Part I — Statements on Auditing Standards and Sources of Sections in Current Text

Statements on Auditing Standards

Note

This table lists Statements on Auditing Standards (SASs) issued subsequent to SAS No. 122, *Statements on Auditing Standards: Clarification and Recodification*, which was issued in October 2011. Refer to part II, "List of Statements on Auditing Standards Nos. 1–121 and List of Statements on Auditing Procedure Nos. 1–54," of this section for SASs issued prior to SAS No. 122.

No.	Date Issued	Title	AU-C Section
122	Oct. 2011	*Statements on Auditing Standards: Clarification and Recodification*[1]	
123	Oct. 2011	*Omnibus Statement on Auditing Standards — 2011*[2]	
124	Oct. 2011	*Financial Statements Prepared in Accordance With a Financial Reporting Framework Generally Accepted in Another Country*	910
125	Dec. 2011	*Alert That Restricts the Use of the Auditor's Written Communication*	905
126	June 2012	*The Auditor's Consideration of An Entity's Ability to Continue as a Going Concern* (Redrafted)	570
127	Jan. 2013	*Omnibus Statement on Auditing Standards — 2013*[3]	
128	Feb. 2014	*Using the Work of Internal Auditors*	610
129	July 2014	*Amendment to Statement on Auditing Standards No. 122 Section 920,* Letters for Underwriters and Certain Other Requesting Parties, *as Amended*	920
130	October 2015	*An Audit of Internal Control Over Financial Reporting That Is Integrated With an Audit of Financial Statements*	940
131	January 2016	*Amendment to Statement on Auditing Standards No. 122 Section 700,* Forming an Opinion and Reporting on Financial Statements	700
132	February 2017	*The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*	570
133	July 2017	*Auditor Involvement With Exempt Offering Documents*	945
134	May 2019	*Auditor Reporting and Amendments, Including Amendments Addressing Disclosures in the Audit of Financial Statements*[4]	700, 701, 705, 706

No.	Date Issued	Title	AU-C Section
135	May 2019	*Omnibus Statement on Auditing Standards — 2019*[5]	
136	July 2019	*Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*[6]	703
137	July 2019	*The Auditor's Responsibilities Relating to Other Information Included in Annual Reports*[7]	720
138	December 2019	*Amendments to the Description of the Concept of Materiality*[8]	
139	March 2020	*Amendments to AU-C Sections 800, 805, and 810 to Incorporate Auditor Reporting Changes From SAS No. 134*[9]	
140	April 2020	*Amendments to AU-C Sections 725, 730, 930, 935, and 940 to Incorporate Auditor Reporting Changes From SAS Nos. 134 and 137*[10]	
141	May 2020	*Amendment to the Effective Dates of SAS Nos. 134–140*[11]	
142	July 2020	*Audit Evidence*[12]	500
143	July 2020	*Auditing Accounting Estimates and Related Disclosures*[13]	540
144	June 2021	*Amendments to AU-C Sections 501, 540, and 620 Related to the Use of Specialists and the Use of Pricing Information Obtained From External Information Sources*[14]	
145	October 2021	*Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*[15]	315
146	June 2022	*Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*[16]	220
147	June 2022	*Inquiries of the Predecessor Auditor Regarding Fraud and Noncompliance With Laws and Regulations*[17]	
148	August 2022	*Amendment to AU-C Section 935*[18]	
149	March 2023	*Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors and Audits of Referred-to Auditors)*[19]	600

[1]SAS No. 122 created various sections throughout *U.S. Auditing Standards — AICPA (Clarified)*. See the following section, "Sources of Sections in Current Text," for a full list.

[2]SAS No. 123 has been integrated within sections 200.03, 200.15, 200.A17, 230.19, 260.12, 260.A27, 705.16, 705.A19, 720.10–.11, 720.A4, 915.09, 915.14, 935.30–.31, and 935.A41.

[3]SAS No. 127 has been integrated within sections 600.25–.26, 600.28, 600.32, 600.50, 600.A53–.A57, 600.A60, 600.A97, 800.01, 800.07, 800.11, 800.18, 800.20, 800.A4–.A5, 800.A8, 800.A24, and 800.A33.

[4]SAS No. 134 has also been integrated within sections 200.14, 210A.10, 210A.A9, 210A.A23–.A24, 210A.A43, 220A.22, 220A.A28, 230.A12, 230.A30, 240.15, 240.A6, 240.A13, 260.03, 260.10–.12, 260.14, 260.A13, 260.A17, 260.A20–.A22, 260.A24, 260.A26–.A28, 260.A30, 260.A32–.A36, 260.A40, 260.A48, 260.A50, 260.A57, 300.A15–.A16, 300.A27, 315.19, 315.27, 315.A1, 315.A19–.A20, 315.A28, 315.A31–.A32, 315.A83, 315.A94–.A95, 315.A99, 315.A106, 315.A127, 315.A131–.A134, 315.A139–.A143, 315.A147, 315.A167, 320.06, 320.A1, 320.A13, 330.21, 330.26, 330.33, 330.A14–.A15, 330.A57, 330.A72, 450.04, 450.A1–.A6, 450.A9, 450.A22–.A24, 450.A29, 510.A18, 510.A20, 540.A18, 540.A120, 570.24–.26, 570.29–.30, 570.A51–.A52, 570.A54–.A57,570.A62, 570.A65, 600.A97, and 910.A11.

[5]SAS No. 135 has been integrated within sections 210A.A32, 240.11, 240.17, 240.19, 240.21, 240.32, 240.A19, 240.A54–.A55, 240.A72, 240.A76, 260.12–.13, 260.17, 260.21, 260.A30, 265.A8, 315.29, 315.A36, 315.A148–.A149, 315.A153, 330.A58–.A59, 510.A5, 550.01, 550.14–.18, 550.20, 550.22–.23, 550.26, 550.29, 550.A3, 550.A11, 550.A14, 550.A16–.A18, 550.A20, 550.A22, 550.A26–.A29, 550.A36, 550.A42–.A45, 550.A52–.A53, 560.A6, 580.17, 580.A16, 580.A18, 600.41, 600.A94, 930.22, 930.A32, 930.A59, 940.A25, and 940.A91.

[6]SAS No. 136 has also been integrated within sections 200.A50, 220A.A25, 240.A62, 330.01, 450.01, 450.09,450.A15, 501.A53, 501.A65, 510.01, 510.A15, 540.A133, 550.02, 550.28, 560.03, 560.07, 560.A10, 560.A14, 560.A30, 570.A37, 570.A60, 580.A38, 708.A9, and 725.01.

[7]SAS No. 137 has also been integrated within sections 210A.06, 210A.A17, 210A.A44, 230.A30, 260.A22, 260.A58, 450.A28, 600.A97, 700.38, 700.A2, 700.A81, 705.30, 705.A36, 705.A38, 706.03, 706.A17, 725.A2, 730.A1, 810.27, 810.A20, 945.09, and 945.A27.

[8]SAS No. 138 has been integrated within sections 200.07, 320.02, 320.04, 320.10, 320.A12, 450.A23, 600.32, 600.A63, 700.35, 700.A14, 703.74, 703.114, and 703.A69.

[9]SAS No. 139 has been integrated within sections 800.01, 800.03, 800.07–.09, 800.14–.16, 800.18–.21, 800.23, 800.A2–.A6, 800.A11–.A12, 800.A18–.A22, 800.A25, 800.A28, 800.A34, 800.A39–.A41, 805.06, 805.15, 805.19, 805.21, 805.A1–.A4, 805.A8, 805.A11, 805.A13–.A15, 805.A17–.A18, 805.A20–.A21, 805.A23–.A26, 805.A28–.A29, 805.A32–.A34, 810.10, 810.15, 810.18–.20, 810.26, 810.A1, 810.A15–.A16, 810.A24.

[10]SAS No. 140 has been integrated within sections 703.127, 703.A148, 703.A154, 706.A19, 725.09, 725.A17, 730.07–.09, 730.A3, 910.A11, 920.29, 920.A29, 930.31, 930.38–.39, 930.A41, 930.A45–.A60, 930.A68–.A70, 930.A79–.A81, 935.04, 935.08, 935.10–.11, 935.16–.17, 935.23, 935.30–.31, 935.34–.35, 935.38, 935.A1–.A2, 935.A7, 935.A9–.A11, 935.A16–.A17, 935.A21, 935.A24–.A26, 935.A34–.A35, 935.A37–.A38, 935.A42–.A44, 940.64–.66, 940.69–.71, 940.75–.76, 940.80, 940.86, 940.A113, 940.A117, 940.A121–.A122, 940.A130, 940.A155, and 940.A158.

[11]SAS No. 141 has been integrated within sections 700.08, 701.05, 703.13, 705.04, 706.05, and 720.10. Additionally, SAS No. 141 revises the effective dates of the amendments listed in footnotes 4–10 of this section.

[12]SAS No. 142 has been integrated within sections 200.14, 200.19, 200.A26–.A27, 200.A76, 230.06, 315.A81, 330.06, 330.28, 330.A48, 330.A51–.A52, 330.A59, 330.A66, 330.A75, 330.A77, 501.01, 501.03–.04, 501.26, 501.A69–.A83, 530.02, 540.A28, and 540.A70.

[13]SAS No. 143 has been integrated within sections 200.A44, 230.A9, 230.A12, 230.A30, 240.A53, 260.A27–.A28, 260.A56–.A57, 501.01, 501.04, 501.06–.10, 501.A1–.A2, 501.A5–.A6, 501.A8, 501.A11–.A19, sections 580.16, 580.A13–.A14, 580.A35, 700.15*c*, 701.08*b*, the title before 701.A21, and section 703.40.

[14]SAS No. 144 has been integrated within sections 501.03, 501.27, 501.A29–.A31, 501.A71–.A72, 501.A79, 501.A81, 501.A84–.A88, 540.A107, 540.A127–.A128, 540.A154, 620.A10, 620.A20–.A22, 620.A30–.A31, 620.A35, 620.A40–.A41, 620.A43, and 620.A45.

[15]SAS No. 145 has been integrated within sections 200.08, 200.14, 200.A15, 200.A44–.A47, 200.A67, 200.A72–.A74, 210.A16, 230.A20, 240.07, 240.16, 240.20, 240.27, 240.32, 240.43, 240.A9, 240.A21–.A22, 240.A27, 240.A30, 240.A37, 240.A48–.A49, 240.A76–.A77, 250.A24, 260.A20–.A21, 265.01–.02, 265.07, 265.A1, 265.A4, 265.A11, 300.A26, 330.07–.08, 330.10, 330.13, 330.15–.18, 330.29, 330.A1, 330.A4, 330.A7, 330.A10–.A11, 330.A19, 330.A21, 330.A25, 330.A29, 330.A32–.A37, 330.A40–.A41, 330.A43, 330.A47, 330.A50–.A51, 330.A64, 330.A66, 330.A76, 330.A79–.A80, 402.01, 402.03, 402.07, 402.10–.12, 402.14, 402.17, 402.A14, 402.A19, 402.A24, 402.A31–.A32, 402.A35–.A36, 402.A41, 500.A67, 501.A24, 505.03, 530.A10, 540.04–.05, 540.07, 540.12, 540.15–.16, 540.18, 540.A8–.A10, 540.A19–.A21, 540.A24–.A25, 540.A29, 540.A35, 540.A39, 540.A44, 540.A50–.A54, 540.A64–.A66, 540.A68, 540.A70, 540.A79, 540.A85, 550.A7, 550.A10, 550.A21, 550.A30, 550.A38, 600.20, 600.A7, 600.A94, 600.A96, 610.05, 610.A3, 610.A12, and 610.A26, 620.A5, 701.A18, 703.18, 703.20, 703.A19–.A20, 703.A153, 720.A34, 720.A55, 805.A7, 930.11, 930.A7, and 930.A11, 940.26, 940.31, 940.57, 940.A6, 940.A22, 940.A26–.A27, 940.A34, and 940.A51–.A52.

[16]SAS No. 146 has also been integrated within sections 200.A20, 200.A32, 210.A1, 230.03, 230.A9, 230.A15, 230.A23–.A24, 230.A27–.A28, 260.A37, 260.A51, 300.02, 300.06, 300.08-.09, 300.11, 300.14, 300.A1–.A2, 300.A4, 300.A7–.A11, 300.A20–.A21, 300.A24–.A26, 300.A30, 500.A68, 600.05, 620.08, 620.A7, 620.A11–.A14, 620.A16, 620.A29, 700.A39, 700.A54, 701.A13, 701.A60, and 701.A62, 703.A119, 720.A27, 930.A60, 935.A35, 940.A117.
The amendments in SAS No. 146 are effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025, and can be viewed in the appendix of section 220 until the effective date, when they will be applied to these sections.

Section 220A has been added to retain currently effective content until SAS No. 146 becomes effective.

[17]SAS No. 147 has been integrated within section 210.11–.13, .15, and .A30–.A35.

[18]SAS No. 148 has been integrated within section 935.02, .12, .16, .18–.21, .24, .44, .A12, .A14–.A16, .A18–.A19, .A25, and .A45–.A46.

[19]SAS No. 149 has also been integrated within sections 220.A1, 220.A22–.A23, 220.A26–.A27, 220.A55–.A56, 220.A62, 220.A95, 220.A101, 230.A30, 260.A9, 260.A58, 300.01, 300.11, 300.A10, 300.A30, 315.A17, 315.A53, 315.A247, 320.09, 320.A15, 402.A19, 450.A25, 501.A5, 501.A23, 510.A8, 550.A11, 550.A31, 550.A42, 610.A20, 700.A39, 700.A81, 701.A13, 705.A11, 705.A38, 720.A2, 720.A36, 720.A39–.A40, 805.02, 920.21, 920.A19, 920.A27, 920.A70, 920.A93, 920.A93-14, 930.14, 930.A17, 930.A55, 930.A79, 935.15, 935.A12–.A13, 935.A47, 940.67, 940.78–.79, 940.81–.83, 940.A128–.A130, 940.A133–.A136, and 940.A156.
The amendments to sections 220 and 930 are effective on or after December 15, 2025.

All other amendments are effective on or after December 15, 2026, and can be viewed in appendix C of section 600 until the effective date, when they will be applied to these sections.

Section 600A has been added to retain currently effective content until SAS No. 149 becomes effective.

945	*Auditor Involvement With Exempt Offering Documents*	SAS No. 133	SAS No. 137

[20]To address practice issues, SAS No. 119, *Supplementary Information in Relation to the Financial Statements as a Whole*, was issued in February 2010 as a SAS resulting from the Clarification and Convergence Project of the ASB, and became effective for audits of financial statements for periods beginning on or after December 15, 2010. SAS No. 119 was previously codified as AU section 551 until December 2013, when all AU sections were deleted from AICPA *Professional Standards*, as described in the AU-C Foreword. SAS No. 122 redesignated AU section 551 as AU-C section 725 but did not supersede SAS No. 119. AU-C section 725 contains conforming changes necessary due to the issuance of SAS No. 122.

[21]To address practice issues, SAS No. 120, *Required Supplementary Information*, was issued in February 2010 as a SAS resulting from the Clarification and Convergence Project of the ASB, and became effective for audits of financial statements for periods beginning on or after December 15, 2010. SAS No. 120 was previously codified as AU section 558 until December 2013, when all AU sections were deleted from AICPA *Professional Standards*, as described in the AU-C

Foreword. SAS No. 122 redesignated AU section 558 as AU-C section 730 but did not supersede SAS No. 120. AU-C section 730 contains conforming changes necessary due to the issuance of SAS No. 122.

[22]To address practice issues, SAS No. 117, *Compliance Audits*, was issued in December 2009 as a SAS resulting from the Clarification and Convergence Project of the ASB, and became effective for compliance audits for fiscal periods ending on or after June 15, 2010. SAS No. 117 was previously codified as AU section 801 until December 2013, when all AU sections were deleted from AICPA *Professional Standards*, as described in the AU-C Foreword. SAS No. 122 redesignated AU section 801 as AU-C section 935 but did not supersede SAS No. 117. AU-C section 935 contains conforming changes necessary due to the issuance of SAS No. 122.

Part II — List of Statement on Auditing Standards Nos. 1–121 and List of Statement on Auditing Procedure Nos. 1–54

Statement on Auditing Procedure Nos. 1–54

No.	Date Issued	Title
1	Oct. 1939	*Extensions of Auditing Procedure*
2	Dec. 1939	*The Auditor's Opinion on the Basis of a Restricted Examination*
3	Feb. 1940	*Inventories and Receivables of Department Stores, Installment Houses, Chain Stores, and Other Retailers*
4	Mar. 1941	*Clients' Written Representations Regarding Inventories, Liabilities, and Other Matters*
5	Feb. 1941	*The Revised SEC Rule on "Accountants' Certificates"*
6	Mar. 1941	*The Revised SEC Rule on "Accountants' Certificates"*
7	Mar. 1941	*Contingent Liability Under Policies With Mutual Insurance Companies*
8	Sept. 1941	*Interim Financial Statements and the Auditor's Report Thereon*
9	Dec. 1941	*Accountants' Reports on Examinations of Securities and Similar Investments Under the Investment Company Act*
10	June 1942	*Auditing Under Wartime Conditions*
11	Sept. 1942	*The Auditor's Opinion on the Basis of a Restricted Examination (No. 2)*
12	Oct. 1942	*Amendment to Extensions of Auditing Procedure*
13	Dec. 1942	*The Auditor's Opinion on the Basis of a Restricted Examination (No. 3) Face-Amount Certificate Companies*
14	Dec. 1942	*Confirmation of Public Utility Accounts Receivable*
15	Dec. 1942	*Disclosure of the Effect of Wartime Uncertainties on Financial Statements*
16	Dec. 1942	*Case Studies on Inventories*
17	Dec. 1942	*Physical Inventories in Wartime*
18	Jan. 1943	*Confirmation of Receivables From the Government*
19	Nov. 1943	*Confirmation of Receivables (Positive and Negative Methods)*
20	Dec. 1943	*Termination of Fixed Price Supply Contracts*
21	July 1944	*Wartime Government Regulations*
22	May 1945	*References to the Independent Accountant in Securities Registrations*
23	Dec. 1949	*Clarification of Accountant's Report When Opinion is Omitted (Revised)*
24	Oct. 1948	*Revision in Short-Form Accountant's Report or Certificate*
25	Oct. 1954	*Events Subsequent to the Date of Financial Statements*
26	Apr. 1956	*Reporting on Use of "Other Procedures"*
27	July 1957	*Long-Form Reports*
28	Oct. 1957	*Special Reports*
29	Oct. 1958	*Scope of the Independent Auditor's Review of Internal Control*

No.	Date Issued	Title
30	Sept. 1960	*Responsibilities and Functions of the Independent Auditor in the Examination of Financial Statements*
31	Oct. 1961	*Consistency*
32	Sept. 1962	*Qualifications and Disclaimers*
33	Dec. 1963	*Auditing Standards and Procedures (a codification)*
34	Sept. 1965	*Long-Term Investments*
35	Nov. 1965	*Letters for Underwriters*
36	Aug. 1966	*Revision of "Extensions of Auditing Procedure" Relating to Inventories*
37	Sept. 1966	*Special Report: Public Warehouses Controls and Auditing Procedures for Goods Held*
38	Sept. 1967	*Unaudited Financial Statements*
39	Sept. 1967	*Working Papers*
40	Oct. 1968	*Reports Following a Pooling of Interests*
41	Oct. 1969	*Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*
42	Jan. 1970	*Reporting When a Certified Public Accountant Is Not Independent*
43	Sept. 1970	*Confirmation of Receivables and Observation of Inventories*
44	Apr. 1971	*Reports Following a Pooling of Interests*
45	July 1971	*Using the Work and Reports of Other Auditors*
46	July 1971	*Piecemeal Opinions*
47	Sept. 1971	*Subsequent Events*
48	Oct. 1971	*Letters for Underwriters*
49	Nov. 1971	*Reports on Internal Control*
50	Nov. 1971	*Reporting on the Statement of Changes in Financial Position*
51	July 1972	*Long-Term Investments*
52	Oct. 1972	*Reports on Internal Control Based on Criteria Established by Governmental Agencies*
53	Nov. 1972	*Reporting on Consistency and Accounting Changes*
54	Nov. 1972	*The Auditor's Study and Evaluation of Internal Control*

Statement on Auditing Standards Nos. 1–121

No.	Date Issued	Title
1	Nov. 1972	*Codification of Auditing Standards and Procedures*
2	Oct. 1974	*Reports on Audited Financial Statements*
3	Dec. 1974	*The Effects of EDP on the Auditor's Study and Evaluation of Internal Control*
4	Dec. 1974	*Quality Control Considerations for a Firm of Independent Auditors*
5	July 1975	*The Meaning of "Present Fairly in Conformity With Generally Accepted Accounting Principles" in the Independent Auditor's Report*

AU-C INTRODUCTION

Foreword

Authority of the SASs

SASs are issued by the ASB, the senior committee of the AICPA designated to issue pronouncements on auditing matters applicable to the preparation and issuance of audit reports for entities not subject to the oversight authority of the PCAOB (that is, those entities whose audits are not within the PCAOB's jurisdiction as defined by the Sarbanes-Oxley Act of 2002, as amended). The "Compliance With Standards Rule" (ET sec. 1.310.001) of the AICPA Code of Professional Conduct requires an AICPA member who performs an audit (the auditor) of the financial statements of a nonissuer[1] to comply with standards promulgated by the ASB. An auditor must comply with an unconditional requirement in all cases in which such requirement is relevant. An auditor also must comply with a presumptively mandatory requirement in all cases in which such a requirement is relevant. However, if, in rare circumstances, an auditor judges it necessary to depart from a relevant presumptively mandatory requirement, the auditor must document the justification for the departure and how the alternative audit procedures performed in the circumstances were sufficient to achieve the intent of that requirement.

Exhibits and interpretations to SASs are *interpretive publications*, as defined in section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*. Section 200 requires the auditor to consider applicable interpretive publications in planning and performing the audit. Interpretive publications are not auditing standards. Interpretive publications are recommendations on the application of the SASs in specific circumstances, including engagements for entities in specialized industries. An interpretive publication is issued under the authority of the ASB after all ASB members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with the SASs. Auditing interpretations of the generally accepted auditing standards are included in AU-C sections. AICPA Audit and Accounting Guides and Auditing Statements of Position are listed in AU-C appendix D, *AICPA Audit and Accounting Guides and Statements of Position*.

AUDITING STANDARDS BOARD

Jennifer Burns, Chief Auditor — AICPA

[1]See the definition of the term *nonissuer* in the AU-C Glossary.

AU-C Preface

Principles Underlying an Audit Conducted in Accordance With Generally Accepted Auditing Standards

This preface contains the principles underlying an audit conducted in accordance with generally accepted auditing standards (the principles). These principles are not requirements and do not carry any authority.

The Auditing Standards Board has developed the principles to provide a framework that is helpful in understanding and explaining an audit. The principles are organized to provide a structure for the codification of Statements on Auditing Standards. This structure addresses the purpose of an audit (purpose), personal responsibilities of the auditor (responsibilities), auditor actions in performing the audit (performance), and reporting (reporting).

Purpose of an Audit and Premise Upon Which an Audit Is Conducted

.01 The purpose of an audit is to provide financial statement users with an opinion by the auditor on whether the financial statements are presented fairly, in all material respects, in accordance with the applicable financial reporting framework. An auditor's opinion enhances the degree of confidence that intended users can place in the financial statements.

.02 An audit in accordance with generally accepted auditing standards is conducted on the premise that management and, when appropriate, those charged with governance, have responsibility

a. for the preparation and fair presentation of the financial statements in accordance with the applicable financial reporting framework;

b. for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; and

c. to provide the auditor with

    i. access to all information of which management and, when appropriate, those charged with governance are aware that is relevant to the preparation and fair presentation of the financial statements such as records, documentation, and other matters;

ii. additional information that the auditor may request from management and, when appropriate, those charged with governance for the purpose of the audit; and

iii. unrestricted access to persons within the entity from whom the auditor determines it necessary to obtain audit evidence.

Responsibilities

.03 Auditors are responsible for having appropriate competence and capabilities to perform the audit; complying with relevant ethical requirements; and maintaining professional skepticism and exercising professional judgment throughout the planning and performance of the audit.

Performance

.04 To express an opinion, the auditor obtains reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error.

.05 To obtain reasonable assurance, which is a high, but not absolute, level of assurance, the auditor

- plans the work and properly supervises any assistants.
- determines and applies appropriate materiality level or levels throughout the audit.
- identifies and assesses risks of material misstatement, whether due to fraud or error, based on an understanding of the entity and its environment, including the entity's internal control.
- obtains sufficient appropriate audit evidence about whether material misstatements exist, through designing and implementing appropriate responses to the assessed risks.

.06 The auditor is unable to obtain absolute assurance that the financial statements as a whole are free from material misstatement because of inherent limitations, which arise from

- the nature of financial reporting;
- the nature of audit procedures; and
- the need for the audit to be conducted within a reasonable period of time and so as to achieve a balance between benefit and cost.

Reporting

.07 Based on an evaluation of the audit evidence obtained, the auditor expresses, in the form of a written report, an opinion in accordance with the auditor's findings, or states that an opinion cannot be expressed. The opinion states whether the financial statements are presented fairly, in all material respects, in accordance with the applicable financial reporting framework.

AU-C Glossary

Glossary of Terms[1,2]

accounting and auditing practice.[3] A practice that performs engagements covered by QM section 10A, *A Firm's System of Quality Control*, which are audit, attestation, compilation, review, and any other services for which standards have been promulgated by the AICPA Auditing Standards Board (ASB) or the AICPA Accounting and Review Services Committee (ARSC) under the "General Standards Rule" (ET sec. 1.300.001) or the "Compliance With Standards Rule" (ET sec. 1.310.001) of the AICPA Code of Professional Conduct. Although standards for other engagements may be promulgated by other AICPA technical committees, engagements performed in accordance with those standards are not encompassed in the definition of an *accounting and auditing practice*.

accounting estimate. A monetary amount for which the measurement, in accordance with the requirements of the applicable financial reporting framework, is subject to estimation uncertainty.

accounting records. The records of initial accounting entries and supporting records, such as checks and records of electronic fund transfers; invoices; contracts; the general and subsidiary ledgers; journal entries and other adjustments to the financial statements that are not reflected in journal entries; and records, such as work sheets and spreadsheets, supporting cost allocations, computations, reconciliations, and disclosures.

accounts receivable (in the context of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*). The entity's claims against customers that have arisen from the sale of goods or services in the normal course of business, and a financial institution's loans.

acknowledgment letter. See **awareness letter**.

advisory accountant. See **reporting accountant**.

aggregation risk. The probability that the aggregate of uncorrected and undetected misstatements exceeds materiality for the financial statements as a whole.

---

[1]Unless otherwise indicated, this glossary lists the terms defined for purposes of generally accepted auditing standards (GAAS) in AU-C sections as designated by Statement on Auditing Standards No. 122, *Statements on Auditing Standards: Clarification and Recodification*, and also lists certain terms included by the Auditing Standards Board. Terms defined for purposes of a specific AU-C section or for purposes of adapting GAAS to a compliance audit (section 935, *Compliance Audits*) are denoted as such. Terms may appear in more than one AU-C section.

[2]This glossary also lists terms defined in clarified QM section 10A, *A Firm's System of Quality Control*, for purposes of the Statements on Quality Control Standards (SQCSs). Terms defined in AU-C sections and in QM section 10A are denoted as such.

[3]Term defined in paragraph .13 of QM section 10A for purposes of SQCSs.

analytical procedures. Evaluations of financial information through analysis of plausible relationships among both financial and nonfinancial data. Analytical procedures also encompass such investigation, as is necessary, of identified fluctuations or relationships that are inconsistent with other relevant information or that differ from expected values by a significant amount.

The use of analytical procedures as risk assessment procedures may be referred to as *analytical procedures used to plan the audit*. The auditor's use of analytical procedures as substantive procedures is referred to as *substantive analytical procedures*. Also see **risk assessment procedures, scanning,** and **substantive procedure**.

analytical procedures used to plan the audit. See **analytical procedures**.

annual report. A document, or combination of documents, typically prepared on an annual basis by management or those charged with governance in accordance with law, regulation, or custom, the purpose of which is to provide owners (or similar stakeholders) with information on the entity's operations and the entity's financial results and financial position as set out in the financial statements. An annual report contains, accompanies, or incorporates by reference the financial statements and the auditor's report thereon and usually includes information about the entity's developments, its future outlook and risks and uncertainties, a statement by the entity's governing body, and reports covering governance matters. Annual reports include annual reports of governments and organizations for charitable or philanthropic purposes that are available to the public.

applicable compliance requirements (in the context of adapting generally accepted auditing standards [GAAS] to a compliance audit). Compliance requirements that are subject to the compliance audit.

applicable financial reporting framework. The financial reporting framework adopted by management and, when appropriate, those charged with governance in the preparation and fair presentation of the financial statements that is acceptable in view of the nature of the entity and the objective of the financial statements, or that is required by law or regulation. The term also means the financial reporting framework that applies to the group financial statements. Also see **financial reporting framework**.

applied criteria (in the context of section 810, *Engagements to Report on Summary Financial Statements*). The criteria applied by management in the preparation of the summary financial statements.

appropriateness (of audit evidence). The measure of the quality of audit evidence that is, its relevance and reliability in providing support for the conclusions on which the auditor's opinion is based. Also see **audit evidence**.

arm's length transaction. A transaction conducted on such terms and conditions between a willing buyer and a willing seller who are unrelated and are acting independently of each other and pursuing their own best interests.

assertions. Representations, explicit or otherwise, with respect to the recognition, measurement, presentation, and disclosure of information in the financial statements, which are inherent in management, representing that the financial statements are prepared in accordance with the applicable financial reporting framework. Assertions are used by the auditor to consider the different types of potential misstatements that may occur when identifying, assessing, and responding to the risks of material misstatement.

audit documentation. The record of audit procedures performed, audit evidence obtained, and conclusions the auditor reached (terms such as *working papers* or *workpapers* are also sometimes used). Also see **engagement documentation**.

audit evidence. Information used by the auditor in arriving at the conclusions on which the auditor's opinion is based. Audit evidence is information to which audit procedures have been applied and consists of information that corroborates or contradicts assertions in the financial statements.

audit file. One or more folders or other storage media, in physical or electronic form, containing the records that constitute the audit documentation for a specific engagement.

audit findings (in the context of adapting GAAS to a compliance audit). The matters that are required to be reported by the auditor in accordance with the governmental audit requirement.

audit risk. The risk that the auditor expresses an inappropriate audit opinion when the financial statements are materially misstated. Audit risk is a function of the risks of material misstatement and detection risk.

Audit risk does not include the risk that the auditor might express an opinion that the financial statements are materially misstated when they are not. This risk is ordinarily insignificant. Further, *audit risk* is a technical term related to the process of auditing; it does not refer to the auditor's business risks, such as loss from litigation, adverse publicity, or other events arising in connection with the audit of financial statements. Also see **detection risk** and **risk of material misstatement**.

audit risk of noncompliance (in the context of adapting GAAS to a compliance audit). The risk that the auditor expresses an inappropriate audit opinion on the entity's compliance when material noncompliance exists. Audit risk of noncompliance is a function of the risks of material noncompliance and detection risk of noncompliance. Also see **detection risk of noncompliance** and **risk of material noncompliance**.

audit sampling (sampling). The selection and evaluation of less than 100 percent of the population of audit relevance such that the auditor expects the items selected (the sample) to be representative of the population and, thus, likely to provide a reasonable basis for conclusions about the population. In this context, *representative* means that evaluation of the sample will result in conclusions that, subject to the limitations of sampling risk, are similar to those that would be drawn if the same procedures were applied to the entire population.

audited financial statements. In the context of section 560, *Subsequent Events and Subsequently Discovered Facts*, reference to *audited financial statements* means the financial statements, together with the auditor's report thereon. In the context of section

810, the term *audited financial statements* refers to those financial statements audited by the auditor in accordance with GAAS and from which the summary financial statements are derived. Also see **financial statements**.

audit of internal control over financial reporting. An audit of the design and operating effectiveness of an entity's internal control over financial reporting (ICFR).

auditor. The term used to refer to the person or persons conducting the audit, usually the engagement partner or other members of the engagement team, or, as applicable, the firm. When an AU-C section expressly intends that a requirement or responsibility be fulfilled by the engagement partner, the term *engagement partner* rather than *auditor* is used. *Engagement partner* and *firm* are to be read as referring to their governmental equivalents when relevant. Also see **component auditor, engagement partner, experienced auditor, firm, predecessor auditor, service auditor,** and **user auditor**.

auditor's consent (in the context of section 925, *Filings With the U.S. Securities and Exchange Commission Under the Securities Act of 1933*). A statement signed and dated by the auditor that indicates that the auditor consents to the use of the auditor's report, and other references to the auditor, in a registration statement filed under the Securities Act of 1933 (the 1933 Act).

auditor's external specialist. See **auditor's specialist**.

auditor's inability to obtain sufficient appropriate audit evidence. See **limitation on the scope of an audit**.

auditor's internal specialist. See **auditor's specialist**.

auditor's point estimate or **auditor's range.** An amount, or range of amounts, respectively, developed by the auditor in evaluating management's point estimate.

auditor's specialist. An individual or organization possessing expertise in a field other than accounting or auditing, whose work in that field is used by the auditor to assist the auditor in obtaining sufficient appropriate audit evidence. An auditor's specialist may be either an auditor's internal specialist (who is a partner or staff, including temporary staff, of the auditor's firm or a network firm) or an auditor's external specialist. *Partner* and *firm* should be read as referring to their governmental equivalents when relevant.

In the context of section 620, *Using the Work of an Auditor's Specialist*, an individual with expertise in applying methods of accounting for deferred income tax is not a specialist because this constitutes accounting expertise; a specialist in taxation law is a specialist because this constitutes legal expertise. Also see **engagement team** and **management's specialist**.

awareness letter (in the context of section 925). A letter signed and dated by the auditor to acknowledge the auditor's awareness that the auditor's review report on unaudited interim financial information is being used in a registration statement filed under the 1933 Act. This letter is not considered to be part of the registration statement and is also commonly referred to as an *acknowledgment letter*.

basic financial statements (in the context of section 730, *Required Supplementary Information*). Financial statements presented in accordance with an applicable financial reporting framework as established by a designated accounting standards setter, excluding required supplementary information. Also see **financial statements**.

business risk. A risk resulting from significant conditions, events, circumstances, actions, or inactions that could adversely affect an entity's ability to achieve its objectives and execute its strategies, or from the setting of inappropriate objectives and strategies.

by-product report. An auditor's written communication that is based solely on matters identified by the auditor during the course of the audit engagement when identification of such matters is not the primary objective of the audit engagement.

capsule financial information (in the context of section 920, *Letters for Underwriters and Certain Other Requesting Parties*). Unaudited summarized interim financial information for periods subsequent to the periods covered by the audited financial statements or unaudited condensed interim financial information included in the securities offering. Capsule financial information may be presented in narrative or tabular form and is often provided for the most recent interim period and for the corresponding period of the prior year.

carve-out method. A method of reporting that excludes from the service auditor's report, when a service organization uses a subservice organization, the subservice organization's relevant control objectives and related controls in the service organization's description of its system and in the scope of the service auditor's engagement. Also see **inclusive method**.

cash basis. A basis of accounting that the entity uses to record cash receipts and disbursements and modifications of the cash basis having substantial support (for example, recording depreciation on fixed assets).

The cash basis of accounting is commonly referred to as an *other comprehensive basis of accounting*. In the context of section 800, *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks*, the cash basis of accounting is not a regulatory basis of accounting. Also see **other comprehensive bases of accounting** and **special purpose framework**.

change period (in the context of section 920). The period ending on the cut-off date and ordinarily beginning, for balance sheet items, immediately after the date of the latest balance sheet in the securities offering and, for income statement items, immediately after the latest period for which such items are presented in the securities offering.

closing date (in the context of section 920). The date on which the issuer of the securities or selling security holder delivers the securities to the underwriter in exchange for the proceeds of the offering.

comfort letter (in the context of section 920). A letter issued by an auditor in accordance with section 920 to requesting parties in connection with an entity's financial statements included in a securities offering.

comparative financial statements. A complete set of financial statements for one or more prior periods included for comparison with the financial statements of the current period. Also see **financial statements**.

comparative information. Prior period information presented for purposes of comparison with current period amounts or disclosures that is not in the form of a complete set of financial statements. Comparative information includes prior period information presented as condensed financial statements or summarized financial information. Also see **condensed financial statements** and **summary financial statements**.

comparison date and **comparison period (in the context of section 920).** The date as of which, and period for which, data at the cut-off date and data for the change period are to be compared.

competencies and capabilities.[4] The knowledge, skills, and abilities that qualify personnel to perform an engagement covered by QM section 10A. Competencies and capabilities are not measured by periods of time because such a quantitative measurement may not accurately reflect the kinds of experiences gained by personnel in any given time period. Accordingly, for purposes of QM section 10A, a measure of overall competency is qualitative rather than quantitative.

complementary user entity controls. Controls that management of the service organization assumes, in the design of its service, will be implemented by user entities, and which, if necessary to achieve the control objectives stated in management's description of the service organization's system, are identified as such in that description.

completion of the engagement quality control review. The completion by the engagement quality control reviewer of the requirements in section 220A, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*.[5] Also see **engagement quality control review**.

compliance audit (in the context of adapting GAAS to a compliance audit). A program-specific audit or an organization-wide audit of an entity's compliance with applicable compliance requirements.

compliance requirements (in the context of adapting GAAS to a compliance audit). Laws, regulations, rules, and provisions of contracts or grant agreements applicable to government programs with which the entity is required to comply.

component. An entity, business unit, function, or business activity, or some combination thereof, determined by the group auditor for purposes of planning and performing audit procedures in a group audit.

In the context of section 600A, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors)*, an investment accounted for

[4]Term defined in paragraph .A18 of QM section 10A for purposes of SQCSs.

[5]Paragraph .22 and, when applicable, compliance with paragraph .23 of section 220A, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*.

under the equity method constitutes a component. Investments accounted for under the cost method may be analogous to a component when the work and reports of other auditors constitute a major element of evidence for such investments. Also see **group** and **significant component**.

component auditor. An auditor who performs audit work related to a component for purposes of the group audit. A component auditor is a part of the engagement team6 for a group audit.

In the context of section 600A, auditors who do not meet the definition of a member of the group engagement team are considered to be component auditors. However, an auditor who performs work on a component when the group engagement team will not use that work to provide audit evidence for the group audit is not considered a component auditor. Also see **auditor**.

component management. Management responsible for a component. Also see **management**.

component materiality. The materiality for a component determined by the group engagement team for the purposes of the group audit.

component performance materiality. An amount set by the group auditor to reduce aggregation risk to an appropriately low level for purposes of planning and performing audit procedures in relation to a component.

components of internal control. The following five components, which provide a useful framework for auditors when considering how different aspects of an entity's internal control may affect the audit:

a. The control environment

b. The entity's risk assessment process

c. The information system, including the related business processes relevant to financial reporting and communication

d. Control activities

e. Monitoring of controls

Also see **internal control**.

condensed financial statements. Historical financial information that is presented in less detail than a complete set of financial statements, in accordance with an appropriate financial reporting framework. Condensed financial statements may be separately presented as unaudited financial information or may be presented as comparative information. Also see **comparative information** and **financial statements**.

consolidation process. Reference to the *consolidation process* includes the following:

a. The recognition, measurement, presentation, and disclosure of the financial information of the components in the group financial statements by way of inclusion, consolidation, proportionate consolidation, or the equity or cost methods of accounting

b. The aggregation in combined financial statements of the financial information of components that are under common control

continuing accountant (in the context of section 915, *Reports on Application of Requirements of an Applicable Financial Reporting Framework*). An accountant who has been engaged to report on the financial statements of a specific entity or entities of which the specific entity is a component.

contractual basis. A basis of accounting that the entity uses to comply with an agreement between the entity and one or more third parties other than the auditor. Also see **special purpose framework**.

control objective. The aim or purpose of specified controls. Control objectives address the risks that the controls are intended to mitigate. In the context of ICFR, a control objective generally relates to a relevant assertion for a significant class of transactions, account balance, or disclosure and addresses the risk that the controls in a specific area will not provide reasonable assurance that a misstatement or omission in that relevant assertion is prevented, or detected and corrected, on a timely basis.

control risk. The risk that a misstatement that could occur in an assertion about a class of transaction, account balance, or disclosure and that could be material, either individually or when aggregated with other misstatements, will not be prevented, or detected and corrected, on a timely basis by the entity's internal control. Also see **risk of material misstatement**.

control risk of noncompliance (in the context of adapting GAAS to a compliance audit). The risk that noncompliance with a compliance requirement that could occur and that could be material, either individually or when aggregated with other instances of noncompliance, will not be prevented, or detected and corrected, on a timely basis by the entity's internal control over compliance. Also see **risk of material noncompliance**.

controls. Policies or procedures that an entity establishes to achieve the control objectives of management or those charged with governance. In this context

i. policies are statements of what should, or should not, be done within the entity to effect control. Such statements may be documented, explicitly stated in communications, or implied through actions and decisions.

ii. procedures are actions to implement policies.

criteria. The benchmarks used to measure or evaluate the subject matter.

critical accounting estimates. Key assumptions and other sources of estimation uncertainty that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities. Also may be referred to as *key sources of estimation uncertainty*. Also see **accounting estimate**.

current period. The most recent period upon which the auditor is reporting.

cut-off date (in the context of section 920). The date through which certain procedures described in the comfort letter are to relate.

date of approval of the financial statements. In some circumstances, final approval of the financial statements by governmental legislative bodies (or subsets of such legislative bodies) is required before the financial statements are issued. In these circumstances, final approval by such legislative bodies (or subsets of such legislative bodies) is not necessary for the auditor to conclude that sufficient appropriate audit evidence has been obtained. The date of approval of the financial statements is the earlier date on which those with the recognized authority determine that all the statements that the financial statements comprise, including the related notes, have been prepared and that those with the recognized authority have asserted that they have taken responsibility for them. Also see **financial statements**.

date of the auditor's report. The date that the auditor dates the report on the financial statements, in accordance with section 700, *Forming an Opinion and Reporting on Financial Statements*, or 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*.

date of the financial statements. The date of the end of the latest period covered by the financial statements. Also see **financial statements**.

deficiency in design. A deficiency in design exists when a control necessary to meet the control objective is missing or an existing control is not properly designed so that, even if the control operates as designed, the control objective would not be met. Also see **deficiency in internal control** and **deficiency in internal control over compliance**.

deficiency in internal control. A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A deficiency in *design* exists when (*a*) a control necessary to meet the control objective is missing, or (*b*) an existing control is not properly designed so that, even if the control operates as designed, the control objective would not be met. A deficiency in *operation* exists when a properly designed control does not operate as designed or when the person performing the control does not possess the necessary authority or competence to perform the control effectively. Also see **internal control**.

deficiency in internal control over compliance (in the context of adapting GAAS to a compliance audit). A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance on a timely basis. A deficiency in *design* exists when (*a*) a control necessary to meet the control objective is missing, or (*b*) an existing control is not properly designed so that, even if the control operates as designed, the control objective would not be met. A deficiency in *operation* exists when a properly designed control does not operate as designed or the person performing the control does not possess the necessary authority or competence to perform the control effectively. Also see **material weakness in internal control over compliance** and **significant deficiency in internal control over compliance**.

deficiency in operation. A deficiency in operation exists when a properly designed control does not operate as designed or the person performing the control does not possess the necessary authority or competence to perform the control effectively. Also see **deficiency in internal control** and **deficiency in internal control over compliance**.

degree of interaction. The extent to which a user entity is able to and elects to implement effective controls over the processing performed by the service organization.

designated accounting standards setter. A body designated by the Council of the AICPA to promulgate generally accepted accounting principles (GAAP) pursuant to the "Compliance With Standards Rule" and the "Accounting Principles Rule" (ET sec. 1.320.001) of the AICPA Code of Professional Conduct.

detection risk. The risk that the procedures performed by the auditor to reduce audit risk to an acceptably low level will not detect a misstatement that exists and that could be material, either individually or when aggregated with other misstatements. Also see **audit risk** and **risk of material misstatement**.

detection risk of noncompliance (in the context of adapting GAAS to a compliance audit). The risk that the procedures performed by the auditor to reduce audit risk of noncompliance to an acceptably low level will not detect noncompliance that exists and that could be material, either individually or when aggregated with other instances of noncompliance. Also see **audit risk of noncompliance** and **risk of material noncompliance**.

detective control. A control that has the objective of detecting and correcting errors or fraud that have already occurred that could result in a misstatement of the financial statements.

direct assistance. The use of internal auditors to perform audit procedures under the direction, supervision, and review of the external auditor.

disagreements with management (in the context of section 260, *The Auditor's Communication With Those Charged With Governance*). Disagreements that do not include differences of opinion based on incomplete facts or preliminary information that are later resolved.

documentation. See **audit documentation**.

documentation completion date. The date, no later than 60 days following the report release date, on which the auditor has assembled for retention a complete and final set of documentation in an audit file.

dual purpose test. Performing a test of controls and a test of details on the same transaction. Also see **substantive procedure** and **test of controls**.

effective date (in the context of section 920). The date on which the securities offering becomes effective.

effective date of the registration statement (in the context of section 925). The date on which the registration statement filed under the 1933 Act becomes effective for purposes of evaluating the auditor's liability under Section 11 of the 1933 Act.

element of a financial statement or **element (in the context of section 805, *Special Considerations—Audits of Single Financial Statements and Specific Elements, Accounts, or Items of a Financial Statement*).** Reference to this term means an element, account, or item of a financial statement.

emphasis-of-matter paragraph. A paragraph included in the auditor's report that is required by GAAS, or is included at the auditor's discretion, and that refers to a matter appropriately presented or disclosed in the financial statements that, in the auditor's professional judgment, is of such importance that it is fundamental to users' understanding of the financial statements. Also see **other-matter paragraph**.

engagement documentation.[6] The record of the work performed, results obtained, and conclusions that the practitioner reached (also known as *working papers* or *workpapers*). Also see **audit documentation**.

engagement partner.[7] The partner or other individual appointed by the firm who is responsible for the audit engagement and its performance, and for the auditor's report that is issued on behalf of the firm, and who, when required, has the appropriate authority from a professional, legal, or regulatory body.

engagement quality review. An objective evaluation of the significant judgments made by the engagement team and the conclusions reached thereon, performed by the engagement quality reviewer and completed before the engagement report is released.

engagement quality reviewer. A partner, other individual in the firm, or an external individual appointed by the firm to perform the engagement quality review.

engagement team. All partners and staff performing the audit engagement and any other individuals who perform audit procedures on the engagement, excluding an auditor's external specialist[8] and internal auditors who provide direct assistance on an engagement.[9]

entity (in the context of section 920). The party whose financial statements are the subject of the engagement.

---

[6]See footnote 3.

[7]*Engagement partner*, *partner*, and *firm* refer to their governmental equivalents when relevant.

[8]See **auditor's specialist** (in the context of section 620).

[9]Section 610, *Using the Work of Internal Auditors*, establishes limits on the use of direct assistance.

entity's risk assessment process. The entity's process for

a. identifying **business risks relevant to financial reporting objectives,**
b. estimating **the significance of the risks,**
c. assessing **the likelihood of their occurrence, and**
d. deciding **about actions to address those risks.**

estimation uncertainty. Susceptibility to an inherent lack of precision in measurement.

evidence. See **audit evidence**.

exception. A response that indicates a difference between information requested to be confirmed, or contained in the entity's records, and information provided by the confirming party.

exempt offering document. The disclosure document that provides financial and nonfinancial information related to the entity issuing the exempt offering (or in the case of a franchise offering, the franchisor) and the offering itself.

experienced auditor. An individual (whether internal or external to the firm) who has practical audit experience, and a reasonable understanding of

a. audit processes;
b. GAAS and applicable legal and regulatory requirements;
c. the business environment in which the entity operates; and
d. auditing and financial reporting issues relevant to the entity's industry.

Also see **auditor** and **practical audit experience**.

expertise. Skills, knowledge, and experience in a particular field.

extent of an audit procedure. Refers to the quantity of audit procedures to be performed (for example, a sample size or the number of observations of a control activity). Also see **nature of an audit procedure** and **timing of an audit procedure**.

external confirmation. Audit evidence obtained as a direct written response to the auditor from a third party (the confirming party), either in paper form or by electronic or other medium (for example, through the auditor's direct access to information held by a third party).

external information source. An external individual or organization that provides information that is used by the entity in preparing the **financial statements** or that has been obtained by the auditor as **audit evidence**, when such information is suitable for use by a broad range of users. When information has been provided by an individual or organization acting in the capacity of **management's specialist**, **service organization**, or **auditor's specialist**, the individual or organization is not considered an external information source with respect to that particular information.

factual misstatements. Misstatements about which there is no doubt. Also see **judgmental misstatements, misstatement,** and **projected misstatements**.

fair presentation framework. See **financial reporting framework**.

financial reporting framework. A set of criteria used to determine measurement, recognition, presentation, and disclosure of all material items appearing in the financial statements; for example, U.S. GAAP, International Financial Reporting Standards promulgated by the International Accounting Standards Board, or a special purpose framework.

The term *fair presentation framework* refers to a financial reporting framework that requires compliance with the requirements of the framework and

a. acknowledges explicitly or implicitly that, to achieve fair presentation of the financial statements, it may be necessary for management to provide disclosures beyond those specifically required by the framework; or

b. acknowledges explicitly that it may be necessary for management to depart from a requirement of the framework to achieve fair presentation of the financial statements. Such departures are expected to be necessary only in rare circumstances.

A financial reporting framework that requires compliance with the requirements of the framework, but does not contain the acknowledgments in *a* or *b* is not a fair presentation framework. Also see **applicable financial reporting framework, general purpose framework,** and **special purpose framework**.

financial statements. A structured representation of historical financial information, including disclosures, intended to communicate an entity's economic resources and obligations at a point in time or the changes therein for a period of time in accordance with a financial reporting framework. The term *financial statements* ordinarily refers to a complete set of financial statements as determined by the requirements of the applicable financial reporting framework, but can also refer to a single financial statement. Disclosures comprise explanatory or descriptive information, set out as required, expressly permitted or otherwise allowed by the applicable financial reporting framework, on the face of a financial statement or in the notes, or incorporated therein by reference when expressly permitted.

In the context of section 700, reference to *financial statements* means a complete set of general purpose financial statements, including the related notes. In the context of section 800, reference to *financial statements* means a complete set of special purpose financial statements, including the related notes. Also see **audited financial statements, basic financial statements, comparative financial statements, condensed financial statements, date of approval of the financial statements, date of the financial statements, general purpose financial statements, group financial statements, historical financial information, special purpose financial statements,** and **summary financial statements**.

firm. A form of organization permitted by law or regulation whose characteristics conform to resolutions of the Council of the AICPA and that is engaged in public practice.

fraud. An intentional act by one or more individuals among management, those charged with governance, employees, or third parties, involving the use of deception that results in a misstatement in financial statements that are the subject of an audit.

Although fraud is a broad legal concept, the auditor is primarily concerned with fraud that causes a material misstatement in the financial statements.

fraud risk factors. Events or conditions that indicate an incentive or pressure to perpetrate fraud, provide an opportunity to commit fraud, or indicate attitudes or rationalizations to justify a fraudulent action.

GAGAS. See ***Government Auditing Standards***.

general information technology (IT) controls. Controls over the entity's IT processes that support the continued proper operation of the IT environment, including the continued effective functioning of information-processing controls and the integrity of information in the entity's information system. Also see **IT environment**.

general purpose financial statements. Financial statements prepared in accordance with a general purpose framework.

For audits of governmental entities, the term *general purpose financial statements*, in the context of section 700, would be considered or referred to as basic financial statements using the terms in the government's applicable financial reporting framework. Also see **financial statements**.

general purpose framework. A financial reporting framework designed to meet the common financial information needs of a wide range of users. Also see **financial reporting framework**.

generally accepted accounting principles (GAAP). Reference to *generally accepted accounting principles* in GAAS means generally accepted accounting principles promulgated by bodies designated by the Council of the AICPA pursuant to the "Compliance With Standards Rule" and the "Accounting Principles Rule" of the AICPA Code of Professional Conduct.

generally accepted auditing standards (GAAS). Statements on Auditing Standards issued by the ASB, the senior committee of the AICPA designated to issue pronouncements on auditing matter for nonissuers. The "Compliance With Standards Rule" of the AICPA Code of Professional Conduct requires an AICPA member who performs an audit of a nonissuer to comply with standards promulgated by the ASB. Also see **nonissuer.**

generally accepted government auditing standards. See ***Government Auditing Standards***.

***Government Auditing Standards* .** Standards and guidance issued by the Comptroller General of the United States, U.S. Government Accountability Office for financial audits, attestation engagements, and performance audits. *Government Auditing Standards* also is known as generally accepted government auditing standards (GAGAS) or the Yellow Book.

government program (in the context of adapting GAAS to a compliance audit). The means by which governmental entities achieve their objectives. For example, one of the objectives of the U.S. Department of Agriculture is to provide nutrition to individuals in need. Examples of government programs designed to achieve that objective are the Supplemental Nutrition Assistance Program and the National School Lunch Program. Government programs that are relevant to section 935, *Compliance Audits*, are those in which a grantor or pass-through entity provides an award to another entity, usually in the form of a grant, contract, or other agreement. Not all government programs provide cash assistance; sometimes noncash assistance is provided (for example, a loan guarantee, commodities, or property).

governmental audit organization. A governmental entity, agency, or other department that is required or permitted by law or other authorization to audit other governmental entities, agencies, or departments.

governmental audit requirement (in the context of adapting GAAS to a compliance audit). A government requirement established by law, regulation, rule, or provision of contracts or grant agreements requiring that an entity undergo an audit of its compliance with applicable compliance requirements related to one or more government programs that the entity administers.

grantor (in the context of adapting GAAS to a compliance audit). A government agency from which funding for the government program originates.

group. A reporting entity for which group financial statements are prepared. Also see **component** and **significant component**.

group audit. The audit of group financial statements. Also see **initial audit engagement, reaudit,** and **recurring audit**.

group auditor. The group engagement partner and members of the engagement team other than component auditors. The group auditor is responsible for the following:

i. Establishing the overall group audit strategy and group audit plan

ii. Directing and supervising component auditors and reviewing their work

iii. Evaluating the conclusions drawn from the audit evidence obtained as the basis for forming an opinion on the group financial statements

group audit opinion. The audit opinion on the group financial statements. Also see **modified opinion** and **unmodified opinion**.

group engagement partner. The engagement partner responsible for the group audit. Also see **engagement partner** and **partner**.

group engagement team. Partners, including the group engagement partner, and staff who establish the overall group audit strategy, communicate with component auditors, perform work on the consolidation process, and evaluate the conclusions drawn from the audit evidence as the basis for forming an opinion on the group financial statements. Also see **engagement team**.

group financial statements. Financial statements that include the financial information of more than one entity or business unit through a consolidation process.

For purposes of section 600, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors and Audits of Referred-to Auditors)*, a consolidation process includes one or more of the following:

i. Consolidation, proportionate consolidation, inclusion, or an equity method of accounting

ii. The presentation in combined financial statements of the financial information of entities or business units that are under common control or common management

iii. The aggregation of the financial information of entities or business units such as branches or divisions

Also see **financial statements**.

group management. Management responsible for the preparation of the group financial statements. Also see **management**.

group performance materiality. Performance materiality in relation to the group financial statements as a whole, as determined by the group auditor. Also see **performance materiality**.

group-wide controls. Controls designed, implemented, and maintained by group management over group financial reporting.

historical financial information. Information expressed in financial terms regarding a particular entity, derived primarily from that entity's accounting system, about economic events occurring in past time periods or about economic conditions or circumstances at points in time in the past. Also see **financial statements** and **interim financial information**.

hypothetical transaction (in the context of section 915). A transaction or financial reporting issue that does not involve facts or circumstances of a specific entity.

included (in the context of section 920). References to information that is included in a document are to be read to also encompass information that is incorporated by reference in that document.

included or **the inclusion of (in the context of section 925).** References to *included* or *the inclusion of* in a registration statement means included or incorporated by reference in a registration statement filed under the 1933 Act.

inclusive method. A method of reporting that includes in the service auditor's report, when a service organization uses a subservice organization, the subservice organization's relevant control objectives and related controls in the service organization's description of its system and in the scope of the service auditor's engagement. Also see **carve-out method**.

inconsistency. Other information that conflicts with information contained in the audited financial statements. A material inconsistency may raise doubt about the audit conclusions drawn from audit evidence previously obtained and, possibly, about the basis for the auditor's opinion on the financial statements.

incorporated by reference. See **included** and **included or the inclusion of**.

independence.[10] Consists of two elements, defined as follows:

a. Independence of mind is the state of mind that permits a member to perform an attest service without being affected by influences that compromise professional judgment, thereby allowing an individual to act with integrity and exercise objectivity and professional skepticism.

b. Independence in appearance is the avoidance of circumstances that would cause a reasonable and informed third party who has knowledge of all relevant information, including the safeguards applied, to reasonably conclude that the integrity, objectivity, or professional skepticism of a firm or member of the attest engagement team is compromised.

This definition should not be interpreted as an absolute. For example, the phrase "without being affected by influences that compromise professional judgment" is not intended to convey that the member must be free of any and all influences that might compromise objective judgment. Instead, the member should determine whether such influences, if present, create a threat that is not at an acceptable level that a member would not act with integrity and exercise objectivity and professional skepticism in the conduct of a particular engagement or would be perceived as not being able to do so by a reasonable and in-formed third party with knowledge of all relevant information.

information-processing controls. Controls relating to the processing of information in IT applications or manual information processes in the entity's information system that directly address risks to the integrity of information.

inherent risk. The susceptibility of an assertion about a class of transaction, account balance, or disclosure to a misstatement that could be material, either individually or when aggregated with other misstatements, before consideration of any related controls. Also see **risk of material misstatement**.

inherent risk factors. Characteristics of events or conditions that affect the susceptibility to misstatement, whether due to fraud or error, of an assertion about a class of transactions,

[10]Term defined in ET section 0.400, *Definitions*.

account balance, or disclosure, before consideration of controls. Such factors may be qualitative or quantitative and include complexity, subjectivity, change, uncertainty, or susceptibility to misstatement due to management bias or other fraud risk factors insofar as they affect inherent risk.

Depending on the degree to which the inherent risk factors affect the susceptibility of an assertion to misstatement, the level of inherent risk varies on a scale that is referred to as the *spectrum of inherent risk*.

inherent risk of noncompliance (in the context of adapting GAAS to a compliance audit). The susceptibility of a compliance requirement to noncompliance that could be material, either individually or when aggregated with other instances of noncompliance, before consideration of any related controls over compliance. Also see **risk of material noncompliance**.

initial audit engagement. An engagement in which either (*a*) the financial statements for the prior period were not audited, or (*b*) the financial statements for the prior period were audited by a predecessor auditor. Also see **group audit, reaudit,** and **recurring audit**.

inputs. Refers, in some cases, to assumptions that may be made or identified by a specialist to assist management in making accounting estimates. Inputs may also refer to the underlying data to which specific assumptions are applied. Also see **observable inputs** (or equivalent) and **unobservable inputs** (or equivalent).

inspection. Inspection is an evaluation of the adequacy of aspects of the firm's quality management policies and procedures, its personnel's understanding of those policies and procedures, and the extent of the firm's compliance with them.

interim financial information (in the context of section 930, *Interim Financial Information*). Financial information prepared and presented in accordance with an applicable financial reporting framework that comprises either a complete or condensed set of financial statements covering a period or periods less than one full year or covering a 12-month period ending on a date other than the entity's fiscal year end. Also see **historical financial information**.

internal audit function. A function of an entity that performs assurance and consulting activities designed to evaluate and improve the effectiveness of the entity's governance, risk management, and internal control processes.

internal control. A process effected by those charged with governance, management, and other personnel that is designed to provide reasonable assurance about the achievement of the entity's objectives with regard to the reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations. Also see **components of internal control** and **deficiency in internal control**.

internal control over financial reporting. A process effected by those charged with governance, management, and other personnel, designed to provide reasonable assurance regarding the preparation of reliable financial statements in accordance with the applicable financial reporting framework and includes those policies and procedures that

i. pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the entity;

ii. provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with the applicable financial reporting framework, and that receipts and expenditures of the entity are being made only in accordance with authorizations of management and those charged with governance; and

iii. provide reasonable assurance regarding prevention, or timely detection and correction of unauthorized acquisition, use, or disposition of the entity's assets that could have a material effect on the financial statements.

ICFR has inherent limitations. ICFR is a process that involves human diligence and compliance and is subject to lapses in judgment and breakdowns resulting from human failures. ICFR also can be circumvented by collusion or improper management override. Because of such limitations, there is a risk that material misstatements will not be prevented, or detected and corrected, on a timely basis by ICFR.

interpretive publications. Auditing interpretations of GAAS, auditing guidance included in AICPA Audit and Accounting Guides, exhibits to GAAS, and AICPA Auditing Statements of Position.

issuer. Section 3(a)(8) of the Securities Act of 1934 defines the term as follows:

> The term “issuer” means any person who issues or proposes to issue any security; except that with respect to certificates of deposit for securities, voting-trust certificates, or collateral-trust certificates, or with respect to certificates of interest or shares in an unincorporated investment trust not having a board of directors or of the fixed, restricted management, or unit type, the term “issuer” means the person or persons performing the acts and assuming the duties of depositor or manager pursuant to the provisions of the trust or other agreement or instrument under which such securities are issued; and except that with respect to equipment-trust certificates or like securities, the term “issuer” means the person by whom the equipment or property is, or is to be, used.

Also see **nonissuer**.

IT environment. The IT applications and supporting IT infrastructure, as well as the IT processes and personnel involved in those processes, that an entity uses to support business operations and achieve business strategies. For the purposes of this definition

i. an *IT application* is a program or a set of programs that is used in the initiation, processing, recording, and reporting of transactions or information. IT applications include data warehouses and report writers.

ii. the IT infrastructure comprises the network, operating systems, and databases and their related hardware and software.

iii. the IT processes are the entity's processes to manage access to the IT environment, manage program changes or changes to the IT environment, and manage IT operations.

judgmental misstatements. Differences arising from the judgments of management concerning accounting estimates that the auditor considers unreasonable or the selection or application of accounting policies that the auditor considers inappropriate. Also see **factual misstatements, misstatement,** and **projected misstatements**.

key audit matters. Those matters that, in the auditor's professional judgment, were of most significance in the audit of the financial statements of the current period. Key audit matters are selected from matters communicated with those charged with governance.

key sources of estimation uncertainty. See **critical accounting estimates**.

known questioned costs (in the context of adapting GAAS to a compliance audit). Questioned costs specifically identified by the auditor. Known questioned costs are a subset of likely questioned costs. Also see **likely questioned costs**.

legal counsel (in the context of section 501, *Audit Evidence—Specific Considerations for Selected Items*). The entity's in-house legal counsel and external legal counsel.

likely questioned costs (in the context of adapting GAAS to a compliance audit). The auditor's best estimate of total questioned costs, not just the known questioned costs. Likely questioned costs are developed by extrapolating from audit evidence obtained, for example, by projecting known questioned costs identified in an audit sample to the entire population from which the sample was drawn. Also see **known questioned costs**.

limitation on the scope of an audit. The auditor's inability to obtain sufficient appropriate audit evidence, which may arise from the following:

a. Circumstances beyond the control of the entity

b. Circumstances relating to the nature or timing of the auditor's work

c. Limitations imposed by management

Also may be referred to as a *scope limitation*.

management. The person(s) with executive responsibility for the conduct of the entity's operations. For some entities, management includes some or all of those charged with governance; for example, executive members of a governance board or an owner-manager.

In the context of section 210A, *Terms of Engagement*, and section 580, *Written Representations*, references to *management* are to be read as "management and, when appropriate, those charged with governance" unless the context suggests otherwise. Also see **component management, group management,** and **those charged with governance**.

management bias. A lack of neutrality by management in the preparation of information.

management's assessment about ICFR. Management's conclusion about the effectiveness of the entity's ICFR, based on suitable and available criteria. Management's assessment is included in management's report on ICFR.

management's point estimate. The amount selected by management for recognition or disclosure in the financial statements as an accounting estimate.

management's specialist. An individual or organization possessing expertise in a field other than accounting or auditing, whose work in that field is used by the entity to assist the entity in preparing the financial statements. Also see **auditor's specialist**.

material noncompliance (in the context of adapting GAAS to a compliance audit). In the absence of a definition of *material noncompliance* in the governmental audit requirement, a failure to follow compliance requirements or a violation of prohibitions included in the applicable compliance requirements that results in noncompliance that is quantitatively or qualitatively material, either individually or when aggregated with other noncompliance, to the affected government program.

material weakness. A deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. A reasonable possibility exists when the likelihood of an event occurring is either reasonably possible or probably as defined as follows:

> **reasonably possible.** The chance of the future event or events occurring is more than remote but less than likely.
>
> **probable.** The future event or events are likely to occur.

material weakness in internal control over compliance (in the context of adapting GAAS to a compliance audit). A deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a compliance requirement will not be prevented, or detected and corrected, on a timely basis. In section 935, a reasonable possibility exists when the likelihood of an event occurring is either reasonably possible or probable as defined as follows:

> **reasonably possible.** The chance of the future event or events occurring is more than remote but less than likely.
>
> **probable.** The future event or events are likely to occur.

Also see **deficiency in internal control over compliance** and **significant deficiency in internal control over compliance**.

misstatement. A difference between the reported amount, classification, presentation, or disclosure of a financial statement item and the amount, classification, presentation, or disclosure that is required for the item to be presented fairly in accordance with the applicable financial reporting framework. Misstatements can arise from fraud or error.

Misstatements also include those adjustments of amounts, classifications, presentations, or disclosures that, in the auditor's professional judgment, are necessary for the financial statements to be presented fairly, in all material respects. Also see **factual misstatements, judgmental misstatements, projected misstatements,** and **uncorrected misstatements**.

misstatement of fact. Other information that is unrelated to matters appearing in the audited financial statements that is incorrectly stated or presented. A material misstatement of fact may undermine the credibility of the document containing audited financial statements.

misstatement of other information. A misstatement of the other information exists when the other information is incorrectly stated or otherwise misleading.

modified opinion. A qualified opinion, an adverse opinion, or a disclaimer of opinion. Also see **group audit opinion** and **unmodified opinion**.

monitoring.[11] A process comprising an ongoing consideration and evaluation of the firm's system of quality control, including inspection or a periodic review of engagement documentation, reports, and clients' financial statements for a selection of completed engagements, designed to provide the firm with reasonable assurance that its system of quality control is designed appropriately and operating effectively.

nature of an audit procedure. Refers to the purpose (test of controls or substantive procedure) and type (inspection, observation, inquiry, confirmation, recalculation, reperformance, or analytical procedure) of an audit procedure. Also see **extent of an audit procedure** and **timing of an audit procedure**.

negative assurance (in the context of section 920). A statement that, based on the procedures performed, nothing has come to the auditor's attention that caused the auditor to believe that specified matters do not meet specified criteria (for example, that nothing came to the auditor's attention that caused the auditor to believe that any material modifications should be made to the unaudited interim financial information for it to be in accordance with GAAP).

negative confirmation request. A request that the confirming party respond directly to the auditor only if the confirming party disagrees with the information provided in the request. Also see **positive confirmation request**.

network. As defined in "Definitions" (ET sec. 0.400) in the AICPA Code of Professional Conduct, an association of entities that includes one or more firms.

network firm. As defined in "Definitions" in the AICPA Code of Professional Conduct, a firm or other entity that belongs to a network. References to a *network firm* are to be read hereafter as "another firm or entity that belongs to the same network as the firm."

---

[11]Term also defined in paragraph .13 of QM section 10A for purposes of SQCSs. Refer to QM section 10A for specific language.

noncompliance (in the context of section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*). Acts of omission or commission by the entity, either intentional or unintentional, which are contrary to the prevailing laws or regulations. Such acts include transactions entered into by, or in the name of, the entity or on its behalf by those charged with governance, management, or employees. *Noncompliance* does not include personal misconduct (unrelated to the business activities of the entity) by those charged with governance, management, or employees of the entity.

nonissuer. Any entity not subject to the oversight authority of the PCAOB (that is, those entities whose audits are not within the PCAOB's jurisdiction as defined by the Sarbanes-Oxley Act of 2002, as amended). Also see **generally accepted auditing standards (GAAS)** and **issuer**.

nonresponse. A failure of the confirming party to respond, or fully respond, to a positive confirmation request or a confirmation request returned undelivered.

nonroutine transactions. Transactions that are unusual, either due to size or nature, and that, therefore, occur infrequently.

nonsampling risk. The risk that the auditor reaches an erroneous conclusion for any reason not related to sampling risk.

nonstatistical sampling. See **statistical sampling**.

notes to financial statements. See **financial statements**.

observable. In the context of a fair value accounting estimate, the term *observable* refers to data that is readily available, such as published interest rate data or exchange-traded prices of securities.

observable inputs (or equivalent)**.** With respect to fair value accounting estimates, assumptions or inputs that reflect what market participants would use in pricing an asset or a liability, developed based on market data obtained from sources independent of the reporting entity. Also see **inputs** and **unobservable inputs** (or equivalent).

omitted procedure. An auditing procedure that the auditor considered necessary in the circumstances existing at the time of the audit of the financial statements but which was not performed.

opening balances. Those account balances that exist at the beginning of the period. Opening balances are based upon the closing balances of the prior period and reflect the effects of transactions and events of prior periods and accounting policies applied in the prior period. Opening balances also include matters requiring disclosure that existed at the beginning of the period, such as contingencies and commitments.

organization-wide audit (in the context of adapting GAAS to a compliance audit). An audit of an entity's financial statements and an audit of its compliance with the applicable compliance requirements as they relate to one or more government programs that the entity administers. Also see **program-specific audit**.

other auditing publications. Publications other than interpretive publications; these include AICPA auditing publications not defined as interpretive publications; auditing articles in the *Journal of Accountancy* and other professional journals; continuing professional education programs and other instruction materials, textbooks, guide books, audit programs, and checklists; and other auditing publications from state CPA societies, other organizations, and individuals.

other basis. A basis of accounting that uses a definite set of logical, reasonable criteria that is applied to all material items appearing in financial statements. Also see **other comprehensive bases of accounting** and **special purpose framework**.

other comprehensive bases of accounting. The cash basis, tax basis, regulatory basis, and other basis of accounting. Also see **cash basis**, **regulatory basis**, **tax basis**, and **other basis**.

other information. Financial or nonfinancial information (other than financial statements and the auditor's report thereon) included in an entity's annual report.

other-matter paragraph. A paragraph included in the auditor's report that is required by GAAS, or is included at the auditor's discretion, and that refers to a matter other than those presented or disclosed in the financial statements that, in the auditor's professional judgment, is relevant to users' understanding of the audit, the auditor's responsibilities, or the auditor's report. Also see **emphasis-of-matter paragraph**.

outcome of an accounting estimate. The actual monetary amount that results from the resolution of the transactions, events, or conditions addressed by an accounting estimate.

owner-manager. The proprietor of a smaller entity who is involved in running the entity on a day-to-day basis.

partner. Any individual with authority to bind the firm with respect to the performance of a professional services engagement. For purposes of this definition, *partner* may include an employee with this authority who has not assumed the risks and benefits of ownership. Firms might use different titles to refer to individuals with this authority.

pass-through entity (in the context of adapting GAAS to a compliance audit). An entity that receives an award from a grantor or other entity and distributes all or part of it to another entity to administer a government program.

performance materiality. The amount or amounts set by the auditor at less than materiality for the financial statements as a whole to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds materiality for the financial statements as a whole. If applicable, the term *performance materiality* also refers to the amount or amounts set by the auditor at less than the materiality level or levels for particular classes of transactions, account balances, or disclosures. Performance materiality is to be distinguished from tolerable misstatement. Also see **tolerable misstatement**.

performing initial procedures. On both client continuance and evaluation of relevant ethical requirements (including independence) at the beginning of the current audit engagement, performing initial procedures means that the procedures are completed prior to the performance of other significant activities for the current audit engagement. For continuing audit engagements, such initial procedures often begin shortly after (or in connection with) the completion of the previous audit.

personnel. Partners and staff in the firm.

pervasive. A term used in the context of misstatements to describe the effects on the financial statements of misstatements or the possible effects on the financial statements of misstatements, if any, that are undetected due to an inability to obtain sufficient appropriate audit evidence. Pervasive effects on the financial statements are those that, in the auditor's professional judgment

- are not confined to specific elements, accounts, or items of the financial statements;
- if so confined, represent or could represent a substantial proportion of the financial statements; or
- with regard to disclosures, are fundamental to users' understanding of the financial statements.

population. The entire set of data from which a sample is selected and about which the auditor wishes to draw conclusions.

positive confirmation request. A request that the confirming party respond directly to the auditor by providing the requested information or indicating whether the confirming party agrees or disagrees with the information in the request. Also see **negative confirmation request**.

practicable (in the context of section 705, *Modifications to the Opinion in the Independent Auditor's Report*). The term *practicable*[12] means that omitted information is reasonably obtainable from management's accounts and records and that providing the information in the auditor's report does not require the auditor to assume the position of a preparer of financial information.

practical audit experience. Possessing the competencies and skills that would have enabled the auditor to perform the audit but does not mean that the auditor is required to have performed comparable audits. Also see **experienced auditor**.

preconditions for an audit. The use by management of an acceptable financial reporting framework in the preparation and fair presentation of the financial statements and the agreement of management and, when appropriate, those charged with governance, to the premise on which an audit is conducted.

predecessor auditor. The auditor from a different audit firm who has reported on the most recent audited financial statements or was engaged to perform but did not complete an audit of the financial statements. Also see **auditor**.

[12]As used in the context of paragraphs .22 and .24*c* of section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

premise, relating to the responsibilities of management and, when appropriate, those charged with governance, on which an audit is conducted (the premise)**.** Management and, when appropriate, those charged with governance have acknowledged and understand that they have the following responsibilities that are fundamental to the conduct of an audit in accordance with GAAS; that is, responsibility

a. for the preparation and fair presentation of the financial statements in accordance with the applicable financial reporting framework;

b. for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; and

c. to provide the auditor with

    i. access to all information of which management and, when appropriate, those charged with governance are aware that is relevant to the preparation and fair presentation of the financial statements, such as records, documentation, and other matters;

    ii. additional information that the auditor may request from management and, when appropriate, those charged with governance for the purpose of the audit; and

    iii. unrestricted access to persons within the entity from whom the auditor determines it necessary to obtain audit evidence.

The premise, relating to the responsibilities of management and, when appropriate, those charged with governance, on which an audit is conducted may also be referred to as the *premise*.

prescribed guidelines. The authoritative guidelines established by the designated accounting standards setter for the methods of measurement and presentation of the required supplementary information.

presumptively mandatory requirements.[13] The category of professional requirements with which the auditor must comply in all cases in which such a requirement is relevant, except in rare circumstances discussed in section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*. GAAS use the word "should" to indicate a presumptively mandatory requirement. Also see **generally accepted auditing standards (GAAS)** and **unconditional requirements**.

preventive control. A control that has the objective of preventing errors or fraud that could result in a misstatement of the financial statements.

---

[13]Term also defined in paragraph .08 of QM section 10A for purposes of SQCSs. Refer to QM section 10A for specific language.

private equity exchanges. Refers to entities that trade unregistered private equity securities on electronic trading platforms.

probable (in the context of adapting GAAS to a compliance audit). The future event or events are likely to occur. Also see **material weakness in internal control over compliance**.

professional judgment. The application of relevant training, knowledge, and experience, within the context provided by auditing, accounting, and ethical standards, in making informed decisions about the courses of action that are appropriate in the circumstances of the audit engagement.

professional skepticism. An attitude that includes a questioning mind, being alert to conditions that may indicate possible misstatement due to fraud or error, and a critical assessment of audit evidence.

professional standards. Standards promulgated by the AICPA Auditing Standards Board or the AICPA Accounting and Review Services Committee under the "General Standards Rule" or the "Compliance With Standards Rule" of the AICPA Code of Professional Conduct, or by other standard-setting bodies that set auditing and attest standards applicable to the engagement being performed and relevant ethical requirements.

program-specific audit (in the context of adapting GAAS to a compliance audit). An audit of an entity's compliance with applicable compliance requirements as they relate to one government program that the entity administers. The compliance audit portion of a program-specific audit is performed in conjunction with either an audit of the entity's or the program's financial statements. Also see **organization-wide audit**.

projected misstatements. The auditor's best estimate of misstatements in populations, involving the projection of misstatements identified in audit samples to the entire population from which the samples were drawn. Also see **factual misstatements, judgmental misstatements,** and **misstatement**.

purchase agreement. See **underwriter**.

purpose of an audit procedure. See **nature of an audit procedure**.

questioned costs (in the context of adapting GAAS to a compliance audit). Costs that are questioned by the auditor because (*a*) of a violation or possible violation of the applicable compliance requirements, (*b*) the costs are not supported by adequate documentation, or (*c*) the incurred costs appear unreasonable and do not reflect the actions that a prudent person would take in the circumstances.

readily available. Obtainable by a third-party user without any further action by the entity (for example, financial statements on an entity's website may be considered readily available, but being available upon request is not considered readily available).

reasonable assurance.[14] In the context of an audit of financial statements, a high, but not absolute, level of assurance.

reasonable period of time. The period of time required by the applicable financial reporting framework or, if no such requirement exists, within one year after the date that the financial statements are issued (or within one year after the date that the financial statements are available to be issued, when applicable).

reasonably possible (in the context of adapting GAAS to a compliance audit). The chance of the future event or events occurring is more than remote but less than likely. Also see **material weakness in internal control over compliance**.

reaudit. An initial audit engagement to audit financial statements that have been previously audited by a predecessor auditor. Also see **group audit, initial audit engagement,** and **recurring audit**.

recurring audit. An audit engagement for an existing audit client for whom the auditor performed the preceding audit. Also see **group audit, initial audit engagement,** and **reaudit**.

reference to GAAP in GAAS. See **generally accepted accounting principles (GAAP)**.

referred-to auditor. An auditor who performs an audit of the financial statements of a component to which the group engagement partner determines to make reference in the auditor's report on the group financial statements. A referred-to auditor is not a component auditor, and accordingly, is not a part of the engagement team for a group audit.

regulatory basis. A basis of accounting that the entity uses to comply with the requirements or financial reporting provisions of a regulatory agency to whose jurisdiction the entity is subject (for example, a basis of accounting that insurance companies use pursuant to the accounting practices prescribed or permitted by a state insurance commission).

The regulatory basis of accounting is commonly referred to as *other comprehensive bases of accounting*. Also see **other comprehensive bases of accounting** and **special purpose framework**.

related notes. See **financial statements**.

related party. A party defined as a *related party* in GAAP.

relevant assertions. An assertion about a class of transactions, account balance, or disclosure is relevant when it has an identified risk of material misstatement. A risk of material misstatement exists when (*a*) there is a reasonable possibility of a misstatement occurring (that is, its likelihood), and (*b*) if it were to occur, there is a reasonable possibility of the misstatement being material (that is, its magnitude). The determination of whether an assertion is a relevant assertion is made before consideration of any related controls (that is, the determination is based on inherent risk).

relevant ethical requirements. Principles of professional ethics and ethical requirements to which the engagement team and engagement quality reviewer are subject, which consist

[14]See footnote 11.

of the AICPA Code of Professional Conduct together with rules of applicable state boards of accountancy and applicable regulatory agencies that are more restrictive.

remote (in the context of adapting GAAS to a compliance audit). The chance of the future event or events occurring is slight. Also see **material weakness in internal control over compliance**.

report on compliance. An auditor's report on an entity's compliance with aspects of contractual agreements or regulatory requirements, insofar as they relate to accounting matters, in connection with an audit of financial statements (commonly referred to as a *by-product report*). Also see **by-product report**.

report on management's description of a service organization's system and the suitability of the design of controls (referred to in section 402, *Audit Considerations Relating to an Entity Using a Service Organization*, as a *type 1 report*). A report that comprises the following:

a. Management's description of the service organization's system

b. A written assertion by management of the service organization about whether, in all material respects, and based on suitable criteria

   i. management's description of the service organization's system fairly presents the service organization's system that was designed and implemented as of a specified date

   ii. the controls related to the control objectives stated in management's description of the service organization's system were suitably designed to achieve those control objectives as of the specified date

c. A service auditor's report that expresses an opinion on the matters in *b*(i–ii)

report on management's description of a service organization's system and the suitability of the design and operating effectiveness of controls (referred to in section 402 as a *type 2 report*)**.** A report that comprises the following:

a. Management's description of the service organization's system

b. A written assertion by management of the service organization about whether in all material respects and, based on suitable criteria

   i. management's description of the service organization's system fairly presents the service organization's system that was designed and implemented throughout the specified period

   ii. the controls related to the control objectives stated in management's description of the service organization's system were suitably designed throughout the specified period to achieve those control objectives

iii. the controls related to the control objectives stated in management's description of the service organization's system operated effectively throughout the specified period to achieve those control objectives

c. A service auditor's report that

i. expresses an opinion on the matters in *b*(i–iii)

ii. includes a description of the service auditor's tests of controls and the results thereof

report release date. The date the auditor grants the entity permission to use the auditor's report in connection with the financial statements.

reporting accountant (in the context of section 915). An accountant, other than a continuing accountant, in public practice, as described in ET section 0.400, who prepares a written report or provides oral advice on the application of the requirements of an applicable financial reporting framework to a specific transaction or on the type of report that may be issued on a specific entity's financial statements. (A reporting accountant who is also engaged to provide accounting and reporting advice to a specific entity on a recurring basis is commonly referred to as an *advisory accountant*.)

representative sample. See **audit sampling (sampling)**.

requesting party (in the context of section 920). One of the following specified parties requesting a comfort letter, which has negotiated an agreement with the entity:

- An underwriter
- Other parties that are conducting a review process that is, or will be, substantially consistent with the due diligence process performed when the securities offering is, or if the securities offering was, being registered pursuant to the 1933 Act, as follows:
  - — A selling shareholder, sales agent, or other party with a statutory due diligence defense under Section 11 of the 1933 Act
  - — A broker-dealer or other financial intermediary acting as principal or agent in a securities offering in connection with the following types of securities offerings:
    - Foreign offerings, including Regulation S, Eurodollar, and other offshore offerings
    - Transactions that are exempt from the registration requirements of Section 5 of the 1933 Act, including those pursuant to Regulation A, Regulation D, and Rule 144A
    - Offerings of securities issued or backed by governmental, municipal, banking, tax-exempt, or other entities that are exempt from registration under the 1933 Act

— The buyer or seller in connection with acquisition transactions in which there is an exchange of stock

required supplementary information. Information that a designated accounting standards setter requires to accompany an entity's basic financial statements. Required supplementary information is not part of the basic financial statements; however, a designated accounting standards setter considers the information to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. In addition, authoritative guidelines for the methods of measurement and presentation of the information have been established. Also see **supplementary information**.

response (in relation to a system of quality management). Policies or procedures designed and implemented by the firm to address one or more quality risks.

- Policies are statements of what should, or should not, be done to address a quality risk or risks. Such statements may be documented, explicitly stated in communications, or implied through actions and decisions.
- Procedures are actions to implement policies.

retrospective application. An entity's application of a change in accounting principle to one or more prior periods that were included in previously issued financial statements, as if that principle had always been used.

risk assessment procedures. The audit procedures designed and performed to identify and assess the risks of material misstatement, whether due to fraud or error, at the financial statement and assertion levels.

risk assessment process. See **entity's risk assessment process**.

risk of material misstatement. The risk that the financial statements are materially misstated prior to the audit. This consists of two components, described as follows at the assertion level:

> **inherent risk.** The susceptibility of an assertion about a class of transaction, account balance, or disclosure to a misstatement that could be material, either individually or when aggregated with other misstatements, before consideration of any related controls.
>
> **control risk.** The risk that a misstatement that could occur in an assertion about a class of transaction, account balance, or disclosure and that could be material, either individually or when aggregated with other misstatements, will not be prevented, or detected and corrected, on a timely basis by the entity's internal control.

Also see **audit risk** and **detection risk**.

risk of material misstatement at the overall financial statement level. Refers to risks of material misstatement that relate pervasively to the financial statements as a whole and potentially affect many assertions.

risk of material noncompliance (in the context of adapting GAAS to a compliance audit). The risk that material noncompliance exists prior to the audit. This consists of two components, described as follows:

> **inherent risk of noncompliance.** The susceptibility of a compliance requirement to noncompliance that could be material, either individually or when aggregated with other instances of noncompliance, before consideration of any related controls over compliance.
>
> **control risk of noncompliance.** The risk that noncompliance with a compliance requirement that could occur and that could be material, either individually or when aggregated with other instances of noncompliance, will not be prevented, or detected and corrected, on a timely basis by the entity's internal control over compliance.

Also see **audit risk of noncompliance** and **detection risk of noncompliance**.

risks arising from the use of IT. Susceptibility of information-processing controls to ineffective design or operation, or risks to the integrity of information in the entity's information system, due to ineffective design or operation of controls in the entity's IT processes. See **IT environment**.

sampling. See **audit sampling (sampling)**.

sampling risk. The risk that the auditor's conclusion based on a sample may be different from the conclusion if the entire population were subjected to the same audit procedure. Sampling risk can lead to two types of erroneous conclusions:

a. In the case of a test of controls, that controls are more effective than they actually are, or in the case of a test of details, that a material misstatement does not exist when, in fact, it does. The auditor is primarily concerned with this type of erroneous conclusion because it affects audit effectiveness and is more likely to lead to an inappropriate audit opinion.
b. In the case of a test of controls, that controls are less effective than they actually are, or in the case of a test of details, that a material misstatement exists when, in fact, it does not. This type of erroneous conclusion affects audit efficiency because it would usually lead to additional work to establish that initial conclusions were incorrect.

sampling unit. The individual items constituting a population.

scanning. A type of analytical procedure involving the auditor's exercise of professional judgment to review accounting data to identify significant or unusual items to test. Also see **analytical procedures**.

scope limitation. See **limitation on the scope of an audit**.

securities offerings (in the context of section 920). One of the following types of securities offerings:

- Registration of securities with the SEC under the 1933 Act
- Foreign offerings, including Regulation S, Eurodollar, and other offshore offerings
- Transactions that are exempt from the registration requirements of Section 5 of the 1933 Act, including those pursuant to Regulation A, Regulation D, and Rule 144A
- Offerings of securities issued or backed by governmental, municipal, banking, tax-exempt, or other entities that are exempt from registration under the 1933 Act
- Acquisition transactions in which there is an exchange of stock

security. *Security* has the meaning as defined in Section 2(a)(1) of the Securities Act of 1933, as amended.

service auditor. A practitioner who reports on controls at a service organization. Also see **auditor**.

service organization. An organization or segment of an organization that provides services to user entities that are relevant to those user entities' internal control over financial reporting. Also see **subservice organization** and **user entity**.

service organization's system. The policies and procedures designed, implemented, and documented by management of the service organization to provide user entities with the services covered by the service auditor's report. Management's description of the service organization's system identifies the services covered, the period to which the description relates (or in the case of a type 1 report, the date to which the description relates), the control objectives specified by management or an outside party, the party specifying the control objectives (if not specified by management), and the related controls.

significant class of transactions, account balance, or disclosure. A class of transactions, account balance, or disclosure for which there is one or more relevant assertions.

significant component. A component identified by the group engagement team (*a*) that is of individual financial significance to the group, or (*b*) that, due to its specific nature or circumstances, is likely to include significant risks of material misstatement of the group financial statements. Also see **component** and **group**.

significant deficiency. A deficiency, or a combination of deficiencies, in internal control over financial reporting that is less severe than a material weakness yet important enough to merit attention by those charged with governance. Also see **material weakness**.

significant deficiency in internal control over compliance (in the context of adapting GAAS to a compliance audit). A deficiency, or a combination of deficiencies, in internal control over compliance that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance. Also see **deficiency in internal control over compliance** and **material weakness in internal control over compliance**.

significant risk. An identified risk of material misstatement

i. for which the assessment of inherent risk is close to the upper end of the spectrum of inherent risk due to the degree to which inherent risk factors affect the combination of the likelihood of a misstatement occurring and the magnitude of the potential misstatement should that misstatement occur, or

ii. that is to be treated as a significant risk in accordance with the requirements of other AU-C sections.

significant unusual transactions. Significant transactions that are outside the normal course of business for the entity or that otherwise appear to be unusual due to their timing, size, or nature.

single financial statement or **specific element of a financial statement (in the context of section 805).** Reference to this term includes the related notes. The related notes ordinarily comprise a summary of significant accounting policies and other explanatory information relevant to the financial statement or the specific element.

smaller, less complex entity. For purposes of specifying additional considerations to audits of smaller, less complex entities, this term refers to an entity that typically possesses qualitative characteristics, such as the following:

a. Concentration of ownership and management in a small number of individuals; and

b. One or more of the following:

    i. Straightforward or uncomplicated transactions

    ii. Simple record keeping

    iii. Few lines of business and few products within business lines

    iv. Few internal controls

    v. Few levels of management with responsibility for a broad range of controls

    vi. Few personnel, many having a wide range of duties

These qualitative characteristics are not exhaustive, they are not exclusive to smaller, less complex entities, and smaller, less complex entities do not necessarily display all of these characteristics.

special purpose financial statements. Financial statements prepared in accordance with a special purpose framework. Also see **financial statements**.

special purpose framework. A financial reporting framework other than GAAP that is one of the following bases of accounting:

a. **cash basis.** A basis of accounting that the entity uses to record cash receipts and disbursements and modifications of the cash basis having substantial support (for example, recording depreciation on fixed assets).

b. **tax basis.** A basis of accounting that the entity uses to file its tax return for the period covered by the financial statements.

c. **regulatory basis.** A basis of accounting that the entity uses to comply with the requirements or financial reporting provisions of a regulatory agency to whose jurisdiction the entity is subject (for example, a basis of accounting that insurance companies use pursuant to the accounting practices prescribed or permitted by a state insurance commission).

d. **contractual basis.** A basis of accounting that the entity uses to comply with an agreement between the entity and one or more third parties other than the auditor.

e. **other basis.** A basis of accounting that uses a definite set of logical, reasonable criteria that is applied to all material items appearing in financial statements.

