs is not a substitute for a description of individual key audit matters.

.A2 If, after considering identified conditions or events and management's plans, the auditor concludes that substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains, the auditor is required to include a separate section in the auditor's report under the heading "Substantial Doubt About the Entity's Ability to Continue as a Going Concern."[2] If conditions or events, considered in the aggregate, have been identified that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time but, based on the audit evidence obtained, the auditor concludes that substantial doubt has been alleviated by management's plans and adequate disclosure has been made in the financial statements, the auditor may include an emphasis-of-matter paragraph in accordance with this section, making reference to management's disclosures related to the conditions and events and management's plans related to those conditions and events.[3]

.A3 The AU-C sections identified in exhibits B and C require the auditor to include an emphasis-of-matter paragraph or other-matter paragraph, respectively, in the auditor's report relating to certain matters. The nature of these matters is such that they are brought to the attention of users of the auditor's report in all instances rather than at the discretion of the auditor. The explanatory language provided by such required paragraphs achieves the

[1] Paragraph .14 of section 260, *The Auditor's Communication With Those Charged With Governance*.

[2] Paragraph .24 of section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.

[3] Paragraphs .A54–.A56 of section 570.

same objective as an emphasis-of-matter or other-matter paragraph that is included based on the professional judgment of the auditor (that is, to provide additional communication to the users of the auditor's report). Therefore, the auditor follows the requirements in this section regarding the form of these required paragraphs.

Emphasis-of-Matter Paragraphs in the Auditor's Report

Circumstances in Which an Emphasis-of-Matter Paragraph May Be Necessary (Ref: par. .08)

.A4 In addition to the required emphasis-of-matter paragraphs listed in exhibit B, the following are examples of circumstances in which the auditor may consider it necessary to include an emphasis-of-matter paragraph:

- An uncertainty relating to the future outcome of unusually important litigation or regulatory action
- A significant subsequent event that occurs between the date of the financial statements and the date of the auditor's report[4]
- A major catastrophe that has had, or continues to have, a significant effect on the entity's financial position or results of operations
- Significant transactions with related parties

.A5 Paragraph .08 requires that an emphasis-of-matter paragraph refer only to matters appropriately presented or disclosed in the financial statements. To include information in an emphasis-of-matter paragraph about a matter beyond what is presented or disclosed in the financial statements may raise questions about the appropriateness of such presentation or disclosure.

Including an Emphasis-of-Matter Paragraph in the Auditor's Report (Ref: par. .09)

.A6 The term "Emphasis of Matter" is required to be included in the heading when key audit matters are communicated to clearly differentiate the matter in the emphasis-of-matter paragraph from those included in the Key Audit Matters section of the auditor's report. The auditor may add further context to the heading "Emphasis of Matter" (for example, "Emphasis of Matter — Subsequent Event") to further describe the nature of the matter addressed by the emphasis-of-matter paragraph.

.A7 The inclusion of an emphasis-of-matter paragraph in the auditor's report does not affect the auditor's opinion. An emphasis-of-matter paragraph is not a substitute for the following:

- A modified opinion in accordance with section 705 when required by the circumstances of a specific audit engagement

---

[4]Paragraph .07 of section 560, *Subsequent Events and Subsequently Discovered Facts*.

- Disclosures in the financial statements that the applicable financial reporting framework requires management to make or that are otherwise necessary to achieve fair presentation
- Reporting in accordance with section 570 when, after considering identified conditions or events and management's plans, the auditor concludes that substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains, in which case the auditor is required to include a separate section in the auditor's report (see paragraph .A2)

.A8 Paragraphs .A14–.A15 provide further guidance on the placement of emphasis-of-matter paragraphs in particular circumstances.

Other-Matter Paragraphs in the Auditor's Report (Ref: par. .10–.11)

Circumstances in Which an Other-Matter Paragraph May Be Necessary

Relevant to Users' Understanding of the Audit

.A9 When the auditor is unable to withdraw from an engagement, even though the possible effect of an inability to obtain sufficient appropriate audit evidence due to a limitation on the scope of the audit imposed by management is pervasive,[5] the auditor may consider it necessary to include an other-matter paragraph in the auditor's report to explain why it is not possible for the auditor to withdraw from the engagement.

Relevant to Users' Understanding of the Auditor's Responsibilities or the Auditor's Report

.A10 Law, regulation, or generally accepted practice may require or permit the auditor to elaborate on matters that provide further explanation of the auditor's responsibilities in the audit of the financial statements or of the auditor's report thereon. When the "Other Matter" section includes more than one matter that, in the auditor's judgment, is relevant to users' understanding of the audit, the auditor's responsibilities, or the auditor's report, it may be helpful to use different subheadings for each matter.

.A11 An other-matter paragraph does not address circumstances in which the auditor has other reporting responsibilities that are in addition to the auditor's responsibility under GAAS (see the section "Other Reporting Responsibilities" in section 700) or when the auditor has been asked to perform and report on additional specified procedures or to express an opinion on specific matters.

Reporting on More Than One Set of Financial Statements

.A12 An entity may prepare one set of financial statements in accordance with a general purpose framework (for example, accounting principles generally accepted in the United States of America) and another set of financial statements in accordance with another general purpose framework (for example, International Financial Reporting Standards

[5] See paragraph .13 of section 705, *Modifications to the Opinion in the Independent Auditor's Report*, for a discussion of this circumstance.

promulgated by the International Accounting Standards Board) and engage the auditor to report on both sets of financial statements. If the auditor has determined that the frameworks are acceptable in the respective circumstances, the auditor may include an other-matter paragraph in the auditor's report, referring to the fact that another set of financial statements has been prepared by the same entity in accordance with another general purpose framework and that the auditor has issued a report on those financial statements.

Including an Other-Matter Paragraph in the Auditor's Report

.A13 The content of an other-matter paragraph clearly reflects that such other matter is not required to be presented and disclosed in the financial statements. An other-matter paragraph does not include information that the auditor is prohibited from providing by law, regulation, or other professional standards (for example, ethical standards relating to confidentiality of information). An other-matter paragraph also does not include information that is required to be provided by management.

Placement of Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Auditor's Report (Ref: par. .09, .11)

.A14 This section does not specify the placement of an emphasis-of-matter paragraph or other-matter paragraph in the auditor's report. Rather, the placement depends on the nature of the information to be communicated and the auditor's judgment about the relative significance of such information to intended users compared to other elements required to be reported in accordance with section 700. The following are examples of considerations related to the placement of emphasis-of-matter and other-matter paragraphs:

- *Emphasis-of-Matter Paragraphs.* When a "Key Audit Matters" section is presented in the auditor's report, an emphasis-of-matter paragraph may be presented either directly before or after the "Key Audit Matters" section, based on the auditor's judgment about the relative significance of the information included in the emphasis-of-matter paragraph. The auditor may also add further context to the heading "Emphasis of Matter," such as "Emphasis of Matter — Subsequent Event," to differentiate the emphasis-of-matter paragraph from the individual matters described in the "Key Audit Matters" section.
- *Other-Matter Paragraphs.*
  - — When a "Key Audit Matters" section is presented in the auditor's report and an other-matter paragraph is also considered necessary, the auditor may add further context to the heading "Other Matter," such as "Other Matter — Scope of the Audit," to differentiate the other-matter paragraph from the individual matters described in the "Key Audit Matters" section.
  - — When an other-matter paragraph is included to draw users' attention to a matter relating to other reporting responsibilities addressed in the auditor's report, the paragraph may be included in the section "Report on Other Legal and Regulatory Requirements."

— When it is relevant to all the auditor's responsibilities or to users' understanding of the auditor's report, the other-matter paragraph may be included as a separate section following the sections "Report on the Audit of the Financial Statements" and "Report on Other Legal and Regulatory Requirements."

.A15 Illustration 2 in exhibit A shows the interaction between the "Key Audit Matters" section, an emphasis-of-matter paragraph, and an other-matter paragraph when all are presented in the auditor's report.

Communication With Those Charged With Governance (Ref. par. .12)

.A16 The auditor's communication with those charged with governance required by paragraph .12 enables those charged with governance to be made aware of the nature of any specific matters that the auditor intends to highlight in the auditor's report and provides them with an opportunity to obtain further clarification from the auditor when necessary. As discussed in paragraph .A50 of section 260, *The Auditor's Communication With Those Charged With Governance*, certain matters may be important to communicate prior to the issuance of the auditor's report. When the inclusion of an other-matter paragraph on a particular matter in the auditor's report recurs on each successive engagement, the auditor may determine that it is unnecessary to repeat the communication on each engagement.

Exhibit A — Illustrations of Auditor's Reports With Emphasis-of-Matter or Other-Matter Paragraphs

.A17

Illustration 1 — An Auditor's Report With an Emphasis-of-Matter Paragraph Because There Is Uncertainty Relating to a Pending Unusually Important Litigation Matter

Illustration 2 — An Auditor's Report That Includes a Key Audit Matters Section, an Emphasis-of-Matter Paragraph, and an Other-Matter Paragraph

Illustration 3 — An Auditor's Report With an Other-Matter Paragraph That May Be Appropriate When an Auditor Issues an Updated Report on the Financial Statements of a Prior Period That Contains an Opinion Different From the Opinion Previously Expressed

Illustration 4 — An Auditor's Report With a Qualified Opinion Due to a Material Misstatement of the Financial Statements and an Emphasis-of-Matter Paragraph Because There Is Uncertainty Relating to a Pending Unusually Important Litigation Matter

Illustration 1 — An Auditor's Report With an Emphasis-of-Matter Paragraph Because There Is Uncertainty Relating to a Pending Unusually Important Litigation Matter

Circumstances include the following:

- Audit of a complete set of general purpose financial statements (single year). The audit is not a group audit.
- Management is responsible for the preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America as promulgated by the Financial Accounting Standards Board.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210A, *Terms of Engagement*.
- The auditor has concluded that an unmodified (that is, "clean") opinion is appropriate based on the audit evidence obtained.
- There is uncertainty relating to a pending unusually important litigation matter.
- The auditor's report includes an emphasis-of-matter paragraph.[1]
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- The auditor has not been engaged to communicate key audit matters.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Audit of the Financial Statements[2]

Opinion

We have audited the financial statements of ABC Company, which comprise the balance sheet as of December 31, 20X1, and the related statements of income, changes in stockholders' equity, and cash flows for the year then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects the financial position of ABC Company as of December 31, 20X1, and the results

[1]Paragraph .A14 of this section provides guidance about the placement of an emphasis-of-matter or other-matter paragraph in the auditor's report.

[2]The subtitle "Report on the Audit of the Financial Statements" is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

of its operations and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Emphasis of Matter

As discussed in Note X to the financial statements, ABC Company is a defendant in a lawsuit [*briefly describe the nature of the litigation consistent with the Company's description in the note to the financial statements*]. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.[3]
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Report on Other Legal and Regulatory Requirements

[*The form and content of this section of the auditor's report would vary depending on the nature of the auditor's other reporting responsibilities.*]

[*Signature of the auditor's firm*]

[*City and state where the auditor's report is issued*]

[*Date of the auditor's report*]

[3] In circumstances in which the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, omit the following: "but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed."

Illustration 2 — An Auditor's Report That Includes a Key Audit Matters Section, an Emphasis-of-Matter Paragraph, and an Other-Matter Paragraph

Circumstances include the following:

- Audit of a complete set of general purpose financial statements. The audit is not a group audit.
- Management is responsible for the preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America as promulgated by the Financial Accounting Standards Board.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210A, *Terms of Engagement*.
- The auditor has concluded that an unmodified (that is, "clean") opinion is appropriate based on the audit evidence obtained.
- Between the date of the financial statements and the date of the auditor's report, there was a fire in the entity's production facilities, which was disclosed by the entity as a subsequent event. In the auditor's judgment, the matter is of such importance that it is fundamental to users' understanding of the financial statements. The matter did not require significant auditor attention in the audit of the financial statements in the current period.[1]
- The prior period financial statements were audited by a predecessor auditor.
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- The auditor has obtained all the other information prior to the date of the auditor's report and has not identified an uncorrected material misstatement of the other information included in the annual report.
- The auditor has been engaged to communicate key audit matters.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Audit of the Financial Statements[2]

[1]Paragraph .A14 of this section provides guidance about the placement of an emphasis-of-matter or other-matter paragraph in the auditor's report.

[2]The subtitle "Report on the Audit of the Financial Statements" is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

Opinion

We have audited the financial statements of ABC Company, which comprise the balance sheet as of December 31, 20X1, and the related statements of income, changes in stockholders' equity, and cash flows for the year then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X1, and the results of its operations and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Emphasis of Matter[3]

As discussed in Note X to the financial statements, subsequent to the date of the financial statements, there was a fire in ABC Company's production facilities. Our opinion is not modified with respect to this matter.

Key Audit Matters

Key audit matters are those matters that were communicated with those charged with governance and, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

[*Description of each key audit matter in accordance with section 701*, Communicating Key Audit Matters in the Independent Auditor's Report]

Other Matter

The financial statements of ABC Company for the year ended December 31, 20X0, were audited by another auditor, who expressed an unmodified opinion on those statements on March 31, 20X1.

Responsibilities of Management for the Financial Statements

[3]As noted in paragraph .A14, an emphasis-of-matter paragraph may be presented either directly before or after the "Key Audit Matters" section, based on the auditor's judgment about the relative significance of the information included in the emphasis-of-matter paragraph.

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.[4]
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.

[4]In circumstances in which the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, omit the following: "but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed."

- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Other Information [or another title, if appropriate, such as "Information Other Than the Financial Statements and Auditor's Report Thereon"]

[*Reporting in accordance with the reporting requirements in section 720,* The Auditor's Responsibilities Relating to Other Information Included in Annual Reports.]

Report on Other Legal and Regulatory Requirements

[*The form and content of this section of the auditor's report would vary depending on the nature of the auditor's other reporting responsibilities.*]

[*Signature of the auditor's firm*]

[*City and state where the auditor's report is issued*]

[*Date of the auditor's report*]

Illustration 3 — An Auditor's Report With an Other-Matter Paragraph That May Be Appropriate When an Auditor Issues an Updated Report on the Financial Statements of a Prior Period That Contains an Opinion Different From the Opinion Previously Expressed

Circumstances include the following:

- Audit of a complete set of general purpose financial statements (comparative). The audit is not a group audit.
- Management is responsible for the preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America as promulgated by the Financial Accounting Standards Board.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210A, *Terms of Engagement*.
- The auditor's report on the prior period financial statements expressed an adverse opinion due to identified departures from accounting principles generally accepted in the United States of America that resulted in the financial statements being materially misstated. The entity has elected to change its method of accounting for the matters that gave rise to the adverse opinion in the prior period and has restated the prior period financial statements. Therefore, the auditor has expressed an unmodified opinion on the comparative financial statements.
- The auditor's report includes an other-matter paragraph indicating that the updated report on the financial statements of the prior period contains an opinion different from the opinion previously expressed, as required by section 700. Although the entity changed its method of accounting for the matters that gave rise to the adverse opinion in the prior period and corrected the material misstatement in the 20X0 financial statements, the principal objective of the communication in the other-matter paragraph is to draw users' attention to the change in the auditor's opinion on the prior period financial statements. The other-matter paragraph refers to the change in accounting principle and the related disclosure in the financial statements. Therefore, the other-matter paragraph also meets the objective of communicating the change in accounting principle as required by section 708, *Consistency of Financial Statements*, and a separate emphasis-of-matter paragraph is not considered necessary.[1]
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- The auditor has not been engaged to communicate key audit matters.

[1]Paragraph .A14 of this section provides guidance about the placement of an emphasis-of-matter or other-matter paragraph in the auditor's report

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Audit of the Financial Statements[2]

Opinion

We have audited the financial statements of ABC Company, which comprise the balance sheets as of December 31, 20X1 and 20X0, and the related statements of income, changes in stockholders' equity, and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X1 and 20X0, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Other Matter

In our report dated March 1, 20X1, we expressed an opinion that the 20X0 financial statements did not fairly present the financial position, results of operations, and cash flows of ABC Company in accordance with accounting principles generally accepted in the United States of America because of two departures from such principles: (1) ABC Company carried its property, plant, and equipment at appraisal values, and provided for depreciation on the basis of such values, and (2) ABC Company did not provide for deferred income taxes with respect to differences between income for financial reporting purposes and taxable income. As described in Note X, the Company has changed its method of accounting for these items and restated its 20X0 financial statements to conform with accounting principles generally accepted in the United States of America. Accordingly, our present opinion on the restated 20X0 financial statements, as presented herein, is different from that expressed in our previous report.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United

[2]The subtitle "Report on the Audit of the Financial Statements" is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.[3]
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.

[3]In circumstances in which the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, omit the following: "but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed."

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Report on Other Legal and Regulatory Requirements

[*The form and content of this section of the auditor's report would vary depending on the nature of the auditor's other reporting responsibilities.*]

[*Signature of the auditor's firm*]

[*City and state where the auditor's report is issued*]

[*Date of the auditor's report*]

Illustration 4 — An Auditor's Report With a Qualified Opinion Due to a Material Misstatement of the Financial Statements and an Emphasis-of-Matter Paragraph Because There Is Uncertainty Relating to a Pending Unusually Important Litigation Matter

Circumstances include the following:

- Audit of a complete set of general purpose financial statements (single year). The audit is not a group audit.
- Management is responsible for the preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America as promulgated by the Financial Accounting Standards Board.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section 210A, *Terms of Engagement*.
- Inventories are misstated. The misstatement is deemed to be material but not pervasive to the financial statements.
- There is uncertainty relating to a pending unusually important litigation matter.
- The auditor's report includes a qualified opinion and also includes an emphasis-of-matter paragraph.[1]
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- The auditor has not been engaged to communicate key audit matters.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Audit of the Financial Statements[2]

Qualified Opinion

We have audited the financial statements of ABC Company, which comprise the balance sheet as of December 31, 20X1, and the related statements of income, changes in stockholders' equity, and cash flows for the year then ended, and the related notes to the financial statements.

[1]Paragraph .A14 of this section provides guidance about the placement of an emphasis-of-matter or other-matter paragraph in the auditor's report.

[2]The subtitle "Report on the Audit of the Financial Statements" is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

In our opinion, except for the effects of the matter described in the Basis for Qualified Opinion section of our report, the accompanying financial statements present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X1, and the results of its operations and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Qualified Opinion

ABC Company has stated inventories at cost in the accompanying balance sheet. Accounting principles generally accepted in the United States of America require inventories to be stated at the lower of cost or market. If the Company stated inventories at the lower of cost or market, a write down of $XXX would have been required as of December 31, 20X1. Accordingly, cost of sales would have been increased by $XXX and net income, income taxes, and stockholders' equity would have been reduced by $XXX, $XXX, and $XXX, as of and for the year ended December 31, 20X1, respectively.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified audit opinion.

Emphasis of Matter — Litigation

As discussed in Note X to the financial statements, the Company is a defendant in a lawsuit [*briefly describe the nature of the litigation consistent with the Company's description in the note to the financial statements*]. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.[3]
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Report on Other Legal and Regulatory Requirements

[*The form and content of this section of the auditor's report would vary depending on the nature of the auditor's other reporting responsibilities.*]

[*Signature of the auditor's firm*]

[*City and state where the auditor's report is issued*]

[*Date of the auditor's report*]

[3]In circumstances in which the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, omit the following: "but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed."

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 137.]

Exhibit B — List of AU-C Sections Containing Requirements for Emphasis-of-Matter Paragraphs (Ref: par. .04)

.A18 This exhibit identifies paragraphs in other AU-C sections that require the auditor to include an emphasis-of-matter paragraph in the auditor's report in certain circumstances. The list is not a substitute for considering the requirements and related application and other explanatory material in specific AU-C sections.

- Paragraph .07 of section 905, *Alert That Restricts the Use of the Auditor's Written Communication*

[Revised, June 2020, to reflect conforming changes necessary due to the issuance of SAS No. 138. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 140.]

AU-C Section 708

Consistency of Financial Statements

Source: SAS No. 122; SAS No. 136.

Effective for audits of financial statements for periods ending on or after December 15, 2012, unless otherwise indicated.

Introduction

Scope of This Section

.01 This section addresses the auditor's evaluation of the consistency of the financial statements between periods, including changes to previously issued financial statements and the effect of that evaluation on the auditor's report on the financial statements.

Effective Date

.02 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objectives

.03 The objectives of the auditor are to

a. evaluate the consistency of the financial statements for the periods presented and

b. communicate appropriately in the auditor's report when the comparability of financial statements between periods has been materially affected by a change in accounting principle or by adjustments to correct a material misstatement in previously issued financial statements.

Definition

.04 For purposes of generally accepted auditing standards, the following term has the meaning attributed as follows:

Current period. The most recent period upon which the auditor is reporting.

Requirements

Evaluating Consistency

.05 The auditor should evaluate whether the comparability of the financial statements between periods has been materially affected by a change in accounting principle or by adjustments to correct a material misstatement in previously issued financial statements. (Ref: par. .A1)

.06 The periods included in the auditor's evaluation of consistency depend on the periods covered by the auditor's opinion on the financial statements. When the auditor's opinion covers only the current period, the auditor should evaluate whether the current-period financial statements are consistent with those of the preceding period, regardless of whether financial statements for the preceding period are presented. When the auditor's opinion covers two or more periods, the auditor should evaluate consistency between such periods and the consistency of the earliest period covered by the auditor's opinion with the period prior thereto, if such prior period is presented with the financial statements being reported upon. The auditor also should evaluate whether the financial statements for the periods being reported upon are consistent with previously issued financial statements for the relevant periods. (Ref: par. .A2–.A3)

Change in Accounting Principle

.07 The auditor should evaluate a change in accounting principle to determine whether (Ref: par. .A4–.A6)

a. the newly adopted accounting principle is in accordance with the applicable financial reporting framework,

b. the method of accounting for the effect of the change is in accordance with the applicable financial reporting framework,

c. the disclosures related to the accounting change are appropriate and adequate, and

d. the entity has justified that the alternative accounting principle is preferable.

.08 If the auditor concludes that the criteria in paragraph .07 have been met, and the change in accounting principle has a material effect on the financial statements, the auditor should include an emphasis-of-matter paragraph[1] in the auditor's report that describes the change in accounting principle and provides a reference to the entity's disclosure. If the criteria in paragraph .07 are not met, the auditor should evaluate whether the accounting change results in a material misstatement and whether the auditor should modify the opinion accordingly.[2] (Ref: par. .A7–.A9)

.09 The auditor should include an emphasis-of-matter paragraph relating to a change in accounting principle in reports on financial statements in the period of the change, and in subsequent periods, until the new accounting principle is applied in all periods presented. If the change in accounting principle is accounted for by retrospective application to the financial statements of all prior periods presented, the emphasis-of-matter paragraph is needed only in the period of such change.

---

[1]Paragraphs .06–.07 of section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report*.

[2]See section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

.10 The auditor should evaluate and report on a change in accounting estimate that is inseparable from the effect of a related change in accounting principle like other changes in accounting principle, as required by paragraphs .08–.09. (Ref: par. .A10)

.11 When a change in the reporting entity results in financial statements that, in effect, are those of a different reporting entity, the auditor should include an emphasis-of-matter paragraph in the auditor's report that describes the change in the reporting entity and provides a reference to the entity's disclosure, unless the change in reporting entity results from a transaction or event. The requirements in paragraph .09 also apply. (Ref: par. .A11)

.12 If an entity's financial statements contain an investment accounted for by the equity method, the auditor's evaluation of consistency should include consideration of the investee. If the investee makes a change in accounting principle that is material to the investing entity's financial statements, the auditor should include an emphasis-of-matter paragraph in the auditor's report to describe the change in accounting principle. The requirements in paragraph .09 also apply.