The cash basis, tax basis, regulatory basis, and other basis of accounting are commonly referred to as *other comprehensive bases of accounting*. Also see **financial reporting framework**.

specialist. See **auditor's specialist**.

specific element of a financial statement. See **single financial statement**.

specific transaction (in the context of section 915). A completed or proposed transaction or group of related transactions or a financial reporting issue involving facts and circumstances of a specific entity.

specified parties. The intended users of the auditor's written communication.

staff. Professionals, other than partners, including any specialist the firm employs.

statistical sampling. An approach to sampling that has the following characteristics:

a. Random selection of the sample items

b. The use of an appropriate statistical technique to evaluate sample results, including measurement of sampling risk

A sampling approach that does not have characteristics *a* and *b* is considered nonstatistical sampling.

stratification. The process of dividing a population into subpopulations, each of which is a group of sampling units that have similar characteristics.

subsequent events. Events occurring between the date of the financial statements and the date of the auditor's report.

subsequently discovered facts. Facts that become known to the auditor after the date of the auditor's report that, had they been known to the auditor at that date, may have caused the auditor to revise the auditor's report.

subservice organization. A service organization used by another service organization to perform some of the services provided to user entities that are relevant to those user entities' internal control over financial reporting. Also see **service organization** and **user entity**.

substantive analytical procedures. See **analytical procedures** and **substantive procedure**.

substantive procedure. An audit procedure designed to detect material misstatements at the assertion level. Substantive procedures comprise

a. tests of details (classes of transactions, account balances, and disclosures) and

b. substantive analytical procedures.

Also see **analytical procedures, dual purpose test,** and **test of controls**.

successor auditor. See **auditor**.

sufficiency (of audit evidence). The measure of the quantity of audit evidence. The quantity of audit evidence necessary is affected by the auditor's assessment of the risks of material misstatement and the quality of the audit evidence obtained (that is, its appropriateness). Also see **audit evidence**.

suitably qualified external person.[15] An individual outside the firm with the competence and capabilities to act as an engagement partner (for example, a partner of another firm).

summary financial statements (in the context of section 810). Historical financial information that is derived from financial statements but that contains less detail than the financial statements, while still providing a structured representation consistent with that provided by the financial statements of the entity's economic resources or obligations at a point in time or the changes therein for a period of time. Summary financial statements are separately presented and are not presented as comparative information. Also see **comparative information** and **financial statements**.

supplementary information. Information presented outside the basic financial statements, excluding required supplementary information that is not considered necessary for the financial statements to be fairly presented in accordance with the applicable financial reporting framework. Such information may be presented in a document containing the audited financial statements or separate from the financial statements. Also see **required supplementary information**.

[15]See footnote 11.

system of internal control. The system designed, implemented, and maintained by those charged with governance, management, and other personnel to provide reasonable assurance about the achievement of an entity's objectives with regard to reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations. For purposes of GAAS, the system of internal control consists of five interrelated components:

i. Control environment

ii. The entity's risk assessment process

iii. The entity's process to monitor the system of internal control

iv. The information system and communication

v. Control activities

tax basis. A basis of accounting that the entity uses to file its tax return for the period covered by the financial statements.

The *tax basis* of accounting is commonly referred to as an *other comprehensive basis of accounting*. In the context of section 800, the tax basis of accounting is not a regulatory basis of accounting. Also see **other comprehensive bases of accounting** and **special purpose framework**.

test of controls. An audit procedure designed to evaluate the operating effectiveness of controls in preventing, or detecting and correcting, material misstatements at the assertion level. Also see **dual purpose test** and **substantive procedure**.

those charged with governance. The person(s) or organization(s) (for example, a corporate trustee) with responsibility for overseeing the strategic direction of the entity and the obligations related to the accountability of the entity. This includes overseeing the financial reporting process. Those charged with governance may include management personnel; for example, executive members of a governance board or an owner-manager. Also see **management**.

threatened legal proceeding. A potential claimant has manifested to the auditor an awareness of, and a present intention to assert, a possible claim.

timing of an audit procedure. Refers to when an audit procedure is performed or the period or date to which the audit evidence applies. Also see **extent of an audit procedure** and **nature of an audit procedure**.

tolerable misstatement. A monetary amount set by the auditor in respect of which the auditor seeks to obtain an appropriate level of assurance that the monetary amount set by the auditor is not exceeded by the actual misstatement in the population.

Tolerable misstatement is also the application of performance materiality to a particular sampling procedure. Also see **performance materiality**.

tolerable rate of deviation. A rate of deviation set by the auditor in respect of which the auditor seeks to obtain an appropriate level of assurance that the rate of deviation set by the auditor is not exceeded by the actual rate of deviation in the population.

type 1 report. See **report on management's description of a service organization's system and the suitability of the design of controls**.

type 2 report. See **report on management's description of a service organization's system and the suitability of the design and operating effectiveness of controls**.

type of an audit procedure. See **nature of an audit procedure**.

unconditional requirements.[16] The category of professional requirements with which the auditor must comply in all cases in which such a requirement is relevant. GAAS use the word "must" to indicate an unconditional requirement. Also see **generally accepted auditing standards (GAAS)** and **presumptively mandatory requirements**.

uncorrected misstatements. Misstatements that the auditor has accumulated during the audit and that have not been corrected. Also see **misstatement**.

understanding of the entity. Obtaining an understanding of the entity and its environment, including the entity's internal control.

underwriter (in the context of section 920). As defined in the 1933 Act

> any person who has purchased from an issuer with a view to, or offers or sells for an issuer in connection with, the distribution of any security, or participates or has a direct or indirect participation in any such undertaking, or participates or has a participation in the direct or indirect underwriting of any such undertaking; but such term shall not include a person whose interest is limited to a commission from an underwriter or dealer not in excess of the usual and customary distributors' or sellers' commission. As used in this paragraph, the term "issuer" shall include, in addition to an issuer, any person directly or indirectly controlling or controlled by the issuer, or any person under direct or indirect common control with the issuer.

Except when the context otherwise requires, the word *underwriter* as used in section 920, refers to the managing, or lead, underwriter, who typically negotiates the underwriting agreement or purchase agreement (hereafter referred to as the *underwriting agreement*) for a group of underwriters whose exact composition is not determined until shortly before a securities offering becomes effective.

underwriting agreement. See **underwriter**.

unmodified opinion. The opinion expressed by the auditor when the auditor concludes that the financial statements are presented fairly, in all material respects, in accordance

[16]See footnote 13.

with the applicable financial reporting framework. Also see **group audit opinion** and **modified opinion**.

unobservable inputs (or equivalent)**.** With respect to fair value accounting estimates, assumptions or inputs that reflect the entity's own judgments about what assumptions market participants would use in pricing the asset or liability, developed based on the best information available in the circumstances. Also see **inputs** and **observable inputs** (or equivalent).

user auditor. An auditor who audits and reports on the financial statements of a user entity. Also see **auditor**.

user entity. An entity that uses a service organization and whose financial statements are being audited. Also see **service organization** and **subservice organization**.

working papers or **workpapers.** See **audit documentation** and **engagement documentation**.

written report (in the context of section 915). Any written communication that provides a conclusion on the appropriate application of the requirements of an applicable financial reporting framework to a specific transaction or on the type of report that may be issued on a specific entity's financial statements.

written representation. A written statement by management provided to the auditor to confirm certain matters or to support other audit evidence. Written representations in this context do not include financial statements, the assertions therein, or supporting books and records.

Yellow Book. See ***Government Auditing Standards***.

AU-C Sections 200–299

GENERAL PRINCIPLES AND RESPONSIBILITIES

The following is a Codification of Statements on Auditing Standards (SASs) resulting from the Clarification and Convergence Project of the Auditing Standards Board (ASB), and related Auditing Interpretations. SASs are issued by the ASB, the senior committee of the AICPA designated to issue pronouncements on auditing matters. The "Compliance With Standards Rule" (ET sec. 1.310.001) of the AICPA Code of Professional Conduct requires adherence to the applicable generally accepted auditing standards (GAAS) promulgated by the ASB. An auditor is required to comply with an unconditional requirement in all cases in which the circumstances exist to which the unconditional requirement applies. An auditor is also required to comply with a presumptively mandatory requirement in all cases in which the circumstances exist to which the presumptively mandatory requirement applies; however, in rare circumstances, an auditor may depart from a presumptively mandatory requirement provided the auditor documents justification for the departure and how the alternative procedures performed in the circumstances were sufficient to achieve the objectives of the presumptively mandatory requirement.

Auditing interpretations of GAAS are *interpretive publications*, as defined in section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*. Section 200 requires the auditor to consider applicable interpretive publications in planning and performing the audit. Interpretive publications are not auditing standards. Interpretive publications are recommendations on the application of GAAS in specific circumstances, including engagements for entities in specialized industries. An interpretive publication is issued under the authority of the ASB after all ASB members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with GAAS. Auditing interpretations of GAAS are included in AU-C sections. AICPA Audit and Accounting Guides and Auditing Statements of Position are listed in AU-C appendix D, *AICPA Audit and Accounting Guides and Statements of Position*.

AU-C Section 200

Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards

Source: SAS No. 122; SAS No. 123; SAS No. 128; SAS No. 130; SAS No. 134; SAS No. 136; SAS No. 138; SAS No. 142; SAS No. 143; SAS No. 145.

Effective for audits of financial statements for periods ending on or after December 15, 2012, unless otherwise indicated.

Note

In June 2022, the ASB issued SAS No. 146, *Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, which contains amendments to this section.

The amendments are effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025, and can be viewed in the appendix of section 220 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the independent auditor's overall responsibilities when conducting an audit of financial statements in accordance with generally accepted auditing standards (GAAS). Specifically, it sets out the overall objectives of the independent auditor (the auditor) and explains the nature and scope of an audit designed to enable the auditor to meet those objectives. It also explains the scope, authority, and structure of GAAS and includes requirements establishing the general responsibilities of the auditor applicable in all engagements conducted in accordance with GAAS, including the obligation to comply with GAAS. [As amended, effective for audits for periods ending on or after December 15, 2016, by SAS No. 130.]

.02 GAAS are developed and issued in the form of Statements on Auditing Standards (SASs) and are codified into AU-C sections. GAAS are written in the context of an audit of financial statements by an auditor. They are to be adapted as necessary in the circumstances when applied to other engagements conducted in accordance with GAAS, such as audits of other historical financial information, compliance audits, and audits of internal control over financial reporting that are integrated with audits of financial statements. GAAS do not address the responsibilities of the auditor that may exist in legislation, regulation, or otherwise, in connection with, for example, the offering of securities to the public. Such responsibilities may differ from those established in GAAS. Accordingly, although the auditor may find aspects of GAAS helpful in such circumstances, it is the responsibility of the auditor to ensure compliance with all relevant legal, regulatory, or professional obligations. [As amended, effective for audits for periods ending on or after December 15, 2016, by SAS No. 130.]

Association With Financial Statements

.03 An auditor is associated with financial information when the auditor has applied procedures sufficient to permit the auditor to report in accordance with GAAS. Statements on Standards for Accounting and Review Services address the accountant's considerations when the accountant prepares and presents financial statements to the entity or to third parties.

An Audit of Financial Statements

.04 The purpose of an audit is to provide financial statement users with an opinion by the auditor on whether the financial statements are presented fairly, in all material respects, in accordance with an applicable financial reporting framework, which enhances the degree of confidence that intended users can place in the financial statements. An audit conducted in accordance with GAAS and relevant ethical requirements enables the auditor to form that opinion. (Ref: par. .A1)

.05 The financial statements subject to audit are those of the entity, prepared and presented by management of the entity with oversight from those charged with governance. GAAS do not impose responsibilities on management or those charged with governance and do not override laws and regulations that govern their responsibilities. However, an audit in accordance with GAAS is conducted on the premise that management and, when appropriate, those charged with governance have acknowledged certain responsibilities that are fundamental to the conduct of the audit. The audit of the financial statements does not relieve management or those charged with governance of their responsibilities. (Ref: par. .A2–.A13)

.06 As the basis for the auditor's opinion, GAAS require the auditor to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error. Reasonable assurance is a high, but not absolute, level of assurance. It is obtained when the auditor has obtained sufficient appropriate audit evidence to reduce audit risk (that is, the risk that the auditor expresses an inappropriate opinion when the financial statements are materially misstated) to an acceptably low level. Reasonable assurance is not an absolute level of assurance because there are inherent limitations of an audit that result in most of the audit evidence, on which the auditor draws conclusions and bases the auditor's opinion, being persuasive rather than conclusive. (Ref: par. .A34–.A59)

.07 The concept of materiality is applied by the auditor when both planning and performing the audit, and in evaluating the effect of identified misstatements on the audit and uncorrected misstatements, if any, on the financial statements.[1] In general, misstatements, including omissions, are considered to be material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements. Judgments about materiality are made in light of surrounding circumstances, and involve both qualitative and quantitative considerations. These judgments are affected by the auditor's perception of the financial information needs of users of the financial statements, and by the size or nature of a misstatement, or both. The auditor's opinion addresses the financial statements as a whole. Therefore, the auditor has no responsibility to plan and perform the audit to obtain reasonable assurance that misstatements, whether caused by fraud or error, that are not material to the financial statements as a whole, are detected. (Ref: par. .A14) [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 138.]

.08 GAAS contain objectives, requirements, and application and other explanatory material that are designed to support the auditor in obtaining reasonable assurance. GAAS require that the auditor exercise professional judgment and maintain professional skepticism throughout the planning and performance of the audit and, among other things,

- identify and assess risks of material misstatement, whether due to fraud or error, based on an understanding of the entity and its environment, the applicable financial reporting framework, and the entity's system of internal control.
- obtain sufficient appropriate audit evidence about whether material misstatements exist, through designing and implementing appropriate responses to the assessed risks.
- form an opinion on the financial statements, or determine that an opinion cannot be formed, based on an evaluation of the audit evidence obtained.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.09 The form of opinion expressed by the auditor will depend upon the applicable financial reporting framework and any applicable law or regulation.

.10 The auditor also may have certain other communication and reporting responsibilities to users, management, those charged with governance, or parties outside the entity, regarding matters arising from the audit. These responsibilities may be established by GAAS or by applicable law or regulation.[2]

[1] See section 320, *Materiality in Planning and Performing an Audit*, and section 450, *Evaluation of Misstatements Identified During the Audit*.

Effective Date

.11 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Overall Objectives of the Auditor

.12 The overall objectives of the auditor, in conducting an audit of financial statements, are to

a. obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, thereby enabling the auditor to express an opinion on whether the financial statements are presented fairly, in all material respects, in accordance with an applicable financial reporting framework; and

b. report on the financial statements, and communicate as required by GAAS, in accordance with the auditor's findings.

.13 In all cases when reasonable assurance cannot be obtained and a qualified opinion in the auditor's report is insufficient in the circumstances for purposes of reporting to the intended users of the financial statements, GAAS require that the auditor disclaim an opinion or withdraw from the engagement, when withdrawal is possible under applicable law or regulation.

Definitions

.14 For purposes of GAAS, the following terms have the meanings attributed as follows:

Applicable financial reporting framework. The financial reporting framework adopted by management and, when appropriate, those charged with governance in the preparation and fair presentation of the financial statements that is acceptable in view of the nature of the entity and the objective of the financial statements, or that is required by law or regulation.

Audit risk. The risk that the auditor expresses an inappropriate audit opinion when the financial statements are materially misstated. Audit risk is a function of the risks of material misstatement and detection risk.

Auditor. The term used to refer to the person or persons conducting the audit, usually the engagement partner or other members of the engagement team, or, as applicable, the firm. When an AU-C section expressly intends that a requirement or responsibility be fulfilled by the engagement partner, the term *engagement partner* rather than *auditor* is used. *Engagement partner* and *firm* are to be read as referring to their governmental equivalents when relevant.

---

[2] For examples, see section 260, *The Auditor's Communication With Those Charged With Governance*; section 265, *Communicating Internal Control Related Matters Identified in an Audit*; and paragraph .42 of section 240, *Consideration of Fraud in a Financial Statement Audit*.

Detection risk. The risk that the procedures performed by the auditor to reduce audit risk to an acceptably low level will not detect a misstatement that exists and that could be material, either individually or when aggregated with other misstatements.

Financial reporting framework. A set of criteria used to determine measurement, recognition, presentation, and disclosure of all material items appearing in the financial statements; for example, U.S. generally accepted accounting principles, International Financial Reporting Standards (IFRSs) promulgated by the International Accounting Standards Board (IASB), or a special purpose framework.[3]

The term *fair presentation framework* refers to a financial reporting framework that requires compliance with the requirements of the framework and

a. acknowledges explicitly or implicitly that, to achieve fair presentation of the financial statements, it may be necessary for management to provide disclosures beyond those specifically required by the framework; or

b. acknowledges explicitly that it may be necessary for management to depart from a requirement of the framework to achieve fair presentation of the financial statements. Such departures are expected to be necessary only in rare circumstances.

A financial reporting framework that requires compliance with the requirements of the framework, but does not contain the acknowledgments in (*a*) or (*b*) is not a fair presentation framework.

Financial statements. A structured representation of historical financial information, including disclosures, intended to communicate an entity's economic resources and obligations at a point in time or the changes therein for a period of time, in accordance with a financial reporting framework. The term *financial statements* ordinarily refers to a complete set of financial statements as determined by the requirements of the applicable financial reporting framework but can also refer to a single financial statement. Disclosures comprise explanatory or descriptive information, set out as required, expressly permitted or otherwise allowed by the applicable financial reporting framework, on the face of a financial statement or in the notes, or incorporated therein by reference when expressly permitted.

Historical financial information. Information expressed in financial terms regarding a particular entity, derived primarily from that entity's accounting system, about economic events occurring in past time periods or about economic conditions or circumstances at points in time in the past.

Interpretive publications. Auditing interpretations of GAAS, exhibits to GAAS, auditing guidance included in AICPA Audit and Accounting Guides, and AICPA Auditing Statements of Position (SOP).

[3] See section 800, *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks*.

Management. The person(s) with executive responsibility for the conduct of the entity's operations. For some entities, management includes some or all of those charged with governance; for example, executive members of a governance board or an owner-manager.

Misstatement. A difference between the amount, classification, presentation, or disclosure of a reported financial statement item and the amount, classification, presentation, or disclosure that is required for the item to be presented fairly in accordance with the applicable financial reporting framework. Misstatements can arise from fraud or error.

Other auditing publications. Publications other than interpretive publications; these include AICPA auditing publications not defined as interpretive publications; auditing articles in the *Journal of Accountancy* and other professional journals; continuing professional education programs and other instruction materials, textbooks, guide books, audit programs, and checklists; and other auditing publications from state CPA societies, other organizations, and individuals.

Premise relating to the responsibilities of management and, when appropriate, those charged with governance, on which an audit is conducted, (the premise)**.** Management and, when appropriate, those charged with governance have acknowledged and understand that they have the following responsibilities that are fundamental to the conduct of an audit in accordance with GAAS; that is, responsibility

a. for the preparation and fair presentation of the financial statements in accordance with the applicable financial reporting framework;

b. for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; and

c. to provide the auditor with

   i. access to all information of which management and, when appropriate, those charged with governance are aware that is relevant to the preparation and fair presentation of the financial statements, such as records, documentation, and other matters;

   ii. additional information that the auditor may request from management and, when appropriate, those charged with governance for the purpose of the audit; and

   iii. unrestricted access to persons within the entity from whom the auditor determines it necessary to obtain audit evidence.

The *premise, relating to the responsibilities of management and, when appropriate, those charged with governance, on which an audit is conducted* may also be referred to as the *premise.*

Professional judgment. The application of relevant training, knowledge, and experience, within the context provided by auditing, accounting, and ethical standards, in making informed decisions about the courses of action that are appropriate in the circumstances of the audit engagement.

Professional skepticism. An attitude that includes a questioning mind, being alert to conditions that may indicate possible misstatement due to fraud or error, and a critical assessment of audit evidence.

Reasonable assurance. In the context of an audit of financial statements, a high, but not absolute, level of assurance.

Risk of material misstatement. The risk that the financial statements are materially misstated prior to the audit. This consists of two components, described as follows at the assertion level: (Ref. par. .A15)

> **Inherent risk.** The susceptibility of an assertion about a class of transaction, account balance, or disclosure to a misstatement that could be material, either individually or when aggregated with other misstatements, before consideration of any related controls.
>
> **Control risk.** The risk that a misstatement that could occur in an assertion about a class of transaction, account balance, or disclosure and that could be material, either individually or when aggregated with other misstatements, will not be prevented, or detected and corrected, on a timely basis by the entity's system of internal control.

Those charged with governance. The person(s) or organization(s) (for example, a corporate trustee) with responsibility for overseeing the strategic direction of the entity and the obligations related to the accountability of the entity. This includes overseeing the financial reporting process. Those charged with governance may include management personnel; for example, executive members of a governance board or an owner-manager.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. As amended, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Requirements

Ethical Requirements Relating to an Audit of Financial Statements

.15 The auditor must be independent of the entity when performing an engagement in accordance with GAAS unless (*a*) GAAS provides otherwise or (*b*) the auditor is required by law or regulation to accept the engagement and report on the financial statements. When the auditor is not independent and neither (*a*) nor (*b*) are applicable, the auditor is precluded from issuing a report under GAAS.

.16 The auditor should comply with relevant ethical requirements relating to financial statement audit engagements. (Ref: par. .A16–.A22)

Professional Skepticism

.17 The auditor should plan and perform an audit with professional skepticism, recognizing that circumstances may exist that cause the financial statements to be materially misstated. (Ref: par. .A23–.A27)

Professional Judgment

.18 The auditor should exercise professional judgment in planning and performing an audit of financial statements. (Ref: par. .A29–.A33)

Sufficient Appropriate Audit Evidence and Audit Risk

.19 To obtain reasonable assurance, the auditor should obtain sufficient appropriate audit evidence[4] to reduce audit risk to an acceptably low level and thereby enable the auditor to draw reasonable conclusions on which to base the auditor's opinion. (Ref: par. .A34–.A59)

Conduct of an Audit in Accordance With GAAS

Complying With AU-C Sections Relevant to the Audit

.20 The auditor should comply with all AU-C sections relevant to the audit. An AU-C section is relevant to the audit when the AU-C section is in effect and the circumstances addressed by the AU-C section exist. (Ref: par. .A60–.A65)

.21 The auditor should have an understanding of the entire text of an AU-C section, including its application and other explanatory material, to understand its objectives and to apply its requirements properly. (Ref: par. .A66–.A76)

.22 The auditor should not represent compliance with GAAS in the auditor's report unless the auditor has complied with the requirements of this section and all other AU-C sections relevant to the audit.

Objectives Stated in Individual AU-C Sections

.23 To achieve the overall objectives of the auditor, the auditor should use the objectives stated in individual AU-C sections in planning and performing the audit considering the interrelationships within GAAS to (Ref: par. .A77–.A79)

a. determine whether any audit procedures in addition to those required by individual AU-C sections are necessary in pursuance of the objectives stated in each AU-C section; and (Ref: par. .A80)

b. evaluate whether sufficient appropriate audit evidence has been obtained. (Ref: par. .A81)

---

[4] See paragraph .06 of section 500, *Audit Evidence*, for the definition of *audit evidence*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142.]

Complying With Relevant Requirements

.24 Subject to paragraph .26, the auditor should comply with each requirement of an AU-C section unless, in the circumstances of the audit,

a. the entire AU-C section is not relevant; or

b. the requirement is not relevant because it is conditional and the condition does not exist. (Ref: par. .A82–.A83)

Defining Professional Responsibilities in GAAS

.25 GAAS use the following two categories of professional requirements, identified by specific terms, to describe the degree of responsibility it imposes on auditors:

- Unconditional requirements. The auditor must comply with an unconditional requirement in all cases in which such requirement is relevant. GAAS use the word "must" to indicate an unconditional requirement.
- Presumptively mandatory requirements. The auditor must comply with a presumptively mandatory requirement in all cases in which such a requirement is relevant except in rare circumstances discussed in paragraph .26. GAAS use the word "should" to indicate a presumptively mandatory requirement. (Ref: par. .A84)

.26 In rare circumstances, the auditor may judge it necessary to depart from a relevant presumptively mandatory requirement. In such circumstances, the auditor should perform alternative audit procedures to achieve the intent of that requirement. The need for the auditor to depart from a relevant presumptively mandatory requirement is expected to arise only when the requirement is for a specific procedure to be performed and, in the specific circumstances of the audit, that procedure would be ineffective in achieving the intent of the requirement. (Ref: par. .A85)

Interpretive Publications

.27 The auditor should consider applicable interpretive publications in planning and performing the audit. (Ref: par. .A86)

Other Auditing Publications

.28 In applying the auditing guidance included in an other auditing publication, the auditor should, exercising professional judgment, assess the relevance and appropriateness of such guidance to the circumstances of the audit. (Ref: par. .A87–.A89)

Failure to Achieve an Objective

.29 If an objective in a relevant AU-C section cannot be achieved, the auditor should evaluate whether this prevents the auditor from achieving the overall objectives of the auditor and thereby requires the auditor, in accordance with GAAS, to modify the auditor's opinion or withdraw from the engagement (when withdrawal is possible under applicable law or regulation). Failure to achieve an objective represents a significant finding or issue requiring documentation in accordance with section 230, *Audit Documentation*.[5] (Ref: par. .A90–.A91)

Application and Other Explanatory Material

An Audit of Financial Statements

Scope of the Audit (Ref: par. .04)

.A1 The auditor's opinion on the financial statements addresses whether the financial statements are presented fairly, in all material respects, in accordance with the applicable financial reporting framework. Such an opinion is common to all audits of financial statements. The auditor's opinion, therefore, does not assure, for example, the future viability of the entity nor the efficiency or effectiveness with which management has conducted the affairs of the entity. In some circumstances, however, applicable law or regulation may require auditors to provide opinions on other specific matters, such as the effectiveness of internal control. Although GAAS include requirements and regarding such matters to the extent that they are relevant to forming an opinion on the financial statements, the auditor would be required to undertake further work if the auditor had additional responsibilities to provide such opinions.

Preparation and Fair Presentation of the Financial Statements (Ref: par. .05)

.A2 An audit in accordance with GAAS is conducted on the premise that management and, when appropriate, those charged with governance have acknowledged and understand that they have responsibility

a. for the preparation and fair presentation of the financial statements in accordance with the applicable financial reporting framework;

b. for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; and

c. to provide the auditor with

    i. access to all information of which management and, when appropriate, those charged with governance are aware that is relevant to the preparation and fair presentation of the financial statements, such as records, documentation, and other matters;

    ii. additional information that the auditor may request from management and, when appropriate, those charged with governance for the purpose of the audit; and

[5]Paragraph .08*c* of section 230, *Audit Documentation*. [Footnote renumbered by the issuance of SAS No. 142, July 2020.]

iii. unrestricted access to persons within the entity from whom the auditor determines it necessary to obtain audit evidence.

.A3 The preparation and fair presentation of the financial statements by management and, when appropriate, those charged with governance require

- the identification of the applicable financial reporting framework, in the context of any relevant laws or regulations.
- the preparation and fair presentation of the financial statements in accordance with that framework.
- the inclusion of an adequate description of that framework in the financial statements.

The preparation and fair presentation of the financial statements require management to exercise judgment in making accounting estimates that are reasonable in the circumstances, as well as in selecting and applying appropriate accounting policies. These judgments are made in the context of the applicable financial reporting framework.

.A4 The auditor may make suggestions about the form or content of the financial statements, or assist management by preparing them, in whole or in part, based on information provided to the auditor by management during the performance of the audit.[a] However, the auditor's responsibility for the audited financial statements is confined to the expression of the auditor's opinion on them. [Revised, October 2013, to reflect conforming changes necessary due to the revision of Ethics Interpretation No. 101-3.]

.A5 The financial statements may be prepared in accordance with the following:

- A general purpose framework (a financial reporting framework designed to meet the common financial information needs of a wide range of users); or
- A special purpose framework (a financial reporting framework, other than generally accepted accounting principles, which is a cash, tax, regulatory, contractual basis of accounting, or other basis of accounting; an other basis of accounting uses a definite set of logical, reasonable criteria that is applied to all material items appearing in financial statements).

[Revised, July 2013, to reflect conforming changes necessary due to the issuance of SAS No. 127.]

---

[a] In January 2013, the Professional Ethics Executive Committee adopted a provision in the "Scope and Applicability of Nonattest Services" interpretation (ET sec. 1.295.010) under the "Independence Rule" (ET sec. 1.200.001) of the AICPA Code of Professional Conduct. This provision provides, among other things, that financial statement preparation is considered outside the scope of the attest engagement and, therefore, constitutes a nonattest service subject to the requirements of the "Nonattest Services" subtopic (ET sec. 1.295). The provision is effective for engagements covering periods beginning on or after December 15, 2014. [Footnote added, October 2013, to reflect conforming changes necessary due to the revision of Ethics Interpretation No. 101-3. Footnote revised, January 2015, to reflect conforming changes necessary due to the issuance of the revised AICPA Code of Professional Conduct, effective December 15, 2014.]

.A6 The applicable financial reporting framework often encompasses financial accounting standards promulgated by an authorized or recognized standards-setting organization, or legislative or regulatory requirements. In some cases, the financial reporting framework may encompass both financial accounting standards promulgated by an authorized or recognized standards-setting organization and legislative or regulatory requirements. Other sources may provide direction on the application of the applicable financial reporting framework. In some cases, the applicable financial reporting framework may encompass such other sources, or may even consist only of such sources. Such other sources may include the following:

- The legal and ethical environment, including statutes, regulations, court decisions, and professional ethical obligations regarding accounting matters;
- Published accounting interpretations of varying authority issued by standards-setting, professional, or regulatory organizations;
- Published views of varying authority on emerging accounting issues issued by standards-setting, professional, or regulatory organizations;
- General and industry practices widely recognized and prevalent; and
- Accounting literature.

When conflicts exist between the financial reporting framework and the sources from which direction on its application may be obtained, or among the sources that encompass the financial reporting framework, the source with the highest authority prevails.

.A7 The requirements of the applicable financial reporting framework determine the form and content of the financial statements. Although the framework may not specify how to account for or disclose all transactions or events, it ordinarily embodies sufficiently broad principles that can serve as a basis for developing and applying accounting policies that are consistent with the concepts underlying the requirements of the framework.

.A8 The financial accounting standards promulgated by organizations that are authorized or recognized to promulgate standards to be used by entities for preparing financial statements in accordance with a general purpose framework include Financial Accounting Standards Board (FASB) *Accounting Standards Codification*, issued by FASB; IFRSs, issued by the IASB; Statements of Federal Financial Accounting Standards, issued by the Federal Accounting Standards Advisory Board for U.S. federal government entities; and Statements of the Governmental Accounting Standards Board, issued by the Governmental Accounting Standards Board for U.S. state and local governmental entities.

.A9 The requirements of the applicable financial reporting framework also determine what constitutes a complete set of financial statements. In the case of many frameworks, financial statements are intended to provide information about the financial position, financial performance, and cash flows of an entity. For example, a complete set of financial statements might include a balance sheet, an income statement, a statement of changes in equity, a cash flow statement, and related notes. For some other financial reporting frameworks, a single financial statement and the related notes might constitute a complete set of financial statements. Examples of a single financial statement, each of which would include related notes, include the following:

- Balance sheet
- Statement of income or statement of operations
- Statement of retained earnings
- Statement of cash flows
- Statement of assets and liabilities
- Statement of changes in owners' equity
- Statement of revenue and expenses
- Statement of operations by product lines

.A10 Section 210A, *Terms of Engagement*, establishes requirements and provides guidance on determining the acceptability of the applicable financial reporting framework.[6] Section 800, *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks*, addresses engagements in which the auditor issues a report in connection with financial statements prepared in accordance with a special purpose framework.

.A11 Because of the significance of the premise to the conduct of an audit, the auditor is required to obtain the agreement of management and, when appropriate, those charged with governance, that they acknowledge and understand that they have the responsibilities set out in paragraph .A2 as a precondition for accepting the audit engagement.[7]

Considerations Specific to Audits of Governmental Entities

.A12 The requirements for audits of the financial statements of governmental entities may be broader than those of other entities. As a result, the premise, relating to management's responsibilities, on which an audit of the financial statements of a governmental entity is conducted, may include additional responsibilities, such as the responsibility for the execution of transactions and events in accordance with law, regulation, or other authority. (See paragraph .A66.)

.A13 In audits of governmental entities, auditors may have a responsibility under law, regulation, contract, or grant agreement to report to third parties, such as funding agencies or oversight bodies.

---

[6]Paragraph .06*a* of section 210A, *Terms of Engagement*. [Footnote renumbered by the issuance of SAS No. 142, July 2020.]

[7] Paragraph .06*b* of section 210A. [Footnote renumbered by the issuance of SAS No. 142, July 2020.]

Materiality (Ref: par. .07)

Considerations Specific to Audits of Governmental Entities

.A14 For most state or local governmental entities, the applicable financial reporting framework is based on multiple reporting units, and therefore requires the presentation of financial statements for its activities in various reporting units. Consequently, a reporting unit, or aggregation of reporting units, of the governmental entity represents an opinion unit to the auditor. Generally, the auditor expresses or disclaims an opinion on a government's financial statements as a whole by expressing an opinion or disclaiming an opinion on each opinion unit. In this context, the auditor is responsible for the detection of misstatements that are material to an opinion unit within a governmental entity, but is not responsible for the detection of misstatements that are not material to an opinion unit.

Definitions

Risk of Material Misstatement

.A15 For purposes of GAAS, a risk of material misstatement exists when

a. there is a reasonable possibility of a misstatement occurring (that is, its likelihood), and

b. if it were to occur, there is a reasonable possibility of the misstatement being material (that is, its magnitude).

[Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Ethical Requirements Relating to an Audit of Financial Statements (Ref: par. .16)

.A16 The auditor is subject to relevant ethical requirements relating to financial statement audit engagements. Ethical requirements consist of the AICPA Code of Professional Conduct together with rules of state boards of accountancy and applicable regulatory agencies that are more restrictive. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A17 The AICPA Code of Professional Conduct establishes the fundamental principles of professional ethics, which include the following:

- Responsibilities
- The public interest
- Integrity
- Objectivity and independence
- Due care

- Scope and nature of services

[Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A18 In the case of an audit engagement, it is in the public interest and, therefore, required by this section, that the auditor be independent of the entity subject to the audit. The concept of independence refers to both independence in fact and independence in appearance. The auditor's independence from the entity safeguards the auditor's ability to form an audit opinion without being affected by influences that might compromise that opinion. Independence enhances the auditor's ability to act with integrity, to be objective, and to maintain an attitude of professional skepticism. Independence implies an impartiality that recognizes an obligation to be fair not only to management and those charged with governance of an entity but also users of the financial statements who may rely upon the independent auditor's report. Guidance on threats to independence is set forth in the AICPA's "Conceptual Framework for Independence" (ET sec. 1.210.010). [Revised, January 2015, to reflect conforming changes necessary due to the issuance of the revised AICPA Code of Professional Conduct, effective December 15, 2014. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A19 When the auditor is not independent but is required by law or regulation to report on the financial statements, section 705, *Modifications to the Opinion in the Independent Auditor's Report*, applies. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A20 Due care requires the auditor to discharge professional responsibilities with competence and to have the appropriate capabilities to perform the audit and enable an appropriate auditor's report to be issued. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A21 QM section 10A, *A Firm's System of Quality Control*, sets out the firm's responsibilities to establish and maintain its system of quality control for audit engagements, and to establish policies and procedures designed to provide it with reasonable assurance that the firm and its personnel comply with relevant ethical requirements, including those pertaining to independence.[8] Section 220A, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, addresses the engagement partner's responsibilities regarding relevant ethical requirements. These include remaining alert for evidence of noncompliance with relevant ethical requirements by members of the engagement team, determining, in consultation with others in the firm as appropriate, the appropriate action if matters come to the engagement partner's attention, through the firm's system of quality control or otherwise, that indicate that members of the engagement team have not complied with relevant ethical requirements, and forming a conclusion on compliance with independence requirements that apply to the audit engagement.[9] Section 220A recognizes that the engagement team is entitled to rely on a firm's system of quality

[8] Paragraphs .21–.25 of QM section 10A, *A Firm's System of Quality Control*. [Footnote renumbered by the issuance of SAS No. 142, July 2020.]

[9] Paragraphs .11–.13 of section 220A, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*. [Footnote renumbered by the issuance of SAS No. 142, July 2020.]

control in meeting its responsibilities with respect to quality control procedures applicable to the individual audit engagement, unless the engagement partner determines that it is inappropriate to do so based on information provided by the firm or other parties. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

Considerations Specific to Audits of Governmental Entities

.A22 In addition to the AICPA Code of Professional Conduct and GAAS, *Government Auditing Standards*, which may be required by law, regulation, contract, or grant agreement in audits of governmental entities and entities that receive government awards, set forth relevant ethical principles and auditing standards, including standards on auditor independence, professional judgment, competence, and audit quality control and assurance. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

Professional Skepticism (Ref: par. .17)

.A23 Professional skepticism includes being alert to the following, for example,

- Audit evidence that contradicts other audit evidence obtained.
- Information that brings into question the reliability of documents and responses to inquiries to be used as audit evidence.
- Conditions that may indicate possible fraud.
- Circumstances that suggest the need for audit procedures in addition to those required by GAAS.

[Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A24 Maintaining professional skepticism throughout the audit is necessary if the auditor is, for example, to reduce the risks of

- overlooking unusual circumstances.
- over-generalizing when drawing conclusions from audit observations.
- using inappropriate assumptions in determining the nature, timing, and extent of the audit procedures and evaluating the results thereof.

[Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A25 Professional skepticism is necessary to the critical assessment of audit evidence. This includes questioning contradictory audit evidence and the reliability of documents and responses to inquiries and other information obtained from management and those charged with governance. It also includes consideration of the sufficiency and appropriateness of audit evidence obtained in light of the circumstances; for example, in the case when fraud risk factors exist and a single document, of a nature that is susceptible to fraud, is the sole supporting evidence for a material financial statement amount. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A26 The auditor may accept records and documents as genuine unless the auditor has reason to believe the contrary. Nevertheless, the auditor is required to consider the reliability of information to be used as audit evidence.[10] In cases of doubt about the reliability of information or indications of possible fraud (for example, if conditions identified during the audit cause the auditor to believe that a document may not be authentic or that terms in a document may have been falsified), GAAS require that the auditor investigate further and determine what modifications or additions to audit procedures are necessary to resolve the matter.[11] [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A27 The auditor neither assumes that management is dishonest nor assumes unquestioned honesty. The auditor cannot be expected to disregard past experience of the honesty and integrity of the entity's management and those charged with governance. Nevertheless, a belief that management and those charged with governance are honest and have integrity does not relieve the auditor of the need to maintain professional skepticism or allow the auditor to be satisfied with less than persuasive audit evidence when obtaining reasonable assurance. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A28 Unconscious or conscious auditor biases may affect the auditor's professional skepticism and professional judgment, including, for example, in the design and performance of audit procedures or the evaluation of audit evidence. Examples of unconscious auditor biases that may impede the maintenance of professional skepticism and, therefore, the reasonableness of the professional judgments made by the auditor in complying with the requirements of this section, may include the following:

- *Availability bias*, which is a tendency to place more weight on events or experiences that immediately come to mind or are readily available than on those that are not
- *Confirmation bias*, which is a tendency to place more weight on information that corroborates an existing belief than information that contradicts or casts doubt on that belief
- *Overconfidence bias*, which is a tendency to overestimate one's own ability to make accurate assessments of risk or other judgments or decisions
- *Anchoring bias*, which is a tendency to use an initial piece of information as an anchor against which subsequent information is inadequately assessed
- *Automation bias*, which is a tendency to favor output generated from automated systems, even when human reasoning or contradictory information raises questions about whether such output is reliable or fit for purpose

[Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Professional Judgment (Ref: par. .18)

.A29 Professional judgment is essential to the proper conduct of an audit. This is because interpretation of relevant ethical requirements and GAAS and the informed decisions required throughout the audit cannot be made without the application of relevant knowledge and experience to the facts and circumstances. In particular, professional judgment is necessary regarding decisions about the following:

- Materiality and audit risk
- The nature, timing, and extent of audit procedures used to meet the requirements of GAAS and gather audit evidence
- Evaluating whether sufficient appropriate audit evidence has been obtained, and whether more needs to be done to achieve the objectives of GAAS and thereby, the overall objectives of the auditor
- The evaluation of management's judgments in applying the entity's applicable financial reporting framework
- The drawing of conclusions based on the audit evidence obtained; for example, assessing the reasonableness of the estimates made by management in preparing the financial statements

[Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A30 The distinguishing feature of professional judgment expected of an auditor is that such judgment is exercised based on competencies necessary to achieve reasonable judgments, developed by the auditor through relevant training, knowledge, and experience. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A31 The exercise of professional judgment in any particular case is based on the facts and circumstances that are known by the auditor. Consultation on difficult or contentious matters during the course of the audit, both within the engagement team and between the engagement team and others at the appropriate level within or outside the firm, such as those required by section 220A, assists the auditor in making informed and reasonable judgments.[12] [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A32 Professional judgment can be evaluated based on whether the judgment reached reflects a competent application of auditing standards and accounting principles and is appropriate in light of, and consistent with, the facts and circumstances that were known to the auditor up to the date of the auditor's report. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

[12] Paragraph .20 of section 220A. [Footnote renumbered by the issuance of SAS No. 142, July 2020.]

.A33 Professional judgment needs to be exercised throughout the audit. It also needs to be appropriately documented. In this regard, the auditor is required to prepare audit documentation sufficient to enable an experienced auditor, having no previous connection with the audit, to understand the significant professional judgments made in reaching conclusions on significant findings or issues arising during the audit.[13] Professional judgment is not to be used as the justification for decisions that are not otherwise supported by the facts and circumstances of the engagement or by sufficient appropriate audit evidence. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Sufficient Appropriate Audit Evidence and Audit Risk (Ref: par. .19)

Sufficiency and Appropriateness of Audit Evidence

.A34 Audit evidence is necessary to support the auditor's opinion and report. It is cumulative in nature and is primarily obtained from audit procedures performed during the course of the audit. It may, however, also include information obtained from other sources such as previous audits (provided the auditor has determined whether changes have occurred since the previous audit that may affect its relevance to the current audit[14]) or a firm's quality control procedures for client acceptance and continuance. In addition to other sources inside and outside the entity, the entity's accounting records are an important source of audit evidence. Also, information that may be used as audit evidence may have been prepared by a specialist employed or engaged by the entity. Audit evidence comprises both information that supports and corroborates management's assertions and any information that contradicts such assertions. In addition, in some cases, the absence of information (for example, management's refusal to provide a requested representation) is used by the auditor, and, therefore, also constitutes audit evidence. Most of the auditor's work in forming the auditor's opinion consists of obtaining and evaluating audit evidence. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A35 The sufficiency and appropriateness of audit evidence are interrelated. *Sufficiency* is the measure of the quantity of audit evidence. The quantity of audit evidence needed is affected by the auditor's assessment of the risks of misstatement (the higher the assessed risks, the more audit evidence is likely to be required) and also by the quality of such audit evidence (the higher the quality, the less may be required). Obtaining more audit evidence, however, may not compensate for its poor quality. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A36 *Appropriateness* is the measure of the quality of audit evidence; that is, its relevance and its reliability in providing support for the conclusions on which the auditor's opinion is based. The reliability of evidence is influenced by its source and by its nature, and is dependent on the individual circumstances under which it is obtained.

---

[13] Paragraph .08 of section 230. [Footnote renumbered by the issuance of SAS No. 142, July 2020.]

[14] Paragraph .10 of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*. [Footnote renumbered by the issuance of SAS No. 142, July 2020.]

[Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A37 Whether sufficient appropriate audit evidence has been obtained to reduce audit risk to an acceptably low level, and thereby to enable the auditor to draw reasonable conclusions on which to base the auditor's opinion, is a matter of professional judgment. Section 500, *Audit Evidence*, and other relevant AU-C sections, establish additional requirements and provide further guidance applicable throughout the audit regarding the auditor's considerations in obtaining sufficient appropriate audit evidence. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Audit Risk

.A38 Audit risk is a function of the risks of material misstatement and detection risk. The assessment of risks is based on audit procedures to obtain information necessary for that purpose and evidence obtained throughout the audit. The assessment of risks is a matter of professional judgment, rather than a matter capable of precise measurement. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A39 For purposes of GAAS, audit risk does not include the risk that the auditor might express an opinion that the financial statements are materially misstated when they are not. This risk is ordinarily insignificant. Further, audit risk is a technical term related to the process of auditing; it does not refer to the auditor's business risks, such as loss from litigation, adverse publicity, or other events arising in connection with the audit of financial statements. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Risks of Material Misstatement

.A40 The risks of material misstatement exist at two levels:

- The overall financial statement level
- The assertion level for classes of transactions, account balances, and disclosures

[Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A41 Risks of material misstatement at the overall financial statement level refer to risks of material misstatement that relate pervasively to the financial statements as a whole and potentially affect many assertions. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A42 Risks of material misstatement at the assertion level are assessed in order to determine the nature, timing, and extent of further audit procedures necessary to obtain sufficient appropriate audit evidence. This evidence enables the auditor to express an opinion on the financial statements at an acceptably low level of audit risk. Auditors use various approaches to accomplish the objective of assessing the risks of material misstatement. For example, the auditor may make use of a model that expresses the general relationship of the components of audit risk in mathematical terms to arrive at an acceptable level of detection risk. Some auditors find such a model to be useful when planning audit procedures. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A43 The risks of material misstatement at the assertion level consist of two components: inherent risk and control risk. Inherent risk and control risk are the entity's risks; they exist independently of the audit of the financial statements. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A44 Inherent risk is influenced by inherent risk factors. Depending on the degree to which the inherent risk factors affect the susceptibility of an assertion to misstatement, the level of inherent risk varies on a scale that is referred to as the spectrum of inherent risk. The auditor determines significant classes of transactions, account balances, and disclosures, and their relevant assertions, as part of the process of identifying and assessing the risks of material misstatement. For example, account balances consisting of amounts derived from accounting estimates that are subject to significant estimation uncertainty may be identified as significant account balances, and the auditor's assessment of inherent risk for the related risks at the assertion level may be higher because of the high estimation uncertainty. External circumstances giving rise to business risks may also influence inherent risk. For example, technological developments might make a particular product obsolete, thereby causing inventory to be more susceptible to overstatement. Factors in the entity and its environment that relate to several or all of the classes of transactions, account balances, or disclosures may also influence the inherent risk related to a specific assertion. Such factors may include, for example, a lack of sufficient working capital to continue operations or a declining industry characterized by a large number of business failures. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A45 Control risk is a function of the effectiveness of the design, implementation, and maintenance of controls by management to address identified risks that threaten the achievement of the entity's objectives relevant to preparation and fair presentation of the entity's financial statements. However, internal control, no matter how well designed and operated, can only reduce, but not eliminate, risks of material misstatement in the financial statements, because of the inherent limitations of controls. These include, for example, the possibility of human errors or mistakes, or of controls being circumvented by collusion or inappropriate management override. Accordingly, some control risk will always exist. GAAS provide the conditions under which the auditor is required to, or may choose to, test the operating effectiveness of controls in determining the nature, timing, and extent of substantive procedures to be performed.[15] [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A46 The assessment of the risks of material misstatement may be expressed in quantitative terms, such as percentages or nonquantitative terms. In any case, the need for the auditor to make appropriate risk assessments is more important than the different approaches by which they may be made. GAAS typically refer to the risks of material misstatement, rather than inherent risk and control risk separately. However, SAS No. 145, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*,[16] requires inherent risk to be assessed separately from control risk to provide a basis for designing and performing further audit procedures to respond to the assessed risks of material misstatement, including significant risks, for accounting estimates at the relevant assertion level in accordance with section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.[17,18] [Paragraph renumbered by the issuance of SAS No. 142, July 2020. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 143. Paragraph subsequently renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A47 Risks of material misstatement are assessed at the assertion level in order to determine the nature, timing, and extent of further audit procedures necessary to obtain sufficient appropriate audit evidence.[19] [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A48 Section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, establishes requirements and provides guidance on identifying and assessing the risks of material misstatement at the financial statement and assertion levels. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Detection Risk

.A49 For a given level of audit risk, the acceptable level of detection risk bears an inverse relationship to the assessed risks of material misstatement at the assertion level. For example, the greater the risks of material misstatement the auditor believes exists, the less the detection risk that can be accepted and, accordingly, the more persuasive the audit evidence required by the auditor. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

---

[15] Paragraph .08 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*. [Footnote renumbered by the issuance of SAS No. 142, July 2020.]

[16][Footnote deleted by the issuance of SAS No. 145, October 2021.]

[17]Paragraph .07*b* of section 330. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 143.]

[18]Paragraphs A227–A239 of SAS No. 145, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, address assessing risk, and paragraphs A248–A252 of SAS No. 145 address assessing control risk. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

[19]Paragraph .06 of AU-C section 330. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A50 Detection risk relates to the nature, timing, and extent of the auditor's procedures that are determined by the auditor to reduce audit risk to an acceptably low level. It is therefore a function of the effectiveness of an audit procedure and of its application by the auditor. The following matters assist to enhance the effectiveness of an audit procedure and of its application and reduce the possibility that an auditor might select an inappropriate audit procedure, misapply an appropriate audit procedure, or misinterpret the audit results:

- Adequate planning
- Proper assignment of personnel to the engagement team
- The application of professional skepticism
- Supervision and review of the audit work performed

[Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A51 Section 300, *Planning an Audit*, and section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, establish requirements and provide guidance on planning an audit of financial statements and the auditor's responses to assessed risks. Detection risk, however, can only be reduced, not eliminated, because of the inherent limitations of an audit. Accordingly, some detection risk will always exist. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Inherent Limitations of an Audit

.A52 The auditor is not expected to, and cannot, reduce audit risk to zero and cannot, therefore, obtain absolute assurance that the financial statements are free from material misstatement due to fraud or error. This is because inherent limitations of an audit exist, which result in most of the audit evidence on which the auditor draws conclusions and bases the auditor's opinion being persuasive rather than conclusive. The principal inherent limitations of an audit arise from

- the nature of financial reporting;
- the nature of audit procedures; and
- the need for the audit to be conducted within a reasonable period of time and so as to achieve a balance between benefit and cost.

[Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

The Nature of Financial Reporting

.A53 The preparation and fair presentation of financial statements involves judgment by management in applying the requirements of the entity's applicable financial reporting framework to the facts and circumstances of the entity. In addition, many financial statement items involve subjective decisions or assessments or a degree of uncertainty, and a range exists of acceptable interpretations or judgments that may be made. Consequently, some financial statement items are subject to an inherent level of variability that cannot be eliminated by the application of additional auditing procedures. For example, this is often the case with respect to certain accounting estimates that are dependent on predictions of future events. Nevertheless, GAAS require the auditor to give specific consideration to whether accounting estimates are reasonable in the context of the applicable financial reporting framework and to related disclosures, and to the qualitative aspects of the entity's accounting practices, including indicators of possible bias in management's judgments.[20] [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

The Nature of Audit Procedures

.A54 There are practical and legal limitations on the auditor's ability to obtain audit evidence. For example:

- There is the possibility that management or others may not provide, intentionally or unintentionally, the complete information that is relevant to the preparation and fair presentation of the financial statements or that has been requested by the auditor. Accordingly, the auditor cannot be certain of the completeness of information, even though the auditor has performed audit procedures to obtain assurance that all relevant information has been obtained.
- Fraud may involve sophisticated and carefully organized schemes designed to conceal it. Therefore, audit procedures used to gather audit evidence may be ineffective for detecting an intentional misstatement that involves, for example, collusion to falsify documentation that may cause the auditor to believe that audit evidence is valid when it is not. The auditor is neither trained as nor expected to be an expert in the authentication of documents.
- An audit is not an official investigation into alleged wrongdoing. Accordingly, the auditor is not given specific legal powers, such as the power of search, which may be necessary for such an investigation.

[Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Timeliness of Financial Reporting and the Balance Between Benefit and Cost

.A55 The matter of difficulty, time, or cost involved is not in itself a valid basis for the auditor to omit an audit procedure for which there is no alternative or to be satisfied

---

[20]See section 540, *Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures*, and section 700, *Forming an Opinion and Reporting on Financial Statements*, or section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136. Footnote renumbered by the issuance of SAS No. 142, July 2020. Footnote subsequently renumbered by the issuance of SAS No. 143, July 2020. Footnote subsequently renumbered by the issuance of SAS No. 145, October 2021.]

with audit evidence that is less than persuasive. Appropriate planning assists in making sufficient time and resources available for the conduct of the audit. Notwithstanding this, the relevance of information, and thereby its value, tends to diminish over time, and there is a balance to be struck between the reliability of information and its cost. This is recognized in certain financial reporting frameworks (see, for example, FASB's Statements of Financial Accounting Concepts). Therefore, there is an expectation by users of financial statements that the auditor will form an opinion on the financial statements within a reasonable period of time and so as to achieve a balance between benefit and cost, recognizing that it is impracticable to address all information that may exist or to pursue every matter exhaustively on the assumption that information is fraudulent or erroneous until proved otherwise. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A56 Consequently, it is necessary for the auditor to

- plan the audit so that it will be performed in an effective manner;
- direct audit effort to areas most expected to contain risks of material misstatement, whether due to fraud or error, with correspondingly less effort directed at other areas; and
- use testing and other means of examining populations for misstatements.

[Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A57 In light of the approaches described in paragraph .A56, GAAS contain requirements for the planning and performance of the audit and requires the auditor, among other things, to

- have a basis for the identification and assessment of risks of material misstatement at the financial statement and assertion levels by performing risk assessment procedures and related activities;[21] and
- use testing and other means of examining populations in a manner that provides a reasonable basis for the auditor to draw conclusions about the population.[22]

[Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

[21] See section 315. [Footnote renumbered by the issuance of SAS No. 142, July 2020. Footnote subsequently renumbered by the issuance of SAS No. 143, July 2020. Footnote subsequently renumbered by the issuance of SAS No. 145, October 2021.]

[22] See section 330, section 500, section 520, *Analytical Procedures*, and section 530, *Audit Sampling*. [Footnote renumbered by the issuance of SAS No. 142, July 2020. Footnote subsequently renumbered by the issuance of SAS No. 143, July 2020. Footnote subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Other Matters That Affect the Inherent Limitations of an Audit

.A58 In the case of certain assertions or subject matters, the potential effects of the inherent limitations on the auditor's ability to detect material misstatements are particularly significant. Such assertions or subject matters include the following:

- Fraud, particularly fraud involving senior management or collusion. See section 240, *Consideration of Fraud in a Financial Statement Audit*, for further discussion.
- The existence and completeness of related party relationships and transactions. See section 550, *Related Parties*, for further discussion.
- The occurrence of noncompliance with laws and regulations. See section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*, for further discussion.
- Future events or conditions that may cause an entity to cease to continue as a going concern. See section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.

Relevant AU-C sections identify specific audit procedures to assist in lessening the effect of the inherent limitations. [Revised, August 2012, to reflect conforming changes necessary due to the issuance of SAS No. 126. Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A59 Because of the inherent limitations of an audit, there is an unavoidable risk that some material misstatements of the financial statements may not be detected, even though the audit is properly planned and performed in accordance with GAAS. Accordingly, the subsequent discovery of a material misstatement of the financial statements resulting from fraud or error does not by itself indicate a failure to conduct an audit in accordance with GAAS. However, the inherent limitations of an audit are not a justification for the auditor to be satisfied with less than persuasive audit evidence. Whether the auditor has performed an audit in accordance with GAAS is determined by the audit procedures performed in the circumstances, the sufficiency and appropriateness of the audit evidence obtained as a result thereof, and the suitability of the auditor's report based on an evaluation of that evidence in light of the overall objectives of the auditor. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Conduct of an Audit in Accordance With GAAS

Nature of GAAS (Ref: par. .20)

.A60 The "Compliance With Standards Rule" (ET sec. 1.310.001) of the AICPA Code of Professional Conduct requires an AICPA member who performs an audit to comply with standards promulgated by the Auditing Standards Board (ASB). The ASB develops and issues standards in the form of SASs through a process that includes deliberation in meetings open to the public, public exposure of proposed SASs, and a formal vote. The

SASs are codified in AU-C sections. [Revised, January 2015, to reflect conforming changes necessary due to the issuance of the revised AICPA Code of Professional Conduct, effective December 15, 2014. Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A61 GAAS provide the standards for the auditor's work in fulfilling the overall objectives of the auditor. GAAS address the general responsibilities of the auditor, as well as the auditor's further considerations relevant to the application of those responsibilities to specific topics. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A62 The scope, effective date, and any specific limitation of the applicability of a specific AU-C section are made clear in the AU-C section. Unless otherwise stated in the AU-C section, the auditor is permitted to apply an AU-C section before the effective date specified therein. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A63 In certain audit engagements, the auditor also may be required to comply with other auditing requirements in addition to GAAS. GAAS do not override law or regulation that governs an audit of financial statements. In the event that such law or regulation differs from GAAS, an audit conducted only in accordance with law or regulation will not necessarily comply with GAAS. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A64 The auditor may also conduct the audit in accordance with both GAAS and

- auditing standards promulgated by the Public Company Accounting Oversight Board,
- International Standards on Auditing,
- *Government Auditing Standards*, or
- auditing standards of a specific jurisdiction or country.

In such cases, in addition to complying with each of the AU-C sections relevant to the audit, it may be necessary for the auditor to perform additional audit procedures in order to comply with the other auditing standards. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Considerations Specific to Audits of Governmental Entities

.A65 GAAS are relevant to financial statement audits of governmental entities. The auditor's responsibilities, however, may be affected by law, regulation, or other authority (such as government policy requirements or resolutions of the legislature), which may encompass a broader scope than an audit of financial statements in accordance with GAAS. These additional responsibilities are not addressed in GAAS. *Government Auditing Standards* are relevant for engagements to audit U.S. government entities, and when required by law, regulation, contract, or grant agreement. The appendix to *Government Auditing Standards* includes a listing of some of the laws, regulations, and guidelines that require use of *Government Auditing Standards*. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Contents of GAAS (Ref: par. .21)

.A66 In addition to objectives and requirements, an AU-C section contains related guidance in the form of application and other explanatory material. It may also contain introductory material that provides context relevant to a proper understanding of the AU-C section and definitions. The entire text of an AU-C section, therefore, is relevant to an understanding of the objectives stated in an AU-C section and the proper application of the requirements of an AU-C section. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A67 When necessary, the application and other explanatory material provides further explanation of the requirements of an AU-C section and guidance for carrying them out. In particular, it may

- explain more precisely what a requirement means or is intended to cover, including, in some AU-C sections, such as section 315 [SAS No. 145], why a procedure is required.
- include examples of procedures that may be appropriate in the circumstances.

Although such guidance does not in itself impose a requirement, it is relevant to the proper application of the requirements of an AU-C section. The auditor is required by paragraph .21 to understand the application and other explanatory material; how the auditor applies the guidance in the engagement depends on the exercise of professional judgment in the circumstances consistent with the objective of the AU-C section. The words "may," "might," and "could" are used to describe these actions and procedures. The application and other explanatory material may also provide background information on matters addressed in an AU-C section. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered and amended, effective for audits of financial statements for peri-ods ending on or after December 15, 2023, by SAS No. 145.]

.A68 Appendixes form part of the application and other explanatory material. The purpose and intended use of an appendix are explained in the body of the related AU-C section or within the title and introduction of the appendix itself. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A69 Introductory material may include, as needed, such matters as explanation of the following:

- The purpose and scope of the AU-C section, including how the AU-C section relates to other AU-C sections.

- The subject matter of the AU-C section.
- The respective responsibilities of the auditor and others regarding the subject matter of the AU-C section.
- The context in which the AU-C section is set.

[Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A70 An AU-C section may include, in a separate section under the heading "Definitions," a description of the meanings attributed to certain terms for purposes of GAAS. These are provided to assist in the consistent application and interpretation of GAAS, and are not intended to override definitions that may be established for other purposes, whether in law, regulation, or otherwise. Unless otherwise indicated, those terms will carry the same meanings throughout GAAS. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A71 When appropriate, additional considerations specific to audits of smaller, less complex entities and governmental entities are included within the application and other explanatory material of an AU-C section. These additional considerations assist in the application of the requirements of GAAS in the audit of such entities. They do not, however, limit or reduce the responsibility of the auditor to apply and comply with the requirements of GAAS. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Scalability Considerations

.A72 Scalability considerations have been included in some AU-C sections (for example, section 315 [SAS No. 145]) to illustrate the application of the requirements to all entities, regardless of whether their nature and circumstances are less complex or more complex. Less complex entities are entities for which the characteristics in paragraph .A77 apply. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A73 For purposes of specifying additional considerations to audits of smaller, less complex entities, a *smaller, less complex entity* refers to an entity that typically possesses qualitative characteristics, such as the following:

a. Concentration of ownership and management in a small number of individuals; and
b. One or more of the following:
    i. Straightforward or uncomplicated transactions
    ii. Simple record keeping
    iii. Few lines of business and few products within business lines
    iv. Simpler systems of internal controls

v. Few levels of management with responsibility for a broad range of controls

vi. Few personnel, many having a wide range of duties

These qualitative characteristics are not exhaustive, they are not exclusive to smaller, less complex entities, and smaller, less complex entities do not necessarily display all of these characteristics. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Considerations Specific to Automated Tools and Techniques

.A74 The considerations specific to "automated tools and techniques" included in some AU-C sections (for example, section 315 [SAS No. 145]) have been developed to explain how the auditor may apply certain requirements when using automated tools and techniques in performing audit procedures. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A75 GAAS refer to the proprietor of a smaller entity who is involved in running the entity on a day-to-day basis as the *owner-manager*. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Considerations Specific to Governmental Entities

.A76 Considerations specific to governmental entities may also be applicable to nongovernmental entities that receive government awards. In audits of governmental entities, the considerations specific to audits of smaller, less complex entities may not apply, even if the governmental entity has few employees, simple operations, or a relatively small budget, because small governmental entities (1) may have complex transactions with federal and state governments, (2) are required to comply with laws, regulations, policies, and systems determined by a higher level of government, and (3) are subject to additional public expectations of accountability and transparency. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Objectives Stated in Individual AU-C Sections (Ref: par. .23)

.A77 Each AU-C section contains one or more objectives that provide a link between the requirements and the overall objectives of the auditor. The objectives in individual AU-C sections serve to focus the auditor on the desired outcome of the AU-C section, while being specific enough to assist the auditor in

- understanding what needs to be accomplished and, when necessary, the appropriate means of doing so; and
- deciding whether more needs to be done to achieve the objectives in the particular circumstances of the audit.

[Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A78 Objectives are to be understood in the context of the overall objectives of the auditor stated in paragraph .12. As with the overall objectives of the auditor, the ability to achieve an individual objective is equally subject to the inherent limitations of an audit. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A79 In using the objectives, the auditor is required to consider the interrelationships among the AU-C sections. This is because, as indicated in paragraph .A61, the AU-C sections in some cases address general responsibilities and in others address the application of those responsibilities to specific topics. For example, this section requires the auditor to adopt an attitude of professional skepticism; this is necessary in all aspects of planning and performing an audit but is not repeated as a requirement of each AU-C section. At a more detailed level, section 315 and section 330 contain, among other things, objectives and requirements that address the auditor's responsibilities to identify and assess the risks of material misstatement and to design and perform further audit procedures to respond to those assessed risks, respectively; these objectives and requirements apply throughout the audit. An AU-C section addressing specific aspects of the audit may expand on how the objectives and requirements of other AU-C sections are to be applied regarding the subject of that AU-C section, but does not repeat those objectives and requirements. For example, section 540, *Auditing Accounting Estimates, Including Fair Value Accounting Estimates and Related Disclosures*, expands on how the objectives and requirements of section 315 and section 330 are to be applied regarding the subject of section 540, but section 540 does not repeat those objectives and requirements. Thus, in achieving the objective stated in section 540, the auditor considers the objectives and requirements of other relevant AU-C sections. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

*Use of Objectives to Determine Need for Additional Audit Procedures (Ref: par. .23*a*)*

.A80 The requirements of GAAS are designed to enable the auditor to achieve the objectives specified in GAAS, and thereby the overall objectives of the auditor. The proper application of the requirements of GAAS by the auditor is therefore expected to provide a sufficient basis for the auditor's achievement of the objectives. However, because the circumstances of audit engagements vary widely and all such circumstances cannot be anticipated in GAAS, the auditor is responsible for determining the audit procedures necessary to fulfill the requirements of GAAS and to achieve the objectives. In the circumstances of an engagement, there may be particular matters that require the auditor to perform audit procedures in addition to those required by GAAS to meet the objectives specified in GAAS. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

*Use of Objectives to Evaluate Whether Sufficient Appropriate Audit Evidence Has Been Obtained (Ref: par. .23*b*)*

.A81 The auditor is required by paragraph .23*b* to use the objectives stated in the relevant AU-C sections to evaluate whether sufficient appropriate audit evidence has been obtained in the context of the overall objectives of the auditor. If, as a result, the auditor concludes that sufficient appropriate audit evidence has not been obtained, then the auditor may follow one or more of the following approaches to meeting the requirement of paragraph .23*b*:

- Evaluate whether further relevant audit evidence has been, or will be, obtained as a result of complying with other AU-C sections, in particular, section 330
- Extend the work performed in applying one or more requirements
- Perform other procedures judged by the auditor to be necessary in the circumstances

When none of the preceding is expected to be practical or possible in the circumstances, the auditor will not be able to obtain sufficient appropriate audit evidence and is required by GAAS to determine the effect on the auditor's report or on the auditor's ability to complete the engagement. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Complying With Relevant Requirements

Relevant Requirements (Ref: par. .24)

.A82 In some cases, an AU-C section (and therefore all of its requirements) may not be relevant in the circumstances. For example, if an entity does not have an internal audit function, nothing in section 610, *Using the Work of Internal Auditors*, is relevant. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2014, by SAS No. 128. Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A83 Within a relevant AU-C section, there may be conditional requirements. Such a requirement is relevant when the circumstances envisioned in the requirement apply and the condition exists. In general, the conditionality of a requirement will either be explicit or implicit, for example:

- The requirement to modify the auditor's opinion if there is a limitation of scope[23] represents an explicit conditional requirement.
- The requirement to communicate significant deficiencies and material weaknesses in internal control identified during the audit to management and those charged with governance,[24] which depends on the existence and identification of such deficiencies, represents an implicit conditional requirement.

In some cases, a requirement may be expressed as being conditional on applicable law or regulation. For example, the auditor may be required to withdraw from the audit

[23]See section 705, *Modifications to the Opinion in the Independent Auditor's Report*. [Footnote renumbered by the issuance of SAS No. 142, July 2020. Footnote subsequently renumbered by the issuance of SAS No. 143, July 2020. Footnote subsequently renumbered by the issuance of SAS No. 145, October 2021.]

engagement, when withdrawal is possible under applicable law or regulation, or the auditor may be required to perform a certain action, unless prohibited by law or regulation. Depending on the jurisdiction, the legal or regulatory permission or prohibition may be explicit or implicit. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Presumptively Mandatory Requirements (Ref: par. .25)

.A84 If an AU-C section provides that a procedure or action is one that the auditor *should consider*, consideration of the procedure or action is presumptively required. Whether the auditor performs the procedure or action is based upon the outcome of the auditor's consideration and the auditor's professional judgment. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Departure From a Requirement (Ref: par. .26)

.A85 Section 230 establishes documentation requirements in those exceptional circumstances when the auditor departs from a relevant requirement.[25] GAAS do not call for compliance with a requirement that is not relevant in the circumstances of the audit. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Interpretive Publications (Ref: par. .27)

.A86 Interpretive publications are not auditing standards. *Interpretive publications* are recommendations on the application of GAAS in specific circumstances, including engagements for entities in specialized industries. An interpretive publication is issued under the authority of the ASB after all ASB members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with GAAS. Auditing interpretations of GAAS are included in AU-C sections. AICPA Audit and Accounting Guides and auditing SOPs are listed in AU-C appendix D, *AICPA Audit and Accounting Guides and Statements of Position*. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Other Auditing Publications (Ref: par. .28)

.A87 Other auditing publications have no authoritative status; however, they may help the auditor understand and apply GAAS. The auditor is not expected to be aware of the full body of other auditing publications. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

---

[24]Paragraph .11 of section 265. [Footnote renumbered by the issuance of SAS No. 142, July 2020. Footnote subsequently renumbered by the issuance of SAS No. 143, July 2020. Footnote subsequently renumbered by the issuance of SAS No. 145, October 2021.]

[25]Paragraph .13 of section 230. [Footnote renumbered by the issuance of SAS No. 142, July 2020. Footnote subsequently renumbered by the issuance of SAS No. 143, July 2020. Footnote subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A88 Although the auditor determines the relevance of these publications in accordance with paragraph .28, the auditor may presume that other auditing publications published by the AICPA that have been reviewed by the AICPA Audit and Attest Standards staff are appropriate. These other auditing publications are listed in AU-C appendix F, *Other Auditing Publications*. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A89 In determining whether an other auditing publication that has not been reviewed by the AICPA Audit and Attest Standards staff is appropriate to the circumstances of the audit, the auditor may consider the degree to which the publication is recognized as being helpful in understanding and applying GAAS and the degree to which the publisher or author is recognized as an authority in auditing matters. [Revised, February 2017, to better reflect the AICPA Council Resolution designating the PCAOB to promulgate technical standards. Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Failure to Achieve an Objective (Ref: par. .29)

.A90 Whether an objective has been achieved is a matter for the auditor's professional judgment. That judgment takes account of the results of audit procedures performed in complying with the requirements of GAAS, and the auditor's evaluation of whether sufficient appropriate audit evidence has been obtained and whether more needs to be done in the particular circumstances of the audit to achieve the objectives stated in GAAS. Accordingly, circumstances that may give rise to a failure to achieve an objective include those that

- prevent the auditor from complying with the relevant requirements of an AU-C section.
- result in it not being practicable or possible for the auditor to carry out the additional audit procedures or obtain further audit evidence as determined necessary from the use of the objectives in accordance with paragraph .23; for example, due to a limitation in the available audit evidence.

[Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A91 Audit documentation that meets the requirements of section 230 and the specific documentation requirements of other relevant AU-C sections provides evidence of the auditor's basis for a conclusion about the achievement of the overall objectives of the auditor. Although it is unnecessary for the auditor to document separately (as in a checklist, for example) that individual objectives have been achieved, the documentation of a failure to achieve an objective assists the auditor's evaluation of whether such a failure has prevented the auditor from achieving the overall objectives of the auditor. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

AU-C Section 210

Terms of Engagement

Source: SAS No. 122; SAS No. 134; SAS No. 135; SAS No. 137; SAS No. 138; SAS No. 145; SAS No. 147.

Effective for audits of financial statements for periods ending on or after December 15, 2012, unless otherwise indicated.

Note
In June 2022, the ASB issued SAS No. 146, *Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, which contains amendments to this section.

The amendments are effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025, and can be viewed in the appendix of section 220 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibilities in agreeing upon the terms of the audit engagement with management and, when appropriate, those charged with governance. This includes establishing that certain preconditions for an audit, for which management and, when appropriate, those charged with governance are responsible, are present. Section 220A, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, addresses those aspects of engagement acceptance that are within the control of the auditor. (Ref: par. .A1)

Effective Date

.02 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objective

.03 The objective of the auditor is to accept an audit engagement for a new or existing audit client only when the basis upon which it is to be performed has been agreed upon through

a. establishing whether the preconditions for an audit are present and

b. confirming that a common understanding of the terms of the audit engagement exists between the auditor and management and, when appropriate, those charged with governance.

Definitions

.04 For purposes of generally accepted auditing standards (GAAS), the following terms have the meanings attributed as follows:

Preconditions for an audit. The use by management of an acceptable financial reporting framework in the preparation and fair presentation of the financial statements and the agreement of management and, when appropriate, those charged with governance, to the premise[1] on which an audit is conducted.

Recurring audit. An audit engagement for an existing audit client for whom the auditor performed the preceding audit.

.05 For purposes of this section, references to *management* are to be read hereafter as "management and, when appropriate, those charged with governance" unless the context suggests otherwise.

Requirements

Preconditions for an Audit

.06 In order to establish whether the preconditions for an audit are present, the auditor should

a. determine whether the financial reporting framework to be applied in the preparation of the financial statements is acceptable and (Ref: par. .A2–.A8)

b. obtain the agreement of management that it acknowledges and understands its responsibility (Ref: par. .A9–.A12 and .A18)

   i. for the preparation and fair presentation of the financial statements in accordance with the applicable financial reporting framework; (Ref: par. .A13)

   ii. for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are

[1] Paragraphs .05 and .A2 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

free from material misstatement, whether due to fraud or error; and (Ref: par. .A14–.A16)

iii. to provide the auditor with

1. access to all information of which management is aware that is relevant to the preparation and fair presentation of the financial statements, such as records, documentation, and other matters;

2. additional information that the auditor may request from management for the purpose of the audit; and (Ref: par. .A17)

3. unrestricted access to persons within the entity from whom the auditor determines it necessary to obtain audit evidence.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 137.]

Management-Imposed Limitation on Scope Prior to Audit Engagement Acceptance That Would Result in a Disclaimer of Opinion

.07 If management or those charged with governance of an entity that is not required by law or regulation to have an audit impose a limitation on the scope of the auditor's work in the terms of a proposed audit engagement, such that the auditor believes the limitation will result in the auditor disclaiming an opinion on the financial statements as a whole, the auditor should not accept such a limited engagement as an audit engagement. If management or those charged with governance of an entity that is required by law or regulation to have an audit imposes such a scope limitation and a disclaimer of opinion is acceptable under the applicable law or to the regulator, the auditor is permitted, but not required, to accept the engagement. (Ref: par. .A19–.A20)

Other Factors Affecting Audit Engagement Acceptance

.08 If the preconditions for an audit are not present, the auditor should discuss the matter with management. Unless the auditor is required by law or regulation to do so, the auditor should not accept the proposed audit engagement

a. if the auditor has determined that the financial reporting framework to be applied in the preparation of the financial statements is unacceptable or

b. if the agreement referred to in paragraph .06*b* has not been obtained.

Agreement on Audit Engagement Terms

.09 The auditor should agree upon the terms of the audit engagement with management or those charged with governance, as appropriate. (Ref: par. .A21–.A22)

.10 The agreed-upon terms of the audit engagement should be documented in an audit engagement letter or other suitable form of written agreement and should include the following: (Ref: par. .A23–.A28)

a. The objective and scope of the audit of the financial statements

b. The responsibilities of the auditor

c. The responsibilities of management

d. A statement that because of the inherent limitations of an audit, together with the inherent limitations of internal control, an unavoidable risk exists that some material misstatements may not be detected, even though the audit is properly planned and performed in accordance with GAAS

e. Identification of the applicable financial reporting framework for the preparation of the financial statements

f. Reference to the expected form and content of any reports to be issued by the auditor and a statement that circumstances may arise in which a report may differ from its expected form and content (Ref: par. .A25)

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Initial Audits, Including Reaudit Engagements — Communications With the Predecessor Auditor

.11 Before accepting an engagement for an initial audit, including a reaudit engagement, when a predecessor auditor exists, the auditor should request management to authorize the predecessor auditor to respond fully to the auditor's inquiries regarding matters that will assist the auditor in determining whether to accept the engagement and (Ref: par. .A29 and .A37)

- if management authorizes the predecessor auditor to respond to the auditor's inquiries, perform the procedures required in paragraph .12.
- if management refuses to authorize the predecessor auditor to respond, or limits the response, the auditor should inquire about the reasons and consider the implications of that refusal or limitation in deciding whether to accept the engagement.

[As amended, effective for audits of financial statements for periods beginning on or after June 30, 2023, by SAS No. 147.]

.12 If, pursuant to paragraph .11, management authorizes the predecessor auditor to respond to the auditor's inquiries, the auditor should inquire of the predecessor auditor about matters that will assist the auditor in determining whether to accept the engagement, including (Ref: par. .A30–.A33)

a. identified or suspected fraud involving

    i. management,

    ii. employees who have significant roles in internal control, or

iii. others, when the fraud resulted in a material misstatement in the financial statements.

b. matters involving noncompliance or suspected noncompliance with laws and regulations that came to the predecessor auditor's attention during the audit, other than when matters are clearly inconsequential.

[Paragraph added, effective for audits of financial statements for periods beginning on or after June 30, 2023, by SAS No. 147.]

.13 The AICPA Code of Professional Conduct states that members have a responsibility to cooperate with each other.[2] Accordingly, if pursuant to paragraph .11, management authorizes the predecessor auditor to respond to the auditor's inquiries regarding matters that will assist the auditor in determining whether to accept the engagement, the predecessor auditor has a responsibility to respond to the auditor's inquiries on a timely basis and on the basis of known facts, absent unusual circumstances and unless prohibited by applicable law. However, if the predecessor auditor decides, due to impending, threatened, or potential litigation; disciplinary proceedings; or other unusual circumstances, not to fully respond to the auditor's inquiries, the predecessor auditor should clearly state that the response is limited. Such unusual circumstances are expected to be rare. (Ref: par. .A34–.A35) [Paragraph added, effective for audits of financial statements for periods beginning on or after June 30, 2023, by SAS No. 147.]

.14 The auditor should evaluate the predecessor auditor's response, or consider the implications if the predecessor auditor provides no response or a limited response, in determining whether to accept the engagement. (Ref: par. .A36) [Paragraph renumbered by the issuance of SAS No. 147, June 2022.]

.15 When the engagement is accepted, the auditor should document

a. the inquiries of the predecessor auditor and

b. the results of those inquiries.

[Paragraph added, effective for audits of financial statements for periods beginning on or after June 30, 2023, by SAS No. 147.]

Recurring Audits

.16 On recurring audits, the auditor should assess whether circumstances require the terms of the audit engagement to be revised. If the auditor concludes that the terms of the preceding engagement need not be revised for the current engagement, the auditor should remind management of the terms of the engagement, and the reminder should be documented. (Ref: par. .A38–.A39) [Paragraph renumbered by the issuance of SAS No. 147, June 2022.]

---

[2] Paragraph .02 of ET section 0.300.020. [Footnote added, effective for audits of financial statements for periods beginning on or after June 30, 2023, by SAS No. 147.]

Acceptance of a Change in the Terms of the Audit Engagement

.17 The auditor should not agree to a change in the terms of the audit engagement when no reasonable justification for doing so exists. (Ref: par. .A40–.A42) [Paragraph renumbered by the issuance of SAS No. 147, June 2022.]

.18 If, prior to completing the audit engagement, the auditor is requested to change the audit engagement to an engagement for which the auditor obtains a lower level of assurance, the auditor should determine whether reasonable justification for doing so exists. (Ref: par. .A43–.A44) [Paragraph renumbered by the issuance of SAS No. 147, June 2022.]

.19 If the terms of the audit engagement are changed, the auditor and management should agree on and document the new terms of the engagement in an engagement letter or other suitable form of written agreement. [Paragraph renumbered by the issuance of SAS No. 147, June 2022.]

.20 If the auditor concludes that no reasonable justification for a change of the terms of the audit engagement exists and is not permitted by management to continue the original audit engagement, the auditor should

a. withdraw from the audit engagement when possible under applicable law or regulation,

b. communicate the circumstances to those charged with governance, and

c. determine whether any obligation, either legal, contractual, or otherwise, exists to report the circumstances to other parties, such as owners, or regulators.

[Paragraph renumbered by the issuance of SAS No. 147, June 2022.]

Additional Considerations in Engagement Acceptance

Auditor's Report Prescribed by Law or Regulation

.21 If law or regulation prescribes a specific layout, form, or wording of the auditor's report that significantly differs from the requirements of GAAS, the auditor should evaluate

a. whether users might misunderstand the auditor's report and, if so,

b. whether the auditor would be permitted to reword the prescribed form to be in accordance with the requirements of GAAS or attach a separate report.[3]

If the auditor determines that rewording the prescribed form or attaching a separate report would not be permitted or would not mitigate the risk of users misunderstanding the auditor's report, the auditor should not accept the audit engagement unless the auditor is required by law or regulation to do so. An audit performed in accordance with such law

[3] Paragraphs .22–.23 of section 800, *Special Considerations — Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks*. [Footnote renumbered by the issuance of SAS No. 147, June 2022.]

or regulation does not comply with GAAS. Accordingly, for such an audit, the auditor should not include any reference to the audit having been performed in accordance with GAAS within the auditor's report.[4] (Ref: par. .A45–.A46) [Paragraph renumbered by the issuance of SAS No. 147, June 2022.]

Application and Other Explanatory Material

Scope of This Section (Ref: par. .01)

.A1 The auditor's responsibilities regarding relevant ethical requirements in the context of the acceptance of an audit engagement, insofar as they are within the control of the auditor, are addressed in section 220A. This section addresses those matters (or preconditions) that are within the control of the entity and upon which it is necessary for the auditor and the entity's management to agree.

Preconditions for an Audit

The Financial Reporting Framework (Ref: par. .06a)

.A2 An applicable financial reporting framework provides the criteria for management to present the financial statements of an entity, including the fair presentation of those financial statements. The criteria used by the auditor to evaluate or measure the subject matter, including, when relevant, a basis for presentation and disclosure, are also provided by the financial reporting framework. These criteria enable reasonably consistent evaluation or measurement of a subject matter within the context of professional judgment.

.A3 Without an acceptable financial reporting framework, management does not have an appropriate basis for the preparation of the financial statements, and the auditor does not have suitable criteria for auditing the financial statements. In many cases, the auditor may presume that the applicable financial reporting framework is acceptable, as described in paragraphs .A6–.A8.

Determining the Acceptability of the Financial Reporting Framework

.A4 Factors that are relevant to the auditor's determination of the acceptability of the financial reporting framework to be applied in the preparation of the financial statements include the following:

- The nature of the entity (for example, whether it is a business enterprise, a governmental entity, or a not-for-profit organization)
- The purpose of the financial statements (for example, whether they are prepared to meet the common financial information needs of a wide range of users)
- The nature of the financial statements (for example, whether the financial statements are a complete set of financial statements or a single financial statement)

[4] Paragraph .22 of section 800. [Footnote renumbered by the issuance of SAS No. 147, June 2022.]

- Whether law or regulation prescribes the applicable financial reporting framework

.A5 Many users of financial statements are not in a position to demand financial statements tailored to meet their specific information needs. Although all the information needs of specific users cannot be met, financial information needs that are common to a wide range of users exist. Financial statements prepared in accordance with a financial reporting framework designed to meet the common financial information needs of a wide range of users are referred to as *general purpose financial statements*.

.A6 *General purpose frameworks.* The sources of established accounting principles that are generally accepted are accounting principles promulgated by a body designated by the Council of the AICPA to establish such principles, pursuant to the "Accounting Principles Rule" (ET sec. 1.320.001) of the AICPA Code of Professional Conduct. Such financial reporting standards often are identified as the applicable financial reporting framework in law or regulation governing the preparation of general purpose financial statements. [Revised, January 2015, to reflect conforming changes necessary due to the issuance of the revised AICPA Code of Professional Conduct, effective December 15, 2014.]

.A7 *Special purpose frameworks.* In some cases, the financial statements will be prepared in accordance with a special purpose framework. For example, law or regulation may prescribe the financial reporting framework to be used in the preparation of financial statements for certain types of entities. Such financial statements are referred to as *special purpose financial statements*. Section 800, *Special Considerations — Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks*, addresses the acceptability of special purpose frameworks.[5]

.A8 After the audit engagement has been accepted, the auditor may encounter deficiencies in the applicable financial reporting framework that indicate that the framework is not acceptable. When use of that framework is not prescribed by law or regulation, management may decide to adopt another framework that is acceptable. When management does so, the previously agreed-upon terms will have changed, and the auditor is required by paragraph .19 to agree upon new terms of the audit engagement that reflect the change in the framework.

Agreement of the Responsibilities of Management (Ref: par. .06b)

.A9 An audit in accordance with GAAS is conducted on the premise that management has acknowledged and understands that it has the responsibilities set out in paragraph .06*b*.[6] The auditor may assist in preparing the financial statements, in whole or in part, based on information provided to the auditor by management during the performance of the audit.[a]

---

[5] Paragraph .10 of section 800. [Footnote renumbered by the issuance of SAS No. 147, June 2022.]

[6] Paragraphs .05 and .A2 of section 200. [Footnote renumbered by the issuance of SAS No. 147, June 2022.]

[a] In January 2013, the Professional Ethics Executive Committee adopted a provision in the "Scope and Applicability of Nonattest Services" interpretation (ET sec. 1.295.010) under the "Independence Rule" (ET sec. 1.200.001) of the AICPA Code of Professional Conduct. This provision provides, among other things, that financial statement preparation is considered outside the scope of the attest engagement and, therefore, constitutes a nonattest service subject to the requirements of the "Nonattest Services" subtopic (ET sec. 1.295). The provision

However, the concept of an independent audit requires that the auditor's role does not involve assuming management's responsibility for the preparation and fair presentation of the financial statements or assuming responsibility for the entity's related internal control and that the auditor has a reasonable expectation of obtaining the information necessary for the audit (including information obtained from outside of the general and subsidiary ledgers) insofar as management is able to provide or procure it. Accordingly, the premise is fundamental to the conduct of an independent audit. To avoid misunderstanding, agreement is reached with management that it acknowledges and understands that it has such responsibilities as part of agreeing and documenting the terms of the audit engagement as required by paragraphs .09–.10. [Revised, October 2013, to reflect conforming changes necessary due to the revision of Ethics Interpretation No. 101-3. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

.A10 The way in which the responsibilities for financial reporting are divided between management and those charged with governance will vary according to the resources and structure of the entity and any relevant law or regulation and the respective roles of management and those charged with governance within the entity. In most cases, management is responsible for execution and those charged with governance have oversight of management. In some cases, those charged with governance will have, or will assume, responsibility for approving the financial statements or monitoring the entity's internal control related to financial reporting. In larger entities, a subgroup of those charged with governance, such as an audit committee, may be charged with certain oversight responsibilities.

.A11 Section 580, *Written Representations*, requires the auditor to request management to provide written representations that it has fulfilled certain of its responsibilities.[7] It may therefore be appropriate to make management aware that receipt of such written representations will be expected, together with written representations required by other AU-C sections and, when necessary, written representations to support other audit evidence relevant to the financial statements or one or more specific assertions in the financial statements.

.A12 If management will not acknowledge its responsibilities or indicates that it will not provide written representations as requested, the auditor will be unable to obtain sufficient appropriate audit evidence.[8] In such circumstances, it would not be appropriate for the auditor to accept the audit engagement unless law or regulation requires the auditor to do so. In cases when the auditor is required to accept the audit engagement, the auditor may need to explain to management the importance of these matters and the implications for the auditor's report.

---

is effective for engagements covering periods beginning on or after December 15, 2014. [Footnote added, October 2013, to reflect conforming changes necessary due to the revision of Ethics Interpretation No. 101-3. Footnote revised, January 2015, to reflect conforming changes necessary due to the issuance of the revised AICPA Code of Professional Conduct, effective December 15, 2014.]

[7] Paragraphs .10–.11 of section 580, *Written Representations*. [Footnote renumbered by the issuance of SAS No. 147, June 2022.]

[8] Paragraph .A34 of section 580. [Footnote renumbered by the issuance of SAS No. 147, June 2022.]

Preparation and Fair Presentation of the Financial Statements (Ref: par. .06b(i))

.A13 In an audit of special purpose financial statements, the auditor is required by section 800 to obtain the agreement of management that it acknowledges and understands its responsibility to include all informative disclosures that are appropriate for the special purpose framework used to prepare the entity's financial statements.[9] This agreement is a precondition of the audit included in the terms of the engagement.

Internal Control (Ref: par. .06b(ii))

.A14 Management maintains such internal control as it determines is necessary to enable the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Internal control, no matter how effective, can provide an entity with only reasonable assurance about achieving the entity's financial reporting objectives, due to the inherent limitations of internal control.

.A15 An independent audit conducted in accordance with GAAS does not act as a substitute for the maintenance of internal control necessary for the preparation and fair presentation of financial statements by management. Accordingly, the auditor is required to obtain the agreement of management that it acknowledges and understands that it has responsibility for the design, implementation, and maintenance of internal control necessary for this purpose. However, the agreement required by paragraph .06*b*(ii) does not imply that the auditor will find that internal control maintained by management has achieved its purpose or will be free from deficiencies.

.A16 Management has the responsibility to determine what internal control is necessary to enable the preparation and fair presentation of the financial statements. The term *internal control* encompasses a wide range of activities within components of the system of internal control that may be described as the control environment; the entity's risk assessment process; the entity's process to monitor the system of internal control; the information system and communication; and control activities. This division, however, does not necessarily reflect how a particular entity may design, implement, and maintain its internal control or how it may classify any particular component.[10] An entity's internal control will reflect the needs of management, the complexity of the business, the nature of the risks to which the entity is subject, and relevant laws or regulations. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Additional Information (Ref: par. .06biii(2))

.A17 Additional information that the auditor may request from management for the purpose of the audit may include, when applicable, matters related to other information in accordance with section 720, *The Auditor's Responsibilities Relating to Other Information*

---

[9] Paragraph .11 of section 800. [Footnote renumbered by the issuance of SAS No. 147, June 2022.]

[10] Paragraph .A51 and appendix B, "Internal Control Components," of section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*. [Footnote renumbered by the issuance of SAS No. 147, June 2022.]

Included in Annual Reports. When the auditor expects to obtain other information after the date of the auditor's report, the terms of the audit engagement may also acknowledge the auditor's responsibilities relating to such other information including, if applicable, the actions that may be appropriate or necessary if the auditor concludes that an uncorrected material misstatement of the other information exists in such other information. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 137.]