Correction of a Material Misstatement in Previously Issued Financial Statements

.13 The auditor should include an emphasis-of-matter paragraph in the auditor's report when there are adjustments to correct a material misstatement in previously issued financial statements. The auditor should include this type of emphasis-of-matter paragraph in the auditor's report when the related financial statements are restated to correct the prior material misstatement. The paragraph need not be repeated in subsequent periods. (Ref: par. .A12–.A13)

.14 The emphasis-of-matter paragraph should include

a. a statement that the previously issued financial statements have been restated for the correction of a material misstatement in the respective period and

b. a reference to the entity's disclosure of the correction of the material misstatement. (Ref: par. .A14)

.15 If the financial statement disclosures relating to the restatement to correct a material misstatement in previously issued financial statements are not adequate, the auditor should address the inadequacy of disclosure as described in section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

Change in Classification

.16 The auditor should evaluate a material change in financial statement classification and the related disclosure to determine whether such a change is also either a change in accounting principle or an adjustment to correct a material misstatement in previously issued financial statements. If so, the requirements of paragraphs .07–.15 apply. (Ref: par. .A15–.A16)

Application and Other Explanatory Material

Evaluating Consistency (Ref: par. .05–.06)

.A1 Unless the auditor's report explicitly states otherwise, the auditor's report implies that the auditor is satisfied that the comparability of financial statements between periods has not been materially affected by a change in accounting principle or by adjustments to correct a material misstatement in previously issued financial statements. There may be no effect on comparability between or among periods because either (*a*) no change in an accounting principle has occurred, or (*b*) there has been a change in an accounting principle or in the method of application, but the effect of the change on the comparability of the financial statements is not material. When no material effect on comparability results from a change in accounting principle or an adjustment to previously issued financial statements, the auditor need not refer to consistency in the auditor's report.

.A2 The periods covered in the auditor's evaluation of consistency depend on the periods covered by the auditor's opinion on the financial statements. If an entity presents comparative financial statements and has a change in auditors in the current year, the auditor evaluates consistency between the year covered by the auditor's opinion and the immediately preceding year in accordance with the requirements in paragraph .06.

.A3 When an entity accounts for a change in accounting principle by applying the principle to one or more prior periods that were included in previously issued financial statements, as if that principle had always been used (commonly referred to as *retrospective application*), the financial statements presented generally will be consistent. However, the previous periods' financial statements presented with the current period's financial statements will reflect the change in accounting principle and, therefore, will appear different from those previous periods' financial statements on which the auditor previously reported. The evaluation required by paragraph .06 encompasses previously issued financial statements for the relevant periods.

Change in Accounting Principle (Ref: par. .07)

.A4 A change in accounting principle is a change from one accounting principle in accordance with the applicable financial reporting framework to another accounting principle in accordance with the applicable financial reporting framework when (1) two or more accounting principles apply or (2) the accounting principle formerly used is no longer in accordance with the applicable financial reporting framework. A change in the method of applying an accounting principle also is considered a change in accounting principle.

.A5 The applicable financial reporting framework usually sets forth the method of accounting for the effects of a change in accounting principle and the related disclosures.

.A6 The issuance of an accounting pronouncement that requires use of a new accounting principle, interprets an existing principle, expresses a preference for an accounting principle, or rejects a specific principle is sufficient justification for a change in accounting principle, as long as the change in accounting principle is made in accordance with the applicable financial reporting framework.

Reporting on Changes in Accounting Principles (Ref: par. .08–.11)

.A7 The following is an example of an emphasis-of-matter paragraph for a change in accounting principle resulting from the adoption of a new accounting pronouncement:

> *Emphasis of Matter*
>
> As discussed in Note X to the financial statements, in [*insert year(s) of financial statements that reflect the accounting method change*], the entity adopted new accounting guidance [*insert description of new accounting guidance*]. Our opinion is not modified with respect to this matter.

.A8 The following is an example of an emphasis-of-matter paragraph when the entity has made a voluntary change in accounting principle (that is, other than a change due to the adoption of a new accounting pronouncement).

> *Emphasis of Matter*
>
> As discussed in Note X to the financial statements, the entity has elected to change its method of accounting for [*describe accounting method change*] in [*insert year(s) of financial statements that reflect the accounting method change*]. Our opinion is not modified with respect to this matter.

.A9 If a change in accounting principle does not have a material effect on the financial statements in the current year but the change is expected to have a material effect in later years, the auditor is not required to recognize the change in the auditor's report in the current year. The applicable financial reporting framework may include a requirement for the entity to disclose such situations in the notes to the financial statements. Section 700, *Forming an Opinion and Reporting on Financial Statements*, section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, as applicable, and section 705 require the auditor to evaluate the appropriateness and adequacy of disclosures in connection with forming an opinion and reporting on the financial statements.[3] [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

.A10 Paragraph .10 requires the auditor to evaluate and report on a change in accounting estimate that is inseparable from the effect of a related change in accounting principle like other changes in accounting principle. It is sometimes difficult to differentiate between a change in an accounting estimate and a change in an accounting principle because the change in accounting estimate may be inseparable from the effect of a related change in

[3]Paragraph .15 of section 700, *Forming an Opinion and Reporting on Financial Statements*, paragraph .40 of section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, and paragraphs .07 and .A7 of section 705. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

accounting principle. For example, when a change is made to the method of depreciation of an asset to reflect a change in the estimated future benefit of the asset or the pattern of consumption for those benefits, such change in accounting may be inseparable from a change in estimate.

Change in Reporting Entity

.A11 A change in reporting entity that results from a transaction or event, such as the creation, cessation, or complete or partial purchase or disposition of a subsidiary or other business unit, does not require recognition in the auditor's report. Examples of a change in the reporting entity that is not a result of a transaction or event include

a. presenting consolidated or combined financial statements in place of financial statements of individual entities.

b. changing specific subsidiaries that make up the group of entities for which consolidated financial statements are presented.

c. changing the entities included in combined financial statements.

Correction of a Material Misstatement in Previously Issued Financial Statements (Ref: par. .13–.14)

.A12 A change from an accounting principle that is not in accordance with the applicable financial reporting framework to one that is in accordance with the applicable financial reporting framework is a correction of a misstatement.

.A13 Section 560, *Subsequent Events and Subsequently Discovered Facts*, addresses the auditor's responsibilities when adjustments have been made to correct a material misstatement in previously issued financial statements.

Reporting on a Correction of a Material Misstatement in Previously Issued Financial Statements

.A14 The following is an example of an emphasis-of-matter paragraph when there has been a correction of a material misstatement in previously issued financial statements:

Emphasis of Matter

As discussed in Note X to the financial statements, the 20X2 financial statements have been restated to correct a misstatement. Our opinion is not modified with respect to this matter.

Change in Classification (Ref: par. .16)

.A15 Changes in classification in previously issued financial statements do not require recognition in the auditor's report unless the change represents the correction of a material misstatement or a change in accounting principle. For example, certain reclassifications in previously issued financial statements, such as reclassifications of debt from long-term to short-term or reclassifications of cash flows from the operating activities category to the financing activities category, might occur because those items were classified incorrectly in the previously issued financial statements. In such situations, the reclassification also is the correction of a misstatement.

.A16 In some cases, changes in classification in previously issued financial statements may result from changes in the entity's business or operating structure. The auditor may need to obtain a further understanding of the underlying rationale for such reclassifications to determine whether the requirements of paragraph .16 apply.

AU-C Section 720

The Auditor's Responsibilities Relating to Other Information Included in Annual Reports

Source: SAS No. 137; SAS No. 141; SAS No. 145.

Effective for audits of financial statements for periods ending on or after December 15, 2021.

Note

In June 2022, the ASB issued SAS No. 146, *Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, which contains amendments to this section.

The amendments are effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025, and can be viewed in the appendix of section 220 until the effective date, when they will be applied to this section.

In March 2023, the ASB issued SAS No. 149, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors and Audits of Referred-to Auditors)*, which contains amendments to this section.

The amendments are effective for audits of financial statements for periods ending on or after December 15, 2026, and can be viewed in appendix C of section 600 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibilities relating to other information, whether financial or nonfinancial information (other than financial statements and the auditor's report thereon), included in an entity's annual report. An entity's annual report may be a single document or a combination of documents that serve the same purpose.

.02 This section also may be applied, and adapted as necessary in the circumstances, to other documents to which the auditor, at management's request, devotes attention. (Ref: par. .A1–.A3)

.03 This section is written in the context of an audit of financial statements by an independent auditor. Accordingly, the objectives of the auditor in this section are to be understood in the context of the overall objectives of the auditor as stated in section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.[1] The requirements in the standards are designed to enable the auditor to achieve the objectives specified in the standards, and thereby the overall objectives of the auditor. The auditor's opinion on the financial statements does not cover the other information, nor does this section require the auditor to obtain audit evidence beyond that required to form an opinion on the financial statements.

.04 This section requires the auditor to read and consider the other information because other information that is materially inconsistent with the financial statements or the auditor's knowledge obtained in the audit may indicate that a material misstatement of the financial statements or that a material misstatement of the other information exists, either of which may undermine the credibility of the financial statements and the auditor's report thereon.

.05 Other information may include amounts or other items that are intended to be the same as, to summarize, or to provide greater detail about amounts or other items in the financial statements and other amounts or other items about which the auditor has obtained knowledge in the audit. Other information may include nonfinancial information.

.06 The auditor's responsibilities relating to other information, other than applicable reporting requirements, apply regardless of whether the other information is obtained by the auditor prior to or after the date of the auditor's report.

.07 The auditor's responsibilities under this section do not constitute an assurance engagement on other information or impose an obligation on the auditor to obtain assurance about the other information.

.08 Law or regulation may impose additional obligations on the auditor in relation to other information that are beyond the scope of this section.

.09 This section does not apply to supplemental information addressed by section 725, *Supplementary Information in Relation to the Financial Statements as a Whole*, or required supplementary information addressed by section 730, *Required Supplementary Information*. (Ref: par. .A2)

Effective Date

.10 This section is effective for audits of financial statements for periods ending on or after December 15, 2021. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 141.]

[1] Paragraph .12 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

Objectives

.11 The objectives of the auditor, having read the other information, are as follows:

a. To consider whether a material inconsistency exists between the other information and the financial statements

b. To remain alert for indications that

   i. a material inconsistency exists between the other information and the auditor's knowledge obtained in the audit or

   ii. a material misstatement of fact exists or the other information is otherwise misleading

c. To respond appropriately when the auditor identifies that such material inconsistencies appear to exist, or when the auditor otherwise becomes aware that other information appears to be materially misstated

d. To report in accordance with this section

Definitions

.12 For purposes of the auditing standards, the following terms have the meanings attributed:

Annual report. A document, or combination of documents, typically prepared on an annual basis by management or those charged with governance in accordance with law, regulation, or custom, the purpose of which is to provide owners (or similar stakeholders) with information on the entity's operations and the entity's financial results and financial position as set out in the financial statements. An annual report contains, accompanies, or incorporates by reference the financial statements and the auditor's report thereon and usually includes information about the entity's developments, its future outlook and risks and uncertainties, a statement by the entity's governing body, and reports covering governance matters. Annual reports include annual reports of governments and organizations for charitable or philanthropic purposes that are available to the public. (Ref: par. .A4–.A10)

Misstatement of the other information. A misstatement of the other information exists when the other information is incorrectly stated or otherwise misleading. (Ref: par. .A11–.A12)

Other information. Financial or nonfinancial information (other than financial statements and the auditor's report thereon) included in an entity's annual report. (Ref: par. .A13)

Requirements

Obtaining the Other Information

.13 The auditor should do the following: (Ref: par. .A14–.A24)

a. Through discussion with management, determine and obtain management's written acknowledgment regarding which document or documents comprise the annual report and the entity's planned manner and timing of the issuance of such documents.

b. Make appropriate arrangements with management to obtain in a timely manner and, if possible, prior to the date of the auditor's report, the final version of the document or documents comprising the annual report.

c. When some or all the documents determined in (*a*) will not be available until after the date of the auditor's report on the financial statements, request management to provide a written representation that the final version of the documents will be provided to the auditor when available, and prior to the document's issuance by the entity, such that the auditor can complete the procedures required by this section. (Ref: par. .A23–.A24)

.14 If the auditor becomes aware that the entity did not provide the auditor with the final version of documents determined in accordance with paragraph .13*a* to be part of the annual report prior to the issuance of those documents to third parties, the auditor should take appropriate action. (Ref: par. .A25)

Communication With Those Charged With Governance

.15 The auditor should communicate with those charged with governance the auditor's responsibility with respect to other information, the procedures performed related to the other information, and the results.

Reading and Considering the Other Information

.16 The auditor should read the other information and consider whether a material inconsistency exists between the other information and the financial statements. As the basis for this consideration, to evaluate their consistency, the auditor should compare selected amounts or other items in the other information (that are intended to be the same as, to summarize, or to provide greater detail about the amounts or other items in the financial statements) with such amounts or other items in the financial statements. (Ref: par. .A26–.A32)

.17 While reading the other information in accordance with paragraph .16, the auditor should remain alert for indications that (Ref: par. .A33–.A42)

a. a material inconsistency exists between the other information and the auditor's knowledge obtained in the audit.

b. a material misstatement of fact exists or the other information is otherwise misleading.

.18 The auditor is not responsible for searching for omitted information or for the completeness of the other information.

Responding When a Material Inconsistency Appears to Exist or Other Information Appears to Be Materially Misstated

.19 If the auditor identifies that a material inconsistency appears to exist (or becomes aware that the other information appears to be materially misstated), the auditor should discuss the matter with management and, if necessary, perform other procedures to conclude the following: (Ref: par. .A43–.A47)

a. Whether a material misstatement of the other information exists

b. Whether a material misstatement of the financial statements exists

c. Whether the auditor's understanding of the entity and its environment needs to be updated

Responding When the Auditor Concludes That a Material Misstatement of the Other Information Exists

.20 If the auditor concludes that a material misstatement of the other information exists, the auditor should request management to correct the other information and

a. if management agrees to make the correction, determine that the correction has been made.

b. if management refuses to make the correction, communicate the matter to those charged with governance and request that the correction be made.

.21 If the auditor concludes that a material misstatement exists in other information obtained prior to the date of the auditor's report, and the other information is not corrected after communicating with those charged with governance, the auditor should (Ref: par. .A48)

a. consider the implications for the auditor's report and communicate to those charged with governance about how the auditor plans to address the material misstatement in the auditor's report (see paragraph .24*c*ii); (Ref: par. .A49)

b. withhold the auditor's report; or (Ref: par. .A51)

c. withdraw from the engagement, when withdrawal is possible under applicable law or regulation. (Ref: par. .A50–.A51)

.22 If the auditor concludes that a material misstatement exists in other information obtained after the date of the auditor's report, the auditor should do the following:

a. If the other information is corrected, perform the procedures necessary in the circumstances. (Ref: par. .A52)

b. If the other information is not corrected after communicating with those charged with governance, take appropriate action considering the auditor's legal rights and obligations to seek to have the uncorrected material misstatement appropriately brought to the attention of anyone in receipt of the financial statements and the auditor's report. (Ref: par. .A53–.A54)

Responding When a Material Misstatement in the Financial Statements Exists or the Auditor's Understanding of the Entity and Its Environment Needs to Be Updated

.23 If, as a result of performing the procedures in paragraphs .16–.18, the auditor concludes that a material misstatement in the financial statements exists or the auditor's understanding of the entity and its environment needs to be updated, the auditor should respond appropriately in accordance with other relevant AU-C sections. (Ref: par. .A55)

Reporting

.24 At the date of the auditor's report, when the auditor has obtained all the other information, the composition of which was determined through discussion with management and for which the auditor obtained management's written acknowledgment (pursuant to paragraph .13*a*), the auditor should include a separate section in the auditor's report on the financial statements with the heading "Other Information" or other appropriate heading. The "Other Information" section in the auditor's report on the financial statements should include the following: (Ref: par. .A56)

a. A statement that management is responsible for the other information

b. An identification of other information and a statement that the other information does not include the financial statements and the auditor's report thereon

c. A statement that the auditor's opinion on the financial statements does not cover the other information and that the auditor does not express an opinion or any form of assurance thereon

d. A statement that, in connection with the audit of the financial statements, the auditor is responsible to read the other information and consider whether a material inconsistency exists between the other information and the financial statements or the other information otherwise appears to be materially misstated

e. A statement that, if, based on the work performed, the auditor concludes that an uncorrected material misstatement of the other information exists, the auditor is required to describe it in the auditor's report

f. If the auditor has concluded that an uncorrected material misstatement of the other information exists, a statement that the auditor has concluded that an uncorrected material misstatement of the other information exists and a description of it in the auditor's report

.25 When the auditor expresses a qualified or adverse opinion in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*, the auditor should consider the implications of the matter giving rise to the modification of opinion for the statement required in paragraph .24*f* of this section. (Ref: par. .A57–.A61)

Documentation

.26 In addressing the requirements in section 230, *Audit Documentation*,[2] as those requirements apply to this section, the auditor should include the following in the audit documentation:

a. The procedures performed under this section

b. The final version of the other information on which the auditor has performed the work required under this section

Application and Other Explanatory Material

Scope of This Section (Ref: par. .02 and .09)

.A1 In instances in which the auditor applies this section to other documents to which the auditor, at management's request, devotes attention, the requirements of this section are applicable, adapted as necessary in the circumstances.

.A2 Other AU-C sections provide requirements and guidance with respect to information in certain documents other than annual reports. For example, section 925, *Filings With the U.S. Securities and Exchange Commission Under the Securities Act of 1933*; section 945, *Auditor Involvement With Exempt Offering Documents*; and Statement on Auditing Standards No. 136, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA* (sec. 703).[3]

.A3 This section also addresses other information for which a designated accounting standard setter[4] has issued standards or guidance regarding the format to be used and content to be included when such information is voluntarily presented in an annual report — for example, GASB Statement No. 44, *Economic Condition Reporting: The Statistical Section*.

---

[2]Paragraphs .08–.11 of section 230, *Audit Documentation*.

[3]Statement on Auditing Standards No. 136, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA* (sec. 703), is effective for audits of financial statements for periods ending on or after December 15, 2021.

[4]*Designated accounting standards setter* is defined in paragraph .04 of section 730, *Required Supplementary Information*.

Definitions

Annual Report (Ref: par. .12)

.A4 Law, regulation, or custom may define the content of an annual report and the name by which it is to be referred.

.A5 An annual report is typically prepared on an annual basis. However, when the financial statements being audited are prepared for a period less than or more than a year, an annual report may also be prepared that covers the same period as the financial statements.

.A6 In some cases, an entity's annual report may be a single document and referred to by the title "Annual Report" or by some other title. In other cases, law, regulation, or custom may require the entity to report to owners (or similar stakeholders) information on the entity's operations and the entity's financial results and financial position as set out in the financial statements (that is, an annual report) by way of a single document or by way of two or more separate documents that, in combination, serve the same purpose.

.A7 An annual report may be made available to users in printed form, or electronically, including on the entity's website. A document (or combination of documents) may meet the definition of an *annual report*, irrespective of the manner in which it is made available to users.

.A8 An annual report is different in nature, purpose, and content from other reports, such as a report prepared to meet the information needs of a specific stakeholder group or a report prepared to comply with a specific regulatory reporting objective (even when such a report is required to be publicly available). Examples of reports that, when issued as stand-alone documents, are not typically part of the combination of documents that comprise an annual report (subject to law, regulation, or custom), and, therefore, are not other information within the scope of this section, include the following:

- IRS Form 990, *Return of Organization Exempt From Income Tax*
- IRS Form 5500, *Annual Return/Report of Employee Benefit Plan*
- Annual statement filed with National Association of Insurance Commissioners
- Separate industry or regulatory reports (for example, capital adequacy reports), such as those prepared in the banking, insurance, and pension industries
- Corporate social responsibility reports
- Sustainability reports
- Diversity and equal opportunity reports
- Product responsibility reports
- Labor practices and working conditions reports
- Human rights reports

.A9 Though a document may be referred to as an *annual report*, such document may not meet the definition of an *annual report* for purposes of this section.

Considerations Specific to Governmental Entities

.A10 The term *annual reports of governments* is intended to include annual comprehensive financial reports or other annual financial reports that include the government's financial statements and the auditor's report thereon.

Misstatement of the Other Information (Ref: par. .12)

.A11 A misstatement of the other information may be

- an inconsistency;
- a misstatement of fact; or
- information that is otherwise misleading, including because it omits or obscures information necessary for a user to appropriately understand a matter disclosed in the other information.

An inconsistency exists when other information conflicts with information contained in the financial statements. A material inconsistency may raise doubt about the audit conclusions drawn from audit evidence previously obtained and, possibly, about the basis for the auditor's opinion on the financial statements. A misstatement of fact exists when other information that is unrelated to matters appearing in the financial statements is incorrectly stated or presented. A material misstatement of fact may undermine the credibility of the annual report. Information that is otherwise misleading, including because it omits or obscures information necessary for a user to appropriately understand a matter disclosed in the other information, could result in a material misstatement of the other information.

.A12 The concept of materiality may be discussed in a framework applicable to the other information and, if so, such a framework may provide a frame of reference for the auditor in making judgments about materiality under this section. In many cases, however, there may be no applicable framework that includes a discussion of the concept of materiality as it applies to the other information. In such circumstances, the following characteristics provide the auditor with a frame of reference in determining if a misstatement of the other information is material:

- Materiality is considered in the context of the common information needs of users as a group. The users of the other information are expected to be the same as the users of the financial statements because such users may be expected to read the other information to provide context to the financial statements.
- Judgments about materiality take into account the specific circumstances of the misstatement, considering whether users would be influenced by the effect of the uncorrected misstatement. Not all misstatements will influence the economic decisions of users.

- Judgments about materiality involve both qualitative and quantitative considerations. Accordingly, such judgments may take into account the nature or magnitude of the items that the other information addresses in the context of the entity's annual report.

Other Information (Ref: par. .12)

.A13 The following are examples of amounts and other items that may be included in other information. This list is not intended to be exhaustive:

- Management report, management commentary, or operating and financial review or similar reports by those charged with governance (for example, a directors' report)
- Chairman's statement
- Corporate governance statement
- Management's internal control and risk assessment reports
- Financial summaries or highlights
- Employment data
- Planned capital expenditures
- Financial ratios
- Names of officers and directors
- Selected quarterly data

Obtaining the Other Information (Ref: par. .13–.14)

.A14 Determining the document or documents that comprise the annual report is often clear based on law, regulation, or custom. In many cases, management or those charged with governance may have customarily issued a package of documents that, together, comprise the annual report or may have committed to do so. In some cases, it may not be clear which documents comprise the annual report. In such cases, the timing and purpose of the documents (and for whom they are intended) are matters that may be relevant to the auditor's determination of which documents are the annual report.

.A15 In accordance with paragraph .13*a*, management's written acknowledgment may be included in the engagement letter, an amendment to the engagement letter, a representation letter, or some other written communication.

.A16 Management, or those charged with governance, is responsible for preparing the annual report. The auditor may communicate the following to management or those charged with governance:

- The auditor's expectations in relation to obtaining the final version of the annual report (including a combination of documents that, together, comprise the annual report) in a timely manner prior to the date of the auditor's report such that the auditor can complete the procedures required by this section before the date of the auditor's report, or if that is not possible, as soon as practicable and, in any case, prior to the entity's issuance of such information

- The possible implications when the other information is obtained after the date of the auditor's report

.A17 The communications referred to in paragraph .A16 may be particularly appropriate in the following instances:

- In an initial audit engagement
- When there has been a change in management or those charged with governance
- When other information is expected to be obtained after the date of the auditor's report

.A18 When those charged with governance are to approve the other information prior to its issuance by the entity, the final version of such other information is the version that has been approved by those charged with governance for issuance.

.A19 In some cases, the entity's annual report may be a single document to be released, in accordance with law or regulation or the entity's reporting practice, shortly after the entity's financial reporting period such that it is available to the auditor prior to the date of the auditor's report. In other cases, such a document may not be required to be released until a later time, or at a time of the entity's choosing. There may also be circumstances in which the entity's annual report is a combination of documents, each subject to different requirements or reporting practices by the entity with respect to the timing of their release.

.A20 Obtaining the other information in a timely manner prior to the date of the auditor's report enables any revisions that are found to be necessary to the financial statements, the auditor's report, or the other information prior to their issuance. The audit engagement letter[5] may make reference to an agreement with management to make available to the auditor the other information in a timely manner, and, if possible, prior to the date of the auditor's report.

.A21 When other information is made available to users only via the entity's website, the version of the other information obtained from the entity, rather than directly from the entity's website, is the relevant document on which the auditor would perform procedures in accordance with this section. The auditor has no responsibility in accordance with this section to search for other information, including other information that may be on the entity's website, nor to perform any procedures to confirm that other information is appropriately displayed on the entity's website or otherwise has been appropriately transmitted or displayed electronically.

.A22 The auditor is not precluded from dating or issuing the auditor's report if the auditor has not obtained some or all of the other information.

[5]Paragraph .A23 of section 210A, *Terms of Engagement*.

.A23 When the other information is obtained after the date of the auditor's report, the auditor is not required to update the procedures performed in accordance with section 560, *Subsequent Events and Subsequently Discovered Facts*.[6]

.A24 Section 580, *Written Representations*, establishes requirements and provides guidance on the use of written representations. The written representation regarding other information that will be available only after the date of the auditor's report is intended to support the auditor's ability to complete the procedures required by this section with respect to such information. In addition, the auditor may find it useful to request other written representations, such as the following:

- That management has informed the auditor of all the documents that it expects to issue that may be other information
- That the financial statements and any other information obtained by the auditor prior to the date of the auditor's report are consistent with one another, and the other information does not contain any material misstatements
- With regard to other information that has not been obtained by the auditor prior to the date of the auditor's report, that management intends to prepare and issue such other information and the expected timing of such issuance

.A25 In accordance with paragraph .14, appropriate actions that the auditor may take include the following:

- Obtaining those documents from management and performing the procedures required by this section as soon as practical
- Communicating the matter to those charged with governance, if applicable
- Considering the need to obtain legal advice

Reading and Considering the Other Information (Ref: par. .16–.17)

.A26 Section 200[7] requires the auditor to plan and perform the audit with professional skepticism. Maintaining professional skepticism when reading and considering the other information includes, for example, recognizing that management may be overly optimistic about the success of its plans.

.A27 In accordance with section 220A, *Quality Control for an Engagement Performed in Accordance With Generally Accepted Auditing Standards*,[8] the engagement partner is required to take responsibility for the direction, supervision, and performance of the audit engagement in compliance with professional standards and applicable legal and regulatory requirements. In the context of this section, factors that may be considered when

[6]Paragraphs .09–.11 of section 560, *Subsequent Events and Subsequently Discovered Facts*.

[7]Paragraph .17 of section 200.

[8]Paragraph .17*a* of section 220A, *Quality Control for an Engagement Performed in Accordance With Generally Accepted Auditing Standards*.

determining the appropriate engagement team members to address the requirements of paragraphs .16–.17 of this section include the following:

- The relative experience of engagement team members
- Whether the engagement team members have the relevant knowledge obtained in the audit to identify inconsistencies between the other information and that knowledge
- The degree of judgment involved in addressing the requirements of paragraphs .16–.17 of this section, for example, performing procedures to evaluate the consistency of amounts in the other information that are intended to be the same as amounts in the financial statements may be carried out by less experienced engagement team members
- Whether, in the case of a group audit, it is necessary to make inquiries of a component auditor in addressing the other information related to that component

.A28 Other information may include amounts or other items that are intended to be the same as, to summarize, or to provide greater detail about the amounts or other items in the financial statements. Examples of such amounts or other items may include the following:

- Tables, charts, or graphs containing extracts of the financial statements
- A disclosure providing greater detail about a balance or account shown in the financial statements, such as "Revenue for 20X1 was XXX million from product X and YYY million from product Y"
- Descriptions of the financial results, such as "Total research and development expense was XXX in 20X1"

.A29 In evaluating the consistency of selected amounts or other items in the other information with the financial statements, the auditor is not required to compare all amounts or other items in the other information that are intended to be the same as, to summarize, or to provide greater detail about the amounts or other items in the financial statements, with such amounts or other items in the financial statements.

.A30 Selecting the amounts or other items to compare is a matter of professional judgment. Factors relevant to this judgment include the following:

- The significance of the amount or other item in the context in which it is presented, which may affect the importance that users would attach to the amount or other item (for example, a key ratio or amount)
- If quantitative, the relative size of the amount compared with accounts or items in the financial statements or the other information to which they relate
- The sensitivity of the particular amount or other item in the other information, for example, share-based payments for senior management

.A31 Determining the nature and extent of procedures to address the requirement in paragraph .16 is a matter of professional judgment, recognizing that the auditor's responsibilities under this section do not constitute an assurance engagement on the other information or impose an obligation to obtain assurance about the other information. Examples of such procedures include the following:

- For information that is intended to be the same as information in the financial statements, comparing the information to the financial statements
- For information intended to convey the same meaning as disclosures in the financial statements, comparing the words used and considering the significance of differences in wording used and whether such differences imply different meanings
- Obtaining a reconciliation between an amount within the other information and the financial statements from management
- Comparing items in the reconciliation to the financial statements and the other information
- Checking whether the calculations within the reconciliation are arithmetically accurate

.A32 Evaluating the consistency of selected amounts or other items in the other information with the financial statements includes, when relevant given the nature of the other information, the manner of their presentation compared to the financial statements.

.A33 Other information may include amounts or items that are related to the auditor's knowledge obtained in the audit (other than those in paragraph .16). Examples of such amounts or items may include the following:

- A disclosure of the units produced or a table summarizing such production by geographical region
- A statement that "the company introduced product X and product Y during the year"
- A summary of the locations of the entity's major operations, such as "the entity's major center of operation is in country X, and there are also operations in countries Y and Z"

.A34 The auditor's knowledge obtained in the audit includes the auditor's understanding of the entity and its environment, the applicable financial reporting framework, and the entity's system of internal control, obtained in accordance with SAS No. 145, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.[9]SAS No. 145 sets out the auditor's required understanding, which includes such matters as obtaining an understanding of the following:

a. The entity's organizational structure, ownership and governance, and its business model, including the extent to which the business model integrates the use of IT
b. The relevant industry, regulatory, and other external factors

[9]Paragraphs .12–.13 of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement.*

c. The relevant measures used, internally and externally, to assess the entity's financial performance

d. The entity's internal control

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A35 The auditor's knowledge obtained in the audit may also include matters that are prospective in nature. Such matters may include, for example, business prospects and future cash flows that the auditor considered when evaluating the assumptions used by management in performing impairment tests on intangible assets such as goodwill, or when evaluating management's evaluation of whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern.*

.A36 In the case of a group audit, though the group auditor is required to read the entirety of the other information if, in accordance with section 600A, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors)*,[10] the group auditor decides to make reference to a component auditor in the auditor's report on the group financial statements, the group auditor's knowledge does not extend beyond that obtained by the group auditor during the audit of the group financial statements.

.A37 While remaining alert for indications that a material inconsistency exists between the other information and the auditor's knowledge obtained in the audit, the auditor may focus on those matters in the other information that are of sufficient importance that a misstatement of the other information in relation to those matters could be material.

.A38 In relation to many matters in the other information, the auditor's recollection of the audit evidence obtained and conclusions reached during the audit may be sufficient to enable the auditor to consider whether a material inconsistency exists between the other information and the auditor's knowledge obtained in the audit. For example, the auditor may be able to consider whether a material inconsistency exists between the other information and the auditor's knowledge obtained in the audit in light of the auditor's recollection of discussions held with management or those charged with governance or findings from procedures carried out during the audit, such as the reading of board minutes, without the need to take further action.

.A39 The manner in which an auditor resolves a concern regarding whether other information is materially inconsistent with the auditor's knowledge obtained in the audit, is a matter of professional judgment. The auditor may determine that referring to relevant audit documentation or making inquiries of relevant members of the engagement team or relevant component auditors is appropriate as a basis for the auditor's consideration of whether a material misstatement exists. Whether, and if so, the extent to which, the

[10]Paragraph .24 of section 600A, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors)*

auditor refers to relevant audit documentation or makes inquiries of relevant members of the engagement team or relevant component auditors is a matter of professional judgment.

.A40 It may not be necessary for the auditor to refer to relevant audit documentation or to make inquiries of relevant members of the engagement team or relevant component auditors about any matter included in the other information. This may be the case, for example, when the group auditor decides to make reference to a component auditor in the auditor's report in accordance with section 600A,[11] and the group auditor has obtained sufficient knowledge in connection with the group audit about matters in the other information relating to the significant component with respect to which the component auditor has performed an audit of the financial statements.

.A41 Other information may include discussion of matters that are not related to the financial statements and may also extend beyond the auditor's knowledge obtained in the audit. For example, the other information may include statements about the entity's greenhouse gas emissions.

.A42 Remaining alert for indications that a material misstatement of fact exists or the other information is otherwise misleading could potentially result in the auditor identifying such matters as the following:

- Information that omits or obscures information necessary for a user to appropriately understand a matter disclosed in the other information
- Differences between the other information and the general knowledge, apart from the knowledge obtained in the audit, of the engagement team member reading the other information that leads the auditor to believe that the other information appears to be materially misstated
- An internal inconsistency in the other information that leads the auditor to believe that the other information appears to be materially misstated

Responding When a Material Inconsistency Appears to Exist or Other Information Appears to Be Materially Misstated (Ref: par. .19)

.A43 The auditor's discussion with management about a material inconsistency (or other information that appears to be materially misstated) may include requesting management to provide support for the basis of management's statements in the other information. Based on management's further information or explanations, the auditor may be satisfied that the other information is not materially misstated. For example, management's explanations may indicate reasonable and sufficient grounds for valid differences of judgment.

.A44 Conversely, the discussion with management may provide further information that supports the auditor's conclusion that a material misstatement of the other information exists.

[11]Paragraph .24 of section 600A.

.A45 It may be more difficult for the auditor to challenge management on matters of judgment than on those of a more factual nature. However, there may be circumstances in which the auditor concludes that the other information contains a statement that is not consistent with the financial statements or the auditor's knowledge obtained in the audit. These circumstances may raise doubt about the other information, the financial statements, or the auditor's knowledge obtained in the audit.

.A46 Because there is a wide range of possible material misstatements of the other information, the nature and extent of other procedures the auditor may perform to conclude whether a material misstatement of the other information exists are matters of the auditor's professional judgment in the circumstances.

.A47 When a matter is unrelated to the financial statements or the auditor's knowledge obtained in the audit, the auditor may not be able to fully assess management's responses to the auditor's inquiries. Nevertheless, based on management's further information or explanations, or following changes made by management to the other information, the auditor may be satisfied that a material inconsistency no longer appears to exist or that the other information no longer appears to be materially misstated. When the auditor is unable to conclude that a material inconsistency no longer appears to exist or that the other information no longer appears to be materially misstated, the auditor may request management to consult with a qualified third party (for example, management's expert or legal counsel). In certain cases, after considering the responses from management's consultation, the auditor may not be able to conclude whether a material misstatement of the other information exists. Actions the auditor may then take include one or more of the following:

- Obtaining advice from the auditor's legal counsel
- Considering the implications for the auditor's report, for example, whether to describe the circumstances when there is a limitation imposed by management
- Withdrawing from the audit, when withdrawal is possible under applicable law or regulation

Responding When the Auditor Concludes That a Material Misstatement of the Other Information Exists

Responding When the Auditor Concludes That a Material Misstatement Exists in Other Information Obtained Prior to the Date of the Auditor's Report (Ref: par. .21)

.A48 The actions the auditor takes if the other information is not corrected after communicating with those charged with governance are a matter of the auditor's professional judgment. The auditor may consider whether the rationale given by management and those charged with governance for not making the correction raises doubt about the integrity or honesty of management or those charged with governance, such as when the auditor suspects an intention to mislead. The auditor may also consider it appropriate to seek legal advice. In some cases, the auditor may be required by law, regulation, or other professional standards to communicate the matter to a regulator or relevant professional body.

Reporting Implications (Ref: par. .21a)

.A49 In rare circumstances, a disclaimer of opinion on the financial statements may be appropriate when the refusal to correct the material misstatement of the other information casts such doubt on the integrity of management and those charged with governance that it calls into question the reliability of audit evidence in general.

Withdrawal From the Engagement (Ref: par. .21c)

.A50 Withdrawal from the engagement, when withdrawal is possible under applicable law or regulation, may be appropriate when the circumstances surrounding the refusal to correct the material misstatement of the other information cast such doubt on the integrity of management and those charged with governance that it calls into question the reliability of representations obtained from them during the audit.

Considerations Specific to Governmental Entities (Ref: par. .21b–c)

.A51 In audits of governmental entities, withdrawal from the engagement or withholding the auditor's report may not be possible under law or regulation. In such cases, the auditor may issue a report or written communication to those charged with governance and the appropriate statutory body, if applicable, giving details of the material misstatement.

Responding When the Auditor Concludes That a Material Misstatement Exists in Other Information Obtained After the Date of the Auditor's Report (Ref: par. .22)

.A52 If the auditor concludes that a material misstatement exists in other information obtained after the date of the auditor's report, and such a material misstatement has been corrected, the auditor's procedures necessary in the circumstances include determining that the correction has been made (in accordance with paragraph .20*a*) and may include reviewing the steps taken by management to communicate with those in receipt of the other information, if previously issued, to inform them of the revision.

.A53 If those charged with governance do not agree to revise the other information, taking appropriate action to seek to have the uncorrected misstatement appropriately brought to the attention of anyone in receipt of the financial statements and the auditor's report requires the exercise of professional judgment and may be affected by relevant law or regulation in the jurisdiction. Accordingly, the auditor may consider it appropriate to seek legal advice about the auditor's legal rights and obligations.

.A54 When a material misstatement of the other information remains uncorrected, appropriate actions that the auditor may take to seek to have the uncorrected material misstatement appropriately brought to the attention of anyone in receipt of the financial statements and the auditor's report, when permitted by law or regulation, include, for example, the following:

- Providing a new or amended auditor's report to management, including a modified section in accordance with paragraph .25, and requesting management to provide this new or amended auditor's report to anyone in receipt of the financial statements and the auditor's report. In doing so, the auditor may need to consider the effect, if any, on the date of the new or amended auditor's report, in view of the requirements of GAAS or applicable law or regulation. The auditor may also review the steps taken by management to provide the new or amended auditor's report to such users.
- Bringing the material misstatement of the other information to the attention of known users of the financial statements and the auditor's report.
- Communicating with a regulator or relevant professional body about the uncorrected material misstatement.
- Considering the implications for engagement continuance (see also paragraph .A51).

Responding When a Material Misstatement in the Financial Statements Exists or the Auditor's Understanding of the Entity and Its Environment Needs to Be Updated (Ref: par. .23)

.A55 In reading the other information, the auditor may become aware of new information that has implications for the following:

- The auditor's understanding of the entity and its environment, the financial reporting framework, and the entity's system of internal control, which may indicate the need to revise the auditor's risk assessment[12]
- The auditor's responsibility to evaluate the effect of identified misstatements on the audit and of uncorrected misstatements, if any, on the financial statements[13]
- The auditor's responsibilities relating to subsequent events[14]

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Reporting (Ref: par. .24–.25)

.A56 Illustrative examples of the "Other Information" section in the auditor's report are included in the exhibit.

Reporting Implications When the Auditor's Opinion on the Financial Statements Is Qualified or Adverse (Ref: par. .25)

.A57 A qualified or adverse auditor's opinion on the financial statements may not have an impact on the statement required by paragraph .24*f* if the matter with respect to the

[12]Paragraphs .11, .31, and .A1 of SAS No. 145.

[13]Section 450, *Evaluation of Misstatements Identified During the Audit.*

[14]Paragraphs .10 and .14 of section 560.

auditor's opinion has been modified is not included or otherwise addressed in the other information, and the matter does not affect any part of the other information. For example, a qualified opinion on the financial statements because of nondisclosure of directors' remuneration as required by the applicable financial reporting framework may have no implications for the reporting required under this section. In other circumstances, there may be implications for such reporting as described in paragraphs .A58–.A61.

Qualified Opinion Due to a Material Misstatement in the Financial Statements

.A58 In circumstances in which the auditor's opinion is qualified, consideration may be given to whether the other information is also materially misstated for the same matter as, or a matter related to, the matter giving rise to the qualified opinion on the financial statements.

Qualified Opinion Due to Limitation of Scope

.A59 When there is a limitation of scope with respect to a material item in the financial statements, the auditor will not have obtained sufficient appropriate audit evidence about that matter. In these circumstances, the auditor may be unable to conclude whether the amounts or other items in the other information related to this matter result in a material misstatement of the other information. Accordingly, the auditor may need to modify the statement required by paragraph .24*f* to refer to the auditor's inability to consider management's description of the matter in the other information with respect to which the auditor's opinion on the financial statements has been qualified, as explained in the Basis for Qualified Opinion paragraph. The auditor is, nevertheless, required to report any other uncorrected material misstatements of the other information that have been identified.

Adverse Opinion

.A60 An adverse opinion on the financial statements relating to a specific matter or matters described in the Basis for Adverse Opinion paragraph does not justify the omission of reporting of material misstatements of the other information that the auditor has identified in the auditor's report in accordance with paragraph .24*f*. When an adverse opinion has been expressed on the financial statements, the auditor may need to appropriately modify the statement required by paragraph .24*f*, for example, to indicate that amounts or items in the other information are materially misstated for the same matter as, or a related matter to, the matter giving rise to the adverse opinion on the financial statements.

Disclaimer of Opinion

.A61 When the auditor disclaims an opinion on the financial statements, providing further details about the audit, including a section to address other information, may overshadow the disclaimer of opinion on the financial statements as a whole. Accordingly, in those circumstances, as required by section 705,[15] the auditor's report does not include a section addressing the reporting requirements under this section.

Illustration 2 — The auditor has concluded that an uncorrected material misstatement of the other information exists.

Illustration 1: The Auditor Has Not Identified an Uncorrected Material Misstatement of the Other Information

Other Information [Included in the Annual Report]

Management is responsible for the other information [*included in the annual report*]. The other information comprises the [*information included in the annual report*][1] but does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

[1] A more specific description of the other information, such as "the management report and chairman's statement," may be used to identify the other information.

Illustration 2: The Auditor Has Concluded That an Uncorrected Material Misstatement of the Other Information Exists

Other Information [Included in the Annual Report]

Management is responsible for the other information [*included in the annual report*]. The other information comprises the [*information included in the annual report*][2] but does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report. As described below, we have concluded that such an uncorrected material misstatement of the other information exists.

[*Description of material misstatement of the other information*]

AU-C Section 725

Supplementary Information in Relation to the Financial Statements as a Whole

(With SAS No. 118 supersedes SAS No. 29.)

Source: SAS No. 119; SAS No. 122; SAS No. 125; SAS No. 136; SAS No. 137; SAS No. 140.

See section 9725 for interpretations of this section.

Effective for audits of financial statements for periods beginning on or after December 15, 2010, unless otherwise indicated. Early application is permitted.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility when engaged to report on whether supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole. The information covered by this section is presented outside the basic financial statements and is not considered necessary for the financial statements to be fairly presented in accordance with the applicable financial reporting framework. This section also may be applied, with the report wording adapted as necessary, when an auditor has been engaged to report on whether required supplementary information[1] is fairly stated, in all material respects, in relation to the financial statements as a whole. When the auditor is performing an audit of an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, applies. Accordingly, the requirements in paragraph .09 of this section are replaced by the requirements in section 703, for such audits only. (Ref: par. .A1–.A6) [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

Effective Date

.02 This section is effective for audits of financial statements for periods beginning on or after December 15, 2010. Early application is permitted.

[1]*Required supplementary information* is defined in paragraph .04 of section 730, *Required Supplementary Information*. [Footnote revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122.]

Objective

.03 The objective of the auditor, when engaged to report on supplementary information in relation to the financial statements as a whole, is to

a. evaluate the presentation of the supplementary information in relation to the financial statements as a whole and

b. report on whether the supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole.

Definition

.04 For purposes of generally accepted auditing standards, the following term has the meaning attributed as follows:

Supplementary information. Information presented outside the basic financial statements, excluding required supplementary information that is not considered necessary for the financial statements to be fairly presented in accordance with the applicable financial reporting framework. Such information may be presented in a document containing the audited financial statements or separate from the financial statements. (Ref: par. .A7–.A8)

[Revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122.]

Requirements

Procedures to Determine Whether Supplementary Information Is Fairly Stated, in All Material Respects, in Relation to the Financial Statements as a Whole (Ref: par. .A9–.A15)

.05 In order to opine on whether supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole, the auditor should determine that all of the following conditions are met:

a. The supplementary information was derived from, and relates directly to, the underlying accounting and other records used to prepare the financial statements.

b. The supplementary information relates to the same period as the financial statements.

c. The auditor issued an audit report on the financial statements that contained neither an adverse opinion nor a disclaimer of opinion. (Paragraph .11 addresses reporting while not opining on supplementary information when the report on the financial statements contains an adverse opinion or a disclaimer of opinion.)

d. The supplementary information will accompany the entity's audited financial statements, or such audited financial statements will be made readily available by the entity. (Ref: par. .A9)

[Revised, April 2012 and January 2013, to reflect conforming changes necessary due to the issuance of SAS No. 122.]

.06 The auditor should obtain the agreement of management that it acknowledges and understands its responsibility

a. for the preparation of the supplementary information in accordance with the applicable criteria.

b. to provide the auditor with the written representations described in paragraph .07*g*.

c. to include the auditor's report on the supplementary information in any document that contains the supplementary information and that indicates that the auditor has reported on such supplementary information.

d. to present the supplementary information with the audited financial statements or, if the supplementary information will not be presented with the audited financial statements, to make the audited financial statements readily available to the intended users of the supplementary information no later than the date of issuance by the entity of the supplementary information and the auditor's report thereon. (Ref: par. .A9)

.07 In addition to the procedures performed during the audit of the financial statements, in order to opine on whether supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole, the auditor should perform the following procedures using the same materiality level used in the audit of the financial statements:

a. Inquire of management about the purpose of the supplementary information and the criteria used by management to prepare the supplementary information, such as an applicable financial reporting framework, criteria established by a regulator, a contractual agreement, or other requirements

b. Determine whether the form and content of the supplementary information complies with the applicable criteria

c. Obtain an understanding about the methods of preparing the supplementary information and determine whether the methods of preparing the supplementary information have changed from those used in the prior period and, if the methods have changed, the reasons for such changes

d. Compare and reconcile the supplementary information to the underlying accounting and other records used in preparing the financial statements or to the financial statements themselves

e. Inquire of management about any significant assumptions or interpretations underlying the measurement or presentation of the supplementary information

f. Evaluate the appropriateness and completeness of the supplementary information, considering the results of the procedures performed and other knowledge obtained during the audit of the financial statements (Ref: par. .A13)

g. Obtain written representations from management

   i. that it acknowledges its responsibility for the presentation of the supplementary information in accordance with the applicable criteria;

   ii. that it believes the supplementary information, including its form and content, is fairly presented in accordance with the applicable criteria;

   iii. that the methods of measurement or presentation have not changed from those used in the prior period or, if the methods of measurement or presentation have changed, the reasons for such changes;

   iv. about any significant assumptions or interpretations underlying the measurement or presentation of the supplementary information; and

   v. that when the supplementary information is not presented with the audited financial statements, management will make the audited financial statements readily available to the intended users of the supplementary information no later than the date of issuance by the entity of the supplementary information and the auditor's report thereon. (Ref: par. .A9)

.08 The auditor has no responsibility for the consideration of subsequent events with respect to the supplementary information. However, if information comes to the auditor's attention

a. prior to the release of the auditor's report on the financial statements regarding subsequent events that affect the financial statements, or

b. subsequent to the release of the auditor's report on the financial statements regarding facts that, had they been known to the auditor at the date of the auditor's report, may have caused the auditor to revise the auditor's report,

the auditor should apply the relevant requirements in section 560, *Subsequent Events and Subsequently Discovered Facts*. [Revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122.]

Reporting

.09 When the entity presents the supplementary information with the financial statements, the auditor should report on the supplementary information in either (*a*) a separate section in the auditor's report on the financial statements with the heading "Supplementary Information," or other appropriate heading, or (*b*) in a separate report on the supplementary information.[2] The supplementary information section in the auditor's report on the financial statements or separate report should include the following elements:

a. A statement that the audit was conducted for the purpose of forming an opinion on the financial statements as a whole

b. A statement that the supplementary information is presented for purposes of additional analysis and is not a required part of the financial statements

c. A statement that the supplementary information is the responsibility of management and was derived from, and relates directly to, the underlying accounting and other records used to prepare the financial statements

d. A statement that the supplementary information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves and other additional procedures, in accordance with auditing standards generally accepted in the United States of America

e. If the auditor issues an unmodified opinion on the financial statements and the auditor has concluded that the supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole, a statement that, in the auditor's opinion, the supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole

f. If the auditor issues a qualified opinion on the financial statements and the qualification has an effect on the supplementary information, a statement that, in the auditor's opinion, except for the effects on the supplementary information of (refer to the paragraph in the auditor's report explaining the qualification), such information is fairly stated, in all material respects, in relation to the financial statements as a whole

[Revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 140.]