Considerations Relevant to Smaller Entities (Ref: par. .06b)

.A18 One of the purposes of agreeing upon the terms of the audit engagement is to avoid misunderstanding about the respective responsibilities of management and the auditor. For example, when the auditor or a third party has assisted with drafting the financial statements, it may be useful to remind management that the preparation and fair presentation of the financial statements in accordance with the applicable financial reporting framework remains its responsibility. [Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

Management-Imposed Limitation on Scope Prior to Audit Engagement Acceptance That Would Result in a Disclaimer of Opinion (Ref: par. .07)

.A19 Scope limitations may be imposed by management or by circumstances. Examples of scope limitations that would not preclude the auditor from accepting the engagement include the following:

- A restriction imposed by management that the auditor believes will result in a qualified opinion
- A restriction imposed by circumstances beyond the control of management

[Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

.A20 Employee benefit plans are an example of entities that are required to have an audit by law or regulation and a disclaimer of opinion is acceptable under the applicable law or to the regulator. For such entities, the auditor is neither precluded from accepting, nor required to accept, the engagement, regardless of whether management imposes a scope limitation that is expected to result in the auditor disclaiming an opinion on the financial statements as a whole. [Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

Agreement on Audit Engagement Terms

Agreeing Upon the Terms of the Audit Engagement (Ref: par. .09)

.A21 The roles of management and those charged with governance in agreeing upon the terms of the audit engagement for the entity depend on the governance structure of the entity and relevant law or regulation. Depending on the entity's structure, the agreement may be with management, those charged with governance, or both. When the agreement on the terms of engagement is only with those charged with governance, nonetheless in accordance with paragraph .06, the auditor is required to obtain management's agreement that it acknowledges and understands its responsibilities. [Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

.A22 When a third party has contracted for the audit of the entity's financial statements, agreeing the terms of the audit with management of the entity is necessary in order to establish that the preconditions for an audit are present. [Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

Audit Engagement Letter or Other Form of Written Agreement[11] *(Ref: par. .10)*

.A23 Both management and the auditor have an interest in documenting the agreed-upon terms of the audit engagement before the commencement of the audit to help avoid misunderstandings with respect to the audit. For example, it reduces the risk that management may inappropriately rely on the auditor to protect management against certain risks or to perform certain functions that are management's responsibility. [Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

Form and Content of the Audit Engagement Letter

.A24 The form and content of the audit engagement letter may vary for each entity. Information included in the audit engagement letter on the auditor's responsibilities may be based on section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.[12] Paragraph .06*b* of this section addresses the description of the responsibilities of management. In addition to including the matters required by paragraph .10, an audit engagement letter may make reference to, for example, the following:

- Elaboration of the scope of the audit, including reference to applicable legislation, regulations, GAAS, and ethical and other pronouncements of professional bodies to which the auditor adheres
- Arrangements regarding the planning and performance of the audit, including the composition of the engagement team
- The communication of key audit matters
- The form of any other communication about the results of the audit engagement
- The expectation that management will provide written representations (see also paragraph .A11)
- The expectation that management will provide access to all information of which management is aware that is relevant to the preparation and fair presentation of the

[11] In the paragraphs that follow, any reference to an audit engagement letter is to be taken as a reference to an audit engagement letter or other suitable form of written agreement. [Footnote renumbered by the issuance of SAS No. 147, June 2022.]

[12] Paragraphs .04–.10 of section 200. [Footnote renumbered by the issuance of SAS No. 147, June 2022.]

financial statements, including an expectation that management will provide access to information relevant to disclosures

- The agreement of management to make available to the auditor draft financial statements, including all information relevant to their preparation and fair presentation, whether obtained from within or outside of the general and subsidiary ledgers (including all information relevant to the preparation and fair presentation of disclosures), and any accompanying other information[13] in time to allow the auditor to complete the audit in accordance with the proposed timetable
- The agreement of management to inform the auditor of events occurring or facts discovered subsequent to the date of the financial statements, of which management may become aware, that may affect the financial statements
- The basis on which fees are computed and any billing arrangements
- A request for management to acknowledge receipt of the audit engagement letter and to agree to the terms of the engagement outlined therein, as may be evidenced by management signing the engagement letter

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

.A25 Although there is no requirement in GAAS to communicate key audit matters, the engagement letter may acknowledge that management has requested that the auditor communicate key audit matters in the auditor's report. If the terms of the audit engagement initially acknowledge that key audit matters will be communicated, but it is later decided that this will not be done, the engagement letter may need to be modified accordingly. If, after the engagement letter is signed, management requests that the auditor communicate key audit matters, the auditor may acknowledge this agreement in a new engagement letter or as an addendum to the originally signed letter. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. Paragraph renumbered by the issuance of SAS No. 137, July 2019.]

.A26 When relevant, the following points also could be made in the audit engagement letter:

- Arrangements concerning the involvement of other auditors and specialists in some aspects of the audit
- Arrangements concerning the involvement of internal auditors and other staff of the entity
- Arrangements to be made with the predecessor auditor, if any, in the case of an initial audit

[13] As defined in section 720B, *Other Information in Documents Containing Audited Financial Statements*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. Footnote renumbered by the issuance of SAS No. 147, June 2022.]

- Any restriction of the auditor's liability when not prohibited
- Any obligations of the auditor to provide audit documentation to other parties
- Additional services to be provided, such as those relating to regulatory requirements
- A reference to any further agreements between the auditor and the entity

[Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 137, July 2019.]

.A27 Reference to the expected form and content of any reports to be issued by the auditor may include a description of the types of reports to be issued. The auditor need not describe the type of opinion expected to be expressed. An example of an audit engagement letter is set out in the exhibit "Example of an Audit Engagement Letter." [Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 137, July 2019.]

.A28 *Audits of components.* When the auditor of a parent entity is also the auditor of a component, the factors that may influence the decision whether to obtain a separate audit engagement letter from the component include the following:

- Who engages the component auditor
- Whether a separate auditor's report is to be issued on the component
- Legal requirements regarding the appointment of the auditor
- Degree of ownership by parent
- Degree of independence of the component management from the parent entity

[Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 137, July 2019.]

Initial Audits, Including Reaudit Engagements — Communications With the Predecessor Auditor (Ref: par. .11–.15)

.A29 An auditor may make a proposal for an audit engagement before being granted permission to make inquiries of a predecessor auditor. The auditor may advise management in the proposal or otherwise that the auditor's acceptance of the engagement cannot be final until the inquiries have been made and the responses of the predecessor auditor have been evaluated. [Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 137, July 2019.]

.A30 Relevant ethical and professional requirements guide the auditor's communications with the predecessor auditor and management, as well as the predecessor auditor's response. Such requirements provide that, except as permitted by the rules of the AICPA Code of Professional Conduct, an auditor is precluded from disclosing confidential information obtained in the course of an engagement unless management specifically consents. Relevant ethical and professional requirements also provide that both the auditor and the predecessor auditor hold in confidence information obtained from each other. This obligation applies regardless of whether the auditor accepts the engagement. [Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 137, July 2019. Paragraph renumbered and amended, effective for audits of financial statements for periods beginning on or after June 30, 2023, by SAS No. 147.]

.A31 The inquiries specified in paragraph .12*a–b* are consistent with matters that the predecessor auditor communicated with those charged with governance as required by section 240, *Consideration of Fraud in a Financial Statement Audit*,[14] and section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*,[15] respectively. [Paragraph added, effective for audits of financial statements for periods beginning on or after June 30, 2023, by SAS No. 147.]

[.A32] [Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 137, July 2019. Paragraph deleted by the issuance of SAS No. 147, June 2022.]

.A33 The communication with the predecessor auditor may be either written or oral. In addition to the inquiries specified in paragraph .12*a–b*, matters subject to the auditor's inquiry of the predecessor auditor may include the following:

- Information that might bear on the integrity of management
- Disagreements with management about accounting policies, auditing procedures, or other similarly significant matters
- Communications to management and those charged with governance regarding significant deficiencies and material weaknesses in internal control
- The predecessor auditor's understanding about the reasons for the change of auditors
- The predecessor auditor's understanding of the nature of the entity's relationships and transactions with related parties and significant unusual transactions

[Paragraph renumbered by the issuance of SAS No. 134, May 2019. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135. Paragraph subsequently renumbered by the issuance of SAS No. 137, July 2019. As amended, effective for audits of financial statements for periods beginning on or after June 30, 2023, by SAS No. 147.]

.A34 Before responding to the auditor's inquiries made pursuant to paragraph .12, the predecessor auditor may consider it appropriate to obtain legal advice to determine whether

---

[14] Paragraph .40 of section 240, *Consideration of Fraud in a Financial Statement Audit*. [Footnote added, effective for audits of financial statements for periods beginning on or after June 30, 2023, by SAS No. 147.]

[15] Paragraph .21 of section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*. [Footnote added, effective for audits of financial statements for periods beginning on or after June 30, 2023, by SAS No. 147.]

any professional or legal requirements or unusual circumstances may limit the predecessor auditor's ability to respond. [Paragraph added, effective for audits of financial statements for periods beginning on or after June 30, 2023, by SAS No. 147.]

.A35 When more than one auditor is considering accepting an engagement, the predecessor auditor is not expected to be available to respond to inquiries until an auditor has been selected by the entity. [Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 137, July 2019. Paragraph renumbered and amended, effective for audits of financial statements for periods beginning on or after June 30, 2023, by SAS No. 147.]

Considerations Specific to Governmental Entities

.A36 When the auditor is required by law or regulation to audit a governmental entity, inquiries of the predecessor auditor for the purpose of obtaining information about whether to accept the engagement may not be relevant. However, inquiries of the predecessor auditor may still be relevant for the purpose of obtaining information that is used by the auditor in planning and performing the audit.[16] [Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 137, July 2019. Paragraph subsequently renumbered by the issuance of SAS No. 147, June 2022. Paragraph subsequently renumbered by the issuance of SAS No. 147, June 2022.]

.A37 In accordance with generally accepted governmental auditing standards, if the law or regulation requiring an audit specifically identifies the entities to be audited, in addition to management, the auditor may find it necessary to obtain authorization from those individuals contracting for or requesting the audit and from those legislative committees, if any, that have ongoing oversight responsibilities for the audited entity. [Paragraph added, effective for audits of financial statements for periods beginning on or after June 30, 2023, by SAS No. 147.]

Recurring Audits (Ref: par. .16)

.A38 The following factors may make it appropriate to revise the terms of the audit engagement:

- Any indication that management misunderstands the objective and scope of the audit
- Any revised or special terms of the audit engagement
- A change of senior management
- A significant change in ownership
- A significant change in the nature or size of the entity's business

[16] Section 510, *Opening Balances — Initial Audit Engagements, Including Reaudit Engagements*, addresses the auditor's responsibilities relating to opening balances when conducting an initial audit engagement. [Footnote renumbered by the issuance of SAS No. 134, May 2019. Footnote subsequently renumbered by the issuance of SAS No. 147, June 2022.]

- A change in legal or regulatory requirements
- A change in the financial reporting framework adopted in the preparation of the financial statements
- A change in other reporting requirements

[Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 137, July 2019. Paragraph subsequently renumbered by the issuance of SAS No. 147, June 2022.]

.A39 The auditor may remind management of the terms of the engagement in writing or orally. A written reminder might be a letter confirming that the terms of the preceding engagement will govern the current engagement. If the reminder is oral, audit documentation may include with whom the discussion took place, when, and the significant points discussed. [Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 137, July 2019. Paragraph subsequently renumbered by the issuance of SAS No. 147, June 2022.]

Acceptance of a Change in the Terms of the Audit Engagement

Request to Change the Terms of the Audit Engagement (Ref: par. .17)

.A40 A request from management for the auditor to change the terms of the audit engagement may result from a change in circumstances affecting the need for the service, a misunderstanding about the nature of an audit as originally requested, or a restriction on the scope of the audit engagement, whether imposed by management or caused by other circumstances. The auditor, as required by paragraph .17, considers the justification given for the request, particularly the implications of a restriction on the scope of the audit engagement. [Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 137, July 2019. Paragraph subsequently renumbered by the issuance of SAS No. 147, June 2022.]

.A41 A change in circumstances that affects management's requirements or a misunderstanding concerning the nature of the service originally requested may be considered a reasonable basis for requesting a change in the audit engagement. [Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 137, July 2019. Paragraph subsequently renumbered by the issuance of SAS No. 147, June 2022.]

.A42 In contrast, a change may not be considered reasonable if the change appears to relate to information that is incorrect, incomplete, or otherwise unsatisfactory. An example might be when the auditor is unable to obtain sufficient appropriate audit evidence regarding receivables and management asks for the audit engagement to be changed to a review engagement to avoid a qualified opinion or a disclaimer of opinion. [Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 137, July 2019. Paragraph subsequently renumbered by the issuance of SAS No. 147, June 2022.]

Request to Change to a Review or Other Service (Ref: par. .18)

.A43 Before agreeing to change an audit engagement to a review or other service, an auditor who was engaged to perform an audit in accordance with GAAS may need to assess, in addition to the matters referred to in paragraphs .A40–.A42, any legal or contractual implications of the change. [Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 137, July 2019. Paragraph subsequently renumbered by the issuance of SAS No. 147, June 2022.]

.A44 If the auditor concludes that reasonable justification to change the audit engagement to a review or other service exists, the audit work performed to the date of change may be relevant to the changed engagement; however, the work required to be performed and the report to be issued would be those appropriate to the revised engagement. In order to avoid confusing the reader, the report on the other service would not include reference to the following:

a. The original audit engagement

b. Any procedures that may have been performed in the original audit engagement, except when the audit engagement is changed to an engagement to undertake agreed-upon procedures and, thus, reference to the procedures performed is a normal part of the report

[Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 137, July 2019. Paragraph subsequently renumbered by the issuance of SAS No. 147, June 2022.]

Additional Considerations in Engagement Acceptance

Auditor's Report Prescribed by Law or Regulation (Ref: par. .21)

.A45 GAAS require that the auditor not represent compliance with GAAS unless the auditor has complied with all of the AU-C sections relevant to the audit.[17] If the auditor is required by law or regulation to use a specific layout, form, or wording of the auditor's report, section 800 requires that the auditor's report refer to GAAS only if the auditor's report includes the minimum reporting elements.[18] In accordance with section 800, if the specific layout, form, or wording of the auditor's report is not acceptable or would cause an auditor to make a statement that the auditor has no basis to make, the auditor is required to reword the prescribed form of report or attach an appropriately worded separate report.[19] When the auditor concludes that rewording the prescribed form to be in accordance with the requirements of GAAS or attaching a separate report would not be permitted, the

[17] Paragraph .22 of section 200. [Footnote renumbered by the issuance of SAS No. 134, May 2019. Footnote subsequently renumbered by the issuance of SAS No. 147, June 2022.]

[18] Paragraph .22 of section 800. [Footnote renumbered by the issuance of SAS No. 134, May 2019. Footnote subsequently renumbered by the issuance of SAS No. 147, June 2022.]

[19] Paragraph .23 of section 800. [Footnote renumbered by the issuance of SAS No. 134, May 2019. Footnote subsequently renumbered by the issuance of SAS No. 147, June 2022.]

auditor may consider including a statement in the auditor's report that the audit is not conducted in accordance with GAAS. The auditor is, however, encouraged to apply GAAS, including the AU-C sections that address the auditor's report, to the extent practicable, notwithstanding that the auditor is not permitted to refer to the audit being conducted in accordance with GAAS. [Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 137, July 2019. Paragraph subsequently renumbered by the issuance of SAS No. 147, June 2022.]

Considerations Specific to Governmental Entities

.A46 For governmental entities, specific legal or regulatory requirements may exist; for example, the auditor may be required to report directly to the legislature or the public if management attempts to limit the scope of the audit. [Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 137, July 2019. Paragraph subsequently renumbered by the issuance of SAS No. 147, June 2022.]

Exhibit — Example of an Audit Engagement Letter (Ref: par. .A27)

.A47

The following is an example of an audit engagement letter for an audit of general purpose financial statements prepared in accordance with accounting principles generally accepted in the United States of America, as promulgated by the Financial Accounting Standards Board. This engagement letter is intended as guidance that may be used in conjunction with the considerations outlined in this section. The engagement letter will vary according to individual requirements and circumstances and is drafted to refer to the audit of financial statements for a single reporting period. The auditor may seek legal advice about whether a proposed engagement letter is suitable.

To the appropriate representative of those charged with governance of ABC Company:[1]

[*The objective and scope of the audit*]

You[2] have requested that we audit the financial statements of ABC Company, which comprise the balance sheet as of December 31, 20XX, and the related statements of income, changes in stockholders' equity, and cash flows for the year then ended, and the related notes to the financial statements. We are pleased to confirm our acceptance and our understanding of this audit engagement by means of this letter.

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with auditing standards generally accepted in the United States of America (GAAS) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

[*The responsibilities of the auditor*]

We will conduct our audit in accordance with GAAS. As part of an audit in accordance with GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.[3] However, we will communicate to you in writing concerning any significant deficiencies or material weaknesses in internal control relevant to the audit of the financial statements that we have identified during the audit.

[1] The addressees and references in the letter would be those that are appropriate in the circumstances of the engagement, including the relevant jurisdiction. It is important to refer to the appropriate persons. See paragraph .A21.

[2] Throughout this letter, references to *you*, *we*, *us*, *management*, *those charged with governance*, and *auditor* would be used or amended as appropriate in the circumstances.

[3] This sentence would be modified, as appropriate, in circumstances in which the auditor also has a responsibility to issue an opinion on the effectiveness of internal control over financial reporting in conjunction with the audit of the financial statements. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Conclude, based on the audit evidence obtained, whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.

Because of the inherent limitations of an audit, together with the inherent limitations of internal control, an unavoidable risk that some material misstatements may not be detected exists, even though the audit is properly planned and performed in accordance with GAAS.

[*The responsibilities of management and identification of the applicable financial reporting framework*]

Our audit will be conducted on the basis that [*management and, when appropriate, those charged with governance*][4] acknowledge and understand that they have responsibility

a. for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America;

b. for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; and

c. to provide us with

   i. access to all information of which [*management*] is aware that is relevant to the preparation and fair presentation of the financial statements such as records, documentation, and other matters;

   ii. additional information that we may request from [*management*] for the purpose of the audit; and

   iii. unrestricted access to persons within the entity from whom we determine it necessary to obtain audit evidence.

As part of our audit process, we will request from [*management and, when appropriate, those charged with governance*], written confirmation concerning representations made to us in connection with the audit.

[*Other relevant information*]

[*Insert other information, such as fee arrangements, billings, and other specific terms, as appropriate*.]

[4] Use terminology as appropriate in the circumstances. [Footnote renumbered by the issuance of SAS No. 134, May 2019.]

[Reporting]

[*Insert appropriate reference to the expected form and content of the auditor's report, including, when applicable, the reporting on other information in accordance with section 720,* The Auditor's Responsibilities Relating to Other Information Included in Annual Reports*. Example follows:*]

We will issue a written report upon completion of our audit of ABC Company's financial statements. Our report will be addressed to the board of directors of ABC Company. Circumstances may arise in which our report may differ from its expected form and content based on the results of our audit. Depending on the nature of these circumstances, it may be necessary for us to modify our opinion, add an emphasis-of-matter paragraph or other-matter paragraph to our auditor's report, or if necessary, withdraw from the engagement.

We also will issue a written report on [*insert appropriate reference to other auditor's reports expected to be issued*] upon completion of our audit.

Please sign and return the attached copy of this letter to indicate your acknowledgment of, and agreement with, the arrangements for our audit of the financial statements including our respective responsibilities.

XYZ & Co.

Acknowledged and agreed on behalf of ABC Company by

AU-C Section 220

Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards

(Supersedes SAS No. 122.)

Source: SAS No. 146; SAS No. 149.

Effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025.

Introduction

Scope of This Section

.01 This section addresses the specific responsibilities of the auditor regarding quality management at the engagement level for an audit of financial statements and the related responsibilities of the engagement partner. This section also applies, adapted as necessary, to other engagements conducted in accordance with generally accepted auditing standards (GAAS) (for example, a review of interim financial information conducted in accordance with section 930, *Interim Financial Information*). This section is to be read in conjunction with the AICPA Code of Professional Conduct (AICPA code) and other relevant ethical requirements. (Ref: par. .A1 and .A40)

.02 Although government audit organizations are subject to the quality control and assurance requirements of *Government Auditing Standards*, and Statements on Quality Management Standards (SQMSs) are not applicable to auditors in government audit organizations,[1] this section is applicable to auditors in government audit organizations who perform financial audits in accordance with GAAS.

The Firm's System of Quality Management and the Role of Engagement Teams

.03 Under SQMS No. 1, *A Firm's System of Quality Management* (QM sec. 10), the objective of the firm is to design, implement, and operate a system of quality management for engagements performed by the firm in its accounting and auditing practice that provides the firm with reasonable assurance that (Ref: par. .A2–.A3)

[1] Paragraph 5 of Statement on Quality Management Standards (SQMS) No. 1, *A Firm's System of Quality Management* (QM sec. 10).

a. the firm and its personnel fulfill their responsibilities in accordance with professional standards and applicable legal and regulatory requirements and conduct engagements in accordance with such standards and requirements, and

b. engagement reports issued by the firm or engagement partners are appropriate in the circumstances.[2]

.04 The engagement team, led by the engagement partner, is responsible, within the context of the firm's system of quality management and through complying with the requirements of this section, for the following: (Ref: par. .A4–.A11)

a. Implementing the firm's responses to quality risks (that is, the firm's policies or procedures) that are applicable to the audit engagement using information communicated by, or obtained from, the firm

b. Given the nature and circumstances of the audit engagement, determining whether to design and implement responses at the engagement level beyond those in the firm's policies or procedures

c. Communicating to the firm information from the audit engagement that is required by the firm's policies or procedures to be communicated to support the design, implementation, and operation of the firm's system of quality management

.05 Complying with the requirements in other AU-C sections may provide information that is relevant to quality management at the engagement level. (Ref: par. .A12)

.06 The public interest is served by the consistent performance of quality audit engagements that achieve the objective of this section and other AU-C sections. A quality audit engagement is achieved through planning and performing the engagement and reporting on it in accordance with professional standards and applicable legal and regulatory requirements. Achieving the objectives of those standards and complying with the requirements of applicable law or regulation involves exercising professional judgment and maintaining professional skepticism.

.07 In accordance with section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*,[3] the engagement team is required to plan and perform an audit with professional skepticism and to exercise professional judgment. Professional judgment is exercised in making informed decisions about the courses of action that are appropriate to manage and achieve quality given the nature and circumstances of the audit engagement. Professional skepticism supports the quality of judgments made by the engagement team and, through these judgments, supports the overall effectiveness of the engagement team in achieving quality at the engagement level. The appropriate maintenance of professional skepticism may be demonstrated through the actions and communications of the engagement team. Such actions and communications may include specific steps to mitigate impediments that may

---

[2] Paragraph 15 of SQMS No. 1.

[3] Paragraphs .17–.18 and .A22–.A31 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

impair the appropriate maintenance of professional skepticism, such as unconscious bias or resource constraints. (Ref: par. .A35–.A38)

Scalability

.08 The requirements of this section are intended to be applied in the context of the nature and circumstances of each audit. Examples follow:

- When an audit is carried out entirely by the engagement partner, which may be the case for an audit of a less complex entity, some requirements in this section are not relevant because they are conditional on the involvement of other members of the engagement team. (Ref: par. .A13–.A14)
- When an audit is not carried out entirely by the engagement partner, or in an audit of an entity whose nature and circumstances are more complex, the engagement partner may assign the design or performance of some procedures, tasks, or actions to other members of the engagement team.

The Engagement Partner's Responsibilities

.09 The engagement partner remains ultimately responsible and, therefore, accountable for compliance with the requirements of this section. Nevertheless, the engagement partner may seek assistance from others to fulfill these responsibilities. The phrase "take responsibility for..." is used for those requirements for which the engagement partner is permitted to assign the design or performance of procedures, tasks, or actions to appropriately skilled or suitably experienced members of the engagement team. For other requirements, this section expressly intends that the requirement or responsibility be fulfilled by the engagement partner. In such circumstances, the engagement partner may need to obtain information from the firm or other members of the engagement team. For example, when others perform supervisory and review activities, the outcomes of those activities can be taken into account by the engagement partner in fulfilling these responsibilities. (Ref: par. .A24–.A27)

Effective Date

.10 This section is effective for engagements conducted in accordance with GAAS for periods beginning on or after December 15, 2025.

Objective

.11 The objective of the auditor is to manage quality at the engagement level to obtain reasonable assurance that quality has been achieved such that

a. the auditor has fulfilled the auditor's responsibilities, and has conducted the audit, in accordance with professional standards and applicable legal and regulatory requirements, and

b. the auditor's report issued is appropriate in the circumstances.

Definitions

.12 For purposes of GAAS, the following terms have the meanings attributed as follows:

Engagement partner.[4] The partner or other individual appointed by the firm who is responsible for the audit engagement and its performance, and for the auditor's report that is issued on behalf of the firm, and who, when required, has the appropriate authority from a professional, legal, or regulatory body.

Engagement quality review. An objective evaluation of the significant judgments made by the engagement team and the conclusions reached thereon, performed by the engagement quality reviewer and completed before the engagement report is released.

Engagement quality reviewer. A partner, other individual in the firm, or an external individual appointed by the firm to perform the engagement quality review.

Engagement team. All partners and staff performing the audit engagement and any other individuals who perform audit procedures on the engagement, excluding an auditor's external specialist[5] and internal auditors who provide direct assistance on an engagement.[6] (Ref: par. .A15–.A27)

Firm. A form of organization permitted by law or regulation whose characteristics conform to resolutions of the Council of the AICPA and that is engaged in public practice. (Ref: par. .A28)

Inspection. Inspection is an evaluation of the adequacy of aspects of the firm's quality management policies and procedures, its personnel's understanding of those policies and procedures, and the extent of the firm's compliance with them.

Network. As defined in "Definitions" (ET sec. 0.400) in the AICPA code, an association of entities that includes one or more firms. (Ref: par. .A29)

Network firm. As defined in "Definitions" in the AICPA code, a firm or other entity that belongs to a network. References to a *network firm* are to be read hereafter as "another firm or entity that belongs to the same network as the firm." (Ref: par. .A29)

Partner. Any individual with authority to bind the firm with respect to the performance of a professional services engagement. For purposes of this definition, *partner* may include an employee with this authority who has not assumed the risks and benefits of ownership. Firms might use different titles to refer to individuals with this authority.

Personnel. Partners and staff in the firm.

Professional standards. Standards promulgated by the AICPA Auditing Standards Board or the AICPA Accounting and Review Services Committee under the "General Standards

[4] *Engagement partner*, *partner*, and *firm* refer to their governmental equivalents when relevant.

[5] Paragraph .06 of section 620, *Using the Work of an Auditor's Specialist*, defines the term *auditor's specialist*.

[6] Section 610, *Using the Work of Internal Auditors*, establishes limits on the use of direct assistance.

Rule" (ET sec. 1.300.001) or the "Compliance With Standards Rule" (ET sec. 1.310.001) of the AICPA code, or by other standard-setting bodies that set auditing and attest standards applicable to the engagement being performed and relevant ethical requirements.

Relevant ethical requirements. Principles of professional ethics and ethical requirements to which the engagement team and engagement quality reviewer are subject, which consist of the AICPA code together with rules of applicable state boards of accountancy and applicable regulatory agencies that are more restrictive.

Response (in relation to a system of quality management). Policies or procedures designed and implemented by the firm to address one or more quality risks.

- Policies are statements of what should, or should not, be done to address a quality risk or risks. Such statements may be documented, explicitly stated in communications, or implied through actions and decisions.
- Procedures are actions to implement policies.

Staff. Professionals, other than partners, including any specialist the firm employs.

Requirements

Leadership Responsibilities for Managing and Achieving Quality on Audits

.13 The engagement partner should take overall responsibility for managing and achieving quality on the audit engagement, including taking responsibility for creating an environment for the engagement that emphasizes the firm's culture and expected behavior of engagement team members. In doing so, the engagement partner should be sufficiently and appropriately involved throughout the audit engagement such that the engagement partner has the basis for determining whether the significant judgments made, and the conclusions reached, are appropriate given the nature and circumstances of the engagement. (Ref: par. .A30–.A39)

.14 In creating the environment described in paragraph .13, the engagement partner should take responsibility for clear, consistent, and effective actions being taken that reflect the firm's commitment to quality and that establish and communicate the expected behavior of engagement team members, including emphasizing the following: (Ref: par. .A32–.A36)

a. That all engagement team members are responsible for contributing to the management and achievement of quality at the engagement level

b. The importance of professional ethics, values, and attitudes to the members of the engagement team

c. The importance of open and robust communication within the engagement team and supporting the ability of engagement team members to raise concerns without fear of reprisal

d. The importance of each engagement team member maintaining professional skepticism throughout the audit engagement

.15 If the engagement partner assigns the design or performance of procedures, tasks, or actions related to a requirement of this section to other members of the engagement team to assist the engagement partner in complying with the requirements of this section, the engagement partner should continue to take overall responsibility for managing and achieving quality on the audit engagement through direction and supervision of those members of the engagement team and review of their work. (Ref: par. .09 and .A39)

Relevant Ethical Requirements, Including Those Related to Independence

.16 The engagement partner should have an understanding of the relevant ethical requirements, including those related to independence, that are applicable given the nature and circumstances of the audit engagement. (Ref: par. .A40–.A44 and .A50)

.17 The engagement partner should take responsibility for other members of the engagement team having been made aware of relevant ethical requirements that are applicable given the nature and circumstances of the audit engagement, and the firm's related policies or procedures, including those that address the following: (Ref: par. .A23–.A27 and .A42–.A46)

a. Identifying, evaluating, and addressing threats to compliance with relevant ethical requirements, including those related to independence

b. Circumstances that may cause a breach of relevant ethical requirements, including those related to independence, and the responsibilities of members of the engagement team when they become aware of breaches

c. The responsibilities of members of the engagement team when they become aware of an instance of noncompliance with laws and regulations by the entity[7]

.18 If matters come to the engagement partner's attention that indicate that a threat to compliance with relevant ethical requirements exists, the engagement partner should evaluate the threats by complying with the firm's policies or procedures, using relevant information from the firm, the engagement team, or other sources, and take appropriate action. (Ref: par. .A45–.A46)

.19 The engagement partner should remain alert throughout the audit engagement, through observation and making inquiries as necessary, for breaches of relevant ethical requirements or the firm's related policies or procedures by members of the engagement team. (Ref: par. .A47)

.20 If matters come to the engagement partner's attention through the firm's system of quality management, or from other sources, that indicate that relevant ethical requirements applicable to the nature and circumstances of the audit engagement have not been fulfilled,

[7] See section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*.

the engagement partner, in consultation with others in the firm, should take appropriate action. (Ref: par. .A48)

.21 Prior to dating the auditor's report, the engagement partner should take responsibility for determining whether relevant ethical requirements, including those related to independence, have been fulfilled. (Ref: par. .A40 and .A49)

Acceptance and Continuance of Client Relationships and Audit Engagements

.22 The engagement partner should determine that the firm's policies or procedures for the acceptance and continuance of client relationships and audit engagements have been followed and that conclusions reached in this regard are appropriate. (Ref: par. .A51–.A53 and .A60)

.23 The engagement partner should take into account information obtained in the acceptance and continuance process in planning and performing the audit engagement in accordance with GAAS and complying with the requirements of this section. (Ref: par. .A55–.A58)

.24 If the engagement team becomes aware of information that may have caused the firm to decline the audit engagement had that information been known by the firm prior to accepting or continuing the client relationship or specific engagement, the engagement partner should communicate that information promptly to the firm so that the firm and the engagement partner can take the necessary action. (Ref: par. .A59)

Engagement Resources

.25 The engagement partner should determine that sufficient and appropriate resources to perform the engagement are assigned or made available to the engagement team in a timely manner, taking into account the nature and circumstances of the audit engagement, the firm's policies or procedures, and any changes that may arise during the engagement. (Ref: par. .A61–.A73, .A76–.A77, and .A82)

.26 The engagement partner should determine that members of the engagement team, and any auditor's external specialists and internal auditors who provide direct assistance who are not part of the engagement team, collectively have the appropriate competence and capabilities, including sufficient time, to perform the audit engagement. (Ref: par. .A64 and .A74–.A77)

.27 If, as a result of complying with the requirements in paragraphs .25–.26, the engagement partner determines that resources assigned or made available are insufficient or inappropriate in the circumstances of the audit engagement, the engagement partner should take appropriate action, including communicating with appropriate individuals about the need to assign or make available additional or alternative resources to the engagement. (Ref: par. .A78–.A81)

.28 The engagement partner should take responsibility for using the resources assigned or made available to the engagement team appropriately, given the nature and circumstances of the audit engagement. (Ref: par. .A65–.A71)

Engagement Performance

Direction, Supervision, and Review

.29 The engagement partner should take responsibility for the direction and supervision of the members of the engagement team and the review of their work. (Ref: par. .A83)

.30 The engagement partner should determine that the nature, timing, and extent of direction, supervision, and review are (Ref: par. .A84–.A92 and .A97–.A100)

a. planned[8] and performed in accordance with the firm's policies or procedures, professional standards, and applicable legal and regulatory requirements, and

b. responsive to the nature and circumstances of the audit engagement and the resources assigned or made available to the engagement team by the firm.

.31 The engagement partner should review audit documentation at appropriate points in time during the audit engagement, including audit documentation relating to (Ref: par. .A93–.A96)

a. significant matters;[9]

b. significant judgments, including those relating to difficult or contentious matters identified during the audit engagement, and the conclusions reached; and

c. other matters that, in the engagement partner's professional judgment, are relevant to the engagement partner's responsibilities.

.32 On or before the date of the auditor's report, the engagement partner should determine, through review of audit documentation and discussion with the engagement team, that sufficient appropriate audit evidence has been obtained to support the conclusions reached and for the auditor's report to be issued. (Ref: par. .A93–.A97)

.33 Prior to dating the auditor's report, the engagement partner should review the financial statements and the auditor's report, including, if applicable, the description of the key audit matters[10] and related audit documentation, to determine that the report to be issued will be appropriate in the circumstances.[11]

---

[8] Paragraph .11 of section 300, *Planning an Audit.*

[9] Paragraph .08 of section 230, *Audit Documentation.*

[10] See section 701, *Communicating Key Audit Matters in the Auditor's Report.*

[11] See section 700, *Forming an Opinion and Reporting on Financial Statements*, or section 705, *Modifications to the Opinion in the Independent Auditor's Report.*

.34 The engagement partner should review, prior to their issuance, formal written communications to management, those charged with governance, or regulatory authorities. (Ref: par. .A101)

Consultation

.35 The engagement partner should do the following: (Ref: par. .A102–.A105)

a. Take responsibility for the engagement team undertaking consultation on
   i. difficult or contentious matters and matters on which the firm's policies or procedures require consultation and
   ii. other matters that, in the engagement partner's professional judgment, require consultation.
b. Determine that members of the engagement team have undertaken appropriate consultation during the audit engagement, both within the engagement team and between the engagement team and others at the appropriate level within or outside the firm.
c. Determine that the nature and scope of, and conclusions resulting from, such consultations are agreed with the party consulted.
d. Determine that conclusions agreed have been implemented.

Engagement Quality Review

.36 For audit engagements for which an engagement quality review is required, the engagement partner should (Ref: par. .A106)

a. determine that an engagement quality reviewer has been appointed.
b. cooperate with the engagement quality reviewer and inform other members of the engagement team of their responsibility to do so.
c. discuss significant matters and significant judgments arising during the audit engagement, including those identified during the engagement quality review, with the engagement quality reviewer.
d. not release the auditor's report until the completion of the engagement quality review. (Ref: par. .A107–.A109)

Differences of Opinion

.37 If differences of opinion arise within the engagement team, or between the engagement team and the engagement quality reviewer or individuals performing activities within the firm's system of quality management, including those who provide consultation, the engagement team should follow the firm's policies or procedures for dealing with and resolving such differences of opinion. (Ref: par. .A110–.A111)

.38 The engagement partner should

a. take responsibility for differences of opinion being addressed and resolved in accordance with the firm's policies or procedures.

b. determine that conclusions reached are documented and implemented.

c. not date the auditor's report until any differences of opinion are resolved.

Monitoring and Remediation

.39 The engagement partner should take responsibility for the following: (Ref: par. .A112–.A115)

a. Obtaining an understanding of the information from the firm's monitoring and remediation process, as communicated by the firm, including, as applicable, the information from the monitoring and remediation process of the network and across the network firms

b. Determining the relevance and effect on the audit engagement of the information referred to in paragraph .39*a* and taking appropriate action

c. Remaining alert throughout the audit engagement for information that may be relevant to the firm's monitoring and remediation process and communicating such information to those responsible for the process

Taking Overall Responsibility for Managing and Achieving Quality

.40 Prior to dating the auditor's report, the engagement partner should determine that the engagement partner has taken overall responsibility for managing and achieving quality on the audit engagement. In doing so, the engagement partner should determine that (Ref: par. .A115–.A118)

a. the engagement partner's involvement has been sufficient and appropriate throughout the audit engagement such that the engagement partner has the basis for determining that the significant judgments made and the conclusions reached are appropriate given the nature and circumstances of the engagement.

b. the nature and circumstances of the audit engagement, any changes thereto, and the firm's related policies or procedures have been taken into account in complying with the requirements of this section.

Documentation

.41 In applying section 230, *Audit Documentation*, the auditor should include the following in the audit documentation:[12] (Ref: par. .A120–.A123)

a. Significant issues identified, relevant discussions with personnel, and conclusions reached with respect to

[12] Paragraphs .08–.11 of section 230.

i. fulfillment of responsibilities relating to relevant ethical requirements, including those related to independence

ii. the acceptance and continuance of the client relationship and audit engagement

b. The nature and scope of, and conclusions resulting from, consultations undertaken during the audit engagement and how such conclusions were implemented

c. If the audit engagement is subject to an engagement quality review, that the engagement quality review has been completed before the release of the auditor's report

Application and Other Explanatory Material

Scope of This Section (Ref: par. .01)

.A1 This section applies to all audits of financial statements, including audits of group financial statements. Statement on Auditing Standards (SAS) No. 149, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors and Audits of Referred-to Auditors)* (sec. 600), addresses special considerations that apply to an audit of group financial statements, including when component auditors are involved or when the group auditor makes reference to the audit of a referred-to auditor. SAS No. 149 also provides guidance on how to adapt and apply the requirements of this section in an audit of group financial statements involving component auditors. SAS No. 149, adapted as necessary in the circumstances, may also be useful in an audit of financial statements when the engagement team includes individuals from another firm. For example, SAS No. 149 may be useful when involving such an individual to attend a physical inventory count; inspect property, plant, and equipment; or perform audit procedures at a shared service center at a remote location. [As amended, effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025, by SAS No. 149.]

The Firm's System of Quality Management and the Role of Engagement Teams (Ref: par. .03–.09)

.A2 SQMS No. 1 addresses a firm's responsibilities for designing, implementing, and operating its system of quality management.

.A3 Firms may use different terminology or frameworks to describe the components of the system of quality management.

The Engagement Team's Responsibilities Relating to the Firm's System of Quality Management (Ref: par. .04)

.A4 Quality management at the engagement level is supported by the firm's system of quality management and informed by the specific nature and circumstances of the audit engagement. In accordance with SQMS No. 1, the firm is responsible for communicating information that enables the engagement team to understand and carry out their responsibilities relating to performing engagements. For example, such communications may cover policies or procedures to undertake consultations with designated individuals in certain situations involving complex technical or ethical matters or to involve firm-designated experts in specific engagements to perform audit procedures related to particular matters (for example, the firm may specify that firm-designated credit-risk modeling experts are to be involved in auditing expected credit loss allowances in audits of financial institutions).

.A5 Firm-level responses may include policies or procedures established by a network or by other firms, structures, or organizations within the same network (network requirements or network services are described further in SQMS No. 1 within the "Network Requirements or Network Services" section).[13] The requirements of this section are based on the premise that the firm is responsible for taking the necessary action to enable engagement teams to implement or use network requirements or network services on the audit engagement (for example, a requirement to use an audit methodology developed for use by a network firm). Under SQMS No. 1, the firm is responsible for determining how network requirements or network services are relevant to, and are taken into account in, the firm's system of quality management.[14]

.A6 Some firm-level responses to quality risks are not performed at the engagement level but are, nevertheless, relevant when complying with the requirements of this section. For example, firm-level responses that the engagement team may be able to depend on when complying with the requirements of this section include the following:

- Personnel recruitment and professional training processes
- The IT applications that support the firm's monitoring of independence
- The development of IT applications that support the acceptance and continuance of client relationships and audit engagements
- The development of audit methodologies and related implementation tools and guidance

.A7 Due to the specific nature and circumstances of each audit engagement and changes that may occur during the audit engagement, a firm cannot identify all quality risks that may arise at the engagement level or set forth all relevant and appropriate responses. Accordingly, the engagement team exercises professional judgment in determining whether to design and implement responses, beyond those set forth in the firm's policies or procedures, at the engagement level to meet the objective of this section.[15]

.A8 The engagement team's determination of whether engagement-level responses are necessary (and, if so, what those responses are) is influenced by the requirements of this

[13] Paragraph 50*b* of SQMS No. 1.

[14] Paragraph 50*a* of SQMS No. 1.

[15] Section 200 requires the auditor to exercise professional judgment in planning and performing an audit of financial statements.

section, the engagement team's understanding of the nature and circumstances of the engagement, and any changes during the audit engagement. For example, unanticipated circumstances may arise during the engagement that may cause the engagement partner to request the involvement of appropriately experienced personnel in addition to those initially assigned or made available by the firm.

.A9 The relative balance of the engagement team's efforts to comply with the requirements of this section (that is, between implementing the firm's responses and designing and implementing engagement-specific responses beyond those set forth in the firm's policies or procedures) may vary. For example, the firm may design an audit program to be used in circumstances that are applicable to the audit engagement (for example, an industry-specific audit program). Other than determining the timing and extent of procedures to be performed, there may be little or no need for supplemental audit procedures to be added to the audit program at the engagement level. Alternatively, the engagement team's actions in complying with the engagement performance requirements of this section may be more focused on designing and implementing responses at the engagement level to deal with the specific nature and circumstances of the engagement (for example, planning and performing procedures to address risks of material misstatement not contemplated by the firm's audit programs).

.A10 Ordinarily, the engagement team may depend on the firm's policies or procedures in complying with the requirements of this section, unless

- the engagement team's understanding or practical experience indicates that the firm's policies or procedures will not effectively address the nature and circumstances of the engagement, or
- information provided by the firm or other parties about the effectiveness of such policies or procedures suggests they cannot be relied on (for example, information provided by the firm's monitoring activities, external inspections, or other relevant sources indicates that the firm's policies or procedures are not operating effectively).

.A11 If the engagement partner becomes aware (including by being informed by other members of the engagement team) that the firm's responses to quality risks are ineffective in the context of the specific engagement, or the engagement partner is unable to depend on the firm's policies or procedures, the engagement partner communicates such information promptly to the firm in accordance with paragraph .39*c* because such information is relevant to the firm's monitoring and remediation process. For example, if an engagement team member identifies that an audit software program has a security weakness, timely communication of such information to the appropriate personnel enables the firm to take steps to update and reissue the audit program. See also paragraph .A70 in respect of sufficient and appropriate resources.

Information Relevant to Quality Management at the Engagement Level (Ref: par. .05)

.A12 Complying with the requirements in other AU-C sections may provide information that is relevant to quality management at the engagement level. For example, the understanding of the entity and its environment required to be obtained under section 315, *Understanding* *the Entity and Its Environment and Assessing the Risks of Material Misstatement*, provides information that may be relevant to complying with the requirements of this section. Such information may be relevant to the determination of one or more of the following:

- The nature of resources to deploy for specific audit areas, such as the use of appropriately experienced team members for high-risk areas or the involvement of experts to deal with complex matters
- The amount of resources to allocate to specific audit areas, such as the number of team members assigned to attend the physical inventory count at multiple locations
- The nature, timing, and extent of review of the work performed by members of the team based on the assessed risks of material misstatement
- The allocation of the budgeted audit hours, including allocating more time and the time of more experienced engagement team members to those areas where there are more risks of material misstatement or the identified risks are assessed as higher

Scalability (Ref: par. .08)

.A13 In a smaller firm, the firm's policies or procedures may designate an engagement partner or partners, on behalf of the firm, to design many of the responses to the firm's quality risks at the engagement level because doing so may be a more effective approach to designing and implementing responses as part of the firm's system of quality management. Additionally, a smaller firm's policies or procedures may be less formal. For example, in a very small firm with a relatively small number of audit engagements, the firm may determine that there is no need to establish a firm-wide system to monitor independence and, rather, independence will be monitored at the individual engagement level by the engagement partner.

.A14 The requirements relating to direction, supervision, and review of the work of other members of the engagement team are only relevant if there are members of the engagement team other than the engagement partner.

Definitions

Engagement Team (Ref: par. .12)

.A15 The engagement team may be organized in a variety of ways. For example, engagement team members may be located together or across different geographic locations and may be organized in groups by the activity they are performing. Regardless of how the engagement team is organized, any individual who performs audit procedures[16] on the audit engagement, excluding an auditor's external specialist[17] and internal auditors who provide direct assistance on an engagement,[18] is a member of the engagement team.

[16] Paragraph .A44 of section 500, *Audit Evidence*.

[17] Paragraph .06 of section 620 defines the term *auditor's specialist*.

[18] Section 610 establishes limits on the use of direct assistance.

.A16 The definition of an *engagement team* focuses on individuals who perform audit procedures on the audit engagement. *Audit evidence*, which is necessary to support the auditor's opinion and report, is primarily obtained from audit procedures performed during the course of the audit.[19] Audit procedures comprise risk assessment procedures[20] and further audit procedures.[21] As explained in section 500, *Audit Evidence*, audit procedures may include inspection, observation, confirmation, recalculation, reperformance, analytical procedures, and inquiry, often performed in some combination.[22] Other AU-C sections may also include specific procedures to obtain audit evidence, for example, section 520, *Analytical Procedures*.

.A17 Engagement teams include personnel and may also include other individuals who perform audit procedures who are from

- a network firm, or
- a firm that is not a network firm or another service provider.[23]

For example, an individual from another firm may perform audit procedures on the financial information of a component in a group audit engagement, attend a physical inventory count, or inspect physical fixed assets at a remote location.

.A18 Engagement teams may also include individuals from service delivery centers who perform audit procedures. For example, it may be determined that specific tasks that are repetitive or specialized in nature will be performed by a group of appropriately skilled personnel; thus, the engagement team includes such individuals. Service delivery centers may be established by the firm, the network, or by other firms, structures, or organizations within the same network. For example, a centralized function may be used to facilitate external confirmation procedures.

.A19 Engagement teams may include individuals with expertise in a specialized area of accounting or auditing who perform audit procedures on the audit engagement, for example, individuals with expertise in accounting for income taxes or in analyzing complex information produced by automated tools and techniques for the purpose of identifying unusual or unexpected relationships. An individual is not a member of the engagement team if that individual's involvement with the engagement is limited to consultation. Consultations are addressed in paragraphs .35 and .A102–.A105.

.A20 If the audit engagement is subject to an engagement quality review, the engagement quality reviewer, and any other individuals performing the engagement quality review,

---

[19] Paragraph .A32 of section 200.

[20] Section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, provides requirements related to risk assessment procedures.

[21] Section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, provides requirements related to further audit procedures, including tests of controls and substantive procedures.

[22] Paragraph .A43 of section 500.

[23] Paragraph 17 of SQMS No. 1.

are not members of the engagement team. Such individuals may be subject to specific independence requirements.

.A21 An internal auditor providing direct assistance and an auditor's external specialist whose work is used in the engagement are not members of the engagement team.[24] Section 610, *Using the Work of Internal Auditors*, and section 620, *Using the Work of an Auditor's Specialist*, provide requirements and guidance for the auditor when using the work of internal auditors in a direct assistance capacity or when using the work of an external specialist, respectively. Compliance with these AU-C sections requires the auditor to obtain sufficient appropriate audit evidence on the work performed by an internal auditor who is providing direct assistance and perform audit procedures on the work of an auditor's specialist.

.A22 When joint auditors conduct an audit, the joint engagement partners and their engagement teams collectively constitute the "engagement partner" and "engagement team" for purposes of GAAS. This section does not, however, deal with the relationship between joint auditors or the work that one joint auditor performs in relation to the work of the other joint auditor. [Paragraph added, effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025, by SAS No. 149.]

.A23 Referred-to auditors are not members of the engagement team. Referred-to auditors are not component auditors.[25] [Paragraph added, effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025, by SAS No. 149.]

The Engagement Partner's Responsibilities (Ref: par. .09 and .12)

.A24 When this section expressly intends that a requirement or responsibility be fulfilled by the engagement partner, the engagement partner may need to obtain information from the firm or other members of the engagement team to fulfill the requirement (for example, information to make the required decision or judgment). For example, the engagement partner is required to determine that members of the engagement team collectively have the appropriate competence and capabilities to perform the audit engagement. To make a judgment on whether the competence and capabilities of the engagement team are appropriate, the engagement partner may need to use information compiled by the engagement team or from the firm's system of quality management. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

---

[24] See paragraphs .12–.13 of section 620 and paragraphs .20–.24 of section 610.

[25] Paragraph 16 of Statement on Auditing Standards (SAS) No. 149, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors and Audits of Referred-to Auditors)* (sec. 600). [Footnote added, effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025, by SAS No. 149.]

The Application of Firm Policies or Procedures by Members of the Engagement Team (Ref: par. .08 and .17)

.A25 Within the context of the firm's system of quality management, engagement team members from the firm are responsible for implementing the firm's policies or procedures that are applicable to the audit engagement. Engagement team members from another firm are neither partners nor staff of the engagement partner's firm. As such, they may not be subject to the firm's system of quality management or the firm's policies or procedures. Further, the policies or procedures of another firm may not be similar to those of the engagement partner's firm. For example, policies or procedures regarding direction, supervision, and review may be different, particularly when the other firm is in a jurisdiction with a different legal system, language, or culture than that of the engagement partner's firm. Accordingly, when the engagement team includes individuals who are from another firm, different actions may need to be taken by the firm or the engagement partner to implement the firm's policies or procedures with respect to the work of those individuals. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A26 In particular, the firm's policies or procedures may require the firm or the engagement partner to take different actions from those applicable to personnel when obtaining an understanding of whether an individual from another firm

- has the appropriate competence and capabilities to perform the audit engagement. For example, the individual would not be subject to the firm's recruitment and training processes, and therefore, the firm's policies or procedures may state that this determination can be made through other actions such as obtaining information from the other firm or a licensing or oversight body. SAS No. 149[26] contains guidance on obtaining an understanding of the competence and capabilities of component auditors.
- understands the ethical requirements that are relevant to the group audit engagement. For example, the individual would not be subject to the firm's training with regard to the firm's policies or procedures for relevant ethical requirements. The firm's policies or procedures may state that this understanding is obtained through other actions such as providing information, manuals, or guides containing the provisions of the relevant ethical requirements applicable to the audit engagement to the individual.
- will confirm independence. For example, individuals who are not personnel may not be able to complete independence declarations directly on the firm's independence systems. The firm's policies or procedures may state that such individuals can provide evidence of their independence in relation to the audit engagement in other ways, such as through written confirmation.

[Paragraph renumbered and amended, effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025, by SAS No. 149.]

---

[26] Paragraphs 28 and A72–A76 of SAS No. 149. [Footnote added, effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025, by SAS No. 149.]

.A27 When firm policies or procedures require specific activities to be undertaken in certain circumstances (for example, consultation on a particular matter), it may be necessary to communicate with individuals who are not personnel about what is expected of them to enable the engagement partner to comply with the firm's policies or procedures. For example, in a group audit engagement, communicating the group auditor's policies and procedures about matters subject to consultation to a component auditor enables the component auditor to determine which identified difficult or contentious matters that are relevant to the group financial statements to bring to the attention of the group auditor. [Paragraph renumbered and amended, effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025, by SAS No. 149.]

Firm (Ref: par. .12)

.A28 The definition of *firm* in relevant ethical requirements may differ from the definition set out in this section. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

"Network" and "Network Firm" (Ref: par. .12)

.A29 The definitions of *network* or *network firm* in relevant ethical requirements may differ from those set out in this section. The AICPA code also provides guidance in relation to the terms *network* and *network firm*. Networks and other network firms may be structured in a variety of ways and are in all cases external to the firm. The provisions in this section in relation to networks also apply to any structures or organizations that do not form part of the firm but that exist within the network. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Leadership Responsibilities for Managing and Achieving Quality in Audits (Ref: par. .13–.15)

Taking Overall Responsibility for Managing and Achieving Quality

.A30 SQMS No. 1 requires the firm to establish quality objectives that address the firm's governance and leadership, which support the design, implementation, and operation of the system of quality management. The engagement partner's responsibility for managing and achieving quality is supported by a firm culture that demonstrates a commitment to quality. In addressing the requirements in paragraphs .13–.14 of this section, the engagement partner may communicate directly to other members of the engagement team and reinforce this communication through personal conduct and actions (such as leading by example). A culture that demonstrates a commitment to quality is further shaped and reinforced by the engagement team members as they demonstrate expected behaviors when performing the engagement. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Scalability

.A31 The nature and extent of the actions of the engagement partner to demonstrate the firm's commitment to quality may depend on a variety of factors, including the size, structure, geographical dispersion, and complexity of the firm and the engagement team and the nature and circumstances of the audit engagement. With a smaller engagement team with few engagement team members, influencing the desired culture through direct interaction and conduct may be sufficient, whereas for a larger engagement team that is dispersed over many locations, more formal communications may be necessary. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Sufficient and Appropriate Involvement

.A32 Being sufficiently and appropriately involved throughout the audit engagement may be demonstrated by the engagement partner in different ways, including the following:

- Taking responsibility for the nature, timing, and extent of the direction and supervision of the members of the engagement team and the review of their work in complying with the requirements of this section
- Varying the nature, timing, and extent of such direction, supervision, and review in the context of the nature and circumstances of the engagement

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Communication

.A33 Communication is the means through which the engagement team shares relevant information on a timely basis to comply with the requirements of this section, thereby contributing to the achievement of quality on the audit engagement. Communication may be between or among members of the engagement team or with

a. the firm (for example, individuals performing activities within the firm's system of quality management, including those assigned ultimate or operational responsibility for the firm's system of quality management),

b. others involved in the audit (for example, internal auditors who provide direct assistance[27] or an auditor's external specialist[28]), or

c. parties that are external to the firm (for example, management, those charged with governance, or regulatory authorities).

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A34 The nature and circumstances of the audit engagement may affect the engagement partner's decisions regarding the appropriate means of effective communication with the members of the engagement team. For example, to support appropriate direction, supervision, and review, the firm may use IT applications to facilitate communication between the members of the engagement team when they are performing work across different geographical locations. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

---

[27] See paragraph .A47 of section 610. [Footnote renumbered by the issuance of SAS No. 149, March 2023.]

[28] See paragraphs .11*c* and .A33 of section 620. [Footnote renumbered by the issuance of SAS No. 149, March 2023.]

Professional Skepticism (Ref: par. .07)

.A35 The engagement partner is responsible for emphasizing the importance of each engagement team member maintaining professional skepticism throughout the audit engagement. Conditions inherent in some audit engagements can create pressures on the engagement team that may impede the appropriate exercise of professional skepticism when designing and performing audit procedures and evaluating audit evidence. Accordingly, when developing the overall audit strategy in accordance with section 300, *Planning an Audit*, the engagement team may need to consider whether such conditions exist in the audit engagement and, if so, what actions the firm or the engagement team may need to undertake to mitigate such impediments. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A36 Impediments to the exercise of professional skepticism at the engagement level may include the following:

- Budget constraints, which may discourage the use of sufficiently experienced or technically qualified resources, including experts, necessary for audits of entities in which technical expertise or specialized skills are needed for effective understanding, assessment of, and responses to risks and informed questioning of management.
- Tight deadlines, which may negatively affect the behavior of those who perform the work as well as those who direct, supervise, and review. For example, external time pressures may create restrictions to analyzing complex information effectively.
- Lack of cooperation or undue pressures imposed by management, which may negatively affect the engagement team's ability to resolve complex or contentious issues.
- Insufficient understanding of the entity and its environment, its system of internal control, and the applicable financial reporting framework, which may constrain the ability of the engagement team to make appropriate judgments and an informed questioning of management's assertions.
- Difficulties in obtaining access to records, facilities, certain employees, customers, vendors, or others, which may cause the engagement team to bias the selection of sources of audit evidence and seek audit evidence from sources that are more easily accessible.
- Overreliance on automated tools and techniques, which may result in the engagement team not critically assessing audit evidence.

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A37 Unconscious or conscious auditor biases may affect the engagement team's professional judgments, including, for example, in the design and performance of audit procedures, or the evaluation of audit evidence. Examples of unconscious auditor biases that may impede the exercise of professional skepticism and, therefore, the reasonableness of the professional judgments made by the engagement team in complying with the requirements of this section may include the following:

- *Availability bias*, which is a tendency to place more weight on events or experiences that immediately come to mind or are readily available than on those that are not
- *Confirmation bias*, which is a tendency to place more weight on information that corroborates an existing belief than information that contradicts or casts doubt on that belief
- *Groupthink*, which is a tendency to think or make decisions as a group, discouraging creativity or individual responsibility
- *Overconfidence bias*, which is a tendency to overestimate one's own ability to make accurate assessments of risk or other judgments or decisions
- *Anchoring bias*, which is a tendency to use an initial piece of information as an anchor against which subsequent information is inadequately assessed
- *Automation bias*, which is a tendency to favor output generated from automated systems, even when human reasoning or contradictory information raises questions about whether such output is reliable or fit for purpose

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A38 Possible actions that the engagement team may take to mitigate impediments to the exercise of professional skepticism at the engagement level may include the following:

- Remaining alert to changes in the nature or circumstances of the audit engagement that necessitate additional or different resources for the engagement and requesting additional or different resources from those individuals within the firm responsible for allocating or assigning resources to the engagement
- Explicitly alerting the engagement team to instances or situations in which vulnerability to unconscious or conscious auditor biases may be greater (for example, areas involving greater judgment) and emphasizing the importance of seeking advice from more experienced members of the engagement team in planning and performing audit procedures
- Changing the composition of the engagement team, for example, requesting that more experienced individuals with greater skills or knowledge or specific expertise be assigned to the engagement
- Involving more experienced members of the engagement team when dealing with members of management who are difficult or challenging to interact with
- Involving members of the engagement team with specialized skills and knowledge or an auditor's expert to assist the engagement team with complex or subjective areas of the audit
- Modifying the nature, timing, and extent of direction, supervision, or review by involving more experienced engagement team members, more in-person oversight on a more frequent basis, or more in-depth reviews of certain working papers for

- complex or subjective areas of the audit,
- areas that pose risks to achieving quality on the audit engagement,
- areas with a fraud risk, and
- identified or suspected noncompliance with laws or regulations

- Setting expectations for
  - less experienced members of the engagement team to seek advice frequently and in a timely manner from more experienced engagement team members or the engagement partner, and
  - more experienced members of the engagement team to be available to less experienced members of the engagement team throughout the audit engagement and to respond positively and in a timely manner to their insights, requests for advice, or assistance
- Communicating with those charged with governance when management imposes undue pressure or the engagement team experiences difficulties in obtaining access to records, facilities, certain employees, customers, vendors, or others from whom audit evidence may be sought

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Assigning Procedures, Tasks, or Actions to Other Members of the Engagement Team (Ref: par. .15)

.A39 Being sufficiently and appropriately involved throughout the audit engagement when procedures, tasks, or actions have been assigned to other members of the engagement team may be demonstrated by the engagement partner in different ways, including the following:

- Informing assignees about the nature of their responsibilities and authority, the scope of the work being assigned and the objectives thereof, and providing any other necessary instructions and relevant information
- Directing and supervising the assignees
- Reviewing the assignees' work to evaluate the conclusions reached, in addition to the requirements in paragraphs .29–.34

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Relevant Ethical Requirements, Including Those Related to Independence (Ref: par. .16–.21)

Relevant Ethical Requirements (Ref: par. .01 and .16–.21)

.A40 Section 200[29] requires that the auditor comply with relevant ethical requirements relating to financial statement audit engagements, including those requirements pertaining to independence. Relevant ethical requirements may vary depending on the nature and circumstances of the engagement. For example, certain requirements related to independence may be applicable only when performing audits of depository institutions or employee benefit plans. Section 600A includes additional requirements and guidance to those in this section regarding communications about relevant ethical requirements with component auditors. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A41 Based on the nature and circumstances of the audit engagement, certain law, regulation, or aspects of relevant ethical requirements, such as those pertaining to noncompliance with laws or regulations, may be relevant to the engagement (for example, laws or regulations dealing with money laundering, corruption, or bribery). [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A42 The firm's information system and the resources provided by the firm may assist the engagement team in understanding and fulfilling relevant ethical requirements applicable to the nature and circumstances of the audit engagement. For example, the firm may do the following:

- Communicate the independence requirements to engagement teams.
- Provide training for engagement teams on relevant ethical requirements.
- Establish manuals and guides (that is, intellectual resources) containing the provisions of the relevant ethical requirements and guidance on how they are applied in the nature and circumstances of the firm and its engagements.
- Assign personnel to manage and monitor compliance with relevant ethical requirements (for example, SQMS No. 1 requires that the firm obtains, at least annually, a documented confirmation of compliance with the independence requirements from all personnel required by relevant ethical requirements to be independent) or provide consultation on matters related to relevant ethical requirements.
- Establish policies or procedures for engagement team members to communicate relevant and reliable information to appropriate parties within the firm or to the engagement partner, such as policies or procedures for engagement teams to
  - — communicate information about client engagements and the scope of services, including nonassurance services, to enable the firm to identify threats to independence during the period of the engagement and during the period covered by the subject matter.
  - — communicate circumstances and relationships that may create a threat to independence so that the firm can evaluate whether such a threat is at an acceptable level and, if it is not, address the threat by eliminating it or reducing it to an acceptable level.

[29] Paragraphs .16 and .A15–.A21 of section 200. [Footnote renumbered by the issuance of SAS No. 149, March 2023.]

- — promptly communicate any breaches of the relevant ethical requirements, including those related to independence.

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A43 The engagement partner may take into account the information, communication, and resources described in paragraph .A42 when determining whether the engagement partner may depend on the firm's policies or procedures in complying with relevant ethical requirements. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A44 Open and robust communication between the members of the engagement team about relevant ethical requirements may also assist in

- drawing the attention of engagement team members to relevant ethical requirements that may be of particular significance to the audit engagement, and
- keeping the engagement partner informed about matters relevant to the engagement team's understanding and fulfillment of relevant ethical requirements and the firm's related policies or procedures.

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Identifying and Evaluating Threats to Compliance With Relevant Ethical Requirements (Ref: par. .17–.18)

.A45 In accordance with SQMS No. 1, the firm's responses to address the quality risks in relation to relevant ethical requirements, including those related to independence for engagement team members, include policies or procedures for identifying, evaluating, and addressing threats to compliance with the relevant ethical requirements. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A46 Relevant ethical requirements may contain provisions regarding the identification and evaluation of threats and how they are to be dealt with. For example, the "General Requirements for Performing Nonattest Services" interpretation (ET sec. 1.295.040) of the "Independence Rule" in the AICPA code provides guidance regarding safeguards for reducing threats to independence to an acceptable level when performing nonattest services for an attest client. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Breaches of Relevant Ethical Requirements (Ref: par. .19)

.A47 In accordance with SQMS No. 1, the firm is required to establish policies or procedures for identifying, communicating, evaluating, and reporting any breaches of relevant ethical requirements and appropriately responding to the causes and consequences of the breaches in a timely manner. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Taking Appropriate Action (Ref: par. .20)

.A48 Examples of appropriate actions may include the following:

- Following the firm's policies or procedures regarding breaches of relevant ethical requirements, including communicating to or consulting with the appropriate individuals so that appropriate action can be taken, including as applicable, disciplinary action.
- Communicating with those charged with governance.
- Communicating with regulatory authorities or professional bodies. In some circumstances, communication with regulatory authorities may be required by law or regulation.
- Seeking legal advice.
- Withdrawing from the audit engagement when withdrawal is possible under applicable law or regulation.

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Prior to Dating the Auditor's Report (Ref: par. .21)

.A49 Section 700, *Forming an Opinion and Reporting on Financial Statements*, requires that the auditor's report include a statement that the auditor is independent of the entity in accordance with the relevant ethical requirements relating to the audit and that the auditor has fulfilled the auditor's other ethical responsibilities in accordance with these requirements.[30] Performing the procedures required by paragraphs .16–.21 of this section provides the basis for these statements in the auditor's report. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Considerations Specific to Governmental Audit Organizations

.A50 Law or regulation may provide safeguards for the independence of governmental audit organizations and the auditors they employ. However, in the absence of law or regulation, governmental audit organizations may establish supplemental safeguards to assist the auditor or audit organization in maintaining independence. Additionally, when law or regulation does not permit withdrawal from the engagement, the auditor may disclose in the auditor's report the circumstances affecting the auditor's independence. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Acceptance and Continuance of Client Relationships and Audit Engagements (Ref: par. .22–.24)

.A51 SQMS No. 1 requires the firm to establish quality objectives that address the acceptance and continuance of client relationships and specific engagements. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A52 Information such as the following may assist the engagement partner in determining whether the conclusions reached regarding the acceptance and continuance of client relationships and audit engagements are appropriate:

[30] Paragraph .28*c* of section 700. [Footnote renumbered by the issuance of SAS No. 149, March 2023.]

- The integrity and ethical values of the principal owners, key management, and those charged with governance of the entity
- Whether sufficient and appropriate resources are available to perform the engagement
- Whether management and those charged with governance have acknowledged their responsibilities in relation to the engagement
- Whether the engagement team has the competence and capabilities, including sufficient time, to perform the engagement
- Whether significant matters that have arisen during the current or previous engagement have implications for continuing the engagement

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A53 Under SQMS No. 1, for acceptance and continuance decisions, the firm is required to make judgments about the firm's ability to perform the engagement in accordance with professional standards and applicable legal and regulatory requirements. The engagement partner may use the information considered by the firm in this regard in determining whether the conclusions reached regarding the acceptance and continuance of client relationships and audit engagements are appropriate. If the engagement partner has concerns regarding the appropriateness of the conclusions reached, the engagement partner may discuss the basis for those conclusions with those involved in the acceptance and continuance process. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A54 If the engagement partner is directly involved throughout the firm's acceptance and continuance process, the engagement partner will be aware of the information obtained or used by the firm in reaching the related conclusions. Such direct involvement may also provide a basis for the engagement partner's determination that the firm's policies or procedures have been followed and that the conclusions reached are appropriate. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A55 Information obtained during the acceptance and continuance process may assist the engagement partner in complying with the requirements of this section and making informed decisions about appropriate courses of action. Such information may include the following:

- Information about the size, complexity, and nature of the entity, including whether it is a group audit, the industry in which it operates, and the applicable financial reporting framework
- The entity's timetable for reporting, such as at interim and final stages
- In relation to group audits, the nature of the control relationships between the parent and its entities or business units
- Whether there have been changes in the entity or in the industry in which the entity operates since the previous audit engagement that may affect the nature of resources

required, as well as the manner in which the work of the engagement team will be directed, supervised, and reviewed

[Paragraph renumbered and amended, effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025, by SAS No. 149.]

.A56 Information obtained during acceptance and continuance may also be relevant in complying with the requirements of other sections, as well as this section, for example, with respect to the following:

- Establishing an understanding of the terms of the audit engagement, as required by section 210, *Terms of Engagement*[31]
- Identifying and assessing risks of material misstatement, whether due to error or fraud, in accordance with section 315 and section 240, *Consideration of Fraud in a Financial Statement Audit*
- Understanding the group and its environments, in the case of an audit of group financial statements in accordance with SAS No. 149, and directing, supervising, and reviewing the work of component auditors
- Determining whether, and how, to involve an auditor's specialist in accordance with section 620
- The entity's governance structure in accordance with section 260, *The Auditor's Communication With Those Charged With Governance*, and section 265, *Communicating Internal Control Related Matters Identified in an Audit*

[Paragraph renumbered and amended, effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025, by SAS No. 149.]

.A57 Law, regulation, or relevant ethical requirements may require the successor auditor to request, prior to accepting the audit engagement, the predecessor auditor to provide known information regarding any facts or circumstances that, in the predecessor auditor's judgment, the successor auditor needs to be aware of before deciding whether to accept the engagement. In some circumstances, the predecessor auditor may be required, on request by the proposed successor auditor, to provide information regarding identified or suspected noncompliance with laws and regulations to the proposed successor auditor. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A58 In circumstances in which the firm is obligated by law or regulation to accept or continue an audit engagement, the engagement partner may take into account information obtained by the firm about the nature and circumstances of the engagement. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

[31] Paragraph .09 of section 210, *Terms of Engagement*. [Footnote renumbered by the issuance of SAS No. 149, March 2023.]

.A59 In deciding on the necessary action, the engagement partner and the firm may conclude that it is appropriate to continue with the audit engagement and, if so, determine what additional steps are necessary at the engagement level (for example, the assignment of more staff or staff with specific expertise). If the engagement partner has further concerns or is not satisfied that the matter has been appropriately resolved, the firm's policies or procedures for resolving differences of opinion may be applicable. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Considerations Specific to Governmental Audit Organizations (Ref: par. .22–.24)

.A60 When the auditor is a government audit organization, the auditor may be appointed in accordance with law or regulation, and the auditor may not need to establish all policies or procedures regarding the acceptance and continuance of audit engagements. Nevertheless, the requirements and considerations for the acceptance and continuance of client relationships and engagements as set out in paragraphs .22–.24 and .A51–.A59 may be valuable to such auditors in performing risk assessments and in carrying out reporting responsibilities. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Engagement Resources (Ref: par. .25–.28)

.A61 Under SQMS No. 1, the resources assigned or made available by the firm to support the performance of audit engagements include

- human resources,
- technological resources, and
- intellectual resources.

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A62 Resources for an audit engagement are primarily assigned or made available by the firm, although there may be circumstances in which the engagement team directly obtains resources for the audit engagement. For example, this may be the case when a component auditor is required by statute, regulation, or for another reason to express an audit opinion on the financial statements of a component, and the component auditor is also appointed by component management to perform audit procedures on behalf of the group auditor.[32] In such circumstances, the firm's policies or procedures may require the engagement partner to take different actions, such as requesting information from the component auditor, to determine whether sufficient and appropriate resources are assigned or made available. [Paragraph renumbered and amended, effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025, by SAS No. 149.]

.A63 A relevant consideration for the engagement partner, in complying with the requirements in paragraphs .25–.26, may be whether the resources assigned or made

[32] See paragraph A10 of SAS No. 149. [Footnote renumbered and amended, effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025, by SAS No. 149.]

available to the engagement team enable fulfillment of relevant ethical requirements, including ethical principles such as professional competence and due care. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Human Resources

.A64 Human resources include members of the engagement team (see also paragraphs .A5 and .A15–.A21) and, when applicable, an auditor's external specialist and individuals from within the entity's internal audit function who provide direct assistance on the audit. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Technological Resources

.A65 The use of technological resources on the audit engagement may assist the auditor in obtaining sufficient appropriate audit evidence. Technological resources may include tools that allow the auditor to more effectively and efficiently manage the audit. Technological tools may also allow the auditor to evaluate large amounts of data more easily to, for example, provide deeper insights, identify unusual trends, or more effectively challenge management's assertions, which enhances the ability of the auditor to exercise professional skepticism. Technological tools may also be used to conduct meetings and provide communication tools to the engagement team. Inappropriate use of technological resources may, however, increase the risk of overreliance on the information produced for decision-making purposes or may create threats to complying with relevant ethical requirements, for example, requirements related to confidentiality. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A66 The firm's policies or procedures may include required considerations or responsibilities for the engagement team when using firm-approved technological tools to perform audit procedures and may require, depending on the tool used, the involvement of individuals with specialized skills or expertise in evaluating or analyzing the output. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A67 When the engagement partner requires individuals from another firm to use specific automated tools and techniques when performing audit procedures, communications with those individuals may indicate that the use of such automated tools and techniques needs to comply with the engagement team's instructions. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A68 The firm's policies or procedures may specifically prohibit the use of certain IT applications or features of IT applications (for example, software that has not yet been specifically approved for use by the firm). Alternatively, the firm's policies or procedures may require the engagement team to take certain actions before using an IT application that is not firm approved to determine it is appropriate for use, for example, by requiring

- the engagement team to have appropriate competence and capabilities to use the technological resource.
- testing of the operation and security of the IT application.

- specific documentation to be included in the audit file.

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A69 The engagement partner may exercise professional judgment in considering whether the use of an IT application on the audit engagement is appropriate in the context of the engagement, and if so, how the IT application is to be used. Factors that may be considered in determining whether a particular IT application that has not been specifically approved for use by the firm is appropriate for use in the audit engagement include whether

- use and security of the IT application comply with the firm's policies or procedures.
- the IT application operates as intended.
- personnel have the competence and capabilities required to use the IT application.

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Intellectual Resources

.A70 Intellectual resources include, for example, audit methodologies, implementation tools, auditing guides, model programs, templates, checklists, or forms. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A71 The use of intellectual resources on the audit engagement may facilitate the consistent application and understanding of professional standards, law and regulation, and related firm policies or procedures. For this purpose, the engagement team may be required, in accordance with the firm's policies or procedures, to use the firm's audit methodology and specific tools and guidance. The engagement team may also consider whether the use of other intellectual resources is appropriate and relevant based on the nature and circumstances of the engagement, for example, an industry-specific methodology or related guides and performance aids. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Sufficient and Appropriate Resources to Perform the Engagement (Ref: par. .25)

.A72 In determining whether sufficient and appropriate resources to perform the engagement have been assigned or made available to the engagement team, ordinarily, the engagement partner may depend on the firm's related policies or procedures (including resources) as described in paragraph .A6. For example, based on information communicated by the firm, the engagement partner may be able to depend on the firm's technological development, implementation, and maintenance programs when using firm-approved technology to perform audit procedures. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A73 The engagement partner may find it necessary to seek input from others with responsibilities for direction, supervision, and review to make the determinations required by paragraphs .25–.27 of this section. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Competence and Capabilities of the Engagement Team (Ref: par. .26)

.A74 When determining that the engagement team has the appropriate competence and capabilities, the engagement partner may take into consideration such matters as the team's

- understanding of, and practical experience with, audit engagements of a similar nature and complexity through appropriate training and participation.
- understanding of professional standards and applicable legal and regulatory requirements.
- expertise in specialized areas of accounting or auditing.
- expertise in IT used by the entity or automated tools or techniques that are to be used by the engagement team in planning and performing the audit engagement.
- knowledge of relevant industries in which the entity being audited operates.
- ability to exercise professional skepticism and professional judgment.
- understanding of the firm's policies or procedures.

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A75 Internal auditors and an auditor's external specialist are not members of the engagement team. Section 610[33] and section 620[34] include requirements and guidance relating to the assessment of the competence and capabilities of internal auditors and an auditor's external specialist, respectively. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Project Management

.A76 In situations in which there are many engagement team members, for example, in an audit of a larger or more complex entity, the engagement partner may involve an individual who has specialized skills or knowledge in project management, supported by appropriate technological and intellectual resources of the firm. Conversely, in an audit of a less complex entity with few engagement team members, project management may be achieved by a member of the engagement team through less formal means. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A77 Project management techniques and tools may support the engagement team in managing the quality of the audit engagement by, for example,

- increasing the engagement team's ability to exercise professional skepticism through alleviating budget or time constraints that may otherwise impede the exercise of professional skepticism.

[33] Paragraph .13 of section 610. [Footnote renumbered by the issuance of SAS No. 149, March 2023.]

[34] Paragraph .09 of section 620. [Footnote renumbered by the issuance of SAS No. 149, March 2023.]

- facilitating timely performance of audit work to effectively manage time constraints at the end of the audit process when more difficult or contentious matters may arise.
- monitoring the progress of the audit against the audit plan,[35] including the achievement of key milestones, which may assist the engagement team in being proactive in identifying the need for making timely adjustments to the audit plan and the assigned resources.
- facilitating communication among members of the engagement team, for example, coordinating arrangements with component auditors and auditor's experts.

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

*Insufficient or Inappropriate Resources (Ref: **par. .27**)*

.A78 SQMS No. 1 addresses the firm's commitment to quality through its culture that exists throughout the firm, which recognizes and reinforces the firm's role in serving the public interest by consistently performing quality engagements, and the importance of quality in the firm's strategic decisions and actions, including the firm's financial and operational priorities. SQMS No. 1 also addresses the firm's responsibilities for planning for resource needs and obtaining, allocating, or assigning resources in a manner that is consistent with the firm's commitment to quality. However, in certain circumstances, the firm's financial and operational priorities may place constraints on the resources assigned or made available to the engagement team. In such circumstances, these constraints do not override the engagement partner's responsibility for achieving quality at the engagement level, including for determining that the resources assigned or made available by the firm are sufficient and appropriate to perform the audit engagement. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

[.A79] [Paragraph renumbered and deleted by the issuance of SAS No. 149, March 2023.]

.A80 The engagement partner's determination of whether additional engagement level resources are required is a matter of professional judgment and is influenced by the requirements of this section and the nature and circumstances of the audit engagement. As described in paragraph .A11, in certain circumstances, the engagement partner may determine that the firm's responses to quality risks are ineffective in the context of the specific engagement, including that certain resources assigned or made available to the engagement team are insufficient. In those circumstances, the engagement partner is required to take appropriate action, including communicating such information to the appropriate individuals in accordance with paragraphs .27 and .39*c*. For example, if an audit software program provided by the firm has not incorporated new or revised audit procedures regarding recently issued industry regulation, timely communication of such information to the firm enables the firm to take steps to update and reissue the software promptly or to provide an alternative resource that enables the engagement team to comply with the new regulation in the performance of the audit engagement. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

[35] See paragraph .09 of section 300. [Footnote renumbered by the issuance of SAS No. 149, March 2023.]

.A81 If the resources assigned or made available are insufficient or inappropriate in the circumstances of the engagement and additional or alternative resources have not been made available, appropriate actions may include the following:

- Changing the planned approach to the nature, timing, and extent of direction, supervision, and review (see also paragraph .A97)
- Discussing an extension to reporting deadlines with management or those charged with governance, when an extension is possible under applicable law or regulation
- Following the firm's policies or procedures for resolving differences of opinion if the engagement partner does not obtain the necessary resources for the audit engagement
- Following the firm's policies or procedures for withdrawing from the audit engagement, when withdrawal is possible under applicable law or regulation

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Considerations Specific to Audits of Governmental Entities (Ref: par. .25–.28)

.A82 For audits of governmental entities, competence may include skills that are necessary to comply with applicable law or regulation, such as knowledge of *Government Auditing Standards* and an understanding of the applicable reporting requirements, including reporting to the legislature or other governing body or reporting in the public interest. The scope of a governmental audit may include, for example, additional requirements with respect to detecting misstatements that result from violations of provisions of contracts or grant agreements that could have a direct and material effect on the determination of financial statement amounts or the need to examine and report on internal control over financial reporting or compliance. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Engagement Performance

Scalability (Ref: par. .29)

.A83 When an audit is not carried out entirely by the engagement partner, or in an audit of an entity whose nature and circumstances are more complex, it may be necessary for the engagement partner to assign direction, supervision, and review to other members of the engagement team. However, as part of the engagement partner's overall responsibility for managing and achieving quality on the audit engagement and to be sufficiently and appropriately involved, the engagement partner is required to determine that the nature, timing, and extent of direction, supervision, and review is undertaken in accordance with paragraph .30. In such circumstances, personnel or members of the engagement team, including component auditors, may provide information to the engagement partner to enable the engagement partner to make the determination required by paragraph .30. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Direction, Supervision, and Review (Ref: par. .30)

.A84 Under SQMS No. 1, the firm is required to establish a quality objective that addresses the nature, timing, and extent of the direction and supervision of engagement teams and review of their work. SQMS No. 1 also requires that such direction, supervision, and review be planned and performed on the basis that the work performed by less experienced members of the engagement team be directed, supervised, and reviewed by more experienced engagement team members. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A85 Direction and supervision of the engagement team and the review of the work of the engagement team are firm-level responses that are implemented at the engagement level, of which the nature, timing, and extent may be further tailored by the engagement partner in managing the quality of the audit engagement. Accordingly, the approach to direction, supervision, and review will vary from one engagement to the next, taking into account the nature and circumstances of the engagement. The approach will generally include a combination of addressing the firm's policies or procedures and engagement-specific responses. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A86 The approach to the direction and supervision of the members of the engagement team and the review of their work provides support for the engagement partner in fulfilling the requirements of this section and in concluding that the engagement partner has been sufficiently and appropriately involved throughout the audit engagement in accordance with paragraph .40. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A87 Ongoing discussion and communication among members of the engagement team allows less experienced engagement team members to raise questions with more experienced engagement team members (including the engagement partner) in a timely manner and enables effective direction, supervision, and review in accordance with paragraph .30. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Direction

.A88 Direction of the engagement team may involve informing the members of the engagement team of their responsibilities, such as the following:

- Contributing to the management and achievement of quality at the engagement level through their personal conduct, communication, and actions
- Maintaining a questioning mind and being aware of unconscious or conscious auditor biases in maintaining professional skepticism when gathering and evaluating audit evidence (see paragraph .A37)
- Fulfilling relevant ethical requirements
- The responsibilities of respective partners when more than one partner is involved in the conduct of an audit engagement

- The responsibilities of respective engagement team members to perform audit procedures and of more experienced engagement team members to direct, supervise, and review the work of less experienced engagement team members
- Understanding the objectives of the work to be performed and the detailed instructions regarding the nature, timing, and extent of planned audit procedures as set forth in the overall audit strategy and audit plan
- Addressing threats to the achievement of quality, and the engagement team's expected response, for example, the threat that budget constraints or resource constraints result in the engagement team members inappropriately modifying planned audit procedures or failing to perform planned audit procedures

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Supervision

.A89 Supervision may include matters such as the following:

- Tracking the progress of the audit engagement, which includes monitoring
  - — the progress against the audit plan,
  - — whether the objective of work performed has been achieved, and
  - — the ongoing adequacy of assigned resources
- Taking appropriate action to address issues arising during the engagement, including, for example, reassigning planned audit procedures to more experienced engagement team members when issues are more complex than initially anticipated
- Identifying matters for consultation or consideration by more experienced engagement team members during the audit engagement
- Providing coaching and on-the-job training to help engagement team members develop skills or competencies
- Creating an environment where engagement team members raise concerns without fear of reprisals

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Review

.A90 Review of the engagement team's work provides support for the conclusion that the requirements of this section have been addressed. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A91 Review of the engagement team's work consists of consideration of whether, for example,

- the work has been performed in accordance with the firm's policies or procedures, professional standards, and applicable legal and regulatory requirements;
- significant matters have been raised for further consideration;
- appropriate consultations have taken place, and the resulting conclusions have been documented and implemented;
- there is a need to revise the nature, timing, and extent of work performed;
- the work performed supports the conclusions reached and is appropriately documented;
- the evidence obtained is sufficient and appropriate to provide a basis for the auditor's opinion; and
- the objectives of the audit procedures have been achieved.

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A92 The firm's policies or procedures may contain specific requirements regarding

- the nature, timing, and extent of review of audit documentation;
- different types of review that may be appropriate in different situations (for example, review of each individual working paper or selected working papers); and
- which members of the engagement team are required to perform the different types of review.

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

The Engagement Partner's Review (Ref: par. .30–.34)

.A93 As required by section 300, the engagement partner reviews the overall audit strategy and audit plan.[36] As required by section 230, the engagement partner documents the date and extent of the review.[37] [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A94 Timely review of documentation by the engagement partner at appropriate stages throughout the audit engagement enables significant matters to be resolved to the engagement partner's satisfaction on or before the date of the auditor's report. The engagement partner need not review all audit documentation. The engagement partner exercises professional judgment in determining the extent of documentation to be reviewed, for example, when determining the nature and extent of the review of component auditor documentation in a group audit. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

[36] Paragraph .11 of section 300, as amended by Statement on Auditing Standards No. 146, *Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards* (sec. 220). [Footnote renumbered by the issuance of SAS No. 149, March 2023.]

[37] Paragraph .09*c* of section 230. [Footnote renumbered by the issuance of SAS No. 149, March 2023.]

.A95 The engagement partner exercises professional judgment in identifying the areas of significant judgment made by the engagement team. The firm's policies or procedures may specify certain matters that are commonly expected to be significant judgments. Significant judgments in relation to the audit engagement may include matters related to the overall audit strategy and audit plan for undertaking the engagement, the execution of the engagement, and the overall conclusions reached by the engagement team. Examples follow:

- Matters related to planning the engagement, such as matters related to determining materiality
  - — The composition of the engagement team, including
    - personnel using expertise in a specialized area of accounting or auditing
    - the use of personnel from service delivery centers
  - — The decision to involve an auditor's specialist, including the decision to involve an external specialist
- The engagement team's consideration of information obtained in the acceptance and continuance process and proposed responses to that information
- The engagement team's risk assessment process, including situations in which consideration of inherent risk factors and the assessment of inherent risk requires significant judgment by the engagement team
- The engagement team's consideration of related party relationships and transactions and disclosures
- Results of the procedures performed by the engagement team on significant areas of the engagement, for example, conclusions concerning certain accounting estimates, accounting policies, or going concern considerations
- The engagement team's evaluation of the work performed by specialists and conclusions drawn therefrom
- In group audit situations,
  - — the proposed overall group audit strategy and group audit plan;
  - — decisions about the involvement of component auditors, including how to direct and supervise them and review their work; and
  - — the evaluation of work performed by component auditors and the conclusions drawn therefrom
- How matters affecting the overall audit strategy and audit plan have been addressed
- The significance and disposition of corrected and uncorrected misstatements identified during the engagement

- The proposed audit opinion and matters to be communicated in the auditor's report, for example, key audit matters, or a "Material Uncertainty Related to Going Concern" paragraph.

[Paragraph renumbered and amended, effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025, by SAS No. 149.]

.A96 The engagement partner exercises professional judgment in determining other matters to review, for example, based on

- the nature and circumstances of the audit engagement.
- which engagement team member performed the work.
- matters relating to recent inspection findings.
- the requirements of the firm's policies or procedures.

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Nature, Timing, and Extent

.A97 The nature, timing, and extent of the direction, supervision, and review are required to be planned and performed in accordance with the firm's policies or procedures, as well as professional standards and applicable legal and regulatory requirements. For example, the firm's policies or procedures may include the following:

- Work planned to be performed at an interim date is to be directed, supervised, and reviewed at the same time as the performance of the procedures, rather than at the end of the period, so that any necessary corrective action can be taken in a timely manner.
- Certain matters are to be reviewed by the engagement partner, and the firm may specify the circumstances or engagements in which such matters are expected to be reviewed.

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Scalability

.A98 The following are examples of factors that may influence the firm's approach to direction, supervision, and review:

- The engagement team member's previous experience with the entity and the area to be audited. For example, if the work related to the entity's information system is being performed by the same engagement team member who performed the work in the prior period and there are no significant changes to the information system, the extent and frequency of the direction and supervision of the engagement team member may be less, and the review of the related working papers may be less detailed.

- The complexity of the audit engagement. For example, if significant events have occurred that make the audit engagement more complex, the extent and frequency of the direction and supervision of the engagement team member may be greater, and the review of the related working papers may be more detailed.
- The assessed risks of material misstatement. For example, a higher assessed risk of material misstatement may require a corresponding increase in the extent and frequency of the direction and supervision of engagement team members and a more detailed review of their work.
- The competence and capabilities of the individual engagement team members performing the audit work. For example, less experienced engagement team members may require more detailed instructions and more frequent, or in-person, interactions as the work is performed.
- The manner in which the reviews of the work performed are expected to take place. For example, in some circumstances, remote reviews may not be effective in providing the necessary direction and may need to be supplemented by in-person interactions.
- The structure of the engagement team and the location of engagement team members. For example, direction and supervision of individuals located at service delivery centers and the review of their work may
  - — be more formalized and structured than when members of the engagement team are all situated in the same location or
  - — use IT to facilitate the communication between the members of the engagement team.

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A99 Identification of changes in the engagement circumstances may warrant reevaluation of the planned approach to the nature, timing, or extent of direction, supervision, or review. For example, if the assessed risk of material misstatement at the financial statement level increases because of a complex transaction, the engagement partner may need to change the planned level of review of the work related to the transaction. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A100 In accordance with paragraph .30*b*, the engagement partner is required to determine that the approach to direction, supervision, and review is responsive to the nature and circumstances of the audit engagement. For example, if a more experienced engagement team member becomes unavailable to participate in the supervision and review of the engagement team, the engagement partner may need to increase the extent of supervision and review of the less experienced engagement team members. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Review of Communications to Management, Those Charged With Governance, or Regulatory Authorities (Ref: par. .34)

.A101 The engagement partner uses professional judgment in determining which written communications to review, taking into account the nature and circumstances of the audit engagement. For example:

- It may not be necessary for the engagement partner to review communications between the engagement team and management in the ordinary course of the audit.
- In group audit situations, the engagement partner may determine to review formal written communications to group management, those charged with governance of the group, or regulatory authorities relevant to the group.

[Paragraph renumbered and amended, effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025, by SAS No. 149.]

Consultation (Ref: par. .35)

.A102 SQMS No. 1 requires the firm to establish a quality objective that addresses consultation on difficult or contentious matters and how the conclusions agreed are implemented. Consultation may be appropriate or required, for example, for

- issues that are complex or unfamiliar (for example, issues related to an accounting estimate with a high degree of estimation uncertainty),
- significant risks,
- significant transactions that are outside the normal course of business for the entity or that otherwise appear to be unusual,
- limitations imposed by management, and
- noncompliance with laws or regulations.

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A103 Effective consultation on significant technical, ethical, and other matters within the firm or, where applicable, outside the firm, may be achieved when those consulted

- are given all the relevant facts that will enable them to provide informed advice and
- have appropriate knowledge, seniority, and experience.

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A104 It may be appropriate for the engagement team, in the context of the firm's policies or procedures, to consult outside the firm, for example, in areas where the firm lacks appropriate internal resources. The engagement team may take advantage of advisory services provided by firms, professional and regulatory bodies, or commercial organizations that provide relevant quality control services. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A105 The need for consultation outside the engagement team on a difficult or contentious matter may be an indicator that the matter is a key audit matter.[38] [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Engagement Quality Review (Ref: par. .36)

.A106 SQMS No. 1 contains requirements that the firm establish policies or procedures addressing engagement quality reviews in accordance with SQMS No. 2, *Engagement Quality Reviews* (QM sec. 20),[39] and requiring an engagement quality review for certain types of engagements.[40] SQMS No. 2 deals with the appointment and eligibility of the engagement quality reviewer and the engagement quality reviewer's responsibilities relating to performing and documenting an engagement quality review. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Completion of the Engagement Quality Review Before Dating of the Auditor's Report (Ref: par. .36d)

.A107 Section 700 requires the auditor's report to be dated no earlier than the date on which the auditor has obtained sufficient appropriate audit evidence on which to base the auditor's opinion on the financial statements.[41] If applicable to the audit engagement, SQMS No. 2 and this section require that the engagement partner be precluded from releasing the engagement report until notification has been received from the engagement quality reviewer that the engagement quality review is complete. For example, if the engagement quality reviewer has communicated to the engagement partner concerns about the significant judgments made by the engagement team or that the conclusions reached thereon were not appropriate, then the engagement quality review is not complete.[42] [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A108 An engagement quality review that is conducted in a timely manner at appropriate stages during the audit engagement may assist the engagement team in promptly resolving matters raised to the engagement quality reviewer's satisfaction on or before the date of the auditor's report. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A109 Frequent communications between the engagement team and the engagement quality reviewer throughout the audit engagement may assist in facilitating an effective and timely engagement quality review. In addition to discussing significant matters with the engagement quality reviewer, the engagement partner may assign responsibility for

[39] SQMS No. 2, *Engagement Quality Reviews* (QM sec. 20). [Footnote renumbered by the issuance of SAS No. 149, March 2023.]