.10 When the audited financial statements are not presented with the supplementary information, the auditor should report on the supplementary information in a separate report. When reporting separately on the supplementary information, the report should include, in addition to the elements in paragraph .09, a reference to the report on the financial statements, the date of that report, the nature of the opinion expressed on the financial statements, and any report modifications. (Ref: par. .A16)

.11 When the auditor's report on the audited financial statements contains an adverse opinion or a disclaimer of opinion and the auditor has been engaged to report on whether supplementary information is fairly stated, in all material respects, in relation to such financial statements as a whole, the auditor is precluded from expressing an opinion on the supplementary information. When permitted by law or regulation, the auditor may

[2][Footnote deleted by the issuance of SAS No. 140, April 2020.]

withdraw from the engagement to report on the supplementary information. If the auditor does not withdraw, the auditor's report on the supplementary information should state that because of the significance of the matter disclosed in the auditor's report, it is inappropriate to, and the auditor does not, express an opinion on the supplementary information.

.12 The date of the auditor's report on the supplementary information in relation to the financial statements as a whole should not be earlier than the date on which the auditor completed the procedures required in paragraph .07.

.13 If the auditor concludes, on the basis of the procedures performed, that the supplementary information is materially misstated in relation to the financial statements as a whole, the auditor should discuss the matter with management and propose appropriate revision of the supplementary information. If management does not revise the supplementary information, the auditor should either

a. modify the auditor's opinion on the supplementary information and describe the misstatement in the auditor's report or

b. f a separate report is being issued on the supplementary information, withhold the auditor's report on the supplementary information.

Application and Other Explanatory Material

Scope of This Section (Ref: par. .01)

.A1 The auditor's responsibility for information that a designated accounting standard setter[3] requires to accompany an entity's basic financial statements is addressed in section 730, *Required Supplementary Information*. [Revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122.]

.A2 The auditor's responsibility relating to other information whether financial or nonfinancial information (other than the financial statements and the auditor's report thereon), included in an entity's annual report, excluding required supplementary information, is addressed in section 720, *The Auditor's Responsibilities Relating to Other Information Included in Annual Reports*. [Revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 137.]

.A3 The supplementary information need not be presented with the audited financial statements in order for the auditor to express an opinion on whether such supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole. However, in accordance with paragraph .10, if the supplementary information is not presented with the audited financial statements, the auditor's report on the supplementary information is required to make reference to the auditor's report on the financial statements.

---

[3]*Designated accounting standards setter* is defined in paragraph .04 of section 730. [Footnote renumbered and revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122.]

.A4 The auditor may be engaged to audit a specified element, account, or item of a financial statement for the purpose of a separate presentation, in accordance with section 805, *Special Considerations—Audits of Single Financial Statements and Specific Elements, Accounts, or Items of a Financial Statement*. In such an engagement, the auditor's procedures are designed to provide the auditor with reasonable assurance that the supplementary information is not misstated by an amount that would be material to the information itself. An engagement to examine the supplementary information or an assertion related to the supplementary information also may be performed in accordance with AT-C section 205, *Examination Engagements*. [Revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122. Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.A5 Although an auditor has no obligation to apply auditing procedures to supplementary information presented outside the basic financial statements, the auditor may choose to modify or redirect certain of the procedures to be applied in the audit of the basic financial statements so that the auditor may express an opinion on the supplementary information in relation to the financial statements as a whole.

.A6 Management may include nonaccounting information and accounting information that is not directly related to the basic financial statements in a document containing the basic financial statements. Ordinarily, such information would not have been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, the auditor would be unable to opine on the information in relation to the financial statements as a whole. In some circumstances, however, such information may have been obtained or derived from accounting records that have been tested by the auditor (for example, number of units produced related to royalties under a license agreement or number of employees related to a given payroll period). Accordingly, the auditor may be in a position to express an opinion on such information in relation to the financial statements as a whole.

Definition (Ref: par. .04)

.A7 Supplementary information includes additional details or explanations of items in or related to the basic financial statements, consolidating information, historical summaries of items extracted from the basic financial statements, statistical data, and other material, some of which may be from sources outside the accounting system or outside the entity.

.A8 Supplementary information may be prepared in accordance with an applicable financial reporting framework, by regulatory or contractual requirements, in accordance with management's criteria, or in accordance with other requirements.

Procedures to Determine Whether Supplementary Information Is Fairly Stated, in All Material Respects, in Relation to the Financial Statements as a Whole (Ref: par. .05–.08)

The Meaning of Readily Available (Ref: par. .05e, .06d, and .07f)

.A9 Audited financial statements are deemed to be readily available if a third party user can obtain the audited financial statements without any further action by the entity. For example, financial statements on an entity's website may be considered readily available, but being available upon request is not considered readily available.

Procedures Performed on Supplementary Information (Ref: par. .07)

.A10 When engaged to report on supplementary information in relation to the financial statements as a whole, the auditor need not apply procedures as extensive as would be necessary to express an opinion on the information on a stand-alone basis.

.A11 With respect to the supplementary information, the auditor is not required to obtain a separate understanding of the entity's internal control or to assess fraud risk.

.A12 The auditor may consider materiality in determining which information to compare and reconcile to the underlying accounting and other records used in preparing the financial statements or to the financial statements themselves.

.A13 In evaluating the appropriateness and completeness of the supplementary information as required by paragraph 07*f*, the auditor may consider testing accounting or other records through observation or examination of source documents or other procedures ordinarily performed in an audit of the financial statements.

.A14 The auditor may consider whether it is appropriate to address the supplementary information in procedures that the auditor performs in auditing the financial statements, including, but not limited to, the following:

a. Obtaining an updated representation letter, in accordance with section 580, *Written Representations*[4]

b. Performing subsequent events procedures, in accordance with section 560

c. Sending a letter of audit inquiry to the client's lawyer specifically regarding the information contained in the supplementary information, in accordance with section 501, *Audit Evidence—Specific Considerations for Selected Items*[5]

[Revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122.]

---

[4]Paragraph .A24 of section 580, *Written Representations*. [Footnote added, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122.]

[5]Paragraphs .18–.24 of section 501, *Audit Evidence—Specific Considerations for Selected Items*. [Footnote added, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122.]

Considerations Specific to Audits of Governmental Entities

.A15 For most state and local governments, the auditor's report on the financial statements includes multiple opinions to address individual reporting units or aggregation of reporting units of the governmental entity. Accordingly, materiality is considered by the auditor for each opinion unit. However, in the context of this section, the auditor's opinion on the supplementary information is in relation to the financial statements as a whole. Accordingly, in this situation, materiality is considered at a level that represents the entire governmental entity.

Reporting (Ref: par. .09–.13)

.A16 When reporting on supplementary information in a separate report, the auditor may consider including an alert that restricts the use of the separate report solely to the appropriate specified parties, in accordance with section 905, *Alert That Restricts the Use of the Auditor's Written Communication*, to avoid potential misinterpretation or misunderstanding of the supplementary information that is not presented with the financial statements. [Revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122. As amended, effective for the auditor's written communications related to audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 125.]

Illustration 8 — A Separate Report When the Auditor Is Issuing an Adverse Opinion on the Financial Statements

Illustration 1 — Supplementary Information Section in the Auditor's Report on the Financial Statements When the Auditor Is Issuing an Unmodified Opinion on the Financial Statements and an Unmodified Opinion on the Supplementary Information

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The [*identify accompanying supplementary information*] is presented for purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

Illustration 2 — Supplementary Information Section in the Auditor's Report on the Financial Statements When the Auditor Is Issuing a Qualified Opinion on the Financial Statements and a Qualified Opinion on the Supplementary Information

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The [*identify accompanying supplementary information*] is presented for purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, except for the effect on the supplementary information of [*describe reason for qualification of the auditor's opinion on the financial statements and reference the other-matter paragraph*], the information is fairly stated in all material respects in relation to the financial statements as a whole.

Illustration 3 — Supplementary Information Section in the Auditor's Report on the Financial Statements When the Auditor Is Disclaiming an Opinion on the Financial Statements

We were engaged for the purpose of forming an opinion on the basic financial statements as a whole. The [*identify accompanying supplementary information*] is presented for the purposes of additional analysis and is not a required part of the financial statements. Because of the significance of the matter described above [*the auditor may describe the basis for the disclaimer of opinion*], it is inappropriate to and we do not express an opinion on the supplementary information referred to above.

Illustration 4 — Supplementary Information Section in the Auditor's Report on the Financial Statements When the Auditor Is Issuing an Adverse Opinion on the Financial Statements

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The [*identify accompanying supplementary information*] is presented for the purposes of additional analysis and is not a required part of the financial statements. Because of the significance of the matter described above [*the auditor may describe the basis for the adverse opinion*], it is inappropriate to and we do not express an opinion on the supplementary information referred to above.

Illustration 5 — A Separate Report When the Auditor Is Issuing an Unmodified Opinion on the Financial Statements and an Unmodified Opinion on the Supplementary Information

We have audited the financial statements of XYZ Entity as of and for the year ended June 30, 20X1, and have issued our report thereon dated [*date of the auditor's report on the financial statements*] which contained an unmodified opinion on those financial statements. Our audit was performed for the purpose of forming an opinion on the financial statements as a whole. The [*identify supplementary information*] is presented for the purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

Illustration 6 — A Separate Report When the Auditor Is Issuing a Qualified Opinion on the Financial Statements and a Qualified Opinion on the Supplementary Information

We have audited the financial statements of XYZ Entity as of and for the year ended June 30, 20X1, and have issued our report thereon dated [*date of the auditor's report on the financial statements, the nature of the opinion expressed on the financial statements, and a description of the report modifications*]. Our audit was performed for the purpose of forming an opinion on the financial statements as a whole. The [*identify supplementary information*] is presented for the purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, except for the effect on the accompanying information of the qualified opinion on the financial statements as described above, the information is fairly stated in all material respects in relation to the financial statements as a whole.

Illustration 7 — A Separate Report When the Auditor Is Disclaiming an Opinion on the Financial Statements

We were engaged to audit the financial statements of XYZ Entity as of and for the year ended June 30, 20X1, and have issued our report thereon dated [*date of the auditor's report on the financial statements*]. However, the scope of our audit of the financial statements was not sufficient to enable us to express an opinion because [*describe reasons*] and accordingly we did not express an opinion on such financial statements. The [*identify the supplementary information*] is presented for purposes of additional analysis and is not a required part of the basic financial statements. Because of the significance of the matter discussed above, it is inappropriate to and we do not express an opinion on the supplementary information referred to above.

Illustration 8 — A Separate Report When the Auditor Is Issuing an Adverse Opinion on the Financial Statements

We have audited the financial statements of XYZ Entity as of and for the year ended June 30, 20X1, and have issued our report thereon dated [*date of the auditor's report on the financial statements*] which stated that the financial statements are not presented fairly in accordance with [*identify the applicable financial reporting framework (for example, accounting principles generally accepted in the United States of America [GAAP])*] because [*describe reasons*]. The [*identify the supplementary information*] is presented for purposes of additional analysis and is not a required part of the basic financial statements. Because of the significance of the matter discussed above, it is inappropriate to and we do not express an opinion on the supplementary information referred to above.

[Revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 140.]

AU-C Section 9725

Supplementary Information in Relation to the Financial Statements as a Whole: Auditing Interpretations of Section 725

1. Dating the Auditor's Report on Supplementary Information

.01 *Question*—In accordance with section 725, *Supplementary Information in Relation to the Financial Statements as a Whole*, the auditor's report on supplementary information should not be dated earlier than the date on which the auditor completed the procedures required by section 725.[1] When the auditor completes those procedures subsequent to the date of the auditor's report on the audited financial statements, the auditor is not required to obtain additional evidence with respect to the audited financial statements. When reporting on the supplementary information (either in a separate report or in a separate section within the auditor's report on the financial statements) after the date of the auditor's report on the financial statements, how may an auditor make it clear that no additional procedures were performed on the audited financial statements subsequent to the date of the auditor's report on those financial statements?

.02 *Interpretation*—Although not required, an auditor may

a. when issuing a separate report on the supplementary information, include in such report a statement that the auditor has not performed any auditing procedures with respect to the audited financial statements subsequent to the date of the auditor's report on those audited financial statements (see paragraph .03 of this interpretation), or

b. when reissuing a report on the audited financial statements to include a separate section to report on the supplementary information, include two report dates to indicate that the date of reporting on the supplementary information is as of the later date (see paragraph .04 of this interpretation).

.03 The following illustrative separate report on supplementary information includes additional language intended to make it clear that no procedures were performed subsequent to the date of the auditor's report on the audited financial statements.

[1]Paragraph .12 of section 725, *Supplementary Information in Relation to the Financial Statements as a Whole*.

<u>Independent Auditor's Report on [*Identify Supplementary Information*]</u>

[*Appropriate Addressee*]

We have audited the financial statements of XYZ Entity as of and for the year ended June 30, 20X1, and have issued our report thereon dated [*date of the auditor's report on the financial statements, for example, "September 15, 20X1"*] which contained an unmodified opinion on those financial statements. Our audit was performed for the purpose of forming an opinion on the financial statements as a whole. *We have not performed any procedures with respect to the audited financial statements subsequent to* [*date of the auditor's report on the financial statements, for example, "September 15, 20X1"*].

The [*identify supplementary information*] is presented for the purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

[*Auditor's signature*]

[*Auditor's city and state*]

December 1, 20X1 [*Date of the auditor's report on the supplementary information—not to be earlier than the date on which the auditor completed the procedures required by section 725*][2]

.04 The following illustrative report on the audited financial statements includes a separate section to report on supplementary information subsequent to the date of the report on the audited financial statements. For this illustration, March 31, 20X2, is the original date of the report on the audited financial statements.

[2]Paragraph .07 of section 725.

<u>Independent Auditor's Report</u>

[*Appropriate Addressee*]

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of ABC Company, which comprise the balance sheets as of December 31, 20X1 and 20X0, and the related statements of income, changes in stockholders' equity and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X1 and 20X0, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC Company and to meet our other ethical responsibilities, in accordance with relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing these financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than

for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.[3]
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Report on [*Identify Supplementary Information*]

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The [*identify accompanying supplementary information*] is presented for purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the

[3]In circumstances in which the auditor also has a responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, omit the following: "but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed."

United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

[*Auditor's signature*]

[*Auditor's city and state*]

March 31, 20X2, except for our report on the supplementary information for which the date is June 1, 20X2 [Date of the auditor's report on the audited financial statements, with a later date used for the paragraph labeled "Report on [*identify supplementary information*]," which is as of a date not earlier than the date on which the auditor completed the procedures required by paragraph .07 of section 725.

[Issue Date: July 2011; Revised: October 2011.]

AU-C Section 730

Required Supplementary Information

(Supersedes SAS No. 52 section 558.)

Source: SAS No. 120; SAS No. 122; SAS No. 137; SAS No. 140.

Effective for audits of financial statements for periods beginning on or after December 15, 2010, unless otherwise indicated. Early application is permitted.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility with respect to information that a designated accounting standards setter requires to accompany an entity's basic financial statements (hereinafter referred to as *required supplementary information*). In the absence of any separate requirement in the particular circumstances of the engagement, the auditor's opinion on the basic financial statements does not cover required supplementary information. (Ref: par. .A1) [Revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122.]

Effective Date

.02 This section is effective for audits of financial statements for periods beginning on or after December 15, 2010. Early application is permitted.

Objective

.03 The objectives of the auditor when a designated accounting standards setter requires information to accompany an entity's basic financial statements are to perform specified procedures in order to

a. describe, in the auditor's report, whether required supplementary information is presented and

b. communicate therein when some or all of the required supplementary information has not been presented in accordance with guidelines established by a designated accounting standards setter or when the auditor has identified material modifications that should be made to the required supplementary information for it to be in accordance with guidelines established by the designated accounting standards setter.

[Revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122.]

Definitions

.04 For purposes of this section, the following terms have the meanings attributed as follows:

Applicable financial reporting framework. The financial reporting framework adopted by management and, when appropriate, those charged with governance in the preparation and fair presentation of the financial statements that is acceptable in view of the nature of the entity and the objective of the financial statements, or that is required by law or regulation.

Basic financial statements. Financial statements presented in accordance with an applicable financial reporting framework as established by a designated accounting standards setter, excluding required supplementary information.

Designated accounting standards setter. A body designated by the Council of the AICPA to promulgate GAAP pursuant to the "Compliance With Standards Rule" (ET sec. 1.310.001) and the "Accounting Principles Rule" (ET sec. 1.320.001) of the AICPA Code of Professional Conduct.

Prescribed guidelines. The authoritative guidelines established by the designated accounting standards setter for the methods of measurement and presentation of the required supplementary information.

Required supplementary information. Information that a designated accounting standards setter requires to accompany an entity's basic financial statements. Required supplementary information is not part of the basic financial statements; however, a designated accounting standards setter considers the information to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. In addition, authoritative guidelines for the methods of measurement and presentation of the information have been established.

[Revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122. Revised, January 2015, to reflect conforming changes necessary due to the issuance of the revised AICPA Code of Professional Conduct, effective December 15, 2014.]

Requirements

Procedures

.05 The auditor should apply the following procedures to required supplementary information:

a. Inquire of management about the methods of preparing the information, including (i) whether it has been measured and presented in accordance with prescribed guidelines, (ii) whether methods of measurement or presentation have been changed from those used in the prior period and the reasons for any such changes, and (iii) whether there were any significant assumptions or interpretations underlying the measurement or presentation of the information

b. Compare the information for consistency with (i) management's responses to the foregoing inquiries, (ii) the basic financial statements, and (iii) other knowledge obtained during the audit of the basic financial statements

c. Obtain written representations from management (i) that it acknowledges its responsibility for the required supplementary information; (ii) about whether the required supplementary information is measured and presented in accordance with prescribed guidelines; (iii) about whether the methods of measurement or presentation have changed from those used in the prior period and, if so, the reasons for such changes; and (iv) about any significant assumptions or interpretations underlying the measurement or presentation of the required supplementary information[1]

.06 If the auditor is unable to complete the procedures in paragraph .05, the auditor should consider whether management contributed to the auditor's inability to complete the procedures. If the auditor concludes that the inability to complete the procedures was due to significant difficulties encountered in dealing with management, the auditor should inform those charged with governance.[2]

Reporting

.07 The auditor should include a separate section in the auditor's report on the financial statements with the heading "Required Supplementary Information," or other appropriate heading.[3] The required supplementary information section in the auditor's report on the financial statements should include language to explain the following circumstances, as applicable:

a. The required supplementary information is included, and the auditor has applied the procedures in paragraph .05 of this section.

b. The required supplementary information is omitted.

c. Some required supplementary information is missing and some is presented in accordance with the prescribed guidelines.

d. The auditor has identified material departures from the prescribed guidelines.

---

[1]See section 580, *Written Representations*, for additional requirements and guidance with respect to obtaining written representations from management as part of an audit of financial statements performed in accordance with generally accepted auditing standards. [Footnote revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122.]

[2]See paragraph .12 of section 260, *The Auditor's Communication With Those Charged With Governance*, for additional guidance when the auditor encounters significant difficulties in dealing with management during the audit. [Footnote revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122.]

[3][Footnote deleted by the issuance of SAS No. 140, April 2020.]

e. The auditor is unable to complete the procedures in paragraph .05 of this section.

f. The auditor has unresolved doubts about whether the required supplementary information is presented in accordance with prescribed guidelines.

[Revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 140.]

.08 If the entity has presented all or some of the required supplementary information, the required supplementary information section in the auditor's report on the financial statements referred to in paragraph .07 should include the following elements: (Ref: par. .A2)

a. A statement that [*identify the applicable financial reporting framework (for example, accounting principles generally accepted in the United States of America)*] require that the [*identify the required supplementary information*] be presented to supplement the basic financial statements

b. A statement that such information is the responsibility of management and, although not a part of the basic financial statements, is required by [*identify designated accounting standards setter*], who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context

c. If the auditor is able to complete the procedures in paragraph .05,

   i. a statement that the auditor has applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to the auditor's inquiries, the basic financial statements, and other knowledge the auditor obtained during the audit of the basic financial statements

   ii. a statement that the auditor does not express an opinion or provide any assurance on the information because the limited procedures do not provide the auditor with sufficient evidence to express an opinion or provide any assurance

d. If the auditor is unable to complete the procedures in paragraph .05,

   i. a statement that the auditor was unable to apply certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States because [*state the reasons*]

   ii. a statement that the auditor does not express an opinion or provide any assurance on the information

e. If some of the required supplementary information is omitted,

i. a statement that management has omitted [*description of the missing required supplementary information*] that [*identify the applicable financial reporting framework (for example, accounting principles generally accepted in the United States of America)*] require to be presented to supplement the basic financial statements

ii. a statement that such missing information, although not a part of the basic financial statements, is required by [*identify designated accounting standards setter*], who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context

iii. a statement that the auditor's opinion on the basic financial statements is not affected by the missing information

f. If the measurement or presentation of the required supplementary information departs materially from the prescribed guidelines, a statement that although the auditor's opinion on the basic financial statements is not affected, material departures from prescribed guidelines exist [*describe the material departures from the applicable financial reporting framework*]

g. If the auditor has unresolved doubts about whether the required supplementary information is measured or presented in accordance with prescribed guidelines, a statement that although the auditor's opinion on the basic financial statements is not affected, the results of the limited procedures have raised doubts about whether material modifications should be made to the required supplementary information for it to be presented in accordance with guidelines established by [*identify designated accounting standards setter*]

[Revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 140.]

.09 If all of the required supplementary information is omitted, the required supplementary information section in the auditor's report on the financial statements should include the following elements:

a. A statement that management has omitted [*description of the missing required supplementary information*] that [*identify the applicable financial reporting framework (for example, accounting principles generally accepted in the United States of America)*] require to be presented to supplement the basic financial statements

b. A statement that such missing information, although not a part of the basic financial statements, is required by [*identify designated accounting standards setter*], who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context

c. A statement that the auditor's opinion on the basic financial statements is not affected by the missing information

[Revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 140.]

Application and Other Explanatory Material

Scope of This Section (Ref: par. .01)

.A1 The auditor's responsibility relating to other information whether financial or nonfinancial information (other than the financial statements and the auditor's report thereon), included in an entity's annual report, excluding required supplementary information, is addressed in section 720, *The Auditor's Responsibilities Relating to Other Information Included in Annual Reports*. [Revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 137.]

Reporting (Ref: par. .07–.09)

.A2 Because the required supplementary information accompanies the basic financial statements, the auditor's report on the financial statements includes a discussion of the responsibility taken by the auditor on that information. However, because the required supplementary information is not part of the basic financial statements, the auditor's opinion on the fairness of presentation of such financial statements in accordance with the applicable financial reporting framework is not affected by the presentation by the entity of the required supplementary information or the failure to present some or all of such required supplementary information. Furthermore, if the required supplementary information is omitted by the entity, the auditor does not have a responsibility to present that information.

Exhibit — Examples of Required Supplementary Information Sections in the Auditor's Report on the Financial Statements

.A3

Illustration 1 — The Required Supplementary Information Is Included, the Auditor Has Applied the Specified Procedures, and No Material Departures From Prescribed Guidelines Have Been Identified

Illustration 2 — All Required Supplementary Information Omitted

Illustration 3 — Some Required Supplementary Information Is Omitted and Some Is Presented in Accordance With the Prescribed Guidelines

Illustration 4 — Material Departures From Prescribed Guidelines Identified

Illustration 5 — Specified Procedures Not Completed

Illustration 6 — Unresolved Doubts About Whether the Required Supplementary Information Is in Accordance With Prescribed Guidelines

Illustration 1 — The Required Supplementary Information Is Included, the Auditor Has Applied the Specified Procedures, and No Material Departures From Prescribed Guidelines Have Been Identified

[*Identify the applicable financial reporting framework (for example, accounting principles generally accepted in the United States of America)*] require that the [*identify the required supplementary information*] on page XX be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by [*identify designated accounting standards setter*] who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Illustration 4 — Material Departures From Prescribed Guidelines Identified

[*Identify the applicable financial reporting framework (for example, accounting principles generally accepted in the United States of America)*] require that the [*identify the supplementary information*] on page XX be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by [*identify designated accounting standards setter*] who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. Although our opinion on the basic financial statements is not affected, the following material departures from the prescribed guidelines exist [*identify the required supplementary information and describe the material departures from the prescribed guidelines*]. We do not express an opinion or provide any assurance on the information.

Illustration 5 — Specified Procedures Not Completed

[*Identify the applicable financial reporting framework (for example, accounting principles generally accepted in the United States of America)*] require that the [*identify the supplementary information*] on page XX be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by [*identify designated accounting standards setter*] who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We were unable to apply certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America because [*state the reasons*]. We do not express an opinion or provide any assurance on the information.

Illustration 6 — Unresolved Doubts About Whether the Required Supplementary Information Is in Accordance With Prescribed Guidelines

[*Identify the applicable financial reporting framework (for example, accounting principles generally accepted in the United States of America)*] require that the [*identify the supplementary information*] on page XX be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by [*identify designated accounting standards setter*] who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance. Although our opinion on the basic financial statements is not affected, the results of the limited procedures have raised doubts about whether material modifications should be made to the required supplementary information for it to be presented in accordance with guidelines established by [*identify designated accounting standards setter*]. [*The auditor may consider including in the report the reason(s) he or she was unable to resolve his or her doubts.*]

[Revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 140.]

AU-C Sections 800–899

SPECIAL CONSIDERATIONS

AU-C Section 800

Special Considerations — Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks

Source: SAS No. 122; SAS No. 125; SAS No. 127; SAS No. 132; SAS No. 139.

Effective for audits of financial statements for periods ending on or after December 15, 2012, unless otherwise indicated.

Introduction

Scope of This Section

.01 AU-C sections 200–700 apply to an audit of financial statements. This section addresses special considerations in the application of those AU-C sections to an audit of financial statements prepared in accordance with a special purpose framework, which is a cash, a tax, a regulatory, a contractual, or an other basis of accounting. This section does not purport to address all special considerations that may be relevant in the circumstances. (Ref: par. .A1–.A5) [As amended, effective for audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 127. As amended, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

.02 This section is written in the context of a complete set of financial statements prepared in accordance with a special purpose framework. Section 805, *Special Considerations — Audits of Single Financial Statements and Specific Elements, Accounts, or Items of a Financial Statement*, addresses special considerations relevant to an audit of a single financial statement or of a specific element, account, or item of a financial statement.

.03 Section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, applies to audits of special purpose financial statements, as discussed in paragraph .14 of this section. [As amended, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

.04 Section 806, *Reporting on Compliance With Aspects of Contractual Agreements or Regulatory Requirements in Connection With Audited Financial Statements*, addresses the auditor's responsibility and the form and content of the report when the auditor is requested to report on the entity's compliance with aspects of contractual agreements or regulatory requirements in connection with the audit of financial statements.

Effective Date

.05 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objective

.06 The objective of the auditor, when applying generally accepted auditing standards (GAAS) in an audit of financial statements prepared in accordance with a special purpose framework, is to address appropriately the special considerations that are relevant to

a. the acceptance of the engagement,

b. the planning and performance of that engagement, and

c. forming an opinion and reporting on the financial statements.

Definitions

.07 For purposes of GAAS, the following terms have the meanings attributed as follows:

Special purpose financial statements. Financial statements prepared in accordance with a special purpose framework.

Special purpose framework. A financial reporting framework other than generally accepted accounting principles (GAAP) that is one of the following bases of accounting: (Ref: par. .A6)

a. **Cash basis.** A basis of accounting that the entity uses to record cash receipts and disbursements and modifications of the cash basis having substantial support (for example, recording depreciation on fixed assets).

b. **Tax basis.** A basis of accounting that the entity uses to file its tax return for the period covered by the financial statements.

c. **Regulatory basis.** A basis of accounting that the entity uses to comply with the requirements or financial reporting provisions of a regulatory agency to whose jurisdiction the entity is subject (for example, a basis of accounting that insurance companies use pursuant to the accounting practices prescribed or permitted by a state insurance commission).

d. **Contractual basis.** A basis of accounting that the entity uses to comply with an agreement between the entity and one or more third parties other than the auditor.

e. **Other basis.** A basis of accounting that uses a definite set of logical, reasonable criteria that is applied to all material items appearing in financial statements.

The cash basis, tax basis, regulatory basis, and other basis of accounting are commonly referred to as *other comprehensive bases of accounting*.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 127. As amended, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

.08 Reference to *financial statements* in this section means "a complete set of special purpose financial statements."[1] The requirements of the applicable financial reporting framework determine the presentation, structure, and content of the financial statements and what constitutes a complete set of financial statements. [As amended, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

.09 Reference to *GAAP* in GAAS means generally accepted accounting principles promulgated by bodies designated by the Council of the AICPA (Council) pursuant to the "Compliance With Standards Rule" (ET sec. 1.310.001) and the "Accounting Principles Rule" (ET sec. 1.320.001) of the AICPA Code of Professional Conduct. [Revised, January 2015, to reflect conforming changes necessary due to the issuance of the revised AICPA Code of Professional Conduct, effective December 15, 2014. As amended, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

Requirements

Considerations When Accepting the Engagement

Acceptability of the Financial Reporting Framework (Ref: par. .A7–.A10)

.10 Section 210A, *Terms of Engagement*, requires the auditor to determine the acceptability of the financial reporting framework applied in the preparation of the financial statements.[2] In an audit of special purpose financial statements, the auditor should obtain an understanding of

a. the purpose for which the financial statements are prepared,

b. the intended users, and

c. the steps taken by management to determine that the applicable financial reporting framework is acceptable in the circumstances.

Preconditions for an Audit (Ref: par. .A11)

.11 Section 210A requires the auditor to establish whether the preconditions for an audit are present, including determining whether the financial reporting framework to be applied in the preparation of the financial statements is acceptable.[3] In an audit of special purpose

[1]Paragraphs .14 and .A9 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

[2]Paragraph .06*a* of section 210A, *Terms of Engagement*.

financial statements, the auditor should obtain the agreement of management that it acknowledges and understands its responsibility to include all informative disclosures that are appropriate for the special purpose framework used to prepare the entity's financial statements, including

a. a description of the special purpose framework, including a summary of significant accounting policies, and how the framework differs from GAAP, the effects of which need not be quantified.

b. informative disclosures similar to those required by GAAP, in the case of special purpose financial statements that contain items that are the same as, or similar to, those in financial statements prepared in accordance with GAAP.

c. a description of any significant interpretations of the contract on which the special purpose financial statements are based, in the case of special purpose financial statements prepared in accordance with a contractual basis of accounting.

d. additional disclosures beyond those specifically required by the framework that may be necessary for the special purpose financial statements to achieve fair presentation. (Ref: par. .A12)

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 127.]

Considerations When Planning and Performing the Audit (Ref: par. .A13–.A17)

.12 Section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*, requires the auditor to comply with all AU-C sections relevant to the audit.[4] In planning and performing an audit of special purpose financial statements, the auditor should adapt and apply all AU-C sections relevant to the audit as necessary in the circumstances of the engagement.

.13 Section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, requires the auditor to obtain an understanding of the entity's selection and application of accounting policies.[5] In the case of special purpose financial statements prepared in accordance with a contractual basis of accounting, the auditor should obtain an understanding of any significant interpretations of the contract that management made in the preparation of those financial statements. An interpretation is significant when adoption of another reasonable interpretation would have produced a material difference in the information presented in the financial statements.

[3] Paragraph .06 of section 210A.

[4] Paragraph .20 of section 200.

[5] Paragraph .12*c* of section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

Auditor's Responsibilities Regarding the Entity's Ability to Continue as a Going Concern

.14 Irrespective of whether the going concern basis of accounting is relevant to the preparation of the special purpose financial statements, the requirements of section 570 apply regarding the auditor's responsibilities to perform the following tasks: (Ref: par. .A18)

a. Based on the audit evidence obtained, conclude whether, in the auditor's judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time.

b. When such substantial doubt exists, evaluate the adequacy of the financial statement disclosures.[6]

[Paragraph added, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

Forming an Opinion and Reporting Considerations

.15 When forming an opinion and reporting on special purpose financial statements, the auditor should apply the requirements in section 700, *Forming an Opinion and Reporting on Financial Statements*, or section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*. When, in forming an opinion, the auditor concludes that a modification to the auditor's opinion on the financial statements is necessary, the auditor should apply the requirements in section 705, *Modifications to the Opinion in the Independent Auditor's Report*. (Ref: par. .A19–.A22) [Paragraph renumbered and amended, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

Description of the Applicable Financial Reporting Framework (Ref: par. .A23–.A24)

.16 Section 700 requires the auditor to evaluate whether the financial statements adequately refer to or describe the applicable financial reporting framework.[7] In an audit of special purpose financial statements, the auditor should evaluate whether the financial statements are suitably titled, include a summary of significant accounting policies, and adequately describe how the special purpose framework differs from GAAP. The effects of these differences need not be quantified. [Paragraph renumbered by the issuance of SAS No. 139, March 2020.]

---

[6] Paragraphs .20–.22 and .A46 of section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*. [Footnote added, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139]

[7] Paragraph .15 of section 700, *Forming an Opinion and Reporting on Financial Statements*. [Footnote renumbered and amended, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139]

.17 In the case of special purpose financial statements prepared in accordance with a contractual basis of accounting, the auditor should also evaluate whether the financial statements adequately describe any significant interpretations of the contract on which the financial statements are based. [Paragraph renumbered by the issuance of SAS No. 139, March 2020.]

Fair Presentation (Ref: par. .A25–.A29)

.18 Section 700 requires the auditor to evaluate whether the financial statements achieve fair presentation.[8] In an audit of special purpose financial statements when the special purpose financial statements contain items that are the same as, or similar to, those in financial statements prepared in accordance with GAAP, the auditor should evaluate whether

a. the financial statements include informative disclosures similar to those required by GAAP, and

b. additional disclosures, beyond those specifically required by the framework, related to matters that are not specifically identified on the face of the financial statements or other disclosures are necessary for the financial statements to achieve fair presentation.

[Paragraph renumbered and amended, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

Auditor's Report

.19 Section 700 addresses the form and content of the auditor's report, including the specific ordering for certain elements. In the case of an auditor's report on special purpose financial statements

a. the auditor's report should describe the purpose for which the financial statements are prepared or refer to a note in the special purpose financial statements that contains that information, when the financial statements are prepared in accordance with

   i. a regulatory or contractual basis of accounting or

   ii. an other basis of accounting, and the auditor is required to restrict use of the auditor's report pursuant to paragraph .06*a–b* of section 905, *Alert That Restricts the Use of the Auditor's Written Communication*. (Ref: par. .A30)

b. if management has a choice of financial reporting frameworks in the preparation of the special purpose financial statements, the explanation of management's responsibility for the financial statements should also make reference to its

[8] Paragraph .16 or section 700. [Footnote renumbered by the issuance of SAS No. 139, March 2020.]

responsibility for determining that the applicable financial reporting framework is acceptable in the circumstances.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 127. Paragraph subsequently renumbered and amended, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

Alerting Readers in an Emphasis-of-Matter Paragraph That the Financial Statements Are Prepared in Accordance With a Special Purpose Framework (Ref: par. .A31)

.20 Except for the circumstances described in paragraph .22, the auditor's report on special purpose financial statements should include an *emphasis-of-matter* paragraph,[9] under an appropriate heading, that includes the following:

a. A statement that the financial statements are prepared in accordance with a special purpose framework

b. A reference to the note to the financial statements that describes that framework

c. A statement that the special purpose framework is a basis of accounting other than GAAP.

d. When a description of the purpose for which the financial statements are prepared or a reference to a note in the special purpose financial statements that contains that information is required pursuant to paragraph .19*a*, a statement that, as a result, the financial statements may not be suitable for another purpose.[10]

[Paragraph renumbered and amended, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

Restricting the Use of the Auditor's Report in an Other-Matter Paragraph (Ref: par. .A32–.A33)

.21 Except for the circumstances described in paragraph .22, the auditor's report on special purpose financial statements should include an *other-matter* paragraph,[11] under an appropriate heading, that restricts[12] the use of the auditor's report when the special purpose financial statements are prepared in accordance with

---

[9]Paragraphs .06–.07 of section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report.*

[10]Paragraph .06 of section 905, *Alert That Restricts the Use of the Auditor's Written Communication*. [Footnote added, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

[11]Paragraph .07 of section 706. [Footnote renumbered by the issuance of SAS No. 139, March 2020.].

[12]See paragraphs .06*a*–*b* and .07 of section 905. [Footnote amended, effective for the auditor's written communications related to audits of financial statements for periods ending on or after December 15, 2012,

a. a contractual basis of accounting,

b. a regulatory basis of accounting, or

c. an other basis of accounting when required pursuant to paragraph .06*a–b* of section 905.

[As amended, effective for the auditor's written communications related to audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 125. As amended, effective for audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 127. Paragraph subsequently renumbered and amended, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

*Regulatory Basis Financial Statements Intended for General Use (Ref: **par. .A34**)*

.22 If the special purpose financial statements are prepared in accordance with a regulatory basis of accounting, and the special purpose financial statements together with the auditor's report are intended for general use, the auditor should not include the *emphasis-of-matter* or *other-matter* paragraphs required by paragraphs .20–.21. Instead, the auditor should express an opinion about whether the special purpose financial statements are presented fairly, in all material respects, in accordance with GAAP. The auditor should also, in a separate paragraph, express an opinion about whether the financial statements are prepared in accordance with the special purpose framework. [Paragraph renumbered by the issuance of SAS No. 139, March 2020.]

*Auditor's Report Prescribed by Law or Regulation (Ref: **par. .A35–.A38**)*

.23 If the auditor is required by law or regulation to use a specific layout, form, or wording of the auditor's report, the auditor's report should refer to GAAS only if the auditor's report includes, at a minimum, each of the following elements:

a. A title that clearly indicates that it is the report of an independent auditor

b. An addressee

c. An opinion section that

    i. identifies the special purpose financial statements that have been audited and

    ii. contains an expression of opinion on the special purpose financial statements and a reference to the special purpose framework used to prepare the financial statements and, if applicable, an opinion on whether the special purpose financial statements are presented fairly, in all material respects, in accordance with GAAP when required by paragraph .22

---

by SAS No. 125. Footnote renumbered and amended, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

d. A description of the purpose for which the financial statements are prepared when required by paragraph .19*a*

e. A statement that the auditor is required to be independent of the entity and to meet the auditor's other ethical responsibilities, in accordance with the relevant ethical requirements relating to the audit

f. When applicable, a section that addresses the reporting requirements in paragraphs .24–.27 of section 570

g. A description of management's responsibilities for the preparation and fair presentation of the special purpose financial statements that addresses, and is consistent with, the requirements in paragraphs .31–.33 of section 700

h. A reference to management's responsibility for determining that the applicable financial reporting framework is acceptable in the circumstances when required by paragraph .19*b*

i. If applicable, a reference to the law or regulation and a description of the auditor's responsibilities for an audit of financial statements that addresses, and is consistent with, the requirements in paragraphs .35–.37 of section 700

j. When applicable, a section that addresses the reporting requirements in paragraph .24 of section 720, *The Auditor's Responsibilities Relating to Other Information Included in Annual Reports*

k. An emphasis-of-matter paragraph that

    i. when required by paragraph .20

        1. indicates that the financial statements are prepared in accordance with a special purpose framework

        2. refers to the note to the financial statements that describes that framework

        3. states that the special purpose framework is a basis of accounting other than GAAP, and

    ii. when required by paragraph .20*d*

        1. describes the purpose for which the financial statements are prepared or refers to a note in the special purpose financial statements that contains that information, and

        2. states that, as a result, the financial statements may not be suitable for another purpose[13]

l. An *other-matter* paragraph that restricts the use of the auditor's report when required by paragraph .21

---

[13]Paragraph .06 of section 905.

m. The signature of the auditor's firm

n. The city and state where the auditor's report is issued

o. The date of the auditor's report

[Paragraph renumbered and amended, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

.24 If the prescribed specific layout, form, or wording of the auditor's report is not acceptable or would cause an auditor to make a statement that the auditor has no basis to make, the auditor should reword the prescribed form of report or attach an appropriately worded separate report. [Paragraph renumbered by the issuance of SAS No. 139, March 2020.]

Application and Other Explanatory Material

Introduction

Scope of This Section (Ref: par. .01)

.A1 Special purpose financial statements may be prepared for use by regulatory bodies, the parties to a contract or agreement, or other specified parties. For example, a loan agreement may require the borrower to prepare consolidated financial statements for the lender presented on a contractual basis of accounting, which is not in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) or International Financial Reporting Standards promulgated by the International Accounting Standards Board.

.A2 There may be circumstances in which a regulatory or contractual basis of accounting is based on a general purpose framework, such as U.S. GAAP, established by an authorized or recognized standard-setting organization or by law or regulation, but does not comply with all the requirements of that framework.[14] An example is a contract that requires financial statements to be prepared in accordance with most, but not all, of U.S. GAAP. If the financial statements purport to be prepared in accordance with a general purpose framework and such financial statements are materially misstated due to a departure from that framework, section 705 applies. [As amended, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

.A3 When it is acceptable in the circumstances of the engagement to report, in accordance with this section, on special purpose financial statements that purport to be prepared in accordance with a regulatory or contractual basis of accounting that is based on a general purpose framework, it is inappropriate for the description of the applicable financial reporting framework in the special purpose financial statements to imply that the special

[14] The term *general purpose framework* is defined in paragraph .10 of section 700. [Footnote renumbered and amended, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

purpose framework includes all requirements of, or is the same as, the financial reporting framework on which the special purpose framework is based. In the example of the contract in paragraph .A2, the description of the applicable financial reporting framework would refer to the financial reporting provisions of the contract, rather than make reference to U.S. GAAP. The requirements in paragraphs .20–.22 are designed to avoid misunderstandings about compliance with the general purpose framework. [As amended, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

.A4 Financial statements prepared in accordance with a special purpose framework may be the only financial statements an entity prepares. Such special purpose financial statements may be used by users other than those for whom the financial reporting framework is designed. Despite the broad distribution of the financial statements, the financial statements are still considered to be special purpose financial statements for purposes of GAAS. The requirement in paragraph .20 is designed to avoid misunderstandings about the framework used to prepare the financial statements. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 127. As amended, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

.A5 Section 910, *Financial Statements Prepared in Accordance With a Financial Reporting Framework Generally Accepted in Another Country*, addresses circumstances in which an auditor practicing in the United States is engaged to report on financial statements that have been prepared in accordance with a financial reporting framework generally accepted in another country not adopted by a body designated by the Council of the AICPA (Council) to promulgate generally accepted accounting principles (GAAP) when such audited financial statements are intended for use outside the United States. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 127. Paragraph subsequently renumbered and amended, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

Definitions

Special Purpose Financial Statements and Special Purpose Frameworks (Ref: par. .07)

.A6 Certain regulators, including state and local government legislators, regulatory agencies, or departments, require financial statements to be prepared in accordance with a financial reporting framework that is based on a framework promulgated by an authorized or recognized standard-setting organization (for example, FASB or GASB), but does not include all of the requirements of that framework. Such frameworks are regulatory bases of accounting, as described in paragraph .07. In some circumstances, however, the cash or tax basis of accounting may be permitted by a regulator. For purposes of this section, the cash and tax bases of accounting are not regulatory bases of accounting. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 127. Paragraph subsequently renumbered and amended, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

Considerations When Accepting the Engagement

Acceptability of the Financial Reporting Framework (Ref: par. .10)

.A7 In the case of special purpose financial statements, the financial information needs of the intended users are a factor in determining the acceptability of the financial reporting framework applied in the preparation of the financial statements. [Paragraph renumbered by the issuance of SAS No. 139, March 2020.]

.A8 The applicable financial reporting framework may encompass the financial reporting standards established by an organization that is authorized or recognized to promulgate standards for special purpose financial statements. In that case, those standards will be presumed acceptable for that purpose if the organization follows an established and transparent process involving deliberation and consideration of the views of relevant stakeholders. In some circumstances, law or regulation may prescribe the financial reporting framework to be used by management in the preparation of special purpose financial statements for a certain type of entity. For example, a regulator may establish financial reporting provisions to meet the requirements of that regulator. In the absence of indications to the contrary, such a financial reporting framework is presumed acceptable for special purpose financial statements prepared by such an entity. [Paragraph renumbered by the issuance of SAS No. 139, March 2020.]

.A9 The acceptability of the financial reporting framework in the circumstances of the engagement is determined by considering whether the framework exhibits attributes normally exhibited by acceptable financial reporting frameworks. Section 210A discusses the attributes of acceptable financial reporting frameworks, which provide management with an appropriate basis for preparing the financial statements and the auditor with suitable criteria for auditing the financial statements.[15] In the case of a special purpose framework, the relative importance to a particular engagement of each of the attributes normally exhibited by acceptable financial reporting frameworks is a matter of professional judgment. For example, for purposes of establishing the value of net assets of an entity at the date of its sale, the seller and purchaser may have agreed that conservative estimates of allowances for uncollectible accounts receivable are appropriate for their needs, even though such financial information may be biased when compared with financial information prepared in accordance with a general purpose framework. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 127. Paragraph renumbered by the issuance of SAS No. 139, March 2020.]

.A10 In the case of financial statements prepared in accordance with a contractual basis of accounting, the parties to the contract or agreement may need to agree on the significant interpretations of the contract on which the special purpose financial statements are based. If agreement cannot be reached, the auditor may determine that the framework is not acceptable. [Paragraph renumbered by the issuance of SAS No. 139, March 2020.]

---

[15] Paragraphs .A2–.A3 of section 210A, *Terms of Engagement*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 127. Footnote renumbered by the issuance of SAS No. 139, March 2020.]

Preconditions for an Audit (Ref: par. .11)

.A11 Section 210A also requires the agreed-upon terms of the audit engagement to include references to the expected form and content of any reports to be issued by the auditor and a statement that there may be circumstances in which a report may differ from its expected form and content.[16]The auditor may discuss with management and, when appropriate, those charged with governance how an auditor's report on financial statements prepared in accordance with a special purpose framework differs from an auditor's report on financial statements prepared in accordance with a general purpose framework. Discussing the expected form and content of the auditor's report may assist management in understanding its responsibilities related to the audit engagement. [Paragraph renumbered and amended, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

Achieving Fair Presentation (Ref: par. .11d)

.A12 In accordance with section 700, the auditor's evaluation about whether the financial statements achieve fair presentation in accordance with the applicable financial reporting framework requires consideration of the following:[17]

a. The overall presentation, structure and content of the financial statements

b. Whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Also see paragraphs .A25–.A29 of this section. [Paragraph renumbered and amended, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

Considerations When Planning and Performing the Audit (Ref: par. .12–.13)

.A13 Section 200 requires the auditor to comply with (*a*) relevant ethical requirements relating to financial statement audit engagements and (*b*) all AU-C sections relevant to the audit. It also requires the auditor to comply with each requirement of an AU-C section unless, in the circumstances of the audit, the entire AU-C section is not relevant or the requirement is not relevant because it is conditional and the condition does not exist. In rare circumstances, the auditor may judge it necessary to depart from a relevant presumptively mandatory requirement in an AU-C section by performing alternative audit procedures to achieve the intent of that requirement.[18] [Paragraph renumbered by the issuance of SAS No. 139, March 2020.]

.A14 An AU-C section is relevant to the audit when the AU-C section is in effect and the circumstances addressed by the AU-C section exist.[19]In an audit of special purpose financial

---

[16]Paragraph .10*f* of section 210A.

[17]Paragraph .14 of section 200. [Footnote renumbered by the issuance of SAS No. 127, January 2013. Footnote renumbered and amended, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

[18]Paragraphs .16, .20, and .24–.26 of section 200. [Footnote renumbered by the issuance of SAS No. 127, January 2013. Footnote subsequently renumbered by the issuance of SAS No. 139, March 2020.]

statements, some of the requirements within the relevant AU-C sections may need to be adapted by the auditor. For example, in section 320, *Materiality in Planning and Performing an Audit*, judgments about matters that are material to users of the financial statements are based on a consideration of the common financial information needs of users as a group.[20] In an audit of special purpose financial statements, those judgments may be based on a consideration of the financial information needs of the intended users. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2017, by SAS No. 132. Paragraph renumbered by the issuance of SAS No. 139, March 2020.]