[40] Paragraph 35*f* of SQMS No. 1. [Footnote renumbered by the issuance of SAS No. 149, March 2023.]

[41] Paragraph .43 of section 700. [Footnote renumbered by the issuance of SAS No. 149, March 2023.]

[42] Paragraph 21*b* of SQMS No. 2. [Footnote renumbered by the issuance of SAS No. 149, March 2023.]

coordinating requests from the engagement quality reviewer to another member of the engagement team. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Differences of Opinion (Ref: par. .37–.38)

.A110 SQMS No. 1 requires the firm to establish a quality objective that addresses differences of opinion that arise within the engagement team or between the engagement team and the engagement quality reviewer or individuals performing activities within the firm's system of quality management. SQMS No. 1 also requires that differences of opinion be brought to the attention of the firm and resolved. For example, a component auditor may be instructed to communicate differences of opinion to the group engagement team. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A111 In some circumstances, the engagement partner may not be satisfied with the resolution of the difference of opinion. In such circumstances, appropriate actions for the engagement partner may include, for example,

- seeking legal advice or
- withdrawing from the audit engagement, when withdrawal is possible under applicable law or regulation.

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Monitoring and Remediation (Ref: par. .39)

.A112 SQMS No. 1 sets out requirements for the firm's monitoring and remediation process. SQMS No. 1 requires the firm to communicate to engagement teams information about the firm's monitoring and remediation process to enable them to take prompt and appropriate action in accordance with their responsibilities. Further, information provided by members of the engagement team may be used by the firm in the firm's monitoring and remediation process, and exercising professional judgment and maintaining professional skepticism while conducting the audit may assist the members of the engagement team in remaining alert for information that may be relevant to that process. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A113 Information provided by the firm may be relevant to the audit engagement when, for example, it relates to findings on another engagement performed by the engagement partner or other members of the engagement team, findings from the local firm office, or inspection results of previous audits of the entity. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A114 In considering information communicated by the firm through its monitoring and remediation process and how it may affect the audit engagement, the engagement partner may consider the remedial actions designed and implemented by the firm to address deficiencies and, to the extent relevant to the nature and circumstances of the engagement, communicate accordingly to the engagement team. The engagement partner may also determine whether additional remedial actions are needed at the engagement level. For example, the engagement partner may determine that

- an auditor's specialist is needed or
- the nature, timing, and extent of direction, supervision, and review need to be enhanced in an area of the audit where deficiencies have been identified.

If an identified deficiency does not affect the quality of the audit (for example, if it relates to a technological resource that the engagement team did not use), then no further action may be needed. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A115 A deficiency in the firm's system of quality management does not necessarily indicate that an audit engagement was not performed in accordance with professional standards and applicable legal and regulatory requirements or that the auditor's report was not appropriate in the circumstances. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Taking Overall Responsibility for Managing and Achieving Quality (Ref: par. .40)

.A116 SQMS No. 1 requires the firm to establish a quality objective addressing the engagement team's understanding and fulfillment of their responsibilities in connection with the engagement. SQMS No. 1 further requires that the quality objective include the overall responsibility of engagement partners for managing and achieving quality on the engagement and being sufficiently and appropriately involved throughout the engagement. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A117 Relevant considerations in addressing paragraph .40 include determining how the engagement partner has complied with the requirements of this section, given the nature and circumstances of the audit engagement and how the audit documentation evidences the engagement partner's involvement throughout the audit engagement, as described in paragraph .A119. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A118 Indicators that the engagement partner may not have been sufficiently and appropriately involved include, for example, the following:

- Lack of timely review by the engagement partner of the audit engagement planning, including reviewing the assessment of risks of material misstatement and the design of responses to those risks toward the end of the audit
- Evidence that assignees were not provided necessary instructions and relevant information, such as not being adequately informed about the nature of their responsibilities and authority, the scope of the work being assigned, and the objectives thereof
- A lack of evidence of the engagement partner's direction and supervision of the other members of the engagement team and the review of their work

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A119 If the engagement partner's involvement does not provide the basis for determining that the significant judgments made and the conclusions reached are appropriate, the engagement partner will not be able to reach the determination required by paragraph .40. In addition to taking into account firm policies or procedures that may set forth the required actions to be taken in such circumstances, appropriate actions that the engagement partner may take, include, for example,

- updating and changing the audit plan,
- reevaluating the planned approach to the nature and extent of review and modifying the planned approach to increase the involvement of the engagement partner, or
- consulting with personnel assigned operational responsibility for the relevant aspect of the firm's system of quality management.

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

Documentation (Ref: par. .41)

.A120 In accordance with section 230,[43] audit documentation provides evidence that the audit complies with GAAS. However, it is neither necessary nor practicable for the auditor to document every matter considered, or professional judgment made, in an audit. Further, it is unnecessary for the auditor to document separately (such as in a checklist) compliance with matters for which compliance is demonstrated by documents included within the audit file. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A121 Documentation of the performance of the requirements of this section, including evidencing the involvement of the engagement partner and the engagement partner's determination in accordance with paragraph .40, may be accomplished in different ways depending on the nature and circumstances of the audit engagement. Examples follow:

- Direction of the engagement team can be documented through sign-offs of the audit plan and project management activities.
- Minutes from formal meetings of the engagement team may provide evidence of the clarity, consistency, and effectiveness of the engagement partner's communications and other actions regarding culture and expected behaviors that demonstrate the firm's commitment to quality.
- Agendas from discussions between the engagement partner and other members of the engagement team and, when applicable, the engagement quality reviewer, and related sign-offs and records of the time the engagement partner spent on the engagement, may provide evidence of the engagement partner's involvement throughout the audit engagement and supervision of other members of the engagement team.
- Sign-offs by the engagement partner and other members of the engagement team provide evidence that the working papers were reviewed.

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

[43] Paragraph .A9 of section 230. [Footnote renumbered by the issuance of SAS No. 149, March 2023.]

.A122 When dealing with circumstances that may pose risks to achieving quality on the audit engagement, the exercise of professional skepticism, and the documentation of the auditor's consideration thereof, may be important. For example, if the engagement partner obtains information that may have caused the firm to decline the engagement (see paragraph .24), the documentation may include explanations of how the engagement team dealt with the circumstance. [Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

.A123 Documentation of consultations with other professionals that involve difficult or contentious matters that is sufficiently complete and detailed contributes to an understanding of

- the nature and scope of the issue on which consultation was sought and
- the results of the consultation, including any decisions taken, the basis for those decisions, and how they were implemented.

[Paragraph renumbered by the issuance of SAS No. 149, March 2023.]

fn 7 Paragraphs ~~.21–.25~~ ***30*** of ~~QC section 10~~ ***Statement on Quality Management Standards (SQMS) No. 1,*** *A Firm's System of Quality ~~Control~~***Management**.

fn 8 Paragraphs ~~11~~***16***~~–.13~~***21*** of ~~section 220~~ ***Statement on Auditing Standards (SAS) No. 146***, *Quality ~~Control~~***Management** *for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*.

fn 9 Paragraph A10 of SAS No. 146.

[No amendment to paragraphs .A21–.A31. Subsequent footnotes are renumbered.]

.A32 Audit evidence is necessary to support the auditor's opinion and report. It is cumulative in nature and is primarily obtained from audit procedures performed during the course of the audit. It may, however, also include information obtained from other sources such as previous audits (provided the auditor has determined whether changes have occurred since the previous audit that may affect its relevance to the current audit[13]) or ***through the information obtained by the firm in the acceptance or continuance of the client relationship or engagement*** ~~firm's quality control procedures for client acceptance or continuance~~. In addition to other sources inside and outside the entity, the entity's accounting records are an important source of audit evidence. Also, information that may be used as audit evidence may have been prepared by a specialist employed or engaged by the entity. Audit evidence comprises both information that supports and corroborates management's assertions and any information that contradicts such assertions. In addition, in some cases, the absence of information (for example, management's refusal to provide a requested representation) is used by the auditor, and therefore, also constitutes audit evidence. Most of the auditor's work in forming the auditor's opinion consists of obtaining and evaluating audit evidence.

fn 13 [Footnote omitted for purposes of this standard.]

[No further amendment to section 200.]

2. This amendment is effective for audits of financial statements for periods beginning on or after December 15, 2025.

AU-C Section 210, Terms of Engagement

[No amendment to paragraphs .01–.18.]

.A1 ***Statement on Quality Management Standards No. 1,* A Firm's System of Quality Management*, addresses the firm's responsibilities regarding the acceptance and continuance of client relationships and specific engagements.*** The auditor's responsibilities regarding relevant ethical requirements***, including those related to independence,*** in the context of the acceptance of an audit engagement, insofar as they are within the control of the auditor, are dealt with in ~~section 220~~ ***Statement on Auditing Standards No. 146*, Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards**. This section addresses those matters (or preconditions) that are within the control of the entity and upon which it is necessary for the auditor and the entity's management to agree.

[No further amendment to section 210.]

3. This amendment is effective for audits of financial statements for periods beginning on or after December 15, 2025.

AU-C Section 230, Audit Documentation

[No amendment to paragraphs .01–.02.]

.03 Audit documentation serves a number of additional purposes, including the following:

- Assisting the engagement team to plan and perform the audit
- Assisting members of the engagement team responsible for supervision to direct and supervise the audit work, and to discharge their review responsibilities in accordance

with ~~section 220~~ ***Statement on Auditing Standards (SAS) No. 146***, *Quality ~~Control~~***Management** *for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*[fn 3]

- Enabling the engagement team to demonstrate that it is accountable for its work by documenting the procedures performed, the audit evidence examined, and the conclusions reached
- Retaining a record of matters of continuing significance to future audits of the same entity
- Enabling the conduct of ***engagement*** quality ~~control~~ reviews***, other types of engagement reviews, and monitoring activities under the firm's system of quality management*** ~~inspections in accordance with QC section 10,~~ ~~*A Firm's System of Quality Control*~~
- Enabling the conduct of external inspections in accordance with applicable legal, regulatory**,** or other requirements
- Assisting an auditor who reviews a predecessor auditor's audit documentation
- Assisting auditors to understand the work performed in the prior year as an aid in planning and performing the current engagement

[fn 3] Paragraphs ~~.17–.19~~ ***29–33*** of ~~section 220~~ ***Statement on Auditing Standards (SAS) No. 146***, *Quality ~~Control~~***Management** *for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*.

[No amendment to paragraphs .04–.A8.]

.A9 Audit documentation provides evidence that the audit complies with GAAS. However, it is neither necessary nor practicable for the auditor to document every matter considered, or professional judgment made, in an audit. Further, it is unnecessary for the auditor to document separately (as in a checklist, for example) compliance with matters for which compliance is demonstrated by documents included within the audit file. For example:

- The existence of an adequately documented audit plan demonstrates that the auditor has planned the audit.
- The existence of a signed engagement letter in the audit file demonstrates that the auditor has agreed to the terms of the audit engagement with management or, when appropriate, those charged with governance.
- An auditor's report containing an appropriately qualified opinion on the financial statements demonstrates that the auditor has complied with the requirement to express a qualified opinion under the circumstances in accordance with GAAS.
- Regarding requirements that apply generally throughout the audit, there may be a number of ways in which compliance with them may be demonstrated within the audit file:

— For example, there may be no single way in which the auditor's professional skepticism is documented. But the audit documentation may nevertheless provide evidence of the auditor's exercise of professional skepticism in accordance with GAAS. Such evidence may include specific procedures performed to corroborate management's responses to the auditor's inquiries.

— Similarly, that the engagement partner has taken responsibility for the direction~~,~~ ***and*** supervision~~, and performance of~~ the ***engagement team and review of their work*** ***fn 6***~~audit in compliance with GAAS~~ may be evidenced in a number of ways within the audit documentation. This may include documentation ~~of~~***that evidences*** the engagement partner's ~~timely~~***sufficient and appropriate*** involvement in ~~aspects of~~ the audit, such as participation in ~~the~~***engagement*** team discussions. ~~required by section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*. fn 6~~

fn 6 ***Paragraph 29 of SAS No. 146.***

[No amendment to paragraphs .A10–.A14.]

.A15 ~~Section 220~~***SAS No. 146 contains requirements and guidance on the*** ~~requires the auditor to review the audit work performed through~~ review of ~~the~~ audit documentation.[fn 9] The requirement to document who reviewed the audit work performed and the extent of the review, in accordance with the firm's policies and procedures addressing review responsibilities does not imply a need for each specific working paper to include evidence of review. The requirement, however, means documenting what audit work was reviewed, who reviewed such work, and when it was reviewed.

fn 9 Paragraph ~~09~~***31*** of ~~section 220~~ ***SAS No. 146.***

[No amendment to paragraphs .A16–.A22.]

Matters Arising After the Date of the Auditor's Report (Ref: par. .14)

.A23 Examples of rare circumstances in which the auditor performs new or additional audit procedures or draws new conclusions after the date of the auditor's report include

- when, after the date of the auditor's report, the auditor becomes aware of facts that existed at that date and which, if known at that date, might have caused the financial statements to be revised or the auditor to modify the opinion in the auditor's report.[fn 11]

- when the auditor concludes that procedures necessary at the time of the audit, in the circumstances then existing, were omitted from the audit of the financial information.[fn 12]

The resulting changes to the audit documentation are reviewed in accordance with the firm's ~~quality control~~ procedures ~~as required by QC section 10~~ ***under its system of quality management***.

fns 11–12 [Footnotes omitted for purposes of this standard.]

Assembly and Retention of the Final Audit File (Ref: par. .16–.18)

.A24 Statutes, regulations, or the audit firm's ~~quality control~~ policies ***or procedures under its system of quality management*** may specify a period of time shorter than 60 days following the report release date in which this assembly process is to be completed.

[No amendment to paragraphs .A25–.A26.]

.A27 ~~Firms are required to establish policies and procedures for the retention of engagement documentation.~~[fn 13] Statutes, regulations, or the audit firm's ~~quality control~~ policies ***or procedures under its system of quality management*** may specify a retention period longer than five years.

~~fn 13 Paragraph .50 of QC section 10.~~

.A28 An example of a circumstance in which the auditor may find it necessary to modify existing audit documentation or add new audit documentation after file assembly has been completed is the need to clarify existing audit documentation arising from comments received during monitoring ~~inspections performed by internal~~ ***activities*** or external ~~parties~~ ***inspections***.

[No further amendment to section 230.]

4. This amendment is effective for audits of financial statements for periods beginning on or after December 15, 2025.

AU-C Section 260, The Auditor's Communication With Those Charged With Governance

[No amendment to paragraphs .01–.A36.]

.A37 To the extent not already addressed by the requirements in paragraph .12*a*–.*f* and related application material, the auditor may consider communicating about other matters discussed with, or considered by, the engagement quality ~~control~~ reviewer, if one has been appointed~~, in accordance with section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*~~.[fn 14]

~~fn 14 Paragraphs .21–.22 of section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*.~~

[No amendment to paragraphs .A38–.A50.]

.A51 Timely communication throughout the audit contributes to the achievement of robust two-way dialogue between those charged with governance and the auditor. However, the appropriate timing for communications will vary with the circumstances of the engagement. Considerations include the significance and nature of the matter, the importance of the matter to those charged with governance, and the action expected to be taken by those charged with governance. The following are examples of the timing of communications for certain matters:

- Communications regarding planning matters may often be made early in the audit engagement and, for an initial engagement, as part of the terms of the engagement.
- It may be appropriate to communicate significant difficulties encountered during the audit as soon as practicable if those charged with governance are able to assist the auditor in overcoming the difficulties or if the difficulties are likely to lead to a modified opinion.
- Communications regarding independence may be appropriate whenever significant judgments are made about threats to independence and related safeguards.
- When section 701 applies, the auditor may communicate preliminary views about key audit matters when discussing the planned scope and timing of the audit (see paragraph .A21); the auditor may also have more frequent communications to further discuss such matters when communicating about significant audit findings.

The following are examples of matters for which communication with those charged with governance may be important prior to issuance of the auditor's report:

- Uncorrected misstatements accumulated by the auditor and the effect that they may have, individually or in the aggregate, on the opinion in the auditor's report, including possible implications with respect to future financial statements.
- Circumstances or relationships to which the auditor gave significant consideration relating to independence in reaching the conclusion that independence has not been impaired.
- Significant findings or issues from the audit, including the auditor's views about the qualitative aspects of the entity's accounting practices.
- An expectation by the auditor that the opinion in the auditor's report will be modified in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*.[fn 16]
- When section 701 applies, the matters planned to be included in the auditor's report***. SAS No. 146,* Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, requires the engagement partner, prior to dating the auditor's report, to review the financial statements and the auditor's report, including, if applicable, the description of the key audit matters and related audit documentation, to determine that the report to be issued will be appropriate in the circumstances.*[17]**

fn 16 Paragraph .31 of section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

***fn 17 Paragraph 33 of SAS No. 146*, Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards.**

[Subsequent footnotes are renumbered.]

[No further amendment to section 260.]

5. This amendment is effective for audits of financial statements for periods beginning on or after December 15, 2025.

AU-C Section 300, Planning an Audit

Introduction

Scope of This Section

[No amendment to paragraph .01.]

~~The Role and Timing of Planning~~

.02 Planning an audit involves establishing the overall audit strategy for the engagement and developing an audit plan. ~~Adequate~~***Quality management at the engagement level in accordance with Statement on Auditing Standards (SAS) No. 146,* Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, in conjunction with adequate*** planning ***in accordance with this section,*** benefits the audit of financial statements in several ways, including the following:

- Helping the auditor identify and devote appropriate attention to important areas of the audit
- Helping the auditor identify and resolve potential problems on a timely basis
- Helping the auditor properly organize and manage the audit engagement so that it is performed in an effective and efficient manner
- Assisting in the selection of engagement team members with appropriate levels of capabilities and competence to respond to anticipated risks and allocating team member responsibilities
- Facilitating the direction and supervision of engagement team members and the review of their work
- Assisting, when applicable, in coordination of work done by auditors of components and specialists

[No amendment to paragraphs .03–.05.]

Preliminary Engagement Activities

.06 The auditor should undertake the following activities at the beginning of the current audit engagement:

a. Performing procedures required by ~~section 220,~~ ***SAS No. 146*** regarding the ***acceptance and*** continuance of the client relationship and the ~~specific~~ audit engagement~~;~~

b. Evaluating compliance with relevant ethical requirements in accordance with ~~section 220,~~ ***SAS No. 146***

c. Establishing an understanding of the terms of the engagement, as required by section 210, *Terms of Engagement*~~.~~ (Ref: par. .A6–.A8)

[No amendment to paragraph .07.]

Planning Activities

.08 In establishing the overall audit strategy, the auditor should ***consider the information obtained from complying with the requirements of SAS No. 146 and***

a. identify the characteristics of the engagement that define its scope;

b. ascertain the reporting objectives of the engagement to plan the timing of the audit and the nature of the communications required;

c. consider the factors that, in the auditor's professional judgment, are significant in directing the engagement team's efforts;

d. consider the results of preliminary engagement activities and, where applicable, whether knowledge gained on other engagements performed by the engagement partner for the entity is relevant; and

e. ascertain the nature, timing, and extent of resources necessary to perform the engagement. (Ref: par. .A9–.A13)

.09 The auditor should develop an audit plan that includes a description of the following:

a. The nature, timing, and extent of the planned direction and supervision of engagement team members and the review of their work (Ref: par. ~~.A18–A19~~.A14–.A15)

b. ~~*a.*~~ The nature and extent of planned risk assessment procedures, as determined under section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*

c. ~~*b.*~~ The nature, timing, and extent of planned further audit procedures at the relevant assertion level, as determined under section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*

d. ~~*c.*~~ Other planned audit procedures that are required to be carried out so that the engagement complies with generally accepted auditing standards (Ref: par. ~~.A14–~~.A16***–.A18***)

[No amendment to paragraph .10.]

.11 The ~~auditor~~***engagement partner*** should ~~plan the nature, timing, and extent of direction and supervision of engagement team members and the review of their work~~ ***review the overall audit strategy and audit plan***. ~~(Ref: par. .A18–.A19)~~

[No amendment to paragraphs .12–.13.]

Documentation

.14 The auditor should include in the audit documentation the following:[fn 3]

a. The overall audit strategy

b. The audit plan

c. Any significant changes made during the audit engagement to the overall audit strategy or the audit plan***, including any significant changes to the nature, timing, and extent of the planned direction and supervision of engagement team members and the review of their work,***[fn 4] and the reasons for such changes. (Ref: par. .A23–.A26)

fn 3 [Footnote omitted for purposes of this standard.]

***fn 4 Paragraphs 30 and A93–A94 of SAS No. 146*, Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards.**

Application and Other Explanatory Material

.A1 SAS No. 146 addresses the specific responsibilities of the auditor regarding quality management at the engagement level for an audit of financial statements and the related responsibilities of the engagement partner. Information obtained from complying with the requirements of SAS No. 146 is relevant to this section. For example, in accordance with SAS No. 146, the engagement partner is required to determine that sufficient and appropriate resources to perform the engagement have been assigned or made available to the engagement team, taking into account the nature and circumstances of the audit engagement. Such a determination is directly relevant when ascertaining the nature, timing, and extent of resources necessary to perform the engagement in the overall strategy, as required by paragraph .08 of this section.

The Role and Timing of Planning (Ref: par. .01)

~~**.A1**~~ ***.A2*** The nature and extent of planning activities will vary according to the size and complexity of the entity, the key engagement team members' previous experience with the entity, and changes in circumstances that occur during the audit engagement. ***In planning the audit, the auditor may use project management techniques and tools. SAS No. 146***[fn 5] ***describes how such techniques and tools may support the engagement team in managing the quality of the engagement.***

fn 5 Paragraphs A73–A74 of SAS No. 146.

[Subsequent footnotes are renumbered.]

[No amendment to paragraph .A2, renumbered as paragraph .A3.]

~~.A3~~ ***.A4*** The auditor may decide to discuss elements of planning with the entity's management to ~~facilitate the conduct and management of the audit~~ ***help the auditor manage and achieve quality at the*** engagement ***level*** (for example, to coordinate some of the planned audit procedures with the work of the entity's personnel). Although these discussions often occur, the overall audit strategy and the audit plan remain the auditor's responsibility. When discussing matters included in the overall audit strategy or audit plan, care is required in order not to compromise the effectiveness of the audit. For example, discussing the nature and timing of detailed audit procedures with management may compromise the effectiveness of the audit by making the audit procedures too predictable.

[No amendment to paragraphs .A4–.A5, renumbered as paragraphs .A5–.A6.]

Preliminary Engagement Activities (Ref: par. .06)

.A~~6~~7 Performing the preliminary engagement activities, which are specified in paragraph .06, at the beginning of the current audit engagement assists the auditor in identifying and evaluating events or circumstances that may adversely affect the auditor's ability to ~~plan and perform the audit engagement~~ ***manage and achieve quality at the engagement level in accordance with SAS No. 146.***

~~.A7~~ ***A8*** Performing these preliminary engagement activities enables the auditor to plan an audit engagement ~~for which~~ ***to***, for example,

- ~~the auditor maintains~~ ***maintain*** the necessary independence and ability to perform the engagement.
- ***determine that*** the auditor has no issues with management integrity that may affect the auditor's willingness to continue the engagement.
- ***determine that there is*** ~~the auditor has~~ no misunderstanding ***between the auditor and*** ~~with~~ the entity about the terms of the engagement.

.~~A8~~*A9* ~~The auditor's consideration of client continuance and relevant ethical requirements, including independence, occurs throughout the audit engagement as conditions and changes in circumstances occur.~~ Performing initial procedures on both client continuance and evaluation of relevant ethical requirements (including independence) at the beginning of the current audit engagement means that they are completed prior to the performance of other significant activities for the current audit engagement. For continuing audit engagements, such initial procedures often begin shortly after (or in connection with) the completion of the previous audit.

Planning Activities

The Overall Audit Strategy (Ref: par. .07–.08)

.~~A9~~*A10* The process of establishing the overall audit strategy ~~assists the auditor to determine~~, subject to the completion of the auditor's risk assessment procedures, ***may include*** such matters as the following:

- The ***nature of*** resources ***(human, technological, or intellectual)*** to ~~deploy~~***be deployed*** for specific audit areas, ~~such as~~ ***for example,*** the ~~use~~***deployment*** of ~~appropriately~~ experienced team members for high-risk areas or the ~~involvement~~***assignment*** of specialists ~~on~~ ***to address*** complex matters
- The amount of resources to ~~allocate~~ ***be allocated*** to specific audit areas, ~~such as~~***for example,*** the number of team members assigned to ~~observe~~***attend*** the ***physical*** inventory count at ~~material~~***multiple*** locations, the extent of review of component auditors' work in the case of group audits, or the audit budget (in hours) to allocate to high-risk areas
- When these resources are to be deployed, such as whether at an interim audit stage or at key cut-off dates
- How such resources are ~~managed,~~ directed, ~~and~~ supervised, ~~such as~~ ***or used, for example,*** when team briefing and debriefing meetings are expected to be held, how the engagement partner and manager reviews are expected to take place (for example, on-site or off-site)~~, and whether to complete engagement quality control reviews~~

[No amendment to paragraphs .A10–.A17, renumbered as paragraphs .A12–.A19.]

.A11 SAS No. 146 contains requirements and guidance on engagement resources and engagement performance (including direction and supervision of the members of the engagement team and the review of their work).

Direction, Supervision, and Review (Ref: par. .11)

.~~A18~~*A20* ***SAS No. 146 addresses the engagement partner's responsibility for the*** ~~The~~ nature, timing, and extent of ~~the~~ direction and supervision of engagement team members and review of their work. ***fn 10*** ~~vary, depending on many factors, including the following:~~

- ~~The size and complexity of the entity~~
- ~~The area of the audit~~
- ~~The assessed risks of material misstatement (for example, an increase in the assessed risk of material misstatement for a given area of the audit ordinarily requires a corresponding increase in the extent and timeliness of direction and supervision of engagement team members and a more detailed review of their work)~~
- ~~The capabilities and competence of the individual team members performing the audit work~~

~~Section 220 contains further guidance on the direction, supervision, and review of audit work.~~

fn 10 ***Paragraphs 29–31 of SAS No. 146.***

[Subsequent footnotes are renumbered.]

~~*Considerations Specific to Smaller, Less Complex Entities*~~ **Scalability**

.~~A19~~*A21* If an audit is carried out entirely by the engagement partner, questions of direction and supervision of engagement team members and review of their work do not arise. In such cases, the engagement partner, having personally conducted all aspects of the work, will be aware of all material issues. Forming an objective view on the appropriateness of the judgments made in the course of the audit can present practical problems when the same individual also performs the entire audit. If particularly complex or unusual issues are involved, and the audit is performed by a sole practitioner, it may be desirable to consult with other suitably experienced auditors or the auditor's professional body.

[No amendment to paragraphs .A20–.A21, renumbered as paragraphs .A22–.A23.]

Additional Considerations in Initial Audit Engagements (Ref: par. .13)

.~~A22~~*A24* The purpose and objective of planning the audit are the same whether the audit is an initial or recurring engagement. However, for an initial audit, the auditor may need to expand the planning activities because the auditor does not ordinarily have the previous experience with the entity that is considered when planning recurring engagements. For an initial audit engagement, additional matters the auditor may consider in establishing the overall audit strategy and audit plan include the following:

- Arrangements to be made with the predecessor auditor (for example, to review the predecessor auditor's working papers [see section 510, *Opening Balances —Initial Audit Engagements, Including Reaudit Engagements*])[fn 8]
- Any major issues (including the application of accounting principles or auditing and reporting standards) discussed with management in connection with the initial selection as auditor, the communication of these matters to those charged with governance, and how these matters affect the overall audit strategy and audit plan
- The audit procedures necessary to obtain sufficient appropriate audit evidence regarding opening balances (see section 510)[fn 9]
- Other ~~procedures required~~ ***responses designed and implemented*** by the ~~firm's system of quality control~~ ***firm*** for initial audit engagements (For example, the firm's system of quality ~~control~~***management*** may ***include responses that*** require ~~the involvement of~~ another partner or ~~senior~~ individual ***with appropriate authority*** to review the overall audit strategy prior to commencing significant audit procedures or to review reports prior to their issuance.)

fns 8–9 [Footnotes renumbered as 11 and 12, and omitted for purposes of this standard.]

Documentation (Ref: par. .14)

~~.A23~~ *.A25* The documentation of the overall audit strategy is a record of the key decisions ~~considered necessary to properly plan the audit~~ ***in managing quality at the***

engagement level and ***a means to*** communicate significant issues to the engagement team. For example, the auditor may summarize the overall audit strategy in the form of a memorandum that contains key decisions regarding the overall scope, timing, and conduct of the audit.

.A26 Documentation of the direction and supervision of engagement team members and the review of their work in accordance with SAS No. 146 may also provide a record of significant changes to the planned nature, timing, and extent of the direction, supervision, and review.

[No amendment to paragraphs .A24–.A26, renumbered as paragraphs .A27–.A29.]

Appendix — Considerations in ~~Establishing the Overall Audit Strategy~~ *Managing Quality at the Engagement Level* **(Ref: par. .07–.08 and .A9–.A12)**

.~~A27~~*A30*

This appendix provides examples of matters the auditor may consider in ~~establishing the overall audit strategy~~***managing quality at the engagement level***. Many of these matters ~~also~~ will influence the auditor's ***overall audit strategy and*** detailed audit plan. The examples provided cover a broad range of matters applicable to many engagements. Although some of the following matters may be required by other sections, not all matters are relevant to every audit engagement, and the list is not necessarily complete.

...

Nature, Timing, and Extent of Resources

The following examples illustrate the nature, timing, and extent of resources:

- The ~~selection~~***human, technological, and intellectual resources assigned or made available to the engagement (for example, assignment*** of the engagement team ~~(including, when necessary, the engagement quality control reviewer [see section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*])~~ and the assignment of audit work to the team members, including the assignment of appropriately experienced team members to areas in which there may be higher risks of material misstatement
- Engagement budgeting, including considering the appropriate amount of time to set aside for areas in which there may be higher risks of material misstatement

[No further amendment to section 300.]

6. This amendment is effective for audits of financial statements for periods beginning on or after December 15, 2025.

AU-C Section 600, Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors)

Introduction

Scope of This Section

[No amendment to paragraphs .01–.04.]

.05 In accordance with ~~section 220,~~ ***Statement on Auditing Standards (SAS) No. 146,*** *Quality* ~~*Control*~~**Management** *for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, the group engagement partner is required to ~~be satisfied~~ ***determine*** that those performing the group audit engagement~~, including component auditors,~~ collectively possess the appropriate competence and capabilities**,** ***including sufficient time***.[fn 1] ***Those performing the group audit engagement include component auditors whose work the group auditor assumes responsibility for but not component auditors whose audits the group auditor makes reference to (see paragraph .08).*** The group engagement partner also is responsible for the direction ***and***~~,~~ supervision ***of members of the group engagement team*** and ~~performance of the group audit engagement~~ ***review of their work.fn 2*** In this section, requirements to be undertaken by the group engagement partner are addressed to the group engagement partner. When the group engagement team may assist the group engagement partner in fulfilling a requirement, the requirement is addressed to the group engagement team. When it may be appropriate in the circumstances for the firm to fulfill a requirement, the requirement is addressed to the auditor of the group financial statements.

fn 1 Paragraph***s*** ~~16~~ ***25–26*** of ~~section 220,~~ ***Statement on Auditing Standards (SAS) No. 146,*** *Quality* ~~*Control*~~ **Management** *for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*.

fn 2 Paragraphs 29–31 of SAS No. 146.

[Subsequent footnotes are renumbered.]

[No further amendment to section 600.]

7. This amendment is effective for audits of group financial statements for periods beginning on or after December 15, 2025.

AU-C Section 620, Using the Work of an Auditor's Specialist

[No amendment to paragraphs .01–.07.]

.08 The nature, timing, and extent of the auditor's procedures with respect to the requirements in paragraphs .09–.13 will vary depending on the circumstances. In determining the nature, timing, and extent of those procedures, the auditor should consider matters including (Ref: par. .A11)

a. the nature of the matter to which the work of the auditor's specialist relates;

b. the risks of material misstatement in the matter to which the work of the auditor's specialist relates;

c. the significance of the work of the auditor's specialist in the context of the audit;

d. the auditor's knowledge of, and experience with, previous work performed by the auditor's specialist; and

e. whether the auditor's specialist is subject to the auditor's firm's ***system of*** quality ***management*** ~~control policies and procedures~~. (Ref: par. .A12–.A14)

[No amendment to paragraphs .09–.A6.]

.A7 If the preparation of the financial statements involves the use of expertise in a field other than accounting, the auditor, who is skilled in accounting and auditing, may not possess the necessary expertise to audit those financial statements. The engagement partner is required by ~~section 220~~ ***Statement on Auditing Standards (SAS) No. 146,*** **Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards,** to ~~be satisfied~~ ***determine*** that the engagement team and any external auditor's specialists who are not part of the engagement team, collectively, have the appropriate competence and capabilities***, including sufficient time,*** to perform the audit engagement.[fn 6] Further, the auditor is required by section 300 to ascertain the nature, timing, and extent of resources necessary to perform the engagement.[fn 7] The auditor's determination of whether to use the work of an auditor's specialist, and, if so, when and to what extent, assists the auditor in meeting these requirements. As the audit progresses or as circumstances change, the auditor may need to revise earlier decisions about using the work of an auditor's specialist.

[fn 6] Paragraph ~~16~~***26*** of ~~section 220~~ ***Statement on Auditing Standards (SAS) No. 146,*** **Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards**.

[fn 7] [Footnote omitted for purposes of this standard.]

[No amendment to paragraphs .A8–.A10.]

.A11 The following factors may suggest the need for different or more extensive procedures than would otherwise be the case:

- The work of the auditor's specialist relates to a significant finding or issue that involves subjective and complex judgments.
- The auditor has not previously used the work of the auditor's specialist and has no prior knowledge of that specialist's competence, capabilities, and objectivity.
- The auditor's specialist is performing procedures that are integral to the audit rather than being consulted to provide advice on an individual matter.
- The specialist is an auditor's external specialist and is not, therefore, subject to the firm's ***system of*** quality ***management***~~control policies and procedures~~.

The Auditor's Firm's System of ***Quality*** ~~***Control Policies and Procedures***~~ Management ***(Ref: par. .08e)***

.A12 An auditor's internal specialist may be a partner or staff, including temporary staff ***(that is, personnel)***, of the auditor's firm and, therefore, subject to the ***system of*** quality ~~control policies and procedures~~***management*** of that firm in accordance with ~~QC section 10,~~ ***Statement on Quality Management Standards (SQMS) No. 1,*** *A Firm's System of Quality* ~~*Control*~~**Management**.[fn 10] An auditor's internal specialist also may be a partner or staff, including temporary staff, of a network firm, ***and is subject to the firm's policies or procedures for network requirements and network services in accordance with SQMS No. 1. In some instances, the auditor's internal specialist of a network firm may be subject to*** ~~which may share~~ common quality ~~control~~***management*** policies ~~and~~***or*** procedures ~~with~~***as*** the auditor's firm***, given that they are part of the same network***.

fn 10 Paragraph ~~13~~***17*** of ***Statement on Quality Management Standards (SQMS) No. 1***, *A Firm's System of Quality Management*.

.A13 ~~In accordance with~~ ***As described in*** ~~section 220~~ ***SAS No. 146***, ***quality management at the*** engagement ~~teams are entitled to rely on the firm's system of quality control unless the engagement partner determines that it is inappropriate to do so based on information provided by the firm or other parties.~~ ~~[fn 11]~~ ~~The extent of that reliance will vary with the circumstances and may affect the nature, timing, and extent of the auditor's~~ ***level is supported by the firm's system of quality management and informed by the specific nature and circumstances of the audit engagement.[fn 12] For example, the auditor may be able to depend on the firm's related policies or*** procedures with respect to such matters as the following:

- Competence and capabilities through recruitment and training programs.
- Objectivity. The auditor's internal specialists are subject to relevant ethical requirements, including those ~~pertaining~~***relating*** to independence.
- Agreement with the auditor's specialist.
- The auditor's evaluation of the adequacy of the work of the auditor's specialist. For example, the firm's training programs may provide the auditor's internal specialists with an appropriate understanding of the interrelationship of their expertise with the audit process. Reliance on such training ~~and other firm processes, such as protocols for scoping the work of the auditor's internal specialists,~~ may affect the nature, timing, and extent of the auditor's procedures to evaluate the adequacy of the work of the auditor's specialist.
- Adherence to regulatory and legal requirements through monitoring processes.

~~Such reliance~~ ***Matters that the auditor may take into account when determining whether to depend on the firm's policies or procedures are described in SAS No. 146.[fn 13] Depending on the firm's policies or procedures*** does not reduce the auditor's responsibility to meet the requirements of this section.

~~fn 11 Paragraph .05 of section 220.~~

fn 12 Paragraph A4 of SAS No. 146.

fn 13 ***Paragraphs 4*b *and A10 of SAS No. 146.***

.A14 ***SQMS No. 1 requires the firm to address the use of resources from a service provider, which includes the use of an external specialist.***[*fn 14*] An auditor's external specialist is not a member of the engagement team and is not subject to ~~quality control policies and procedures in accordance with QC section 10~~ ***the firm's policies or procedures under its system of quality management.***[*fn 15*] ***Furthermore, the firm's policies or procedures for relevant ethical requirements may include policies or procedures that apply to the auditor's external specialist***.[fn 12*16*]

fn 14 ***Paragraph 33 of SQMS No. 1.***

fn 15 ***Paragraph 17 of SQMS No. 1.***

fn 12*16* Paragraph ~~13~~***30*b** of ~~QC section 10~~ ***SQMS No. 1.***

[Subsequent footnotes are renumbered.]

[No proposed amendment to paragraph .A15.]

.A16 Information regarding the competence, capabilities, and objectivity of an auditor's specialist may come from a variety of sources, such as the following:

- Personal experience with previous work of that specialist
- Discussions with that specialist
- Discussions with other auditors or others who are familiar with that specialist's work
- Knowledge of that specialist's qualifications, membership in a professional body or industry association, license to practice, or other forms of external recognition
- Published papers or books written by that specialist
- The ***system of*** quality ***management*** ~~control policies and procedures~~ of the auditor's firm and such other procedures the auditor considers necessary in the circumstances (see paragraphs .A12–.A13).

[No amendment to paragraphs .A17–.A28.]

.A29 When no written agreement exists between the auditor and the auditor's specialist, evidence of the agreement may be included in, for example,

- planning memoranda or related working papers, such as the audit program.
- the policies ~~and~~***or*** procedures of the auditor's firm***'s system of quality management***. In the case of an auditor's internal specialist, the ~~established policies and procedures to which the auditor's specialist is subject~~***firm's system of quality management*** may include ~~particular~~ policies ~~and~~***or*** procedures regarding the work of the auditor's specialist. The extent of documentation in the auditor's working papers depends on the nature of such policies ~~and~~ ***or*** procedures. For example, no documentation may be

required in the auditor's working papers if the auditor's firm has detailed protocols covering the circumstances in which the work of such an auditor's specialist is used.

[No further amendment to section 620.]

8. This amendment is effective for audits of financial statements for periods beginning on or after December 15, 2025.

AU-C Section 930, Interim Financial Information

[No amendment to paragraphs .01–.A59.]

.A60 When an engagement quality ~~control~~ review is performed, ~~section 220,~~ ***Statement on Auditing Standards (SAS) No. 146,*** *Quality ~~Control~~***Management** *for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, requires that the ***engagement partner not date the*** auditor's report ~~not be released prior to~~ ***until*** the completion of the engagement quality ~~control~~ review.[fn 27]

[fn 27] Paragraph ~~21~~***36*****d** of ~~section 220~~ ***Statement on Auditing Standards (SAS) No. 146,*** *Quality ~~Control~~***Management** *for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*.

[No further amendment to section 930.]

9. This amendment is effective for reviews of interim financial information for interim periods of fiscal years beginning on or after December 15, 2025.

Amendment to SAS No. 130, *An Audit of Internal Control Over Financial Reporting That Is Integrated With an Audit of Financial Statements*, as Amended

(***Boldface italics*** denote new language. Deleted text is in ~~strikethrough~~.)

AU-C Section 940, *An Audit of Internal Control Over Financial Reporting That Is Integrated With an Audit of Financial Statements*

[No amendment to paragraphs .01–.A116.]

.A117 ~~Section 220,~~***Statement on Auditing Standards (SAS) No. 146,*** *Quality ~~Control~~* **Management** *for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, requires that, on or before the date of the auditor's report, the engagement partner ***determine***, through a review of the audit documentation and discussion with the engagement team, ~~be satisfied~~ that sufficient appropriate audit evidence has been obtained to support the conclusions reached and for the auditor's report to be issued.[fn 25] When an engagement quality ~~control~~ review is performed, ~~section 220~~ ***SAS No. 146*** requires that the ***engagement partner not date the*** auditor's report ~~not be released prior to~~ ***until*** the completion of the engagement quality ~~control~~ review.[fn 26]

fn 25 ~~See paragraph~~***Paragraph*** ~~19~~***32*** of ~~section 220,~~***SAS No. 146,*** *Quality ~~Control~~***Management** *for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*~~, for further discussion~~.

fn 26 Paragraph ~~21~~***36d*** of ~~section 220~~***SAS No. 146***.

[No further amendment to section 940.]

10. This amendment is effective for integrated audits for periods beginning on or after December 15, 2025.

Amendments to Various Sections in SAS No. 134, *Auditor Reporting and Amendments, Including Amendments Addressing Disclosures in the Audit of Financial Statements*, as Amended

(***Boldface italics*** denote new language. Deleted text is in ~~strikethrough~~.)

AU-C Section 700, Forming an Opinion and Reporting on Financial Statements

[No amendment to paragraphs .01–.A38.]

.A39 Relevant ethical requirements may exist in several different sources, such as ethical codes and additional rules and requirements within law and regulation. When independence and other relevant ethical requirements are contained in a limited number of sources, the auditor may choose to name the relevant sources (for example, the AICPA Code of Professional Conduct, when applicable; the rule or applicable regulation; or *Government Auditing Standards* promulgated by the Comptroller General of the United States) or may refer to a term that appropriately describes those sources. Relevant ethical requirements, including those ~~pertaining~~***relating*** to independence, in a group audit situation may be complex. Section 600, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors)*,[fn 21] provides guidance for auditors in performing work on the financial information of a component for a group audit, including those situations in which the component auditor does not meet the independence requirements that are relevant to the group audit.

[No amendment to paragraphs .A40-.A53.]

.A54 ***Statement on Auditing Standards (SAS) No. 146,*** ~~Section 220,~~*Quality ~~Control~~***Management** *for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, requires ***the following with regard to dating the auditor's report:***

- ~~that,~~ ***O***n or before the date of the auditor's report, the engagement partner, through a review of the audit documentation and discussion with the engagement team, ***is required to*** ~~be satisfied~~ ***determine*** that sufficient appropriate audit evidence has been obtained to support the conclusions reached and for the auditor's report to be issued.[fn 26]
- ***Prior to dating the auditor's report, the engagement partner is required to review the financial statements and the auditor's report, including, if***

applicable, the description of the key audit matters and related audit documentation, to determine that the report to be issued will be appropriate in the circumstances. *fn 27*

- When an engagement quality ~~control~~ review is performed, ~~section 220~~ the ***engagement partner is precluded from releasing the*** auditor's report ~~not be released prior to~~ ***until*** the completion of the engagement quality ~~control~~ review.[fn ~~27~~28]

fn 26 ~~See paragraph~~***Paragraph*** ~~19~~***32*** of ~~section 220,~~***SAS No. 146,*** *Quality ~~Control~~*__Management__ *for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*~~, for further discussion~~.

fn 27 Paragraph 33 of SAS No. 146.

fn ~~27~~***28*** Paragraph ~~21~~***36d*** of ~~section 220~~***SAS No. 146***.

[No further amendment to section 700.]

11. This amendment is effective for audits of financial statements for periods beginning on or after December 15, 2025.

AU-C Section 701, Communicating Key Audit Matters in the Independent Auditor's Report

[No amendment to paragraphs .01–.A12.]

.A13 Certain sections, such as the following, require specific communications with those charged with governance and others that may relate to areas of significant auditor attention:

a. Section 260, *The Auditor's Communication With Those Charged With Governance*, requires the auditor to communicate significant difficulties, if any, encountered during the audit with those charged with governance.[fn 7] For example, there may be potential difficulties relating to the following:

   i. *Related party transactions.* In particular, there may be limitations on the auditor's ability to obtain audit evidence that all other aspects of a related party transaction (other than price) are equivalent to those of a similar arm's-length transaction.[fn 8]

   ii. *Limitations on the group audit.* For example, the group engagement team's access to information may be restricted.[fn 9]

fns 7–9 [Footnotes omitted for purposes of this standard.]

b. ~~Section 220,~~***Statement on Auditing Standards No. 146,*** *Quality ~~Control~~*__Management__ *for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, establishes requirements for the engagement partner in relation to undertaking appropriate consultation on difficult or contentious matters***, matters on which the firm's policies or procedures***

> ***require consultation, and other matters that, in the engagement partner's professional judgment, require consultation.***[fn 10] For example, the auditor may have consulted with others within the firm or outside the firm on a significant technical matter, which may be an indicator that it is a key audit matter. The engagement partner is also required to discuss, among other things, significant matters ***and significant judgments*** arising during the audit engagement with the engagement quality ~~control~~ reviewer.

fn 10 Paragraph ~~20~~***35*** of ~~section 220,~~***SAS No. 146,*** *Quality ~~Control~~***Management** *for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*.

[No amendment to paragraphs .A14–.A59.]

Communication With Those Charged With Governance (Ref: par. .16)

.A60 SAS No. 146 requires the engagement partner, prior to dating the auditor's report, to review the financial statements and the auditor's report, including, if applicable, the description of the key audit matters and related audit documentation, to determine that the report to be issued will be appropriate in the circumstances.[fn 19]

fn 19 Paragraph 33 of SAS No. 146.

[No amendment to paragraph .A60, renumbered as paragraph .A61.]

.A6~~1~~*2* The requirement in paragraph .16*b* to communicate with those charged with governance when the auditor has determined that there are no key audit matters to communicate in the auditor's report may provide an opportunity for the auditor to have further discussion with others who are familiar with the audit and the significant matters that may have arisen (including the engagement quality ~~control~~ reviewer, when one has been appointed). These discussions may cause the auditor to reevaluate the auditor's determination that there are no key audit matters.

[No amendment to paragraph .A62, renumbered as .A63.]

12. This amendment is effective for audits of financial statements for periods beginning on or after December 15, 2025.

(***Boldface italics*** denote new language. Deleted text is in ~~strikethrough~~.)

AU-C Section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*

[No amendment to paragraphs .01–.A118.]

Date of the Auditor's Report (Ref: par. .82 and .126)

.A119 ***SAS No. 146,*** ~~Section 220,~~ *Quality* ~~*Control*~~ **Management** *for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, requires ***the following with regard to dating the auditor's report:***

- ~~that,~~ ***O***n or before the date of the auditor's report, the engagement partner, through a review of the audit documentation and discussion with the engagement team, ***is required to*** ~~be satisfied~~ ***determine*** that sufficient appropriate audit evidence has been obtained to support the conclusions reached and for the auditor's report to be issued.[fn 44]

- ***Prior to dating the auditor's report, the engagement partner is required to review the financial statements and the auditor's report, including, if applicable, the description of the key audit matters and related audit documentation, to determine that the report to be issued will be appropriate in the circumstances.***[fn 45]

- When an engagement quality control review is performed, ~~section 220~~ the ***engagement partner is precluded from releasing the*** auditor's report ~~not be released prior to~~***until*** the completion of the engagement quality control review.[fn ~~45~~46]

fn 44 ~~See paragraph~~***Paragraph*** ~~19~~***32*** of ~~section 220,~~***SAS No. 146,*** *Quality* ~~*Control*~~**Management** *for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*~~, for further discussion~~.

fn 45 ***Paragraph 33 of SAS No. 146.***

fn ~~45~~46 Paragraph ~~21~~***36*****d** of ~~section 220~~***SAS No. 146***.

[No further amendment to section 703.]

13. This amendment is effective for audits of ERISA plan financial statements for periods beginning on or after December 15, 2025.

Amendment to SAS No. 137, *The Auditor's Responsibilities Relating to Other Information Included in Annual Reports*, as Amended

(***Boldface italics*** denote new language. Deleted text is in ~~strikethrough~~.)

AU-C Section 720, *Other Information Included in Annual Reports*

[No amendment to paragraphs .01–.A26.]

.A27 In accordance with ~~section 220,~~***Statement on Auditing Standards No. 146,*** *Quality* ~~*Control*~~**Management** *for an Engagement Performed in Accordance With Generally Accepted Auditing Standards*,[fn 8] the engagement partner is required to take responsibility for the direction~~,~~***and*** supervision~~, and performance of the audit engagement~~***of the members of the engagement team and the review of their work, and determine that the nature, timing, and extent of direction, supervision, and review is planned and performed*** in compliance with ***the firm's policies or procedures,*** professional standards***,***

and applicable legal and regulatory requirements.***fn 8*** In the context of this section, factors that may be considered when determining the appropriate engagement team members to address the requirements of paragraphs .16–.17 of this section include the following:

- The relative experience of engagement team members.
- Whether the engagement team members have the relevant knowledge obtained in the audit to identify inconsistencies between the other information and that knowledge.
- The degree of judgment involved in addressing the requirements of paragraphs .16–.17 of this section. For example, performing procedures to evaluate the consistency of amounts in the other information that are intended to be the same as amounts in the financial statements may be carried out by less experienced engagement team members.
- Whether, in the case of a group audit, it is necessary to make inquiries of a component auditor in addressing the other information related to that component.

fn 8 Paragraph***s*** ~~17*a*.~~***29–30*** of ~~section 220~~ ***SAS No. 146,*** *Quality* ~~*Control*~~ **Management** *for an Engagement Performed in Accordance With Generally Accepted Auditing Standards*.

[No further amendment to section 720.]

14. This amendment is effective for audits of financial statements for periods beginning on or after December 15, 2025.

Amendment to SAS No. 142, *Audit Evidence*

Appendix B — Amendments to Various Sections in Statement on Auditing Standards No. 122, *Statements on Auditing Standards: Clarification and Recodification*, as Amended

.A68

…

AU-C Section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*

.A27 Unconscious or conscious auditor biases may affect the auditor's professional skepticism and professional judgment, including, for example, in the design and performance of audit procedures or the evaluation of audit evidence. Examples of unconscious auditor biases **are provided in paragraph .A35 of Statement on Auditing Standards No. 146, *Quality Management of an Audit Conducted in Accordance With Generally Accepted Auditing Standards.*** ~~***that may impede the maintenance of professional skepticism and, therefore, the reasonableness of the professional judgments made by the auditor in complying with the requirements of this section, may include the following:***~~

- ~~**Availability bias, *which is a tendency to place more weight on events or experiences that immediately come to mind or are readily available than on those that are not***~~
- ~~**Confirmation bias, *which is a tendency to place more weight on information that corroborates an existing belief than information that contradicts or casts doubt on that belief***~~
- ~~**Overconfidence bias, *which is a tendency to overestimate one's own ability to make accurate assessments of risk or other judgments or decisions***~~
- ~~**Anchoring bias, *which is a tendency to use an initial piece of information as an anchor against which subsequent information is inadequately assessed***~~
- ~~**Automation bias, *which is a tendency to favor output generated from automated systems, even when human reasoning or contradictory information raises questions about whether such output is reliable or fit for purpose***~~

[Paragraphs .A27–.A86 have been renumbered.]

15. This amendment is effective for audits of financial statements for periods beginning on or after December 15, 2025.

Amendment to Statement on Standards for Attestation Engagements No. 18, *Attestation Standards: Clarification and Recodification*, as Amended, Section 105, *Concepts Common to All Attestation Engagements*

(***Boldface italics*** denote new language. Deleted text is in ~~strikethrough~~.)

AT-C Section 105, *Concepts Common to All Attestation Engagements*

[No amendment to paragraphs .01–.05.]

Relationship of Attestation Standards to Quality Control Standards

.06 Quality ~~control~~***management*** systems, policies, and procedures are the responsibility of the firm in conducting its attestation practice. Under ~~QC section 10~~ ***Statement on Quality Management Standards No. 1,*** *A Firm's System of Quality* ~~*Control*~~**Management**, the firm has an obligation to ~~establish~~ ***design, implement,*** and ~~maintain~~***operate*** a system of quality ~~control~~***management*** ~~to provide it~~ ***that provides the firm*** with reasonable assurance that[fn 5] (Ref: par. .A4–.A6)

a. the firm and its personnel ~~comply~~***fulfill their responsibilities in accordance*** with professional standards and applicable legal and regulatory requirements ***and conduct attestation engagements in accordance with such standards and requirements,*** and

b. practitioners' reports issued by the firm are appropriate in the circumstances.

fn 5 Paragraph ~~12~~***20*** of ~~QC section 10,~~***Statement on Quality Management StandardsNo. 1***, *A Firm's System of Quality* ~~*Control*~~ **Management** ~~(AICPA, *Professional Standards*)~~.

.07 Attestation standards relate to the conduct of individual attestation engagements; quality ~~control~~***management*** standards relate to the conduct of a firm's attestation practice as a whole. Thus, attestation standards and quality ~~control~~***management*** standards are related, and the quality ~~control~~***management*** policies and procedures that ~~a~~ ***the*** firm ~~adopts~~ ***establishes*** may affect both the conduct of individual attestation engagements and the conduct of a ***the*** firm's attestation practice as a whole. However, deficiencies in or instances of noncompliance with ~~a~~***the*** firm's quality ~~control~~***management*** policies and procedures do not, in and of themselves, indicate that a particular engagement was not ~~performed~~***conducted*** in accordance with the attestation standards.

[No further amendment to AT-C section 105.]

16. This amendment is effective for practitioners' reports dated on or after December 15, 2025.

AU-C Section 220A

Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards

Source: SAS No. 122; SAS No. 128; SAS No. 134; SAS No. 136.

Effective for engagements conducted in accordance with generally accepted auditing standards for periods ending on or after December 15, 2012, unless otherwise indicated.

Introduction

Scope of This Section

.01 This section addresses the specific responsibilities of the auditor regarding quality control procedures for an audit of financial statements. It also addresses, when applicable, the responsibilities of the engagement quality control reviewer. This section also applies, adapted as necessary, to other engagements conducted in accordance with generally accepted auditing standards (GAAS) (for example, a review of interim financial information conducted in accordance with section 930, *Interim Financial Information*). This section is to be read in conjunction with the AICPA Code of Professional Conduct and other relevant ethical requirements.

.02 Although Statements on Quality Control Standards are not applicable to auditors in government audit organizations, this section is applicable to auditors in government audit organizations who perform financial audits in accordance with GAAS.[1]

System of Quality Control and the Role of the Engagement Teams

.03 Quality control systems, policies, and procedures are the responsibility of the audit firm. Under QM section 10A, *A Firm's System of Quality Control*, the firm has an obligation to establish and maintain a system of quality control to provide it with reasonable assurance that[2]

a. the firm and its personnel comply with professional standards and applicable legal and regulatory requirements and

[1] Paragraph .02 of QM section 10A, *A Firm's System of Quality Control*.

[2] Paragraph .12 of QM section 10A.

b. reports issued by the firm are appropriate in the circumstances. (Ref: par. .A1)

.04 Within the context of the firm's system of quality control, engagement teams have a responsibility to implement quality control procedures that are applicable to the audit engagement and provide the firm with relevant information to enable the functioning of that part of the firm's system of quality control relating to independence.

.05 Engagement teams are entitled to rely on the firm's system of quality control, unless the engagement partner determines that it is inappropriate to do so based on information provided by the firm or other parties. (Ref: par. .A2)

.06 The engagement partner may use the assistance of other members of the engagement team or other personnel within the firm in meeting the requirements of this section. The requirements imposed by this section on engagement partners do not relieve other members of the engagement team of any of their professional responsibilities.

Effective Date

.07 This section is effective for engagements conducted in accordance with GAAS for periods ending on or after December 15, 2012.

Objective

.08 The objective of the auditor[3] is to implement quality control procedures at the engagement level that provide the auditor with reasonable assurance that

a. the audit complies with professional standards and applicable legal and regulatory requirements and

b. the auditor's report issued is appropriate in the circumstances.

Definitions

.09 For purposes of GAAS, the following terms have the meanings attributed as follows:

Engagement partner.[4] The partner or other person in the firm who is responsible for the audit engagement and its performance and for the auditor's report that is issued on behalf of the firm and who, when required, has the appropriate authority from a professional, legal, or regulatory body.

Engagement quality control review. A process designed to provide an objective evaluation, before the report is released, of the significant judgments the engagement team made and the conclusions it reached in formulating the auditor's report. The engagement quality control review process is only for those audit engagements, if any, for which the firm

[3] See paragraph .14 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*, for the definition of *auditor*.

[4] *Engagement partner*, *partner*, and *firm* refer to their governmental equivalents, when relevant.

has determined that an engagement quality control review is required, in accordance with its policies and procedures.

Engagement quality control reviewer. A partner, other person in the firm, suitably qualified external person, or team made up of such individuals, none of whom is part of the engagement team, with sufficient and appropriate experience and authority to objectively evaluate the significant judgments that the engagement team made and the conclusions it reached in formulating the auditor's report.

Engagement team. All partners and staff performing the engagement and any individuals engaged by the firm or a network firm who perform audit procedures on the engagement. This excludes an auditor's external specialist engaged by the firm or a network firm.[5]

The term *engagement team* also excludes individuals within the client's internal audit function who provide direct assistance on an audit engagement when the external auditor complies with the requirements of section 610, *Using the Work of Internal Auditors*.

Firm. A form of organization permitted by law or regulation whose characteristics conform to resolutions of the Council of the AICPA and that is engaged in public practice.

Monitoring. A process comprising an ongoing consideration and evaluation of the firm's system of quality control, including inspection or a periodic review of engagement documentation, reports, and clients' financial statements for a selection of completed engagements, designed to provide the firm with reasonable assurance that its system of quality control is designed appropriately and operating effectively.

Network. An association of entities, as defined in ET section 0.400, *Definitions*.

Network firm. A firm or other entity that belongs to a network, as defined in ET section 0.400.

Partner. Any individual with authority to bind the firm with respect to the performance of a professional services engagement. For purposes of this definition, *partner* may include an employee with this authority who has not assumed the risks and benefits of ownership. Firms may use different titles to refer to individuals with this authority.

Personnel. Partners and staff.

Professional standards. Standards promulgated by the AICPA Auditing Standards Board or the AICPA Accounting and Review Services Committee under the "General Standards Rule" (ET sec. 1.300.001) or the "Compliance With Standards Rule" (ET sec. 1.310.001) of the AICPA Code of Professional Conduct, or other standards-setting bodies that set auditing and attest standards applicable to the engagement being performed and relevant ethical requirements.

Relevant ethical requirements. Ethical requirements to which the engagement team and engagement quality control reviewer are subject, which consist of the AICPA Code

[5] Paragraph .06 of section 620, *Using the Work of an Auditor's Specialist*, defines the term *auditor's specialist*.

of Professional Conduct together with rules of applicable state boards of accountancy and applicable regulatory agencies that are more restrictive.

Staff. Professionals, other than partners, including any specialists that the firm employs.

Suitably qualified external person. An individual outside the firm with the competence and capabilities to act as an engagement partner (for example, a partner of another firm).

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2014, by SAS No. 128. Revised, January 2015, to reflect conforming changes necessary due to the issuance of the revised AICPA Code of Professional Conduct, effective December 15, 2014.]

Requirements

Leadership Responsibilities for Quality on Audits

.10 The engagement partner should take responsibility for the overall quality on each audit engagement to which that partner is assigned. In fulfilling this responsibility, the engagement partner may delegate the performance of certain procedures to, and use the work of, other members of the engagement team and may rely upon the firm's system of quality control. (Ref: par. .A3)

Relevant Ethical Requirements

.11 Throughout the audit engagement, the engagement partner and other members of the engagement team should remain alert for evidence of noncompliance with relevant ethical requirements by members of the engagement team. (Ref: par. .A4)

.12 If matters come to the engagement partner's attention, through the firm's system of quality control or otherwise, that indicate that members of the engagement team have not complied with relevant ethical requirements, the engagement partner, in consultation with others in the firm as appropriate, should determine that appropriate action has been taken.

Independence

.13 The engagement partner should form a conclusion on compliance with independence requirements that apply to the audit engagement. In doing so, the engagement partner should

a. obtain relevant information from the firm and, when applicable, network firms to identify and evaluate circumstances and relationships that create threats to independence;

b. evaluate information on identified breaches, if any, of the firm's independence policies and procedures to determine whether they create a threat to independence for the audit engagement; and

c. take appropriate action to eliminate such threats or reduce them to an acceptable level by applying safeguards or, if considered appropriate, to withdraw from the audit engagement when withdrawal is possible under applicable law or regulation. The engagement partner should promptly report to the firm any inability to resolve the matter so that the firm may take appropriate action. (Ref: par. .A5–.A6)

Acceptance and Continuance of Client Relationships and Audit Engagements

.14 The engagement partner should be satisfied that appropriate procedures regarding the acceptance and continuance of client relationships and audit engagements have been followed and should determine that conclusions reached in this regard are appropriate. (Ref: par. .A7–.A8)

.15 If the engagement partner obtains information that would have caused the firm to decline the audit engagement had that information been available earlier, the engagement partner should communicate that information promptly to the firm so that the firm and the engagement partner can take the necessary action. (Ref: par. .A8)

Assignment of Engagement Teams

.16 The engagement partner should be satisfied that the engagement team and any auditor's external specialists, collectively, have the appropriate competence and capabilities to

a. perform the audit engagement in accordance with professional standards and applicable legal and regulatory requirements and

b. enable an auditor's report that is appropriate in the circumstances to be issued. (Ref: par. .A9–.A11)

Engagement Performance

Direction, Supervision, and Performance

.17 The engagement partner should take responsibility for the following:

a. The direction, supervision, and performance of the audit engagement in compliance with professional standards, applicable legal and regulatory requirements, and the firm's policies and procedures (Ref: par. .A12–.A14 and .A19)

b. The auditor's report being appropriate in the circumstances

Review

.18 The engagement partner should take responsibility for reviews being performed in accordance with the firm's review policies and procedures. (Ref: par. .A15–.A16 and .A19)

.19 On or before the date of the auditor's report, the engagement partner should, through a review of the audit documentation and discussion with the engagement team, be satisfied that sufficient appropriate audit evidence has been obtained to support the conclusions reached and for the auditor's report to be issued. (Ref: par. .A17–.A19)

Consultation

.20 The engagement partner should

a. take responsibility for the engagement team undertaking appropriate consultation on difficult or contentious matters;

b. be satisfied that members of the engagement team have undertaken appropriate consultation during the course of the engagement, both within the engagement team and between the engagement team and others at the appropriate level within or outside the firm;

c. be satisfied that the nature and scope of such consultations are agreed with, and conclusions resulting from such consultations are understood by, the party consulted; and

d. determine that conclusions resulting from such consultations have been implemented. (Ref: par. .A20–.A22)

Engagement Quality Control Review

.21 For those audit engagements, if any, for which the firm has determined that an engagement quality control review is required, the engagement partner should

a. determine that an engagement quality control reviewer has been appointed;

b. discuss significant findings or issues arising during the audit engagement, including those identified during the engagement quality control review, with the engagement quality control reviewer; and

c. not release the auditor's report until the completion of the engagement quality control review. (Ref: par. .A23–.A25)

.22 The engagement quality control reviewer should perform an objective evaluation of the significant judgments made by the engagement team and the conclusions reached in formulating the auditor's report. This evaluation should involve

a. discussion of significant findings or issues with the engagement partner;

b. reading the financial statements and the proposed auditor's report;

c. review of selected audit documentation relating to the significant judgments the engagement team made and the related conclusions it reached; and

d. evaluation of the conclusions reached in formulating the auditor's report and consideration of whether the proposed auditor's report is appropriate. (Ref: par. .A26–.A32)

Differences of Opinion

.23 If differences of opinion arise within the engagement team; with those consulted; or, when applicable, between the engagement partner and the engagement quality control reviewer, the engagement team should follow the firm's policies and procedures for resolving differences of opinion.

Monitoring

.24 An effective system of quality control includes a monitoring process designed to provide the firm with reasonable assurance that its policies and procedures relating to the system of quality control are relevant, adequate, and operating effectively. The engagement partner should consider

a. the results of the firm's monitoring process as evidenced in the latest information circulated to the engagement partner by the firm and, if applicable, other network firms and

b. whether deficiencies noted in that information may affect the audit engagement. (Ref: par. .A32–.A34)

Documentation

.25 The auditor should include in the audit documentation the following:[6] (Ref: par. .A35)

a. Issues identified with respect to compliance with relevant ethical requirements and how they were resolved

b. Conclusions on compliance with independence requirements that apply to the audit engagement and any relevant discussions with the firm that support these conclusions

c. Conclusions reached regarding the acceptance and continuance of client relationships and audit engagements

d. The nature and scope of, and conclusions resulting from, consultations undertaken during the course of the audit engagement (Ref: par. .A36)

.26 The engagement quality control reviewer should document, for the audit engagement reviewed

a. that the procedures required by the firm's policies on engagement quality control review have been performed;

b. the date that the engagement quality control review was completed; and

[6] Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*.

c. that the reviewer is not aware of any unresolved matters that would cause the reviewer to believe that the significant judgments that the engagement team made and the conclusions it reached were not appropriate.

Application and Other Explanatory Material

System of Quality Control and the Role of the Engagement Teams (Ref: par. .02)

.A1 QM section 10A addresses the firm's responsibilities to establish and maintain its system of quality control for audit engagements. The system of quality control includes policies and procedures that address each of the following elements:

- Leadership responsibilities for quality within the firm
- Relevant ethical requirements
- Acceptance and continuance of client relationships and specific engagements
- Human resources
- Engagement performance
- Monitoring

Reliance on the Firm's System of Quality Control (Ref: par. .05)

.A2 Unless information provided by the firm or other parties suggests otherwise, the engagement team may rely on the firm's system of quality control regarding, for example

- competence of personnel through their recruitment and formal training.
- independence through the accumulation and communication of relevant independence information.
- maintenance of client relationships through acceptance and continuance systems.
- adherence to applicable legal and regulatory requirements through the monitoring process.

Leadership Responsibilities for Quality on Audits (Ref: par. .10)

.A3 The engagement partner's actions and communications with the other members of the engagement team demonstrate responsibility for the overall quality on each audit engagement when they emphasize

a. the importance to audit quality of
   i. performing work that complies with professional standards and applicable legal and regulatory requirements;

ii. complying with the firm's applicable quality control policies and procedures;

iii. issuing auditor's reports that are appropriate in the circumstances; and

iv. the engagement team's ability to raise concerns without fear of reprisals and

b. the fact that quality is essential in performing audit engagements.

Relevant Ethical Requirements

Compliance With Relevant Ethical Requirements (Ref: par. .11)

.A4 The AICPA Code of Professional Conduct establishes the fundamental principles of professional ethics, which include the following:

- Responsibilities
- The public interest
- Integrity
- Objectivity and independence
- Due care

Threats to Independence (Ref: par. .13)

.A5 The engagement team may identify a threat to independence regarding the audit engagement that safeguards may not be able to eliminate or reduce to an acceptable level. In that case, as required by paragraph .13*c*, the engagement partner reports to the relevant person(s) within the firm to determine appropriate action, which may include eliminating the activity or interest that creates the threat or withdrawing from the audit engagement when withdrawal is possible under applicable law or regulation.

Considerations Specific to Governmental Entities

.A6 Law or regulation may provide safeguards for the independence of governmental audit organizations and the auditors employed by them. However, in the absence of law or regulation, governmental audit organizations may establish supplemental safeguards to assist the auditor or audit organization in maintaining independence. Additionally, when law or regulation does not permit withdrawal from the engagement, the auditor may disclose in the auditor's report the circumstances affecting the auditor's independence.

Acceptance and Continuance of Client Relationships and Audit Engagements (Ref: par. .14)

.A7 QM section 10A requires the firm to obtain information considered necessary in the circumstances before accepting an engagement with a new client, when deciding whether to continue an existing engagement, and when considering acceptance of a new engagement with an existing client.[7] Information such as the following assists the engagement partner in determining whether the conclusions reached regarding the acceptance and continuance of client relationships and audit engagements are appropriate:

- The integrity of the principal owners, key management, and those charged with governance of the entity
- Whether the engagement team is competent to perform the audit engagement and has the necessary capabilities, including time and resources
- Whether the firm and the engagement team can comply with relevant ethical requirements
- Significant findings or issues that have arisen during the current or previous audit engagement and their implications for continuing the relationship

Considerations Specific to Governmental Entities (Ref: par. .14–.15)

.A8 For some governmental entities, auditors may be appointed in accordance with law or regulation, and the auditor may not be permitted to decline or withdraw from the engagement. Accordingly, certain of the requirements and considerations regarding the acceptance and continuance of client relationships and audit engagements as set out in paragraphs .14–.15 and .A7 may not be relevant. Nonetheless, information gathered as a result of the process described may be valuable in planning the audit, performing risk assessments, and carrying out reporting responsibilities.

Assignment of Engagement Teams (Ref: par. .16)

.A9 A person with expertise in a specialized area of accounting or auditing is a member of the engagement team if that person performs audit procedures on the engagement. This applies whether that person is an employee of the firm or a nonemployee engaged by the firm. However, a person with such expertise is not a member of the engagement team if that person's involvement with the engagement is only consultation. Consultations are addressed in paragraphs .20 and .A20–.A22.

.A10 When considering the appropriate competence and capabilities expected of the engagement team as a whole, the engagement partner may take into consideration such matters as the team's

- understanding of, and practical experience with, audit engagements of a similar nature and complexity through appropriate training and participation.
- understanding of professional standards and applicable legal and regulatory requirements.
- technical expertise, including expertise with relevant IT and specialized areas of accounting or auditing.
- knowledge of relevant industries in which the entity operates.

[7] Paragraph .27 of QM section 10A.

- ability to apply professional judgment.
- understanding of the firm's quality control policies and procedures.

Considerations Specific to Governmental Entities (Ref: par. .16)

.A11 For audits of governmental entities, competence may include skills that are necessary to comply with applicable law or regulation. Such competence may include knowledge of *Government Auditing Standards* and an understanding of the applicable reporting requirements, including reporting to the legislature or other governing body or in the public interest. The scope of a governmental audit may include, for example, additional requirements with respect to detecting misstatements that result from violations of provisions of contracts or grant agreements that could have a direct and material effect on the determination of financial statement amounts or the need to examine and report on internal control over financial reporting or compliance.

Engagement Performance

Direction, Supervision, and Performance (Ref: par. .17a)

.A12 Direction of the engagement team involves informing the members of the engagement team of matters such as the following:

- Their responsibilities, including the need to comply with relevant ethical requirements and to plan and perform an audit with professional skepticism as required by section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*[8]
- Responsibilities of respective partners when more than one partner is involved in the conduct of an audit engagement
- The objectives of the work to be performed
- The nature of the entity's business
- Risk-related issues
- Problems that may arise
- The detailed approach to the performance of the engagement

Discussion among members of the engagement team allows team members to raise questions so that appropriate communication can occur within the engagement team.

.A13 Appropriate teamwork and training assist members of the engagement team to clearly understand the objectives of the assigned work.

.A14 Supervision includes matters such as the following:

[8] Paragraphs .16–.17 of section 200.

- Tracking the progress of the audit engagement
- Considering the competence and capabilities of individual members of the engagement team, including whether they have sufficient time to carry out their work, they understand their instructions, and the work is being carried out in accordance with the planned approach to the audit engagement
- Addressing significant findings or issues arising during the audit engagement, considering their significance, and modifying the planned approach appropriately
- Identifying matters for consultation or consideration by qualified engagement team members during the audit engagement

Review

Review Responsibilities (Ref: par. .18)

.A15 Under QM section 10A, the firm's review responsibility policies and procedures are determined on the basis that suitably experienced team members review the work of other team members.[9] The engagement partner may delegate part of the review responsibility to other members of the engagement team, in accordance with the firm's system of quality control.

.A16 A review consists of consideration of whether, for example

- the work has been performed in accordance with professional standards and applicable legal and regulatory requirements;
- significant findings or issues have been raised for further consideration;
- appropriate consultations have taken place and the resulting conclusions have been documented and implemented;
- the nature, timing, and extent of the work performed is appropriate and without need for revision;
- the work performed supports the conclusions reached and is appropriately documented;
- the evidence obtained is sufficient and appropriate to support the auditor's report; and
- the objectives of the engagement procedures have been achieved.

The Engagement Partner's Review of the Work Performed (Ref: par. .19)

.A17 Timely reviews of the following by the engagement partner at appropriate stages during the engagement allow significant findings or issues to be resolved on a timely basis to the engagement partner's satisfaction on or before the date of the auditor's report:

[9] Paragraph .36 of QM section 10A.

- Critical areas of judgment, especially those relating to difficult or contentious matters identified during the course of the engagement
- Significant risks
- Other areas that the engagement partner considers important

The engagement partner need not review all audit documentation but may do so. However, as required by section 230, *Audit Documentation*, the partner documents the extent and timing of the reviews.[10]

.A18 An engagement partner taking over an audit during the engagement may apply the review procedures as described in paragraph .A17 to review the work performed to the date of the change in order to assume the responsibilities of an engagement partner.

Considerations Relevant When a Member of the Engagement Team With Expertise in a Specialized Area of Accounting or Auditing Is Used (Ref: par. .17–.19)

.A19 When the engagement team includes a member with expertise in a specialized area of accounting or auditing, direction, supervision, and review of that engagement team member's work is the same as for any other engagement team member and may include matters such as the following:

- Agreeing with that member upon the nature, scope, and objectives of that member's work and the respective roles of, and the nature, timing, and extent of communication between, that member and other members of the engagement team
- Evaluating the adequacy of that member's work, including the relevance and reasonableness of that member's findings or conclusions and the consistency of those findings or conclusions with other audit evidence

Consultation (Ref: par. .20)

.A20 Members of the engagement team have a professional responsibility to bring to the attention of appropriate personnel matters that, in their professional judgment, are difficult or contentious and may require consultation.

.A21 Effective consultation on significant technical, ethical, and other matters within the firm or, when applicable, outside the firm can be achieved when those consulted

- are given all the relevant facts that will enable them to provide informed advice and
- have appropriate knowledge, authority, and experience.

.A22 The engagement team may consult outside the firm (for example, when the firm lacks appropriate internal resources). The engagement team may take advantage of advisory services provided by other firms, professional and regulatory bodies, or commercial organizations that provide relevant quality control services.

[10] Paragraph .09*c* of section 230.

Engagement Quality Control Review

Completion of the Engagement Quality Control Review Before Releasing the Auditor's Report (Ref: par. .21c)

.A23 Conducting the engagement quality control review in a timely manner at appropriate stages during the engagement allows significant findings or issues to be promptly resolved to the engagement quality control reviewer's satisfaction.

.A24 *Completion of the engagement quality control review* means the completion by the engagement quality control reviewer of the requirements in paragraph .22 and, when applicable, compliance with paragraph .23. Documentation of the engagement quality control review may be completed after the report release date as part of the assembly of the final audit file. Section 230 establishes requirements and provides guidance in this regard.[11]

.A25 When the engagement quality control review is completed after the auditor's report is dated and identifies instances where additional procedures or additional evidence is necessary, the date of the report is changed to the date when the additional procedures have been satisfactorily completed or the additional evidence has been obtained, in accordance with section 700, *Forming an Opinion and Reporting on Financial Statements*, or section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

Nature, Timing, and Extent of Engagement Quality Control Review (Ref: par. .22)

.A26 By remaining alert for changes in circumstances, the engagement partner is able to identify situations in which an engagement quality control review is necessary, even though at the start of the engagement such a review was not required.

.A27 The extent of the engagement quality control review may depend, among other things, on the complexity of the audit engagement and the risk that the auditor's report might not be appropriate in the circumstances. The performance of an engagement quality control review does not reduce the responsibilities of the engagement partner for the audit engagement and its performance.

.A28 When section 701, *Communicating Key Audit Matters in the Independent Auditor's Report*, applies, the conclusions reached by the engagement team in formulating the auditor's report include determining the following:

- The key audit matters to be communicated
- The key audit matters that will not be communicated in the auditor's report in accordance with paragraph .13 of section 701, if any
- If applicable, depending on the facts and circumstances of the entity and the audit, that there are no key audit matters to communicate in the auditor's report

[11] Paragraphs .15–.18 and .A24–.A29 of section 230.

In addition, the reading of the proposed auditor's report in accordance with paragraph .22*b* includes consideration of the proposed descriptions of the matters to be included in the "Key Audit Matters" section. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

.A29 Matters relevant to evaluating the significant judgments made by the engagement team that may be considered in an engagement quality control review include the following:

- Significant risks identified during the engagement in accordance with section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, and the responses to those risks in accordance with section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, including the engagement team's assessment of, and response to, the risk of fraud in accordance with section 240, *Consideration of Fraud in a Financial Statement Audit*
- Judgments made, particularly with respect to materiality and significant risks
- The significance and disposition of corrected and uncorrected misstatements identified during the audit
- The matters to be communicated to management and those charged with governance and, when applicable, other parties, such as regulatory bodies

[Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A30 The engagement quality control reviewer may also consider the following:

- The evaluation of the firm's independence with regard to the audit engagement
- Whether appropriate consultation has taken place on matters involving differences of opinion or other difficult or contentious matters and the related conclusions arising from those consultations
- Whether audit documentation selected for review reflects the work performed regarding the significant judgments and supports the conclusions reached

[Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Considerations Specific to Smaller, Less Complex Entities (Ref: par. .21–.22)

.A31 An engagement quality control review is required for audit engagements that meet the criteria established by the firm that subjects engagements to an engagement quality control review. In some cases, none of the firm's audit engagements may meet the criteria that would subject them to such a review. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Considerations Specific to Governmental Entities (Ref: par. .22)

.A32 A statutorily appointed auditor (for example, an auditor general or other suitably qualified person within the audit organization acting on behalf of the auditor general) may act in a role equivalent to that of engagement partner with overall responsibility for the governmental audit. In such circumstances, when applicable, the selection of the engagement quality control reviewer includes consideration of the need for independence from the audited entity and the ability of the engagement quality control reviewer to provide an objective evaluation. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Monitoring (Ref: par. .24)

.A33 QM section 10A requires the firm to establish a monitoring process designed to provide it with reasonable assurance that the policies and procedures relating to the system of quality control are relevant, adequate, and operating effectively.[12] [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A34 In considering deficiencies that may affect the audit engagement, the engagement partner may consider measures the firm took to rectify the situation that the engagement partner considers sufficient in the context of that audit. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A35 A deficiency in the firm's system of quality control does not necessarily indicate that a particular audit engagement was not performed in accordance with professional standards and applicable legal and regulatory requirements or that the auditor's report was not appropriate. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Documentation (Ref: par. .25)

.A36 Section 230 addresses the auditor's responsibility to prepare audit documentation for an audit of financial statements. Section 230 also states that it is neither necessary nor practicable for the auditor to document every matter considered, or professional judgment made, in an audit.[13] [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A37 Documentation of consultations with other professionals involving difficult or contentious matters that is sufficiently complete and detailed contributes to an understanding of

- the issue on which consultation was sought and
- the results of the consultation, including any decisions made, the basis for those decisions, and how they were implemented.

[Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

[12] Paragraph .52 of QM section 10A.

Audit Documentation

Source: SAS No. 122; SAS No. 123; SAS No. 128; SAS No. 134; SAS No. 137; SAS No. 142; SAS No. 143; SAS No. 145.

See section 9230 for interpretations of this section.

Effective for audits of financial statements for periods ending on or after December 15, 2012, unless otherwise indicated.

Note

In June 2022, the ASB issued SAS No. 146, *Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, which contains amendments to this section.

The amendments are effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025, and can be viewed in the appendix of section 220 until the effective date, when they will be applied to this section.

In March 2023, the ASB issued SAS No. 149, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors and Audits of Referred-to Auditors)*, which contains amendments to this section.

The amendments are effective for audits of financial statements for periods ending on or after December 15, 2026, and can be viewed in appendix C of section 600 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility to prepare audit documentation for an audit of financial statements. The exhibit, "Audit Documentation Requirements in Other AU-C Sections," lists other AU-C sections that contain specific documentation requirements and guidance. The specific documentation requirements of other AU-C sections do not limit the application of this section. Law, regulation, or other standards may establish additional documentation requirements.

Nature and Purposes of Audit Documentation

.02 Audit documentation that meets the requirements of this section and the specific documentation requirements of other relevant AU-C sections provides

a. evidence of the auditor's basis for a conclusion about the achievement of the overall objectives of the auditor;[1] and

b. evidence that the audit was planned and performed in accordance with generally accepted auditing standards (GAAS) and applicable legal and regulatory requirements.

.03 Audit documentation serves a number of additional purposes, including the following:

- Assisting the engagement team to plan and perform the audit
- Assisting members of the engagement team responsible for supervision to direct and supervise the audit work and to discharge their review responsibilities in accordance with section 220A, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*[2]
- Enabling the engagement team to demonstrate that it is accountable for its work by documenting the procedures performed, the audit evidence examined, and the conclusions reached
- Retaining a record of matters of continuing significance to future audits of the same entity
- Enabling the conduct of quality control reviews and inspections in accordance with QM section 10A, *A Firm's System of Quality Control*
- Enabling the conduct of external inspections or peer reviews in accordance with applicable legal, regulatory, or other requirements
- Assisting an auditor who reviews a predecessor auditor's audit documentation
- Assisting auditors to understand the work performed in the prior year as an aid in planning and performing the current engagement

Effective Date

.04 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

---

[1]Paragraph .12 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

[2]Paragraphs .17–.19 of section 220A, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*.

Objective

.05 The objective of the auditor is to prepare documentation that provides

a. a sufficient and appropriate record of the basis for the auditor's report; and

b. evidence that the audit was planned and performed in accordance with GAAS and applicable legal and regulatory requirements.

Definitions

.06 For purposes of GAAS, the following terms have the meanings attributed as follows:

Audit documentation. The record of audit procedures performed, audit evidence obtained, and conclusions the auditor reached (terms such as *working papers* or *workpapers* are also sometimes used).

Audit file. One or more folders or other storage media, in physical or electronic form, containing the records that constitute the audit documentation for a specific engagement.

Documentation completion date. The date, no later than 60 days following the report release date, on which the auditor has assembled for retention a complete and final set of documentation in an audit file.

Experienced auditor. An individual (whether internal or external to the firm) who has practical audit experience, and a reasonable understanding of (Ref: par. .A1)

a. audit processes;

b. GAAS and applicable legal and regulatory requirements;

c. the business environment in which the entity operates; and

d. auditing and financial reporting issues relevant to the entity's industry.

Report release date. The date the auditor grants the entity permission to use the auditor's report in connection with the financial statements. (Ref: par. .A2)

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142.]

Requirements

Timely Preparation of Audit Documentation

.07 The auditor should prepare audit documentation on a timely basis. (Ref: par. .A3)

Documentation of the Audit Procedures Performed and Audit Evidence Obtained

Form, Content, and Extent of Audit Documentation

.08 The auditor should prepare audit documentation that is sufficient to enable an experienced auditor, having no previous connection with the audit, to understand (Ref: par. .A4–.A7 and .A19–.A20)

a. the nature, timing, and extent of the audit procedures performed to comply with GAAS and applicable legal and regulatory requirements; (Ref: par. .A8–.A9)

b. the results of the audit procedures performed, and the audit evidence obtained; and

c. significant findings or issues arising during the audit, the conclusions reached thereon, and significant professional judgments made in reaching those conclusions. (Ref: par. .A10–.A13)

.09 In documenting the nature, timing, and extent of audit procedures performed, the auditor should record

a. the identifying characteristics of the specific items or matters tested; (Ref: par. .A14)

b. who performed the audit work and the date such work was completed; and

c. who reviewed the audit work performed and the date and extent of such review. (Ref: par. .A15)

.10 For audit procedures related to the inspection of significant contracts or agreements, the auditor should include abstracts or copies of those contracts or agreements in the audit documentation.

.11 The auditor should document discussions of significant findings or issues with management, those charged with governance, and others, including the nature of the significant findings or issues discussed, and when and with whom the discussions took place. (Ref: par. .A16)

.12 If the auditor identified information that is inconsistent with the auditor's final conclusion regarding a significant finding or issue, the auditor should document how the auditor addressed the inconsistency. (Ref: par. .A17–.A18)

Departure From a Relevant Requirement

.13 If, in rare circumstances, the auditor judges it necessary to depart from a relevant presumptively mandatory requirement,[3] the auditor must document the justification for the departure and how the alternative audit procedures performed in the circumstances were sufficient to achieve the intent of that requirement. (Ref: par. .A21–.A22)

---

[3] Paragraph .26 of section 200.

Matters Arising After the Date of the Auditor's Report

.14 If, in rare circumstances, the auditor performs new or additional audit procedures or draws new conclusions after the date of the auditor's report, the auditor should document (Ref: par. .A23)

a. the circumstances encountered;

b. the new or additional audit procedures performed, audit evidence obtained, and conclusions reached, and their effect on the auditor's report; and

c. when and by whom the resulting changes to audit documentation were made and reviewed.

Assembly and Retention of the Final Audit File

.15 The auditor should document the report release date in the audit documentation.

.16 The auditor should assemble the audit documentation in an audit file and complete the administrative process of assembling the final audit file on a timely basis, no later than 60 days following the report release date. (Ref: par. .A24–.A26)

.17 After the documentation completion date, the auditor should not delete or discard audit documentation of any nature before the end of the specified retention period. Such retention period, however, should not be shorter than five years from the report release date. (Ref: par. .A27–.A29)

.18 In circumstances other than those addressed in paragraph .14 in which the auditor finds it necessary to modify existing audit documentation or add new audit documentation after the documentation completion date, the auditor should, regardless of the nature of the modifications or additions, document (Ref: par. .A28)

a. the specific reasons for making the changes; and

b. when and by whom they were made and reviewed.

.19 The auditor should adopt reasonable procedures to maintain the confidentiality of client information.

Application and Other Explanatory Material

Definitions (Ref: par. .06)

Experienced Auditor

.A1 Having practical audit experience means possessing the competencies and skills that would have enabled the auditor to perform the audit but does not mean that the auditor is required to have performed comparable audits.

Report Release Date

.A2 In many cases, the report release date will be the date the auditor delivers the audit report to the entity. When there are delays in releasing the report, a fact may become known to the auditor that, had it been known to the auditor at the date of the auditor's report, may have caused the auditor to revise the auditor's report. Section 560, *Subsequent Events and Subsequently Discovered Facts*, addresses the auditor's responsibilities in such circumstances, and paragraph .14 addresses the documentation requirements in the rare circumstances in which the auditor performs new or additional audit procedures or draws new conclusions after the date of the auditor's report.

Timely Preparation of Audit Documentation (Ref: par. .07)

.A3 Preparing sufficient and appropriate audit documentation on a timely basis throughout the audit helps to enhance the quality of the audit and facilitates the effective review and evaluation of the audit evidence obtained and conclusions reached before the auditor's report is finalized. Documentation prepared at the time such work is performed or shortly thereafter is likely to be more accurate than documentation prepared at a much later time.

Documentation of the Audit Procedures Performed and Audit Evidence Obtained

Form, Content, and Extent of Audit Documentation (Ref: par. .08)

.A4 The form, content, and extent of audit documentation depend on factors such as

- the size and complexity of the entity.
- the nature of the audit procedures to be performed.
- the identified risks of material misstatement.
- the significance of the audit evidence obtained.
- the nature and extent of exceptions identified.
- the need to document a conclusion or the basis for a conclusion not readily determinable from the documentation of the work performed or audit evidence obtained.
- the audit methodology and tools used.
- the extent of judgment involved in performing the work and evaluating the results.

.A5 Audit documentation may be recorded on paper or on electronic or other media. QM section 10A addresses a firm's responsibility to establish procedures designed to maintain the integrity, accessibility, and retrievability of documentation; for example, when original paper documentation is electronically scanned or otherwise copied to another media for inclusion in the audit file.[4] Examples of audit documentation include the following:

- Audit plans[5]
- Analyses
- Issues memorandums
- Summaries of significant findings or issues
- Letters of confirmation and representation
- Checklists
- Correspondence (including e-mail) concerning significant findings or issues

.A6 The auditor need not include in audit documentation superseded drafts of working papers and financial statements, notes that reflect incomplete or preliminary thinking, previous copies of documents corrected for typographical or other errors, and duplicates of documents.

.A7 On their own, oral explanations by the auditor do not represent adequate support for the work the auditor performed or conclusions the auditor reached, but may be used to explain or clarify information contained in the audit documentation.

Documentation of Compliance With GAAS (Ref: par. .08a)

.A8 In principle, compliance with the requirements of this section will result in the audit documentation being sufficient and appropriate in the circumstances. Other AU-C sections contain specific documentation requirements that are intended to clarify the application of this section in the particular circumstances of those other AU-C sections. The specific documentation requirements of other AU-C sections do not limit the application of this section. Furthermore, the absence of a documentation requirement in any particular AU-C section is not intended to suggest that there is no documentation that will be prepared as a result of complying with that AU-C section.

.A9 Audit documentation provides evidence that the audit complies with GAAS. However, it is neither necessary nor practicable for the auditor to document every matter considered, or professional judgment made, in an audit. Further, it is unnecessary for the auditor to document separately (as in a checklist, for example) compliance with matters for which compliance is demonstrated by documents included within the audit file. For example:

- The existence of an adequately documented audit plan demonstrates that the auditor has planned the audit.
- The existence of a signed engagement letter in the audit file demonstrates that the auditor has agreed to the terms of the audit engagement with management or, when appropriate, those charged with governance.

---

[4]Paragraph .A58 of QM section 10A, *A Firm's System of Quality Control*.

[5]Paragraphs .07–.11 of section 300, *Planning an Audit*.

- An auditor's report containing an appropriately qualified opinion on the financial statements demonstrates that the auditor has complied with the requirement to express a qualified opinion under the circumstances in accordance with GAAS.