[.A15] [Paragraph renumbered and deleted by the issuance of SAS No. 139, March 2020.][21]

.A16 In the case of special purpose financial statements, such as those prepared in accordance with a contractual basis of accounting, management may agree with the intended users on a threshold below which misstatements identified during the audit will not be corrected or otherwise adjusted. The existence of such a threshold does not relieve the auditor from the requirement to determine materiality in accordance with section 320 for purposes of planning and performing the audit of the special purpose financial statements. With respect to interpretations of the contract on which the special purpose financial statements are based, the auditor may determine that an interpretation is significant based on qualitative considerations. [Paragraph renumbered by the issuance of SAS No. 132, February 2017. Paragraph subsequently renumbered by the issuance of SAS No. 139, March 2020.]

.A17 Communication with those charged with governance in accordance with GAAS is based on the relationship between those charged with governance and the financial statements subject to audit, in particular, whether those charged with governance are responsible for overseeing the preparation of those financial statements. In the case of special purpose financial statements, those charged with governance may not have such a responsibility; for example, when the financial information is prepared solely for management's use. In such cases, the requirements of section 260, *The Auditor's Communication With Those Charged With Governance*, may not be relevant to the audit of the special purpose financial statements, except when the auditor is also responsible for the audit of the entity's general purpose financial statements or, for example, has agreed to communicate with those charged with governance of the entity relevant matters identified during the audit of the special purpose financial statements. [Paragraph renumbered by the issuance of SAS No. 132, February 2017. Paragraph subsequently renumbered by the issuance of SAS No. 139, March 2020.]

[19]Paragraph .20 of section 200. [Footnote renumbered by the issuance of SAS No. 127, January 2013. Footnote renumbered by the issuance of SAS No. 127, January 2013. Footnote subsequently renumbered by the issuance of SAS No. 139, March 2020.]

[20]Paragraph .02 of section 320, *Materiality in Planning and Performing an Audit*. [Footnote renumbered by the issuance of SAS No. 127, January 2013. Footnote subsequently renumbered by the issuance of SAS No. 139, March 2020.]

[21][Footnote renumbered and deleted by the issuance of SAS No. 139, March 2020.]

Auditor's Responsibilities Regarding the Entity's Ability to Continue as a Going Concern (Ref: par. .14)

Relevance of Going Concern Basis of Accounting to a Special Purpose Framework

.A18 Special purpose financial statements may or may not be prepared in accordance with an applicable financial reporting framework for which the going concern basis of accounting is relevant. The going concern basis of accounting is relevant to a special purpose framework if the special purpose framework requires management, in specified circumstances, to use a basis of accounting other than the going concern basis of accounting. For example, the AICPA's Financial Reporting Framework for Small- and Medium-Sized Entities requires management to assess whether the going concern basis of accounting is appropriate, and if not, to use the liquidation basis of accounting. In contrast, the cash or tax bases of accounting do not specify any alternative basis of accounting to be considered and, thus, do not require management to assess whether the going concern basis of accounting is appropriate. Therefore, the going concern basis of accounting is not relevant to special purpose financial statements prepared using those bases of accounting. Depending on the applicable financial reporting framework used in the preparation of the special purpose financial statements, the description in the auditor's report of management's responsibilities relating to going concern may need to be adapted as necessary.[22] The description in the auditor's report of the auditor's responsibilities may also need to be adapted as necessary depending on how section 570 applies in the circumstances of the engagement.[23] [Paragraph added, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

.A19 Appendix A, "Overview of Reporting Requirements," provides an overview of the reporting requirements depending on the special purpose framework. The exhibit, "Illustrations of Auditor's Reports on Special Purpose Financial Statements," contains illustrations of auditor's reports on special purpose financial statements. [Paragraph renumbered by the issuance of SAS No. 132, February 2017. Paragraph subsequently renumbered by the issuance of SAS No. 139, March 2020.]

Application of Section 700 or Section 703 When Reporting on Special Purpose Financial Statements

.A20 Paragraph .15 of this section requires the auditor to apply the requirements in section 700 or section 703 when forming an opinion and reporting on special purpose financial statements. In doing so, the auditor is also required to apply the reporting requirements in other AU-C sections and may find the special considerations addressed in paragraphs .A18 and .A21–.A22 of this section helpful. [Paragraph added, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

---

[22] Paragraph .32*b* of section 700.

[23] Paragraph .36*e* of section 700.

Key Audit Matters

.A21 For audits of special purpose financial statements, section 701, *Communicating Key Audit Matters in the Independent Auditor's Report*, applies only when the auditor is engaged to communicate key audit matters. [Paragraph added, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

Other Information

.A22 Section 720 addresses the auditor's responsibilities relating to other information in an entity's annual report. In the context of this section, an annual report is a document or combination of documents, the purpose of which is to provide owners (or similar stakeholders) with information on matters presented in the special purpose financial statements. The term similar stakeholders includes specific users whose financial information needs are met by the special purpose framework used to prepare the special purpose financial statements. When the auditor determines that the entity has issued or plans to issue an annual report, the requirements in section 720 apply to the audit of the special purpose financial statements. [Paragraph added, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

Forming an Opinion and Reporting Considerations (Ref: par. .14)

Description of the Applicable Financial Reporting Framework (Ref: par. .16–.17)

.A23 Terms such as *balance sheet*, *statement of financial position*, *statement of income*, *statement of operations*, and *statement of cash flows*, or similar unmodified titles, are generally understood to be applicable only to financial statements that are intended to present financial position, results of operations, or cash flows in accordance with GAAP. Accordingly, the auditor is required by paragraph .16 to evaluate whether the financial statements are suitably titled. For example, cash basis financial statements might be titled as a statement of assets and liabilities arising from cash transactions or as a statement of revenue collected and expenses paid; a financial statement prepared on a regulatory basis of accounting might be titled as a statement of income — regulatory basis. [Paragraph renumbered by the issuance of SAS No. 132, February 2017. Paragraph subsequently renumbered by the issuance of SAS No. 139, March 2020.]

.A24 The description of how the special purpose framework differs from GAAP ordinarily only includes the material differences between GAAP and the special purpose framework. For example, if several items are accounted for differently under the special purpose framework than they would be under U.S. GAAP, but only the differences in how depreciation is calculated are material, a brief description of the depreciation differences is all that would be necessary, and the remaining differences need not be described. The differences need not be quantified. [Paragraph renumbered by the issuance of SAS No. 132, February 2017. Paragraph subsequently renumbered by the issuance of SAS No. 139, March 2020.]

Fair Presentation (Ref: par. .18)

.A25 Financial statements that achieve a fair presentation include all informative disclosures that are appropriate for the applicable financial reporting framework, including matters that affect their use, understanding, and interpretation. Also refer to paragraph .A12. [Paragraph renumbered by the issuance of SAS No. 132, February 2017. Paragraph subsequently renumbered and amended, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

.A26 When the special purpose financial statements contain items that are the same as, or similar to, those in financial statements prepared in accordance with GAAP, informative disclosures similar to those required by GAAP are necessary to achieve fair presentation. For example, financial statements prepared on a tax basis or on a modified cash basis of accounting usually reflect depreciation, long-term debt, and owners' equity. Thus, the informative disclosures for depreciation, long-term debt, and owners' equity in such financial statements would be comparable to those in financial statements prepared in accordance with GAAP. [Paragraph renumbered by the issuance of SAS No. 132, February 2017. Paragraph subsequently renumbered by the issuance of SAS No. 139, March 2020.]

.A27 Disclosures in special purpose financial statements may substitute qualitative information for some of the quantitative information required by GAAP or may provide information that communicates the substance of those requirements. For example, disclosing estimated percentages of revenues, rather than amounts that GAAP presentations would require, may sufficiently convey the significance of sales or leasing to related parties or major customers. [Paragraph renumbered by the issuance of SAS No. 132, February 2017. Paragraph subsequently renumbered by the issuance of SAS No. 139, March 2020.]

.A28 The auditor is also required by paragraph .18*b* to evaluate whether additional disclosures, beyond those specifically required by the framework, related to matters that are not specifically identified on the face of the financial statements or other disclosures may be necessary for the special purpose financial statements to achieve fair presentation. For example, these disclosures may include matters about related party transactions, restrictions on assets and owners' equity, subsequent events, and significant uncertainties. In such circumstances, the special purpose financial statements would include the same disclosure required by GAAP or disclosure that communicates the substance of those requirements. [Paragraph renumbered by the issuance of SAS No. 132, February 2017. Paragraph subsequently renumbered and amended, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

.A29 Appendix B, "Fair Presentation and Adequate Disclosures," provides additional guidance on evaluating the adequacy of disclosures in financial statements prepared in accordance with a special purpose framework, including matters related to the presentation of financial statements. [Paragraph renumbered by the issuance of SAS No. 132, February 2017. Paragraph subsequently renumbered by the issuance of SAS No. 139, March 2020.]

Auditor's Report (Ref: par. .18b)

.A30 When the special purpose financial statements are prepared in accordance with a regulatory or contractual basis of accounting or an other basis of accounting that requires an alert that restricts the use of the auditor's report pursuant to paragraph .06*a–b* of section 905, the auditor is required by paragraph .19*a* to describe the purpose for which the financial statements are prepared or refer to a note in the financial statements that contains that information. This is necessary to avoid misunderstandings when the special purpose financial statements are used for purposes other than those for which they were intended. The note to the financial statements may also describe any significant interpretations of the contract on which the financial statements are based. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 127. Paragraph renumbered by the issuance of SAS No. 132, February 2017. Paragraph subsequently renumbered by the issuance of SAS No. 139, March 2020.]

Alerting Readers in an Emphasis-of-Matter Paragraph That the Financial Statements Are Prepared in Accordance With a Special Purpose Framework (Ref: par. .20)

.A31 Special purpose financial statements may be used for purposes other than those for which they were intended. To avoid misunderstandings, paragraph .20 requires the auditor to include an *emphasis-of-matter* paragraph in the auditor's report that alerts users of the auditor's report that the financial statements are prepared in accordance with a special purpose framework and that the basis of accounting is a basis of accounting other than GAAP. [Paragraph renumbered by the issuance of SAS No. 132, February 2017. Paragraph subsequently renumbered by the issuance of SAS No. 139, March 2020.]

Restricting the Use of the Auditor's Report in an Other-Matter Paragraph (Ref: par. .21)

.A32 Special purpose financial statements prepared in accordance with a contractual or regulatory basis of accounting are suitable only for a limited number of users who can be presumed to have an adequate understanding of such bases of accounting. For example, special purpose financial statements prepared in accordance with a contractual basis of accounting are developed for and directed only to the parties to the contract or agreement. Accordingly, the alert that restricts the use of the auditor's report is required due to the nature of the report and the potential for the report to be taken out of the context in which the auditor's report was intended to be used. Section 905, *Alert That Restricts the Use of the Auditor's Written Communication*, addresses adding other parties as specified parties. [As amended, effective for the auditor's written communications related to audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 125. Paragraph renumbered by the issuance of SAS No. 132, February 2017. Paragraph subsequently renumbered by the issuance of SAS No. 139, March 2020.]

.A33 In the case of special purpose financial statements prepared in accordance with a cash or tax basis of accounting, the auditor may consider it necessary in the circumstances of the engagement to include an alert that restricts the use of the auditor's report. [As amended, effective for the auditor's written communications related to audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 125. Paragraph renumbered by the issuance of SAS No. 132, February 2017. Paragraph subsequently renumbered by the issuance of SAS No. 139, March 2020.]

Regulatory Basis Financial Statements Intended for General Use (Ref: par. .22)

.A34 Special purpose financial statements prepared in accordance with a regulatory basis of accounting may be intended for general use. Such special purpose financial statements are intended for general use when the financial statements together with the auditor's report are intended for use by parties other than those within the entity and the regulatory agencies to whose jurisdiction the entity is subject or when the financial statements together with the auditor's report are distributed by the entity to parties other than the regulatory agencies to whose jurisdiction the entity is subject, either voluntarily or upon specific request. [Paragraph renumbered by the issuance of SAS No. 132, February 2017. Paragraph subsequently renumbered and amended, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

Auditor's Report Prescribed by Law or Regulation (Ref: par. .23–.24)

.A35 The auditor may be required to comply with legal or regulatory requirements in addition to GAAS. When this is the case, the auditor may be required to use a layout, form, or wording in the auditor's report that differs from that described in this section, such as when printed forms or schedules designed or adopted by the bodies with which they are to be filed prescribe the wording of the auditor's report. [Paragraph renumbered by the issuance of SAS No. 132, February 2017. Paragraph subsequently renumbered by the issuance of SAS No. 139, March 2020.]

.A36 When the differences between the legal or regulatory requirements and GAAS relate only to the layout, form, and wording of the auditor's report and, at a minimum, each of the elements identified in paragraph .23 are included in the auditor's report, the auditor's report may refer to GAAS. Accordingly, in such circumstances the auditor is considered to have complied with the requirements of GAAS, even when the layout, form, and wording used in the auditor's report are specified by legal or regulatory reporting requirements. Section 210A addresses circumstances in which law or regulation prescribes the layout, form, or wording of the auditor's report in terms that are significantly different from the requirements of GAAS.[24]

[Paragraph renumbered by the issuance of SAS No. 132, February 2017. Paragraph subsequently renumbered by the issuance of SAS No. 139, March 2020.]

.A37 Some report forms can be made acceptable by inserting additional wording to include the elements identified in paragraph .23. Other report forms can be made acceptable only by complete revision because the prescribed language of the report calls for statements by the auditor that are not consistent with the auditor's function or responsibility; for example, a report form that requests the auditor to certify the financial statements. [Paragraph

[24]Paragraph .18 of section 210A. [Footnote renumbered by the issuance of SAS No. 127, January 2013. Footnote subsequently renumbered by the issuance of SAS No. 132, February 2017. Footnote renumbered by the issuance of SAS No. 139, March 2020.]

renumbered by the issuance of SAS No. 132, February 2017. Paragraph subsequently renumbered by the issuance of SAS No. 139, March 2020.]

.A38 This guidance can be applied to other circumstances, for example, reports on financial statements prepared in accordance with a general purpose framework for which a specific layout, form, or wording of the auditor's report is required. [Paragraph renumbered by the issuance of SAS No. 132, February 2017. Paragraph subsequently renumbered by the issuance of SAS No. 139, March 2020.]

Appendix A — Overview of Reporting Requirements

.A39 The following table provides an overview of the reporting requirements depending on the special purpose framework:

	Cash Basis	Tax Basis	Regulatory Basis	Regulatory Basis (General Use)	Contractual Basis	Other Basis
Opinion(s)	Single opinion on special purpose framework	Single opinion on special purpose framework	Single opinion on special purpose framework	Dual opinion on special purpose framework and generally accepted accounting principles[1]	Single opinion on special purpose framework	Single opinion on special purpose framework
Description of purpose for which special purpose financial statements are prepared[2]	No	No	Yes	Yes	Yes	As required by paragraph .19*a*(ii)
Emphasis-of-matter paragraph alerting readers regarding the preparation in accordance with a special purpose framework[3]	Yes	Yes	Yes	No	Yes	Yes
Other-matter paragraph including an alert restricting the use of the auditor's report[4]	No	No	Yes	No	Yes	As required by paragraph .21c[5]

Appendix B — Fair Presentation and Adequate Disclosures (Ref: par. .A25–.A28)

.A40 When special purpose financial statements contain items that are the same as, or similar to, those in financial statements prepared in accordance with generally accepted accounting principles (GAAP), paragraph .18 requires the auditor to evaluate whether, the financial statements include informative disclosures similar to those required by GAAP. The auditor is also required to evaluate whether additional disclosures, beyond those specifically required by the framework, related to matters that are not specifically identified on the face of the financial statements or other disclosures are necessary for the financial statements to achieve fair presentation. This appendix provides guidance, in addition to paragraphs .A25–.A28, on evaluating the adequacy of disclosures in financial statements prepared in accordance with a special purpose framework, including matters related to the presentation of financial statements.

If special purpose financial statements contain items for which GAAP would require disclosure, the financial statements may either provide the relevant disclosure that would be required for those items in a GAAP presentation or provide information that communicates the substance of that disclosure. Likewise, if GAAP sets forth requirements that apply to the presentation of financial statements, special purpose financial statements may either comply with those requirements or provide information that communicates the substance of those requirements, without modifying the format of the special purpose financial statements. This may result in substituting qualitative information for some of the quantitative information required for GAAP presentations, as in the following examples:

- Disclosure of the repayment terms of significant long-term borrowings may sufficiently communicate information about future principal reduction without providing the summary of principal reduction during each of the next five years.
- Information about the effects of accounting changes, discontinued operations, and extraordinary items, if applicable, could be disclosed in a note to the financial statements without following the GAAP presentation requirements in the statement of results of operations, using those terms, or disclosing net-of-tax effects.[1]
- Instead of showing expenses by their functional classifications in certain industries, a statement of activities could present expenses according to their natural classifications, and a note to the statement could use estimated percentages to communicate information about expenses incurred by the major program and supporting services.
- Instead of showing the amounts of, and changes in, classes of net assets without donor-imposed restrictions and with donor-imposed restrictions in certain industries, a statement of assets and liabilities could report total net assets, a related statement of activities could report changes in those totals, and a note to the financial statements

[1]FASB Accounting Standards Update (ASU) No. 2015-01 eliminated the concept of extraordinary items. However, GASB generally accepted accounting principles still retain this concept. [Footnote added, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

could provide information, using estimated or actual amounts or percentages, about the restrictions on those amounts and on any deferred restricted amounts, describe the major restrictions, and provide information about significant changes in restricted amounts.[2]

For special purpose financial statements, GAAP disclosure requirements that are not relevant to the measurement of the item need not be considered, as illustrated by the following:

- Fair value disclosures for debt and equity securities would not be relevant when the basis of presentation does not adjust the cost of such securities to their fair value.
- For a sponsor of a defined benefit plan, disclosures related to actuarial calculations for contributions to defined benefit plans would not be relevant in financial statements prepared in accordance with the cash or tax basis of accounting.
- Disclosures related to the use of estimates would not be relevant in a presentation that has no estimates.

Special purpose financial statements may not include a statement of cash flows. If a presentation of cash receipts and disbursements is presented in a format similar to a statement of cash flows or if the entity chooses to present such a statement, the statement would either conform to the requirements for a GAAP presentation or communicate their substance. As an example, the statement of cash flows might disclose noncash acquisitions through captions on its face.

[Paragraph renumbered by the issuance of SAS No. 132, February 2017. Paragraph subsequently renumbered and amended, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

[2]FASB ASU No. 2016-14, *Not-for-Profit Entities (Topic 958): Presentation of Financial Statements of Not-for-Profit Entities*. [Footnote added, effective for audits of financial statements prepared in accordance with a special purpose framework for periods ending on or after December 15, 2021, by SAS No. 139.]

- The financial statements have been prepared by management of the entity in accordance with the cash basis of accounting (that is, a special purpose framework).
- Management has a choice of financial reporting frameworks.[1]

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Audit of Financial Statements[2]

Opinion

We have audited the financial statements of ABC Partnership, which comprise the statement of assets and liabilities arising from cash transactions as of December 31, 20X1, and the related statement of revenue collected and expenses paid for the year then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the assets and liabilities arising from cash transactions of ABC Partnership as of December 31, 20X1, and its revenue collected and expenses paid during the year then ended in accordance with the cash basis of accounting described in Note X.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC Partnership, and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Emphasis of Matter — Basis of Accounting[3]

We draw attention to Note X of the financial statements, which describes the basis of accounting. The financial statements are prepared on the cash basis of accounting, which

[1]If management does not have a choice of financial reporting frameworks, the auditor is not required by paragraph .19*b* to make reference to management's responsibility for determining that the applicable financial reporting framework is acceptable in the circumstances.

[2]The subtitle "Report on the Financial Statements" is unnecessary in circumstances when the second subtitle "Report on Other Legal and Regulatory Requirements" is not applicable.

[3]Another appropriate heading may be used.

is a basis of accounting other than accounting principles generally accepted in the United States of America. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the cash basis of accounting described in Note X, and for determining that the cash basis of accounting is an acceptable basis for the preparation of the financial statements in the circumstances. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Partnership's internal control. Accordingly, no such opinion is expressed.[4]
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.

[4]In circumstances in which the auditor also has a responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, omit the following: "but not for the purpose of expressing an opinion on the effectiveness of ABC Partnership's internal control. Accordingly, no such opinion is expressed."

- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Partnership's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Illustration 2 — An Auditor's Report on a Complete Set of Financial Statements Prepared in Accordance With the Tax Basis of Accounting

Circumstances include the following:

- The financial statements have been prepared by management of a partnership in accordance with the basis of accounting the partnership uses for income tax purposes (that is, a special purpose framework).
- Based on the partnership agreement, management does not have a choice of financial reporting frameworks.[1]

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Audit of the Financial Statements[2]

Opinion

We have audited the financial statements of ABC Partnership, which comprise the statements of assets, liabilities, and capital—income tax basis as of December 31, 20X1, and the related statements of revenue and expenses—income tax basis and of changes in partners' capital accounts—income tax basis for the year then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the assets, liabilities, and capital of ABC Partnership as of December 31, 20X1, and its revenue and expenses and changes in partners' capital accounts for the year then ended in accordance with the basis of accounting ABC Partnership uses for income tax purposes described in Note X.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC Partnership, and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Emphasis of Matter — Basis of Accounting[3]

---

[1]If management has a choice of financial reporting frameworks, paragraph .18*b* requires that the explanation of management's responsibility for the financial statements also make reference to its responsibility for determining that the applicable financial reporting framework is acceptable in the circumstances.

[2]The subtitle "Report on the Financial Statements" is unnecessary in circumstances when the second subtitle "Report on Other Legal and Regulatory Requirements" is not applicable.

We draw attention to Note X of the financial statements, which describes the basis of accounting. The financial statements are prepared on the basis of accounting ABC Partnership uses for income tax purposes, which is a basis of accounting other than accounting principles generally accepted in the United States of America. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the basis of accounting ABC Partnership uses for income tax purposes and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Partnership's internal control. Accordingly, no such opinion is expressed.[4]

---

[3]Another appropriate heading may be used.

[4]In circumstances in which the auditor also has a responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, omit the following: "but not for the purpose of expressing an opinion on the effectiveness of ABC Partnership's internal control. Accordingly, no such opinion is expressed."

- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Partnership's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Circumstances include the following:

- The financial statements have been prepared by management of the entity in accordance with a regulatory basis of accounting prescribed by state statutes applicable to the government entity (that is, a special purpose framework).
- The financial statements together with the auditor's report are not intended for general use.
- Based on the regulatory requirements, management does not have a choice of financial reporting frameworks.[1]

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Audit of the Financial Statements[2]

Opinion

We have audited the financial statements of ABC Government Authority, which comprise the statement of net position—regulatory basis as of December 31, 20X1, and the related statements of revenues, expenses, and changes in net position — regulatory basis; and statement of cash flows — regulatory basis for the year then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the regulatory basis net position of ABC Government Authority as of December 31, 20XX, and the regulatory basis changes in net position and regulatory basis cash flows thereof for the year then ended in accordance with the financial reporting provisions of Section Y of Regulation Z of Any State Statutes described in Note X.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section

[1]If management has a choice of financial reporting frameworks, paragraph .18*b* requires that the explanation of management's responsibility for the financial statements also make reference to its responsibility for determining that the applicable financial reporting framework is acceptable in the circumstances.

[2]The subtitle "Report on the Financial Statements" is unnecessary in circumstances when the second subtitle "Report on Other Legal and Regulatory Requirements" is not applicable.

of our report. We are required to be independent of ABC Government Authority and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Emphasis of Matter — Basis of Accounting[3]

We draw attention to Note X of the financial statements, which describes the basis of accounting. As described in Note X to the financial statements, the financial statements are prepared by ABC Government Authority on the basis of the financial reporting provisions of Section Y of Regulation Z of Any State Statutes, which is a basis of accounting other than accounting principles generally accepted in the United States of America, to meet the requirements of Any State Statutes. As a result, the financial statements may not be suitable for another purpose. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Financial Statements[4]

Management is responsible for the preparation and fair presentation of these financial statements in accordance with the financial reporting provisions of Section Y of Regulation Z of Any State Statutes. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive

[3] Another appropriate heading may be used.

[4] The description of management's responsibilities relating to going concern required by paragraph .32*b* of section 700 may need to be included in this section of the report, adapted as necessary, depending on whether the going concern basis of accounting is relevant. See paragraph .A18 of this section.

to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Government Authority's internal control. Accordingly, no such opinion is expressed.[5]
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Government Authority's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Restriction on Use[6]

Our report is intended solely for the information and use of ABC Government Authority and is not intended to be and should not be used by anyone other than these specified parties.

Report on Other Legal and Regulatory Requirements

[*The form and content of this section of the auditor's report would vary depending on the nature of the auditor's other reporting responsibilities.*]

[*Signature of the auditor's firm*]

[*City and state where the auditor's report is issued*]

[*Date of the auditor's report*]

[5]In circumstances in which the auditor also has a responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, omit the following: "but not for the purpose of expressing an opinion on the effectiveness of ABC Government Authority's internal control. Accordingly, no such opinion is expressed."

[6]Another appropriate heading may be used.

Illustration 4 — An Auditor's Report on a Complete Set of Financial Statements Prepared in Accordance With a Regulatory Basis of Accounting (the Financial Statements Together With the Auditor's Report Are Intended for General Use)

Circumstances include the following:

- The financial statements have been prepared by management of the entity in accordance with a regulatory basis of accounting prescribed by state statutes applicable to the government entity (that is, a special purpose framework).
- The regulatory basis financial statements together with the auditor's report are intended for general use.
- Based on the regulatory requirements, management does not have a choice of financial reporting frameworks.[1]
- The variances between the regulatory basis of accounting and accounting principles generally accepted in the United States of America (U.S. GAAP) are not reasonably determinable and are presumed to be material.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Audit of the Financial Statements[2]

Opinions

We have audited the financial statements of ABC Government Authority, which comprise the statement of net position—regulatory basis as of December 31, 20X1, and the related statements of revenues, expenses, and changes in net position—regulatory basis and cash flows—regulatory basis for the year then ended, and the related notes to the financial statements.

Unmodified Opinion on Regulatory Basis of Accounting

In our opinion, the accompanying financial statements present fairly, in all material respects, the regulatory basis net position of ABC Government Authority as of December 31, 20X1, and the regulatory basis revenues, expenses, and changes in net position and regulatory basis cash flows thereof for the year then ended in accordance with the financial reporting provisions of Section Y of Regulation Z of Any State Statutes described in Note X.

Adverse Opinion on U.S. Generally Accepted Accounting Principles

---

[1] If management has a choice of financial reporting frameworks, paragraph .18*b* requires that the explanation of management's responsibility for the financial statements also make reference to its responsibility for determining that the applicable financial reporting framework is acceptable in the circumstances.

[2] The subtitle "Report on the Financial Statements" is unnecessary in circumstances when the second subtitle "Report on Other Legal and Regulatory Requirements" is not applicable.

In our opinion, because of the significance of the matter discussed in the Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles section of our report, the financial statements do not present fairly, in accordance with accounting principles generally accepted in the United States of America, the financial position of ABC Government Authority as of December 31, 20X1, or the changes in net position and cash flows thereof for the year then ended.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC Government Authority, and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles

As described in Note X of the financial statements, the financial statements are prepared by ABC Government Authority on the basis of the financial reporting provisions of Section Y of Regulation Z of Any State Statutes, which is a basis of accounting other than accounting principles generally accepted in the United States of America, to meet the requirements of Any State Statutes. The effects on the financial statements of the variances between the regulatory basis of accounting described in Note X and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material and pervasive.

Responsibilities of Management for the Financial Statements[3]

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the financial reporting provisions of Section Y of Regulation Z of Any State Statutes. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than

[3]The description of management's responsibilities relating to going concern required by paragraph .32*b* of section 700 may need to be included in this section of the report, adapted as necessary, depending on whether the going concern basis of accounting is relevant. See paragraph .A18 of this section.

for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Government Authority's internal control. Accordingly, no such opinion is expressed.[4]
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Government Authority's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Report on Other Legal and Regulatory Requirements

[*Form and content of this section of the auditor's report will vary depending on the nature of the auditor's other reporting responsibilities.*]

[*Signature of the auditor's firm*]

[*Auditor's city and state*]

[*Date of the auditor's report*]

[4]In circumstances in which the auditor also has a responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, omit the following: "but not for the purpose of expressing an opinion on the effectiveness of ABC Partnership's internal control. Accordingly, no such opinion is expressed."

Illustration 5 — An Auditor's Report on a Complete Set of Financial Statements Prepared in Accordance With a Contractual Basis of Accounting

Circumstances include the following:

- The financial statements have been prepared by management of the entity in accordance with a contractual basis of accounting (that is, a special purpose framework) to comply with the provisions of that contract.
- Based on the provisions of the contract, management does not have a choice of financial reporting frameworks.[1]

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Audit of the Financial Statements[2]

Opinion

We have audited the financial statements of ABC Company, which comprise the assets and liabilities — contractual basis as of December 31, 20X1, and the revenues and expenses — contractual basis, changes in equity — contractual basis, and cash flows — contractual basis for the year then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the assets and liabilities of ABC Company as of December 31, 20X1, and revenues, expenses, changes in equity, and cash flows for the year then ended in accordance with the financial reporting provisions of Section Z of the contract between ABC Company and DEF Company dated January 1, 20X1 (the contract).

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABC Company, and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Emphasis of Matter — Basis of Accounting[3]

[1]If management has a choice of financial reporting frameworks, paragraph .18*b* requires that the explanation of management's responsibility for the financial statements also make reference to its responsibility for determining that the applicable financial reporting framework is acceptable in the circumstances.

[2]The subtitle "Report on the Financial Statements" is unnecessary in circumstances when the second subtitle "Report on Other Legal and Regulatory Requirements" is not applicable.

We draw attention to Note X of the financial statements, which describes the basis of accounting. The financial statements are prepared by ABC Company on the basis of the financial reporting provisions of Section Z of the contract, which is a basis of accounting other than accounting principles generally accepted in the United States of America, to comply with the financial reporting provisions of the contract referred to above. As a result, the financial statements may not be suitable for another purpose. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Financial Statements[4]

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the financial reporting provisions of Section Z of the contract. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.[5]

---

[3]Another appropriate heading may be used.

[4]The description of management's responsibilities relating to going concern required by paragraph .32*b* of section 700 may need to be included in this section of the report, adapted as necessary, depending on whether the going concern basis of accounting is relevant. See paragraph .A18 of this section.

- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Restriction on Use[6]

Our report is intended solely for the information and use of ABC Company and DEF Company and is not intended to be and should not be used by anyone other than these specified parties.

Report on Other Legal and Regulatory Requirements

AU-C Section 805

Special Considerations — Audits of Single Financial Statements and Specific Elements, Accounts, or Items of a Financial Statement

Source: SAS No. 122; SAS No. 139; SAS No. 145.

See section 9805 for interpretations of this section.

Effective for audits of single financial statements or specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2012, unless otherwise indicated.

Note

In March 2023, the ASB issued SAS No. 149, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors and Audits of Referred-to Auditors)*, which contains amendments to this section.

The amendments are effective for audits of single financial statements or specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2026, and can be viewed in appendix C of section 600 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 AU-C sections 200–700 apply to an audit of financial statements and are to be adapted as necessary in the circumstances when applied to audits of other historical financial information. This section addresses special considerations in the application of those AU-C sections to an audit of a single financial statement or of a specific element, account, or item of a financial statement. The single financial statement or the specific element, account, or item of a financial statement may be prepared in accordance with a general or special purpose framework. If prepared in accordance with a special purpose framework, section 800, *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks*, also applies to the audit. (Ref: par. .A1–.A4)

.02 This section does not apply to the report of a component auditor issued as a result of work performed on the financial information of a component at the request of a group engagement team for purposes of an audit of group financial statements (see section 600A, *Special Considerations—Audits of Group Financial Statements [Including the Work of Component Auditors]*).

.03 This section does not override the requirements of the other AU-C sections nor does it purport to address all special considerations that may be relevant in the circumstances of the engagement.

Effective Date

.04 This section is effective for audits of single financial statements or specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2012.

Objective

.05 The objective of the auditor, when applying generally accepted auditing standards (GAAS) in an audit of a single financial statement or of a specific element, account, or item of a financial statement, is to address appropriately the special considerations that are relevant to

a. the acceptance of the engagement;

b. the planning and performance of that engagement; and

c. forming an opinion and reporting on the single financial statement or the specific element, account, or item of a financial statement.

Definitions

.06 For purposes of this section, reference to

a. an *element of a financial statement* or an *element* means an *element, account, or item of a financial statement*. (Ref: par. .A5)

b. a *single financial statement* or a *specific element of a financial statement* includes the related disclosures. (Ref: par. A2)

[As amended by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

.07 Reference to *generally accepted accounting principles* (GAAP) in GAAS means GAAP promulgated by bodies designated by the Council of the AICPA pursuant to the "Compliance With Standards Rule" (ET sec. 1.310.001) and the "Accounting Principles Rule" (ET sec. 203 1.320.001) of the AICPA Code of Professional Conduct. [Revised, January 2015, to reflect conforming changes necessary due to the issuance of the revised AICPA Code of Professional Conduct, effective December 15, 2014.]

Requirements

Considerations When Accepting the Engagement

Application of GAAS (Ref: par. .A6–.A8)

.08 Section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*, requires the auditor to comply with all AU-C sections relevant to the audit.[1] In the case of an audit of a single financial statement or a specific element of a financial statement, this requirement applies irrespective of whether the auditor is also engaged to audit the entity's complete set of financial statements.

.09 If the auditor is not also engaged to audit the entity's complete set of financial statements, the auditor should determine whether the audit of a single financial statement or a specific element of those financial statements in accordance with GAAS is practicable. The auditor should also determine whether the auditor will be able to perform procedures on interrelated items, as required by paragraph .13.

Acceptability of the Financial Reporting Framework (Ref: par. .A9–.A13)

.10 Section 210A, *Terms of Engagement*, requires the auditor to determine the acceptability of the financial reporting framework applied in the preparation of the financial statements.[2] In the case of an audit of a single financial statement or a specific element of a financial statement, the auditor should obtain an understanding of

a. the purpose for which the single financial statement or specific element of a financial statement is prepared,

b. the intended users, and

c. the steps taken by management to determine that the application of the financial reporting framework is acceptable in the circumstances.

.11 The auditor's determination required by paragraph .10 should include consideration of whether the application of the financial reporting framework will result in a presentation that provides adequate disclosures to enable the intended users to understand the information conveyed in the financial statement or the specific element and the effect of material transactions and events on the information conveyed in the financial statement or the specific element.

---

[1]Paragraph .20 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

[2]Paragraph .06*a* of section 210A, *Terms of Engagement*.

Considerations When Planning and Performing the Audit

.12 Section 200 states that GAAS is written in the context of an audit of financial statements; it is to be adapted as necessary in the circumstances when applied to audits of other historical financial information.[3] In planning and performing the audit of a single financial statement or a specific element of a financial statement, the auditor should adapt all AU-C sections relevant to the audit as necessary in the circumstances of the engagement. (Ref: par. .A14–.A17)

.13 In the case of an audit of a single financial statement or a specific element of a financial statement, the auditor should perform procedures on interrelated items as necessary to meet the objective of the audit. In the case of an audit of a specific element of a financial statement (Ref: par. .A18)

a. the auditor should, if the specific element is, or is based upon, the entity's stockholders' equity or the equivalent, perform procedures necessary to obtain sufficient appropriate audit evidence to enable the auditor to express an opinion about financial position, excluding matters related to classification or disclosure that are not relevant to the audit of the specific element.

b. the auditor should, if the specific element is, or is based upon, the entity's net income or the equivalent, perform procedures necessary to obtain sufficient appropriate audit evidence to enable the auditor to express an opinion about financial position and results of operations, excluding matters related to classification or disclosure that are not relevant to the audit of the specific element.

Materiality (Ref: par. .A19)

.14 Section 320, *Materiality in Planning and Performing an Audit*, requires the auditor to determine, when establishing the overall audit strategy, materiality for the financial statements as a whole.[4] In the case of an audit of a single financial statement, the auditor should determine materiality for the single financial statement being reported on rather than for the complete set of financial statements. In the case of an audit of one or more specific elements of a financial statement, the auditor should determine materiality for each individual element reported on rather than the aggregate of all elements or the complete set of financial statements.

Forming an Opinion and Reporting Considerations

.15 When forming an opinion and reporting on a single financial statement or a specific element of a financial statement, the auditor should apply the requirements in section 700, *Forming an Opinion and Reporting on Financial Statements*, or section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, and when applicable, section 800, *Special Considerations — Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks*, adapted as necessary

[3]Paragraph .02 of section 200.

[4]Paragraph .10 of section 320, *Materiality in Planning and Performing an Audit*.

in the circumstances of the engagement. (Ref: par. .A20–.A22) [As amended by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

Reporting on the Entity's Complete Set of Financial Statements and a Single Financial Statement or a Specific Element of Those Financial Statements

.16 If, in conjunction with an engagement to audit the entity's complete set of financial statements, the auditor undertakes an engagement to audit a single financial statement or a specific element of a financial statement, the auditor should

a. issue a separate auditor's report and express a separate opinion for each engagement.

b. indicate in the report on a specific element of a financial statement the date of the auditor's report on the complete set of financial statements and the nature of opinion expressed on those financial statements under an appropriate heading.

.17 Except as required by paragraph .21, an audited single financial statement or an audited specific element of a financial statement may be published together with the entity's audited complete set of financial statements, provided that the presentation of the single financial statement or the specific element is sufficiently differentiated from the complete set of financial statements. The auditor should also differentiate the report on the single financial statement or the specific element of a financial statement from the report on the complete set of financial statements.

.18 If the auditor concludes that the presentation of the audited single financial statement or the audited specific element does not differentiate it sufficiently from the complete set of financial statements, as described in paragraph .17, the auditor should ask management to remedy the situation. The auditor should not release the auditor's report containing the opinion on the single financial statement or the specific element of a financial statement until satisfied with the differentiation.

Considering the Implications of Certain Matters Included in the Auditor's Report on the Entity's Complete Set of Financial Statements

.19 If the auditor's report on an entity's complete set of financial statements includes a modified opinion, an emphasis-of-matter or other-matter paragraph, a going concern section, a communication of key audit matters, or a statement describing an uncorrected material misstatement of other information, the auditor should consider the implications, if any, that these matters have for the audit of the single financial statement or for the specific element of a financial statement and for the auditor's report thereon. (Ref: par. .A23–.A26) [As amended by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

Modifications to the Opinion in the Independent Auditor's Report

.20 In the case of an audit of a specific element of a financial statement, if the auditor's modified opinion on the entity's complete set of financial statements as a whole is relevant to the audit of the specific element, the auditor should (Ref: par. .A27–.A29)

a. express an adverse opinion on the specific element when the modification of the auditor's opinion on the complete set of financial statements as a whole arises from a material misstatement in such financial statements.

b. disclaim an opinion on the specific element when the modification of the auditor's opinion on the complete set of financial statements as a whole arises from an inability to obtain sufficient appropriate audit evidence.

Adverse Opinion or Disclaimer of Opinion in the Auditor's Report on the Entity's Complete Set of Financial Statements

.21 If the auditor concludes that it is necessary to express an adverse opinion or disclaim an opinion on the entity's complete set of financial statements as a whole, an unmodified opinion on a specific element in the same auditor's report would contradict the adverse opinion or disclaimer of opinion on the entity's complete set of financial statements as a whole and would be tantamount to expressing a piecemeal opinion. In the context of a separate audit of a specific element of those financial statements, when the auditor nevertheless considers it appropriate to express an unmodified opinion on that specific element, the auditor should only do so if

a. that opinion is expressed in an auditor's report that is neither published together with nor otherwise accompanies the auditor's report containing the adverse opinion or disclaimer of opinion and

b. the element does not constitute a major portion of the entity's complete set of financial statements or the specific element is not, or is not based upon, the entity's stockholders' equity or net income or the equivalent.

[As amended by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

.22 A single financial statement is deemed to constitute a major portion of a complete set of financial statements. Therefore, the auditor should not express an unmodified opinion on a single financial statement of a complete set of financial statements if the auditor has expressed an adverse opinion or disclaimed an opinion on the complete set of financial statements as a whole, even if the auditor's report on the single financial statement is neither published together with nor otherwise accompanies the auditor's report containing the adverse opinion or disclaimer of opinion. (Ref: par. .A30)

.23 If the auditor's report on an entity's complete set of financial statements includes an emphasis-of-matter paragraph or an other-matter paragraph that is relevant to the audit of the single financial statement or the specific element, the auditor should include a similar emphasis-of-matter paragraph or an other-matter paragraph in the auditor's report on the single financial statement or the specific element, in accordance with section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report*. (Ref: par. .A29)

Reporting on an Incomplete Presentation but One That Is Otherwise in Accordance With Generally Accepted Accounting Principles (Ref: par. .A31–.A32)

.24 When the auditor reports on an incomplete presentation but one that is otherwise in accordance with GAAP, the auditor should include an emphasis-of-matter paragraph[5] in the auditor's report that

a. states the purpose for which the presentation is prepared and refers to a note in the financial statements that describes the basis of presentation and

b. indicates that the presentation is not intended to be a complete presentation of the entity's assets, liabilities, revenues, or expenses.

Application and Other Explanatory Material

Scope of This Section (Ref: par. .01 and .06*b*)

.A1 Section 200 defines the term *historical financial information* as information expressed in financial terms regarding a particular entity, derived primarily from that entity's accounting system, about economic events occurring in past time periods or about economic conditions or circumstances at points in time in the past. [As amended by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

.A2 Section 200 defines the term *financial statements* as a structured representation of historical financial information, including disclosures, intended to communicate an entity's economic resources or obligations at a point in time or the changes therein for a period of time in accordance with a financial reporting framework. The term *financial statements* ordinarily refers to a complete set of financial statements as determined by the requirements of the applicable financial reporting framework, but can also refer to a single financial statement.[6] [Paragraph renumbered and amended by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

---

[5]Paragraphs .06–.07 of section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report.*

[6]Paragraph .14 of section 200.

.A3 Paragraph .A9 of section 200 provides guidance on what constitutes a complete set of financial statements and also provides the following examples of single financial statements, each of which would include related disclosures:

- Balance sheet
- Statement of income or statement of operations
- Statement of retained earnings
- Statement of cash flows
- Statement of assets and liabilities
- Statement of changes in owner's equity
- Statement of revenue and expenses
- Statement of operations by product lines

[Paragraph renumbered and amended by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

.A4 An attest engagement other than an audit of historical financial information is performed in accordance with Statements on Standards for Attestation Engagements. For example, AT-C section 215, *Agreed-Upon Procedures Engagements*, applies when reporting on the results of applying agreed-upon procedures to one or more specific elements of a financial statement, and AT-C section 210, *Review Engagements*, provides guidance when reporting on a review of one or more specific elements of a financial statement. Paragraph .A8 describes circumstances in which an engagement performed in accordance with the attestation standards may be more practicable than an audit performed in accordance with this section. [Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph renumbered and amended by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

Definitions

Element of a Financial Statement (Ref: par. .06)

.A5 The appendix, "Examples of Specific Elements, Accounts, or Items of a Financial Statement," lists examples of an element of a financial statement. [Paragraph renumbered by the issuance of SAS No. 139, March 2020.]

Considerations When Accepting the Engagement

Application of GAAS (Ref: par. .08–.09)

.A6 Section 200 requires the auditor to comply with (*a*) relevant ethical requirements relating to financial statement audit engagements and (*b*) all AU-C sections relevant to the audit. It also requires the auditor to comply with each requirement of an AU-C section, unless, in the circumstances of the audit, the entire AU-C section is not relevant or the requirement is not relevant because it is conditional and the condition does not exist. In rare circumstances, the auditor may judge it necessary to depart from a relevant presumptively mandatory requirement in an AU-C section by performing alternative audit procedures to achieve the intent of that requirement.[7] [Paragraph renumbered by the issuance of SAS No. 139, March 2020.]

Complying With Relevant Requirements

.A7 Compliance with the requirements of AU-C sections relevant to the audit of a single financial statement or a specific element of a financial statement may not be practicable when the auditor is not also engaged to audit the entity's complete set of financial statements. In such cases, the auditor often does not have the same understanding of the entity and its environment, the applicable financial reporting framework, and its internal control, as an auditor who also audits the entity's complete set of financial statements. The auditor also does not have the audit evidence about the general quality of the accounting records or other accounting information that would be acquired in an audit of the entity's complete set of financial statements. Accordingly, the auditor may need further evidence to corroborate audit evidence acquired from the accounting records. Also see paragraph .A18. [Paragraph renumbered by the issuance of SAS No. 139, March 2020. As amended, effective for audits of single financial statements or specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2023, by SAS No. 145.]

.A8 In the case of an audit of a specific element of a financial statement, certain AU-C sections require audit work that may be disproportionate to the specific element being audited. For example, although the requirements of section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, may be relevant in the circumstances of an audit of a schedule of accounts receivable (see paragraph .A14), complying with those requirements may not be practicable because of the audit effort required. If the auditor concludes that an audit of a single financial statement or a specific element of a financial statement in accordance with GAAS may not be practicable, the auditor may discuss with management whether another type of engagement might be more practicable, such as an engagement performed in accordance with the Statements on Standards for Attestation Engagements, as described in paragraph .A4. [Revised, August 2012, to reflect conforming changes necessary due to the issuance of SAS No. 126. Paragraph renumbered and amended by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

Acceptability of the Financial Reporting Framework (Ref: par. .10–.11)

.A9 In the case of an audit of a single financial statement or a specific element of a financial statement, the financial information needs of the intended users are relevant in determining the acceptability of the financial reporting framework applied

[7] Paragraphs .16, .20, and .24–.26 of section 200.

in the preparation of the single financial statement or the specific element. [Paragraph renumbered by the issuance of SAS No. 139, March 2020.]

.A10 A single financial statement or a specific element of a financial statement may be prepared in accordance with relevant requirements of a financial reporting framework established by an authorized or recognized standards-setting organization for the preparation of a complete set of financial statements (for example, accounting principles generally accepted in the United States of America [U.S. GAAP] or International Financial Reporting Standards promulgated by the International Accounting Standards Board). If this is the case, determination of the acceptability of the applicable framework may involve considering whether that framework includes all the requirements of the framework that are relevant to the presentation of a single financial statement or a specific element of a financial statement that provides adequate disclosures. [Paragraph renumbered and amended by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

.A11 The determination of the acceptability of the applicable framework may also include consideration of the following:

- Whether the applicable financial reporting framework is explicitly or implicitly restricted to the preparation of a complete set of financial statements.
- Whether the single financial statement or the specific element of a financial statement will
  - — comply fully with each of those requirements of the framework relevant to the particular financial statement or the particular element and the presentation of the financial statement or the specific element of a financial statement, including the related disclosures. For example, when reporting on a schedule of long-term debt prepared in accordance with U.S. GAAP relevant to that schedule, the schedule of long-term debt, including the related notes, would be comparable to such information in financial statements prepared in accordance with U.S. GAAP.
  - — provide, if necessary to achieve fair presentation, disclosures beyond those specifically required by the framework or, in extremely rare circumstances, depart from a requirement of the framework.[8] A single financial statement or a specific element of a financial statement, including the related notes, that achieves a fair presentation includes all informative disclosures that are appropriate for the applicable financial reporting framework, including matters that affect their use, understanding, and interpretation.

[Paragraph renumbered and amended by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

[8] See paragraph .14 of section 200 for a definition of *financial reporting framework*.

.A12 The auditor may be requested to audit an incomplete presentation but one that is otherwise in accordance with GAAP. For example, an entity wishing to sell a division or product line may present certain assets and liabilities, revenues, and expenses relating to the division or product line being sold. Incomplete presentations may also be required by a regulatory agency or a contract or an agreement. For example, a regulatory agency may require a schedule of gross income and certain expenses of an entity's real estate operation in which income and expenses are measured in accordance with GAAP, but *expenses* are defined to exclude certain items, such as interest, depreciation, and income taxes. Also, an acquisition agreement may specify a schedule of gross assets and liabilities of the entity measured in accordance with GAAP but limited to the assets to be sold and liabilities to be transferred pursuant to the agreement. These types of presentations are generally regarded as single financial statements, even though certain items may be excluded only to the extent necessary to meet the purpose for which they were prepared. The requirement in paragraph .24 is designed to avoid misunderstandings about the purpose for which the presentation is prepared. [Paragraph renumbered by the issuance of SAS No. 139, March 2020.]