- Regarding requirements that apply generally throughout the audit, there may be a number of ways in which compliance with them may be demonstrated within the audit file:

  — For example, there may be no single way in which the auditor's professional skepticism is documented. But the audit documentation may nevertheless provide evidence of the auditor's exercise of professional skepticism in accordance with GAAS, for example, in relation to accounting estimates, when the audit evidence obtained includes evidence that both corroborates and contradicts management's assertions, documenting how the auditor evaluated that evidence, including the professional judgments made in forming a conclusion about the sufficiency and appropriateness of the audit evidence obtained.

  — Similarly, that the engagement partner has taken responsibility for the direction, supervision, and performance of the audit in compliance with GAAS may be evidenced in a number of ways within the audit documentation. This may include documentation of the engagement partner's timely involvement in aspects of the audit, such as participation in the team discussions required by section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.[6]

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 143.]

Documentation of Significant Findings or Issues and Related Significant Professional Judgments (Ref: par. .08c)

.A10 Judging the significance of a finding or issue requires an objective analysis of the facts and circumstances. Examples of significant findings or issues include

- matters involving the selection, application, and consistency of significant accounting practices, including related disclosures. Such matters include, but are not limited to (*a*) accounting for complex or unusual transactions or (*b*) accounting estimates and uncertainties and, if applicable, the related management assumptions.

- matters that give rise to significant risks (as defined in section 315).[7]

- results of audit procedures (including identification of corrected and uncorrected misstatements)[8] indicating (*a*) that the financial statements could be materially

[6]Paragraph .33 of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

[7]Paragraphs .28–.30 of section 315.

[8]See section 450, *Evaluation of Misstatements Identified During the Audit*.

misstated or (*b*) a need to revise the auditor's previous assessment of the risks of material misstatement and the auditor's responses to those risks.

- circumstances that cause the auditor significant difficulty in applying necessary audit procedures.
- findings that could result in a modification to the audit opinion or the inclusion of an emphasis-of-matter paragraph in the auditor's report.

.A11 An important factor in determining the form, content, and extent of audit documentation of significant findings or issues is the extent of professional judgment exercised in performing the work and evaluating the results. Documentation of the professional judgments made, when significant, serves to explain the auditor's conclusions and to reinforce the quality of the judgment. Such findings or issues are of particular interest to those responsible for reviewing audit documentation, including those carrying out subsequent audits when reviewing items of continuing significance (for example, when performing a retrospective review of accounting estimates).

.A12 Some examples of circumstances in which, in accordance with paragraph .08, it is appropriate to prepare audit documentation relating to the exercise of professional judgment include, when the findings, issues, and judgments are significant,

- the rationale for the auditor's conclusion when a requirement provides that the auditor *should consider* certain information or factors, and that consideration is significant in the context of the particular engagement.
- the basis for the auditor's conclusion on the reasonableness of areas of subjective judgments made by management.
- the basis for the auditor's evaluation of whether an accounting estimate and related disclosures are reasonable in the context of the applicable financial reporting framework or are misstated.
- the basis for the auditor's conclusions about the authenticity of a document when further investigation (such as making appropriate use of a specialist or of confirmation procedures) is undertaken in response to conditions identified during the audit that caused the auditor to believe that the document may not be authentic.
- when section 701, *Communicating Key Audit Matters in the Independent Auditor's Report*, applies, the auditor's determination of the key audit matters or the determination that there are no key audit matters to be communicated, including in the extremely rare circumstances in which the auditor determines that the matter should not be communicated in the auditor's report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 143.]

.A13 The auditor may consider it helpful to prepare and retain as part of the audit documentation a summary (sometimes known as a completion memorandum) that describes the significant findings or issues identified during the audit and how they were addressed, or that includes cross-references to other relevant supporting audit documentation that provides such information. Such a summary may facilitate effective and efficient reviews and inspections of the audit documentation, particularly for large and complex audits. Further, the preparation of such a summary may assist the auditor's consideration of the significant findings or issues. It may also help the auditor to consider whether, in light of the audit procedures performed and conclusions reached, there is any individual relevant AU-C section objective that the auditor cannot achieve that would prevent the auditor from achieving the overall objectives of the auditor.

Identification of Specific Items or Matters Tested and of the Preparer and the Reviewer (Ref: par. .09)

.A14 Recording the identifying characteristics serves a number of purposes. For example, it improves the ability of the auditor to supervise and review the work performed and thus demonstrates the accountability of the engagement team for its work and facilitates the investigation of exceptions or inconsistencies. Identifying characteristics will vary with the nature of the audit procedure and the item or matter tested. For example:

- For a detailed test of entity-generated purchase orders, the auditor may identify the documents selected for testing by their dates and unique purchase order numbers.
- For a procedure requiring selection or review of all items over a specific amount from a given population, the auditor may record the scope of the procedure and identify the population (for example, all journal entries over a specified amount from the journal register for the period being audited).
- For a procedure requiring systematic sampling from a population of documents, the auditor may identify the documents selected by recording their source, the starting point, and the sampling interval (for example, a systematic sample of shipping reports selected from the shipping log for the period from April 1 to September 30, starting with report number 12345 and selecting every 125th report).
- For a procedure requiring inquiries of specific entity personnel, the auditor may record the inquiries made, the dates of the inquiries, and the names and job designations of the entity personnel.
- For an observation procedure, the auditor may record the process or matter being observed, the relevant individuals, their respective responsibilities, and where and when the observation was carried out.

.A15 Section 220A requires the auditor to review the audit work performed through review of the audit documentation.[9] The requirement to document who reviewed the audit work performed and the extent of the review, in accordance with the firm's policies and procedures addressing review responsibilities, does not imply a need for each specific

[9]Paragraph .19 of section 220A.

working paper to include evidence of review. The requirement, however, means documenting what audit work was reviewed, who reviewed such work, and when it was reviewed.

Documentation of Discussions of Significant Findings or Issues With Management, Those Charged With Governance, and Others (Ref: par. .11)

.A16 The audit documentation is not limited to documents prepared by the auditor but may include other appropriate documents such as minutes of meetings prepared by the entity's personnel and recognized by the auditor as an appropriate summary of the meeting. Others with whom the auditor may discuss significant findings or issues may include other personnel within the entity, and external parties, such as persons providing professional advice to the entity.

Documentation of How Inconsistencies Have Been Addressed (Ref: par. .12)

.A17 The requirement to document how the auditor addressed inconsistencies in information does not imply that the auditor needs to retain documentation that is incorrect or superseded.

.A18 The documentation of the inconsistency may include, but is not limited to, procedures performed in response to the information, and documentation of consultations on, or resolutions of, differences in professional judgment among members of the engagement team or between the engagement team and others consulted.

Considerations Specific to Smaller, Less Complex Entities (Ref: par. .08)

.A19 The audit documentation for the audit of a smaller, less complex entity is generally less extensive than that for the audit of a larger, more complex entity. Further, in the case of an audit in which the engagement partner performs all the audit work, the documentation will not include matters that might have to be documented solely to inform or instruct members of an engagement team, or to provide evidence of review by other members of the team (for example, there will be no matters to document relating to team discussions or supervision). Nevertheless, the engagement partner complies with the overriding requirement in paragraph .08 to prepare audit documentation that can be understood by an experienced auditor, as the audit documentation may be subject to review by external parties for regulatory or other purposes.

.A20 When preparing audit documentation, the auditor of a smaller, less complex entity may also find it helpful and efficient to record various aspects of the audit together in a single document, with cross-references to supporting working papers as appropriate. Examples of matters that may be documented together in the audit of a smaller, less complex entity include the understanding of the entity and its environment, the applicable financial reporting framework, and the entity's system of internal control; the overall audit strategy and audit plan; materiality; assessed risks, significant findings or issues noted during the audit; and conclusions reached. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Departure From a Relevant Requirement (Ref: par. .13)

.A21 The requirements of GAAS are designed to enable the auditor to achieve the objectives specified in GAAS, and thereby the overall objectives of the auditor. Accordingly, other than in rare circumstances, GAAS call for compliance with each requirement that is relevant in the circumstances of the audit.

.A22 The documentation requirement applies only to requirements that are relevant in the circumstances. A requirement is not relevant[10] only in the cases in which

a. the AU-C section is not relevant (for example, if an entity does not have an internal audit function, nothing in section 610, *Using the Work of Internal Auditors*, is relevant); or

b. the requirement is conditional and the condition does not exist (for example, the requirement to modify the auditor's opinion when there is an inability to obtain sufficient appropriate audit evidence, and there is no such inability).

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2014, by SAS No. 128.]

Matters Arising After the Date of the Auditor's Report (Ref: par. .14)

.A23 Examples of rare circumstances in which the auditor performs new or additional audit procedures or draws new conclusions after the date of the auditor's report include

- when, after the date of the auditor's report, the auditor becomes aware of facts that existed at that date and which, if known at that date, might have caused the financial statements to be revised or the auditor to modify the opinion in the auditor's report.[11]
- when the auditor concludes that procedures necessary at the time of the audit, in the circumstances then existing, were omitted from the audit of the financial information.[12]

The resulting changes to the audit documentation are reviewed in accordance with the firm's quality control procedures as required by QM section 10A.

Assembly and Retention of the Final Audit File (Ref: par. .16–.18)

.A24 Statutes, regulations, or the audit firm's quality control policies may specify a period of time shorter than 60 days following the report release date in which this assembly process is to be completed.

[10] Paragraph .24 of section 200.

[11] Paragraphs .12 and .15 of section 560, *Subsequent Events and Subsequently Discovered Facts*.

[12] Paragraph .07 of section 585, *Consideration of Omitted Procedures After the Report Release Date*.

.A25 Certain matters, such as auditor independence and staff training, which are not engagement specific, may be documented either centrally within a firm or in the audit documentation for an audit engagement.

.A26 The completion of the assembly of the final audit file after the date of the auditor's report is an administrative process that does not involve the performance of new audit procedures or the drawing of new conclusions. Changes may, however, be made to the audit documentation during the final assembly process if they are administrative in nature. Examples of such changes include

- deleting or discarding superseded documentation.
- sorting, collating, and cross-referencing working papers.
- signing off on completion checklists relating to the file assembly process.
- documenting audit evidence that the auditor has obtained, discussed, and agreed with the relevant members of the engagement team before the date of the auditor's report.
- adding information received after the date of the auditor's report; for example, an original confirmation that was previously communicated electronically.

.A27 Firms are required to establish policies and procedures for the retention of engagement documentation.[13] Statutes, regulations, or the audit firm's quality control policies may specify a retention period longer than five years.

.A28 An example of a circumstance in which the auditor may find it necessary to modify existing audit documentation or add new audit documentation after the documentation completion date is the need to clarify existing audit documentation arising from comments received during monitoring inspections performed by internal or external parties.

.A29 Audit documentation is the property of the auditor, and some states recognize this right of ownership in their statutes. The auditor may make available to the entity at the auditor's discretion copies of the audit documentation, provided such disclosure does not undermine the effectiveness and integrity of the audit process.

[13] Paragraph .50 of QM section 10A.

Exhibit — Audit Documentation Requirements in Other AU-C Sections

.A30 The following lists the main paragraphs in other AU-C sections that contain specific documentation requirements. This list is not a substitute for knowledge of the AU-C sections:

a. Paragraphs .10, .13, and .16 of section 210A, *Terms of Engagement*

b. Paragraphs .25–.26 of section 220A, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*

c. Paragraphs .43–.46 of section 240, *Consideration of Fraud in a Financial Statement Audit*

d. Paragraph .28 of section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*

e. Paragraph .20 of section 260, *The Auditor's Communication With Those Charged With Governance*

f. Paragraph .12 of section 265, *Communicating Internal Control Related Matters Identified in an Audit*

g. Paragraph .14 of section 300, *Planning an Audit*

h. Paragraph .33 of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*

i. Paragraph .14 of section 320, *Materiality in Planning and Performing an Audit*

j. Paragraphs .30–.33 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*

k. Paragraph .12 of section 450, *Evaluation of Misstatements Identified During the Audit*

l. Paragraph .20 of section 501, *Audit Evidence — Specific Considerations for Selected Items*

m. Paragraph .08 of section 520, *Analytical Procedures*

n. Paragraph .38 of section 540, *Auditing Accounting Estimates and Related Disclosures*

o. Paragraph .28 of section 550, *Related Parties*

p. Paragraph .22 of section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*

q. Paragraphs .49 and .64 of section 600A, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors)*

r. Paragraphs .33–.35 of section 610, *Using the Work of Internal Auditors*

s. Paragraph .17 of section 701, *Communicating Key Audit Matters in the Independent Auditor's Report*

t. Paragraph .26 of section 720, *The Auditor's Responsibilities Relating to Other Information Included in Annual Reports*

u. Paragraph .13 of section 915, *Reports on Application of Requirements of an Applicable Financial Reporting Framework*

v. Paragraphs .42–.43 of section 930, *Interim Financial Information*

w. Paragraphs .39–.42 of section 935, *Compliance Audits*

[Revised, August 2012, to reflect conforming changes necessary due to the issuance of SAS No. 126. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 137. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 143.]

AU-C Section 9230

Audit Documentation: Auditing Interpretations of Section 230

1. Providing Access to or Copies of Audit Documentation to a Regulator[1,2]

.01 *Question*—Paragraph .19 of section 230, *Audit Documentation*, states that "the auditor should adopt reasonable procedures to maintain the confidentiality of client information." However, auditors are sometimes required by law, regulation, or audit contract[3] to provide a regulator, or a duly appointed representative, access to audit documentation. For example, a regulator may request access to the audit documentation to fulfill a quality review requirement or to assist in establishing the scope of a regulatory examination. Furthermore, as part of the regulator's review of the audit documentation, the regulator may request copies of all or selected portions of the audit documentation during or after the review. The regulator may intend, or decide, to make copies (or information derived from the audit documentation) available to others, including other governmental agencies, for their particular purposes, with or without the knowledge of the auditor or the client. When a regulator requests the auditor to provide access to (and possibly copies of) audit documentation pursuant to law, regulation, or audit contract, what steps may the auditor take?

.02 *Interpretation*—When a regulator requests access to audit documentation pursuant to law, regulation, or audit contract, the auditor may take the following steps:

a. Consider advising the client that the regulator has requested access to (and possibly copies of) the audit documentation and that the auditor intends to comply with such request.[4]

---

[1]The term *regulator(s)* includes federal, state, and local government officials with legal oversight authority over the entity. Examples of regulators who may request access to audit documentation include, but are not limited to, state insurance and utility regulators, various health care authorities, and federal agencies such as the Federal Deposit Insurance Corporation, the Department of Housing and Urban Development, the Department of Labor, and the Rural Electrification Administration.

[2]The guidance in this interpretation does not apply to requests from the IRS, firm practice-monitoring programs to comply with AICPA or state professional requirements such as peer or quality reviews, proceedings relating to alleged ethics violations, or subpoenas.

[3]Paragraphs .11–.15 of this interpretation address situations in which the auditor is not required by law, regulation, or audit contract to provide a regulator access to the audit documentation.

[4]The auditor may wish (and in some cases may be required by law, regulation, or audit contract) to confirm in writing with the client that the auditor may be required to provide a regulator access to the audit documentation. Sample language that may be used follows:

b. Make appropriate arrangements with the regulator for the review.

c. Maintain control over the audit documentation, and

d. Consider submitting the letter described in paragraph .05 of this interpretation to the regulator.

.03 Making appropriate arrangements with the regulator may include establishing the specific details such as the date, time, and location of the review. The audit documentation may be made available to a regulator at the offices of the client, the auditor, or a mutually agreed-upon location. However, maintaining control of audit documentation is necessary in order for the auditor to maintain the integrity of the audit documentation and the confidentiality of client information. For example, the auditor (or the auditor's representative) may be present when the audit documentation is reviewed by the regulator.

.04 Ordinarily, the auditor may not agree to transfer ownership of the audit documentation to a regulator. Furthermore, the auditor may not agree, without client authorization, that the information contained therein about the client may be communicated to or made available to any other party. In this regard, the action of an auditor providing access to, or copies of, the audit documentation shall not constitute transfer of ownership or authorization to make them available to any other party.

.05 An audit performed in accordance with generally accepted auditing standards is not intended to, and does not, satisfy a regulator's oversight responsibilities. To avoid any misunderstanding, prior to allowing a regulator access to the audit documentation, the auditor may submit a letter to the regulator that

a. sets forth the auditor's understanding of the purpose for which access is being requested;

b. describes the audit process and the limitations inherent in a financial statement audit;

c. explains the purpose for which the audit documentation was prepared, and that any individual conclusions must be read in the context of the auditor's report on the financial statements;

d. states, except when not applicable, that the audit was not planned or conducted in contemplation of the purpose for which access is being granted or to assess the entity's compliance with laws and regulations;

The audit documentation for this engagement is the property of [*name of auditor*] and constitutes confidential information. However, we may be requested to make certain audit documentation available to [*name of regulator*] pursuant to authority given to it by law or regulation. If requested, access to such audit documentation will be provided under the supervision of [*name of auditor*] personnel. Furthermore, upon request, we may provide copies of selected audit documentation to [*name of regulator*]. The [*name of regulator*] may intend, or decide, to distribute the copies or information contained therein to others, including other governmental agencies.

e. states that the audit and the audit documentation should not supplant other inquiries and procedures that should be undertaken by the regulator for its purposes;

f. requests confidential treatment under the Freedom of Information Act or similar laws and regulations,[5] when a request for the audit documentation is made, and that written notice be given to the auditor before transmitting any information contained in the audit documentation to others, including other governmental agencies, except when such transfer is required by law or regulation; and

g. states that if any copies are to be provided, they will be identified as "Confidential Treatment Requested by [*name of auditor, address, telephone number*]."

The auditor may obtain a signed acknowledgment copy of the letter as evidence of the regulator's receipt of the letter.

.06 An example of a letter containing the elements described in paragraph .05 of this interpretation is presented as follows:

[5]The auditor may need to consult the regulations of individual agencies and, if necessary, consult with legal counsel regarding the specific procedures and requirements necessary to gain confidential treatment.

Illustrative Letter to Regulator[6]

[*Date*]

[*Name and Address of Regulatory Agency*]

Your representatives have requested access to our audit documentation in connection with our audit of the December 31, 20XX, financial statements of [*name of client*]. It is our understanding that the purpose of your request is [*state purpose: for example, "to facilitate your regulatory examination"*].[7]

Our audit of [*name of client*] December 31, 20XX, financial statements was conducted in accordance with auditing standards generally accepted in the United States of America,[8] the objective[9] of which is to form an opinion as to whether the financial statements, which are the responsibility and representations of management, present fairly, in all material respects, the financial position, results of operations, and cash flows in conformity with generally accepted accounting principles.[10] Under generally accepted auditing standards, we have the responsibility, within the inherent limitations of the auditing process, to design our audit to provide reasonable assurance that errors and fraud that have a material effect on the financial statements will be detected, and to exercise due care in the conduct of our audit. The concept of selective testing of the data being audited, which involves judgment both as to the number of transactions to be audited and as to the areas to be tested, has been generally accepted as a valid and sufficient basis for an auditor to express an opinion on financial statements. Thus, our audit, based on the concept of selective testing, is subject to the inherent risk that material errors or fraud, if they exist, would not be detected. In addition, an audit does not address the possibility that material errors or fraud may occur in the future. Also, our use of professional judgment and the assessment of materiality for the purpose of our audit means that matters may have existed that would have been assessed differently by you.

---

[6]This letter may be modified appropriately when the audit has been performed in accordance with generally accepted auditing standards and also in accordance with additional auditing requirements specified by a regulatory agency (for example, the requirements specified in *Government Auditing Standards* issued by the Comptroller General of the United States).

[7]If the auditor is not required by law, regulation, or audit contract to provide a regulator access to the audit documentation but otherwise intends to provide such access (see paragraphs .11–.15 of this interpretation), the letter may include a statement that "Management of [*name of client*] has authorized us to provide you access to our audit documentation for [*state purpose*]."

[8]See footnote 6.

[9]In an audit performed in accordance with the Single Audit Act of 1984, the Single Audit Act Amendments of 1996, and certain other federal audit requirements, an additional objective of the audit is to assess compliance with laws and regulations applicable to federal financial assistance. Accordingly, in these situations, the illustrative letter provided in this interpretation may be modified to include the additional objective.

[10]If the financial statements have been prepared in conformity with regulatory accounting practices, the phrase "financial position, results of operations, and cash flows in conformity with generally accepted accounting principles" may be replaced with appropriate wording such as, in the case of an insurance company, the "admitted assets, liabilities ... of the XYZ Insurance Company in conformity with accounting practices prescribed or permitted by the state of ... insurance department."

The audit documentation was prepared for the purpose of providing a sufficient and appropriate record of the basis for our report on [*name of client*] December 31, 20XX, financial statements and to aid in the conduct and supervision of our audit. The audit documentation is the principal record of auditing procedures performed, evidence obtained, and conclusions reached in the engagement. The auditing procedures that we performed were limited to those we considered necessary under generally accepted auditing standards[11] to enable us to formulate and express an opinion on the financial statements[12] taken as a whole. Accordingly, we make no representation as to the sufficiency or appropriateness, for your purposes, of either the information contained in our audit documentation or our auditing procedures. In addition, any notations, comments, and individual conclusions appearing on any of the audit documents do not stand alone, and should not be read as an opinion on any individual amounts, accounts, balances or transactions.

Our audit of [*name of client*] December 31, 20XX, financial statements was performed for the purpose stated above and has not been planned or conducted in contemplation of your [*state purpose: for example, "regulatory examination"*] or for the purpose of assessing [*name of client*] compliance with laws and regulations.[13] Therefore, items of possible interest to you may not have been specifically addressed. Accordingly, our audit and the audit documentation prepared in connection therewith, should not supplant other inquiries and procedures that should be undertaken by the [*name of regulatory agency*] for the purpose of monitoring and regulating the financial affairs of the [*name of client*]. In addition, we have not audited any financial statements of [*name of client*] since [*date of audited balance sheet referred to in the first paragraph above*] nor have we performed any auditing procedures since [*date*], the date of our auditor's report, and significant events or circumstances may have occurred since that date.

The audit documentation constitutes and reflects work performed or evidence obtained by [*name of auditor*] in its capacity as independent auditor for [*name of client*]. The documents contain trade secrets and confidential commercial and financial information of our firm and [*name of client*] that is privileged and confidential, and we expressly reserve all rights with respect to disclosures to third parties. Accordingly, we request confidential treatment under the Freedom of Information Act or similar laws and regulations[14] when requests are made for the audit documentation or information contained therein or any documents created by the [*name of regulatory agency*] containing information derived therefrom. We further request that written notice be given to our firm before distribution of the information in the audit documentation (or copies thereof) to others, including other governmental agencies, except when such distribution is required by law or regulation.

[*If it is expected that copies will be requested, add:*

[11] See footnote 6.

[12] See footnote 9.

[13] See footnote 9.

[14] This illustrative paragraph may not in and of itself be sufficient to gain confidential treatment under the rules and regulations of certain regulatory agencies. The auditor may tailor this paragraph to the circumstances after consulting the regulations of each applicable regulatory agency and, if necessary, may consult with legal counsel regarding the specific procedures and requirements to gain confidential treatment.

Any copies of our audit documentation we agree to provide you will be identified as "Confidential Treatment Requested by [*name of auditor, address, telephone number*]."]

[*Firm signature*]

.07 *Question*—A regulator may request access to the audit documentation before the audit has been completed and the report released. May the auditor allow access in such circumstances?

.08 *Interpretation*—When the audit has not been completed, the audit documentation is necessarily incomplete because (*a*) additional information may be added as a result of further tests and review by supervisory personnel and (*b*) any audit results and conclusions reflected in the incomplete audit documentation may change. Accordingly, it is preferable that access be delayed until all auditing procedures have been completed and all internal reviews have been performed. If access is provided prior to completion of the audit, the auditor may issue the letter referred to in paragraph .05 of this interpretation, appropriately modified, and including additional language along the following lines:

We have been engaged to audit in accordance with auditing standards generally accepted in the United States of America the December 31, 20XX, financial statements of XYZ Company, but have not as yet completed our audit. Accordingly, at this time we do not express any opinion on the Company's financial statements. Furthermore, the contents of the audit documentation may change as a result of additional auditing procedures and review of the audit documentation by supervisory personnel of our firm. Accordingly, our audit documentation is incomplete.

Because the audit documentation may change prior to completion of the audit, it is preferable that the auditor not provide copies of the audit documentation until the audit has been completed.

.09 *Question*—Some regulators may engage an independent party, such as another independent public accountant, to perform the audit documentation review on behalf of the regulatory agency. Are there any special precautions the auditor may observe in these circumstances?

.10 *Interpretation*—The auditor may obtain acknowledgment, preferably in writing, from the regulator stating that the third party is acting on behalf of the regulator and agreement from the third party that he or she is subject to the same restrictions on disclosure and use of audit documentation and the information contained therein as the regulator.

.11 *Question*—When a regulator requests the auditor to provide access to (and possibly copies of) audit documentation and the auditor is not otherwise required by law, regulation, or audit contract to provide such access, what steps may the auditor take?

.12 *Interpretation*—The auditor may obtain an understanding of the reasons for the regulator's request for access to the audit documentation and may consider consulting with legal counsel regarding the request. If the auditor decides to provide such access, reasonable procedures to maintain the confidentiality of client information include obtaining the client's consent, preferably in writing, to provide the regulator access to the audit documentation.

.13 Following is an example of language that may be used in the written communication to the client:

> The audit documentation for this engagement is the property of [*name of auditor*] and constitutes confidential information. However, we have been requested to make certain audit documentation available to [*name of regulator*] for [*describe the regulator's basis for its request*]. Access to such audit documentation will be provided under the supervision of [*name of auditor*] personnel. Furthermore, upon request, we may provide copies of selected audit documentation to [*name of regulator*].
>
> You have authorized [*name of auditor*] to allow [*name of regulator*] access to the audit documentation in the manner discussed above. Please confirm your agreement to the above by signing below and returning to [*name of auditor, address*].
>
> [*Firm signature*]
>
> Agreed and acknowledged:
>
> [*Name and title*]
>
> [*Date*]

.14 If the client requests to review the audit documentation before allowing the regulator access, the auditor may provide the client with the opportunity to obtain an understanding of the nature of the information about its financial statements contained in the audit documentation that is being made available to the regulator. When a client reviews the audit documentation, the need to maintain control of the audit documentation is as discussed in paragraph .03 of this interpretation.

.15 The guidance in paragraphs .03–.10 of this interpretation, which provide guidance on making arrangements with the regulator for access to the audit documentation, maintaining control over the audit documentation, and submitting a letter describing various matters to the regulator, is also applicable.

[Issue Date: July, 1994; Revised: June, 1996; Revised: October, 2000; Revised: January, 2002; Revised: December, 2005; Revised: October, 2011, effective for audits of financial statements for periods ending on or after December 15, 2012.]

AU-C Section 240

Consideration of Fraud in a Financial Statement Audit

Source: SAS No. 122; SAS No. 128; SAS No. 134; SAS No. 135; SAS No. 136; SAS No. 143; SAS No. 145.

Effective for audits of financial statements for periods ending on or after December 15, 2012, unless otherwise indicated.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibilities relating to fraud in an audit of financial statements. Specifically, it expands on how section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, and section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, are to be applied regarding risks of material misstatement due to fraud.

Characteristics of Fraud

.02 Misstatements in the financial statements can arise from either fraud or error. The distinguishing factor between fraud and error is whether the underlying action that results in the misstatement of the financial statements is intentional or unintentional.

.03 Although fraud is a broad legal concept, for the purposes of generally accepted auditing standards (GAAS), the auditor is primarily concerned with fraud that causes a material misstatement in the financial statements. Two types of intentional misstatements are relevant to the auditor — misstatements resulting from fraudulent financial reporting and misstatements resulting from misappropriation of assets. Although the auditor may suspect or, in rare cases, identify the occurrence of fraud, the auditor does not make legal determinations of whether fraud has actually occurred. (Ref: par. .A1–.A8)

Responsibility for the Prevention and Detection of Fraud

.04 The primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management. It is important that management, with the oversight of those charged with governance, places a strong emphasis on fraud prevention, which may reduce opportunities for fraud to take place, and fraud deterrence, which could persuade individuals not to commit fraud because of the likelihood of detection and punishment. This involves a commitment to creating a culture of honesty and ethical behavior, which can be reinforced by active oversight by those charged with governance. Oversight by those charged with governance includes considering the potential for override of controls or other inappropriate influence over the financial reporting process, such as efforts by management to manage earnings in order to influence the perceptions of financial statement users regarding the entity's performance and profitability.

Responsibilities of the Auditor

.05 An auditor conducting an audit in accordance with GAAS is responsible for obtaining reasonable assurance that the financial statements as a whole are free from material misstatement, whether caused by fraud or error. Due to the inherent limitations of an audit, an unavoidable risk exists that some material misstatements of the financial statements may not be detected, even though the audit is properly planned and performed in accordance with GAAS.[1]

.06 As described in section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*, the potential effects of inherent limitations are particularly significant in the case of misstatement resulting from fraud.[2] The risk of not detecting a material misstatement resulting from fraud is higher than the risk of not detecting one resulting from error. This is because fraud may involve sophisticated and carefully organized schemes designed to conceal it, such as forgery, deliberate failure to record transactions, or intentional misrepresentations being made to the auditor. Such attempts at concealment may be even more difficult to detect when accompanied by collusion. Collusion may cause the auditor to believe that audit evidence is persuasive when it is, in fact, false. The auditor's ability to detect a fraud depends on factors such as the skillfulness of the perpetrator, the frequency and extent of manipulation, the degree of collusion involved, the relative size of individual amounts manipulated, and the seniority of those individuals involved. Although the auditor may be able to identify potential opportunities for fraud to be perpetrated, it is difficult for the auditor to determine whether misstatements in judgment areas, such as accounting estimates, are caused by fraud or error.

.07 Furthermore, the risk of the auditor not detecting a material misstatement resulting from management fraud is greater than for employee fraud because management is frequently in a position to directly or indirectly manipulate accounting records, present fraudulent financial information, or override controls designed to prevent similar frauds by other employees. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.08 When obtaining reasonable assurance, the auditor is responsible for maintaining professional skepticism throughout the audit, considering the potential for management override of controls, and recognizing the fact that audit procedures that are effective for detecting error may not be effective in detecting fraud. The requirements in this section are designed to assist the auditor in identifying and assessing the risks of material misstatement due to fraud and in designing procedures to detect such misstatement.

---

[1]Paragraphs .A55–.A56 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

[2]Paragraph .A55 of section 200.

Effective Date

.09 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objectives

.10

The objectives of the auditor are to

a. identify and assess the risks of material misstatement of the financial statements due to fraud;

b. obtain sufficient appropriate audit evidence regarding the assessed risks of material misstatement due to fraud, through designing and implementing appropriate responses; and

c. respond appropriately to fraud or suspected fraud identified during the audit.

Definitions

.11 For purposes of GAAS, the following terms have the meanings attributed as follows:

Fraud. An intentional act by one or more individuals among management, those charged with governance, employees, or third parties, involving the use of deception that results in a misstatement in financial statements that are the subject of an audit.

Fraud risk factors. Events or conditions that indicate an incentive or pressure to perpetrate fraud, provide an opportunity to commit fraud, or indicate attitudes or rationalizations to justify a fraudulent action. (Ref: par. .A11, .A30, and .A57)

Significant unusual transactions. Significant transactions that are outside the normal course of business for the entity or that otherwise appear to be unusual due to their timing, size, or nature.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

Requirements

Professional Skepticism

.12 In accordance with section 200, the auditor should maintain professional skepticism throughout the audit, recognizing the possibility that a material misstatement due to fraud could exist, notwithstanding the auditor's past experience of the honesty and integrity of the entity's management and those charged with governance.[3] (Ref: par. .A9–.A10)

.13 Unless the auditor has reason to believe the contrary, the auditor may accept records and documents as genuine. If conditions identified during the audit cause the auditor to believe that a document may not be authentic or that terms in a document have been modified but not disclosed to the auditor, the auditor should investigate further. (Ref: par. .A11)

.14 When responses to inquiries of management, those charged with governance, or others are inconsistent or otherwise unsatisfactory (for example, vague or implausible), the auditor should further investigate the inconsistencies or unsatisfactory responses.

Discussion Among the Engagement Team

.15 Section 315A requires a discussion among the key engagement team members, including the engagement partner, and a determination by the engagement partner of which matters are to be communicated to those team members not involved in the discussion.[4] This discussion should include an exchange of ideas or brainstorming among the engagement team members about how and where the entity's financial statements (including the individual statements and the disclosures) might be susceptible to material misstatement due to fraud, how management could perpetrate and conceal fraudulent financial reporting, and how assets of the entity could be misappropriated. The discussion should occur setting aside beliefs that the engagement team members may have that management and those charged with governance are honest and have integrity, and should, in particular, also address (Ref: par. .A12–.A13)

a. known external and internal factors affecting the entity that may create an incentive or pressure for management or others to commit fraud, provide the opportunity for fraud to be perpetrated, and indicate a culture or environment that enables management or others to rationalize committing fraud;

b. the risk of management override of controls;

c. consideration of circumstances that might be indicative of earnings management or manipulation of other financial measures and the practices that might be followed by management to manage earnings or other financial measures that could lead to fraudulent financial reporting;

d. the importance of maintaining professional skepticism throughout the audit regarding the potential for material misstatement due to fraud; and

e. how the auditor might respond to the susceptibility of the entity's financial statements to material misstatement due to fraud.

Communication among the engagement team members about the risks of material misstatement due to fraud should continue throughout the audit, particularly upon discovery of new facts during the audit. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

[3]Paragraph .17 of section 200.

[4]Paragraph .11 of section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

Risk Assessment Procedures and Related Activities

.16 When performing risk assessment procedures and related activities to obtain an understanding of the entity and its environment, the applicable financial reporting framework and the entity's system of internal control, required by SAS No. 145, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, the auditor should perform the procedures in paragraphs .17–.24 to obtain information for use in identifying the risks of material misstatement due to fraud.[5] [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Discussions With Management and Others Within the Entity

.17 The auditor should make inquiries of management regarding

a. management's assessment of the risk that the financial statements may be materially misstated due to fraud, including the nature, extent, and frequency of such assessments; (Ref: par. .A14–.A15)

b. management's process for identifying, responding to, and monitoring the risks of fraud in the entity, including any specific risks of fraud that management has identified or that have been brought to its attention, or classes of transactions, account balances, or disclosures for which a risk of fraud is likely to exist; (Ref: par. .A16)

c. management's communication, if any, to those charged with governance regarding its processes for identifying and responding to the risks of fraud in the entity;

d. management's communication, if any, to employees regarding its views on business practices and ethical behavior; and

e. whether the entity has entered into any significant unusual transactions and, if so, the nature, terms, and business purpose (or the lack thereof) of those transactions and whether such transactions involved related parties.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

.18 The auditor should make inquiries of management, and others within the entity as appropriate, to determine whether they have knowledge of any actual, suspected, or alleged fraud affecting the entity. (Ref: par. .A17–.A20)

.19 For those entities that have an internal audit function,[6] the auditor should make inquiries of appropriate individuals within the internal audit function to obtain their views about the risks of fraud; determine whether they have knowledge of any actual, suspected,

[5] Paragraphs .05–.25 of section 315A.

[6] Section 610, *Using the Work of Internal Auditors*, provides guidance in audits of those entities that have an internal audit function. [Footnote amended, effective for audits of financial statements for periods ending on or after December 15, 2014, by SAS No. 128.]

or alleged fraud affecting the entity; whether they have performed any procedures to identify or detect fraud during the year; whether management has satisfactorily responded to any findings resulting from these procedures; and whether they are aware that the entity has entered into any significant unusual transactions. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2014, by SAS No. 128. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

Those Charged With Governance

.20 Unless all of those charged with governance are involved in managing the entity,[7] the auditor should obtain an understanding of how those charged with governance exercise oversight of management's processes for identifying and responding to the risks of fraud in the entity and the controls that management has established to mitigate these risks. (Ref: par. .A21–.A23) [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.21 Unless all of those charged with governance are involved in managing the entity, the auditor should make inquiries of those charged with governance (or the audit committee or, at least, its chair) to determine their views about the risks of fraud, whether they have knowledge of any actual, suspected, or alleged fraud affecting the entity, and whether the entity has entered into any significant unusual transactions. These inquiries are made, in part, to corroborate the responses received from the inquiries of management. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

Unusual or Unexpected Relationships Identified

.22 Based on analytical procedures performed as part of risk assessment procedures,[8] the auditor should evaluate whether unusual or unexpected relationships that have been identified indicate risks of material misstatement due to fraud. To the extent not already included, the analytical procedures, and evaluation thereof, should include procedures relating to revenue accounts. (Ref: par. .A24–.A26 and .A46)

Other Information

.23 The auditor should consider whether other information obtained by the auditor indicates risks of material misstatement due to fraud. (Ref: par. .A27)

Evaluation of Fraud Risk Factors

.24 The auditor should evaluate whether the information obtained from the risk assessment procedures and related activities performed indicates that one or more fraud risk factors are present. Although fraud risk factors may not necessarily indicate the existence of fraud, they have often been present in circumstances in which frauds have occurred and, therefore, may indicate risks of material misstatement due to fraud. (Ref: par. .A28–.A32)

---

[7]Paragraph .09 of section 260, *The Auditor's Communication With Those Charged With Governance*.

[8]Paragraphs .06(*b*) and .A7–.A10 of section 315A.

Identification and Assessment of the Risks of Material Misstatement Due to Fraud

.25 In accordance with section 315A, the auditor should identify and assess the risks of material misstatement due to fraud at the financial statement level, and at the assertion level for classes of transactions, account balances, and disclosures.[9] The auditor's risk assessment should be ongoing throughout the audit, following the initial assessment.

.26 When identifying and assessing the risks of material misstatement due to fraud, the auditor should, based on a presumption that risks of fraud exist in revenue recognition, evaluate which types of revenue, revenue transactions, or assertions give rise to such risks. Paragraph .46 specifies the documentation required when the auditor concludes that the presumption is not applicable in the circumstances of the engagement and, accordingly, has not identified revenue recognition as a risk of material misstatement due to fraud. (Ref: par. .A33–.A35)

.27 The auditor should treat those assessed risks of material misstatement due to fraud as significant risks and, accordingly, to the extent not already done so, the auditor should identify the entity's controls that address such risks and evaluate their design and determine whether they have been implemented.[10] (Ref: par. .A36–.A37) [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Responses to the Assessed Risks of Material Misstatement Due to Fraud

Overall Responses

.28 In accordance with section 330, the auditor should determine overall responses to address the assessed risks of material misstatement due to fraud at the financial statement level.[11] (Ref: par. .A38)

.29 In determining overall responses to address the assessed risks of material misstatement due to fraud at the financial statement level, the auditor should

a. assign and supervise personnel, taking into account the knowledge, skill, and ability of the individuals to be given significant engagement responsibilities and the auditor's assessment of the risks of material misstatement due to fraud for the engagement; (Ref: par. .A39–.A40)

b. evaluate whether the selection and application of accounting policies by the entity, particularly those related to subjective measurements and complex transactions, may be indicative of fraudulent financial reporting resulting from management's effort

---

[9]Paragraph .26 of section 315A.

[10]Paragraphs 26*a*(i) and *d* of SAS No. 145, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

[11]Paragraph .05 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

to manage earnings, or a bias that may create a material misstatement; and (Ref: par. .A41)

c. incorporate an element of unpredictability in the selection of the nature, timing, and extent of audit procedures. (Ref: par. .A42)

Audit Procedures Responsive to Assessed Risks of Material Misstatement Due to Fraud at the Assertion Level

.30 In accordance with section 330, the auditor should design and perform further audit procedures whose nature, timing, and extent are responsive to the assessed risks of material misstatement due to fraud at the assertion level.[12] (Ref: par. .A43–.A46)

Audit Procedures Responsive to Risks Related to Management Override of Controls

.31 Management is in a unique position to perpetrate fraud because of management's ability to manipulate accounting records and prepare fraudulent financial statements by overriding controls that otherwise appear to be operating effectively. Although the level of risk of management override of controls will vary from entity to entity, the risk is, nevertheless, present in all entities. Due to the unpredictable way in which such override could occur, it is a risk of material misstatement due to fraud and, thus, a significant risk.

.32 Even if specific risks of material misstatement due to fraud are not identified by the auditor, a possibility exists that management override of controls could occur. Accordingly, the auditor should address the risk of management override of controls apart from any conclusions regarding the existence of more specifically identifiable risks by designing and performing audit procedures to

a. test the appropriateness of journal entries recorded in the general ledger and other adjustments made in the preparation of the financial statements, including entries posted directly to financial statement drafts. In designing and performing audit procedures for such tests, the auditor should (Ref: par. .A47–.A50 and .A56)

   i. obtain an understanding of the entity's financial reporting process and controls over journal entries and other adjustments, and, in accordance with SAS No. 145, evaluate the design and determine whether the controls have been implemented;[13]

   ii. make inquiries of individuals involved in the financial reporting process about inappropriate or unusual activity relating to the processing of journal entries and other adjustments;

   iii. consider fraud risk indicators, the nature and complexity of accounts, and unusual entries processed;

---

[12]Paragraph .06 of section 330. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

[13]Paragraph 26*a* and *c* of SAS No. 145. [Footnote renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

  iv. select journal entries and other adjustments made at the end of a reporting period; and

  v. consider the need to test journal entries and other adjustments throughout the period.

b. review accounting estimates for biases and evaluate whether the circumstances producing the bias, if any, represent a risk of material misstatement due to fraud. In performing this review, the auditor should

  i. evaluate whether the judgments and decisions made by management in making the accounting estimates included in the financial statements, even if they are individually reasonable, indicate a possible bias on the part of the entity's management that may represent a risk of material misstatement due to fraud. If so, the auditor should reevaluate the accounting estimates taken as a whole, and

  ii. perform a retrospective review of management judgments and assumptions related to significant accounting estimates reflected in the financial statements of the prior year. Estimates selected for review should include those that are based on highly sensitive assumptions or are otherwise significantly affected by judgments made by management. (Ref: par. .A51–.A53)

c. evaluate, given the auditor's understanding of the entity and its environment and other information obtained during the audit, whether the business purpose (or the lack thereof) of significant unusual transactions suggests that they may have been entered into to engage in fraudulent financial reporting or to conceal misappropriation of assets. The procedures should include the following: (Ref: par. .A54–.A55)

  i. Reading the underlying documentation and evaluating whether the terms and other information about the transaction are consistent with explanations from inquiries and other audit evidence about the business purpose (or the lack thereof) of the transaction

  ii. Determining whether the transaction has been authorized and approved in accordance with the entity's established policies and procedures

  iii. Evaluating whether significant unusual transactions that the auditor has identified have been properly accounted for and disclosed in the financial statements

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Other Audit Procedures

.33 The auditor should determine whether, in order to respond to the identified risks of management override of controls, the auditor needs to perform other audit procedures in addition to those specifically referred to previously (that is, when specific additional risks of management override exist that are not covered as part of the procedures performed to address the requirements in paragraph .32). (Ref: par. .A56)

Evaluation of Audit Evidence (Ref: par. .A57)

.34 The auditor should evaluate, at or near the end of the audit, whether the accumulated results of auditing procedures (including analytical procedures that were performed as substantive tests or when forming an overall conclusion) affect the assessment of the risks of material misstatement due to fraud made earlier in the audit or indicate a previously unrecognized risk of material misstatement due to fraud. If not already performed when forming an overall conclusion, the analytical procedures relating to revenue, required by paragraph .22, should be performed through the end of the reporting period. (Ref: par. .A58–.A59)

.35 If the auditor identifies a misstatement, the auditor should evaluate whether such a misstatement is indicative of fraud. If such an indication exists, the auditor should evaluate the implications of the misstatement with regard to other aspects of the audit, particularly the auditor's evaluation of materiality, management and employee integrity, and the reliability of management representations, recognizing that an instance of fraud is unlikely to be an isolated occurrence. (Ref: par. .A60–.A63)

.36 If the auditor identifies a misstatement, whether material or not, and the auditor has reason to believe that it is, or may be, the result of fraud and that management (in particular, senior management) is involved, the auditor should reevaluate the assessment of the risks of material misstatement due to fraud and its resulting effect on the nature, timing, and extent of audit procedures to respond to the assessed risks. The auditor should also consider whether circumstances or conditions indicate possible collusion involving employees, management, or third parties when reconsidering the reliability of evidence previously obtained. (Ref: par. .A61)

.37 If the auditor concludes that, or is unable to conclude whether, the financial statements are materially misstated as a result of fraud, the auditor should evaluate the implications for the audit. (Ref: par. .A62)

Auditor Unable to Continue the Engagement

.38 If, as a result of identified fraud or suspected fraud, the auditor encounters circumstances that bring into question the auditor's ability to continue performing the audit, the auditor should

a. determine the professional and legal responsibilities applicable in the circumstances, including whether a requirement exists for the auditor to report to the person or persons who engaged the auditor or, in some cases, to regulatory authorities;

b. consider whether it is appropriate to withdraw from the engagement, when withdrawal is possible under applicable law or regulation; and

c. if the auditor withdraws

   i. discuss with the appropriate level of management and those charged with governance the auditor's withdrawal from the engagement and the reasons for the withdrawal, and

   ii. determine whether a professional or legal requirement exists to report to the person or persons who engaged the auditor or, in some cases, to regulatory authorities, the auditor's withdrawal from the engagement and the reasons for the withdrawal. (Ref: par. .A64–.A67)

Communications to Management and With Those Charged With Governance

.39 If the auditor has identified a fraud or has obtained information that indicates that a fraud may exist, the auditor should communicate these matters on a timely basis to the appropriate level of management in order to inform those with primary responsibility for the prevention and detection of fraud of matters relevant to their responsibilities. (Ref: par. .A68)

.40 Unless all of those charged with governance are involved in managing the entity, if the auditor has identified or suspects fraud involving

a. management,

b. employees who have significant roles in internal control, or

c. others, when the fraud results in a material misstatement in the financial statements,

the auditor should communicate these matters to those charged with governance on a timely basis. If the auditor suspects fraud involving management, the auditor should communicate these suspicions to those charged with governance and discuss with them the nature, timing, and extent of audit procedures necessary to complete the audit. (Ref: par. .A69–.A71)

.41 The auditor should communicate with those charged with governance any other matters related to fraud that are, in the auditor's professional judgment, relevant to their responsibilities. (Ref: par. .A72)

Communications to Regulatory and Enforcement Authorities

.42 If the auditor has identified or suspects a fraud, the auditor should determine whether the auditor has a responsibility to report the occurrence or suspicion to a party outside the entity. Although the auditor's professional duty to maintain the confidentiality of client information may preclude such reporting, the auditor's legal responsibilities may override the duty of confidentiality in some circumstances. (Ref: par. .A73–.A75)

Documentation

.43 The auditor should include in the audit documentation[14] the identification and the assessment of the risks of material misstatement required by SAS No. 145, which includes the following:[15]

a. The significant decisions reached during the discussion among the engagement team regarding the susceptibility of the entity's financial statements to material misstatement due to fraud, and how and when the discussion occurred and the audit team members who participated

b. The identified and assessed risks of material misstatement due to fraud at the financial statement level and at the assertion level (See paragraphs .16–.27.)

c. Identified controls in the control activities component that address assessed risks of material misstatement due to fraud

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.44 The auditor should include in the audit documentation of the auditor's responses to the assessed risks of material misstatement required by section 330 the following:[16]

a. The overall responses to the assessed risks of material misstatement due to fraud at the financial statement level and the nature, timing, and extent of audit procedures, and the linkage of those procedures with the assessed risks of material misstatement due to fraud at the assertion level

b. The results of the audit procedures, including those designed to address the risk of management override of controls

.45 The auditor should include in the audit documentation communications about fraud made to management, those charged with governance, regulators, and others.

.46 If the auditor has concluded that the presumption that there is a risk of material misstatement due to fraud related to revenue recognition is overcome in the circumstances of the engagement, the auditor should include in the audit documentation the reasons for that conclusion.

---

[14] Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

[15] Paragraph .33 of section 315A. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

[16] Paragraph .30 of section 330. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

Application and Other Explanatory Material

Characteristics of Fraud (Ref: par. .03)

.A1 Fraud, whether fraudulent financial reporting or misappropriation of assets, involves incentive or pressure to commit fraud, a perceived opportunity to do so, and some rationalization of the act, as follows:

- Incentive or pressure to commit fraudulent financial reporting may exist when management is under pressure, from sources outside or inside the entity, to achieve an expected (and perhaps, unrealistic) earnings target or financial outcome — particularly because the consequences to management for failing to meet financial goals can be significant. Similarly, individuals may have an incentive to misappropriate assets (for example, because the individuals are living beyond their means).
- A perceived opportunity to commit fraud may exist when an individual believes internal control can be overridden (for example, because the individual is in a position of trust or has knowledge of specific deficiencies in internal control).
- Individuals may be able to rationalize committing a fraudulent act. Some individuals possess an attitude, character, or set of ethical values that allow them knowingly and intentionally to commit a dishonest act. However, even otherwise honest individuals can commit fraud in an environment that imposes sufficient pressure on them.

.A2 Fraudulent financial reporting involves intentional misstatements, including omissions of amounts or disclosures in financial statements to deceive financial statement users. It can be caused by the efforts of management to manage earnings in order to deceive financial statement users by influencing their perceptions about the entity's performance and profitability. Such earnings management may start out with small actions or inappropriate adjustment of assumptions and changes in judgments by management. Pressures and incentives may lead these actions to increase to the extent that they result in fraudulent financial reporting. Such a situation could occur when, due to pressures to meet expectations or a desire to maximize compensation based on performance, management intentionally takes positions that lead to fraudulent financial reporting by materially misstating the financial statements. In some entities, management may be motivated to reduce earnings by a material amount to minimize tax or to inflate earnings to secure bank financing.

.A3 An auditor conducting an audit in accordance with GAAS is responsible for obtaining reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether caused by fraud or error. Accordingly, the auditor is primarily concerned with fraud that causes a material misstatement of the financial statements. However, in conducting the audit, the auditor may identify misstatements arising from fraud that are not material to the financial statements. Paragraphs .35–.36 and .39–.42 address the auditor's responsibilities in such circumstances in evaluating audit evidence and in communicating audit findings, respectively.

.A4 Intent is often difficult to determine, particularly in matters involving accounting estimates and the application of accounting principles. For example, unreasonable accounting estimates may be unintentional or may be the result of an intentional attempt to misstate the financial statements. Although an audit is not designed to determine intent, the auditor's objective is to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error.[17]

.A5 Fraudulent financial reporting may be accomplished by the following:

- Manipulation, falsification (including forgery), or alteration of accounting records or supporting documentation from which the financial statements are prepared
- Misrepresentation in, or intentional omission from, the financial statements of events, transactions, or other significant information
- Intentional misapplication of accounting principles relating to amounts, classification, manner of presentation, or disclosure

.A6 Fraudulent financial reporting often involves management override of controls that otherwise may appear to be operating effectively. Fraud can be committed by management overriding controls intentionally using such techniques as the following:

- Recording fictitious journal entries, particularly close to the end of an accounting period, to manipulate operating results or achieve other objectives
- Inappropriately adjusting assumptions and changing judgments used to estimate account balances
- Omitting, advancing, or delaying recognition in the financial statements of events and transactions that have occurred during the reporting period
- Omitting, obscuring, or misstating disclosures required by the applicable financial reporting framework or disclosures that are necessary to achieve fair presentation
- Concealing facts that could affect the amounts recorded in the financial statements
- Engaging in complex transactions that are structured to misrepresent the financial position or financial performance of the entity
- Altering records and terms related to significant and unusual transactions

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

.A7 Misappropriation of assets involves the theft of an entity's assets and is often perpetrated by employees in relatively small and immaterial amounts. However, it can also involve management, who is usually better able to disguise or conceal misappropriations in ways that are difficult to detect. Misappropriation of assets can be accomplished in a variety of ways including the following:

[17] Paragraph .12 of section 200. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

- Embezzling receipts (for example, misappropriating collections on accounts receivable or diverting receipts from written-off accounts to personal bank accounts)
- Stealing physical assets or intellectual property (for example, stealing inventory for personal use or for sale, stealing scrap for resale, or colluding with a competitor by disclosing technological data in return for payment)
- Causing an entity to pay for goods and services not received (for example, payments to fictitious vendors, kickbacks paid by vendors to the entity's purchasing agents in return for approving payment at inflated prices, or payments to fictitious employees)
- Using an entity's assets for personal use (for example, using the entity's assets as collateral for a personal loan or a loan to a related party)

Misappropriation of assets is often accompanied by false or misleading records or documents in order to conceal the fact that the assets are missing or have been pledged without proper authorization.

Considerations Specific to Governmental Entities and Not-for-Profit Organizations

.A8 The auditor of governmental entities and not-for-profit organizations may have additional responsibilities relating to fraud

- as a result of being engaged to conduct an audit in accordance with law or regulation applicable to governmental entities and not-for-profit organizations,
- because of a governmental audit organization's mandate, or
- because of the need to comply with *Government Auditing Standards*.

Consequently, the responsibilities of the auditor of governmental entities and not-for-profit organizations may not be limited to consideration of risks of material misstatement of the financial statements, but may also include a broader responsibility to consider risks of fraud.

Professional Skepticism (Ref: par. .12–.14)

.A9 Maintaining professional skepticism requires an ongoing questioning of whether the information and audit evidence obtained suggests that a material misstatement due to fraud may exist. It includes considering the reliability of the information to be used as audit evidence and identified controls in the control activities, if any, over its preparation and maintenance. Due to the characteristics of fraud, the auditor's professional skepticism is particularly important when considering the risks of material misstatement due to fraud. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A10 Although the auditor cannot be expected to disregard past experience of the honesty and integrity of the entity's management and those charged with governance, the auditor's professional skepticism is particularly important in considering the risks of material misstatement due to fraud because there may have been changes in circumstances.

.A11 An audit performed in accordance with GAAS rarely involves the authentication of documents, nor is the auditor trained as, or expected to be, an expert in such authentication.[18] However, when the auditor identifies conditions that cause the auditor to believe that a document may not be authentic, that terms in a document have been modified but not disclosed to the auditor, or that undisclosed side agreements may exist, possible procedures to investigate further may include

- confirming directly with the third party.
- using the work of a specialist to assess the document's authenticity.

Appendix C, "Examples of Circumstances That Indicate the Possibility of Fraud," contains examples of circumstances that may indicate the possibility of fraud.

Discussion Among the Engagement Team (Ref: par. .15)

.A12 Discussing the susceptibility of the entity's financial statements to material misstatement due to fraud with the engagement team

- provides an opportunity for more experienced engagement team members to share their insights about how and where the financial statements may be susceptible to material misstatement due to fraud.
- enables the auditor to consider an appropriate response to such susceptibility and to determine which members of the engagement team will conduct certain audit procedures.
- permits the auditor to determine how the results of audit procedures will be shared among the engagement team and how to deal with any allegations of fraud that may come to the auditor's attention during the audit.

.A13 The discussion may lead to a thorough probing of the issues, acquiring of additional evidence as necessary, and consulting with other team members and, if appropriate, specialists in or outside the firm. The discussion may include the following matters:

- A consideration of the risk that management may attempt to present disclosures in a manner that may obscure a proper understanding of the matters disclosed (for example, by using unclear or ambiguous language)
- A consideration of management's involvement in overseeing employees with access to cash or other assets susceptible to misappropriation
- A consideration of any unusual or unexplained changes in behavior or lifestyle of management or employees that have come to the attention of the engagement team
- A consideration of the types of circumstances that, if encountered, might indicate the possibility of fraud

[18] Paragraph .A51 of section 200. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

- A consideration of how an element of unpredictability will be incorporated into the nature, timing, and extent of the audit procedures to be performed
- A consideration of the audit procedures that might be selected to respond to the susceptibility of the entity's financial statements to material misstatement due to fraud and whether certain types of audit procedures are more effective than others
- A consideration of any allegations of fraud that have come to the auditor's attention

A number of factors may influence the extent of the discussion and how it may occur. For example, if the audit involves more than one location, there could be multiple discussions with team members in differing locations. Another factor in planning the discussions is whether to include specialists assigned to the audit team. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Risk Assessment Procedures and Related Activities

Inquiries of Management

Management's Assessment of the Risk of Material Misstatement Due to Fraud (Ref: par. .17a)

.A14 Management accepts responsibility for the entity's internal control and for the preparation and fair presentation of the entity's financial statements. Accordingly, it is appropriate for the auditor to make inquiries of management regarding management's own assessment of the risk of fraud and the controls in place to prevent and detect it. The nature, extent, and frequency of management's assessment of such risk and controls may vary from entity to entity. In some entities, management may make detailed assessments on an annual basis or as part of continuous monitoring. In other entities, management's assessment may be less structured and less frequent. The nature, extent, and frequency of management's assessment are relevant to the auditor's understanding of the entity's control environment. For example, the fact that management has not made an assessment of the risk of fraud may, in some circumstances, be indicative of the lack of importance that management places on internal control.

.A15 *Considerations specific to smaller, less complex entities.* In some entities, particularly smaller entities, the focus of management's assessment may be on the risks of employee fraud or misappropriation of assets.

Management's Process for Identifying and Responding to the Risks of Fraud (Ref: par. .17b)

.A16 In the case of entities with multiple locations, management's processes may include different levels of monitoring of operating locations or business segments. Management may also have identified particular operating locations or business segments for which a risk of fraud may be more likely to exist.

Discussions With Management and Others Within the Entity (Ref: par. .17–.19)

.A17 Inquiries of management and others within the entity are generally most effective when they involve an in-person discussion. The auditor may also determine it useful to provide the interviewee with specific questions and obtain written responses in advance of the discussion.

.A18 The auditor's inquiries of management may provide useful information concerning the risks of material misstatements in the financial statements resulting from employee fraud. However, such inquiries are unlikely to provide useful information regarding the risks of material misstatement in the financial statements resulting from management fraud. Making inquiries of others within the entity, in addition to management, may provide individuals with an opportunity to convey information to the auditor that may not otherwise be communicated. It may be useful in providing the auditor with a perspective that is different from that of individuals in the financial reporting process. The responses to these other inquiries might serve to corroborate responses received from management or, alternatively, might provide information regarding the possibility of management override of controls. The auditor may also obtain information about how effectively management has communicated standards of ethical behavior throughout the organization.

.A19 Examples of others within the entity to whom the auditor may direct inquiries about the existence or suspicion of fraud include the following:

- Operating personnel not directly involved in the financial reporting process
- Employees with different levels of authority
- Employees involved in initiating, processing, or recording complex or unusual transactions (for example, a sales transaction with multiple elements or a significant related party transaction) and those who supervise or monitor such employees
- In-house legal counsel
- Chief ethics officer or equivalent person
- The person or persons charged with dealing with allegations of fraud

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

.A20 Management is often in the best position to perpetrate fraud. Accordingly, when evaluating management's responses to inquiries with professional skepticism, the auditor may judge it necessary to corroborate responses to inquiries with other information.

Obtaining an Understanding of Oversight Exercised by Those Charged With Governance (Ref: par. .20)

.A21 Those charged with governance of an entity oversee the entity's systems for monitoring risk, financial control, and compliance with the law. In some circumstances, governance practices are well developed, and those charged with governance play an active role in oversight of the entity's assessment of the risks of fraud and the controls that address such risks. Because the responsibilities of those charged with governance and management may vary by entity, it is important that the auditor understands the respective responsibilities of those charged with governance and management to enable the auditor to obtain an understanding of the oversight exercised by the appropriate individuals.[19] [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A22 An understanding of the oversight exercised by those charged with governance may provide insights regarding the susceptibility of the entity to management fraud, the adequacy of controls that address risks of fraud, and the competency and integrity of management. The auditor may obtain this understanding in a number of ways, such as by attending meetings during which such discussions take place, reading the minutes from such meetings, or making inquiries of those charged with governance. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Considerations Specific to Smaller, Less Complex Entities

.A23 In some cases, all of those charged with governance are involved in managing the entity. This may be the case in a small entity in which a single owner manages the entity, and no one else has a governance role. In these cases, ordinarily, no action exists on the part of the auditor because no oversight exists separate from management.

Unusual or Unexpected Relationships Identified (Ref: par. .22)

.A24 Analytical procedures may include data analysis techniques ranging from a high-level review of data patterns, relationships, and trends to highly sophisticated, computer-assisted investigation of detailed transactions using electronic tools, such as data mining, business intelligence, and file query tools. The degree of reliance that can be placed on such techniques is a function primarily of the source (for example, financial, nonfinancial), completeness and reliability of the data, the level of disaggregation, and the nature of the analysis.

.A25 Analytical procedures relating to revenue that are performed with the objective of identifying unusual or unexpected relationships that may indicate a material misstatement due to fraudulent financial reporting may include

a. a comparison of sales volume, as determined from recorded revenue amounts, with production capacity. An excess of sales volume over production capacity may be indicative of recording fictitious sales.

b. a trend analysis of revenues by month and sales returns by month, during and shortly after the reporting period. This may indicate the existence of undisclosed side agreements with customers involving the return of goods, which, if known, would preclude revenue recognition.

c. a trend analysis of sales by month compared with units shipped. This may identify a material misstatement of recorded revenues.

---

[19]Paragraphs .A6–.A12 of section 260 discuss with whom the auditor communicates when the entity's governance structure is not well defined. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

.A26 Analytical procedures performed during planning may be helpful in identifying the risks of material misstatement due to fraud. However, if such analytical procedures use data aggregated at a high level, generally the results of those analytical procedures provide only a broad initial indication about whether a material misstatement of the financial statements may exist. Accordingly, the results of analytical procedures performed during planning may be considered along with other information gathered by the auditor in identifying the risks of material misstatement due to fraud.

Other Information (Ref: par. .23)

.A27 In addition to information obtained from applying analytical procedures, other information obtained about the entity and its environment, the applicable financial reporting framework, and the entity's system of internal control may be helpful in identifying the risks of material misstatement due to fraud. The discussion among team members may provide information that is helpful in identifying such risks. In addition, information obtained from the auditor's client acceptance and retention processes, and experience gained on other engagements performed for the entity, for example, engagements to review interim financial information, may be relevant in the identification of the risks of material misstatement due to fraud. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Evaluation of Fraud Risk Factors (Ref: par. .24)

.A28 The fact that fraud is usually concealed can make it very difficult to detect. Nevertheless, the auditor may identify events or conditions that indicate an incentive or pressure to commit fraud or provide an opportunity to commit fraud (fraud risk factors), such as the following:

- The need to meet expectations of third parties to obtain additional equity financing may create pressure to commit fraud.
- The granting of significant bonuses if unrealistic profit targets are met may create an incentive to commit fraud.
- A control environment that is not effective may create an opportunity to commit fraud.

.A29 Fraud risk factors cannot easily be ranked in order of importance. The significance of fraud risk factors varies widely. Some of these factors will be present in entities in which the specific conditions do not present risks of material misstatement. Accordingly, the determination of whether a fraud risk factor is present and whether it is to be considered in assessing the risks of material misstatement of the financial statements due to fraud requires the exercise of professional judgment.

.A30 Examples of fraud risk factors related to fraudulent financial reporting and misappropriation of assets are presented in appendix A, "Examples of Fraud Risk Factors." These illustrative risk factors are classified based on the three conditions that are generally present when fraud exists:

- An incentive or pressure to commit fraud
- A perceived opportunity to commit fraud
- An ability to rationalize the fraudulent action

The inability to observe one or more of these conditions does not necessarily mean that no risk of material misstatement due to fraud exists.

Fraud risk factors may relate to incentives, pressures, or opportunities that arise from conditions that create susceptibility to misstatement before consideration of controls. Fraud risk factors, which include intentional management bias, are inherent risk factors insofar as they affect inherent risk. Fraud risk factors may also relate to conditions within the entity's system of internal control that provide opportunity to commit fraud or that may affect management's attitude or ability to rationalize fraudulent actions. Fraud risk factors reflective of an attitude that permits rationalization of the fraudulent action may not be susceptible to observation by the auditor. Nevertheless, the auditor may become aware of the existence of such information through, for example, the required understanding of the entity's control environment.[20] Although the fraud risk factors described in appendix A cover a broad range of situations that may be faced by auditors, they are only examples and other risk factors may exist. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A31 The size, complexity, and ownership characteristics of the entity have a significant influence on the consideration of relevant fraud risk factors. For example, in the case of a large entity, there may be factors that generally constrain improper conduct by management, such as

- effective oversight by those charged with governance.
- an effective internal audit function.
- the existence and enforcement of a written code of conduct.

Furthermore, fraud risk factors considered at a business segment operating level may provide different insights when compared with those obtained when considered at an entity-wide level.

Considerations Specific to Smaller, Less Complex Entities

.A32 In the case of a small entity, some or all of these considerations may be inapplicable or less relevant. For example, a smaller entity may not have a written code of conduct but, instead, may have developed a culture that emphasizes the importance of integrity and ethical behavior through oral communication and by management example. Domination of management by a single individual in a small entity does not generally, in and of itself, indicate a failure by management to display and communicate an appropriate attitude

[20]Paragraph 21 of SAS No. 145, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

regarding internal control and the financial reporting process. In some entities, the need for management authorization can compensate for otherwise deficient controls and reduce the risk of employee fraud. However, domination of management by a single individual can be a potential deficiency in internal control because an opportunity exists for management override of controls.

Identification and Assessment of the Risks of Material Misstatement Due to Fraud

Risks of Fraud in Revenue Recognition (Ref: par. .26)

.A33 Material misstatement due to fraudulent financial reporting relating to revenue recognition often results from an overstatement of revenues through, for example, premature revenue recognition or recording fictitious revenues. It may result also from an understatement of revenues through, for example, improperly shifting revenues to a later period.

.A34 The risks of fraud in revenue recognition may be greater in some entities than others. For example, there may be pressures or incentives on management to commit fraudulent financial reporting through inappropriate revenue recognition when, for example, performance is measured in terms of year over year revenue growth or profit. Similarly, for example, there may be greater risks of fraud in revenue recognition in the case of entities that generate a substantial portion of revenues through cash sales.

.A35 The presumption that risks of fraud exist in revenue recognition may be rebutted. For example, the auditor may conclude that no risk of material misstatement due to fraud relating to revenue recognition exists in the case in which a single type of simple revenue transaction exists, for example, leasehold revenue from a single unit rental property.

Identifying and Assessing the Risks of Material Misstatement Due to Fraud and Understanding the Entity's Related Controls (Ref: par. .27)

.A36 Management may make judgments on the nature and extent of the controls it chooses to implement, and the nature and extent of the risks it chooses to assume.[21] In determining which controls to implement to prevent and detect fraud, management considers the risks that the financial statements may be materially misstated as a result of fraud. As part of this consideration, management may conclude that it is not cost effective to implement and maintain a particular control in relation to the reduction in the risks of material misstatement due to fraud to be achieved.

.A37 It is, therefore, important for the auditor to obtain an understanding of the controls that management has designed, implemented, and maintained to prevent and detect fraud. In identifying the controls that address the risks of material misstatement due to fraud, the auditor may learn, for example, that management has consciously chosen to accept the risks associated with a lack of segregation of duties. Information from identifying these controls and evaluating their design and determining whether they have been implemented

[21] Paragraph .A49 of section 315A. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

may also be useful in identifying fraud risk factors that may affect the auditor's assessment of the risks that the financial statements may contain material misstatement due to fraud. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Responses to the Assessed Risks of Material Misstatement Due to Fraud

Overall Responses (Ref: par. .28)

.A38 Determining overall responses to address the assessed risks of material misstatement due to fraud generally includes the consideration of how the overall conduct of the audit can reflect increased professional skepticism through, for example, increased

- sensitivity in the selection of the nature and extent of documentation to be examined in support of material transactions.
- recognition of the need to corroborate management explanations or representations concerning material matters.

Determining overall responses to address the assessed risks of material misstatement due to fraud also involves more general considerations apart from the specific procedures otherwise planned; these considerations include the matters listed in paragraph .29, which are discussed in the following sections.

Assignment and Supervision of Personnel (Ref: par. .29a)

.A39 The auditor may respond to identified risks of material misstatement due to fraud by, for example, assigning additional individuals with specialized skill and knowledge, such as forensic and IT specialists, or by assigning more experienced individuals to the engagement.

.A40 The extent of supervision reflects the auditor's assessment of risks of material misstatement due to fraud and the competencies of the engagement team members performing the work.

Accounting Principles (Ref: par. .29b)

.A41 Management bias in the selection and application of accounting principles may individually or collectively involve matters such as contingencies, fair value measurements, revenue recognition, accounting estimates, related party transactions, or other transactions without a clear business purpose.

Unpredictability in the Selection of Audit Procedures (Ref: par. .29c)

.A42 Incorporating an element of unpredictability in the selection of the nature, timing, and extent of audit procedures to be performed is important because individuals within the entity who are familiar with the audit procedures normally performed on engagements may be better able to conceal fraudulent financial reporting. This can be achieved by, for example,

- performing substantive procedures on selected account balances and assertions not otherwise tested due to their materiality or risk.
- adjusting the timing of audit procedures from that otherwise expected.
- using different sampling methods.
- performing audit procedures at different locations or at locations on an unannounced basis.

Audit Procedures Responsive to Assessed Risks of Material Misstatement Due to Fraud at the Assertion Level (Ref: par. .30)

.A43 The auditor's responses to address the assessed risks of material misstatement due to fraud at the assertion level may include changing the nature, timing, and extent of audit procedures in the following ways:

- The nature of audit procedures to be performed may need to be changed to obtain audit evidence that is more reliable and relevant or to obtain additional corroborative information. This may affect both the type of audit procedures to be performed and their combination. For example:
  - — Physical observation or inspection of certain assets may become more important, or the auditor may choose to use computer-assisted audit techniques to gather more evidence about data contained in significant accounts or electronic transaction files.
  - — The auditor may design procedures to obtain additional corroborative information. For example, if the auditor identifies that management is under pressure to meet earnings expectations, there may be a related risk that management is inflating sales by entering into sales agreements that include terms that preclude revenue recognition or by invoicing sales before delivery. In these circumstances, the auditor may, for example, design external confirmations not only to confirm outstanding amounts, but also to confirm the details of the sales agreements, including date, any rights of return, and delivery terms. In addition, the auditor might find it effective to supplement such external confirmations with inquiries of nonfinancial personnel in the entity regarding any changes in sales agreements and delivery terms.
- The timing of substantive procedures may need to be modified. The auditor may conclude that performing substantive testing at or near the period end better addresses an assessed risk of material misstatement due to fraud. The auditor may conclude that, given the assessed risks of intentional misstatement or manipulation, audit procedures to extend audit conclusions from an interim date to the period end would not be effective. In contrast, because an intentional misstatement — for example, a misstatement involving improper revenue recognition — may have been initiated in an interim period, the auditor may elect to apply substantive procedures to transactions occurring earlier in or throughout the reporting period.
- The extent of the procedures applied reflects the assessment of the risks of material misstatement due to fraud. For example, increasing sample sizes or performing

analytical procedures at a more detailed level may be appropriate. Also, computer-assisted audit techniques may enable more extensive testing of electronic transactions and account files. Such techniques can be used to select sample transactions from key electronic files, to sort transactions with specific characteristics, or to test an entire population instead of a sample.

.A44 If the auditor identifies a risk of material misstatement due to fraud that affects inventory quantities, examining the entity's inventory records may help to identify locations or items that require specific attention during or after the physical inventory count. Such a review may lead to a decision to observe inventory counts at certain locations on an unannounced basis or to conduct inventory counts at all locations on the same date.

.A45 The auditor may identify a risk of material misstatement due to fraud affecting a number of accounts and assertions. These may include asset valuation, estimates relating to specific transactions (such as acquisitions, restructurings, or disposals of segments of the business), and other significant accrued liabilities (such as pension and other postemployment benefit obligations, or environmental remediation liabilities). The risk may also relate to significant changes in assumptions relating to recurring estimates. Information gathered through obtaining an understanding of the entity and its environment may assist the auditor in evaluating the reasonableness of such management estimates and underlying judgments and assumptions. A retrospective review of similar management judgments and assumptions applied in prior periods may also provide insight about the reasonableness of judgments and assumptions supporting management estimates.

.A46 Examples of possible audit procedures to address the assessed risks of material misstatement due to fraud, including those that illustrate the incorporation of an element of unpredictability, are presented in appendix B, "Examples of Possible Audit Procedures to Address the Assessed Risks of Material Misstatement Due to Fraud." The appendix includes examples of responses to the auditor's assessment of the risks of material misstatement resulting from both fraudulent financial reporting, including fraudulent financial reporting resulting from revenue recognition, and misappropriation of assets.

Audit Procedures Responsive to Risks Related to Management Override of Controls

Journal Entries and Other Adjustments (Ref: par. .32a)

.A47 Material misstatements of financial statements due to fraud often involve the manipulation of the financial reporting process by (*a*) recording inappropriate or unauthorized journal entries throughout the year or at period end, or (*b*) making adjustments to amounts reported in the financial statements that are not reflected in formal journal entries, such as through consolidating adjustments, report combinations, and reclassifications.

.A48 The auditor's consideration of the risks of material misstatement associated with inappropriate override of controls over journal entries[22] is important because automated processes and controls may reduce the risk of inadvertent error but do not overcome the risk that individuals may inappropriately override such automated processes, for example, by changing the amounts being automatically passed to the general ledger or to the financial reporting system. Furthermore, when IT is used to transfer information automatically, there may be little or no visible evidence of such intervention in the information systems.

.A49 When identifying and selecting journal entries and other adjustments for testing and determining the appropriate method of examining the underlying support for the items selected, the following matters may be relevant:

- *The identification and assessment of the risks of material misstatement due to fraud.* The presence of fraud risk factors and other information obtained during the auditor's identification and assessment of the risks of material misstatement due to fraud may assist the auditor to identify specific classes of journal entries and other adjustments for testing.
- *Controls that have been implemented over journal entries and other adjustments.* Effective controls over the preparation and posting of journal entries and other adjustments may reduce the extent of substantive testing necessary, provided that the auditor has tested the operating effectiveness of the controls.
- *The entity's financial reporting process and the nature of evidence that can be obtained.* For many entities, routine processing of transactions involves a combination of manual and automated procedures and controls. Similarly, the processing of journal entries and other adjustments may involve both manual and automated procedures and controls. When IT is used in the financial reporting process, journal entries and other adjustments may exist only in electronic form.
- *The characteristics of fraudulent journal entries or other adjustments.* Inappropriate journal entries or other adjustments often have unique identifying characteristics. Such characteristics may include entries (*a*) made to unrelated, unusual, or seldom-used accounts; (*b*) made by individuals who typically do not make journal entries; (*c*) recorded at the end of the period or as postclosing entries that have little or no explanation or description; (*d*) made either before or during the preparation of the financial statements that do not have account numbers; or (*e*) containing round numbers or consistent ending numbers.
- *The nature and complexity of the accounts.* Inappropriate journal entries or adjustments may be applied to accounts that (*a*) contain transactions that are complex or unusual in nature, (*b*) contain significant estimates and period-end adjustments, (*c*) have been prone to misstatements in the past, (*d*) have not been reconciled on a timely basis or contain unreconciled differences, (*e*) contain intercompany transactions, or (*f*) are otherwise associated with an identified risk of material misstatement due to fraud. In audits of entities that have several locations or components, consideration is given to the need to select journal entries from multiple locations.
- *Journal entries or other adjustments processed outside the normal course of business.* Nonstandard journal entries, and other entries such as consolidating adjustments, may not be subject to the same nature and extent of controls as those journal entries

[22] Paragraph 27*b* of SAS No. 145. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

used on a recurring basis to record transactions such as monthly sales, purchases, and cash disbursements.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A50 The auditor exercises professional judgment in determining the nature, timing, and extent of testing of journal entries and other adjustments. However, because fraudulent journal entries and other adjustments are often made at the end of a reporting period, paragraph .32*a*(iv) requires the auditor to select the journal entries and other adjustments made at that time. Further, because material misstatements in financial statements due to fraud can occur throughout the period and may involve extensive efforts to conceal how the fraud is accomplished, paragraph .32*a*(v) requires the auditor to consider whether a need also exists to test journal entries and other adjustments throughout the period.

Accounting Estimates (Ref: par. .32b)

.A51 The preparation and fair presentation of the financial statements requires management to make a number of judgments or assumptions that affect significant accounting estimates and monitor the reasonableness of such estimates on an ongoing basis. Fraudulent financial reporting is often accomplished through intentional misstatement of accounting estimates. This may be achieved by, for example, understating or overstating all provisions or reserves in the same fashion so as to be designed either to smooth earnings over two or more accounting periods, or to achieve a designated earnings level in order to deceive financial statement users by influencing their perceptions about the entity's performance and profitability.

.A52 The purpose of performing a retrospective review of management judgments and assumptions related to significant accounting estimates reflected in the financial statements of the prior year is to determine whether an indication exists of a possible bias on the part of management. This review is not intended to call into question the auditor's professional judgments made in the prior year that were based on information available at the time.

.A53 A retrospective review is also required by section 540, *Auditing Accounting Estimates and Related Disclosures*.[23] That review is conducted as a risk assessment procedure to obtain information regarding the effectiveness of management's previous accounting estimates, audit evidence about the outcome, or when applicable, the subsequent reestimation to assist in identifying and assessing the risks of material misstatement in the current period, and audit evidence of matters, such as estimation uncertainty, that may be required to be disclosed in the financial statements. As a practical matter, the auditor's review of management judgments and assumptions for biases that could represent a risk of material misstatement due to fraud in accordance with this section may be carried out in conjunction with the review required by section 540. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 143.]

[23]Paragraph .13 of section 540, *Auditing Accounting Estimates and Related Disclosures*. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 143. Footnote renumbered by the issuance of SAS No. 145, October 2021.]

Business Purpose for Significant Unusual Transactions (Ref: par. .32c)

.A54 Indicators that may suggest that significant unusual transactions may have been entered into to engage in fraudulent financial reporting or to conceal misappropriation of assets include the following:

- The form of such transactions appears overly complex (for example, the transaction involves multiple entities within a consolidated group or multiple unrelated third parties).
- Management has not discussed the nature of and accounting for such transactions with those charged with governance of the entity, and inadequate documentation exists.
- Management is placing more emphasis on the need for a particular accounting treatment than on the economic substance of the transaction.
- Transactions involve nonconsolidated related parties, including special purpose entities, have not been properly reviewed or approved by those charged with governance of the entity.
- Transactions involve related parties or relationships or transactions with related parties previously undisclosed to the auditor.
- Transactions involve other parties that do not have the substance or the financial strength to support the transaction without assistance from the entity under audit or any related party of the entity.
- Transactions lack commercial or economic substance or are part of a larger series of connected, linked, or otherwise interdependent arrangements that lack commercial or economic substance individually or in the aggregate (for example, a transaction is entered into shortly prior to period end and is unwound shortly after period end).
- Transactions occur with a party that falls outside the definition of a related party (as defined by the applicable financial reporting framework), with either party able to negotiate terms that may not be available for other, more clearly independent parties on an arm's-length basis.
- Transactions exist to enable the entity to achieve certain financial targets.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

.A55 Procedures for evaluating significant unusual transactions may include evaluating the financial capability of the other parties with respect to significant uncollected balances, loan commitments, supply arrangements, guarantees and other obligations, if any. Examples of information that might be relevant to the auditor's evaluation of a related party's financial capability include, among other things, the audited financial statements of the related party, reports issued by regulatory agencies, financial publications, and income tax returns of the related party, to the extent available. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

Other Audit Procedures (Ref: par. .32a and .33)

.A56 Risks of material misstatement, including misstatements due to fraud, cannot be reduced to an appropriately low level by performing only tests of controls.[24] [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

Evaluation of Audit Evidence (Ref: par. .34–.37)

.A57 Section 330 requires the auditor, based on the audit procedures performed and the audit evidence obtained, to evaluate whether the assessments of the risks of material misstatement at the assertion level remain appropriate.[25] This evaluation is primarily a qualitative matter based on the auditor's professional judgment. Such an evaluation may provide further insight into the risks of material misstatement due to fraud and whether a need exists to perform additional or different audit procedures. Appendix C contains examples of circumstances that may indicate the possibility of fraud. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

Analytical Procedures Performed Near the End of the Audit in Forming an Overall Conclusion (Ref: par. .34)

.A58 Determining which particular trends and relationships may indicate a risk of material misstatement due to fraud requires professional judgment. Unusual relationships involving year-end revenue and income are particularly relevant. These might include, for example, uncharacteristically large amounts of income being reported in the last few weeks of the reporting period or unusual transactions or income that is inconsistent with trends in cash flow from operations. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

.A59 Some unusual or unexpected analytical relationships may have been identified and may indicate a risk of material misstatement due to fraud because management or employees generally are unable to manipulate certain information to create seemingly normal or expected relationships. Some examples are as follows:

- The relationship of net income to cash flows from operations may appear unusual because management recorded fictitious revenues and receivables but was unable to manipulate cash.
- Changes in inventory, accounts payable, sales, or cost of sales from the prior period to the current period may be inconsistent, indicating a possible employee theft of inventory, because the employee was unable to manipulate all of the related accounts.
- A comparison of the entity's profitability to industry trends, which management cannot manipulate, may indicate trends or differences for further consideration when identifying risks of material misstatement due to fraud.

---

[24] Paragraph .A9 of section 330. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

[25] Paragraph .27 of section 330. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

- A comparison of bad debt write-offs to comparable industry data, which employees cannot manipulate, may provide unexplained relationships that could indicate a possible theft of cash receipts.
- An unexpected or unexplained relationship between sales volume, as determined from the accounting records and production statistics maintained by operations personnel, which may be more difficult for management to manipulate, may indicate a possible misstatement of sales.

[Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

Consideration of Identified Misstatements (Ref: par. .35–.37)

.A60 Because fraud involves incentive or pressure to commit fraud, a perceived opportunity to do so, or some rationalization of the act, an instance of fraud is unlikely to be an isolated occurrence. Accordingly, misstatements, such as numerous misstatements at a specific location even though the cumulative effect is not material, may be indicative of a risk of material misstatement due to fraud. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

.A61 The implications of identified fraud depend on the circumstances. For example, an otherwise insignificant fraud may be significant if it involves senior management. In such circumstances, the reliability of evidence previously obtained may be called into question because there may be doubts about the completeness and truthfulness of representations made and the genuineness of accounting records and documentation. There may also be a possibility of collusion involving employees, management, or third parties. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

.A62 Section 450, *Evaluation of Misstatements Identified During the Audit*, and section 700, *Forming an Opinion and Reporting on Financial Statements*, and section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, address the evaluation and disposition of misstatements and the effect on the auditor's opinion in the auditor's report. [Paragraph renumbered by the issuance of SAS No. 135, May 2019. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

.A63 Section 580, *Written Representations*, addresses obtaining appropriate representations from management in the audit. In addition to acknowledging its responsibility for the financial statements, it is important that, irrespective of the size of the entity, management acknowledges its responsibility for internal control designed, implemented, and maintained to prevent and detect fraud. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

Auditor Unable to Continue the Engagement (Ref: par. .38)

.A64 Examples of circumstances that may arise and bring into question the auditor's ability to continue performing the audit include the following:

a. The entity does not take the appropriate action regarding fraud that the auditor considers necessary in the circumstances, even when the fraud is not material to the financial statements.

b. The auditor's consideration of the risks of material misstatement due to fraud and the results of audit tests indicate a significant risk of material and pervasive fraud.

c. The auditor has significant concern about the competence or integrity of management or those charged with governance.

[Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

.A65 Because of the variety of circumstances that may arise, it is not possible to describe definitively when withdrawal from an engagement is appropriate. Factors that affect the auditor's conclusion include the implications of the involvement of a member of management or of those charged with governance (which may affect the reliability of management representations) and the effects on the auditor of a continuing association with the entity. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

.A66 The auditor has professional and legal responsibilities in such circumstances, and these responsibilities may vary by engagement. In some circumstances, for example, the auditor may be entitled to, or required to, make a statement or report to the person or persons who engaged the auditor or, in some cases, to regulatory authorities. Given the nature of the circumstances and the need to consider the legal requirements, the auditor may consider it appropriate to seek legal advice when deciding whether to withdraw from an engagement and in determining an appropriate course of action, including the possibility of reporting to regulators or others.[26] [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

Considerations Specific to Governmental Entities and Not-for-Profit Organizations

.A67 For governmental entities and not-for-profit organizations, the option of withdrawing from the engagement may not be available to the auditor due to the nature of the mandate, public interest considerations, contractual requirements, or law or regulation. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

Communications to Management and With Those Charged With Governance

Communication to Management (Ref: par. .39)

.A68 When the auditor has obtained evidence that fraud exists or may exist, it is important that the matter be brought to the attention of the appropriate level of management as soon as practicable. This is true even if the matter might be considered inconsequential (for example, a minor defalcation by an employee at a low level in the entity's organization).

[26]Section 510, *Opening Balances—Initial Audit Engagements, Including Reaudit Engagements*, provides guidance on communications with an auditor replacing the existing auditor. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

The determination of which level of management is the appropriate one is a matter of professional judgment and is affected by such factors as the likelihood of collusion and the nature and magnitude of the suspected fraud. Ordinarily, the appropriate level of management is at least one level above the persons who appear to be involved with the suspected fraud. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

Communication With Those Charged With Governance (Ref: par. .40)

.A69 The auditor's communication with those charged with governance may be made orally or in writing. Section 260, *The Auditor's Communication With Those Charged With Governance*, identifies factors the auditor considers in determining whether to communicate orally or in writing.[27] Due to the nature and sensitivity of fraud involving senior management, or fraud that results in a material misstatement in the financial statements, the auditor communicates such matters on a timely basis and may consider it necessary to also communicate such matters in writing. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

.A70 In some cases, the auditor may consider it appropriate to communicate with those charged with governance when the auditor becomes aware of fraud involving employees other than management that does not result in a material misstatement. Similarly, those charged with governance may wish to be informed of such circumstances. The communication process is assisted if the auditor and those charged with governance agree at an early stage in the audit about the nature and extent of the auditor's communications in this regard. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

.A71 When the auditor has doubts about the integrity or honesty of management or those charged with governance, the auditor may consider it appropriate to obtain legal advice to assist in determining the appropriate course of action. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

Other Matters Related to Fraud (Ref: par. .41)

.A72 Other matters related to fraud to be discussed with those charged with governance of the entity may include, for example, the following:

- Concerns about the nature, extent, and frequency of management's assessments of the controls in place to prevent and detect fraud and of the risk that the financial statements may be misstated.
- A failure by management to appropriately address identified significant deficiencies or material weaknesses in internal control, or to appropriately respond to an identified fraud.
- The auditor's evaluation of the entity's control environment, including questions regarding the competence and integrity of management.
- Actions by management that may be indicative of fraudulent financial reporting, such as management's selection and application of accounting policies that may be

[27] Paragraph .A49 of section 260. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

indicative of management's effort to manage earnings in order to deceive financial statement users by influencing their perceptions concerning the entity's performance and profitability.

- Concerns about the adequacy and completeness of the authorization of significant unusual transactions.
- The absence of programs or controls to address risks of material misstatement due to fraud that are significant deficiencies or material weaknesses.[28]

[Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

Communications to Regulatory and Enforcement Authorities (Ref: par. .42)

.A73 The auditor's professional duty to maintain the confidentiality of client information may preclude reporting fraud to a party outside the client entity. However, in certain circumstances, the duty of confidentiality may be overridden by statute, regulation, courts of law, specific requirements of audits of entities that receive government financial assistance, or waived by agreement. In some circumstances, the auditor has a statutory duty to report the occurrence of fraud to supervisory authorities. Also, in some circumstances, the auditor has a duty to report misstatements to authorities in those cases when management and those charged with governance fail to take corrective action. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

.A74 The auditor may consider it appropriate to obtain legal advice to determine the appropriate course of action in the circumstances, the purpose of which is to ascertain the steps necessary in considering the public interest aspects of identified fraud. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

Considerations Specific to Governmental Entities and Not-for-Profit Organizations

.A75 For governmental entities and not-for-profit organizations, requirements for reporting fraud, whether or not discovered through the audit process, may be subject to specific provisions of the audit mandate or related law or regulation. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

[28] See section 265, *Communicating Internal Control Related Matters Identified in an Audit*. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

Appendix A — Examples of Fraud Risk Factors (Ref: par. .11, .24, and .A30)

.A76

The fraud risk factors identified in this appendix are examples of such factors that may be faced by auditors in a broad range of situations. Separately presented are examples relating to the two types of fraud relevant to the auditor's consideration — that is, fraudulent financial reporting and misappropriation of assets. For each of these types of fraud, the risk factors are further classified based on the three conditions generally present when material misstatements due to fraud occur: (*a*) incentives and pressures, (*b*) opportunities, and (*c*) attitudes and rationalizations. Although the risk factors cover a broad range of situations, they are only examples and, accordingly, the auditor may identify additional or different risk factors. Not all of these examples are relevant in all circumstances, and some may be of greater or lesser significance in entities of different size or with different ownership characteristics or circumstances. Also, the order of the examples of risk factors provided is not intended to reflect their relative importance or frequency of occurrence.

Fraud risk factors may relate to incentives or pressures, or opportunities that arise from conditions that create susceptibility to misstatement before consideration of controls (that is, the determination is based on inherent risk). Such factors are inherent risk factors and may be due to susceptibility to management bias. Fraud risk factors related to opportunities may also arise from other identified inherent risk factors (for example, complexity or uncertainty may create opportunities that result in susceptibility to misstate-ment due to fraud). Fraud risk factors related to opportunities may also relate to conditions within the entity's system of internal control, such as limitations or deficiencies in internal control that create such opportunities. Fraud risk factors related to attitudes or rationalizations may arise, in particular, from limitations or control deficiencies in the entity's control environment.

Risk Factors Relating to Misstatements Arising From Fraudulent Financial Reporting

The following are examples of risk factors relating to misstatements arising from fraudulent financial reporting.

Incentives and Pressures

Financial stability or profitability is threatened by economic, industry, or entity operating conditions, such as (or as indicated by) the following:

- High degree of competition or market saturation, accompanied by declining margins
- High vulnerability to rapid changes, such as changes in technology, product obsolescence, or interest rates
- Significant declines in customer demand and increasing business failures in either the industry or overall economy

- Operating losses making the threat of bankruptcy, foreclosure, or hostile takeover imminent
- Recurring negative cash flows from operations or an inability to generate cash flows from operations while reporting earnings and earnings growth
- Rapid growth or unusual profitability especially compared to that of other companies in the same industry
- New accounting, statutory, or regulatory requirements

Excessive pressure exists for management to meet the requirements or expectations of third parties due to the following:

- Profitability or trend level expectations of investment analysts, institutional investors, significant creditors, or other external parties (particularly expectations that are unduly aggressive or unrealistic), including expectations created by management in, for example, overly optimistic press releases or annual report messages
- Need to obtain additional debt or equity financing to stay competitive — including financing of major research and development or capital expenditures
- Marginal ability to meet exchange listing requirements or debt repayment or other debt covenant requirements
- Perceived or real adverse effects of reporting poor financial results on significant pending transactions, such as business combinations or contract awards
- A need to achieve financial targets required in bond covenants
- Pressure for management to meet the expectations of legislative or oversight bodies or to achieve political outcomes, or both

Information available indicates that the personal financial situation of management or those charged with governance is threatened by the entity's financial performance arising from the following:

- Significant financial interests in the entity
- Significant portions of their compensation (for example, bonuses, stock options, and earn-out arrangements) being contingent upon achieving aggressive targets for stock price, operating results, financial position, or cash flow[1]
- Personal guarantees of debts of the entity

Management or operating personnel are under excessive pressure to meet financial targets established by those charged with governance, including sales or profitability incentive goals.

---

[1]Management incentive plans may be contingent upon achieving targets relating only to certain accounts or selected activities of the entity, even though the related accounts or activities may not be material to the entity as a whole.

Opportunities

The nature of the industry or the entity's operations provides opportunities to engage in fraudulent financial reporting that can arise from the following:

- Related party transactions that are also significant unusual transactions
- Significant transactions with related parties whose financial statements are not audited or are audited by another firm
- A strong financial presence or ability to dominate a certain industry sector that allows the entity to dictate terms or conditions to suppliers or customers that may result in inappropriate or non-arm's-length transactions
- Assets, liabilities, revenues, or expenses based on significant estimates that involve subjective judgments or uncertainties that are difficult to corroborate
- Significant or highly complex transactions or significant unusual transactions, especially those close to period end that pose difficult "substance over form" questions
- Significant operations located or conducted across jurisdictional borders where differing business environments and regulations exist
- Use of business intermediaries for which there appears to be no clear business justification
- Significant bank accounts or subsidiary or branch operations in tax-haven jurisdictions for which there appears to be no clear business justification
- Contractual arrangements lacking a business purpose

The monitoring of management is not effective as a result of the following:

- Domination of management by a single person or small group (in a nonowner-managed business) without compensating controls.
- Oversight by those charged with governance over the financial reporting process and internal control is not effective.
- The exertion of dominant influence by or over a related party.

The organizational structure is complex or unstable, as evidenced by the following:

- Difficulty in determining the organization or individuals that have controlling interest in the entity
- Overly complex organizational structure involving unusual legal entities or managerial lines of authority
- High turnover of senior management, legal counsel, or those charged with governance

Deficiencies in internal control are a result of the following:

- Inadequate process to monitor the entity's system of internal control, including automated controls and controls over interim financial reporting (when external reporting is required)
- High turnover rates or employment of staff in accounting, IT, or the internal audit function who are not effective
- Accounting and information systems that are not effective, including situations involving significant deficiencies or material weaknesses in internal control
- Weak controls over budget preparation and development and compliance with law or regulation.

Attitudes and Rationalizations

- Communication, implementation, support, or enforcement of the entity's values or ethical standards by management, or the communication of inappropriate values or ethical standards that are not effective.
- Nonfinancial management's excessive participation in or preoccupation with the selection of accounting policies or the determination of significant estimates.
- Known history of violations of securities law or other law or regulation, or claims against the entity, its senior management, or those charged with governance alleging fraud or violations of law or regulation.
- Excessive interest by management in maintaining or increasing the entity's stock price or earnings trend.
- The practice by management of committing to analysts, creditors, and other third parties to achieve aggressive or unrealistic forecasts.
- Management failing to remedy known significant deficiencies or material weaknesses in internal control on a timely basis.
- An interest by management in employing inappropriate means to minimize reported earnings for tax-motivated reasons.
- Low morale among senior management.
- The owner-manager makes no distinction between personal and business transactions.
- Dispute between shareholders in a closely held entity.
- Recurring attempts by management to justify marginal or inappropriate accounting on the basis of materiality.
- A strained relationship between management and the current or predecessor auditor, as exhibited by the following:
  - — Frequent disputes with the current or predecessor auditor on accounting, auditing, or reporting matters

— Unreasonable demands on the auditor, such as unrealistic time constraints regarding the completion of the audit or the issuance of the auditor's report

— Restrictions on the auditor that inappropriately limit access to people or information or the ability to communicate effectively with those charged with governance

— Domineering management behavior in dealing with the auditor, especially involving attempts to influence the scope of the auditor's work or the selection or continuance of personnel assigned to or consulted on the audit engagement

Risk Factors Arising From Misstatements Arising From Misappropriation of Assets

Risk factors that relate to misstatements arising from misappropriation of assets are also classified according to the three conditions generally present when fraud exists: incentives and pressures, opportunities, and attitudes and rationalization. Some of the risk factors related to misstatements arising from fraudulent financial reporting also may be present when misstatements arising from misappropriation of assets occur. For example, ineffective monitoring of management and other deficiencies in internal control that are not effective may be present when misstatements due to either fraudulent financial reporting or misappropriation of assets exist. The following are examples of risk factors related to misstatements arising from misappropriation of assets.

Incentives and Pressures

Personal financial obligations may create pressure on management or employees with access to cash or other assets susceptible to theft to misappropriate those assets.

Adverse relationships between the entity and employees with access to cash or other assets susceptible to theft may motivate those employees to misappropriate those assets. For example, adverse relationships may be created by the following:

- Known or anticipated future employee layoffs
- Recent or anticipated changes to employee compensation or benefit plans
- Promotions, compensation, or other rewards inconsistent with expectations

Opportunities

Certain characteristics or circumstances may increase the susceptibility of assets to misappropriation. For example, opportunities to misappropriate assets increase when the following exist:

- Large amounts of cash on hand or processed
- Inventory items that are small in size, of high value, or in high demand

- Easily convertible assets, such as bearer bonds, diamonds, or computer chips
- Fixed assets that are small in size, marketable, or lack observable identification of ownership

Inadequate controls over assets may increase the susceptibility of misappropriation of those assets. For example, misappropriation of assets may occur because the following exist:

- Inadequate segregation of duties or independent checks
- Inadequate oversight of senior management expenditures, such as travel and other reimbursements
- Inadequate management oversight of employees responsible for assets (for example, inadequate supervision or monitoring of remote locations)
- Inadequate job applicant screening of employees with access to assets
- Inadequate record keeping with respect to assets
- Inadequate system of authorization and approval of transactions (for example, in purchasing)
- Inadequate physical safeguards over cash, investments, inventory, or fixed assets
- Lack of complete and timely reconciliations of assets
- Lack of timely and appropriate documentation of transactions (for example, credits for merchandise returns)
- Lack of mandatory vacations for employees performing key control functions
- Inadequate management understanding of IT, which enables IT employees to perpetrate a misappropriation
- Inadequate access controls over automated records, including controls over and review of computer systems event logs

Attitudes and Rationalizations

- Disregard for the need for monitoring or reducing risks related to misappropriations of assets
- Disregard for controls over misappropriation of assets by overriding existing controls or by failing to take appropriate remedial action on known deficiencies in internal control
- Behavior indicating displeasure or dissatisfaction with the entity or its treatment of the employee
- Changes in behavior or lifestyle that may indicate assets have been misappropriated

- The belief by some government or other officials that their level of authority justifies a certain level of compensation and personal privileges
- Tolerance of petty theft

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2014, by SAS No. 128. Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Appendix B — Examples of Possible Audit Procedures to Address the Assessed Risks of Material Misstatement Due to Fraud (Ref: par. .22 and .A46)

.A77

The following are examples of possible audit procedures to address the assessed risks of material misstatement due to fraud resulting from both fraudulent financial reporting and misappropriation of assets. Although these procedures cover a broad range of situations, they are only examples and, accordingly, they may not be the most appropriate nor necessary in each circumstance. Also the order of the procedures provided is not intended to reflect their relative importance.

Consideration at the Assertion Level

Specific responses to the auditor's assessment of the risks of material misstatement due to fraud will vary depending upon the types or combinations of fraud risk factors or conditions identified, and the classes of transactions, account balances, disclosures, and assertions they may affect.

The following are specific examples of responses:

- Visiting locations or performing certain tests on a surprise or unannounced basis (for example, observing inventory at locations where auditor attendance has not been previously announced or counting cash at a particular date on a surprise basis)
- Requesting that inventories be counted at the end of the reporting period or on a date closer to period end to minimize the risk of manipulation of balances in the period between the date of completion of the count and the end of the reporting period
- Altering the audit approach in the current year (for example, contacting major customers and suppliers orally in addition to sending written confirmation, sending confirmation requests to a specific party within an organization, or seeking more or different information)
- Performing a detailed review of the entity's quarter-end or year-end adjusting entries and investigating any that appear to have an unusual nature or amount
- For significant and unusual transactions, particularly those occurring at or near year end, investigating the possibility of related parties and the sources of financial resources supporting the transactions
- Performing substantive analytical procedures using disaggregated data (for example, comparing sales and cost of sales by location, line of business, or month to expectations developed by the auditor)
- Conducting interviews of personnel involved in areas in which a risk of material misstatement due to fraud has been identified, to obtain their insights about the risk, and whether, or how, controls address the risk

- When other independent auditors are auditing the financial statements of one or more subsidiaries, divisions, or branches, discussing with them the extent of work necessary to be performed to address the assessed risk of material misstatement due to fraud resulting from transactions and activities among these components
- If the work of an expert becomes particularly significant with respect to a financial statement item for which the assessed risk of material misstatement due to fraud is high, performing additional procedures relating to some or all of the expert's assumptions, methods, or findings to determine that the findings are not unreasonable, or engaging another expert for that purpose
- Performing audit procedures to analyze selected opening balance sheet accounts of previously audited financial statements to assess how certain issues involving accounting estimates and judgments, for example, an allowance for sales returns, were resolved with the benefit of hindsight
- Performing procedures on account or other reconciliations prepared by the entity, including considering reconciliations performed at interim periods
- Performing computer-assisted techniques, such as data mining to test for anomalies in a population
- Testing the integrity of computer-produced records and transactions
- Seeking additional audit evidence from sources outside of the entity being audited

Specific Responses — Misstatement Resulting From Fraudulent Financial Reporting

Examples of responses to the auditor's assessment of the risks of material misstatement due to fraudulent financial reporting are as follows:

Revenue Recognition

- Performing substantive analytical procedures relating to revenue using disaggregated data; for example, comparing revenue reported by month and by product line or business segment during the current reporting period with comparable prior periods or with revenue related to cash collections (computer-assisted audit techniques may be useful in identifying unusual or unexpected revenue relationships or transactions)
- Confirming with customers certain relevant contract terms and the absence of side agreements because the appropriate accounting often is influenced by such terms or agreements and basis for rebates or the period to which they relate are often poorly documented (for example, acceptance criteria, delivery and payment terms, the absence of future or continuing vendor obligations, the right to return the product, guaranteed resale amounts, and cancellation or refund provisions often are relevant in such circumstances)

- Inquiring of the entity’s sales and marketing personnel or in-house legal counsel regarding sales or shipments near the end of the period and their knowledge of any unusual terms or conditions associated with these transactions
- Being physically present at one or more locations at period end to observe goods being shipped or being readied for shipment (or returns awaiting processing) and performing other appropriate sales and inventory cutoff procedures
- For those situations for which revenue transactions are electronically initiated, processed, and recorded, testing controls to determine whether they provide assurance that recorded revenue transactions occurred and are properly recorded

Inventory Quantities

- Examining the entity's inventory records to identify locations or items that require specific attention during or after the physical inventory count
- Observing inventory counts at certain locations on an unannounced basis or conducting inventory counts at all locations on the same date
- Conducting inventory counts at or near the end of the reporting period to minimize the risk of inappropriate manipulation during the period between the count and the end of the reporting period
- Performing additional procedures during the observation of the count; for example, more rigorously examining the contents of boxed items, the manner in which the goods are stacked (for example, hollow squares) or labeled, and the quality (that is, purity, grade, or concentration) of liquid substances such as perfumes or specialty chemicals (using the work of an expert may be helpful in this regard)
- Comparing the quantities for the current period with prior periods by class or category of inventory, location or other criteria, or comparison of quantities counted with perpetual records
- Using computer-assisted audit techniques to further test the compilation of the physical inventory counts (for example, sorting by tag number to test tag controls or by item serial number to test the possibility of item omission or duplication)

Management Estimates

- Using an expert to develop an independent estimate for comparison to management’s estimate
- Extending inquiries to individuals outside of management and the accounting department to corroborate management’s ability and intent to carry out plans that are relevant to developing the estimate

Specific Responses — Misstatements Due to Misappropriation of Assets

Differing circumstances would necessarily dictate different responses. Ordinarily, the audit response to an assessed risk of material misstatement due to fraud relating to misappropriation of assets will be directed toward certain account balances and classes of transactions. Although some of the audit responses noted in the preceding two categories may apply in such circumstances, the scope of the work is to be linked to the specific information about the misappropriation risk that has been identified.

Examples of responses to the auditor's assessment of the risk of material misstatements due to misappropriation of assets are as follows:

- Counting cash or securities at or near year end
- Confirming directly with customers the account activity (including credit memo and sales return activity as well as dates payments were made) for the period under audit
- Analyzing recoveries of written-off accounts
- Analyzing inventory shortages by location or product type
- Comparing key inventory ratios to industry norm
- Reviewing supporting documentation for reductions to the perpetual inventory records
- Performing a computerized match of the vendor list with a list of employees to identify matches of addresses or phone numbers
- Performing a computerized search of payroll records to identify duplicate addresses, employee identification or taxing authority numbers, or bank accounts
- Reviewing personnel files for those that contain little or no evidence of activity; for example, lack of performance evaluations
- Analyzing sales discounts and returns for unusual patterns or trends
- Confirming specific terms of contracts with third parties
- Obtaining evidence that contracts are being carried out in accordance with their terms
- Reviewing the propriety of large and unusual expenses
- Reviewing the authorization and carrying value of senior management and related party loans
- Reviewing the level and propriety of expense reports submitted by senior management

[Paragraph renumbered by the issuance of SAS No. 135, May 2019. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Appendix C — Examples of Circumstances That Indicate the Possibility of Fraud (Ref: par. .11, .A11, and .A57)

.A78

The following are examples of circumstances that may indicate the possibility that the financial statements may contain a material misstatement resulting from fraud.

Discrepancies in the accounting records, including the following:

- Transactions that are not recorded in a complete or timely manner or are improperly recorded by amount, accounting period, classification, or entity policy
- Unsupported or unauthorized balances or transactions
- Last minute adjustments that significantly affect financial results
- Evidence of employees' access to systems and records inconsistent with that necessary to perform their authorized duties
- Tips or complaints to the auditor about alleged fraud

Conflicting or missing evidence, including the following:

- Missing documents
- Documents that appear to have been altered
- Unavailability of other than photocopied or electronically transmitted documents when documents in original form are expected to exist
- Significant unexplained items on reconciliations
- Unusual balance sheet changes, or changes in trends or important financial statement ratios or relationships; for example, receivables growing faster than revenues
- Inconsistent, vague, or implausible responses from management or employees arising from inquiries or analytical procedures
- Unusual discrepancies between the entity's records and confirmation replies
- Large numbers of credit entries and other adjustments made to accounts receivable records
- Unexplained or inadequately explained differences between the accounts receivable subledger and the control account, or between the customer statements and the accounts receivable subledger
- Missing or nonexistent cancelled checks in circumstances in which cancelled checks are ordinarily returned to the entity with the bank statement
- Missing inventory or physical assets of significant magnitude

- Unavailable or missing electronic evidence, inconsistent with the entity's record retention practices or policies
- Fewer responses to confirmations than anticipated or a greater number of responses than anticipated
- Inability to produce evidence of key systems development and program change testing and implementation activities for current-year system changes and deployments

Conditions relating to governmental entities or not-for-profit organizations:

- Significant transfers or transactions between funds or programs, or both, lacking supporting documents
- Abnormal budget conditions, such as
  — significant budget adjustments
  — requests for additional funding
  — budget adjustments made without approval
  — large amounts of over-or-under spending
  — programs with an emphasis on spending money quickly
- Procurement conditions, such as
  — lack of procurement legislation
  — recent changes to procurement legislation
  — complex or unclear legislation
  — involvement of significant monetary amounts (such as in the defense area)
  — investigation by regulatory authorities
  — complaints received from potential suppliers about questionable practices related to awarding of contracts
  — former governmental officials functioning as executives of companies to which contracts have been awarded
- Program conditions, such as
  — newly implemented programs without existing management and accountability structures
  — programs established for political purposes
  — programs established to deal with an immediate emergency or crisis
  — programs experiencing unusual growth due to conditions beyond the control of management

- Grant and donor funding conditions, such as
  - — noncompliance with grant requirements
  - — unclear grant requirements
  - — grants not reaching the intended recipient
  - — complaints from intended recipients or interest groups, and lack of monitoring of grantee compliance with applicable law or regulation

Problematic or unusual relationships between the auditor and management, including the following:

- Denial of access to records, facilities, certain employees, customers, vendors, or others from whom audit evidence might be sought
- Undue time pressures imposed by management to resolve complex or contentious issues
- Complaints by management about the conduct of the audit or management intimidation of engagement team members, particularly in connection with the auditor's critical assessment of audit evidence or in the resolution of potential disagreements with management
- Unusual delays by the entity in providing requested information
- Unwillingness to facilitate auditor access to key electronic files for testing through the use of computer-assisted audit techniques
- Denial of access to key IT operations staff and facilities, including security, operations, and systems development personnel
- An unwillingness to add or revise disclosures in the financial statements to make them more complete and understandable
- An unwillingness to address identified deficiencies in internal control on a timely basis

Other circumstances, including the following:

- Unwillingness by management to permit the auditor to meet privately with those charged with governance
- Accounting policies that appear to be at variance with industry norms
- Frequent changes in accounting estimates that do not appear to result from changed circumstances
- Tolerance of violations of the entity's code of conduct

[Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

AU-C Section 250

Consideration of Laws and Regulations in an Audit of Financial Statements

Source: SAS No. 122; SAS No. 145.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility to consider laws and regulations in an audit of financial statements. This section does not apply to other assurance engagements in which the auditor is specifically engaged to test and report separately on compliance with specific laws or regulations.[1]

Effect of Laws and Regulations

.02 The effect on financial statements of laws and regulations varies considerably. Those laws and regulations to which an entity is subject constitute the legal and regulatory framework. The provisions of some laws or regulations have a direct effect on the financial statements in that they determine the reported amounts and disclosures in an entity's financial statements. Other laws or regulations are to be complied with by management, or set the provisions under which the entity is allowed to conduct its business, but do not have a direct effect on an entity's financial statements. Some entities operate in heavily regulated industries (such as banks and chemical companies). Others are subject only to the many laws and regulations that relate generally to the operating aspects of the business (such as those related to occupational safety and health and equal employment opportunity). Noncompliance with laws and regulations may result in fines, litigation, or other consequences for the entity that may have a material effect on the financial statements.

[1]Section 935, *Compliance Audits*, addresses compliance audits performed in accordance with generally accepted auditing standards, the standards for financial audits under *Government Auditing Standards*, and government audit requirements.

Responsibility for Compliance With Laws and Regulations (Ref: par. .A1–.A7)

Responsibility of Management

.03 It is the responsibility of management, with the oversight of those charged with governance, to ensure that the entity's operations are conducted in accordance with the provisions of laws and regulations, including compliance with the provisions of laws and regulations that determine the reported amounts and disclosures in an entity's financial statements.

Responsibility of the Auditor

.04 The requirements in this section are designed to assist the auditor in identifying material misstatement of the financial statements due to noncompliance with laws and regulations. However, the auditor is not responsible for preventing noncompliance and cannot be expected to detect noncompliance with all laws and regulations.

.05 The auditor is responsible for obtaining reasonable assurance that the financial statements as a whole are free from material misstatement, whether caused by fraud or error.[2] In conducting an audit of financial statements, the auditor takes into account the applicable legal and regulatory framework. Because of the inherent limitations of an audit, an unavoidable risk exists that some material misstatements in the financial statements may not be detected, even though the audit is properly planned and performed in accordance with generally accepted auditing standards (GAAS).[3] In the context of laws and regulations, the potential effects of inherent limitations on the auditor's ability to detect material misstatements are greater for the following reasons:

- Many laws and regulations relating principally to the operating aspects of an entity typically do not affect the financial statements and are not captured by the entity's information systems relevant to financial reporting.
- Noncompliance may involve conduct designed to conceal it, such as collusion, forgery, deliberate failure to record transactions, management override of controls, or intentional misrepresentations made to the auditor.
- Whether an act constitutes noncompliance is ultimately a matter for legal determination, such as by a court of law.

Ordinarily, the further removed noncompliance is from the events and transactions reflected in the financial statements, the less likely the auditor is to become aware of, or recognize, the noncompliance.

.06 This section distinguishes the auditor's responsibilities regarding compliance with the following two categories of laws and regulations:

---

[2]Paragraph .12 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

[3]Paragraph .A49 of section 200.

a. The provisions of those laws and regulations generally recognized to have a direct effect on the determination of material amounts and disclosures in the financial statements, such as tax and pension laws and regulations (see paragraph .13)

b. The provisions of other laws and regulations that do not have a direct effect on the determination of the amounts and disclosures in the financial statements but compliance with which may be

   i. fundamental to the operating aspects of the business,

   ii. fundamental to an entity's ability to continue its business, or

   iii. necessary for the entity to avoid material penalties

(for example, compliance with the terms of an operating license, regulatory solvency requirements, or environmental regulations); therefore, noncompliance with such laws and regulations may have a material effect on the financial statements (see paragraph .14).

.07 In this section, differing requirements are specified for each of the previously mentioned categories of laws and regulations. For the category referred to in paragraph .06*a*, the auditor's responsibility is to obtain sufficient appropriate audit evidence regarding material amounts and disclosures in the financial statements that are determined by the provisions of those laws and regulations. For the category referred to in paragraph .06*b*, the auditor's responsibility is limited to performing specified audit procedures that may identify noncompliance with those laws and regulations that may have a material effect on the financial statements.

.08 The auditor is required by this section to remain alert to the possibility that other audit procedures applied for the purpose of forming an opinion on financial statements may bring instances of identified or suspected noncompliance with laws and regulations to the auditor's attention. Maintaining professional skepticism throughout the audit, as required by section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*, is important in this context, given the extent of laws and regulations that affect the entity.[4]

Effective Date

.09 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objectives

.10 The objectives of the auditor are to

a. obtain sufficient appropriate audit evidence regarding material amounts and disclosures in the financial statements that are determined by the provisions of

[4]Paragraph .17 of section 200.

those laws and regulations generally recognized to have a direct effect on their determination (see paragraph .06*a*),

b. perform specified audit procedures that may identify instances of noncompliance with other laws and regulations that may have a material effect on the financial statements (see paragraph .06*b*), and

c. respond appropriately to noncompliance or suspected noncompliance with laws and regulations identified during the audit.

Definition

.11 For the purposes of this section, the following term has the meaning attributed as follows:

Noncompliance. Acts of omission or commission by the entity, either intentional or unintentional, which are contrary to the prevailing laws or regulations. Such acts include transactions entered into by, or in the name of, the entity or on its behalf by those charged with governance, management, or employees. Noncompliance does not include personal misconduct (unrelated to the business activities of the entity) by those charged with governance, management, or employees of the entity.

Requirements

The Auditor's Consideration of Compliance With Laws and Regulations

.12 As part of obtaining an understanding of the entity and its environment, in accordance with section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, the auditor should obtain a general understanding of the following:[5] (Ref: par. .A8)

a. The legal and regulatory framework applicable to the entity and the industry or sector in which the entity operates

b. How the entity is complying with that framework

.13 The auditor should obtain sufficient appropriate audit evidence regarding material amounts and disclosures in the financial statements that are determined by the provisions of those laws and regulations generally recognized to have a direct effect on their determination (see paragraph .06*a*). (Ref: par. .A9–.A11)

.14 The auditor should perform the following audit procedures that may identify instances of noncompliance with other laws and regulations that may have a material effect on the financial statements (see paragraph .06*b*): (Ref: par. .A12–.A15)

[5]Paragraph .12 of section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

a. Inquiring of management and, when appropriate, those charged with governance about whether the entity is in compliance with such laws and regulations

b. Inspecting correspondence, if any, with the relevant licensing or regulatory authorities (Ref: par. .A16)

.15 During the audit, the auditor should remain alert to the possibility that other audit procedures applied may bring instances of noncompliance or suspected noncompliance with laws and regulations to the auditor's attention. (Ref: par. .A17–.A18)

.16 In the absence of identified or suspected noncompliance, the auditor is not required to perform audit procedures regarding the entity's compliance with laws and regulations, other than those set out in paragraphs .12–.15 of this section and the requirement in section 580, *Written Representations*, related to requesting written representations from management regarding the entity's compliance with laws and regulations.[6]

Audit Procedures When Noncompliance Is Identified or Suspected

.17 If the auditor becomes aware of information concerning an instance of noncompliance or suspected noncompliance with laws and regulations, the auditor should obtain (Ref: par. .A19–.A20)

a. an understanding of the nature of the act and the circumstances in which it has occurred and

b. further information to evaluate the possible effect on the financial statements. (Ref: par. .A21)

.18 If the auditor suspects noncompliance may exist, the auditor should discuss the matter with management (at a level above those involved with the suspected noncompliance, if possible) and, when appropriate, those charged with governance. If management or, as appropriate, those charged with governance do not provide sufficient information that supports that the entity is in compliance with laws and regulations and, in the auditor's professional judgment, the effect of the suspected noncompliance may be material to the financial statements, the auditor should consider the need to obtain legal advice. (Ref: par. .A22–.A23)

.19 If sufficient information about suspected noncompliance cannot be obtained, the auditor should evaluate the effect of the lack of sufficient appropriate audit evidence on the auditor's opinion.

.20 The auditor should evaluate the implications of noncompliance in relation to other aspects of the audit, including the auditor's risk assessment and the reliability of written representations,[7] and take appropriate action. (Ref: par. .A24–.A25)

[6]Paragraph .13 of section 580, *Written Representations*.

[7]Paragraphs .22–.26 of section 580.

Reporting of Identified or Suspected Noncompliance

Reporting Noncompliance to Those Charged With Governance

.21 Unless all of those charged with governance are involved in management of the entity and aware of matters involving identified or suspected noncompliance already communicated by the auditor,[8] the auditor should communicate with those charged with governance matters involving noncompliance with laws and regulations that come to the auditor's attention during the course of the audit, other than when the matters are clearly inconsequential. (Ref: par. .A26)

.22 If, in the auditor's professional judgment, the noncompliance referred to in paragraph .21 is believed to be intentional and material, the auditor should communicate the matter to those charged with governance as soon as practicable.

.23 If the auditor suspects that management or those charged with governance are involved in noncompliance, the auditor should communicate the matter to the next higher level of authority at the entity, if it exists. When no higher authority exists, or if the auditor believes that the communication may not be acted upon or is unsure about the person to whom to report, the auditor should consider the need to obtain legal advice.

Reporting Noncompliance in the Auditor's Report on the Financial Statements

.24 If the auditor concludes that the noncompliance has a material effect on the financial statements, and it has not been adequately reflected in the financial statements, the auditor should, in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*, express a qualified or adverse opinion on the financial statements.[9] (Ref: par. .A27)

.25 If the auditor is precluded by management or those charged with governance from obtaining sufficient appropriate audit evidence to evaluate whether noncompliance that may be material to the financial statements has, or is likely to have, occurred, the auditor should express a qualified opinion or disclaim an opinion on the financial statements on the basis of a limitation on the scope of the audit, in accordance with section 705.[10] (Ref: par. .A27)

.26 If the auditor is unable to determine whether noncompliance has occurred because of limitations imposed by the circumstances rather than by management or those charged with governance, the auditor should evaluate the effect on the auditor's opinion, in accordance with section 705.[11]

---

[8]Paragraph .09 of section 260, *The Auditor's Communication With Those Charged With Governance*.

[9]Paragraphs .08–.09 of section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

[10][Footnote deleted, January 2012, to reflect conforming changes necessary due to the issuance of SAS No. 123.]

[11][Footnote deleted, January 2012, to reflect conforming changes necessary due to the issuance of SAS No. 123.]

Reporting Noncompliance to Regulatory and Enforcement Authorities

.27 If the auditor has identified or suspects noncompliance with laws and regulations, the auditor should determine whether the auditor has a responsibility to report the identified or suspected noncompliance to parties outside the entity. (Ref: par. .A28–.A29)

Documentation

.28 The auditor should include in the audit documentation a description of the identified or suspected noncompliance with laws and regulations and the results of discussion with management and, when applicable, those charged with governance and other parties inside or outside the entity.[12] (Ref: par. .A30)

Application and Other Explanatory Material

Responsibility for Compliance With Laws and Regulations (Ref: par. .03–.08)

Responsibility of Management

.A1 It is the responsibility of management, with the oversight of those charged with governance, to ensure that the entity's operations are conducted in accordance with laws and regulations. Laws and regulations may affect an entity's financial statements in different ways (for example, most directly, they may affect specific disclosures required of the entity in the financial statements, or they may prescribe the applicable financial reporting framework). They also may establish certain legal rights and obligations of the entity, some of which will be recognized in the entity's financial statements. In addition, laws and regulations may provide for the imposition of penalties in cases of noncompliance.

.A2 The following are examples of the types of policies and procedures an entity may implement to assist in the prevention and detection of noncompliance with laws and regulations:

- Monitoring legal requirements and ensuring that operating procedures are designed to meet these requirements
- Instituting and operating appropriate systems of internal control
- Developing, publicizing, and following a code of ethics or code of conduct
- Ensuring employees are properly trained and understand the code of ethics or code of conduct
- Monitoring compliance with the code of ethics or code of conduct and acting appropriately to discipline employees who fail to comply with it
- Engaging legal advisors to assist in monitoring legal requirements

[12] Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*.

- Maintaining a register of significant laws and regulations with which the entity has to comply within its particular industry and a record of complaints

In larger entities, these policies and procedures may be supplemented by assigning appropriate responsibilities to the following:

- An internal audit function
- An audit committee
- A legal function
- A compliance function

Responsibility of the Auditor

.A3 Because of the inherent limitations described in paragraph .05, an audit performed in accordance with GAAS provides no assurance that all noncompliance with laws and regulations will be detected or that any contingent liabilities that result will be disclosed.

.A4 Noncompliance by the entity with laws and regulations may result in a material misstatement of the financial statements. Detection of noncompliance, regardless of materiality, may affect other aspects of the audit, including, for example, the auditor's consideration of the integrity of management or employees. Noncompliance can result from fraudulent activity. Section 240, *Consideration of Fraud in a Financial Statement Audit*, addresses the auditor's responsibility if fraud or suspected fraud is detected.

.A5 Whether an act constitutes noncompliance with laws and regulations is a matter for legal determination, which ordinarily is beyond the auditor's professional competence to determine. Nevertheless, the auditor's training, experience, and understanding of the entity and its industry or sector may provide a basis to recognize that some acts coming to the auditor's attention may constitute noncompliance with laws and regulations.

.A6 In accordance with specific statutory requirements, the auditor may be specifically required to report, as part of the audit of the financial statements, on whether the entity complies with certain provisions of laws or regulations. In these circumstances, section 806, *Reporting on Compliance With Aspects of Contractual Agreements or Regulatory Requirements in Connection With Audited Financial Statements*, and section 935, *Compliance Audits*, set forth how these audit responsibilities are addressed in the auditor's report. Furthermore, when specific statutory reporting requirements exist, it may be necessary for the audit plan to include appropriate tests for compliance with these provisions of the laws and regulations.

Considerations Specific to Governmental Entities

.A7 Auditors of governmental entities may have additional responsibilities with respect to the consideration of laws and regulations, which relate to the audit of financial statements or may extend to other aspects of the entity's operations.[13]

The Auditor's Consideration of Compliance With Laws and Regulations

Obtaining an Understanding of the Legal and Regulatory Framework (Ref: par. .12)

.A8 To obtain a general understanding of the legal and regulatory framework and how the entity complies with that framework, the auditor may, for example

- use the auditor's existing understanding of the entity's industry and regulatory and other external factors;
- update the understanding of those laws and regulations that directly determine the reported amounts and disclosures in the financial statements;
- inquire of management about other laws or regulations that may be expected to have a fundamental effect on the operations of the entity;
- inquire of management concerning the entity's policies and procedures regarding compliance with laws and regulations (including the prevention of noncompliance), if appropriate;
- inquire of management regarding the policies or procedures adopted for identifying, evaluating, and accounting for litigation claims;
- inquire of management regarding the use of directives issued by the entity and periodic representations obtained by the entity from management at appropriate levels of authority concerning compliance with laws and regulations; and
- consider the auditor's knowledge of the entity's history of noncompliance with laws and regulations.

Laws and Regulations Generally Recognized to Have a Direct Effect on the Determination of Material Amounts and Disclosures in the Financial Statements (Ref: par. .13)

.A9 Certain laws and regulations are well established, known to the entity and within the entity's industry or sector, and relevant to the entity's financial statements (as described in paragraph .06*a*). These laws and regulations generally are directly relevant to the determination of material amounts and disclosures in the financial statements and readily evident to the auditor. They could include those that relate to, for example

- the form and content of financial statements (for example, statutorily-mandated requirements);
- industry-specific financial reporting issues;
- accounting for transactions under government contracts (for example, laws and regulations that may affect the amount of revenue to be accrued); or
- the accrual or recognition of expenses for income tax or pension costs.

---

[13]See section 935; *Government Auditing Standards*; and OMB Circular A-133, *Audits of States, Local Governments and Non-Profit Organizations*.

.A10 Some provisions in those laws and regulations may be directly relevant to specific assertions in the financial statements (for example, the completeness of income tax provisions), whereas others may be directly relevant to the financial statements as a whole. The auditor's responsibility regarding misstatements resulting from noncompliance with laws and regulations having a direct effect on the determination of material amounts and disclosures in the financial statements is the same as that for misstatements caused by fraud or error, as described in section 200.

.A11 Noncompliance with other provisions of such laws and regulations, and the laws and regulations described in paragraph .06*b*, may result in fines, litigation, or other consequences for the entity, the costs of which may need to be provided for or disclosed in the financial statements but are not considered to have a direct effect on the financial statements, as described in paragraph .06*a*.

Procedures to Identify Instances of Noncompliance—Other Laws and Regulations (Ref: par. .14)

.A12 Certain other laws and regulations may need particular attention by the auditor because they have a fundamental effect on the operations of the entity (as described in paragraph .06*b*. Noncompliance with laws and regulations that have a fundamental effect on the operations of the entity may cause the entity to cease operations or call into question the entity's continuance as a going concern. For example, noncompliance with the requirements of the entity's license or other entitlement to perform its operations could have such an impact (for example, for a bank, noncompliance with capital or investment requirements).

.A13 Many laws and regulations relating principally to the operating aspects of the entity do not directly affect the financial statements (their financial statement effect is indirect) and are not captured by the entity's information systems relevant to financial reporting. Their indirect effect may result from the need to disclose a contingent liability because of the allegation or determination of identified or suspected noncompliance. Those other laws or regulations may include those related to securities trading, occupational safety and health, food and drug administration, environmental protection, equal employment, and price-fixing or other antitrust violations. An auditor may not have a sufficient basis for recognizing possible noncompliance with such laws and regulations.

.A14 For the category referred to in paragraph .06*b*, the auditor's responsibility is limited to performing specified audit procedures (see paragraph .14) that may identify noncompliance with those laws and regulations that may have a material effect on the financial statements. Even when those procedures are performed, the auditor may not become aware of the existence of noncompliance unless there is evidence of noncompliance in the records, documents, or other information normally inspected in an audit of financial statements.

.A15 Because the financial reporting consequences of other laws and regulations can vary depending on the entity's operations, the audit procedures required by paragraph .14 are intended to bring to the auditor's attention instances of noncompliance with laws and regulations that may have a material effect on the financial statements.

.A16 In some cases, the amount of an entity's correspondence with licensing or regulatory authorities is voluminous. In exercising professional judgment in such circumstances, the auditor may consider the following in determining the extent of inspection that may identify instances of noncompliance:

- The nature of the entity
- The nature and type of correspondence

Noncompliance Brought to the Auditor's Attention by Other Audit Procedures (Ref: par. .15)

.A17 Audit procedures applied to form an opinion on the financial statements may bring instances of noncompliance or suspected noncompliance with laws and regulations to the auditor's attention. For example, such audit procedures may include the following:

- Reading minutes
- Inquiring of the entity's management and in-house or external legal counsel concerning litigation, claims, and assessments
- Performing substantive tests of details of classes of transactions, account balances, or disclosures

.A18 Because the effect of laws and regulations on financial statements can vary considerably, written representations, as required by section 580, provide necessary audit evidence about management's knowledge of identified or suspected noncompliance with laws and regulations, the effects of which may have a material effect on the financial statements. However, written representations do not provide sufficient appropriate audit evidence on their own and, accordingly, do not affect the nature and extent of other audit evidence that is to be obtained by the auditor.[14]

Audit Procedures When Noncompliance Is Identified or Suspected

Indications of Noncompliance With Laws and Regulations (Ref: par. .17)

.A19 If the auditor becomes aware of the existence of, or information about, the following matters, it may be an indication of noncompliance with laws and regulations:

- Investigations by regulatory organizations and government departments or payment of fines or penalties
- Payments for unspecified services or loans to consultants, related parties, employees, or government officials or government employees
- Sales commissions or agent's fees that appear excessive in relation to those ordinarily paid by the entity or in its industry or to the services actually received

[14] Paragraph .04 of section 580.

- Purchases made at prices significantly above or below market price
- Unusual payments in cash, purchases in the form of cashiers' checks payable to bearer, or transfers to numbered bank accounts
- Unusual transactions with companies registered in tax havens
- Payments for goods or services made other than to the country from which the goods or services originated
- Existence of an information system that fails, whether by design or accident, to provide an adequate audit trail or sufficient evidence
- Unauthorized transactions or improperly recorded transactions
- Adverse media comment
- Noncompliance with laws or regulations cited in reports of examinations by regulatory agencies that have been made available to the auditor
- Failure to file tax returns or pay government duties or similar fees that are common to the entity's industry or the nature of its business

Obtaining an Understanding of an Act of Identified or Suspected Noncompliance (Ref: par. .17)

.A20 Procedures an auditor may perform to address the requirements of paragraph .17 include the following:

- Examining supporting documents, such as invoices, cancelled checks, and agreements, and comparing with accounting records
- Confirming significant information concerning the matter with the other party to the transaction or intermediaries, such as banks or lawyers
- Determining whether the transaction has been properly authorized
- Considering whether other similar transactions or events may have occurred and applying procedures to identify them

Matters Relevant to the Auditor's Evaluation (Ref: par. .17b)

.A21 Matters relevant to the auditor's evaluation of the possible effect on the financial statements include the following:

- The quantitative effect of noncompliance. The potential financial consequences of noncompliance with laws and regulations on the financial statements may include the imposition of fines, penalties, or damages; the threat of expropriation of assets; enforced discontinuation of operations; and litigation.
- The qualitative materiality of the effect of noncompliance. For example, an illegal payment of an otherwise immaterial amount could be material if a reasonable

possibility exists that it could lead to a material contingent liability or a material loss of revenue.

- Whether the potential financial consequences require accrual or disclosure under the applicable financial reporting framework. For example, if material revenue or earnings are derived from transactions involving noncompliance, or if noncompliance creates significant risks associated with material revenue or earnings, such as loss of a significant business relationship, that information may require disclosure. Loss contingencies resulting from noncompliance that may require disclosure may be evaluated in the same manner as other loss contingencies under the applicable financial reporting framework.

- Whether the potential financial consequences are so serious as to call into question the fair presentation of the financial statements or otherwise make the financial statements misleading.

Audit Procedures (Ref: par. .18)

.A22 The auditor may discuss the findings with those charged with governance, in which case they may be able to provide additional audit evidence. For example, the auditor may confirm that those charged with governance have the same understanding of the facts and circumstances relevant to transactions or events that have led to the possibility of noncompliance with laws and regulations.

.A23 If management or, as appropriate, those charged with governance do not provide sufficient information to the auditor that the entity is in fact in compliance with laws and regulations, the auditor may consider it appropriate to consult with the entity's in-house legal counsel or external legal counsel about the application of the laws and regulations to the circumstances, including the possibility of fraud, and the possible effects on the financial statements. The auditor may request management to arrange for such consultation with the entity's legal counsel. If it is not considered appropriate to consult with the entity's legal counsel or if the auditor is not satisfied with the legal counsel's opinion, the auditor may consider it appropriate to consult the auditor's own legal counsel about whether a violation of a law or regulation is involved; the possible legal consequences, including the possibility of fraud; and what further action, if any, the auditor may take.

Evaluating the Implications of Noncompliance (Ref: par. .20)

.A24 As required by paragraph .20, the auditor evaluates the implications of noncompliance with regard to other aspects of the audit, including the auditor's risk assessment and the reliability of written representations. The implications of particular instances of noncompliance identified by the auditor will depend on the relationship of the perpetration and concealment, if any, of the act to specific controls and the level of management or employees involved, especially implications arising from the involvement of the highest authority within the entity. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A25 The auditor may consider whether withdrawal from the engagement, when withdrawal is possible under applicable law or regulation, is necessary when management or those charged with governance do not take the remedial action that the auditor considers appropriate in the circumstances, even when the noncompliance is not material to the financial statements. Factors that may affect the auditor's decision may include the implications of the failure to take remedial action, which may affect the auditor's ability to rely on management representations, and the effects of continuing association with the entity. When deciding whether withdrawal from the engagement is necessary, the auditor may consider seeking legal advice. If withdrawal from the engagement is not possible under applicable law or regulation, the auditor may consider alternative actions, including describing the noncompliance in an other-matter(s) paragraph in the auditor's report.[15]

Reporting of Identified or Suspected Noncompliance

Reporting Noncompliance to Those Charged With Governance (Ref: par. .21)

.A26 The communication of matters involving identified or suspected noncompliance may describe the act of identified or suspected noncompliance, the circumstances of its occurrence, and the effect on the financial statements. The auditor may reach agreement in advance with those charged with governance on the nature of matters that would be considered clearly inconsequential and, thus, need not be communicated.

Issuance of a Modified Opinion on the Financial Statements (Ref: par. .24–.25)

.A27 If management or those charged with governance refuse to accept a modified opinion on the financial statements for the circumstances described in paragraphs .24–.25, the auditor may withdraw from the engagement, when withdrawal is possible under applicable law or regulation, and indicate the reasons for withdrawal in writing to those charged with governance.

Reporting Noncompliance to Regulatory and Enforcement Authorities (Ref: par. .27)

.A28 The auditor's professional duty to maintain the confidentiality of client information may preclude reporting identified or suspected noncompliance with laws and regulations to a party outside the entity. However, the auditor's legal responsibilities vary by jurisdiction, and in certain circumstances, the duty of confidentiality may be overridden by statute, the law, or courts of law. In the following circumstances, a duty to notify parties outside the entity may exist:

- In response to inquiries from an auditor to a predecessor auditor, in accordance with the requirements of section 210A, *Terms of Engagement*[16]
- In response to a court order
- In compliance with requirements for the audits of entities that receive financial assistance from a government agency

---

[15]Paragraph .08 of section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report*.

[16]Paragraphs .11–.12 of section 210A, *Terms of Engagement*.

Because potential conflicts with the auditor's ethical and legal obligations for confidentiality may be complex, the auditor may consult with legal counsel before discussing noncompliance with parties outside the entity.

Considerations Specific to Governmental Entities

.A29 The auditor of a governmental entity may be required to report on compliance with laws, regulations, and provisions of contracts or grant agreements as part of the audit of the governmental entity's financial statements (for example, in an audit conducted in accordance with *Government Auditing Standards*). The auditor also may be required to communicate instances of noncompliance to appropriate oversight bodies and funding agencies.

Documentation (Ref: par. .28)

.A30 The auditor's documentation of findings regarding identified or suspected noncompliance with laws and regulations may include, for example

- copies of records or documents.
- minutes of discussions held with management, those charged with governance, or other parties inside or outside the entity.

AU-C Section 260

The Auditor's Communication With Those Charged With Governance

Source: SAS No. 122; SAS No. 123; SAS No. 125; SAS No. 128; SAS No. 134; SAS No. 135; SAS No. 137; SAS No. 143; SAS No. 145.

Effective for audits of financial statements for periods ending on or after December 15, 2012, unless otherwise indicated.

Note

In June 2022, the ASB issued SAS No. 146, *Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, which contains amendments to this section.

The amendments are effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025, and can be viewed in the appendix of section 220 until the effective date, when they will be applied to this section.

In March 2023, the ASB issued SAS No. 149, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors and Audits of Referred-to Auditors)*, which contains amendments to this section.

The amendments are effective for audits of financial statements for periods ending on or after December 15, 2026, and can be viewed in appendix C of section 600 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility to communicate with those charged with governance in an audit of financial statements. Although this section applies regardless of an entity's governance structure or size, particular considerations apply when all of those charged with governance are involved in managing an entity. This section does not establish requirements regarding the auditor's communication with an entity's management or owners unless they are also charged with a governance role.

.02 This section is written in the context of an audit of financial statements but may also be applied, adapted as necessary in the circumstances, to audits of other historical financial information when those charged with governance have a responsibility to oversee the preparation and fair presentation of the other historical financial information.

.03 Recognizing the importance of effective two-way communication in an audit of financial statements, this section provides an overarching framework for the auditor's communication with those charged with governance and identifies some specific matters to be communicated. Additional matters to be communicated are identified in other AU-C sections (see the exhibit, "Requirements to Communicate With Those Charged With Governance in Other AU-C Sections"). In addition, section 265, *Communicating Internal Control Related Matters Identified in an Audit*, establishes specific requirements regarding the communication of significant deficiencies and material weaknesses in internal control the auditor has identified during the audit to those charged with governance. Further matters not required by generally accepted auditing standards (GAAS) may be required to be communicated by agreement with those charged with governance or management or in accordance with law or regulation or other external requirements. Nothing in this section precludes the auditor from communicating any other matters to those charged with governance. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Effective Date

.04 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objectives

.05 The objectives of the auditor are to

a. communicate clearly with those charged with governance the responsibilities of the auditor regarding the financial statement audit and an overview of the planned scope and timing of the audit.

b. obtain from those charged with governance information relevant to the audit.

c. provide those charged with governance with timely observations arising from the audit that are significant and relevant to their responsibility to oversee the financial reporting process.

d. promote effective two-way communication between the auditor and those charged with governance. (Ref: par. .A1–.A5)

Definitions

.06 For purposes of GAAS, the following terms have the meanings attributed as follows:

Management. The person(s) with executive responsibility for the conduct of the entity's operations. For some entities, management includes some or all of those charged with governance; for example, executive members of a governance board or an owner-manager.

Those charged with governance. The person(s) or organization(s) (for example, a corporate trustee) with responsibility for overseeing the strategic direction of the entity and the obligations related to the accountability of the entity. This includes overseeing the financial reporting process. Those charged with governance may include management personnel; for example, executive members of a governance board or an owner-manager.

Requirements

Those Charged With Governance

.07 The auditor should determine the appropriate person(s) within the entity's governance structure with whom to communicate. (Ref: par. .A6–.A9)

Communication With the Audit Committee or Other Subgroup of Those Charged With Governance

.08 If the auditor communicates with a subgroup of those charged with governance, such as the audit committee or an individual, the auditor should determine whether the auditor also needs to communicate with the governing body. (Ref: par. .A10–.A12)

When All of Those Charged With Governance Are Involved in Managing the Entity

.09 In some cases, all of those charged with governance are involved in managing the entity; for example, a small business in which a single owner manages the entity and no one else has a governance role. In these cases, if matters required by this section are communicated with a person(s) with management responsibilities and that person(s) also has governance responsibilities, the matters need not be communicated again with the same person(s) in that person's governance role. These matters are noted in paragraph .14. The auditor should, nonetheless, be satisfied that communication with person(s) with management responsibilities adequately informs all of those with whom the auditor would otherwise communicate in their governance capacity.

Matters to Be Communicated

The Auditor's Responsibilities With Regard to the Financial Statement Audit

.10 The auditor should communicate with those charged with governance the auditor's responsibilities with regard to the financial statement audit, including that (Ref: par. .A13–.A18)

a. the auditor is responsible for forming and expressing an opinion about whether the financial statements that have been prepared by management, with the oversight of those charged with governance, are prepared, in all material respects, in accordance with the applicable financial reporting framework.

b. the audit of the financial statements does not relieve management or those charged with governance of their responsibilities.

Planned Scope and Timing of the Audit

.11 The auditor should communicate with those charged with governance an overview of the planned scope and timing of the audit, which includes communicating about the significant risks identified by the auditor. (Ref: par. .A19–.A24) [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Significant Findings or Issues From the Audit

.12 The auditor should communicate with those charged with governance (Ref: par. .A25–.A26)

a. the auditor's views about qualitative aspects of the entity's significant accounting practices, including accounting policies, accounting estimates, and financial statement disclosures. When applicable, the auditor should (Ref: par. .A27–.A29)

    i. explain to those charged with governance why the auditor considers a significant accounting practice that is acceptable under the applicable financial reporting framework not to be most appropriate to the particular circumstances of the entity and

    ii. determine that those charged with governance are informed about the process used by management in formulating particularly sensitive accounting estimates, including fair value estimates, and about the basis for the auditor's conclusions regarding the reasonableness of those estimates.

b. significant unusual transactions, if any. (Ref: par. .A30)

c. significant difficulties, if any, encountered during the audit. (Ref: par. .A31)

d. disagreements with management, if any. (Ref: par. .A32)

e. circumstances that affect the form and content of the auditor's report, if any. (Ref: par. .A33–.A34)

f. matters that are difficult or contentious for which the auditor consulted outside the engagement team and that are, in the auditor's professional judgment, significant and relevant to those charged with governance regarding their responsibility to oversee the financial reporting process.

g. other findings or issues, if any, arising during the audit that are, in the auditor's professional judgment, significant and relevant to those charged with governance regarding their responsibility to oversee the financial reporting process. (Ref: par. .A35–.A37)

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

Uncorrected Misstatements

.13 The auditor should communicate with those charged with governance (Ref: par. .A38–.A39)

a. uncorrected misstatements accumulated by the auditor and the effect that they, individually or in the aggregate, may have on the opinion in the auditor's report. The auditor's communication should identify material uncorrected misstatements individually. The auditor should request that uncorrected misstatements be corrected.

b. the effect of uncorrected misstatements related to prior periods on the relevant classes of transactions, account balances or disclosures, and the financial statements as a whole.

c. that uncorrected misstatements or matters underlying those uncorrected misstatements could potentially cause future-period financial statements to be materially misstated, even if the auditor has concluded that the uncorrected misstatements are immaterial to the financial statements under audit.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

When Not All of Those Charged With Governance Are Involved in Management

.14 Unless all of those charged with governance are involved in managing the entity, the auditor also should communicate

a. material, corrected misstatements that were brought to the attention of management as a result of audit procedures. (Ref: par. .A40)

b. significant findings or issues arising during the audit that were discussed, or were the subject of correspondence, with management. (Ref: par. .A41)

c. the auditor's views about significant matters that were the subject of management's consultations with other accountants on accounting or auditing matters when the auditor is aware that such consultation has occurred.

d. written representations the auditor is requesting. (Ref: par. .A42)

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

The Communication Process

Establishing the Communication Process

.15 The auditor should communicate with those charged with governance the form, timing, and expected general content of communications. (Ref: par. .A43–.A47)

Forms of Communication

.16 The auditor should communicate in writing with those charged with governance significant findings or issues from the audit (see paragraphs .12–.14) if, in the auditor's professional judgment, oral communication would not be adequate. This communication need not include matters that arose during the course of the audit that were communicated with those charged with governance and satisfactorily resolved. (Ref: par. .A48–.A50)

.17 If, as part of its communication to those charged with governance, management communicated some or all of the matters the auditor is required to communicate, and as a result, the auditor did not communicate these matters at the same level of detail as management, the auditor should communicate any omitted or inadequately described matters to those charged with governance. The auditor does not need to communicate them at the same level of detail as management, as long as the auditor (*a*) participated in management's discussion with those charged with governance, and (*b*) affirmatively confirmed to those charged with governance that management has adequately communicated these matters. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

Restricted Use

.18 When the auditor communicates matters in accordance with this section in writing, the communication is considered a by-product report.[1] Accordingly, the auditor should indicate in the communication that it is intended solely for the information and use of those charged with governance and, if appropriate, management, and is not intended to be, and should not be, used by anyone other than these specified parties. [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

Timing of Communications

.19 The auditor should communicate with those charged with governance on a timely basis. (Ref: par. .A51–.A52) [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

Adequacy of the Communication Process

.20 The auditor should evaluate whether the two-way communication between the auditor and those charged with governance has been adequate for the purpose of the audit. If it has not, the auditor should evaluate the effect, if any, on the auditor's assessment of the risks of material misstatement and ability to obtain sufficient appropriate audit evidence and should take appropriate action. (Ref: par. .A53–.A55) [Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

Documentation

.21 When matters required to be communicated by this section have been communicated orally, the auditor should include them in the audit documentation, including when and to

[1] Paragraphs .06*c* and .07 of section 905, *Alert That Restricts the Use of the Auditor's Written Communication*. [Footnote amended, effective for the auditor's written communications related to audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 125.]

whom they were communicated.[2] When matters have been communicated in writing, the auditor should retain a copy of the communication as part of the audit documentation. If, as part of its communication to those charged with governance, management communicated some or all of the matters the auditor is required to communicate, and as a result, the auditor did not communicate these matters at the same level of detail as management, the auditor should include a copy or summary of management's communications provided to those charged with governance in the audit documentation. (Ref: par. .A56) [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

Application and Other Explanatory Material

Objectives

The Role of Communication (Ref: par. .05)

.A1 This section focuses primarily on communications from the auditor to those charged with governance. Nevertheless, effective two-way communication is important in assisting

- the auditor and those charged with governance in understanding matters related to the audit in context and in developing a constructive working relationship. This relationship is developed while maintaining the auditor's independence and objectivity.
- the auditor in obtaining from those charged with governance information relevant to the audit. For example, those charged with governance may assist the auditor in understanding the entity and its environment, in identifying appropriate sources of audit evidence, and in providing information about specific transactions or events.
- those charged with governance in fulfilling their responsibility to oversee the financial reporting process, thereby reducing the risks of material misstatement of the financial statements.

.A2 Although the auditor is responsible for communicating specific matters in accordance with this section, management also has a responsibility to communicate matters of governance interest to those charged with governance. Communication by the auditor does not relieve management of this responsibility. Similarly, management's communication of these matters to those charged with governance does not relieve the auditor of the responsibility to also communicate them. However, communication of these matters by management may affect the form or timing of the auditor's communication.

.A3 Clear communication of specific matters required to be communicated by GAAS is an integral part of every audit. However, GAAS do not require the auditor to perform procedures specifically to identify other significant matters to communicate with those charged with governance.

---

[2]Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*.

Legal or Regulatory Restrictions on Communicating With Those Charged With Governance (Ref: par. .05)

.A4 Law or regulation may restrict the auditor's communication of certain matters with those charged with governance. For example, law or regulation may specifically prohibit a communication or other action that might prejudice an investigation by an appropriate authority into an actual, or suspected, illegal act. In some circumstances, potential conflicts between the auditor's obligations of confidentiality and obligations to communicate may be complex. In such cases, the auditor may consider obtaining legal advice.

.A5 In certain circumstances, the auditor may be required to report to a regulatory or enforcement body certain matters that have been communicated with those charged with governance. For example, *Government Auditing Standards* requires auditors to report fraud, illegal acts, violations of provisions of contracts or grant agreements, and abuse directly to such parties in certain circumstances.

Those Charged With Governance (Ref: par. .07)

.A6 Governance structures vary by entity, reflecting influences such as size and ownership characteristics. For example:

- In some entities, those charged with governance hold positions (for example, company directors) that are integral parts of the entity's legal structure. For other entities, a body that is not part of the entity is charged with governance, as with some government agencies.
- In some cases, some or all of those charged with governance also have management responsibilities. In others, those charged with governance and management are different people.
- Parties charged with governance of governmental entities may include members or staff of a legislative oversight committee, oversight bodies, or other parties contracting for the audit.

.A7 In most entities, governance is the collective responsibility of a governing body, such as a board of directors; a supervisory board; partners; proprietors; a committee of management; trustees; or equivalent persons. In some smaller entities, however, one person may be charged with governance, such as the owner-manager, when there are no other owners, or a sole trustee. When governance is a collective responsibility, a subgroup, such as an audit committee or even an individual, may be charged with specific tasks to assist the governing body in meeting its responsibilities.

.A8 Such diversity means that it is not possible for this section to specify for all audits the person(s) with whom the auditor is to communicate particular matters. Also, in some cases, the appropriate person(s) with whom to communicate may not be clearly identifiable from the engagement circumstances. An example of this is entities in which the governance structures are not formally defined, such as some family-owned entities, some not-for-profit organizations, and some government entities. When the appropriate person(s) with whom to communicate is not clearly identifiable, the auditor and the engaging party may need to discuss and agree on the relevant person(s) within the entity's governance structure with whom the auditor will communicate. In deciding with whom to communicate, the auditor's understanding of an entity's governance structure and processes obtained in accordance with section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, is relevant. The appropriate person(s) with whom to communicate may vary depending on the matter to be communicated.

.A9 Section 600A, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*, includes specific matters to be communicated by group auditors with those charged with governance.[3] When the entity being audited is a component of a group, the appropriate person(s) with whom to communicate is dependent on the nature of the matter to be communicated and the terms of the engagement.

Communication With the Audit Committee or Other Subgroup of Those Charged With Governance (Ref: par. .08)

.A10 When considering communicating with a subgroup of those charged with governance, the auditor may take into account matters such as

- the respective responsibilities of the subgroup and the governing body.
- the nature of the matter to be communicated.
- relevant legal or regulatory requirements.
- whether the subgroup (*a*) has the authority to take action regarding the information communicated and (*b*) can provide further information and explanations the auditor may need.
- whether the auditor is aware of potential conflicts of interest between the subgroup and other members of the governing body.

.A11 When deciding whether there is also a need to communicate information, in full or in summary form, with the governing body, the auditor may be influenced by the auditor's assessment of how effectively and appropriately the subgroup communicates relevant information with the governing body. The auditor may make explicit in the terms of the engagement that the auditor retains the right to communicate directly with the governing body.

.A12 Audit committees (or similar subgroups with different names) exist in many entities. Although the specific authority and functions of audit committees may differ, communication with the audit committee, when one exists, is a key element in the auditor's communication with those charged with governance. Good governance principles suggest that

[3] Paragraphs .46–.49 of section 600A, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*.

- the auditor has access to the audit committee as necessary.
- the chair of the audit committee and, when relevant, the other members of the audit committee meet with the auditor periodically.
- the audit committee meets with the auditor without management present at least annually, unless prohibited by law or regulation.

Matters to Be Communicated

The Auditor's Responsibilities With Regard to the Financial Statement Audit (Ref: par. .10)

.A13 The auditor's responsibilities with regard to the financial statement audit are often included in the engagement letter or other suitable form of written agreement that documents the terms of the engagement. Law, regulation, or the governance structure of the entity may require those charged with governance to agree upon the terms of the engagement with the auditor. When this is not the case, providing those charged with governance with a copy of that engagement letter or other suitable form of written agreement may be an appropriate way to communicate with them regarding matters such as the following:

- That the auditor is responsible for performing the audit in accordance with GAAS, which are directed toward the expression of an opinion on the financial statements. The matters that GAAS require to be communicated, therefore, include significant matters arising during the audit of the financial statements that are relevant to those charged with governance in overseeing the financial reporting process.
- The fact that GAAS do not require the auditor to design procedures for the purpose of identifying other matters to communicate with those charged with governance.
- That, when section 701, *Communicating Key Audit Matters in the Independent Auditor's Report*, applies, the auditor is responsible for determining and communicating key audit matters in the auditor's report.
- That, when applicable, the auditor is also responsible for communicating particular matters required by law or regulation, by agreement with the entity, or by additional requirements applicable to the engagement.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Auditor Independence (Ref: par. .10)

.A14 GAAS require independence for all audits. Relevant matters to consider in reaching a conclusion about independence include circumstances or relationships that create threats to auditor independence and the related safeguards that have been applied to eliminate those threats or reduce them to an acceptable level. Comprehensive material on threats to independence and safeguards, including application to specific situations, is set forth in the AICPA's "Conceptual Framework for Independence" (ET sec. 1.210.010). [Revised, January

2015, to reflect conforming changes necessary due to the issuance of the revised AICPA Code of Professional Conduct, effective December 15, 2014.]

.A15 Although the auditor's report affirms the auditor's independence, in certain situations, the auditor may determine that it is appropriate to communicate with those charged with governance circumstances or relationships (for example, financial interests, business or family relationships, or nonaudit services provided or expected to be provided) that, in the auditor's professional judgment, may reasonably be thought to bear on independence, and to which the auditor gave significant consideration, in reaching the conclusion that independence has not been impaired.

.A16 It may be particularly appropriate to communicate with those charged with governance those circumstances or relationships discussed in paragraph .A15 in audits of public interest entities. In addition to entities subject to Securities and Exchange Commission reporting requirements, all of the entities described in the definition of public interest entities in ET section 0.400, *Definitions*, are considered to be public interest entities. [Revised, January 2015, to reflect conforming changes necessary due to the issuance of the revised AICPA Code of Professional Conduct, effective December 15, 2014.]

.A17 Relevant ethical requirements may also specify particular communications to those charged with governance in circumstances in which breaches of independence requirements have been identified. For example, the AICPA Code of Professional Conduct requires the auditor to communicate with those charged with governance in writing about any breach and the action the firm has taken or proposes to take.[4] [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

.A18 The form and timing of communications regarding independence may be affected by the entity's governance structure and whether a formal subgroup, such as an audit committee, exists. In situations in which all of those charged with governance are involved in managing the entity, the auditor may determine that those charged with governance have been informed of relevant facts regarding the auditor's independence through their management activities or through other means, such as the engagement letter. This is particularly likely when the entity is owner-managed and the auditor's firm has little involvement with the entity beyond a financial statement audit. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Planned Scope and Timing of the Audit (Ref: par. .11)

.A19 Communication regarding the planned scope and timing of the audit may assist

- those charged with governance to discuss issues of risk and materiality with the auditor;

[4] The "Breach of an Independence Interpretation" interpretation (ET sec. 1.298.010), under the "Independence Rule" (ET sec. 1.200.001) of the AICPA Code of Professional Conduct, addresses breaches of independence. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

- those charged with governance to understand better the consequences of the auditor's work and to identify any areas in which they may request the auditor to undertake additional procedures; and
- the auditor to understand better the entity and its environment.

[Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A20 Communicating significant risks identified by the auditor helps those charged with governance understand those matters and why they were determined to be significant risks. The communication about significant risks may assist those charged with governance in fulfilling their responsibility to oversee the financial reporting process. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A21 Other matters regarding the planned scope and timing of the audit may include the following:

- How the auditor plans to address the significant risks of material misstatement, whether due to fraud or error
- How the auditor plans to address areas of higher assessed risks of material misstatement.
- The auditor's approach to the system of internal control, including, when applicable, whether the auditor will express an opinion on the effectiveness of internal control over financial reporting.
- The application of materiality in the context of an audit, as discussed in section 320, *Materiality in Planning and Performing an Audit*. The auditor may wish to focus more broadly on the factors considered by the auditor when determining materiality for purposes of the audit, rather than on specific thresholds or amounts.
- The nature and extent of specialized skills or knowledge needed to perform the planned audit procedures or evaluate the audit results, including the use of an auditor's expert.[5]
- When section 701 applies, the auditor's preliminary views about matters that may be areas of significant auditor attention in the audit and that therefore may be key audit matters.
- The auditor's planned approach to addressing the implications for the individual statements and the disclosures of any significant changes within the applicable financial reporting framework or in the entity's environment, financial condition, or activities.

[5]See section 620, *Using the Work of an Auditor's Specialist*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

- If the entity has an internal audit function, how the auditor and the internal auditors can work together in a constructive and complementary manner, including any planned use of the work of the internal audit function in obtaining audit evidence and the nature and extent of any planned use of internal auditors to provide direct assistance.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2014, by SAS No. 128. Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A22 Other planning matters that may be appropriate to discuss with those charged with governance include

- the views of those charged with governance about the following matters:
  - — The appropriate person(s) in the entity's governance structure with whom to communicate
  - — The allocation of responsibilities between those charged with governance and management
  - — The entity's objectives and strategies and the related business risks that may result in material misstatements
  - — Matters those charged with governance consider as warranting particular attention during the audit and any areas for which they request additional procedures to be undertaken
  - — Significant communications between the entity and regulators
  - — Other matters those charged with governance believe are relevant to the audit of the financial statements
- the attitudes, awareness, and actions of those charged with governance concerning
  - — the entity's internal control and its importance in the entity, including how those charged with governance oversee the effectiveness of internal control, and
  - — the detection or the possibility of fraud.
- the actions of those charged with governance in response to developments in law, accounting standards, corporate governance practices, and other related matters, and the effect of such developments on, for example, the overall presentation, structure, and content of the financial statements, including the following:
  - — The relevance, reliability, comparability, and understandability of the information presented in the financial statements

  - — Whether all required information has been included in the financial statements, and whether such information has been appropriately classified, aggregated or disaggregated, and presented

- the actions of those charged with governance in response to previous communications with the auditor.
- if applicable, the document or documents that comprise the annual report and the planned manner and timing of the issuance of such documents in accordance with paragraph .13 of section 720, *The Auditor's Responsibilities Relating to Other Information Included in Annual Reports*. When the auditor expects to obtain other information after the date of the auditor's report, the discussions with those charged with governance may also include the actions that may be appropriate or necessary if the auditor concludes that a material misstatement of the other information exists.

[Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 137.]

.A23 Although communication with those charged with governance may assist the auditor to plan the scope and timing of the audit, it does not change the auditor's sole responsibility to establish the overall audit strategy and the audit plan, including the nature, timing, and extent of procedures necessary to obtain sufficient appropriate audit evidence. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A24 Care is necessary when communicating with those charged with governance about the planned scope and timing of the audit so as not to compromise the effectiveness of the audit, particularly when some or all of those charged with governance are involved in managing the entity. For example, communicating the nature and timing of detailed audit procedures may reduce the effectiveness of those procedures by making them too predictable. Certain factors described in paragraph .A48 may be relevant in determining the nature and extent of this communication. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Significant Findings From the Audit (Ref: par. .12)

.A25 The communication of significant findings from the audit may include requesting further information from those charged with governance in order to complete the audit evidence obtained. For example, the auditor may confirm that those charged with governance have the same understanding of the facts and circumstances relevant to specific transactions or events. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A26 When section 701 applies, the communications with those charged with governance required by paragraph .12, as well as the communication about the significant risks identified by the auditor required by paragraph .11, are particularly relevant to the auditor's determination of matters that required significant auditor attention and that therefore may be key audit matters.[6] [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Qualitative Aspects of the Entity's Significant Accounting Practices (Ref: par. .12a)

.A27 Financial reporting frameworks ordinarily allow for the entity to make accounting estimates and judgments about accounting policies and financial statement disclosures, for example, the use of assumptions in the development of accounting estimates. In addition, law, regulation, or financial reporting frameworks may require disclosure of a summary of significant accounting policies or make reference to "critical accounting estimates" or "critical accounting policies and practices" to identify and provide additional information to users about the most difficult, subjective, or complex judgments made by management in preparing the financial statements. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 143.]

.A28 As a result, the auditor's views on the subjective aspects of the financial statements may be particularly relevant to those charged with governance in discharging their responsibilities for oversight of the financial reporting process. For example, in relation to the matters described in paragraph .A27, those charged with governance may be interested in the auditor's views on the degree to which complexity, subjectivity, or other inherent risk factors affect the selection or application of the methods, assumptions, and data used in making a significant accounting estimate, as well as the auditor's evaluation of whether management's point estimate and related disclosures in the financial statements are reasonable in the context of the applicable financial reporting framework. Open and constructive communication about qualitative aspects of the entity's significant accounting practices may also include comment on the acceptability of significant accounting practices and the quality of the disclosures. When applicable, this may include whether a significant accounting practice of the entity relating to accounting estimates is considered by the auditor to not be the most appropriate to the particular circumstances of the entity, for example, when an alternative acceptable method for making an accounting estimate would, in the auditor's judgment, be more appropriate. The appendix, "Qualitative Aspects of Accounting Practices," identifies matters that may be included in this communication. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 143.]

.A29 Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ markedly from management's current judgments. In communicating with those charged with governance about the process used by management in formulating particularly sensitive accounting estimates, including fair value estimates, and about the basis for the

---

[6] Paragraphs .08–.09 of section 701, *Communicating Key Audit Matters in the Independent Auditor's Report*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

auditor's conclusions regarding the reasonableness of those estimates, the auditor may consider communicating

- the nature of significant assumptions,
- the degree of subjectivity involved in the development of the assumptions, and
- the relative materiality of the items being measured to the financial statements as a whole.

[Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Significant Unusual Transactions (Ref. par. .12b)

.A30 The communication of significant unusual transactions may include

- the auditor’s views on the policies and practices management used to account for significant unusual transactions; and
- the auditor's understanding of the business purpose for significant unusual transactions.

[Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

Significant Difficulties Encountered During the Audit (Ref: par. .12c)

.A31 Significant difficulties encountered during the audit may include matters such as

- significant delays by management, the unavailability of entity personnel, or an unwillingness by management to provide information necessary to perform the auditor’s procedures.
- an unreasonably brief time within which to complete the audit.
- extensive unexpected effort required to obtain sufficient appropriate audit evidence.
- the unavailability of expected information.
- restrictions imposed on the auditor by management.
- management’s unwillingness to perform or extend its evaluation of the entity’s ability to continue as a going concern to meet the period of time required by the applicable financial reporting framework when requested.

In some circumstances, such difficulties may constitute a scope limitation that leads to a modification of the auditor’s opinion. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. Paragraph subsequently renumbered by the issuance of SAS No. 135, May 2019.]

Disagreements With Management (Ref: par. .12d)

.A32 Discussions with those charged with governance include any disagreements with management that arose during the audit, regardless of whether they were satisfactorily resolved, about matters that, individually or in the aggregate, could be significant to the entity's financial statements or the auditor's report. Disagreements with management may occasionally arise over, among other things, the application of accounting principles to the entity's specific transactions and events and the basis for management's judgments about accounting estimates. Disagreements may also arise regarding the scope of the audit, disclosures to be included in the entity's financial statements, and the wording of the auditor's report. For purposes of this section, disagreements do not include differences of opinion based on incomplete facts or preliminary information that are later resolved. [Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 135, May 2019.]

Circumstances That Affect the Form and Content of the Auditor's Report (Ref: par. .12e)

.A33 Section 210A, *Terms of Engagement*, requires the auditor to agree upon the terms of the audit engagement with management or those charged with governance, as appropriate.[7] The agreed terms of the audit engagement are required to be recorded in an audit engagement letter or other suitable form of written agreement and include, among other things, reference to the expected form and content of the auditor's report.[8] As explained in paragraph .A13, if the terms of engagement are not agreed upon with those charged with governance, the auditor may provide those charged with governance with a copy of the engagement letter in order to communicate about matters relevant to the audit. The communication required by paragraph .12*e* is intended to inform those charged with governance about circumstances in which the auditor's report may differ from its expected form and content or may include additional information about the audit that was performed. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

.A34 Circumstances in which the auditor is required or may otherwise consider it necessary to include additional information in the auditor's report in accordance with GAAS, and for which communication with those charged with governance is required, include the following:

- The auditor expects to modify the opinion in the auditor's report in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*.[9]

---

[7]Paragraph .09 of section 210A, *Terms of Engagement*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

[8]Paragraph .10 of section 210A. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

[9]Paragraph .31 of section 705, *Modifications to the Opinion in the Independent Auditor's Report*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

- A "Going Concern" section is included in the auditor's report in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.[10]
- Key audit matters are communicated in accordance with section 701.[11]
- The auditor considers it necessary to include an emphasis-of-matter paragraph or other-matter paragraph in accordance with section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report*,[12] or is required to do so by other AU-C sections.

In such circumstances, the auditor may consider it useful to provide those charged with governance with a draft of the auditor's report to facilitate a discussion of how such matters will be addressed in the auditor's report. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

Other Findings or Issues

.A35 The auditor may become aware that the entity is subject to an audit requirement that is not encompassed in the terms of the engagement. The communication to those charged with governance that an audit conducted in accordance with GAAS may not satisfy the relevant legal, regulatory, or contractual requirements may be necessary if, for example, an entity engages an auditor to perform an audit of its financial statements in accordance with GAAS and the auditor becomes aware that by law, regulation, or contractual agreement the entity also is required to have an audit performed in accordance with one or more of the following:

a. *Government Auditing Standards*

b. Title 2 U.S. Code of Federal Regulations Part 200, *Uniform Administration Requirements, Cost Principles, Audit Requirements for Federal Awards*

c. Other compliance audit requirements, such as state or local laws or program-specific audits under federal audit guides

[Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. Paragraph subsequently renumbered by the issuance of SAS No. 135, May 2019.]

---

[10]Paragraphs .24 and .28 of section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

[11]Paragraph .16 of section 701. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

[12]Paragraph .12 of section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Other Significant Matters Relevant to the Financial Reporting Process (Ref: par. .12g)

.A36 Section 300, *Planning an Audit*,[13] notes that, as a result of unexpected events, changes in conditions, or the audit evidence obtained from the results of audit procedures, the auditor may need to modify the overall audit strategy and audit plan and, thereby, the resulting planned nature, timing, and extent of further audit procedures, based on the revised consideration of assessed risks. The auditor may communicate with those charged with governance about such matters as, for example, an update to initial discussions about the planned scope and timing of the audit. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

.A37 To the extent not already addressed by the requirements in paragraph .12*a–f* and related application material, the auditor may consider communicating about other matters discussed with, or considered by, the engagement quality control reviewer, if one has been appointed, in accordance with section 220A, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*.[14] [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. Paragraph renumbered by the issuance of SAS No. 135, May 2019.]

Uncorrected Misstatements (Ref: par. .13)

.A38 The auditor is not required to accumulate misstatements that the auditor believes are trivial.[15] When there are a large number of individually immaterial uncorrected misstatements, the auditor may communicate the number and overall monetary effect of the uncorrected misstatements, rather than the details of each individual uncorrected misstatement. [Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 135, May 2019.]

.A39 The auditor may discuss with those charged with governance the reasons for, and the implications of, a failure to correct misstatements, taking into account the size and nature of the misstatement judged in the surrounding circumstances, and possible implications with regard to future financial statements. [Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 135, May 2019.]

Corrected Misstatements (Ref: par. .14a)

.A40 The auditor also may communicate corrected immaterial misstatements, such as frequently recurring immaterial misstatements that may indicate a particular bias in the preparation of the financial statements. [Paragraph renumbered by the issuance of SAS No.

---

[13]Paragraph .A15 of section 300, *Planning an Audit*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

[14]Paragraphs .21–.22 of section 220A, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 135, May 2019.]

*Significant Findings or Issues Discussed or Subject to Correspondence With Management (Ref: par. .14*b*)*

.A41 Significant findings or issues discussed, or the subject of correspondence, with management may include matters such as

- significant events or transactions that occurred during the year.
- business conditions affecting the entity and business plans and strategies that may affect the risks of material misstatement.
- discussions or correspondence in connection with the initial or recurring engagement of the auditor including, among other matters, any discussions or correspondence regarding accounting practices or the application of auditing standards.

[Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. Paragraph subsequently renumbered by the issuance of SAS No. 135, May 2019.]

Written Representations (Ref: par. .14d)

.A42 The auditor may provide those charged with governance with a copy of management's written representations. [Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 135, May 2019.]

The Communication Process

Establishing the Communication Process (Ref: par. .15)

.A43 Clear communication of the following helps establish the basis for effective two-way communication:

- The auditor's responsibilities (paragraphs .10 and .A13–.A17)
- An overview of the planned scope and timing of the audit (paragraphs .11 and .A18–.A22)
- The expected general content of communications

[Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 135, May 2019.]

.A44 Matters that may also contribute to effective two-way communication include discussion of

- the purpose of communications. When the purpose is clear, the auditor and those charged with governance are in a better position to have a mutual understanding of relevant issues and the expected actions arising from the communication process.
- the form in which communications will be made.
- the person(s) on the audit team and among those charged with governance who will communicate regarding particular matters.
- the auditor's expectation that communication will be two-way and that those charged with governance will communicate with the auditor matters they consider relevant to the audit. Such matters might include (*a*) strategic decisions that may significantly affect the nature, timing, and extent of audit procedures; (*b*) the suspicion or the detection of fraud; or (*c*) concerns with the integrity or competence of senior management.
- the process for taking action and reporting back on matters communicated by the auditor.
- the process for taking action and reporting back on matters communicated by those charged with governance.

[Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 135, May 2019.]

.A45 The communication process will vary with the circumstances, including the size and governance structure of the entity, how those charged with governance operate, and the auditor's view of the significance of matters to be communicated. Difficulty in establishing effective two-way communication may indicate that the communication between the auditor and those charged with governance is not adequate for the purpose of the audit (see paragraph .A53). [Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 135, May 2019.]

Communication With Management

.A46 Many matters may be discussed with management in the ordinary course of an audit, including matters to be communicated with those charged with governance in accordance with this section. Such discussions recognize management's executive responsibility for the conduct of the entity's operations and, in particular, management's responsibility for the preparation and fair presentation of the financial statements. [Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 135, May 2019.]

.A47 Before communicating matters with those charged with governance, the auditor may discuss them with management unless that is inappropriate. For example, it may not be appropriate to discuss with management questions of management's competence or integrity. In addition to recognizing management's responsibility, these initial discussions may clarify facts and issues and give management an opportunity to provide further information and explanations. Similarly, when the entity has an internal audit function, the auditor may discuss matters with appropriate individuals within the function before communicating with those charged with governance. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2014, by SAS No. 128. Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 135, May 2019.]

Forms of Communication (Ref: par. .16)

.A48 Effective communication may involve formal presentations and written reports as well as less formal communications, including discussions. The auditor may communicate matters other than those identified in paragraph .16 either orally or in writing. Written communications may include an engagement letter that is provided to those charged with governance. [Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 135, May 2019.]

.A49 In addition to the significance of a particular matter, the form of communication (for example, whether to communicate orally or in writing, the extent of detail or summarization in the communication, and whether to communicate in a formal or informal manner) may be affected by factors such as

- whether a discussion of the matter will be included in the auditor's report. (For example, when key audit matters are communicated in the auditor's report, the auditor may consider it necessary to communicate in writing about the matters determined to be key audit matters.)
- whether the matter has been satisfactorily resolved.
- whether management has previously communicated the matter.
- the size, operating structure, control environment, and legal structure of the entity being audited.
- in the case of an audit of special purpose financial statements, whether the auditor also audits the entity's general purpose financial statements.
- legal or regulatory requirements that may require a written communication with those charged with governance.
- the expectations of those charged with governance, including arrangements made for periodic meetings or communications with the auditor.
- the amount of ongoing contact and dialogue the auditor has with those charged with governance.
- whether there have been significant changes in the membership of a governing body.

[Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. Paragraph subsequently renumbered by the issuance of SAS No. 135, May 2019.]

.A50 When a significant matter is discussed with an individual member of those charged with governance, such as the chair of an audit committee, it may be appropriate for the auditor to summarize the matter in later communications so that all of those charged with governance have full and balanced information. [Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 135, May 2019.]

Timing of Communications (Ref: par. .19)

.A51 Timely communication throughout the audit contributes to the achievement of robust two-way dialogue between those charged with governance and the auditor. However, the appropriate timing for communications will vary with the circumstances of the engagement. Considerations include the significance and nature of the matter, the importance of the matter to those charged with governance, and the action expected to be taken by those charged with governance. The following are examples of the timing of communications for certain matters:

- Communications regarding planning matters may often be made early in the audit engagement and, for an initial engagement, as part of the terms of the engagement.
- It may be appropriate to communicate significant difficulties encountered during the audit as soon as practicable if those charged with governance are able to assist the auditor in overcoming the difficulties or if the difficulties are likely to lead to a modified opinion.
- Communications regarding independence may be appropriate whenever significant judgments are made about threats to independence and related safeguards.
- When section 701 applies, the auditor may communicate preliminary views about key audit matters when discussing the planned scope and timing of the audit (see paragraph .A21); the auditor may also have more frequent communications to further discuss such matters when communicating about significant audit findings.

The following are examples of matters for which communication with those charged with governance may be important prior to issuance of the auditor's report:

- Uncorrected misstatements accumulated by the auditor and the effect that they may have, individually or in the aggregate, on the opinion in the auditor's report, including possible implications with respect to future financial statements
- Circumstances or relationships to which the auditor gave significant consideration relating to independence in reaching the conclusion that independence has not been impaired
- Significant findings or issues from the audit, including the auditor's views about the qualitative aspects of the entity's accounting practices
- An expectation by the auditor that the opinion in the auditor's report will be modified in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*[16]
- When section 701 applies, the matters planned to be included in the auditor's report

[Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. Paragraph subsequently renumbered by the issuance of SAS No. 135, May 2019.]

.A52 Other factors that may be relevant to the timing of communications include

- the size, operating structure, control environment, and legal structure of the entity being audited.
- any legal obligation to communicate certain matters within a specified timeframe.
- the expectations of those charged with governance, including arrangements made for periodic meetings or communications with the auditor.
- the time at which the auditor identifies certain matters (for example, timely communication of a material weakness to enable appropriate remedial action to be taken).
- whether the auditor is auditing both general purpose and special purpose financial statements.

[Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 135, May 2019.]

Adequacy of the Communication Process (Ref: par. .20)

.A53 The auditor need not design specific procedures to support the evaluation of the two-way communication between the auditor and those charged with governance. Rather, that evaluation may be based on observations resulting from audit procedures performed for other purposes. Such observations may include

- the appropriateness and timeliness of actions taken by those charged with governance in response to matters communicated by the auditor. When significant findings or issues raised in previous communications have not been dealt with effectively, it may be appropriate for the auditor to inquire about why appropriate action has not been taken and to consider raising the point again. This avoids the risk of giving an impression that the auditor is satisfied that the matter has been adequately addressed or is no longer significant.
- the apparent openness of those charged with governance in their communications with the auditor.
- the willingness and capacity of those charged with governance to meet with the auditor without management present.

[16] Paragraph .31 of section 705, *Modifications to the Opinion in the Independent Auditor's Report*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

- the apparent ability of those charged with governance to fully comprehend matters raised by the auditor, such as the extent to which those charged with governance probe issues and question recommendations made to them.
- difficulty in establishing with those charged with governance a mutual understanding of the form, timing, and expected general content of communications.
- when all or some of those charged with governance are involved in managing the entity, their apparent awareness of how matters discussed with the auditor affect their broader governance responsibilities as well as their management responsibilities.

[Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 135, May 2019.]

.A54 As discussed in paragraph .A1, effective two-way communication assists both the auditor and those charged with governance. Further, section 315A identifies participation by those charged with governance, including their interaction with the internal audit function (if any) and external auditors, as an element of the entity's control environment. Inadequate two-way communication may indicate an unsatisfactory control environment, which will influence the auditor's assessment of the risks of material misstatements. There is also a risk that the auditor may not have obtained sufficient appropriate audit evidence to form an opinion on the financial statements. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2014, by SAS No. 128. Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 135, May 2019.]

.A55 If the two-way communication between the auditor and those charged with governance is not adequate and the situation cannot be resolved, the auditor may take actions such as the following:

- Modifying the auditor's opinion on the basis of a scope limitation
- Obtaining legal advice about the consequences of different courses of action
- Communicating with third parties (for example, a regulator) or a higher authority in the governance structure that is outside the entity, such as the owners of a business (for example, shareholders in a general meeting), or the responsible government agency for certain governmental entities
- Withdrawing from the engagement when withdrawal is possible under applicable law or regulation

[Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 135, May 2019.]

Documentation (Ref: par. .21)

.A56 Documentation of oral communication may include a copy of minutes prepared by the entity as part of the audit documentation if those minutes are an appropriate record of the communication. [Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 135, May 2019.]

Appendix — Qualitative Aspects of Accounting Practices

.A57 The communication required by paragraph .12*a* and discussed in paragraphs .A27–.A29 may include such matters as the following:

Accounting Policies

- The appropriateness of the accounting policies to the particular circumstances of the entity, considering the need to balance the cost of providing information with the likely benefit to users of the entity's financial statements (when acceptable alternative accounting policies exist, the communication may include identification of the financial statement items that are affected by the choice of significant policies as well as information on accounting policies used by similar entities)
- The initial selection of, and changes in, significant accounting policies, including the application of new accounting pronouncements (the communication may include the effect of the timing and method of adoption of a change in accounting policy on the current and future earnings of the entity, and the timing of a change in accounting policies with regard to expected new accounting pronouncements)
- The effect of significant accounting policies in controversial or emerging areas (or those unique to an industry, particularly when there is a lack of authoritative material or consensus)
- The effect of the timing of transactions in relation to the period in which they are recorded

Accounting Estimates and Related Disclosures

- Appendix B, "Communications With Those Charged With Governance," of section 540, Auditing Accounting Estimates and Related Disclosures, includes matters that the auditor may consider communicating with respect to significant qualitative aspects of the entity's accounting practices related to accounting estimates and related disclosures.

Financial Statement Disclosures

- The issues involved, and related judgments made, in formulating particularly sensitive financial statement disclosures (for example, disclosures related to revenue recognition, going concern, subsequent events, and contingency issues)
- The overall neutrality, consistency, and clarity of the disclosures in the financial statements

Related Matters

- The potential effect on the financial statements of significant risks and exposures and uncertainties, such as pending litigation, that are disclosed in the financial statements

- The extent to which the financial statements are affected by unusual transactions, including nonrecurring amounts recognized during the period, and the extent to which such transactions are separately disclosed in the financial statements
- The factors affecting asset and liability carrying values, including the entity's bases for determining useful lives assigned to tangible and intangible assets (the communication may explain how factors affecting carrying values were selected and how alternative selections would have affected the financial statements
- The selective correction of misstatements (for example, correcting misstatements with the effect of increasing reported earnings, but not those that have the effect of decreasing reported earnings)

[Paragraph renumbered by the issuance of SAS No. 134, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 135, May 2019. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 143.]

Exhibit — Requirements to Communicate With Those Charged With Governance in Other AU-C Sections

.A58 Requirements for the auditor to communicate with those charged with governance are included in other AU-C sections. This section does not change the requirements in

a. paragraph .17 of section 210A, *Terms of Engagement*

b. paragraphs .21, .38*c*i, and .39–.41 of section 240, *Consideration of Fraud in a Financial Statement Audit*

c. paragraphs .14, .18, and .21–.23 of section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*

d. paragraph .11 of section 265, *Communicating Internal Control Related Matters Identified in an Audit*

e. paragraph .27 of section 550, *Related Parties*

f. paragraphs .10*b*–*c*, .12*a*, .15*a*, .17*a*, and .18 of section 560, *Subsequent Events and Subsequently Discovered Facts*

g. paragraph .37 of section 540, *Auditing Accounting Estimates and Related Disclosures*

h. paragraph .28 of section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*

i. paragraphs .46–.49 of section 600A, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*

j. paragraph .28 of section 610, *Using the Work of Internal Auditors*

k. paragraph .16 of section 701, *Communicating Key Audit Matters in the Independent Auditor's Report*

l. paragraphs .12, .14, .24, and .31 of section 705, *Modifications to the Opinion in the Independent Auditor's Report*

m. paragraph .12 of section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report*

n. paragraphs .15, .20*b*, and .21*a* of section 720, *The Auditor's Responsibilities Relating to Other Information Included in Annual Reports*

o. paragraph .06 of section 730, *Required Supplementary Information*

p. paragraphs .23–.28 of section 930, *Interim Financial Information*

q. paragraphs .36–.37 of section 935, *Compliance Audits*

[Revised, September 2012, to reflect conforming changes necessary due to the issuance of SAS No. 126. Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. Paragraph subsequently renumbered by the issuance of SAS No. 135, May 2019. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 137. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 143.]

AU-C Section 265

Communicating Internal Control Related Matters Identified in an Audit

Source: SAS No. 122; SAS No. 125; SAS No. 128; SAS No. 130; SAS No. 135; SAS No. 145.

See section 9265 for interpretations of this section.

Effective for audits of financial statements for periods ending on or after December 15, 2012, unless otherwise indicated.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility to appropriately communicate to those charged with governance and management deficiencies in internal control that the auditor has identified in an audit of financial statements. This section does not impose additional responsibilities on the auditor regarding obtaining an understanding of internal control or designing and performing tests of controls over and above the requirements of SAS No. 145, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, and section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*. Section 260, *The Auditor's Communication With Those Charged With Governance*, establishes further requirements and provides guidance regarding the auditor's responsibility to communicate with those charged with governance regarding the audit. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.02 The auditor is required to obtain an understanding of the entity's system of internal control when identifying and assessing the risks of material misstatement.[1] In making those risk assessments, the auditor considers the entity's system of internal control in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of internal control. The auditor may identify deficiencies in internal control (commonly referred to as control deficiencies) not only during this risk assessment process but also at any other stage of the audit. This section specifies which identified deficiencies the auditor is required to communicate to those charged with governance and management. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

---

[1]Paragraphs 21–22 and 24–26 of SAS No. 145, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.03 Nothing in this section precludes the auditor from communicating to those charged with governance or management other internal control matters that the auditor has identified during the audit.

.04 This section is not applicable if the auditor is engaged to perform an audit of internal control over financial reporting that is integrated with an audit of financial statements. In such circumstances, section 940, *An Audit of Internal Control Over Financial Reporting That Is Integrated With an Audit of Its Financial Statements*, applies. [As amended, effective for audits for periods ending on or after December 15, 2016, by SAS No. 130. Revised, December 2016, to reflect conforming changes necessary to reflect the issuance of SAS No. 130.]

Effective Date

.05 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objective

.06 The objective of the auditor is to appropriately communicate to those charged with governance and management deficiencies in internal control that the auditor has identified during the audit and that, in the auditor's professional judgment, are of sufficient importance to merit their respective attentions.