.A13 As indicated in paragraph .A12, incomplete presentations may be required by a regulatory agency or a contract or an agreement. Paragraphs .A2–.A3 of section 800 provide guidance on the acceptability of the financial reporting framework when the regulatory or contractual basis of accounting is based on a general purpose framework, such as GAAP. The auditor may determine that it is more appropriate for the description of the applicable financial reporting framework to refer to the regulatory or contractual basis of accounting, rather than make reference to GAAP. As indicated in paragraph .01, if the presentation is prepared in accordance with a special purpose framework, section 800 also applies to the audit. [Paragraph renumbered and amended by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

Considerations When Planning and Performing the Audit (Ref: par. .12–.13)

.A14 An AU-C section is relevant to the audit when the AU-C section is in effect and the circumstances addressed by the AU-C section exist.[9] Even when only a specific element of a financial statement is the subject of the audit, AU-C sections such as section 240, *Consideration of Fraud in a Financial Statement Audit*, section 550, *Related Parties*, and section 570 are, in principle, relevant. This is because the specific element could be misstated as a result of fraud, the effect of related party transactions, or the incorrect application of the going concern assumption under the applicable financial reporting framework. [Revised, August 2012, to reflect conforming changes necessary due to the issuance of SAS No. 126. Paragraph renumbered and amended by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

.A15 Section 260, *The Auditor's Communication With Those Charged With Governance*, requires the auditor to determine the appropriate person or persons within the entity's governance structure with whom to communicate. Section 260 notes that, in some cases, all

[9] Paragraph .20 of section 200.

of those charged with governance are involved in managing the entity, and the application of communication requirements is modified to recognize this circumstance. When a complete set of financial statements is also prepared by the entity, the person or persons responsible for oversight of the preparation of the single financial statement or the element may not be the same as those responsible for the oversight of the preparation of the complete set of financial statements. [Paragraph added by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

.A16 Furthermore, GAAS is written in the context of an audit of financial statements; it is to be adapted as necessary in the circumstances when applied to the audit of a single financial statement or a specific element of a financial statement.[10] For example, written representations from management about the complete set of financial statements would be replaced by written representations about the presentation of the single financial statement or the specific element, in accordance with the applicable financial reporting framework. [Paragraph renumbered by the issuance of SAS No. 139, March 2020.]

.A17 Matters included in the auditor's report on the complete set of financial statements may have implications for the audit of a single financial statement or of an element of a financial statement (see paragraph .19). When planning and performing an audit of a single financial statement or a specific element of a financial statement in conjunction with the audit of the entity's complete set of financial statements, the auditor may use audit evidence obtained as part of the audit of the entity's complete set of financial statements in the audit of the single financial statement or the specific element. GAAS, however, requires the auditor to plan and perform the audit of the single financial statement or specific element to obtain sufficient appropriate audit evidence on which to base the opinion on the single financial statement or the specific element. [Paragraph renumbered and amended by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

.A18 The individual financial statements that make up a complete set of financial statements, and many of the specific elements of those financial statements, including their related disclosures, are interrelated. For example, sales and receivables, inventory and payables, and buildings and equipment and depreciation each are interrelated. Accordingly, when auditing a single financial statement or a specific element of a financial statement, the auditor may not be able to consider the single financial statement or the specific element in isolation. Consequently, paragraph .13 requires the auditor to perform procedures on interrelated items as necessary to meet the objective of the audit. In the case of an audit of a specific element that is, or is based upon, the entity's stockholders' equity or net income (or the equivalents thereto), paragraph .13 requires the auditor to perform procedures necessary to obtain sufficient appropriate audit evidence about financial position, or financial position and results of operations, respectively, because of the interrelationship between the specific element and the balance sheet accounts and the income statement accounts. However, matters related to classification or disclosure may not be relevant to the audit of the specific element; therefore, audit procedures on such

[10]Paragraph .02 of section 200.

matters may not be necessary in an audit of a specific element. [Paragraph renumbered and amended by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

Materiality (Ref: par. .14)

.A19 The materiality determined for a single financial statement or a specific element of a financial statement differs from the materiality determined for the entity's complete set of financial statements; this will affect the nature, timing, and extent of the audit procedures and the evaluation of uncorrected misstatements. In the case of an audit of a single financial statement, paragraph .14 requires the auditor to determine materiality for the single financial statement being reported on rather than for the complete set of financial statements. In the case of an audit of one or more specific elements of a financial statement, the auditor's opinion is on each of the specific elements; therefore, paragraph .14 requires the auditor to determine materiality for each individual element reported on rather than the aggregate of all elements or the complete set of financial statements. Consequently, an audit of one or more specific elements of a financial statement is usually more extensive than if the same information was being considered in conjunction with an audit of the complete set of financial statements. [Paragraph renumbered by the issuance of SAS No. 139, March 2020.]

Forming an Opinion and Reporting Considerations (Ref: par. .15)

.A20 Sections 700 and 703 require the auditor, in forming an opinion, to evaluate whether the financial statements provide adequate disclosures to enable the intended users to understand the effect of material transactions and events on the information conveyed in the financial statements.[11] In the case of an audit of a single financial statement or a specific element of a financial statement, it is important, in view of the requirements of the applicable financial reporting framework, that the disclosures enable the intended users to understand

- the information conveyed in the financial statement or the specific element and
- the effect of material transactions and events on the information conveyed in the financial statement or the specific element.

[Paragraph renumbered and amended by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

Going Concern

.A21 The applicable financial reporting framework may not specifically address whether management is required to make a going concern assessment for a single financial

---

[11]Paragraph .15 of section 700, *Forming an Opinion and Reporting on Financial Statements*, and paragraph .37 of section 703. [As amended by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

statement or a specific element, account, or item of a financial statement. Therefore, the description in the auditor's report of management's responsibilities relating to going concern[12] may not be relevant or may need to be adapted as necessary. The description in the auditor's report of the auditor's responsibilities[13] relating to going concern may also need to be adapted as necessary depending on whether section 570 is determined to be relevant to the audit in accordance with paragraph .12. In making that determination, the auditor may consider whether the auditor's responsibilities relating to going concern are likely to be relevant to users for the intended purpose of the single financial statement or specific element, account, or item of a financial statement presented. [Paragraph added by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

.A22 The exhibit, "Illustrations of Auditor's Reports on a Single Financial Statement and a Specific Element of a Financial Statements," contains illustrations of auditor's reports. [Paragraph renumbered by the issuance of SAS No. 139, March 2020.]

Considering the Implications of Certain Matters Included in the Auditor's Report on the Entity's Complete Set of Financial Statements (Ref: par. .19–.23)

.A23 Considering whether a matter included in the auditor's report on the complete set of financial statements is relevant in the context of an engagement to report on a single financial statement or a specific element of a financial statement involves professional judgment. [Paragraph added by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

.A24 Factors that may be relevant in considering those implications include the following:

- The nature of the matters described in the auditor's report on the complete set of financial statements and the extent to which they relate to what is included in the single financial statement or a specific element of a financial statement
- The pervasiveness of the matters described in the auditor's report on the complete set of financial statements
- The nature and extent of the differences between the applicable financial reporting frameworks
- The extent of the difference between the periods covered by the complete set of the financial statements compared with the periods or dates of the single financial statement or element of a financial statement

[12]Paragraph .32*b* of section 700. [Footnote added by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

[13]Paragraph .36*e* of section 700. [Footnote added by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

- The time elapsed since the date of the auditor's report on the complete set of the financial statements

[Paragraph added by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

.A25 When applicable, key audit matters communicated in the auditor's report on a complete set of financial statements may have implications for an audit of a single financial statement or specific element of a financial statement. The information included in the "Key Audit Matters" section about how the matter was addressed in the audit of a complete set of financial statements may be useful to the auditor's determination of how to address the matter when it is relevant to an audit of a single financial statement or specific element of a financial statement. [Paragraph added by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

.A26 If the auditor is engaged to communicate key audit matters in the auditor's report on a single financial statement or a specific element of a financial statement, section 701, *Communicating Key Audit Matters in the Independent Auditor's Report*, applies in its entirety. [Paragraph added by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

Modifications to the Opinion in the Independent Auditor's Report (Ref: par. .20 and .23)

.A27 In the case of an audit of a specific element of a financial statement, if the opinion in the auditor's report on an entity's complete set of financial statements is modified and the modification is relevant to the audit of the specific element, the modification is material and pervasive with respect to the specific element. Modifications related to an interrelated item of the specific element may also be relevant to the audit of the specific element. Conversely, modifications related solely to classification or disclosure may not be relevant to the audit of the specific element. [Paragraph renumbered by the issuance of SAS No. 139, March 2020.]

.A28 For example, when there is a qualification of the auditor's opinion in relation to accounts receivable in the auditor's report on the complete set of financial statements and the single financial statement includes accounts receivable or the specific element of a financial statement relates to accounts receivable, there likely would be implications for the audit. On the other hand, if the qualification of the auditor's opinion on the complete set of financial statements relates to classification of long-term debt, then it is less likely that there would be implications for an audit of the single financial statement that is the income statement, or if the specific element of the financial statement relates to accounts receivable. [Paragraph added by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

.A29 Even when certain matters included in the auditor's report on the entity's complete set of financial statements do not have implications for the audit of, or for the auditor's report on, the single financial statement or the specific element of a financial statement, the auditor may deem it appropriate to refer to the matter in an other-matter paragraph in an auditor's report on the single financial statement or on the specific element of a financial statement (see section 706). For example, the auditor may consider it appropriate to refer in the auditor's report on the single financial statement or the specific element of a financial statement to a going concern section included in the auditor's report on the complete set of financial statements. [Paragraph renumbered and amended by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

Adverse Opinion or Disclaimer of Opinion in the Auditor's Report on the Entity's Complete Set of Financial Statements (Ref: par. .22)

.A30 In the auditor's report on an entity's complete set of financial statements, the expression of a disclaimer of opinion regarding the results of operations and cash flows, when relevant, and an unmodified opinion regarding the financial position are permitted because the disclaimer of opinion is being issued on the results of operations and cash flows only and not on the financial statements as a whole.[14] [Paragraph renumbered by the issuance of SAS No. 139, March 2020.]

Reporting on an Incomplete Presentation but One That Is Otherwise in Accordance With GAAP (Ref: par. .24)

.A31 As described in paragraph .A12, the auditor may be requested to audit an incomplete presentation but one that is otherwise in accordance with GAAP. When the auditor reports on an incomplete presentation but one that is otherwise in accordance with GAAP, paragraph .24 requires the auditor to include an emphasis-of-matter paragraph in the auditor's report, which alerts users as to the purpose of the presentation and that the presentation is incomplete. The exhibit illustrates such a paragraph. [Paragraph renumbered by the issuance of SAS No. 139, March 2020.]

.A32 If the presentation is prepared in accordance with a regulatory or contractual basis of accounting, the requirement in paragraph .24 does not apply. In such circumstances, refer to section 800, *Special Considerations — Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks*. See also paragraph .A13 of this section. [Paragraph renumbered and amended by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

[14] Paragraph .A17 of section 510, *Opening Balances—Initial Audit Engagements, Including Reaudit Engagements*, and paragraph .A17 of section 705, *Modifications to the Opinion in the Independent Auditor's Report*. [Footnote renumbered by the issuance of SAS No. 139, March 2020.]

Appendix — Examples of Specific Elements, Accounts, or Items of a Financial Statement (Ref: par. .A5)

.A33 The following are examples of specific elements, accounts, or items of a financial statement:

- Accounts receivable; allowance for doubtful accounts receivable; inventory; the liability for accrued benefits of a private benefit plan; the recorded value of identified intangible assets; or the liability for incurred but not reported claims in an insurance portfolio, including related notes
- A schedule of externally managed assets and income of a private benefit plan, including related notes
- A schedule of disbursements regarding a lease property, including related notes
- A schedule of profit participation or employee bonuses, including related notes

Illustration 5 — An Auditor's Report on an Incomplete Presentation but One That Is Otherwise in Accordance With Generally Accepted Accounting Principles

Illustration 1 — An Auditor's Report on a Single Financial Statement Prepared in Accordance With a General Purpose Framework

Circumstances include the following:

- Audit of a balance sheet (that is, a single financial statement).
- The balance sheet has been prepared by management of the entity in accordance with accounting principles generally accepted in the United States of America.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Audit of the Financial Statement[1]

Opinion

We have audited the balance sheet of ABC Company as of December 31, 20X1, and the related notes (the financial statement).[2]

In our opinion, the accompanying financial statement presents fairly, in all material respects, the financial position of ABC Company as of December 31, 20X1, in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statement section of our report. We are required to be independent of ABC Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statement[3]

Management is responsible for the preparation and fair presentation of the financial statement in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control

[1] The subtitle "Report on the Audit of the Financial Statements" is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

[2] The auditor may refer to the financial statement as the *balance sheet*.

[3] The description of management's responsibilities relating to going concern required by paragraph .32*b* of section 700 may not be relevant or may need to be included in this section of the report, adapted as necessary. See paragraph .A21 of this section. [Footnote added by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

relevant to the preparation and fair presentation of the financial statement that is free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the Financial Statement

Our objectives are to obtain reasonable assurance about whether the financial statement as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statement.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statement, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statement.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statement.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.[4]

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Report on Other Legal and Regulatory Requirements

---

[4]This bullet is included only when the auditor determines that section 570 is relevant to the audit of the single financial statement or specific element, account, or item of a financial statement. See paragraph .A21. [*Date of the auditor's report*]

Illustration 2 — An Auditor's Report on a Single Financial Statement Prepared in Accordance With a Special Purpose Framework

Circumstances include the following:

- Audit of a statement of cash receipts and disbursements (that is, a single financial statement).
- The financial statement has been prepared by management of the entity in accordance with the cash basis of accounting (a special purpose framework) to respond to a request for cash flow information received from a creditor.[1]
- Management has a choice of financial reporting frameworks.[2]

<u>Independent Auditor's Report</u>

[*Appropriate Addressee*]

Report on the Audit of the Financial Statement[3]

Opinion

We have audited the statement of cash receipts and disbursements of ABC Company for the year ended December 31, 20X1, and the related notes (the financial statement).[4]

In our opinion, the accompanying financial statement presents fairly, in all material respects, the cash receipts and disbursements of ABC Company for the year ended December 31, 20X1, in accordance with the cash basis of accounting described in Note X.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statement section of our report. We are required to be independent of ABC Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Emphasis of Matter — Basis of Accounting[5]

---

[1]Section 800, *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks*, contains requirements and guidance on the form and content of financial statements prepared in accordance with a special purpose framework.

[2]Paragraph .19*b* of section 800.

[3]The subtitle "Report on the Financial Statement" is unnecessary in circumstances when the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

[4]The auditor may refer to the financial statements as the *statement of cash receipts and disbursements*.

We draw attention to Note X to the financial statement, which describes the basis of accounting. The financial statement is prepared on the cash basis of accounting, which is a basis of accounting other than accounting principles generally accepted in the United States of America. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Financial Statement[6]

Management is responsible for the preparation and fair presentation of the financial statement in accordance with the cash basis of accounting described in Note X, and for determining that the cash basis of accounting is an acceptable basis for the preparation of the financial statement in the circumstances. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of the financial statement that is free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the Financial Statement

Our objectives are to obtain reasonable assurance about whether the financial statement as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of certain internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statement.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statement, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statement.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose

[5]Another appropriate heading may be used.

[6]The description of management's responsibilities relating to going concern required by paragraph .32*b* of section 700 may not be relevant or may need to be included in this section of the report, adapted as necessary. See paragraph .A21 of this section. [Footnote added by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.

- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statement.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.[7]

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Report on Other Legal and Regulatory Requirements

[*The form and content of this section of the auditor's report would vary depending on the nature of the auditor's other reporting responsibilities.*]

[*Signature of the auditor's firm*]

[*City and state where the auditor's report is issued*]

[*Date of the auditor's report*]

[7]This bullet is included only when the auditor determines that section 570 is relevant to the audit of the single financial statement or specific element, account, or item of a financial statement. See paragraph .A21. [Footnote added by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

Illustration 3 — An Auditor's Report on a Specific Element, Account, or Item of a Financial Statement Prepared in Accordance With a General Purpose Framework

Circumstances include the following:

- Audit of a schedule of accounts receivable (that is, a specific element, account, or item of a financial statement).
- The schedule of accounts receivable has been prepared by management of the entity in accordance with accounting principles generally accepted in the United States of America.
- The audit of the schedule of accounts receivable was performed in conjunction with an engagement to audit the entity's complete set of financial statements. The opinion on those financial statements was not modified, and the report did not include an emphasis-of-matter paragraph or other-matter paragraph.[1]
- Management determined that the going concern assessment in accounting principles generally accepted in the United States of America does not apply to the preparation of the schedule of accounts receivable. Although a going concern assessment was made in the preparation of the entity's complete set of financial statements from which the financial information being reported on has been derived, the going concern assessment period is significantly different because the schedule of accounts receivable is anticipated to be issued several months after the full set of financial statements were issued. The auditor agrees with management's determination regarding the applicability of the going concern assessment to the preparation of the schedule of accounts receivable.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Audit of the Schedule[2]

Opinion

We have audited the schedule of accounts receivable of ABC Company as of December 31, 20X1, and the related notes (the schedule).[3]

---

[1]If the auditor undertakes an engagement to audit a specific element of a financial statement in conjunction with an engagement to audit the entity's complete set of financial statements, paragraph .16*b* requires the auditor to indicate in the report on the specific element of a financial statement the date of the auditor's report on the complete set of financial statements and the nature of opinion expressed on those financial statements under an appropriate heading. [Footnote added by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

[2]The subtitle "Report on the Audit of the Schedule" is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable. [Footnote renumbered by the issuance of SAS No. 139, March 2020.]

In our opinion, the accompanying schedule presents fairly, in all material respects, the accounts receivable of ABC Company as of December 31, 20X1, in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Schedule section of our report. We are required to be independent of ABC Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Schedule[4]

Management is responsible for the preparation and fair presentation of the schedule in accordance with accounting principles generally accepted in the United States of America and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of the schedule that is free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the Schedule

Our objectives are to obtain reasonable assurance about whether the schedule as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the schedule.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the schedule, whether due to fraud or error, and design and perform audit procedures responsive to those risks.

[3]The auditor may refer to the schedule as the *schedule of accounts receivable*. [Footnote renumbered by the issuance of SAS No. 139, March 2020.]

[4]The description of management's responsibilities relating to going concern required by paragraph .32*b* of section 700 may not be relevant or may need to be included in this section of the report, adapted as necessary. See paragraph .A21 of this section. [Footnote added by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the schedule.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the schedule.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.[5]

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Other Matter

We have audited, in accordance with GAAS, the financial statements of ABC Company as of and for the year ended December 31, 20X1, and our report thereon, dated March 15, 20X2, expressed an unmodified opinion on those financial statements.

Report on Other Legal and Regulatory Requirements

[*The form and content of this section of the auditor's report would vary depending on the nature of the auditor's other reporting responsibilities.*]

[*Signature of the auditor's firm*]

[*City and state where the auditor's report is issued*]

[*Date of the auditor's report*]

[5]This bullet is included only when the auditor determines that section 570 is relevant to the audit of the single financial statement or specific element, account, or item of a financial statement. See paragraph .A21. Footnote added by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

Illustration 4 — An Auditor's Report on a Specific Element, Account, or Item of a Financial Statement Prepared in Accordance With a Special Purpose Framework

Circumstances include the following:

- Audit of a schedule of royalties applicable to engine production (that is, a specific element, account, or item of a financial statement).
- The financial information has been prepared by management of the entity in accordance with a contractual basis of accounting (that is, a special purpose framework) to comply with the provisions of that contract.[1]
- Based on the provisions of the contract, management does not have a choice of financial reporting frameworks.[2]
- The audit of the schedule was not performed in conjunction with an engagement to audit the entity's complete set of financial statements.[3]

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Audit of the Schedule[4]

Opinion

We have audited the schedule of royalties applicable to engine production of the Q Division of ABC Company for the year ended December 31, 20X1, and the related notes (the schedule).[5]

In our opinion, the accompanying schedule presents fairly, in all material respects, the royalties applicable to engine production of the Q Division of ABC Company for the year ended December 31, 20X1, in accordance with the financial reporting provisions of Section Z of the license agreement between ABC Company and XYZ Corporation dated January 1, 20X1 (the contract).

---

[1]Section 800 contains requirements and guidance on the form and content of financial statements prepared in accordance with a special purpose framework.

[2]Paragraph .19*b* of section 800.

[3]If the auditor undertakes an engagement to audit a specific element of a financial statement in conjunction with an engagement to audit the entity's complete set of financial statements, paragraph .16 requires the auditor to indicate in the report on the specific element of a financial statement the date of the auditor's report on the complete set of financial statements and the nature of opinion expressed on those financial statements under an appropriate heading.

[4]The subtitle "Report on the Schedule" is unnecessary in circumstances when the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

[5]The auditor may refer to the schedule as the *schedule of royalties*.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Schedule section of our report. We are required to be independent of ABC Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Emphasis of Matter — Basis of Accounting[6]

We draw attention to Note X to the schedule, which describes the basis of accounting. The schedule was prepared by ABC Company on the basis of the financial reporting provisions of Section Z of the contract, which is a basis of accounting other than accounting principles generally accepted in the United States of America. As a result, the schedule may not be suitable for another purpose. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Schedule[7]

Management is responsible for the preparation and fair presentation of the schedule in accordance with the financial reporting provisions of Section Z of the contract, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of the schedule that is free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the Schedule

Our objectives are to obtain reasonable assurance about whether the schedule as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the schedule.

In performing an audit in accordance with GAAS, we:

---

[6] Another appropriate heading may be used.

[7] The description of management's responsibilities relating to going concern required by paragraph .32b of section 700 may not be relevant or may need to be included in this section of the report, adapted as necessary. See paragraph .A21 of this section. [Footnote added by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the schedule, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the schedule.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the schedule.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.[8]

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Other-Matter Paragraph — Restriction on Use[9]

Our report is intended solely for the information and use of ABC Company and XYZ Corporation and is not intended to be and should not be used by anyone other than these specified parties.

Report on Other Legal and Regulatory Requirements

[*The form and content of this section of the auditor's report would vary depending on the nature of the auditor's other reporting responsibilities.*]

[*Signature of the auditor's firm*]

[*City and state where the auditor's report is issued*]

[*Date of the auditor's report*]

[8]This bullet is included only when the auditor determines that section 570 is relevant to the audit of the single financial statement or specific element, account, or item of a financial statement. See paragraph .A21. [Footnote added by SAS No. 139, effective for audits of single financial statements and specific elements, accounts, or items of a financial statement as of or for periods ending on or after December 15, 2021. Early application is not permitted.]

[9]Another appropriate heading may be used. [Footnote renumbered by the issuance of SAS No. 139, March 2020.]

Illustration 5 — An Auditor's Report on an Incomplete Presentation but One That Is Otherwise in Accordance With Generally Accepted Accounting Principles

Circumstances include the following:

- Audit of the historical summaries of gross income and direct operating expenses (that is, a single financial statement).
- The historical summaries have been prepared by management of the entity in accordance with accounting principles generally accepted in the United States of America but are an incomplete presentation of revenues and expenses.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Historical Summaries[1]

Opinion

We have audited the Historical Summaries of Gross Income and Direct Operating Expenses of ABC Apartments for each of the three years in the period ended December 31, 20X1, and the related notes (the historical summaries).[2]

In our opinion, the accompanying historical summaries present fairly, in all material respects, the gross income and direct operating expenses described in Note X of ABC Apartments for each of the three years in the period ended December 31, 20X1, in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Historical Summaries section of our report. We are required to be independent of ABC Apartments and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Emphasis of Matter — Basis of Accounting

We draw attention to Note X to the historical summaries, which describes that the accompanying historical summaries were prepared for the purpose of complying with the

[1] The subtitle "Report on the Audit of the Historical Summaries" is unnecessary in circumstances in which the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

[2] The auditor may refer to the historical summaries as the *financial statement*.

rules and regulations of Regulator DEF (for inclusion in the filing of Form Z of ABC Company) and are not intended to be a complete presentation of the Company's revenues and expenses. As a result, the financial statements may not be suitable for another purpose. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Historical Summaries[3]

Management is responsible for the preparation and fair presentation of the historical summaries in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of the historical summaries that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the Historical Summaries

Our objectives are to obtain reasonable assurance about whether the historical summaries as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the historical summaries.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the historical summaries, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the historical summaries.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed.