Definitions

.07 For purposes of generally accepted auditing standards, the following terms have the meanings attributed as follows:

Deficiency in internal control. A deficiency in internal control over financial reporting exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A deficiency in *design* exists when (*a*) a control necessary to meet the control objective is missing, or (*b*) an existing control is not properly designed so that, even if the control operates as designed, the control objective would not be met. A deficiency in *operation* exists when a properly designed control does not operate as designed or when the person performing the control does not possess the necessary authority or competence to perform the control effectively. (Ref: par. .A1)

Material weakness. A deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. A reasonable possibility exists when the likelihood of an event occurring is either reasonably possible or probable as defined as follows:

> **Reasonably possible.** The chance of the future event or events occurring is more than remote but less than likely.

Probable. The future event or events are likely to occur.

Significant deficiency. A deficiency, or a combination of deficiencies, in internal control over financial reporting that is less severe than a material weakness yet important enough to merit attention by those charged with governance.

[As amended, effective for audits for periods ending on or after December 15, 2016, by SAS No. 130. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Requirements

Determination of Whether Deficiencies in Internal Control Have Been Identified

.08 The auditor should determine whether, on the basis of the audit work performed, the auditor has identified one or more deficiencies in internal control. (Ref: par. .A2–.A5)

Evaluating Identified Deficiencies in Internal Control (Ref: par. .A6–.A15)

.09 If the auditor has identified one or more deficiencies in internal control, the auditor should evaluate each deficiency to determine, on the basis of the audit work performed, whether, individually or in combination, they constitute significant deficiencies or material weaknesses.

.10 If the auditor initially determines that a deficiency, or a combination of deficiencies, in internal control is not a material weakness, the auditor should consider whether prudent officials, having knowledge of the same facts and circumstances, would likely reach the same conclusion. [As amended, effective for audits for periods ending on or after December 15, 2016, by SAS No. 130.]

Communication of Deficiencies in Internal Control

.11 The auditor should communicate in writing to those charged with governance on a timely basis significant deficiencies and material weaknesses identified during the audit, including those that were remediated during the audit. (Ref: par. .A16–.A21 and .A29)

.12 The auditor also should communicate to management at an appropriate level of responsibility, on a timely basis (Ref: par. .A22 and .A29)

a. in writing, significant deficiencies and material weaknesses that the auditor has communicated or intends to communicate to those charged with governance, unless it would be inappropriate to communicate directly to management in the circumstances. (Ref: par. .A17 and .A23–.A24)

b. in writing or orally, other deficiencies in internal control identified during the audit that have not been communicated to management by other parties and that, in the auditor's professional judgment, are of sufficient importance to merit management's attention. If other deficiencies in internal control are communicated orally, the auditor should document the communication. (Ref: par. .A25–.A28)

.13 The communications referred to in paragraphs .11–.12 should be made no later than 60 days following the report release date. (Ref: par. .A17–.A18)

.14 The auditor should include in the auditor's written communication of significant deficiencies and material weaknesses (Ref: par. .A30–.A34)

a. the definition of the term *material weakness* and, when relevant, the definition of the term *significant deficiency*.

b. a description of the significant deficiencies and material weaknesses and an explanation of their potential effects. (Ref: par. .A30)

c. sufficient information to enable those charged with governance and management to understand the context of the communication. In particular, the auditor should include in the communication the following elements that explain that (Ref: par. .A31–.A32)

   i. the purpose of the audit was for the auditor to express an opinion on the financial statements.

   ii. the audit included consideration of internal control over financial reporting in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of internal control.

   iii. the auditor is not expressing an opinion on the effectiveness of internal control.

   iv. the auditor's consideration of internal control was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies, and therefore, material weaknesses or significant deficiencies may exist that were not identified.

d. an appropriate alert, in accordance with section 905, *Alert That Restricts the Use of the Auditor's Written Communication*.[2] (Ref: par. .A33)

[As amended, effective for the auditor's written communications related to audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 125.]

.15 When the auditor issues a written communication stating that no material weaknesses were identified during the audit, the communication should include the matters in paragraph .14*a* and *c*–*d*. (Ref: par. .A35–.A37)

[2]Paragraphs .06*c*, .07, and .11 of section 905, *Alert That Restricts the Use of the Auditor's Written Communication*. [Footnote added, effective for the auditor's written communications related to audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 125.]

.16 The auditor should not issue a written communication stating that no significant deficiencies were identified during the audit. (Ref: par. .A35)

Application and Other Explanatory Material

Determination of Whether Deficiencies in Internal Control Have Been Identified (Ref: par. .08)

.A1 SAS No. 145 defines the term *system of internal control* and recognizes that internal control frameworks may use different terms that are similar to the concept of the system of internal control. This section defines the term *deficiency in internal control* in the context of a system of internal control over financial reporting to more clearly define the auditor's communication responsibilities in this section. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A2 In determining whether the auditor has identified one or more deficiencies in internal control, the auditor may discuss the relevant facts and circumstances of the auditor's findings with the appropriate level of management. This discussion provides an opportunity for the auditor to alert management on a timely basis to the existence of deficiencies of which management may not have been previously aware. The level of management with whom it is appropriate to discuss the findings is one that is familiar with the internal control area concerned and that has the authority to take remedial action on any identified deficiencies in internal control. In some circumstances, it may not be appropriate for the auditor to discuss the auditor's findings directly with management (for example, if the findings appear to call management's integrity or competence into question [see paragraph .A23]). [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A3 In discussing the facts and circumstances of the auditor's findings with management, the auditor may obtain other relevant information for further consideration, such as

- management's understanding of the actual or suspected causes of the deficiencies.
- exceptions arising from the deficiencies that management may have noted (for example, misstatements that were not prevented by the relevant IT controls).
- a preliminary indication from management of its response to the findings.

[Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

Considerations Specific to Smaller, Less Complex Entities

.A4 Although the concepts underlying controls in the control activities component in smaller entities are likely to be similar to those in larger entities, the formality with which controls operate will vary. Further, smaller entities may find that certain types of controls are not necessary because of controls applied by management. For example, management's sole authority for granting credit to customers and approving significant purchases can provide effective control over important account balances and transactions, lessening or removing the need for more detailed controls. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A5 Also, smaller entities often have fewer employees, which may limit the extent to which segregation of duties is practicable. However, in a small owner-managed entity, the owner-manager may be able to exercise more effective oversight than in a larger entity. On the other hand, such increased management oversight also may increase the risk of management override of controls. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

Evaluating Identified Deficiencies in Internal Control (Ref: par. .09–.10)

.A6 The severity of a deficiency, or a combination of deficiencies, in internal control depends not only on whether a misstatement has actually occurred but also on

- the magnitude of the potential misstatement resulting from the deficiency or deficiencies and
- whether there is a reasonable possibility that the entity's controls will fail to prevent, or detect and correct, a misstatement of an account balance or disclosure.

Significant deficiencies and material weaknesses may exist even though the auditor has not identified misstatements during the audit. [As amended, effective for audits for periods ending on or after December 15, 2016, by SAS No. 130. Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A7 Factors that affect the magnitude of a misstatement that might result from a deficiency, or deficiencies, in internal control include, but are not limited to, the following:

- The financial statement amounts or total of transactions exposed to the deficiency
- The volume of activity (in the current period or expected in future periods) in the class of transactions or account balance exposed to the deficiency

[As amended, effective for audits for periods ending on or after December 15, 2016, by SAS No. 130. Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A8 In evaluating the magnitude of the potential misstatement, the maximum amount by which an account balance or total of transactions can be overstated generally is the recorded amount, whereas understatements could be larger. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A9 Risk factors affect whether there is a reasonable possibility that a deficiency, or a combination of deficiencies, in internal control will result in a misstatement of an account balance or disclosure. The factors include, but are not limited to, the following:

- The nature of the financial statement classes of transactions, account balances, disclosures, and assertions involved

- The cause and frequency of the exceptions detected as a result of the deficiency, or deficiencies, in internal control
- The susceptibility of the related asset or liability to loss or fraud
- The subjectivity, complexity, or extent of judgment required to determine the amount involved
- The interaction or relationship of the control(s) with other controls
- The interaction with other deficiencies in internal control
- The possible future consequences of the deficiency, or deficiencies, in internal control
- The importance of the controls, such as the following, to the financial reporting process:
  - — General monitoring controls (such as oversight of management)
  - — Controls over the prevention and detection of fraud
  - — Controls over the selection and application of significant accounting policies
  - — Controls over significant transactions with related parties
  - — Controls over significant unusual transactions
  - — Controls over the period-end financial reporting process (such as controls over nonrecurring journal entries)

[As amended, effective for audits for periods ending on or after December 15, 2016, by SAS No. 130. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135. Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A10 The evaluation of whether a deficiency in internal control presents a reasonable possibility of misstatement may be made without quantifying the probability of occurrence as a specific percentage or range. Also, in many cases, the probability of a small misstatement will be greater than the probability of a large misstatement. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A11 Controls may be designed to operate individually, or in combination, to effectively prevent, or detect and correct, misstatements.[3] For example, controls over accounts receivable may consist of both automated and manual controls designed to operate together to prevent, or detect and correct, misstatements in the account balance. A deficiency in internal control on its own may not be sufficiently important to constitute a significant deficiency or a material weakness. However, a combination of deficiencies affecting the same class of transactions, account balance, or disclosure, assertion, or component of the entity's system of internal control may increase the risks of misstatement to such an extent to give rise to a significant deficiency or material weakness. [As amended, effective for audits for

[3]Paragraph .A68 of section 315A. [Footnote renumbered by the issuance of SAS No. 125, December 2011.]

periods ending on or after December 15, 2016, by SAS No. 130. Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A12 Indicators of material weaknesses in internal control include

- identification of fraud, whether or not material, on the part of senior management. For the purpose of this indicator, the term "senior management" includes the principal executive and financial officers as well as any other members of senior management who play a significant role in the entity's financial reporting process;
- restatement of previously issued financial statements to reflect the correction of a material misstatement due to fraud or error;
- identification by the auditor of a material misstatement of the financial statements under audit in circumstances that indicate that the misstatement would not have been detected and corrected by the entity's internal control; and
- ineffective oversight of the entity's financial reporting and internal control by those charged with governance.

[As amended, effective for audits for periods ending on or after December 15, 2016, by SAS No. 130. Paragraph renumbered by the issuance of SAS No. 145, October 2021.]]

Considerations Specific to Governmental Entities

.A13 Law or regulation may require the auditor to communicate to those charged with governance or other relevant parties (such as regulators) deficiencies in internal control that the auditor has identified during the audit using specific terms and definitions that differ from those in this section. In such circumstances, the auditor uses such terms and definitions when communicating deficiencies in internal control in accordance with the requirements of the law or regulation and in accordance with this section. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A14 When law or regulation requires the auditor to communicate deficiencies in internal control that the auditor has identified during the audit using specific terms, but such terms have not been defined, the auditor may use the definitions, requirements, and guidance in this section to comply with the law or regulation. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A15 The requirements of this section remain applicable, notwithstanding that law or regulation may require the auditor to use specific terms or definitions. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

Communication of Deficiencies in Internal Control (Ref: par. .11–.16)

Communication of Significant Deficiencies and Material Weaknesses to Those Charged With Governance (Ref: par. .11)

.A16 Communicating significant deficiencies and material weaknesses in writing to those charged with governance reflects the importance of these matters and assists those charged with governance in fulfilling their oversight responsibilities. Section 260 establishes relevant considerations regarding communication with those charged with governance when all of them are involved in managing the entity.[4] [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A17 Although the auditor is required by paragraph .13 to make the communications referred to in paragraphs .11–.12 no later than 60 days following the report release date, the communication is best made by the report release date because receipt of such communication may be an important factor in enabling those charged with governance to discharge their oversight responsibilities. Nevertheless, because the auditor's written communication of significant deficiencies and material weaknesses forms part of the final audit file, the written communication is subject to the overriding requirement for the auditor to complete the assembly of the final audit file on a timely basis, no later than 60 days following the report release date.[5] [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A18 Early communication to those charged with governance or management may be important for some matters because of their relative significance and the urgency for corrective follow-up action. Regardless of the timing of the written communication of significant deficiencies and material weaknesses, the auditor may communicate these orally in the first instance to management and, when appropriate, those charged with governance to assist them in taking timely remedial action to minimize the risks of material misstatement. However, oral communication does not relieve the auditor of the responsibility to communicate the significant deficiencies and material weaknesses in writing, as this section requires. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A19 The level of detail at which to communicate significant deficiencies and material weaknesses is a matter of the auditor's professional judgment in the circumstances. Factors that the auditor may consider in determining an appropriate level of detail for the communication include, for example, the following:

- The nature of the entity. For example, the communication required for a governmental entity may be different from that for a nongovernmental entity.
- The size and complexity of the entity. For example, the communication required for a complex entity may be different from that for an entity operating a simple business.
- The nature of significant deficiencies and material weaknesses that the auditor has identified.
- The entity's governance composition. For example, more detail may be needed if those charged with governance include members who do not have significant experience in the entity's industry or in the affected areas.

[4]Paragraph .09 of section 260, *The Auditor's Communication With Those Charged With Governance*. [Footnote renumbered by the issuance of SAS No. 125, December 2011.]

[5]Paragraph .16 of section 230, *Audit Documentation*. [Footnote renumbered by the issuance of SAS No. 125, December 2011.]

- Legal or regulatory requirements regarding the communication of specific types of deficiencies in internal control.

[Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A20 Management and those charged with governance may already be aware of significant deficiencies and material weaknesses that the auditor has identified during the audit and may have chosen not to remedy them because of cost or other considerations. The responsibility for evaluating the costs and benefits of implementing remedial action rests with management and those charged with governance. Accordingly, the requirements to communicate significant deficiencies and material weaknesses in paragraphs .11–.12 apply, regardless of cost or other considerations that management and those charged with governance may consider relevant in determining whether to remedy such deficiencies. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A21 The fact that the auditor communicated a significant deficiency or material weakness to those charged with governance and management in a previous audit does not eliminate the need for the auditor to repeat the communication if remedial action has not yet been taken. If a previously communicated significant deficiency or material weakness remains, the current year's communication may repeat the description from the previous communication or simply reference the previous communication and the date of that communication. The auditor may ask management or, when appropriate, those charged with governance why the significant deficiency or material weakness has not yet been remedied. A failure to act, in the absence of a rational explanation, may in itself represent a significant deficiency or material weakness. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

Communication of Deficiencies in Internal Control to Management (Ref: par. .12)

.A22 Ordinarily, the appropriate level of management is the one that has responsibility and authority to evaluate the deficiencies in internal control and to take the necessary remedial action. For significant deficiencies and material weaknesses, the appropriate level is likely to be the CEO or CFO (or equivalent) because these matters also are required to be communicated to those charged with governance. For other deficiencies in internal control, the appropriate level may be operational management with more direct involvement in the control areas affected and with the authority to take appropriate remedial action. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

Communication of Significant Deficiencies and Material Weaknesses in Internal Control to Management (Ref: par. .12a)

.A23 Certain identified significant deficiencies or material weaknesses in internal control may call into question the integrity or competence of management. For example, there may be evidence of fraud or intentional noncompliance with laws and regulations by management or management may exhibit an inability to oversee the preparation of adequate financial statements, which may raise doubt about management's competence. Accordingly, it may not be appropriate to communicate such deficiencies directly to management. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A24 Section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*, establishes requirements and provides guidance on the reporting of identified or suspected noncompliance with laws and regulations, including when those charged with governance are themselves involved in such noncompliance.[6] Section 240, *Consideration of Fraud in a Financial Statement Audit*, establishes requirements and provides guidance regarding communication to those charged with governance when the auditor has identified fraud or suspected fraud involving management.[7]

[Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

Communication of Other Deficiencies in Internal Control to Management (Ref: par. .12b)

.A25 During the audit, the auditor may identify other deficiencies in internal control that are not significant deficiencies or material weaknesses but that may be of sufficient importance to merit management's attention. The determination regarding which other deficiencies in internal control merit management's attention is a matter of the auditor's professional judgment in the circumstances, taking into account the likelihood and potential magnitude of misstatements that may arise in the financial statements as a result of those deficiencies. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A26 The communication of other deficiencies in internal control that merit management's attention need not be in writing. When the auditor has discussed the facts and circumstances of the auditor's findings with management, the auditor may consider an oral communication of the other deficiencies to have been made to management at the time of these discussions. Accordingly, a formal communication need not be made subsequently. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A27 If the auditor has communicated deficiencies in internal control, other than significant deficiencies or material weaknesses, to management in a prior period and management has chosen not to remedy them for cost or other reasons, the auditor need not repeat the communication in the current period. The auditor also is not required to repeat information about such deficiencies if the information has been previously communicated to management by other parties, such as the internal audit function or regulators. However, the auditor may consider it appropriate to recommunicate these other deficiencies if there has been a change of management or if new information has come to the auditor's attention that alters the prior understanding of the auditor and management regarding the deficiencies. Nevertheless, the failure of management to remedy other deficiencies in internal control that were previously communicated may become a significant deficiency requiring communication with those charged with governance. Whether this is the case depends on the auditor's professional judgment in the circumstances. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2014, by SAS No. 128. Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

---

[6] Paragraphs .21–.27 of section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*. [Footnote renumbered by the issuance of SAS No. 125, December 2011.]

[7] Paragraph .40 of section 240, *Consideration of Fraud in a Financial Statement Audit*. [Footnote renumbered by the issuance of SAS No. 125, December 2011.]

.A28 In some circumstances, those charged with governance may wish to be made aware of the details of other deficiencies in internal control that the auditor has communicated to management or be briefly informed of the nature of the other deficiencies. Alternatively, the auditor may inform those charged with governance when a communication of other deficiencies has been made to management. In either case, the auditor may communicate orally or in writing to those charged with governance, as appropriate. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

Considerations Specific to Governmental Entities (Ref: par. .11–.12)

.A29 Auditors performing audits of governmental entities may have additional responsibilities to communicate deficiencies in internal control that the auditor identified during the audit, in a different format, at a level of detail or to parties not envisioned in this section. For example, significant deficiencies and material weaknesses may have to be communicated to a governmental authority, and such communications may be required to be made publicly available. Law or regulation also may require auditors to report deficiencies in internal control, irrespective of their severity. Further, law or regulation may require auditors to report on broader internal control-related matters (for example, controls related to compliance with law, regulation, or provisions of contracts or grant agreements).[8]

[Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

Content of Written Communication of Significant Deficiencies and Material Weaknesses in Internal Control (Ref: par. .14–.16)

.A30 In explaining the potential effects of the significant deficiencies and material weaknesses, the auditor need not quantify those effects. The potential effects may be described in terms of the control objectives and types of errors the control was designed to prevent, or detect and correct, or in terms of the risk(s) of misstatement that the control was designed to address. The potential effects may be evident from the description of the significant deficiencies or material weaknesses. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A31 The significant deficiencies or material weaknesses may be grouped together for reporting purposes when it is appropriate to do so. The auditor also may include in the written communication suggestions for remedial action on the deficiencies, management's actual or proposed responses, and a statement about whether the auditor has undertaken any steps to verify whether management's responses have been implemented (see paragraph .A34). [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A32 The auditor may consider it appropriate to include the following information as additional context for the communication:

- The general inherent limitations of internal control, including the possibility of management override of controls

---

[8] See section 935, *Compliance Audits*. [Footnote renumbered by the issuance of SAS No. 125, December 2011.]

- The specific nature and extent of the auditor's consideration of internal control during the audit

[Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

Restriction on Use (Ref: par. .14d)

.A33 In certain cases not involving *Government Auditing Standards*, law or regulation may require the auditor or management to furnish a copy of the auditor's written communication on significant deficiencies and material weaknesses to governmental authorities. When this is the case, the auditor's written communication may identify such governmental authorities in the paragraph containing the alert that restricts the use of the auditor's written communication. Section 905 does not permit the auditor to add parties, other than those identified in paragraph .07*b* of that section.[9] [As amended, effective for the auditor's written communications related to audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 125. Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

Management's Written Response

.A34 Management may wish to or may be required by a regulator to prepare a written response to the auditor's communication regarding significant deficiencies or material weaknesses identified during the audit. Such management communications may include a description of corrective actions taken by the entity, the entity's plans to implement new controls, or a statement indicating that management believes the cost of correcting a significant deficiency or material weakness would exceed the benefits to be derived from doing so. If such a written response is included in a document containing the auditor's written communication to management and those charged with governance concerning identified significant deficiencies or material weaknesses, the auditor may add a paragraph to the written communication disclaiming an opinion on such information. The following is an example of such a paragraph:

> ABC Company's written response to the significant deficiencies [*and material weaknesses*] identified in our audit was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

[Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

No Material Weakness Communications (Ref: par. .15–.16)

.A35 Management or those charged with governance may request a written communication indicating that no material weaknesses were identified during the audit. A written communication indicating that no material weaknesses were identified during the audit does not provide any assurance about the effectiveness of an entity's internal

[9] Paragraph .08 of section 905. [Footnote added, effective for the auditor's written communications related to audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 125.]

control over financial reporting. However, an auditor is not precluded from issuing such a communication, provided that the communication includes the matters required by paragraph .15. However, a written communication indicating that no significant deficiencies were identified during the audit is precluded by paragraph .16 because such a communication has the potential to be misunderstood or misused. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A36 Exhibit B, "Illustrative No Material Weakness Communication," includes an illustrative communication indicating that no material weaknesses were identified during the audit. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

Considerations Specific to Governmental Entities

.A37 A written communication indicating that no material weaknesses were identified during the audit may be required to be furnished to governmental authorities. As described in paragraph .A33, the auditor's written communication may identify the governmental authority as a specified party in the restricted use paragraph. The auditor is not permitted to add other parties as specified parties. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

Appendix — Examples of Circumstances That May Be Deficiencies, Significant Deficiencies, or Material Weaknesses

.A38 Paragraph .A12 identifies indicators of material weaknesses in internal control. The following are examples of circumstances that may be deficiencies, significant deficiencies, or material weaknesses.

Deficiencies in the Design of Controls

The following are examples of circumstances that may be deficiencies, significant deficiencies, or material weaknesses related to the design of controls:

- Inadequate design of controls over the preparation of the financial statements being audited.
- Inadequate design of controls over a significant account or process.
- Inadequate documentation of the components of internal control.
- Insufficient control consciousness within the organization (for example, the tone at the top and the control environment).
- Evidence of ineffective aspects of the control environment, such as indications that significant transactions in which management is financially interested are not being appropriately scrutinized by those charged with governance.
- Evidence of an ineffective entity risk assessment process, such as management's failure to identify a risk of material misstatement that the auditor would expect the entity's risk assessment process to have identified.
- Evidence of an ineffective response to identified significant risks (for example, absence of controls over such a risk).
- Absent or inadequate segregation of duties within a significant account or process.
- Absent or inadequate controls over the safeguarding of assets (this applies to controls that the auditor determines would be necessary for effective internal control over financial reporting).
- Inadequate design of IT general and application controls that prevents the information system from providing complete and accurate information consistent with financial reporting objectives and current needs.
- Employees or management who lack the qualifications and training to fulfill their assigned functions. For example, in an entity that prepares financial statements in accordance with generally accepted accounting principles (GAAP), the person responsible for the accounting and reporting function lacks the skills and knowledge to apply GAAP in recording the entity's financial transactions or preparing its financial statements.

- Inadequate design of monitoring controls used to assess the design and operating effectiveness of the entity's internal control over time.
- Absence of an internal process to report deficiencies in internal control to management on a timely basis.
- Absence of a risk assessment process within the entity when such a process would ordinarily be expected to have been established.

Failures in the Operation of Controls

The following are examples of circumstances that may be deficiencies, significant deficiencies, or material weaknesses related to the operation of controls:

- Failure in the operation of effectively designed controls over a significant account or process (for example, the failure of a control such as dual authorization for significant disbursements within the purchasing process).
- Failure of the information and communication component of internal control to provide complete and accurate output because of deficiencies in timeliness, completeness, or accuracy (for example, the failure to obtain timely and accurate consolidating information from remote locations that is needed to prepare the financial statements).
- Failure of controls designed to safeguard assets from loss, damage, or misappropriation. This circumstance may need careful consideration before it is evaluated as a significant deficiency or material weakness. For example, assume that a company uses security devices to safeguard its inventory (preventive controls) and also performs timely periodic physical inventory counts (detective control) with regard to its financial reporting. Although the physical inventory count does not safeguard the inventory from theft or loss, it prevents a material misstatement of the financial statements if performed effectively and timely. Therefore, given that the definitions of *material weakness* and *significant deficiency* relate to the likelihood of misstatement of the financial statements, the failure of a preventive control, such as inventory tags, will not result in a significant deficiency or material weakness if the detective control (physical inventory counts) prevents a misstatement of the financial statements. Material weaknesses relating to controls over the safeguarding of assets would only exist if the company does not have effective controls (considering both safeguarding and other controls) to prevent, or detect and correct, a material misstatement of the financial statements.
- Failure to perform reconciliations of significant accounts. For example, accounts receivable subsidiary ledgers are not reconciled to the general ledger account in a timely or accurate manner.
- Undue bias or lack of objectivity by those responsible for accounting decisions (for example, consistent understatement of expenses or overstatement of allowances at the direction of management).
- Misrepresentation by entity personnel to the auditor (an indicator of fraud).

- Management override of controls.
- Failure of an application control caused by a deficiency in the design or operation of an IT general control.
- An observed deviation rate that exceeds the number of deviations expected by the auditor in a test of the operating effectiveness of a control. For example, if the auditor designs a test in which he or she selects a sample and expects no deviations, the finding of one deviation is a nonnegligible deviation rate because based on the results of the auditor's test of the sample, the desired level of confidence was not obtained.

[Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

Exhibit A — Illustrative Auditor's Written Communication

.A39 The following is an illustrative auditor's written communication encompassing the requirements in paragraph .14.

To Management and [*identify the body or individuals charged with governance, such as the entity's Board of Directors*] of ABC Company

In planning and performing our audit of the financial statements of ABC Company (the "Company") as of and for the year ended December 31, 20XX, in accordance with auditing standards generally accepted in the United States of America, we considered the Company's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we do not express an opinion on the effectiveness of the Company's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be [*material weaknesses* or *material weaknesses or significant deficiencies*] and therefore, [*material weaknesses* or *material weaknesses or significant deficiencies*] may exist that were not identified. However, as discussed below, we identified certain deficiencies in internal control that we consider to be [*material weaknesses* or *significant deficiencies* or *material weaknesses and significant deficiencies*].

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. [*We consider the following deficiencies in the Company's internal control to be material weaknesses:*]

[*Describe the material weaknesses that were identified and an explanation of their potential effects.*]

[*A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider the following deficiencies in the Company's internal control to be significant deficiencies:*]

[*Describe the significant deficiencies that were identified and an explanation of their potential effects.*]

[*If the auditor is communicating significant deficiencies and did not identify any material weaknesses, the auditor may state that none of the identified significant deficiencies are considered to be material weaknesses.*]

This communication is intended solely for the information and use of management, [*identify the body or individuals charged with governance*], others within the organization, and [*identify any governmental authorities to which the auditor is required to report*] and is not intended to be, and should not be, used by anyone other than these specified parties.[1]

[*Auditor's signature*]

[*Auditor's city and state*]

[*Date*]

[As amended, effective for the auditor's written communications related to audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 125. Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

---

[1]When the engagement is also performed in accordance with *Government Auditing Standards*, the alert required by paragraph .14*d* may read as follows: "The purpose of this communication is solely to describe the scope of our testing of internal control over financial reporting and the results of that testing. This communication is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Company's internal control over financial reporting. Accordingly, this communication is not suitable for any other purpose." The AICPA Audit Guide Government Auditing Standards *and Circular A-133 Audits* provides additional interpretative guidance, including illustrative reports. [Footnote added, effective for the auditor's written communications related to audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 125.]

Exhibit B — Illustrative No Material Weakness Communication

.A40 The following is an illustrative auditor's written communication indicating that no material weaknesses were identified during the audit of a not-for-profit organization.

To Management and [*identify the body or individuals charged with governance, such as the entity's Board of Directors*] of NPO Organization

In planning and performing our audit of the financial statements of NPO Organization (the "Organization") as of and for the year ended December 31, 20XX, in accordance with auditing standards generally accepted in the United States of America, we considered the Organization's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Organization's internal control. Accordingly, we do not express an opinion on the effectiveness of the Organization's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis.

Our consideration of internal control was for the limited purpose described in the first paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

[*If one or more significant deficiencies have been identified, the auditor may add the following: Our audit was also not designed to identify deficiencies in internal control that might be significant deficiencies. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We communicated the significant deficiencies identified during our audit in a separate communication dated [date].*]

This communication is intended solely for the information and use of management, [*identify the body or individuals charged with governance*], others within the organization, and [*identify any governmental authorities to which the auditor is required to report*] and is not intended to be, and should not be, used by anyone other than these specified parties.[1]

[*Auditor's signature*]

[1]When the engagement is also performed in accordance with *Government Auditing Standards*, the alert required by paragraph .14*d* may read as follows: "The purpose of this communication is solely to describe the scope of our testing of internal control over financial reporting and the results of that testing. This communication is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Company's internal control over financial reporting. Accordingly, this communication is not suitable for any other purpose." The AICPA Audit Guide Government Auditing Standards *and Circular A-133 Audits* provides additional interpretative guidance, including illustrative reports. [Footnote added, effective for the auditor's written communications related to audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 125.]

[*Auditor's city and state*]

[*Date*]

[As amended, effective for the auditor's written communications related to audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 125. Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

AU-C Section 9265

Communicating Internal Control Related Matters Identified in an Audit: Auditing Interpretations of Section 265

1. Communication of Significant Deficiencies and Material Weaknesses Prior to the Completion of the Compliance Audit for Participants in Office of Management and Budget Single Audit Pilot Project

.01 *Question*—On October 7, 2009, the Office of Management and Budget (OMB) published the parameters of a pilot project, which is a collaborative effort between volunteer nonfederal entities expending American Recovery and Reinvestment Act of 2009 (ARRA) awards (auditees), the auditors performing compliance audits of auditees with ARRA expenditures under OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, and the federal government. For auditees that volunteer, the pilot project requires their auditors to issue to management an early written communication of significant deficiencies and material weaknesses in internal control over compliance at an interim date, prior to the completion of the compliance audit. Such communication would be based on internal control work performed on specified compliance requirements for two major programs with ARRA expenditures chosen from a list of approved ARRA pilot project programs. This communication also would be required to be submitted by management to the cognizant agency for audit. May an auditor issue such an interim communication in accordance with section 265, *Communicating Internal Control Related Matters Identified in an Audit*?

.02 *Interpretation*—Yes. Section 265 permits an auditor to communicate to management identified significant deficiencies and material weaknesses before the completion of a financial statement audit. It would be equally appropriate for a compliance audit. Regardless of how the early communication is delivered, the auditor should communicate all significant deficiencies and material weaknesses in writing to management and those charged with governance in accordance with section 265.[1]

.03 The following is an illustrative communication that an auditor may use to comply with the pilot project communication requirement to inform management and those charged with governance of deficiencies in internal control over compliance related to ARRA funding that have been identified at an interim date prior to the completion of the compliance

[1]Paragraphs .11–.13 of section 265, *Communicating Internal Control Related Matters Identified in an Audit*.

audit and are, or likely to be, in the auditor's judgment, significant deficiencies or material weaknesses in internal control over compliance:

This communication is provided pursuant to the parameters of the 2009 Office of Management and Budget (OMB) pilot project. Such project requires auditors of entities that volunteer for the project to issue, in writing, an early communication of significant deficiencies and material weaknesses in internal control over compliance for certain federal programs having expenditures of American Recovery and Reinvestment Act of 2009 (ARRA) funding at an interim date, prior to the completion of the compliance audit. Accordingly, this communication is based on our audit procedures performed through [insert "as of date"], an interim period. Because we have not completed our compliance audit, additional significant deficiencies and material weaknesses may be identified and communicated in our final report on compliance and internal control over compliance issued to meet the reporting requirements of OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*.

In planning and performing our audit through [insert "as of date"] of [identify the federal programs selected to be tested as a major program from the federal list of approved ARRA pilot project programs], we are considering [Example Entity's] compliance with [list the applicable types of compliance requirements subject to the communication requirement in the pilot project (for example, activities allowed or unallowed, allowable costs and cost principles, cash management, eligibility, reporting, and special tests and provisions)] as described in the *OMB Circular A-133 Compliance Supplement* for the year ended June 30, 2009. We are also considering [Example Entity's] internal control over compliance with the requirements previously described that could have a direct and material effect on [identify the federal programs selected to be tested as a major program from the federal list of approved ARRA pilot project programs] in order to determine our auditing procedures for the purpose of expressing our opinion on compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the [Example Entity's] internal control over compliance.

Our consideration of internal control over compliance is for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in the entity's internal control that might be significant deficiencies or material weaknesses as defined in the following paragraph. However, as discussed subsequently, based on the audit procedures performed through [insert "as of date"], we identified certain deficiencies in internal control over compliance that we consider to be significant deficiencies and other deficiencies that we consider to be material weaknesses.

A *deficiency in internal control* over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement[2] of a federal program on a timely basis. A *material weakness* in internal control over compliance is a deficiency, or a combination of deficiencies,

[2]Under Section 510(a)(1) of Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, the auditor's determination of whether a deficiency in internal control over compliance is a material weakness or significant deficiency for the purpose of reporting an audit finding is in relation to a type of compliance requirement for a major program or an audit objective identified

in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. We consider the following deficiencies in internal control over compliance to be material weaknesses:

[Describe the material weaknesses that were identified either here or by reference to a separate schedule.][3]

A *significant deficiency* in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance. We consider the following deficiencies in internal control over compliance to be significant deficiencies:

[Describe the significant deficiencies that were identified either here or by reference to a separate schedule.][4]

[Example Entity's] responses to our findings are described [insert either "in the preceding paragraph" or "in the accompanying schedule"]. We did not audit [Example Entity's] responses and, accordingly, we express no opinion on the responses.[5]

This interim communication is intended solely for the information and use of management, [identify the body or individuals charged with governance], others within the entity, [identify the legislative or regulatory body], federal awarding agencies, and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

[Issue Date: November 1994; Revised: March 2010; Revised: January 2012, effective for audits of financial statements for periods ending on or after December 15, 2012.]

---

in the *OMB Circular A-133 Compliance Supplement* (the *Compliance Supplement*). This reference to "type of compliance requirement" refers to the 14 types of compliance requirements (identified as A-N) described in part 3 of the *Compliance Supplement*. For purposes of reporting audit findings, auditors are alerted that certain of the types of compliance requirements may include multiple compliance requirements with multiple audit objectives (for example, compliance requirement "G" covers 3 separate requirements—matching, level of effort, and earmarking; and "N" covers separate requirements specific to each individual special test and provision).

[3]The OMB pilot project requires the auditee, upon receipt of the interim communication from the auditor, to provide it to the federal cognizant agency for audit. Federal agencies are required to follow-up with the auditee concerning actions taken or needed to correct the finding. Therefore, to assist the federal agencies with this responsibility, significant deficiency and material weakness finding descriptions should include the level of detail required by both *Government Auditing Standards* and Section 510(b) of OMB Circular A-133. This would require the inclusion of, among other things, the views of responsible officials (see footnote 5).

[4]See footnote 3.

[5]The OMB pilot project requires the auditor to obtain management responses to the internal control matters identified and to include them in the interim communication.

2. Communication of Significant Deficiencies and Material Weaknesses Prior to the Completion of the Compliance Audit for Auditors That Are Not Participants in Office of Management and Budget Pilot Project

.04 *Question*—Part 6, "Internal Control," of the *OMB Circular A-133 Compliance Supplement* (the *Compliance Supplement*) stresses the importance of internal control testwork over major programs with ARRA expenditures and encourages early communication to management and those charged with governance of any significant deficiencies or material weaknesses in internal control:

> Early communication by auditors to management, and those charged with governance, of identified control deficiencies related to ARRA funding that are, or likely to be, significant deficiencies or material weaknesses in internal control will allow management to expedite corrective action and mitigate the risk of improper expenditure of ARRA awards. Therefore, auditors are encouraged to promptly inform auditee management and those charged with governance during the audit engagement about control deficiencies related to ARRA funding that are, or likely to be, significant deficiencies or material weaknesses in internal control. The auditor should use professional judgment regarding the form of such interim communications.

.05 Although not required, if an auditor decides to make such a communication in writing at an interim date, may the auditor issue the interim communication in accordance with section 265?

.06 *Interpretation*—Yes. As noted in the previous question, section 265 permits an auditor to communicate to management and those charged with governance identified significant deficiencies and material weaknesses before the completion of a financial statement audit. It would be equally appropriate for a compliance audit. The auditor is reminded that, regardless of how the early communication is delivered, the auditor should communicate all significant deficiencies and material weaknesses in writing to management and those charged with governance in accordance with section 265.[6]

.07 If the auditor decides to make the interim communication encouraged in part 6 of the *Compliance Supplement* in writing, the following is an illustrative communication that an auditor may use to inform management and those charged with governance of deficiencies in internal control over compliance related to ARRA funding that have been identified at an interim date prior to the completion of the compliance audit and that are, or likely to be, in the auditor's judgment, significant deficiencies or material weaknesses in internal control:

[6]See footnote 1.

This communication is provided pursuant to the *Office of Management and Budget (OMB) Circular A-133 Compliance Supplement*, which encourages auditors to communicate, at an interim date, control deficiencies related to federal programs with expenditures of American Recovery and Reinvestment Act of 2009 (ARRA) funding that are, or likely to be, significant deficiencies or material weaknesses in internal control over compliance. Accordingly, this communication is based on our audit procedures performed through [insert "as of date"], an interim period. Because we have not completed our compliance audit, additional significant deficiencies and material weaknesses may be identified and communicated in our final report on compliance and internal control over compliance issued to meet the reporting requirements of OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*.

In planning and performing our audit through [insert "as of date"] of [identify the federal programs with ARRA expenditures selected by the auditor to be tested as a major program], we are considering [Example Entity's] compliance with the applicable types of compliance requirements as described in the *OMB Circular A-133 Compliance Supplement* for the year ended June 30, 20XX. We are also considering [Example Entity's] internal control over compliance with the requirements previously described that could have a direct and material effect on [identify the federal programs with ARRA expenditures selected by the auditor to be tested as a major program] in order to determine our auditing procedures for the purpose of expressing our opinion on compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the [Example Entity's] internal control over compliance.

Our consideration of internal control over compliance is for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in the entity's internal control that might be significant deficiencies or material weaknesses as defined in the following paragraph. However, as discussed subsequently, based on the audit procedures performed through [insert "as of date"], we identified certain deficiencies in internal control over compliance that we consider to be significant deficiencies and other deficiencies that we consider to be material weaknesses.

A *deficiency in internal control* over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement[7] of a federal program on a timely basis. A *material weakness* in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. We consider the following deficiencies in internal control over compliance to be material weaknesses:

[7]See footnote 2.

[Describe the material weaknesses that were identified either here or by reference to a separate schedule.]

A *significant deficiency* in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance. We consider the following deficiencies in internal control over compliance to be significant deficiencies:

[Describe the significant deficiencies that were identified either here or by reference to a separate schedule.]

This interim communication is intended solely for the information and use of management, [identify the body or individuals charged with governance], others within the entity, [identify the legislative or regulatory body], federal awarding agencies, and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

[Issue Date: November 2009; Revised: March 2010; Revised: January 2012, effective for audits of financial statements for periods ending on or after December 15, 2012.]

3. Appropriateness of Identifying No Significant Deficiencies or No Material Weaknesses in an Interim Communication

.08 *Question*—In either of the previously described scenarios, may the auditor issue an interim communication in accordance with section 265 stating that as of the interim communication date, no significant deficiencies or material weaknesses have been noted?

.09 *Interpretation*—No. Section 265 states that the auditor should not issue a written communication stating that no significant deficiencies were identified during the audit.[8] Such guidance would also apply to the interim communication contemplated in the previous two questions. Therefore, it would not be appropriate for an auditor to issue an interim communication stating that no significant deficiencies were identified.

.10 Although section 265 would permit the auditor to issue a communication at the end of an audit stating that no material weaknesses were identified by the auditor, it would not be appropriate for an auditor to do so at an interim date.[9] Making such a communication at an interim date could lead to misinterpretation by management and those charged with governance, that there are no identified material weaknesses when, in fact, material weaknesses could be identified before completion of the compliance audit.

[8] Paragraph .16 of section 265.

[9] Paragraph .15 of section 265.

[Issue Date: November 2009; Revised: March 2010; Revised: January 2012, effective for audits of financial statements for periods ending on or after December 15, 2012.]

AU-C Sections 300–499

RISK ASSESSMENT AND RESPONSE TO ASSESSED RISKS

AU-C Section 300

Planning an Audit

Source: SAS No. 122; SAS No. 128; SAS No. 134; SAS No. 145.

Effective for audits of financial statements for periods ending on or after December 15, 2012, unless otherwise indicated.

Note

In June 2022, the ASB issued SAS No. 146, *Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, which contains amendments to this section.

The amendments are effective for engagements conducted in accordance with generally accepted auditing standards for periods beginning on or after December 15, 2025, and can be viewed in the appendix of section 220 until the effective date, when they will be applied to this section.

In March 2023, the ASB issued SAS No. 149, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors and Audits of Referred-to Auditors)*, which contains amendments to this section.

The amendments are effective for audits of financial statements for periods ending on or after December 15, 2026, and can be viewed in appendix C of section 600 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility to plan an audit of financial statements. This section is written in the context of recurring audits. Additional considerations in an initial audit engagement are separately identified in this section. Matters related to planning audits of group financial statements are addressed in section 600A, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*. (Ref: par. .A1–.A3)

The Role and Timing of Planning

.02 Planning an audit involves establishing the overall audit strategy for the engagement and developing an audit plan. Adequate planning benefits the audit of financial statements in several ways, including the following:

- Helping the auditor identify and devote appropriate attention to important areas of the audit
- Helping the auditor identify and resolve potential problems on a timely basis
- Helping the auditor properly organize and manage the audit engagement so that it is performed in an effective and efficient manner
- Assisting in the selection of engagement team members with appropriate levels of capabilities and competence to respond to anticipated risks and allocating team member responsibilities
- Facilitating the direction and supervision of engagement team members and the review of their work
- Assisting, when applicable, in coordination of work done by auditors of components and specialists

Effective Date

.03 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objective

.04 The objective of the auditor is to plan the audit so that it will be performed in an effective manner.

Requirements

Involvement of Key Engagement Team Members

.05 The engagement partner and other key members of the engagement team should be involved in planning the audit, including planning and participating in the discussion among engagement team members. (Ref: par. .A4–.A5)

Preliminary Engagement Activities

.06 The auditor should undertake the following activities at the beginning of the current audit engagement:

a. Performing procedures required by section 220A, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, regarding the continuance of the client relationship and the specific audit engagement

b. Evaluating compliance with relevant ethical requirements in accordance with section 220A

c. Establishing an understanding of the terms of the engagement as required by section 210A, *Terms of Engagement* (Ref: par. .A6–.A8)

Planning Activities

.07 The auditor should establish an overall audit strategy that sets the scope, timing, and direction of the audit and that guides the development of the audit plan.

.08 In establishing the overall audit strategy, the auditor should

a. identify the characteristics of the engagement that define its scope;

b. ascertain the reporting objectives of the engagement in order to plan the timing of the audit and the nature of the communications required;

c. consider the factors that, in the auditor's professional judgment, are significant in directing the engagement team's efforts;

d. consider the results of preliminary engagement activities and, when applicable, whether knowledge gained on other engagements performed by the engagement partner for the entity is relevant; and

e. ascertain the nature, timing, and extent of resources necessary to perform the engagement. (Ref: par. .A9–.A13)

.09 The auditor should develop an audit plan that includes a description of the following:

a. The nature and extent of planned risk assessment procedures, as determined under section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*

b. The nature, timing, and extent of planned further audit procedures at the relevant assertion level, as determined under section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*

c. Other planned audit procedures that are required to be carried out so that the engagement complies with generally accepted auditing standards (Ref: par. .A14–.A16)

.10 The auditor should update and change the overall audit strategy and audit plan, as necessary, during the course of the audit. (Ref: par. .A17)

.11 The auditor should plan the nature, timing, and extent of direction and supervision of engagement team members and the review of their work. (Ref: par. .A18–.A19)

Determining the Extent of Involvement of Professionals Possessing Specialized Skills

.12 The auditor should consider whether specialized skills are needed in performing the audit. If specialized skills are needed, the auditor should seek the assistance of a professional possessing such skills, who either may be on the auditor's staff or an outside professional.[1] In such circumstances, the auditor should have sufficient knowledge to communicate the objectives of the other professional's work; evaluate whether the specified audit procedures will meet the auditor's objectives; and evaluate the results of the audit procedures applied as they relate to the nature, timing, and extent of further planned audit procedures. Section 620, *Using the Work of an Auditor's Specialist*, addresses the auditor's use of the work of specialists in an audit. (Ref: par. .A20–.A21)

Additional Considerations in Initial Audit Engagements

.13 The auditor should undertake the following activities prior to starting an initial audit:

a. Performing procedures required by section 220A

b. Communicating with the predecessor auditor when there has been a change of auditors, in accordance with section 210A[2] (Ref: par. .A22)

Documentation

.14 The auditor should include in the audit documentation the following:[3]

a. The overall audit strategy

b. The audit plan

c. Any significant changes made during the audit engagement to the overall audit strategy or the audit plan and the reasons for such changes (Ref: par. .A23–.A26)

Application and Other Explanatory Material

The Role and Timing of Planning (Ref: par. .01)

.A1 The nature and extent of planning activities will vary according to the size and complexity of the entity, the key engagement team members' previous experience with the entity, and changes in circumstances that occur during the audit engagement.

.A2 Planning is not a discrete phase of an audit but rather a continual and iterative process that often begins shortly after (or in connection with) the completion of the previous audit

[1]Paragraph .16 of section 220A, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*.

[2]Paragraph .11 of section 210A, *Terms of Engagement*.

[3]Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*.

and continues until the completion of the current audit engagement. Planning, however, includes consideration of the timing of certain activities and audit procedures that need to be completed prior to the performance of further audit procedures. For example, planning includes the need to consider, prior to the auditor's identification and assessment of the risks of material misstatement, such matters as the following:

- The analytical procedures to be applied as risk assessment procedures
- A general understanding of the legal and regulatory framework applicable to the entity and how the entity is complying with that framework
- The determination of materiality
- The involvement of specialists
- The performance of other risk assessment procedures

.A3 The auditor may decide to discuss elements of planning with the entity's management to facilitate the conduct and management of the audit engagement (for example, to coordinate some of the planned audit procedures with the work of the entity's personnel). Although these discussions often occur, the overall audit strategy and the audit plan remain the auditor's responsibility. When discussing matters included in the overall audit strategy or audit plan, care is required in order not to compromise the effectiveness of the audit. For example, discussing the nature and timing of detailed audit procedures with management may compromise the effectiveness of the audit by making the audit procedures too predictable.

Involvement of Key Engagement Team Members (Ref: par. .05)

.A4 The involvement of the engagement partner and other key members of the engagement team in planning the audit draws on their experience and insight, thereby enhancing the effectiveness and efficiency of the planning process. The engagement partner may delegate portions of the planning and supervision of the audit to other firm personnel.

.A5 Section 315A requires a discussion among the audit team about the susceptibility of the entity's financial statements to material misstatement.[4] This discussion also may include the discussion regarding the risks of material misstatement due to fraud, as required by section 240, *Consideration of Fraud in a Financial Statement Audit*.[5] The objective of this discussion is for members of the audit team to gain a better understanding of the potential for material misstatements of the financial statements resulting from fraud or error in the specific areas assigned to them and to understand how the results of the audit procedures that they perform may affect other aspects of the audit, including the decisions about the nature, timing, and extent of further audit procedures.

[4]Paragraph .11 of section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

[5]Paragraph .15 of section 240, *Consideration of Fraud in a Financial Statement Audit*.

Preliminary Engagement Activities (Ref: par. .06)

.A6 Performing the preliminary engagement activities, which are specified in paragraph .06, at the beginning of the current audit engagement assists the auditor in identifying and evaluating events or circumstances that may adversely affect the auditor's ability to plan and perform the audit engagement.

.A7 Performing these preliminary engagement activities enables the auditor to plan an audit engagement for which, for example

- the auditor maintains the necessary independence and ability to perform the engagement.
- the auditor has no issues with management integrity that may affect the auditor's willingness to continue the engagement.
- the auditor has no misunderstanding with the entity about the terms of the engagement.

.A8 The auditor's consideration of client continuance and relevant ethical requirements, including independence, occurs throughout the audit engagement as conditions and changes in circumstances occur. Performing initial procedures on both client continuance and evaluation of relevant ethical requirements (including independence) at the beginning of the current audit engagement means that they are completed prior to the performance of other significant activities for the current audit engagement. For continuing audit engagements, such initial procedures often begin shortly after (or in connection with) the completion of the previous audit.

Planning Activities

The Overall Audit Strategy (Ref: par. .07–.08)

.A9 The process of establishing the overall audit strategy assists the auditor to determine, subject to the completion of the auditor's risk assessment procedures, such matters as the following:

- The resources to deploy for specific audit areas, such as the use of appropriately experienced team members for high risk areas or the involvement of specialists on complex matters
- The amount of resources to allocate to specific audit areas, such as the number of team members assigned to observe the inventory count at material locations, the extent of review of component auditors' work in the case of group audits, or the audit budget (in hours) to allocate to high risk areas
- When these resources are to be deployed, such as whether at an interim audit stage or at key cut-off dates
- How such resources are managed, directed, and supervised, such as when team briefing and debriefing meetings are expected to be held, how the engagement partner

and manager reviews are expected to take place (for example, on site or off site), and whether to complete engagement quality control reviews

.A10 The appendix, "Considerations in Establishing the Overall Audit Strategy," lists examples of considerations in establishing the overall audit strategy.

.A11 Once the overall audit strategy has been established, an audit plan can be developed to address the various matters identified in the overall audit strategy, taking into account the need to achieve the audit objectives through the efficient use of the auditor's resources. The establishment of the overall audit strategy and the detailed audit plan are not necessarily discrete or sequential processes but are closely interrelated because changes in one may result in consequential changes to the other.

Considerations Specific to Smaller, Less Complex Entities

.A12 In audits of smaller entities, the entire audit may be conducted by a very small audit team. Many audits of smaller entities involve the engagement partner (who may be a sole practitioner) working with one engagement team member (or without any engagement team members). With a smaller team, coordination of, and communication between, team members is easier. Establishing the overall audit strategy for the audit of a smaller entity need not be a complex or time consuming exercise; it varies according to the size and complexity of the entity, the complexity of the audit, and the size of the engagement team. For example, a brief memorandum prepared at the completion of the previous audit, based on a review of the working papers and highlighting issues identified in the audit just completed, updated in the current period, based on discussions with the owner-manager, can serve as the documented audit strategy for the current audit engagement if it covers the matters noted in paragraph .07.

Communications With Those Charged With Governance

.A13 Section 260, *The Auditor's Communication With Those Charged With Governance*, requires the auditor to communicate with those charged with governance an overview of the planned scope and timing of the audit.[6]

The Audit Plan (Ref: par. .09)

.A14 The audit plan is more detailed than the overall audit strategy in that it includes the nature, timing, and extent of audit procedures to be performed by engagement team members. Planning for these audit procedures takes place over the course of the audit as the audit plan for the engagement develops. For example, planning of the auditor's risk assessment procedures occurs early in the audit process. However, planning the nature, timing, and extent of specific further audit procedures depends on the outcome of those risk assessment procedures. In addition, the auditor may begin the execution of further audit procedures for some classes of transactions, account balances, and disclosures before planning all remaining further audit procedures.

[6] Paragraph .11 of section 260, *The Auditor's Communication With Those Charged With Governance*.

.A15 Determining the nature, timing, and extent of planned risk assessment procedures, and further audit procedures, as they relate to disclosures is important in light of both the wide range of information and the level of detail that may be encompassed in those disclosures. Further, certain disclosures may contain information that is obtained from outside of the general and subsidiary ledgers, which may also affect the assessed risks and the nature, timing, and extent of audit procedures to address them. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

.A16 Consideration of disclosures early in the audit assists the auditor in giving appropriate attention to, and planning adequate time for, addressing disclosures in the same way as classes of transactions, events, and account balances are addressed. Early consideration may also help the auditor to determine the effects on the audit of the following:

- Significant new or revised disclosures required as a result of changes in the entity's environment, financial condition, or activities (for example, disclosures about discontinued operations or a significant business combination)
- Significant new or revised disclosures arising from changes in the applicable financial reporting framework
- The need for the involvement of an auditor's expert to assist with audit procedures related to particular disclosures (for example, disclosures related to pension or other retirement benefit obligations)
- Matters relating to disclosures that the auditor may wish to discuss with those charged with governance[7]

[Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Changes to Planning Decisions During the Course of the Audit (Ref: par. .10)

.A17 As a result of unexpected events, changes in conditions, or the audit evidence obtained from the results of audit procedures, the auditor may need to modify the overall audit strategy and audit plan and, thereby, the resulting planned nature, timing, and extent of further audit procedures, based on the revised consideration of assessed risks. This may be the case when information comes to the auditor's attention that differs significantly from the information available when the auditor planned the audit procedures. For example, audit evidence obtained through the performance of substantive procedures may contradict the audit evidence obtained through tests of controls. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Direction, Supervision, and Review (Ref: par. .11)

.A18 The nature, timing, and extent of the direction and supervision of engagement team members and review of their work vary, depending on many factors, including the following:

[7] Paragraph .A13 of section 260. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

- The size and complexity of the entity
- The area of the audit
- The assessed risks of material misstatement (for example, an increase in the assessed risk of material misstatement for a given area of the audit ordinarily requires a corresponding increase in the extent and timeliness of direction and supervision of engagement team members and a more detailed review of their work)
- The capabilities and competence of the individual team members performing the audit work

Section 220A contains further guidance on the direction, supervision, and review of audit work. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Considerations Specific to Smaller, Less Complex Entities

.A19 If an audit is carried out entirely by the engagement partner, questions of direction and supervision of engagement team members and review of their work do not arise. In such cases, the engagement partner, having personally conducted all aspects of the work, will be aware of all material issues. Forming an objective view on the appropriateness of the judgments made in the course of the audit can present practical problems when the same individual also performs the entire audit. If particularly complex or unusual issues are involved and the audit is performed by a sole practitioner, it may be desirable to consult with other suitably experienced auditors or the auditor's professional body. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Determining the Extent of Involvement of Professionals Possessing Specialized Skills (Ref: par. .12)

.A20 An auditor may decide to seek the assistance of a professional with specialized skills necessary to complete various aspects of the engagement. These professionals may include valuation experts, appraisers, actuaries, tax specialists, and IT professionals. For example, the use of professionals possessing IT skills to determine the effect of IT on the audit, understand the IT controls, or design and perform tests of IT controls or substantive procedures is a significant aspect of many audit engagements. In determining whether such a professional is needed on the audit team, the auditor may consider such factors as the following:

- The complexity of the entity's systems and IT controls and the manner in which they are used in conducting the entity's business
- The significance of changes made to existing systems or the implementation of new systems
- The extent to which data is shared among systems
- The extent of the entity's participation in electronic commerce
- The entity's use of emerging technologies

- The significance of audit evidence that is available only in electronic form

[Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A21 Audit procedures that the auditor may assign to a professional possessing IT skills include inquiring of an entity's IT personnel how data and transactions are initiated, authorized, recorded, processed, and reported and how IT controls are designed; inspecting systems documentation; observing the operation of IT controls; and planning and performing tests of IT controls. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Additional Considerations in Initial Audit Engagements (Ref: par. .13)

.A22 The purpose and objective of planning the audit are the same whether the audit is an initial or recurring engagement. However, for an initial audit, the auditor may need to expand the planning activities because the auditor does not ordinarily have the previous experience with the entity that is considered when planning recurring engagements. For an initial audit engagement, additional matters the auditor may consider in establishing the overall audit strategy and audit plan include the following:

- Arrangements to be made with the predecessor auditor (for example, to review the predecessor auditor's working papers [see section 510, *Opening Balances—Initial Audit Engagements, Including Reaudit Engagements*])[8]
- Any major issues (including the application of accounting principles or auditing and reporting standards) discussed with management in connection with the initial selection as auditor, the communication of these matters to those charged with governance, and how these matters affect the overall audit strategy and audit plan
- The audit procedures necessary to obtain sufficient appropriate audit evidence regarding opening balances (see section 510)[9]
- Other procedures required by the firm's system of quality control for initial audit engagements (for example, the firm's system of quality control may require the involvement of another partner or senior individual to review the overall audit strategy prior to commencing significant audit procedures or to review reports prior to their issuance)

[Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Documentation (Ref: par. .14)

.A23 The documentation of the overall audit strategy is a record of the key decisions considered necessary to properly plan the audit and communicate significant issues to the engagement team. For example, the auditor may summarize the overall audit strategy in

[8] Paragraphs .07 and .A2–.A11 of section 510, *Opening Balances—Initial Audit Engagements, Including Reaudit Engagements*. [Footnote renumbered by the issuance of SAS No. 134, May 2019.]

[9] Paragraph .08 of section 510. [Footnote renumbered by the issuance of SAS No. 134, May 2019.]

the form of a memorandum that contains key decisions regarding the overall scope, timing, and conduct of the audit. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A24 The documentation of the audit plan is a record of the planned nature, timing, and extent of risk assessment procedures and further audit procedures at the relevant assertion level in response to the assessed risks. It also serves as a record of the proper planning of the audit procedures that can be reviewed and approved prior to their performance. The auditor may use standard audit programs or audit completion checklists, tailored as needed to reflect the particular engagement circumstances. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A25 A record of the significant changes to the overall audit strategy and the audit plan and resulting changes to the planned nature, timing, and extent of audit procedures explain why the significant changes were made and why the overall strategy and audit plan were finally adopted for the audit. It also reflects the appropriate response to the significant changes occurring during the audit. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Considerations Specific to Smaller, Less Complex Entities

.A26 As discussed in paragraph .A12, a suitable, brief memorandum may serve as the documented strategy for the audit of a smaller entity. For the audit plan, standard audit programs or checklists (see paragraph .A24) drawn up on the assumption of few controls, which is likely to be the case in a smaller entity, may be used, provided that they are tailored to the circumstances of the engagement, including the auditor's risk assessments. [Paragraph renumbered by the issuance of SAS No. 134, May 2019. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Appendix — Considerations in Establishing the Overall Audit Strategy (Ref: par. .07–.08 and .A9–.A12)

.A27

This appendix provides examples of matters the auditor may consider in establishing the overall audit strategy. Many of these matters also will influence the auditor's detailed audit plan. The examples provided cover a broad range of matters applicable to many engagements. Although some of the following matters may be required by other AU-C sections, not all matters are relevant to every audit engagement, and the list is not necessarily complete.

Characteristics of the Engagement

The following are some examples of characteristics of the engagement:

- The financial reporting framework on which the financial information to be audited has been prepared, including any need for reconciliations to another financial reporting framework
- Industry specific reporting requirements, such as reports mandated by industry regulators
- The expected audit coverage, including the number and locations of components to be included
- The nature of the control relationships between a parent and its components that determine how the group is to be consolidated
- The extent to which components are audited by other auditors
- The nature of the business divisions to be audited, including the need for specialized knowledge
- The reporting currency to be used, including any need for currency translation for the audited financial information
- The need for statutory or regulatory audit requirements (for example, the Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*)
- Whether the entity has an internal audit function and, if so, whether (in which areas and to what extent) the work of the internal audit function can be used in obtaining audit evidence or whether internal auditors can be used to provide direct assistance
- The entity's use of service organizations and how the auditor may obtain evidence concerning the design or operation of controls performed by them
- The expected use of audit evidence obtained in previous audits (for example, audit evidence related to risk assessment procedures and tests of controls)

- The effect of IT on the audit procedures, including the availability of data and the expected use of computer assisted audit techniques
- The coordination of the expected coverage and timing of the audit work with any reviews of interim financial information and the effect on the audit of the information obtained during such reviews
- The availability of client personnel and data

Reporting Objectives, Timing of the Audit, and Nature of Communications

The following examples illustrate reporting objectives, timing of the audit, and nature of communications:

- The entity's timetable for reporting, including interim periods
- The organization of meetings with management and those charged with governance to discuss the nature, timing, and extent of the audit work
- The discussion with management and those charged with governance regarding the expected type and timing of reports to be issued and other communications, both written and oral, including the auditor's report, management letters, and communications to those charged with governance
- The discussion with management regarding the expected communications on the status of audit work throughout the engagement
- Communication with auditors of components regarding the expected types and timing of reports to be issued and other communications in connection with the audit of components
- The expected nature and timing of communications among engagement team members, including the nature and timing of team meetings and timing of the review of work performed
- Whether there are any other expected communications with third parties, including any statutory or contractual reporting responsibilities arising from the audit

Significant Factors, Preliminary Engagement Activities, and Knowledge Gained on Other Engagements

The following examples illustrate significant factors, preliminary engagement activities, and knowledge gained on other engagements:

- The determination of materiality, in accordance with section 320, *Materiality in Planning and Performing an Audit*, and, when applicable, the following:
  - — The determination of materiality for components and communication thereof to component auditors in accordance with section 600A, *Special Considerations —Audits of Group Financial Statements (Including the Work of Component Auditors)*

  - — The preliminary identification of significant components and material classes of transactions, account balances, and disclosures

- Preliminary identification of areas in which there may be a higher risk of material misstatement
- The effect of the assessed risk of material misstatement at the overall financial statement level on direction, supervision, and review
- The manner in which the auditor emphasizes to engagement team members the need to maintain a questioning mind and exercise professional skepticism in gathering and evaluating audit evidence
- Results of previous audits that involved evaluating the operating effectiveness of internal control, including the nature of identified deficiencies and action taken to address them
- The discussion of matters that may affect the audit with firm personnel responsible for performing other services to the entity
- Evidence of management's commitment to the design, implementation, and maintenance of sound internal control, including evidence of appropriate documentation of such internal control
- Changes within the applicable financial reporting framework, such as changes in accounting standards, which may involve significant new or revised disclosures
- Volume of transactions, which may determine whether it is more efficient for the auditor to rely on internal control
- Importance attached to internal control throughout the entity to the successful operation of the business
- The processes management uses to identify and prepare the disclosures required by the applicable financial reporting framework, including disclosures containing information that is obtained from outside of the general and subsidiary ledgers
- Significant business developments affecting the entity, including changes in IT and business processes; changes in key management; and acquisitions, mergers, and divestments
- Significant industry developments, such as changes in industry regulations and new reporting requirements
- Other significant relevant developments, such as changes in the legal environment affecting the entity

Nature, Timing, and Extent of Resources

The following examples illustrate the nature, timing, and extent of resources:

- The selection of the engagement team (including, when necessary, the engagement quality control reviewer [see section 220A, *Quality Control for an Engagement*

Conducted in Accordance With Generally Accepted Auditing Standards]) and the assignment of audit work to the team members, including the assignment of appropriately experienced team members to areas in which there may be higher risks of material misstatement

- Engagement budgeting, including considering the appropriate amount of time to set aside for areas in which there may be higher risks of material misstatement

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2014, by SAS No. 128. Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

AU-C Section 315

Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

(Supersedes SAS No. 122 section 315)

Source: SAS No. 145.

Effective for audits of financial statements for periods ending on or after December 15, 2023.

Note

In March 2023, the Accounting Standards Board issued Statement on Auditing Standards No. 149, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors and Audits of Referred-to Auditors)*, which contains amendments to this section.

The amendments are effective for audits of financial statements for periods ending on or after December 15, 2026, and can be viewed in appendix C of section 600 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility to identify and assess the risks of material misstatement in the financial statements.

Key Concepts in This Section

.02 Section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*, addresses the overall objectives of the auditor in conducting an audit of the financial statements, including to obtain sufficient appropriate audit evidence to reduce audit risk to an acceptably low level.[1] Audit risk is a function of the risks of material misstatement and detection risk.[2]Section 200 explains that the risks of material misstatement may exist at two levels:[3]

the overall financial statement level and the assertion level for classes of transactions, account balances, and disclosures.

.03 Section 200 requires the auditor to exercise professional judgment in planning and performing an audit and to plan and perform an audit with professional skepticism, recognizing that circumstances may exist that cause the financial statements to be materially misstated.[4]

.04 Risks at the financial statement level relate pervasively to the financial statements as a whole and potentially affect many assertions. Risks of material misstatement at the assertion level consist of two components:[5] inherent risk and control risk.

- *Inherent risk* is described as the susceptibility of an assertion about a class of transactions, account balance, or disclosure to a misstatement that could be material, either individually or when aggregated with other misstatements, before consideration of any related controls.
- *Control risk* is described as the risk that a misstatement that could occur in an assertion about a class of transactions, account balance, or disclosure and that could be material, either individually or when aggregated with other misstatements, will not be prevented, or detected and corrected, on a timely basis by the entity's system of internal control.

.05 Section 200 explains that risks of material misstatement are assessed at the assertion level in order to determine the nature, timing, and extent of further audit procedures necessary to obtain sufficient appropriate audit evidence. For purposes of generally accepted auditing standards (GAAS), a risk of material misstatement exists when (*a*) there is a reasonable possibility of a misstatement occurring (that is, its likelihood), and (*b*) if it were to occur, there is a reasonable possibility of the misstatement being material (that is, its magnitude).[6] For the identified risks of material misstatement at the assertion level, a separate assessment of inherent risk and control risk is required by this section. As explained in section 200, inherent risk is higher for some assertions and related classes of transactions, account balances, and disclosures than for others. The degree to which the level of inherent risk varies is referred to in this section as the *spectrum of inherent risk*.

.06 Risks of material misstatement identified and assessed by the auditor include both those due to error and those due to fraud. Although both are addressed by this section, the significance of fraud is such that further requirements and guidance are included in section 240, *Consideration of Fraud in a Financial Statement Audit*, in relation to risk assessment

[1]Paragraph .19 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

[2]Paragraph .14 of section 200.

[3]Paragraph .A38 of section 200.

[4]Paragraphs .17–.18 of section 200.

[5]Paragraph .14 of section 200.

[6]Paragraphs .A41–.A43 of section 200 and paragraph .07 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

procedures and related activities to obtain information that is used to identify, assess, and respond to the risks of material misstatement due to fraud.

.07 The auditor's risk identification and assessment process is iterative and dynamic. The auditor's understanding of the entity and its environment, the applicable financial reporting framework, and the entity's system of internal control are interdependent with concepts within the requirements to identify and assess the risks of material misstatement. In obtaining the understanding required by this section, initial expectations of risks may be developed, which may be further refined as the auditor progresses through the risk identification and assessment process. In addition, paragraph .41 of this section and section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*,[7] require the auditor to revise the risk assessments and modify further overall responses and further audit procedures, based on audit evidence obtained from performing further audit procedures in accordance with section 330, or if new information is obtained.

.08 Section 330 requires the auditor to design and implement overall responses to address the assessed risks of material misstatement at the financial statement level.[8]Section 330 further explains that the auditor's assessment of the risks of material misstatement at the financial statement level, and the auditor's overall responses, is affected by the auditor's understanding of the control environment. Section 330 also requires the auditor to design and perform further audit procedures whose nature, timing, and extent are based on and are responsive to the assessed risks of material misstatement at the relevant assertion level.[9]

Scalability

.09 Section 200 states that some AU-C sections include scalability considerations, which illustrate the application of the requirements to all entities, regardless of whether their nature and circumstances are less complex or more complex.[10] This section is intended for audits of all entities, regardless of size or complexity; therefore, the application material incorporates considerations specific to both less and more complex entities, where appropriate. Although the size of an entity may be an indicator of its complexity, some smaller entities may be complex, and some larger entities may be less complex.

Effective Date

.10 This section is effective for audits of financial statements for periods ending on or after December 15, 2023.

[8]Paragraph .05 of section 330.

[9]Paragraph .06 of section 330.

[10]Paragraph .A68 of section 200.

Objective

.11 The objective of the auditor is to identify and assess the risks of material misstatement, whether due to fraud or error, at the financial statement and assertion levels, thereby providing a basis for designing and implementing responses to the assessed risks of material misstatement.

Definitions

.12 For purposes of GAAS, the following terms have the meanings attributed:

Assertions. Representations, explicit or otherwise, with respect to the recognition, measurement, presentation, and disclosure of information in the financial statements, which are inherent in management, representing that the financial statements are prepared in accordance with the applicable financial reporting framework. Assertions are used by the auditor to consider the different types of potential misstatements that may occur when identifying, assessing, and responding to the risks of material misstatement. (Ref: par. .A1)

Business risk. A risk resulting from significant conditions, events, circumstances, actions, or inactions that could adversely affect an entity's ability to achieve its objectives and execute its strategies, or from the setting of inappropriate objectives and strategies.

Controls. Policies or procedures that an entity establishes to achieve the control objectives of management or those charged with governance. In this context (Ref: par. .A2–.A5)

i. policies are statements of what should, or should not, be done within the entity to effect control. Such statements may be documented, explicitly stated in communications, or implied through actions and decisions.

ii. procedures are actions to implement policies.

General information technology (IT) controls. Controls over the entity's IT processes that support the continued proper operation of the IT environment, including the continued effective functioning of information-processing controls and the integrity of information in the entity's information system. Also see **IT environment**. (Ref: par. A6)

Information-processing controls. Controls relating to the processing of information in IT applications or manual information processes in the entity's information system that directly address risks to the integrity of information. (Ref: par. .A7–.A8)

Inherent risk factors. Characteristics of events or conditions that affect the susceptibility to misstatement, whether due to fraud or error, of an assertion about a class of transactions, account balance, or disclosure, before consideration of controls. Such factors may be qualitative or quantitative and include complexity, subjectivity, change, uncertainty, or susceptibility to misstatement due to management bias or other fraud risk factors[11] insofar as they affect inherent risk.

Depending on the degree to which the inherent risk factors affect the susceptibility of an assertion to misstatement, the level of inherent risk varies on a scale that is referred to as *the spectrum of inherent risk*. (Ref: par. .A9–.A11, .A238–.A244)

IT environment. The IT applications and supporting IT infrastructure, as well as the IT processes and personnel involved in those processes, that an entity uses to support business operations and achieve business strategies. For the purposes of this definition

i. an *IT application* is a program or a set of programs that is used in the initiation, processing, recording, and reporting of transactions or information. IT applications include data warehouses and report writers.

ii. the IT infrastructure comprises the network, operating systems, and databases and their related hardware and software.

iii. the IT processes are the entity's processes to manage access to the IT environment, manage program changes or changes to the IT environment, and manage IT operations.

Relevant assertions. An assertion about a class of transactions, account balance, or disclosure is relevant when it has an identified risk of material misstatement. A risk of material misstatement exists when (*a*) there is a reasonable possibility of a misstatement occurring (that is, its likelihood), and (*b*) if it were to occur, there is a reasonable possibility of the misstatement being material (that is, its magnitude).[12] The determination of whether an assertion is a relevant assertion is made before consideration of any related controls (that is, the determination is based on inherent risk). (Ref: par. .A12)

Risks arising from the use of IT. Susceptibility of information-processing controls to ineffective design or operation, or risks to the integrity of information in the entity's information system, due to ineffective design or operation of controls in the entity's IT processes. See **IT environment**. (Ref: par. .A6 and .A13)

Risk assessment procedures. The audit procedures designed and performed to identify and assess the risks of material misstatement, whether due to fraud or error, at the financial statement and assertion levels.

Significant class of transactions, account balance, or disclosure. A class of transactions, account balance, or disclosure for which there is one or more relevant assertions. (Ref: par. .A14)

Significant risk. An identified risk of material misstatement (Ref: par. .A15)

i. for which the assessment of inherent risk is close to the upper end of the spectrum of inherent risk due to the degree to which inherent risk factors affect the combination

[11] Paragraphs .A28–.A32 of section 240, *Consideration of Fraud in a Financial Statement Audit*.

[12] Paragraphs .A41–.A43 of section 200 and paragraph .07 of section 330.

of the likelihood of a misstatement occurring and the magnitude of the potential misstatement should that misstatement occur, or

ii. that is to be treated as a significant risk in accordance with the requirements of other AU-C sections.[13]

System of internal control. The system designed, implemented, and maintained by those charged with governance, management, and other personnel to provide reasonable assurance about the achievement of an entity's objectives with regard to reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations. For purposes of GAAS, the system of internal control consists of five interrelated components:

i. Control environment

ii. The entity's risk assessment process

iii. The entity's process to monitor the system of internal control

iv. The information system and communication

v. Control activities

(Ref: par. .A16)

Requirements

Risk Assessment Procedures and Related Activities

.13 The auditor should design and perform risk assessment procedures to obtain audit evidence that provides an appropriate basis for (Ref: par. .A17–.A24)

a. the identification and assessment of risks of material misstatement, whether due to fraud or error, at the financial statement and assertion levels, and

b. the design of further audit procedures in accordance with section 330.

The auditor should design and perform risk assessment procedures in a manner that is not biased towards obtaining audit evidence that may be corroborative or towards excluding audit evidence that may be contradictory.

.14 The risk assessment procedures should include the following: (Ref: par. .A25–.A27)

a. Inquiries of management and of other appropriate individuals within the entity, including individuals within the internal audit function (if the function exists) (Ref: par. .A28–.A32)

---

[13]Paragraph .27 of section 240 and paragraph .20 of section 550, *Related Parties*.

b. Analytical procedures (Ref: par. .A33–.A37)

c. Observation and inspection (Ref: par. .A38–.A42)

Information From Other Sources

.15 In obtaining audit evidence in accordance with paragraph .13, the auditor should consider information from (Ref: par. .A43–.A44)

a. the auditor's procedures regarding acceptance or continuance of the client relationship or the audit engagement, and

b. when applicable, other engagements performed by the engagement partner for the entity.

.16 When the auditor intends to use information obtained from the auditor's previous experience with the entity and from audit procedures performed in previous audits, the auditor should evaluate whether such information remains relevant and reliable as audit evidence for the current audit. (Ref: par. .A45–.A47)

Engagement Team Discussion

.17 The engagement partner and other key engagement team members should discuss the application of the applicable financial reporting framework and the susceptibility of the entity's financial statements to material misstatement. (Ref: par. .A48–.A54)

.18 When there are engagement team members not involved in the engagement team discussion, the engagement partner should determine which matters are to be communicated to those members.

Obtaining an Understanding of the Entity and Its Environment, the Applicable Financial Reporting Framework, and the Entity's System of Internal Control (Ref: par. .A55–.A57)

Understanding the Entity and Its Environment, and the Applicable Financial Reporting Framework (Ref: par. .A58–.A63)

.19 The auditor should perform risk assessment procedures to obtain an understanding of

a. the following aspects of the entity and its environment:

   i. The entity's organizational structure, ownership and governance, and its business model, including the extent to which the business model integrates the use of IT (Ref: par. .A64–.A77)

   ii. Industry, regulatory, and other external factors (Ref: par. .A78–.A82)

   iii. The measures used, internally and externally, to assess the entity's financial performance (Ref: par. .A83–.A90)

b. the applicable financial reporting framework and the entity's accounting policies and the reasons for any changes thereto. (Ref: par. .A91–.A93)

c. how inherent risk factors affect the susceptibility of assertions to misstatement and the degree to which they do so, in the preparation of the financial statements in accordance with the applicable financial reporting framework, based on the understanding obtained in subparagraphs *a*–*b*. (Ref: par. .A94–.A99)

.20 The auditor should evaluate whether the entity's accounting policies are appropriate and consistent with the applicable financial reporting framework.

Understanding the Components of the Entity's System of Internal Control (Ref: par. .A100–.A111)

Control Environment, the Entity's Risk Assessment Process, and the Entity's Process to Monitor the System of Internal Control (Ref: par. .A112–.A114)

Control Environment

.21 The auditor should, through performing risk assessment procedures, obtain an understanding of the control environment relevant to the preparation of the financial statements by (Ref: par. .A115–.A116)

a. understanding the set of controls, processes, and structures that address (Ref: par. .A117)

   i. how management's oversight responsibilities are carried out, such as the entity's culture and management's commitment to integrity and ethical values;

   ii. when those charged with governance are separate from management, the independence of, and oversight over the entity's system of internal control by, those charged with governance;

   iii. the entity's assignment of authority and responsibility;

   iv. how the entity attracts, develops, and retains competent individuals;

   v. how the entity holds individuals accountable for their responsibilities in the pursuit of the objectives of the system of internal control; and

b. evaluating, based on the auditor's understanding obtained in paragraph .21*a*, whether (Ref: par. .A118–.A123)

   i. management, with the oversight of those charged with governance, has created and maintained a culture of honesty and ethical behavior;

   ii. the control environment provides an appropriate foundation for the other components of the entity's system of internal control considering the nature and complexity of the entity; and

iii. control deficiencies identified in the control environment undermine the other components of the entity's system of internal control

The Entity's Risk Assessment Process

.22 The auditor should, through performing risk assessment procedures, obtain an understanding of the entity's risk assessment process relevant to the preparation of the financial statements by

a. understanding the entity's process for (Ref: par. .A124–.A126)

   i. identifying business risks, including the potential for fraud, relevant to financial reporting objectives; (Ref: par. .A71)

   ii. assessing the significance of those risks, including the likelihood of their occurrence;

   iii. addressing those risks; and

b. evaluating, based on the auditor's understanding obtained in paragraph .22*a*, whether the entity's risk assessment process is appropriate to the entity's circumstances considering the nature and complexity of the entity. (Ref: par. .A127–.A129)

.23 If the auditor identifies risks of material misstatement that management failed to identify, the auditor should

a. determine whether any such risks are of a kind that the auditor expects would have been identified by the entity's risk assessment process and, if so, obtain an understanding of why the entity's risk assessment process failed to identify such risks of material misstatement; and

b. consider the implications for the auditor's evaluation in paragraph .22*b*.

The Entity's Process for Monitoring the System of Internal Control

.24 The auditor should, through performing risk assessment procedures, obtain an understanding of the entity's process for monitoring the system of internal control relevant to the preparation of the financial statements by (Ref: par. .A130–.A131)

a. understanding those aspects of the entity's process that address

   i. ongoing and separate evaluations for monitoring the effectiveness of controls and the identification and remediation of control deficiencies identified (Ref: par. .A132–.A133) and

   ii. the entity's internal audit function, if any, including its nature, responsibilities, and activities (Ref: par. .A134–.A135).

b. understanding the sources of the information used in the entity's process to monitor the system of internal control, and the basis upon which management considers the information to be sufficiently reliable for the purpose (Ref: par. .A136–.A137).

c. evaluating, based on the auditor's understanding obtained in paragraph .24*a*–*b*, whether the entity's process for monitoring the system of internal control is appropriate to the entity's circumstances considering the nature and complexity of the entity (Ref: par. .A138–.A139).

Information System and Communication, and Control Activities (Ref: par. .A140–.A147)

<u>The Information System and Communication</u>

.25 The auditor should, through performing risk assessment procedures, obtain an understanding of the entity's information system and communication relevant to the preparation of the financial statements by (Ref: par. .A148–.A149)

a. understanding the entity's information-processing activities, including its data and information, the resources to be used in such activities and the policies that define, for significant classes of transactions, account balances, and disclosures (Ref: par. .A150–.A162)

    i. how information flows through the entity's information system, including how

        1. transactions are initiated, and how information about them is recorded, processed, corrected as necessary, incorporated in the general ledger, and reported in the financial statements and

        2. information about events and conditions, other than transactions, is captured, processed, and disclosed in the financial statements,

    ii. the accounting records, specific accounts in the financial statements, and other supporting records relating to the flows of information in the information system,

    iii. the financial reporting process used to prepare the entity's financial statements, including disclosures, and

    iv. the entity's resources, including the IT environment, relevant to preceding *a*(i)–(iii).

b. *b*. understanding how the entity communicates significant matters that support the preparation of the financial statements and related reporting responsibilities in the information system and other components of the system of internal control (Ref: par. .A163–.A164)

    i. between people within the entity, including how financial reporting roles and responsibilities are communicated,

    ii. between management and those charged with governance,

iii. with external parties, such as those with regulatory authorities.

c. evaluating, based on the auditor's understanding obtained in paragraph .25*a*–*b*, whether the entity's information system and communication appropriately support the preparation of the entity's financial statements in accordance with the applicable financial reporting framework considering the nature and complexity of the entity. (Ref: par. .A165).

Control Activities

.26 The auditor should, through performing risk assessment procedures, obtain an understanding of the control activities component, by applying the requirements in paragraphs .27–.30. (Ref: par. .A167–.A179)

.27 The auditor should identify the following controls that address risks of material misstatement at the assertion level:

a. Controls that address a risk that is determined to be a significant risk (Ref: par. .A180–.A181)

b. Controls over journal entries and other adjustments as required by section 240[14] (Ref: par. .A182–.A183)

c. Controls for which the auditor plans to test operating effectiveness in determining the nature, timing, and extent of substantive procedures, which should include controls that address risks for which substantive procedures alone do not provide sufficient appropriate audit evidence (Ref: par. .A184–.A186)

d. Other controls that, based on the auditor's professional judgment, the auditor considers are appropriate to enable the auditor to meet the objectives of paragraph .13 with respect to risks at the assertion level (Ref: par. .A187–.A188)

.28 Based on controls identified in paragraph .27, the auditor should identify the IT applications and the other aspects of the entity's IT environment that are subject to risks arising from the use of IT.

.29 For the IT applications and other aspects of the IT environment identified in paragraph .28, the auditor should identify the following: (Ref: par. .A189–.A200)

a. The related risks arising from the use of IT

b. The entity's general IT controls that address such risks

.30 For each control identified in paragraph .27 or .29*b*, the auditor should (Ref: par. .A201–.A210)

[14]Paragraph 32*a*(i) of section 240.

a. evaluate whether the control is designed effectively to address the risk of material misstatement at the assertion level or effectively designed to support the operation of other controls.

b. determine whether the control has been implemented by performing procedures in addition to inquiry of the entity's personnel.

Control Deficiencies Within the Entity's System of Internal Control

.31 Based on the auditor's understanding and evaluation of the components of the entity's system of internal control as required by this section, the auditor should determine whether one or more control deficiencies have been identified. (Ref: par. .A211–.A212)

Identifying and Assessing the Risks of Material Misstatement (Ref: par. .A213–.A214)

Identifying Risks of Material Misstatement

.32 The auditor should identify the risks of material misstatement and determine whether they exist at (Ref: par. .A215–.A221)

a. the financial statement level (Ref: par. .A222–.A229) or

b. the assertion level for classes of transactions, account balances, and disclosures (Ref: par. .A230–.A231).

.33 The auditor should determine the relevant assertions and the related significant classes of transactions, account balances, and disclosures. (Ref: par. .A232–.A234)

Assessing Risks of Material Misstatement at the Financial Statement Level

.34 For identified risks of material misstatement at the financial statement level, the auditor should assess the risks and (Ref: par. .A222–.A229)

a. determine whether such risks affect the assessment of risks at the assertion level, and

b. evaluate the nature and extent of their pervasive effect on the financial statements.

Assessing Risks of Material Misstatement at the Assertion Level

Assessing Inherent Risk (Ref: par. .A235–.A244)

.35 For identified risks of material misstatement at the assertion level, the auditor should assess inherent risk by assessing the likelihood and magnitude of misstatement. In doing so, the auditor should take into account how, and the degree to which

a. inherent risk factors affect the susceptibility of relevant assertions to misstatement, and

b. the risks of material misstatement at the financial statement level affect the assessment of inherent risk for risks of material misstatement at the assertion level. (Ref: par. .A245–.A246)

.36 The auditor should determine whether any of the assessed risks of material misstatement are significant risks. (Ref: par. .A247–.A251)

.37 The auditor should determine whether substantive procedures alone cannot provide sufficient appropriate audit evidence for any of the risks of material misstatement at the assertion level. (Ref: par. .A252–.A255)

Assessing Control Risk

.38 For identified risks of material misstatement at the assertion level, the auditor should assess control risk based on the auditor's understanding of controls and the auditor's plan to test the operating effectiveness of controls. If the auditor does not plan to test the operating effectiveness of controls, the auditor should assess control risk at the maximum level such that the assessment of the risk of material misstatement is the same as the assessment of inherent risk. (Ref: par. .A256–.A260)

Evaluating the Audit Evidence Obtained From the Risk Assessment Procedures

.39 The auditor should evaluate whether the audit evidence obtained from the risk assessment procedures provides an appropriate basis for the identification and assessment of the risks of material misstatement. If not, the auditor should perform additional risk assessment procedures until audit evidence has been obtained to provide such a basis. In identifying and assessing the risks of material misstatement, the auditor should take into account all audit evidence obtained from the risk assessment procedures, whether corroborative or contradictory to assertions made by management. (Ref: par. .A261–.A263)

Classes of Transactions, Account Balances, and Disclosures That Are Not Significant but Are Material

.40 For material classes of transactions, account balances, or disclosures that have not been determined to be significant classes of transactions, account balances, or disclosures, the auditor should evaluate whether the auditor's determination remains appropriate. (Ref: par. .A264–.A265)

Revision of Risk Assessment

.41 If the auditor obtains new information that is inconsistent with the audit evidence on which the auditor originally based the identification or assessments of the risks of material misstatement, the auditor should revise the identification or assessment. (Ref: par. .A266)

Documentation

.42 The auditor should include in the audit documentation[15] (Ref: par. .A267–.A273)

a. the discussion among the engagement team in accordance with paragraphs .17–.18 and the significant decisions reached;

b. key elements of the auditor's understanding in accordance with paragraphs .19, .21–.22, and .24–.25; the sources of information from which the auditor's understanding was obtained; and the risk assessment procedures performed;

c. the evaluation of the design of identified controls, and determination whether such controls have been implemented, in accordance with paragraph .30; and

d. the identified and assessed risks of material misstatement at the financial statement level and at the assertion level, including significant risks and risks for which substantive procedures alone cannot provide sufficient appropriate audit evidence, and the rationale for the significant judgments made.

Application and Other Explanatory Material

Definitions (Ref: par. .12)

Assertions

.A1 Categories of assertions are used by auditors to consider the different types of potential misstatements that may occur when identifying, assessing, and responding to the risks of material misstatement. Examples of these categories of assertions are described in paragraph .A219. The assertions differ from the written representations required by section 580, *Written Representations*, to confirm certain matters or support other audit evidence.

Controls

.A2 Controls are embedded within the components of the entity's system of internal control.

.A3 Policies are implemented through the actions of personnel within the entity or through the restraint of personnel from taking actions that would conflict with such policies.

.A4 Procedures may be mandated, through formal documentation or other communication by management or those charged with governance, or may result from behaviors that are not mandated but, rather, are conditioned by the entity's culture. Procedures may be enforced through the actions permitted by the IT applications used by the entity or other aspects of the entity's IT environment.

.A5 Controls may be direct or indirect (see paragraphs .A112, .A140, and .A168). *Direct controls* are controls that are precise enough to address risks of material misstatement at the assertion level. *Indirect controls* are controls that support direct controls. Although indirect controls are not sufficiently precise to prevent, or detect and correct, misstatements at the assertion level, they are foundational and may have an indirect effect on the likelihood that a misstatement will be prevented or detected on a timely basis.

---

[15] Paragraphs .08–.12 and .A8–.A9 of section 230, *Audit Documentation*.

General IT Controls

.A6 The integrity of information may include the completeness, accuracy, and validity of transactions and other information. Although this section does not prescribe the use of a particular internal control framework, the auditor may find the following guidance regarding the concepts encompassed by the term *validity*, from COSO's 2013 *Internal Control — Integrated Framework* (COSO framework), helpful: "Recorded transactions represent economic events that actually occurred and were executed according to prescribed procedures. Validity is generally achieved through control activities that include the authorization of transactions as specified by an organization's established policies and procedures (that is, approval by a person having the authority to do so)."[16] The U.S. Government Accountability Office's *Standards for Internal Control in the Federal Government* (the Green Book) provides similar guidance on validity.[17]

Information-Processing Controls

.A7 Risks to the integrity of information arise from susceptibility to ineffective implementation of the entity's information policies, which are policies that define the information flows, records, and reporting processes in the entity's information system. Information-processing controls are procedures that support effective implementation of the entity's information policies. Information-processing controls may be automated (that is, embedded in IT applications) or manual (for example, input or output controls) and may rely on other controls, including other information-processing controls or general IT controls.

.A8 Business processes result in the transactions that are recorded, processed, and reported by the information system. Information-processing controls are also known as *transaction controls*. Such controls directly support the actions to mitigate information-processing risks in an entity's business processes.

Inherent Risk Factors

.A9 Appendix B, "Understanding Inherent Risk Factors," sets out further considerations relating to understanding inherent risk factors.

.A10 Inherent risk factors may be qualitative or quantitative and affect the susceptibility of assertions to misstatement. Qualitative inherent risk factors relating to the preparation of information required by the applicable financial reporting framework include the following:

- Complexity
- Subjectivity
- Change
- Uncertainty

---

[16] Section 7, "Control Activities" of COSO's 2013 *Internal Control—Integrated Framework*.

[17] See paragraph 11.05 of *Standards for Internal Control in the Federal Government*.

- Susceptibility to misstatement due to management bias or other fraud risk factors insofar as they affect inherent risk

.A11 Other inherent risk factors that affect susceptibility of an assertion to misstatement about a class of transactions, account balance, or disclosure may include one or both of the following:

- The quantitative or qualitative significance of the class of transactions, account balance, or disclosure
- The volume or a lack of uniformity in the composition of the items to be processed through the class of transactions or account balance, or to be reflected in the disclosure

Relevant Assertions

.A12 A risk of material misstatement may relate to more than one assertion, in which case, all the assertions to which such a risk relates are relevant assertions. For the purposes of the AU-C sections, a risk of material misstatement exists when (*a*) there is a reasonable possibility of a misstatement occurring (that is, its likelihood), and (*b*) if it were to occur, there is a reasonable possibility of the misstatement being material (that is, its magnitude).[18] There is a reasonable possibility when the likelihood of a material misstatement occurring is more than remote. If an assertion does not have an identified risk of material misstatement, then it is not a relevant assertion.

Risks Arising From the Use of IT

.A13 Appendix E, "Considerations for Understanding IT," sets out further considerations relating to understanding IT.

Significant Class of Transactions, Account Balance, or Disclosure

.A14 A class of transactions, account balance, or disclosure is considered significant when it has an identified risk of material misstatement at the assertion level (that is, there is one or more relevant assertions). The determination of whether a class of transactions, account balance, or disclosure is significant is made before consideration of any related controls (that is, the determination is based on inherent risk).

Significant Risk

.A15 *Significance* can be described as the relative importance of a matter and is judged by the auditor in the context in which the matter is being considered. For inherent risk, significance may be considered in the context of how, and the degree to which, inherent risk factors affect the combination of the likelihood of a misstatement occurring and the magnitude of the potential misstatement should that misstatement occur. The determination of significant risks allows for the auditor to focus more attention on those

[18]Paragraphs .A41–.A43 of section 200 and paragraph .07 of section 330.

risks that are close to the upper end of the spectrum of inherent risk through the performance of certain required responses (see paragraph .A247).

System of Internal Control

.A16 Internal control frameworks may use different terms that are similar to the concept of system of internal control. For example, the 2013 COSO framework and the Green Book define *internal control* similarly to the *system of internal control* in this section.

Risk Assessment Procedures and Related Activities (Ref: par. .13–.18)

.A17 The risks of material misstatement to be identified and assessed include both those due to fraud and those due to error, and both are covered by this section. However, the significance of fraud is such that further requirements and guidance are included in section 240 in relation to risk assessment procedures and related activities to obtain information that is used to identify and assess the risks of material misstatement due to fraud.[19] In addition, the following AU-C sections provide further requirements and guidance on identifying and assessing risks of material misstatement regarding specific matters or circumstances:

- Section 540, *Auditing Accounting Estimates and Related Disclosures*, with regard to accounting estimates
- Section 550, *Related Parties*, with regard to related party relationships and transaction
- Section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, with regard to going concern
- Section 600A, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors)*, with regard to group financial statements

.A18 Professional skepticism is necessary for the critical assessment of audit evidence gathered when performing risk assessment procedures. In addition, professional skepticism assists the auditor in remaining alert to audit evidence that is not biased towards corroborating the existence of risks or that may be contradictory. Professional skepticism is an attitude that is applied by the auditor when making professional judgments that then provides the basis for the auditor's actions. The auditor exercises professional judgment in determining when the auditor has audit evidence that provides an appropriate basis for risk assessment.

.A19 Examples of maintaining professional skepticism by the auditor may include the following:

- Considering information that may be used as audit evidence

[19] Paragraphs .12–.27 of section 240.

- Taking into account contradictory information that comes to the auditor's attention
- Considering responses to inquiries and other information obtained from management and those charged with governance
- Being alert to conditions that may indicate possible misstatement due to fraud or error
- Considering whether audit evidence obtained supports the auditor's identification and assessment of the risks of material misstatement in light of the entity's nature and circumstances

Why Obtaining Audit Evidence in an Unbiased Manner Is Important (Ref: par. .13)

.A20 Designing and performing risk assessment procedures to obtain audit evidence to support the identification and assessment of the risks of material misstatement in an unbiased manner may assist the auditor in identifying potentially contradictory information. This may also assist the auditor in maintaining professional skepticism in identifying and assessing the risks of material misstatement.

Sources of Audit Evidence (Ref: par. .13)

.A21 Designing and performing risk assessment procedures to obtain audit evidence in an unbiased manner may involve obtaining evidence from multiple sources within and outside the entity. However, the auditor is not required to perform an exhaustive search to identify all possible sources of audit evidence. In addition to information from other sources,[20] sources of information for risk assessment procedures may include the following:

- Interactions with management, those charged with governance, and other key entity personnel, such as internal auditors
- Certain external parties such as regulators, whether obtained directly or indirectly
- Publicly available information about the entity, for example, entity-issued press releases, materials for analysts or investor group meetings, analysts' reports, or information about trading activity

Regardless of the source of information, the auditor considers the relevance and reliability of the information to be used as audit evidence in accordance with section 500, *Audit Evidence*.[21]

Scalability (Ref: par. .13)

.A22 The nature and extent of risk assessment procedures, including obtaining an understanding pursuant to the following requirements, will vary based on the nature and circumstances of the entity (for example, the formality of the entity's policies and procedures, and processes and systems):

[20] See paragraphs .A43–.A44 of this section.

[21] Paragraph .07 of section 500, *Audit Evidence*.

a. Performing risk assessment procedures (paragraph .19)

b. Understanding the components of internal control

   i. Control environment (paragraph .21)

   ii. The entity's risk assessment process (paragraphs .22–.23)

   iii. The entity's process to monitor the system of internal control (paragraph .24)

   iv. The information system and communication (paragraph .25)

   v. Control activities (paragraphs .26–.30)

The auditor exercises professional judgment to determine the nature and extent of the risk assessment procedures to be performed to meet the requirements of this section.

.A23 Some entities, including less complex entities, and particularly owner-managed entities, may not have established structured processes and systems (for example, a risk assessment process or a process to monitor the system of internal control) or may have established processes or systems with limited documentation or a lack of consistency in how they are undertaken. When such systems and processes lack formality, the auditor may still be able to perform risk assessment procedures through observation and inquiry. Other entities, typically more complex entities, are expected to have more formalized and documented policies and procedures. The auditor may use such documentation in performing risk assessment procedures.

.A24 The nature and extent of risk assessment procedures to be performed in an initial audit may be more extensive than procedures for a recurring engagement. In subsequent periods, the auditor may focus on changes that have occurred since the preceding period.

Types of Risk Assessment Procedures (Ref: par. .14)

.A25 Section 500[22] explains the types of audit procedures that may be performed in obtaining audit evidence from risk assessment procedures and further audit procedures. The nature, timing, and extent of the audit procedures may be affected by the fact that some of the accounting data and other evidence may be available only in electronic form or only at certain points in time.[23] The auditor may perform substantive procedures or tests of controls, in accordance with section 330, concurrently with risk assessment procedures, such as when it is efficient to do so. Audit evidence obtained that supports the identification and assessment of risks of material misstatement may also support the detection of misstatements at the assertion level or the evaluation of the operating effectiveness of controls.

.A26 Although the auditor is required to perform all the risk assessment procedures described in paragraph .14 in the course of obtaining the required understanding of the entity and its environment, the applicable financial reporting framework, and the entity's

[22] Paragraphs .A14–.A17 and .A21–.A26 of section 500.

[23] Paragraph .A12 of section 500.

system of internal control (see paragraphs .19–.30), the auditor is not required to perform all of them for each aspect of that understanding. Other procedures may be performed when the information to be obtained may be helpful in identifying risks of material misstatement. Examples of such procedures may include making inquiries of the entity's external legal counsel, or of valuation specialists that the entity has used.

Automated Tools and Techniques (Ref: par. .14)

.A27 Using automated tools and techniques, the auditor may perform risk assessment procedures on large volumes of data (from the general ledger, sub-ledgers, or other operational data), including for analysis, recalculations, reperformance, or reconciliations.

Inquiries of Management and Others Within the Entity (Ref: par. .14a)

Why Inquiries Are Made of Management and Others Within the Entity

.A28 Information obtained by the auditor to support an appropriate basis for the identification and assessment of risks, and the design of further audit procedures, may be obtained through inquiries of management and those responsible for financial reporting. As described in section 500, responses to inquiries may provide the auditor with information not previously possessed, with corroborative audit evidence, or with information that differs significantly from other information that the auditor has obtained.[24]

.A29 Inquiries of management and those responsible for financial reporting and of other appropriate individuals within the entity and other employees with different levels of authority may offer the auditor varying perspectives when identifying and assessing risks of material misstatement. Examples follow:

- Inquiries directed toward those charged with governance may help the auditor understand the extent of oversight by those charged with governance over the preparation of the financial statements by management. Section 260, *The Auditor's Communication With Those Charged With Governance*,[25] identifies the importance of effective two-way communication in assisting the auditor to obtain information from those charged with governance in this regard.
- Inquiries of employees responsible for initiating, processing, or recording complex or unusual transactions may help the auditor to evaluate the appropriateness of the selection and application of certain accounting policies.
- Inquiries directed toward in-house legal counsel[26] may provide information about such matters as litigation; compliance with laws and regulations; knowledge of fraud or suspected fraud affecting the entity; warranties; post-sales obligations; arrangements (such as joint ventures) with business partners; and the meaning of contractual terms.

---

[24] Paragraphs .A24–.A25 of section 500.

[25] Paragraph .A1 of section 260, *The Auditor's Communication With Those Charged With Governance*.

[26] See paragraph .16 of section 501, *Audit Evidence — Specific Considerations for Selected Items*.

- Inquiries directed toward marketing or sales personnel may provide information about changes in the entity's marketing strategies, sales trends, or contractual arrangements with its customers.
- Inquiries directed toward the risk management function (or inquiries of those performing such roles) may provide information about operational and regulatory risks that may affect financial reporting.
- Inquiries directed toward IT personnel may provide information about IT processes as well as system changes, system or control failures, or other IT-related risks.

Considerations Specific to Governmental Entities

.A30 When making inquiries of those who may have information that is likely to assist in identifying risks of material misstatement, auditors of governmental entities may obtain information from additional sources such as from the auditors that are involved in performance or other audits related to the entity.

Inquiries of the Internal Audit Function (Ref: par. .14a)

Why Inquiries Are Made of the Internal Audit Function (If the Function Exists)

.A31 If an entity has an internal audit function, inquiries of the appropriate individuals within the function may assist the auditor in understanding the entity and its environment, and the entity's system of internal control, in the identification and assessment of risks. Appendix D, "Considerations for Understanding an Entity's Internal Audit Function," sets out considerations for understanding an entity's internal audit function.

.A32 Some entities, for example, governmental entities, may have additional responsibilities with regard to internal control and compliance with applicable laws and regulations. Inquiries of appropriate individuals in the internal audit function may assist the auditors in identifying the risk of material noncompliance with applicable laws and regulations and the risk of control deficiencies related to financial reporting.

Analytical Procedures (Ref: par. .14b)

Why Analytical Procedures Are Performed as a Risk Assessment Procedure

.A33 Analytical procedures help identify inconsistencies, unusual transactions or events, and amounts, ratios, and trends that indicate matters that may have audit implications. Unusual or unexpected relationships that are identified may assist the auditor in identifying risks of material misstatement, especially risks of material misstatement due to fraud.

.A34 Analytical procedures performed as risk assessment procedures may, therefore, assist in identifying and assessing the risks of material misstatement by identifying aspects of the entity of which the auditor was unaware or understanding how inherent risk factors, such as change, affect susceptibility of assertions to misstatement.

Types of Analytical Procedures

.A35 Analytical procedures performed as risk assessment procedures may be as follows:

- Include both financial and nonfinancial information, for example, the relationship between sales and square footage of selling space or volume of goods sold (nonfinancial).
- Use data aggregated at a high level. Accordingly, the results of those analytical procedures may provide a broad initial indication about the likelihood and potential magnitude of a material misstatement. For example, in the audit of many entities, including those with less complex business models and processes, and a less complex information system, the auditor may perform a comparison of information, such as the change in interim or monthly account balances from balances in prior periods, to obtain an indication of potentially higher risk areas.

.A36 This section addresses the auditor's use of analytical procedures as risk assessment procedures. Section 520, *Analytical Procedures*, addresses the auditor's use of analytical procedures as substantive procedures (substantive analytical procedures) and the auditor's responsibility to perform analytical procedures near the end of the audit. Accordingly, analytical procedures performed as risk assessment procedures are not required to be performed in accordance with the requirements of section 520. However, the requirements and application material in section 520 may provide useful guidance to the auditor when performing analytical procedures as part of the risk assessment procedures.

Automated Tools and Techniques

.A37 Analytical procedures can be performed using a number of tools or techniques, which may be automated. Applying automated analytical procedures to the data may be referred to as *data analytics*. For example, the auditor may use a spreadsheet to perform a comparison of actual recorded amounts to budgeted amounts or may perform a more advanced procedure by extracting data from the entity's information system, and further analyzing this data using visualization techniques to identify classes of transactions, account balances, or disclosures for which further specific risk assessment procedures may be warranted.

Observation and Inspection (Ref: par. .14c)

Why Observation and Inspection Are Performed as Risk Assessment Procedures

.A38 Observation and inspection may support, corroborate, or contradict inquiries of management and others and may also provide information about the entity and its environment.

Scalability

.A39 When policies or procedures are not documented, or the entity has less formalized controls, the auditor may still be able to obtain some audit evidence to support the identification and assessment of the risks of material misstatement through observation or inspection of the performance of the control. Examples are as follows:

- The auditor may obtain an understanding of controls over an inventory count, even if they have not been documented by the entity, through a combination of inquiry and direct observation.
- The auditor may be able to observe segregation of duties.
- The auditor may be able to observe passwords being entered.

Observation and Inspection as Risk Assessment Procedures

.A40 Risk assessment procedures may include observation or inspection of the following:

- The entity's operations
- Internal documents (such as business plans and strategies), records, and internal control manuals
- Reports prepared by management (such as quarterly management reports and interim financial statements) and those charged with governance (such as minutes of board of directors' meetings)
- The entity's premises and plant facilities
- Information obtained from external sources such as trade and economic journals; reports by analysts, banks, or rating agencies; regulatory or financial publications; or other external documents about the entity's financial performance (such as those referred to in paragraph .A88)
- The behaviors and actions of management or those charged with governance (such as the observation of an audit committee meeting)

Automated Tools or Techniques

.A41 Automated tools or techniques may also be used to observe or inspect particular assets. For example, such tools and techniques may include the use of remote observation tools, such as a video camera or drone.

Considerations Specific to Governmental Entities

.A42 Risk assessment procedures performed by auditors of governmental entities may also include observation and inspection of documents prepared by management for the governing body, for example, documents related to performance reporting.

Information From Other Sources (Ref: par. .15)

Why the Auditor Considers Information From Other Sources

.A43 Information obtained from other sources may be relevant to the identification and assessment of the risks of material misstatement by providing information and insights about the following:

- The nature of the entity and its business risks, and what may have changed from previous periods
- The integrity and ethical values of management and those charged with governance, which may also be relevant to the auditor's understanding of the control environment
- The applicable financial reporting framework and its application to the nature and circumstances of the entity

Other Relevant Sources

.A44 Other relevant sources of information are as follows:

- The auditor's procedures regarding acceptance or continuance of the client relationship or the audit engagement in accordance with section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, including the conclusions reached thereon.[27]
- Other engagements performed for the entity by the engagement partner. The engagement partner may have obtained knowledge relevant to the audit, including about the entity and its environment, when performing other engagements for the entity. Such engagements may include agreed-upon procedures engagements or other audit or assurance engagements, including engagements to address incremental reporting requirements in the jurisdiction.

Information From the Auditor's Previous Experience With the Entity and Previous Audits (Ref: par. .16)

Why Information From Previous Audits Is Important to the Current Audit

.A45 The auditor's previous experience with the entity and from audit procedures performed in previous audits may provide the auditor with information that is relevant to the auditor's determination of the nature and extent of risk assessment procedures, and the identification and assessment of risks of material misstatement.

Nature of the Information From Previous Audits

.A46 The auditor's previous experience with the entity and audit procedures performed in previous audits may provide the auditor with information about the following matters:

[27] Paragraph .14 of section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*.

- Past misstatements and whether they were corrected on a timely basis
- The nature of the entity and its environment, and the entity's system of internal control (including control deficiencies)
- Significant changes that the entity or its operations may have undergone since the prior financial period
- Those particular types of transactions and other events or account balances (and related disclosures) in which the auditor experienced difficulty in performing the necessary audit procedures, for example, due to their complexity

.A47 The auditor is required to determine whether information obtained from the auditor's previous experience with the entity and from audit procedures performed in previous audits remains relevant and reliable, if the auditor intends to use that information for the purposes of the current audit. If the nature or circumstances of the entity have changed, or new information has been obtained, the information from prior periods may no longer be relevant or reliable for the current audit. To determine whether changes have occurred that may affect the relevance or reliability of such information, the auditor may make inquiries and perform other appropriate audit procedures, such as walk-throughs of the applicable information-processing activities in the information system.

Engagement Team Discussion (Ref: par. .17–.18)

Why the Engagement Team Is Required to Discuss the Application of the Applicable Financial Reporting Framework and the Susceptibility of the Entity's Financial Statements to Material Misstatement

.A48 Key engagement team members include those members who have significant engagement responsibilities, including the engagement partner. The manner in which the discussion is conducted depends on the individuals involved and the circumstances of the engagement. For example, if the audit involves more than one location, there could be multiple discussions with team members in different locations.

.A49 The discussion among the engagement team about the application of the applicable financial reporting framework and the susceptibility of the entity's financial statements to material misstatement accomplishes the following:

- Provides an opportunity for more experienced engagement team members, including the engagement partner, to share their insights based on their knowledge of the entity. Sharing information contributes to an enhanced understanding by all engagement team members.
- Allows the engagement team members to exchange information about the business risks to which the entity is subject, how inherent risk factors may affect the susceptibility of classes of transactions, account balances, and disclosures to misstatement, and about how and where the financial statements might be susceptible to material misstatement due to fraud or error.

- Assists the engagement team members in gaining a better understanding of the potential for material misstatement of the financial statements in the specific areas assigned to them and to understand how the results of the audit procedures that they perform may affect other aspects of the audit, including the decisions about the nature, timing, and extent of further audit procedures. In particular, the discussion assists engagement team members in further considering contradictory information based on each member's own understanding of the nature and circumstances of the entity.
- Provides a basis upon which engagement team members communicate and share new information obtained throughout the audit that may affect the assessment of risks of material misstatement or the audit procedures performed to address these risks.

Section 240 requires the engagement team discussion to place particular emphasis on how and where the entity's financial statements may be susceptible to material misstatement due to fraud, including how fraud may occur.[28]

.A50 Professional skepticism is necessary for the critical assessment of audit evidence, and a robust and open engagement team discussion, including for recurring audits, may lead to improved identification and assessment of the risks of material misstatement. Another outcome from the discussion may be that the auditor identifies specific areas of the audit for which maintaining professional skepticism may be particularly important and may lead to the involvement of more experienced members of the engagement team who are appropriately skilled to be involved in the performance of audit procedures related to those areas.

.A51 As part of the discussion among the engagement team, consideration may also be given to additional broader objectives, and related risks, arising from specific audit requirements, for example, those related to governmental entities.

Scalability

.A52 When the engagement is carried out by a single individual, such as a sole practitioner (that is, when an engagement team discussion would not be possible), consideration of the matters referred to in paragraphs .A49 and .A54, nonetheless, may assist the auditor in identifying where there may be risks of material misstatement.

.A53 When an engagement is carried out by a large engagement team, such as for an audit of group financial statements, it is not always necessary or practical for the discussion to include all members in a single discussion (for example, in a multi-location audit), nor is it necessary for all the members of the engagement team to be informed of all the decisions reached in the discussion. The engagement partner may discuss matters with key members of the engagement team, including, if considered appropriate, those with specific skills or knowledge and those responsible for the audits of components, while delegating discussion with others, taking into account the extent of communication considered necessary throughout the engagement team. A communications plan, agreed to by the engagement partner, may be useful.

---

[28]Paragraph .15 of section 240.

Discussion of Disclosures in the Applicable Financial Reporting Framework

.A54 As part of the discussion among the engagement team, consideration of the disclosure requirements of the applicable financial reporting framework assists in identifying early in the audit where there may be risks of material misstatement in relation to disclosures, even in circumstances in which the applicable financial reporting framework requires only simplified disclosures. Matters the engagement team may discuss include the following:

- Changes in financial reporting requirements that may result in significant, new, or revised disclosures
- Changes in the entity's environment, financial condition, or activities that may result in significant, new, or revised disclosures, for example, a significant business combination in the period under audit
- Disclosures for which obtaining sufficient appropriate audit evidence may have been difficult in the past
- Disclosures about complex matters, including those involving significant management judgment about what information to disclose

Obtaining an Understanding of the Entity and Its Environment, the Applicable Financial Reporting Framework, and the Entity's System of Internal Control (Ref: par. .19–.31)

.A55 Appendixes A–F set out further considerations relating to obtaining an understanding of the entity and its environment, the applicable financial reporting framework, and the entity's system of internal control.

Obtaining the Required Understanding (Ref: par. .19–.31)

.A56 Obtaining an understanding of the entity and its environment, the applicable financial reporting framework, and the entity's system of internal control is a dynamic and iterative process of gathering, updating, and analyzing information and continues throughout the audit. Therefore, the auditor's expectations may change as new information is obtained.

.A57 The auditor's understanding of the entity and its environment and the applicable financial reporting framework may also assist the auditor in developing initial expectations about the classes of transactions, account balances, and disclosures that may be significant classes of transactions, account balances, and disclosures. These expected significant classes of transactions, account balances, and disclosures form the basis for the scope of the auditor's understanding of the entity's information system.

Why an Understanding of the Entity and Its Environment, and the Applicable Financial Reporting Framework, Is Required (Ref: par. .19–.20)

.A58 The auditor's understanding of the entity and its environment and the applicable financial reporting framework assist the auditor

a. in understanding the events and conditions that are relevant to the entity, and

b. in identifying how inherent risk factors affect the susceptibility of assertions to misstatement in the preparation of the financial statements, in accordance with the applicable financial reporting framework, and the degree to which they do so.

Such information establishes a frame of reference within which the auditor identifies and assesses risks of material misstatement. This frame of reference also assists the auditor in planning the audit, exercising professional judgment, and maintaining professional skepticism throughout the audit, for example, when

- identifying and assessing risks of material misstatement of the financial statements in accordance with this section or other relevant AU-C sections (for example, relating to risks of fraud in accordance with section 240 or when identifying or assessing risks related to accounting estimates in accordance with section 540);
- performing procedures to help identify instances of noncompliance with laws and regulations that may have a material effect on the financial statements in accordance with section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*;[29]
- evaluating whether the financial statements provide adequate disclosures in accordance with section 700, *Forming an Opinion and Reporting on Financial Statements*;[30]
- determining materiality or performance materiality in accordance with section 320, *Materiality in Planning and Performing an Audit*;[31] or
- considering the appropriateness of the selection and application of accounting policies and the adequacy of financial statement disclosures.

.A59 The auditor's understanding of the entity and its environment, and the applicable financial reporting framework, also informs how the auditor plans and performs further audit procedures, for example, when

- developing expectations for use when performing substantive analytical procedures in accordance with section 520;[32]
- designing and performing further audit procedures to obtain sufficient appropriate audit evidence in accordance with section 330;[33] and
- evaluating the sufficiency and appropriateness of audit evidence obtained (for example, relating to assumptions or management's oral and written representations).

---

[29]Paragraph .14 of section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*.

[30]Paragraph .15*e* of section 700, *Forming an Opinion and Reporting on Financial Statements*.

[31]Paragraphs .10–.11 of section 320, *Materiality in Planning and Performing an Audit*.

[32]Paragraph .05 of section 520, *Analytical Procedures*.

[33]Paragraphs .06–.07 of section 330.

Scalability (Ref: par. .19–.20)

.A60 The nature and extent of the required understanding is a matter of the auditor's professional judgment and varies from entity to entity based on the nature and circumstances of the entity, including the following:

- The size and complexity of the entity, including its IT environment
- The auditor's previous experience with the entity
- The nature of the entity's systems and processes, including whether they are formalized or not
- The nature and form of the entity's documentation

.A61 The auditor's risk assessment procedures to obtain the required understanding may be less extensive in audits of less complex entities and more extensive for entities that are more complex. The depth of the understanding that is required by the auditor is expected to be less than that possessed by management in managing the entity.

.A62 Some financial reporting frameworks allow smaller entities to provide simpler and less detailed disclosures in the financial statements. However, this does not relieve the auditor of the responsibility to obtain an understanding of the entity and its environment and the applicable financial reporting framework as it applies to the entity.

.A63 The entity's use of IT and the nature and extent of changes in the IT environment, including the risks arising from the use of IT identified in accordance with paragraph .29*a*, may also affect the specialized skills that are needed to assist with obtaining the required understanding, including the entity's general IT controls to be identified in accordance with paragraph .29*b*.

The Entity and Its Environment (Ref: par. .19)

The Entity's Organizational Structure, Ownership and Governance, and Business Model (Ref: par. .19a(i))

The Entity's Organizational Structure and Ownership (Ref: par. .19*a*(i))

.A64 An understanding of the entity's organizational structure and ownership may enable the auditor to understand the following matters:

- The complexity of the entity's structure. For example, the entity may be a single entity or the entity's structure may include subsidiaries, divisions, or other components in multiple locations. Further, the legal structure may be different from the operating structure. Complex structures often introduce factors that may give rise to increased susceptibility to risks of material misstatement. Such issues may include whether goodwill, joint ventures, investments, or variable interest entities are accounted for appropriately and whether adequate disclosure of such issues in the financial statements has been made.

- The ownership, and relationships between owners and other people or entities, including related parties. This understanding may assist in determining whether related party transactions have been appropriately identified, accounted for, and adequately disclosed in the financial statements.[34]
- The distinction between the owners, those charged with governance and management. For example, in some less complex entities, owners of the entity may be involved in managing the entity, therefore, there is little or no distinction. In contrast, such as in some larger entities with diverse ownership, there may be a clear distinction between management, the owners of the entity, and those charged with governance. Even in some larger entities, owners of the entity may be involved in managing the entity. Section 260 provides guidance on the identification of those charged with governance and explains that, in some cases, some or all of those charged with governance may be involved in managing the entity.[35]
- The structure and complexity of the entity's IT environment. For example, an entity may

— have multiple legacy IT systems in diverse businesses that are not well integrated, resulting in a complex IT environment.

— be using external or internal service providers for aspects of its IT environment (for example, outsourcing the hosting of its IT environment to a third party or using a shared service center for central management of IT processes in a group).

<u>Automated Tools and Techniques</u>

.A65 The auditor may use automated tools and techniques to understand flows of transactions and processing as part of the auditor's procedures to understand the information system. An outcome of these procedures may be that the auditor obtains information about the entity's organizational structure or those with whom the entity conducts business (for example, vendors, customers, or related parties).

Considerations Specific to Governmental Entities

.A66 Ownership of a governmental entity may not have the same relevance as in the private sector because many governmental entities do not have owners or because decisions related to the entity may be made outside of the entity as a result of political processes. Therefore, management may not have control over certain decisions that are made. Matters that may be relevant include understanding the ability of the entity to make unilateral decisions and the ability of other governmental entities to control or influence the entity's mandate and strategic direction. For example, a governmental entity may be subject to laws or other directives from authorities that require it to obtain approval from parties external to the entity of its strategy and objectives prior to it implementing them. Therefore, matters related to understanding the legal structure of the entity may include applicable laws and

[34] Section 550 addresses the auditor's considerations relevant to related parties.

[35] Paragraphs .A6–.A7 of section 260.

regulations, and the classification of the entity (that is, whether the entity is a department, agency, or other type of entity).

Governance (Ref: par. .19*a*(i))

Why the Auditor Obtains an Understanding of Governance

.A67 Understanding the entity's governance may assist the auditor with understanding the entity's ability to provide appropriate oversight of its system of internal control. This understanding, in connection with the auditor's understanding of the control environment, may also provide evidence of control deficiencies, which may indicate an increase in the susceptibility of the entity's financial statements to risks of material misstatement.

Understanding the Entity's Governance

.A68 The following matters may be relevant for the auditor to consider in obtaining an understanding of the governance of the entity:

- Whether any or all of those charged with governance are involved in managing the entity and, if applicable, how those charged with governance demonstrate independence from management
- The existence (and separation) of a non-executive board, if any, from executive management
- Whether those charged with governance hold positions that are an integral part of the entity's legal structure, for example, as directors
- The existence of subgroups of those charged with governance, such as an audit committee, and the responsibilities of such a group
- The responsibilities of those charged with governance for oversight of financial reporting, including approving the financial statements or monitoring the entity's internal control related to financial reporting

The Entity's Business Model (Ref: par. .19*a*(i))

.A69 Appendixes A–B set out additional considerations for obtaining an understanding of the entity and its business model as well as additional considerations for auditing variable interest entities.

Why the Auditor Obtains an Understanding of the Entity's Business Model

.A70 Understanding the entity's objectives, strategy, and business model helps the auditor to understand the entity at a strategic level and to understand the business risks the entity takes and faces. An understanding of the business risks that have an effect on the financial statements assists the auditor in identifying risks of material misstatement because most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. For example, an entity's business model may rely on the use of IT in different ways:

- An entity sells shoes from a physical store and uses an advanced stock and point of sale system to record the selling of shoes.
- An entity sells shoes online so that all sales transactions are processed in an IT environment, including initiation of the transactions through a website.

The business risks arising from a significantly different business model would be substantially different, notwithstanding both entities sell shoes.

Understanding the Entity's Business Model

.A71 Not all aspects of the business model are relevant to the auditor's understanding. Business risks are broader than the risks of material misstatement of the financial statements, although business risks include the latter. The auditor does not have a responsibility to understand or identify all business risks because not all business risks give rise to risks of material misstatement.

.A72 Business risks could affect risks of material misstatement at the financial statement level or assertion level. For example, an entity's loss of financing or declining conditions affecting the entity's industry could affect its ability to settle its obligations when due and, thus, could affect the risks of material misstatement related to the classification of long-term liabilities or the valuation of long-term assets. It also could result in substantial doubt about the entity's ability to continue as a going concern. An unsuccessful new product or service or failed business expansion might affect the risks of material misstatement related to the valuation of inventory and other related assets.

.A73 Business risks increasing the susceptibility to risks of material misstatement may arise from the following:

- Inappropriate objectives or strategies, ineffective execution of strategies, or change or complexity related to the entity's business
- A failure to recognize the need for change may also give rise to business risk, for example, from
  - — the development of new products or services that may fail;
  - — a market which, even if successfully developed, is inadequate to support a product or service; or
  - — flaws in a product or service that may result in legal liability and reputational risk
- Incentives and pressures on management, which may result in intentional or unintentional management bias and, therefore, affect the reasonableness of significant assumptions and the expectations of management or those charged with governance

.A74 Examples of matters that the auditor may consider when obtaining an understanding of the entity's business model, objectives, strategies, and related business risks that may result in a risk of material misstatement of the financial statements may include the following:

- Industry developments, such as the lack of personnel or expertise to deal with the changes in the industry
- New products and services that may lead to increased product liability
- Expansion of the entity's business, and demand has not been accurately estimated
- New accounting requirements in which there has been incomplete or improper implementation
- Regulatory requirements resulting in increased legal exposure
- Current and prospective financing requirements, such as loss of financing due to the entity's inability to meet requirements
- Use of IT, such as the implementation of a new IT system that will affect both operations and financial reporting
- The effects of implementing a strategy, particularly any effects that will lead to new accounting requirements
- Climate-related events or conditions that may affect the entity in terms of its business model, its operations and processes, or its ability to raise financing or attract investment and customers

.A75 Ordinarily, management identifies business risks and develops approaches to address them. Such a risk assessment process is part of the entity's system of internal control and is discussed in paragraph .22 and .A124–.A129.

Considerations Specific to Governmental Entities

.A76 Entities operating in the governmental sector may create and deliver value in different ways from those creating wealth for owners but will still have an operating "model" with specific objectives. Matters that governmental sector auditors may obtain an understanding of that are relevant to the model of the entity include the following:

- Knowledge of relevant government activities, including related programs
- Program objectives and strategies, including public policy elements

.A77 For the audits of governmental entities, "management objectives" may be influenced by requirements to demonstrate public accountability and may include objectives that have their source in law, regulation, or other authority.

Industry, Regulatory, and Other External Factors (Ref: par. .19a(ii))

Industry Factors

.A78 Relevant industry factors include industry conditions such as the competitive environment, supplier and customer relationships, and technological developments. The following are matters the auditor may consider:

- The market and competition, including demand, capacity, and price competition
- Cyclical or seasonal activity
- Product technology relating to the entity's products
- Energy supply and cost

.A79 The industry in which the entity operates may give rise to specific risks of material misstatement arising from the nature of the business or the degree of regulation. For example, in the construction industry, long-term contracts may involve significant estimates of revenues and expenses that give rise to risks of material misstatement. In such cases, it is important that the engagement team include members with the appropriate competence and capabilities.[36]

Regulatory Factors (Ref: par. .19a(ii))

.A80 Relevant regulatory factors include the regulatory environment. The regulatory environment encompasses, among other matters, the applicable financial reporting framework and the legal and political environment and any changes thereto. The following are matters the auditor may consider:

- Regulatory framework for a regulated industry, including related disclosures
- Legislation and regulation that significantly affect the entity's operations, for example, labor laws and regulations
- Taxation legislation and regulations
- Government policies currently affecting the conduct of the entity's business, such as monetary policies, including foreign exchange controls, fiscal policies, financial incentives (for example, government aid programs), and tariffs or trade restriction policies
- Environmental requirements affecting the industry and the entity's business

.A81 Section 250 includes some specific requirements related to the legal and regulatory framework applicable to the entity and the industry or sector in which the entity operates.[37]

Other External Factors (Ref: par. .19a(ii))

.A82 Other external factors affecting the entity that the auditor may consider include the general economic conditions, interest rates and availability of financing, and inflation or currency revaluation.

[36] Paragraph .16 of section 220.

[37] Paragraph .12 of section 250.

Measures Used by Management to Assess the Entity's Financial Performance (Ref: par. .19a(iii))

Why the Auditor Understands Measures Used by Management

.A83 An understanding of the entity's measures assists the auditor in considering whether such measures, whether used externally or internally, create pressures on the entity to achieve performance targets. These pressures may motivate management to take actions that increase the susceptibility to misstatement due to management bias or fraud (for example, to improve the business performance or to intentionally misstate the financial statements) (see section 240 for requirements and guidance in relation to the risks of fraud).

.A84 Measures may also indicate to the auditor the likelihood of risks of material misstatement of related financial statement information. For example, performance measures may indicate that the entity has unusually rapid growth or profitability when compared to that of other entities in the same industry.

Measures Used by Management

.A85 Management and others ordinarily measure and review those matters they regard as important. Inquiries of management may reveal that it relies on certain key indicators, regardless of public availability, for evaluating financial performance and taking action. In such cases, the auditor may identify relevant performance measures, whether internal or external, by considering the information that the entity uses to manage its business. If such inquiry indicates an absence of performance measurement or review, there may be an increased risk of misstatements not being detected and corrected.

.A86 Key indicators used for evaluating financial performance may include the following:

- Key performance indicators (financial and nonfinancial) and key ratios, trends, and operating statistics
- Period-on-period financial performance analyses
- Budgets, forecasts, variance analyses, segment information and divisional, departmental, or other level performance reports
- Employee performance measures and incentive compensation policies
- Comparisons of an entity's performance with that of competitors

Scalability (Ref: par. .19a(iii))

.A87 The procedures undertaken to understand the entity's measures may vary depending on the size or complexity of the entity as well as the involvement of owners or those charged with governance in the management of the entity.

Other Considerations

.A88 External parties may also review and analyze the entity's financial performance, in particular, for entities in which financial information is publicly available. The auditor may also consider publicly available information to help the auditor further understand the business or identify contradictory information, such as information from the following sources:

- Analysts or credit agencies
- News and other media, including social media
- Taxation authorities
- Regulators
- Trade unions
- Providers of finance

Such financial information can often be obtained from the entity being audited.

.A89 The measurement and review of financial performance is not the same as the monitoring of the system of internal control (discussed as a component of the system of internal control in paragraphs .A130–.A139), though their purposes may overlap:

- The measurement and review of performance is directed at whether business performance is meeting the objectives set by management (or third parties).
- In contrast, monitoring of the system of internal control is concerned with monitoring the effectiveness of controls, including those related to management's measurement and review of financial performance.

In some cases, however, performance indicators also provide information that enables management to identify control deficiencies.

Considerations Specific to Governmental Entities

.A90 In addition to considering relevant measures used by a governmental entity to assess the entity's financial performance, auditors of governmental entities may also consider nonfinancial information, such as achievement of public benefit outcomes (for example, the number of people assisted by a specific program).

*The Applicable Financial Reporting Framework (Ref: **par. .19b**)*

Understanding the Applicable Financial Reporting Framework and the Entity's Accounting Policies

.A91 Matters that the auditor may consider when obtaining an understanding of the entity's applicable financial reporting framework and how it applies in the context of the nature and circumstances of the entity and its environment include the following:

- The entity's financial reporting practices in terms of the applicable financial reporting framework, such as

- — accounting principles and industry-specific practices, including for industry-specific significant classes of transactions, account balances, and related disclosures in the financial statements (for example, loans and investments for banks or research and development for pharmaceuticals)
- — revenue recognition
- — accounting for financial instruments, including related credit losses
- — foreign currency assets, liabilities, and transactions
- — accounting for unusual or complex transactions, including those in controversial or emerging areas (for example, accounting for cryptocurrency)

- An understanding of the entity's selection and application of accounting policies, including any changes thereto as well as the reasons therefor, may encompass the following matters:
  - — The methods the entity uses to recognize, measure, present, and disclose significant and unusual transactions
  - — The effect of significant accounting policies in controversial or emerging areas for which there is a lack of authoritative guidance or consensus
  - — Changes in the environment, such as changes in the applicable financial reporting framework or tax reforms that may necessitate a change in the entity's accounting policies
  - — Financial reporting standards and laws and regulations that are new to the entity and when and how the entity will adopt, or comply with, such requirements

.A92 Obtaining an understanding of the entity and its environment may assist the auditor in considering where changes in the entity's financial reporting (for example, from prior periods) may be expected. For example, if the entity has had a significant business combination during the period, the auditor would likely expect changes in classes of transactions, account balances, and disclosures associated with that business combination. Alternatively, if there were no significant changes in the financial reporting framework during the period, the auditor's understanding may help confirm that the understanding obtained in the prior period remains applicable.

Considerations Specific to Governmental Entities

.A93 The applicable financial reporting framework for a governmental entity may be generally accepted accounting principles established by the Federal Accounting Standards Advisory Board or GASB, or a special purpose framework.

How Inherent Risk Factors Affect Susceptibility of Assertions to Misstatement (Ref: par. .19c)

.A94 Appendix B provides examples of events and conditions that may give rise to the existence of risks of material misstatement, categorized by inherent risk factor.

Why the Auditor Understands Inherent Risk Factors When Understanding the Entity and Its Environment, and the Applicable Financial Reporting Framework

.A95 Understanding the entity and its environment, and the applicable financial reporting framework, assists the auditor in identifying events or conditions, the characteristics of which may affect the susceptibility of assertions about classes of transactions, account balances, or disclosures to misstatement. These characteristics are inherent risk factors. Inherent risk factors may affect susceptibility of assertions to misstatement by influencing the likelihood of occurrence of a misstatement or the magnitude of the misstatement if it were to occur. Understanding how inherent risk factors affect the susceptibility of assertions to misstatement may assist the auditor with a preliminary understanding of the likelihood or magnitude of misstatements, which assists the auditor in identifying risks of material misstatement at the assertion level in accordance with paragraph .32*b*. Understanding the degree to which inherent risk factors affect susceptibility of assertions to misstatement also assists the auditor in assessing the likelihood and magnitude of a possible misstatement when assessing inherent risk in accordance with paragraph .35*a*. Accordingly, understanding the inherent risk factors may also assist the auditor in designing and performing further audit procedures in accordance with section 330.

.A96 The auditor's identification of risks of material misstatement at the assertion level and assessment of inherent risk may also be influenced by audit evidence obtained by the auditor in performing other risk assessment procedures, further audit procedures, or in fulfilling other requirements in GAAS.

The Effect of Inherent Risk Factors on a Class of Transactions, Account Balance, or Disclosure

.A97 The extent of susceptibility of a class of transactions, account balance, or disclosure to misstatement arising from complexity or subjectivity is often closely related to the extent to which it is subject to change or uncertainty. For example, if the entity has an accounting estimate that is based on assumptions, the selection of which are subject to significant judgment, the measurement of the accounting estimate is likely to be affected by both subjectivity and uncertainty.

.A98 The greater the extent to which a class of transactions, account balance, or disclosure is susceptible to misstatement because of complexity or subjectivity, the greater the need for the auditor to maintain professional skepticism. Further, when a class of transactions, account balance, or disclosure is susceptible to misstatement because of complexity, subjectivity, change, or uncertainty, these inherent risk factors may create opportunity for management bias, whether unintentional or intentional, and affect susceptibility to misstatement due to management bias. The auditor's identification of risks of material misstatement, and assessment of inherent risk at the assertion level, are also affected by the interrelationships among inherent risk factors.

.A99 Events or conditions that may affect susceptibility to misstatement due to management bias may also affect susceptibility to misstatement due to other fraud risk factors. Accordingly, this may be relevant information for use in accordance with section 240,[38] which requires the auditor to evaluate whether the information obtained from the other risk assessment procedures and related activities indicates that one or more fraud risk factors are present.

Understanding the Components of the Entity's System of Internal Control (Ref: par. .21–.31)

.A100 Appendix C, "Understanding the Entity's System of Internal Control," further describes the nature of the entity's system of internal control and inherent limitations of internal control, respectively. Appendix C also provides further explanation of the components of a system of internal control for purposes of GAAS.

.A101 The components of the entity's system of internal control for the purpose of this section may not necessarily reflect how an entity designs, implements, and maintains its system of internal control or how it may classify any particular component. Management might use an internal control framework specified by COSO, the Green Book, or another internal control framework with components that differ from the components identified in this section when designing, implementing, and maintaining the entity's system of internal control. In some instances, management may not use a framework at all. For the purpose of an audit, the auditor may use the framework used by management or may use different terminology or frameworks to describe the various aspects of a system of internal control and their effect on the audit, provided all the components described in this section are addressed.

.A102 Auditors of some entities may have additional responsibilities with respect to internal control. As a result, their considerations about the system of internal control may be broader and more detailed. For example, auditors of governmental entities may have responsibilities to report on compliance with law, regulation, or other authority.

How the Understanding of the Components of the Entity's System of Internal Control Differs From Understanding Specific Controls

.A103 The entity's system of internal control is a dynamic, iterative, and integrated process. Embedded within this process are controls consisting of policies and procedures. In an audit of financial statements, the components of the entity's system of internal control represent what is required to achieve the entity's financial reporting objectives. An audit does not require an understanding of all the processes or controls within each component.

.A104 For the control environment, the entity's risk assessment process, and the entity's process to monitor the system of internal control components, the auditor's understanding includes the ongoing tasks and activities, or processes, geared to the achievement of the entity's financial reporting objectives. For the information system and communication component, the auditor's understanding includes the flows of transactions and other aspects of the entity's information-processing activities as well as the entity's communication of significant matters, as required by paragraph .25*a*–*b*. Audit evidence for the auditor's understanding and evaluation may be obtained through a combination of inquiries and other risk assessment procedures (for example, corroborating inquiries about the

[38]Paragraph .24 of section 240.

entity's processes through observation or inspection of documents). The auditor exercises professional judgment to determine the nature and extent of the procedures to be performed to meet the requirements (see paragraph .A22 and .A108–.A109).

.A105 Controls within the information system and communication component and the control activities component of the entity's system of internal control are primarily more direct in addressing assertion level risks (see paragraphs .A5, .A140, and .A166). This section requires performing risk assessment procedures, beyond inquiry, to evaluate whether the controls identified in accordance with paragraphs .27 and .29 are effectively designed and determine whether those controls have been implemented (see paragraph .30). This evaluation involves considering whether the identified controls, individually or in combination, are capable of effectively preventing, or detecting and correcting, material misstatements as well as establishing that the control exists and that the entity is using it (see paragraphs .A201–.A202). An audit does not require an understanding, including evaluating the design or determining the implementation, of all controls related to each significant class of transactions, account balance, and disclosure in the financial statements or to every assertion relevant to them.

.A106 The auditor may identify, in accordance with paragraphs .27 and .29, controls within the control environment, the entity's risk assessment process, and the entity's process to monitor the system of internal control for which the auditor also evaluates design and determines implementation as required by paragraph .30 (see paragraphs .A105, .A112, and .A170).

Scalability

.A107 The way in which the entity's system of internal control is designed, implemented, and maintained varies with an entity's size and complexity. For example, less complex entities may use less structured or simpler controls (that is, policies and procedures) to achieve their objectives.

.A108 The auditor's understanding of the entity's system of internal control is obtained through risk assessment procedures performed to understand and evaluate the components of the system of internal control as set out in paragraphs .21–.31. The nature, timing, and extent of procedures that are necessary to understand and evaluate the components of the entity's system of internal control depend on the following:

a. The size and complexity of the entity

b. The auditor's existing knowledge of the entity's controls

c. The nature of the entity's controls, including the entity's use of IT

d. The nature and extent of changes in the entity's information systems and operations

e. The nature and form of the entity's documentation of its controls

IT in the Components of the Entity's System of Internal Control

.A109 Appendix E provides further guidance on understanding the entity's use of IT in the components of the system of internal control.

.A110 The overall objectives of the auditor do not differ whether an entity operates in a mainly manual environment, a completely automated environment, or an environment involving some combination of manual and automated elements (that is, manual and automated controls and other resources, including service organizations, used in the entity's system of internal control).

Understanding the Nature of the Components of the Entity's System of Internal Control

.A111 The auditor's understanding and evaluation of the components of the entity's system of internal control required by this section provides a preliminary understanding of how the entity identifies business risks relevant to financial reporting and how it responds to them. It may also influence the auditor's identification and assessment of the risks of material misstatement in different ways (see paragraph .A96). The auditor's identification and assessment of the risks of material misstatement assists the auditor in designing and performing further audit procedures, including any plans to test the operating effectiveness of controls. Examples follow:

- The auditor's understanding of the entity's control environment, the entity's risk assessment process, and the entity's process to monitor controls components is more likely to affect the identification and assessment of risks of material misstatement at the financial statement level.
- The auditor's understanding of the entity's information system and communication, and the entity's control activities component, is more likely to affect the identification and assessment of risks of material misstatement at the assertion level.

Control Environment, the Entity's Risk Assessment Process, and the Entity's Process to Monitor the System of Internal Control (Ref: par. .21–.24)

.A112 The controls in the control environment, the entity's risk assessment process, and the entity's process to monitor the system of internal control are primarily indirect controls (see paragraph .A5). However, controls within these components may vary in nature and precision and, therefore, some controls within these components may also be direct controls that address risks of material misstatement at the assertion level (see paragraph .A170).

Why the Auditor Is Required to Understand the Control Environment, The Entity's Risk Assessment Process, and the Entity's Process to Monitor the System of Internal Control

.A113 The control environment provides an overall foundation for the operation of the other components of the system of internal control. The control environment does not directly prevent, or detect and correct, misstatements. It may, however, influence the effectiveness of controls in the other components of the system of internal control. Similarly, the entity's risk assessment process and its process for monitoring the system of internal control are designed to operate in a manner that also supports the entire system of internal control.

.A114 Because these components are foundational to the entity's system of internal control, deficiencies in their operation could have pervasive effects on the preparation of the financial statements. Therefore, the auditor's understanding and evaluations of these components required by this section affect the auditor's identification and assessment of risks of material misstatement at the financial statement level and may also affect the identification and assessment of risks of material misstatement at the assertion level (see paragraphs .A118, .A127, and .A138). Risks of material misstatement at the financial statement level affect the auditor's design of overall responses, including, as explained in section 330, an influence on the nature, timing, and extent of the auditor's further procedures.[39]

Obtaining an Understanding of the Control Environment (Ref: par. .21)

<u>Scalability</u>

.A115 The nature of the control environment in a less complex entity is likely to be different from the control environment in a more complex entity. For example, those charged with governance in less complex entities may not include an independent or outside member, and the role of governance may be undertaken directly by the owner-manager when there are no other owners. Accordingly, some considerations about the entity's control environment may be less relevant or may not be applicable.

.A116 In addition, audit evidence about elements of the control environment in less complex entities may not be available in documentary form, in particular, when communication between management and other personnel is informal, but the evidence may still be appropriately relevant and reliable in the circumstances. Examples are as follows:

- The organizational structure in a less complex entity will likely be simpler and may include a small number of employees involved in roles related to financial reporting.
- If the role of governance is undertaken directly by the owner-manager, the auditor may determine that the independence of those charged with governance is not relevant (see paragraph .A68).
- Less complex entities may not have a written code of conduct but, instead, develop a culture that emphasizes the importance of integrity and ethical behavior through oral communication and by management example. Consequently, the attitudes, awareness, and actions of management or the owner-manager are of particular importance to the auditor's understanding of a less complex entity's control environment.

Understanding the Control Environment (Ref: par. .21a)

.A117 In considering the extent to which management demonstrates a commitment to integrity and ethical values, the auditor may obtain an understanding through inquiries of management and employees and through considering information from external sources about

[39] Paragraphs .A1–.A3 of section 330.

- how management communicates to employees its views on business practices and ethical behavior, and
- inspecting management's written code of conduct and observing whether management acts in a manner that supports that code.

Evaluating the Control Environment (Ref: par. .21b)

Why the Auditor Evaluates the Control Environment

.A118 The auditor's evaluation of how the entity demonstrates behavior consistent with the entity's commitment to integrity and ethical values; whether the control environment provides an appropriate foundation for the other components of the entity's system of internal control; and whether identified control deficiencies undermine the other components of the system of internal control, assists the auditor in identifying potential control deficiencies in the other components of the system of internal control. This is because the control environment is foundational to the other components of the entity's system of internal control. This evaluation may also assist the auditor in understanding risks faced by the entity and, therefore, in identifying and assessing the risks of material misstatement at the financial statement and assertion levels (see paragraph .A111). The auditor may also identify control deficiencies in the control environment, the severity of which may be indicative of a fraud risk factor. In addition, the auditor's understanding and evaluation of the control environment required by this section may influence the controls the auditor might identify in accordance with paragraphs .27 and .29*b* based on the auditor's knowledge of the presence or absence of such controls in other components.

The Auditor's Evaluation of the Control Environment

.A119 The auditor's evaluation of the control environment is based on the understanding obtained in accordance with paragraph .21*a*. The evaluation is focused on the matters included in paragraph .21*b* and, therefore, does not require evaluating the design or determining the implementation of individual controls within the control environment. However, as described in paragraph .A106, the auditor may identify, in accordance with paragraphs .27–.29, controls within the control environment component for which the auditor also evaluates design and determines implementation as required by paragraph .30 (see paragraphs .A112 and .A170).

.A120 Some entities may be dominated by a single individual who may exercise a great deal of discretion. The actions and attitudes of that individual may have a pervasive effect on the culture of the entity, which, in turn, may have a pervasive effect on the control environment. Such an effect may be positive or negative. For example, direct involvement by a single individual may be key to enabling the entity to meet its growth and other objectives and can also contribute significantly to an effective system of internal control. On the other hand, such concentration of knowledge and authority can also lead to an increased susceptibility to misstatement through management override of controls.

.A121 The auditor may consider how the different elements of the control environment may be influenced by the philosophy and operating style of senior management, taking into account the involvement of independent members of those charged with governance.

.A122 Although the control environment may provide an appropriate foundation for the system of internal control and may help reduce the risk of fraud, an appropriate control environment is not necessarily an effective deterrent to fraud. For example, human resource policies and procedures directed toward hiring competent financial, accounting, and IT personnel may mitigate the risk of errors in processing and recording financial information. However, such policies and procedures may not mitigate the risk of management override of controls (for example, fraudulent financial reporting that involves senior management overstating earnings).

.A123 The auditor's evaluation of the control environment as it relates to the entity's use of IT may include such matters as the following:

- Whether governance over IT is commensurate with the nature and complexity of the entity and its business operations enabled by IT, including the complexity or maturity of the entity's technology platform or architecture and the extent to which the entity relies on IT applications to support its financial reporting
- The management organizational structure regarding IT and the resources allocated (for example, whether the entity has invested in an appropriate IT environment and necessary enhancements or whether a sufficient number of appropriately skilled individuals have been employed, including when the entity uses commercial software [with no or limited modifications])

Obtaining an Understanding of the Entity's Risk Assessment Process (Ref: par. .22–.23)

Understanding the Entity's Risk Assessment Process (Ref: par. .22*a*)

.A124 As explained in paragraph .A71, not all business risks give rise to risks of material misstatement, whether due to error or fraud. In understanding how management and those charged with governance have identified business risks relevant to the preparation of the financial statements, and decided about actions to address those risks, matters the auditor may consider include how management or, as appropriate, those charged with governance, has done the following:

- Specified the entity's objectives with sufficient precision and clarity to enable the identification and assessment of the risks relating to the objectives
- Identified the risks to achieving the entity's objectives and analyzed the risks as a basis for determining how the risks should be managed
- Assessed changes that could significantly affect the system of internal control
- Considered the potential for fraud when considering the risks to achieving the entity's objectives[40]

.A125 Paragraph .22 of this section requires the auditor to obtain an understanding of the entity's process for identifying business risks. Section 240[41] requires the auditor to

[40]Paragraph .18 of section 240.

make inquiries of management regarding, among other things, management's process for identifying, responding to, and monitoring the risks of fraud in the entity, including any specific risks of fraud that management has identified or that have been brought to its attention, or classes of transactions, account balances, or disclosures for which a risk of fraud is likely to exist.

.A126 The auditor may consider the implications of such business risks for the preparation of the entity's financial statements and other aspects of its system of internal control.

Evaluating the Entity's Risk Assessment Process (Ref: par. .22*b*)

Why the Auditor Evaluates Whether the Entity's Risk Assessment Process Is Appropriate

.A127 The auditor's evaluation of the entity's risk assessment process may assist the auditor in understanding where the entity has identified risks and how the entity has responded to those risks. The auditor's evaluation of how the entity identifies its business risks and how it assesses and addresses those risks assists the auditor in understanding whether the risks faced by the entity have been identified, assessed, and addressed, as appropriate, to the nature and complexity of the entity. This evaluation may also assist the auditor with identifying and assessing financial statement level and assertion level risks of material misstatement (see paragraph .A111).

Evaluating Whether the Entity's Risk Assessment Process Is Appropriate (Ref: par. .22*b*)

.A128 The auditor's evaluation of the appropriateness of the entity's risk assessment process is based on the understanding obtained in accordance with paragraph .22*a*. The evaluation is focused on the matters included in paragraph .22*b* and, therefore, does not require evaluating the design or determining the implementation of individual controls within the entity's risk assessment process. However, as described in paragraph .A101, the auditor may identify, in accordance with paragraphs .27 and .29*b*, controls within the entity's risk assessment process component for which the auditor also evaluates design and determines implementation as required by paragraph .30 (see paragraphs .A112 and .A170).

Scalability

.A129 Whether the entity's risk assessment process is appropriate to the entity's circumstances, considering the nature and complexity of the entity, is a matter of the auditor's professional judgment. For example, in some less complex entities, and particularly owner-managed entities, an appropriate risk assessment may be performed through the direct involvement of management or the owner-manager (for example, the manager or owner-manager may routinely devote time to monitoring the activities of competitors and other developments in the marketplace to identify emerging business risks). The evidence of this risk assessment occurring in these types of entities is often not formally documented, but it may be evident from, for example, discussions the auditor has with management,

[41] Paragraph .17 of section 240.

corroborated by emails or other correspondence between management and other personnel, that management is, in fact, performing risk assessment procedures.

Obtaining an Understanding of the Entity's Process to Monitor the Entity's System of Internal Control (Ref: par. .24)

Scalability

.A130 In less complex entities, and in particular, owner-manager entities, the auditor's understanding of the entity's process to monitor the system of internal control is often focused on how management or the owner-manager is directly involved in operations because there may not be any other monitoring activities. For example, management may receive complaints from customers about inaccuracies in their monthly statement that alerts the owner-manager to issues with the timing of when customer payments are being recognized in the accounting records.

.A131 For entities in which there is no formal process for monitoring the system of internal control, understanding the process to monitor the system of internal control may include understanding periodic reviews of management accounting information that are designed to contribute to how the entity prevents, or detects and corrects, misstatements.

Understanding the Entity's Process to Monitor the System of Internal Control (Ref: par. .24*a*(i))

.A132 Matters that may be relevant for the auditor to consider when understanding how the entity monitors its system of internal control include the following:

- The design of the monitoring activities, for example, whether it is periodic or ongoing monitoring
- The performance and frequency of the monitoring activities
- The evaluation of the results of the monitoring activities, on a timely basis, to determine whether the controls have been effective
- How identified control deficiencies have been addressed through appropriate remedial actions, including timely communication of such deficiencies to those responsible for taking remedial action

.A133 The auditor may also consider how the entity's process to monitor the system of internal control addresses monitoring information-processing controls that involve the use of IT. This may include, for example

- controls to monitor complex IT environments that
  - — evaluate the continuing design effectiveness of information-processing controls and modify them, as appropriate, for changes in conditions or
  - — evaluate the operating effectiveness of information-processing controls.

- controls that monitor the permissions applied in automated information-processing controls that enforce the segregation of duties.
- controls that monitor how errors or control deficiencies related to the automation of financial reporting are identified and addressed.

Understanding the Entity's Internal Audit Function (Ref: par. .24*a*(ii))

.A134 Appendix D sets out further considerations for understanding the entity's internal audit function.

.A135 The auditor's inquiries of appropriate individuals within the internal audit function help the auditor obtain an understanding of the nature of the internal audit function's responsibilities. If the auditor determines that the function's responsibilities are related to the entity's financial reporting, the auditor may obtain further understanding of the activities performed, or to be performed, by the internal audit function by reviewing the internal audit function's audit plan for the period, if any, and discussing that plan with the appropriate individuals within the function. This understanding, together with the information obtained from the auditor's inquiries, may also provide information that is directly relevant to the auditor's identification and assessment of the risks of material misstatement. If, based on the auditor's preliminary understanding of the internal audit function, the auditor expects to use the work of the internal audit function to modify the nature or timing, or reduce the extent, of audit procedures to be performed, section 610, *Using the Work of Internal Auditors*, applies.

Understanding the Sources of Information (Ref: par. .24b)

Other Sources of Information Used in the Entity's Process to Monitor the System of Internal Control

.A136 Management's monitoring activities may use information in communications from external parties, such as customer complaints or regulator comments, that may indicate problems or highlight areas in need of improvement.

Why the Auditor Is Required to Understand the Sources of Information Used for the Entity's Monitoring of the System of Internal Control

.A137 The auditor's understanding of the sources of information used by the entity in monitoring the entity's system of internal control, including whether the information used is relevant and reliable, assists the auditor in evaluating whether the entity's process to monitor the entity's system of internal control is appropriate. If management assumes that information used for monitoring is relevant and reliable without having a basis for that assumption, errors that may exist in the information could potentially lead management to draw incorrect conclusions from its monitoring activities.

Why the Auditor Evaluates Whether the Entity's Process to Monitor the System of Internal Control Is Appropriate (Ref: par. .24c)

Evaluating The Entity's Process to Monitor The System of Internal Control

.A138 The auditor's evaluation about how the entity undertakes ongoing and separate evaluations for monitoring the effectiveness of controls assists the auditor in understanding whether the other components of the entity's system of internal control are present and functioning and, therefore, assists with understanding the other components of the entity's system of internal control. This evaluation may also assist the auditor with identifying and assessing financial statement level and assertion level risks of material misstatement (see paragraph .A111) and with designing tests of controls.[42]

Evaluating Whether the Entity's Process to Monitor the System of Internal Control Is Appropriate (Ref: par. .24*c*)

.A139 The auditor's evaluation of the appropriateness of the entity's process to monitor the system of internal control is based on the auditor's understanding of the entity's process to monitor the system of internal control. The evaluation is focused on the matters included in paragraph .24*c* and, therefore, does not require evaluating the design or determining the implementation of individual controls within the entity's process to monitor the system of internal control. However, as described in paragraph .A106, the auditor may identify, in accordance with paragraphs .27 and .29*b*, controls within the entity's process to monitor the system of internal control component for which the auditor also evaluates design and determines implementation as required by paragraph .30 (see paragraphs .A112 and .A170).

Information System and Communication, and Control Activities (Ref: par. .25–.30)

.A140 The controls in the information system and communication, and control activities components are primarily direct controls (that is, controls that are sufficiently precise to prevent, detect, or correct misstatements at the assertion level).

Why the Auditor Is Required to Understand the Information System and Communication, and Controls in the Control Activities Component

.A141 The auditor is required to understand the entity's information system and communication because understanding the flows of transactions and other aspects of the entity's information-processing activities relevant to the preparation of the financial statements, and evaluating whether the component appropriately supports the preparation of the entity's financial statements, supports the auditor's identification and assessment of risks of material misstatement at the assertion level. This understanding and evaluation may also result in the identification of risks of material misstatement at the financial statement level when the results of the auditor's procedures are inconsistent with expectations about the entity's system of internal control that may have been set based on information obtained during the engagement acceptance or continuance process (see paragraph .A111).

.A142 The auditor is required to identify specific controls in the control activities component, and evaluate the design and determine whether the controls have been implemented, because it assists the auditor's understanding about management's approach to addressing certain risks. Therefore, it provides a basis for the design and performance of

[42] Paragraph .08 of section 330.

further audit procedures responsive to these risks as required by section 330. The higher on the spectrum of inherent risk a risk is assessed, the more persuasive the audit evidence needs to be. Even when the auditor does not plan to test the operating effectiveness of identified controls, the auditor's understanding may still affect the design of the nature, timing, and extent of substantive procedures that are responsive to the related risks of material misstatement (see paragraph .A210).

The Iterative Nature of the Auditor's Understanding and Evaluation of the Information System and Communication, and Control Activities

.A143 As explained in paragraph .A57, the auditor's understanding of the entity and its environment, and the applicable financial reporting framework, may assist the auditor in developing initial expectations about the classes of transactions, account balances, and disclosures that may be significant classes of transactions, account balances, and disclosures. In obtaining an understanding of the information system and communication component in accordance with paragraph .25*a*, the auditor may use these initial expectations to determine the extent of understanding of the entity's information-processing activities to be obtained.

.A144 The auditor's understanding of the information system includes understanding the policies that define flows of information relating to the entity's significant classes of transactions, account balances, and disclosures, and other related aspects of the entity's information-processing activities. This information and the information obtained from the auditor's evaluation of the information system and communication component required by this section may confirm or further influence the auditor's expectations about the significant classes of transactions, account balances, and disclosures initially identified (see paragraph .A143).

.A145 In obtaining an understanding of how information relating to significant classes of transactions, account balances, and disclosures flows into, through, and out of the entity's information system, the auditor may also identify controls in the control activities component that are required to be identified in accordance with paragraph .27 or .29*b*. For example, the auditor's identification and evaluation of controls in the control activities component may first focus on controls over journal entries and other adjustments and controls that the auditor plans to test the operating effectiveness of in designing the nature, timing, and extent of substantive procedures.

.A146 The auditor's assessment of inherent risk may also influence the identification of controls in the control activities component. For example, controls that address significant risks may be identifiable only when the auditor has assessed inherent risk at the assertion level in accordance with paragraph .35. Furthermore, controls addressing risks for which the auditor has determined that substantive procedures alone do not provide sufficient appropriate audit evidence (in accordance with paragraph .37) may also be identifiable only once the auditor's inherent risk assessments have been undertaken.

.A147 The auditor's identification and assessment of risks of material misstatement at the assertion level is influenced by both of the following:

- The auditor's understanding of the entity's policies for its information-processing activities in the information system and communication component
- The auditor's identification and evaluation of controls in the control activities component

Obtaining an Understanding of the Information System and Communication (Ref: par. .25)

.A148 Appendix C[43] sets out further considerations relating to the information system and communication.

Scalability

.A149 The information system, and related business processes, in less complex entities are likely to be less sophisticated than in larger entities and are likely to involve a less complex IT environment; however, the role of the information system is just as important. For example, less complex entities with direct management involvement may not need extensive descriptions of accounting procedures, sophisticated accounting records, or written policies. Understanding the relevant aspects of the entity's information system may, therefore, require less effort in an audit of a less complex entity and may involve a greater amount of inquiry than observation or inspection of documentation. The need to obtain an understanding, however, remains important to provide a basis for the design of further audit procedures in accordance with section 330 and may further assist the auditor in identifying or assessing risks of material misstatement (see paragraph .A111).

Obtaining an Understanding of the Information System (Ref: par. .25*a*)

.A150 Included within the entity's system of internal control are aspects that relate to the entity's reporting objectives, including its financial reporting objectives, but may also include aspects that relate to its operations or compliance objectives, when such aspects are relevant to financial reporting. Understanding how the entity initiates transactions and captures information as part of the auditor's understanding of the information system may include information about the entity's systems (its policies) designed to address compliance and operations objectives because such information is relevant to the preparation of the financial statements. Further, some entities may have information systems that are highly integrated such that controls may be designed in a manner to simultaneously achieve financial reporting, compliance and operational objectives, and combinations thereof.

.A151 The auditor's understanding of the entity's information system and communication required under paragraph .25*a* results in obtaining an understanding of the process of reconciling detailed records to the general ledger.

.A152 Understanding the entity's information system also includes an understanding of the resources to be used in the entity's information-processing activities. Information about the human resources involved that may be relevant to understanding risks to the integrity of the information system include the following:

---

[43]Paragraphs 15–20 of appendix C, "Understanding the Entity's System of Internal Control."

- The competence of the individuals undertaking the work
- Whether there are adequate resources
- Whether there is appropriate segregation of duties

.A153 Matters the auditor may consider when understanding the policies that define the flows of information relating to the entity's significant classes of transactions, account balances, and disclosures in the information system and communication component include the nature of

a. the data or information relating to transactions, other events, and conditions to be processed;

b. the information processing to maintain the integrity of that data or information; and

c. the information processes, personnel, and other resources used in processing information.

.A154 Obtaining an understanding of the entity's business processes, which include how transactions are originated, assists the auditor in obtaining an understanding of the entity's information system in a manner that is appropriate to the entity's circumstances.

.A155 The auditor's understanding of the information system may be obtained in various ways and may include some or all of the following:

- Inquiries of relevant personnel about the procedures used to initiate, record, process, and report transactions or about the entity's financial reporting process
- Inspection of policy or process manuals or other documentation of the entity's information system
- Observation of the performance of the policies or procedures by entity's personnel
- Selecting transactions and tracing them through the applicable process in the information system (that is, performing a walk-through, as described in paragraphs .A204–.A205)

Automated Tools and Techniques

.A156 The auditor may also use automated techniques to obtain direct access to, or a digital download from, the databases in the entity's information system that store accounting records of transactions. By applying automated tools or techniques to this information, the auditor may confirm the understanding obtained about how transactions flow through the information system by tracing journal entries, or other digital records related to a particular transaction, or an entire population of transactions from initiation in the accounting records through to recording in the general ledger. Analysis of complete or large sets of transactions may also result in the identification of variations from the normal, or expected, processing procedures for these transactions, which may result in the identification of risks of material misstatement.

Information Obtained From Outside of the General and Subsidiary Ledgers

.A157 Financial statements may contain information that is obtained from outside of the general and subsidiary ledgers. Examples of such information that the auditor may consider are as follows:

- Information obtained from lease agreements relevant to disclosures in the financial statements
- Information disclosed in the financial statements that is produced by an entity's risk management system
- Fair value information produced by management's specialists and disclosed in the financial statements
- Information disclosed in the financial statements that has been obtained from models or from other calculations used to develop accounting estimates recognized or disclosed in the financial statements, including information relating to the underlying data and assumptions used in those models, such as
  - — assumptions developed internally that may affect an asset's useful life, or
  - — data such as interest rates that are affected by factors outside the control of the entity
- Information disclosed in the financial statements about sensitivity analyses derived from financial models that demonstrates that management has considered alternative assumptions
- Information recognized or disclosed in the financial statements that has been obtained from an entity's tax returns and records
- Information disclosed in the financial statements that has been obtained from analyses prepared to support management's assessment of the entity's ability to continue as a going concern, such as disclosures, if any, related to events or conditions that have been identified that may cast significant doubt on the entity's ability to continue as a going concern[44]

.A158 Certain amounts or disclosures in the entity's financial statements (such as disclosures about credit risk, liquidity risk, and market risk) may be based on information obtained from the entity's risk management system. However, the auditor is not required to understand all aspects of the risk management system and exercises professional judgment in determining the necessary understanding.

<u>The Entity's Use of IT in the Information System</u>

Why Does the Auditor Understand the IT Environment Relevant to the Information System

[44]Paragraphs .21–.22 of section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.

.A159 The auditor's understanding of the information system includes the IT environment relevant to the flows of transactions and processing of information in the entity's information system because the entity's use of IT applications or other aspects in the IT environment may give rise to risks arising from the use of IT.

.A160 The understanding of the entity's business model and how it integrates the use of IT may also provide useful context to the nature and extent of IT expected in the information system.

Understanding the Entity's Use of IT

.A161 The auditor's understanding of the IT environment may focus on identifying, and understanding the nature and number of, the specific IT applications and other aspects of the IT environment that are relevant to the flows of transactions and processing of information in the information system. Changes in the flow of transactions, or information within the information system, may result from program changes to IT applications or direct changes to data in databases involved in processing or storing those transactions or information.

.A162 The auditor may identify the IT applications and supporting IT infrastructure concurrently with the auditor's understanding of how information relating to significant classes of transactions, account balances, and disclosures flow into, through, and out of the entity's information system.

Obtaining an Understanding of the Entity's Communication (Ref: par. .25*b*)

Scalability

.A163 In more complex entities, information the auditor may consider when understanding the entity's communication may come from policy manuals and financial reporting manuals.

.A164 In less complex entities, communication may be less structured (for example, formal manuals may not be used) due to fewer levels of responsibility and management's greater visibility and availability. Regardless of the size of the entity, open communication channels facilitate the reporting of exceptions and acting on them.

Evaluating Whether the Relevant Aspects of the Information System Support the Preparation of the Entity's Financial Statements (Ref: par. .25*c*)

.A165 The auditor's evaluation of whether the entity's information system and communication appropriately supports the preparation of the financial statements is based on the understanding obtained in paragraph .25*a*–*b*. The evaluation is focused on the matters included in paragraph .25*c* and, therefore, does not require evaluating the design or determining the implementation of individual controls within the information system and communication component. Appendix C[45] sets out further considerations relating to the information system and communication component.

[45] Paragraphs 15–20 of appendix C.

.A166 Controls within the information system and communication component are primarily more direct in addressing assertion level risks but may also be indirect controls (see paragraphs .A5, .A105, and .A140). In particular, information-processing controls, also known as *transaction controls*, directly support the actions to mitigate information-processing risks in an entity's business processes (see paragraphs .A7–.A8). As described in paragraph .A169, although the auditor's identification and evaluation of controls in the control activities component as required by paragraph .30 is focused on information-processing controls, the auditor is not required to identify and evaluate all information-processing controls related to the entity's policies that define the flows of transactions and other aspects of the entity's information-processing activities for the significant classes of transactions, account balances, and disclosures.

Control Activities (Ref: par. .26–.31)

Controls in the Control Activities Component (Ref: par. .26)

.A167 Appendix C[46] sets out further considerations relating to controls in the control activities component.

.A168 In obtaining an understanding of the other components of internal control, the auditor may have identified some controls described in paragraphs .27 and .29*b*. The control activities component includes controls that are designed to ensure the proper application of policies (which are also controls) in all the other components of the entity's system of internal control and includes both direct and indirect controls. For example, the controls that an entity has established to ensure that its personnel are properly counting and recording the annual physical inventory relate directly to the risks of material misstatement relevant to the existence and completeness assertions for the inventory account balance.

.A169 The auditor's identification and evaluation of controls in the control activities component is focused on information-processing controls, which are controls relating to the processing of information in IT applications or manual information processes in the entity's information system that directly address risks to the integrity of information (that is, the completeness, accuracy, and validity of transactions and other information). However, the auditor is not required to identify and evaluate all information-processing controls related to the entity's policies that define the flows of transactions and other aspects of the entity's information-processing activities for the significant classes of transactions, account balances, and disclosures.

.A170 Direct controls may exist in the control environment, the entity's risk assessment process, or the entity's process to monitor the system of internal control, which may be identified in accordance with paragraphs .27 and .29*b*. An example is a management review control designed to detect misstatements by using key performance indicators or other types of information to develop sufficiently precise expectations of reported amounts. The more indirect the relationship between controls that support other controls and the control that is being considered, the less effective that control may be in preventing, or detecting and correcting, related misstatements. For example, a sales manager's review of a summary

[46] Paragraphs 21–22 of appendix C.

of sales activity for specific stores by region ordinarily is indirectly related only to the risks of material misstatement relevant to the completeness assertion for sales revenue. Accordingly, it may be less effective in addressing those risks than controls more directly related thereto, such as matching shipping documents with billing documents.

.A171 Paragraphs .29*b* and .30 require the auditor to identify and evaluate general IT controls for IT applications and other aspects of the IT environment that the auditor has determined to be subject to risks arising from the use of IT because general IT controls support the continued effective functioning of information-processing controls. A general IT control alone is typically not sufficient to address a risk of material misstatement at the assertion level.

.A172 The following are controls that the auditor is required to identify and evaluate the design, and determine the implementation of, in accordance with paragraph .30:

- Controls that the auditor plans to test the operating effectiveness of in determining the nature, timing, and extent of substantive procedures. The evaluation of such controls provides the basis for the auditor's design of tests of controls in accordance with section 330. These controls also include controls that address risks for which substantive procedures alone do not provide sufficient appropriate audit evidence.
- Controls that address significant risks as well as controls over journal entries and other adjustments as required by section 240. The auditor's identification and evaluation of such controls may also influence the auditor's identification and assessment of the risks of material misstatement, including the identification of additional risks of material misstatement (see paragraph .A111). This understanding also provides the basis for the auditor's design of the nature, timing, and extent of substantive procedures that are responsive to the related assessed risks of material misstatement.
- Other controls that the auditor considers appropriate to enable the auditor to meet the objectives of paragraph .13 with respect to risks at the assertion level, based on the auditor's professional judgment.

.A173 Controls in the control activities component are required to be identified when such controls meet one or more of the criteria included in paragraphs .27 or .29*b*. Such identified controls are sometimes referred to by auditors as *relevant controls* or *key controls*. An audit does not require an understanding, including evaluating the design or determining the implementation, of all controls related to each significant class of transactions, account balance, and disclosure in the financial statements or to every assertion relevant to them (see paragraph .A103–.A106).

.A174 There might be more than one control that addresses the assessed risk of material misstatement to a particular relevant assertion; conversely, one control might address the assessed risk of material misstatement to more than one relevant assertion. It may not be necessary to identify all controls, including redundant controls, related to a relevant assertion, unless redundancy is, itself, a control objective related to addressing the risk of material misstatement.

Types of Controls in the Control Activities Component (Ref: par. .26)

.A175 Examples of controls in the control activities component include authorizations and approvals, reconciliations, verifications (such as edit and validation checks or automated calculations), segregation of duties, and physical or logical controls, including those addressing safeguarding of assets.

.A176 Controls in the control activities component may also include controls established by management that address risks of material misstatement related to disclosures not being prepared in accordance with the applicable financial reporting framework. Such controls may relate to information included in the financial statements that is obtained from outside of the general and subsidiary ledgers.

.A177 Regardless of whether controls are within the IT environment or manual systems, controls may have various objectives and may be applied at various organizational and functional levels.

Scalability (Ref: par. .26)

.A178 Controls in the control activities component for less complex entities are likely to be similar to those in larger entities, but the formality with which they operate may vary. Further, in less complex entities, more controls may be directly applied by management. For example, management's sole authority for granting credit to customers and approving significant purchases can provide strong control over important account balances and transactions.

.A179 It may be less practicable to establish segregation of duties in less complex entities that have fewer employees. However, in an owner-managed entity, the owner-manager may be able to exercise more effective oversight through direct involvement than in a larger entity, which may compensate for the generally more limited opportunities for segregation of duties. Although, as also explained in section 240, domination of management by a single individual can be a potential control deficiency because there is an opportunity for management override of controls.[47]

Controls That Address Risks of Material Misstatement at the Assertion Level (Ref: par. .27a)

Controls That Address Risks That Are Determined to Be Significant Risks (Ref: par. .27*a*)

.A180 Regardless of whether the auditor plans to test the operating effectiveness of controls that address significant risks, the understanding obtained about management's approach to addressing those risks may provide a basis for the design and performance of substantive procedures responsive to significant risks as required by section 330.[48] Although risks relating to significant nonroutine or judgmental matters are often less likely to be subject to routine controls, management may have other responses intended to deal with such risks.

[47] Paragraph .A32 of section 240.

[48] Paragraph .22 of section 330.

For example, when there are nonroutine events, such as a significant business acquisition, consideration of the entity's response may include such matters as whether it has been referred to appropriate specialists (such as internal or external valuation specialists), whether an assessment has been made of the potential effect, and how the circumstances are to be disclosed in the financial statements. The auditor's understanding of whether the entity has designed and implemented controls for significant risks arising from nonroutine or judgmental matters may include whether and how management responds to the risks. Such responses may include the following:

- Controls, such as a review of assumptions by senior management or specialists
- Documented processes for accounting estimations
- Approval by those charged with governance

.A181 Section 240[49] requires the auditor to understand controls related to assessed risks of material misstatement due to fraud (which are treated as significant risks) and further explains that it is important for the auditor to obtain an understanding of the controls that management has designed, implemented, and maintained to prevent and detect fraud.

Controls Over Journal Entries and Other Adjustments (Ref: par. .27*b*)

.A182 How an entity incorporates information from transaction processing in the general ledger ordinarily involves the use of journal entries, whether standard or non-standard, or automated or manual. Section 240 requires the auditor to obtain an understanding of the entity's financial reporting process and controls over journal entries recorded in the general ledger and other adjustments made in the preparation of the financial statements.[50]

Automated Tools and Techniques

.A183 In manual general ledger systems, non-standard journal entries may be identified through inspection of ledgers, journals, and supporting documentation. When automated procedures are used to maintain the general ledger and prepare financial statements, such entries may exist only in electronic form and, therefore, may be more easily identified through the use of automated techniques. For example, in the audit of a less complex entity, the auditor may be able to extract a total listing of all journal entries into a simple spreadsheet. It may then be possible for the auditor to sort the journal entries by applying a variety of filters such as currency amount, name of the preparer or reviewer, journal entries that gross up the balance sheet and income statement only, or viewing the listing by the date the journal entry was posted to the general ledger, to assist the auditor in designing responses to the risks identified related to journal entries.

Controls for Which the Auditor Plans to Test the Operating Effectiveness (Ref: par. .27*c*)

.A184 The auditor determines whether there are any risks of material misstatement at the assertion level for which it is not possible to obtain sufficient appropriate audit

[49]Paragraphs .27 and .A37 of section 240.

[50]Paragraph .32 of section 240.

evidence through substantive procedures alone. The auditor is required, in accordance with section 330,[51] to design and perform tests of controls that address such risks of material misstatement when substantive procedures alone do not provide sufficient appropriate audit evidence at the assertion level. As a result, when such controls exist that address these risks, they are required to be identified and evaluated.

.A185 In other cases, when the auditor plans to take into account the operating effectiveness of controls in determining the nature, timing, and extent of substantive procedures in accordance with section 330, such controls are also required to be identified because section 330[52] requires the auditor to design and perform tests of those controls. For example, the auditor may plan to test the operating effectiveness of controls

- over routine classes of transactions because such testing may be more effective or efficient for large volumes of homogenous transactions.
- over the accuracy and completeness of information produced by the entity (for example, controls over the preparation and maintenance of system-generated reports) to determine the reliability of that information, when the auditor intends to take into account the operating effectiveness of those controls in designing and performing further audit procedures.
- relating to operations and compliance objectives when they relate to data the auditor evaluates or uses in applying audit procedures.

.A186 The auditor's decision whether to test the operating effectiveness of controls may also be influenced by the identified risks of material misstatement at the financial statement level. For example, if control deficiencies are identified related to the control environment, this may affect the auditor's overall expectations about the operating effectiveness of direct controls.

Other Controls That the Auditor Considers Appropriate (Ref: par. .27*d*)

.A187 In addition to the controls set out in paragraph .27*a*–*c*, the auditor may consider it appropriate to identify and evaluate the design and determine the implementation of other controls to have an appropriate basis for the identification and assessment of risks of material misstatement at the assertion level, in accordance with paragraph .13. Such controls may include some or all of the following:

- Controls that address risks assessed as higher on the spectrum of inherent risk but have not been determined to be a significant risk
- Controls related to reconciling detailed records to the general ledger
- Controls related to accounting estimates
- Complementary user entity controls, if using a service organization[53]

[51] Paragraph .08*b* of section 330.

[52] Paragraph .08*a* of section 330.

.A188 The auditor's knowledge about the presence or absence of controls obtained from the understanding of the other components may inform the auditor's professional judgment in determining the extent to which it is necessary to devote additional attention to other controls.

Identifying IT Applications and Other Aspects of the IT Environment, Risks Arising From the Use of IT, and General IT Controls (Ref: par. .29)

.A189 Appendix E includes examples of considerations that may assist the auditor in determining whether IT applications are subject to risks arising from the use of IT.

Identifying IT Applications and Other Aspects of the IT Environment (Ref: par. .29)

Why the Auditor Identifies Risks Arising From the Use of IT and General IT Controls Related to Identified IT Applications and Other Aspects of the IT Environment

.A190 For controls listed in paragraph .27, paragraph .29 requires the auditor to identify related IT applications and other aspects of the IT environment that are subject to the risks described in paragraph .29*a*. Paragraph .29*b* then requires the auditor to identify general IT controls that address such risks. Such identification is necessary in order for the auditor to effectively perform the evaluation of design and determination of implementation of identified controls in accordance with paragraph .30 because general IT controls that address these risks may affect the design and implementation of the controls identified in paragraph .27.

.A191 In understanding the risks arising from the use of IT and the general IT controls implemented by the entity to address those risks, some or all of the following may be affected:

- *The auditor's decision about whether to test the operating effectiveness of controls to address risks of material misstatement at the assertion level*. For example, when general IT controls are not designed effectively or appropriately implemented to address risks arising from the use of IT (for example, controls do not appropriately prevent or detect unauthorized program changes or unauthorized access to IT applications), this may affect the auditor's decision to rely on automated controls within the affected IT applications.
- *The auditor's assessment of control risk at the assertion level*. For example, the ongoing operating effectiveness of an information-processing control may depend on certain general IT controls that prevent or detect unauthorized program changes to the IT information-processing control (that is, program change controls over the related IT application). In such circumstances, the expected operating effectiveness (or lack thereof) of the general IT control may affect the auditor's assessment of control risk (for example, control risk may be higher when such general IT controls are expected to be ineffective or if the auditor does not plan to test the general IT controls).

---

[53]Section 402, *Audit Considerations Relating to an Entity Using a Service Organization*.

- *The auditor's strategy for testing information produced by the entity that is produced by or involves information from the entity's IT applications*. For example, when information produced by the entity to be used as audit evidence is produced by IT applications, the auditor may determine to test controls over system-generated reports, including identification and testing of the general IT controls that address risks of inappropriate or unauthorized program changes or direct changes to the data in such reports.
- *The auditor's assessment of inherent risk at the assertion level*. For example, when there are significant or extensive programming changes to an IT application to address new or revised reporting requirements of the applicable financial reporting framework, this may be indicative of the complexity of the new requirements and their effect on the entity's financial statements. When such extensive programming or data changes occur, the IT application is also likely to be subject to risks arising from the use of IT.
- *The design of further audit procedures*. For example, if information-processing controls depend on general IT controls, the auditor may determine to test the operating effectiveness of the general IT controls, which will then require the design of tests of controls for such general IT controls. If, in the same circumstances, the auditor determines not to test the operating effectiveness of the general IT controls, or the general IT controls are expected to be ineffective, the related risks arising from the use of IT may need to be addressed through the design of substantive procedures. However, in such circumstances, the risks arising from the use of IT may not be able to be addressed when such risks relate to risks for which substantive procedures alone do not provide sufficient appropriate audit evidence. In addition, the auditor may need to consider the implications for the audit opinion.

Identifying IT Applications That Are Subject to Risks Arising From the Use of IT

.A192 For the IT applications relevant to the information system, understanding the nature and complexity of the specific IT processes and general IT controls that the entity has in place may assist the auditor in determining which IT applications the entity is relying upon to accurately process and maintain the integrity of information in the entity's information system. Such IT applications may be subject to risks arising from the use of IT.

.A193 Identifying the IT applications that are subject to risks arising from the use of IT involves taking into account controls identified by the auditor because such controls may involve the use of IT or rely on IT. The auditor may focus on whether an IT application includes automated controls that management is relying on and that the auditor has identified, including controls that address risks for which substantive procedures alone do not provide sufficient appropriate audit evidence. The auditor may also consider how information is stored and processed in the information system relating to significant classes of transactions, account balances, and disclosures and whether management is relying on general IT controls to maintain the integrity of that information.

.A194 The controls identified by the auditor in accordance with paragraph .27 may depend on system-generated reports that contain information that is used in the operation of the controls. In such circumstances, the control owner might rely on controls over the preparation and maintenance of such reports or perform other procedures to verify the information is accurate and complete. Likewise, the auditor may obtain audit evidence about the accuracy and completeness of the information by directly testing the inputs and outputs of the system-generated reports, rather than rely on controls over the preparation and maintenance of such reports. In such circumstances, the auditor may not identify the related IT applications as being subject to risks arising from the use of IT and, thus, such controls may not be subject to the requirement in paragraph .29*b*.

Scalability

.A195 The extent of the auditor's understanding of the IT processes, including the extent to which the entity has general IT controls in place, will vary with the nature and circumstances of the entity and its IT environment and will also be based on the nature and extent of controls identified by the auditor. The number of IT applications that are subject to risks arising from the use of IT also will vary based on these factors. Examples are as follows:

- An entity that uses commercial software and does not have access to the source code to make any program changes is unlikely to have a process for program changes but may have a process or procedures to configure the software (for example, the chart of accounts, reporting parameters, or thresholds). In addition, the entity may have a process or procedures to manage access to the application (for example, a designated individual with administrative access to the commercial software). In such circumstances, the entity is unlikely to have formalized general IT controls.
- In contrast, an entity may use multiple IT applications, and the IT processes to manage the IT environment may be complex (for example, a dedicated IT department exists that develops and implements program changes and manages access rights). In such circumstances, the entity likely has implemented formalized general IT controls over its IT processes.
- When management is not relying on automated controls or general IT controls to support complete and accurate transaction processing or maintain the data, and the auditor has not identified any automated controls or other information-processing controls (or any that depend on general IT controls), the auditor may plan to directly test any information produced by the entity involving IT and may not identify any IT applications that are subject to risks arising from the use of IT.
- When management relies on an IT application to process or maintain data and the volume of data is significant, and management relies upon the IT application to perform automated controls that the auditor has also identified, the IT application is likely to be subject to risks arising from the use of IT.

See paragraph 15 of appendix E for examples of considerations that may assist the auditor in determining whether IT applications are subject to risks arising from the use of IT.

.A196 When an entity has greater complexity in its IT environment, identifying the IT applications and other aspects of the IT environment, determining the related risks arising from the use of IT, and identifying general IT controls is likely to require the involvement of team members with specialized skills or knowledge in IT. Such involvement is likely to be essential and may need to be extensive for complex IT environments.

Identifying Other Aspects of the IT Environment That Are Subject to Risks Arising From the Use of IT

.A197 The other aspects of the IT environment that may be subject to risks arising from the use of IT include the network, operating system and databases, and, in certain circumstances, interfaces between IT applications. Other aspects of the IT environment are generally not identified when the auditor does not identify IT applications that are subject to risks arising from the use of IT. When the auditor has identified IT applications that are subject to risks arising from the use of IT, other aspects of the IT environment (for example, database, operating system, network) are likely to be identified because such aspects support and interact with the identified IT applications.

Identifying Risks Arising From the Use of IT and General IT Controls (Ref: par. .29)

.A198 Appendix F, "Considerations for Understanding General IT Controls," sets out considerations for understanding general IT controls.

.A199 In identifying the risks arising from the use of IT, the auditor may consider the nature of the identified IT application or other aspect of the IT environment and the reasons for it being subject to risks arising from the use of IT. For some identified IT applications or other aspects of the IT environment, the auditor may identify applicable risks arising from the use of IT that relate primarily to unauthorized access or unauthorized program changes as well as risks related to inappropriate data changes (for example, the risk of inappropriate changes to the data through direct database access or the ability to directly manipulate information).

.A200 The extent and nature of the applicable risks arising from the use of IT vary depending on the nature and characteristics of the identified IT applications and other aspects of the IT environment. Applicable IT risks may result when the entity uses external or internal service providers for identified aspects of its IT environment (for example, outsourcing the hosting of its IT environment to a third party or using a shared service center for central management of IT processes in a group). It is more likely that there will be more risks arising from the use of IT when the volume or complexity of automated application controls is higher and management is placing greater reliance on those controls for effective processing of transactions or the effective maintenance of the integrity of underlying information. Applicable risks arising from the use of IT may also be identified related to cybersecurity.

Evaluating the Design and Determining Implementation of Identified Controls in the Control Activities Component (Ref: par. .30)

.A201 Evaluating the design of an identified control involves the auditor's consideration of whether the control, individually or in combination with other controls, is capable of effectively preventing, or detecting and correcting, material misstatements.

.A202 The auditor determines the implementation of an identified control by establishing that the control exists and that the entity is using it. There is little point in the auditor assessing the implementation of a control that is not designed effectively. Therefore, the auditor typically evaluates the design of a control first. An improperly designed control may represent a control deficiency.

.A203 Risk assessment procedures to obtain audit evidence about the design and implementation of identified controls in the control activities component may include

- inquiring of entity personnel.
- observing the performance of specific controls.
- inspecting documents and reports.
- reperforming the specific controls.

Inquiry alone, however, is not sufficient for such purposes.

.A204 A walk-through involves following a transaction from origination through the entity's processes, including information systems, until it is reflected in the entity's financial records, using the same documents and IT that entity personnel use. Walk-throughs may assist the auditor in understanding the information system as required by paragraph .25 and in evaluating the design of controls that address the risks of material misstatement and determining whether those controls have been implemented as required by paragraph .30. Walk-through procedures usually include a combination of inquiry, observation, inspection of relevant documentation, and reperformance of controls. Such walk-throughs, as described in paragraph .A205, ordinarily are sufficient to evaluate design and determine implementation when risk assessment procedures beyond inquiry are performed.

.A205 In performing a walk-through, at the points at which important processing procedures occur, the auditor inquires of the entity's personnel about their understanding of what is required by the entity's prescribed procedures and controls particularly for the application of manual controls. These inquiries, combined with the other walk-through procedures, allow the auditor to gain a sufficient understanding of the process and to be able to identify important points at which a necessary control is missing or not designed effectively. Additionally, inquiries that go beyond a narrow focus on the single transaction used as the basis for the walk-through allow the auditor to gain an understanding of the different types of significant transactions handled by the process.

.A206 The auditor may expect, based on experience from the previous audit or based on current period risk assessment procedures, that management does not have effectively designed or implemented controls to address a significant risk. In such instances, the procedures performed to address the requirement in paragraph .30 may consist of determining that such controls have not been effectively designed or implemented. If the results of the procedures indicate that controls have been newly designed or implemented, the auditor is required to perform the procedures in paragraph .30 on the newly designed or implemented controls.

.A207 The auditor may conclude that a control, which is effectively designed and implemented, may be appropriate to test in order to take its operating effectiveness into account in designing substantive procedures. However, when a control is not designed or implemented effectively, there is no benefit in testing it. When the auditor plans to test the operating effectiveness of a control, the information obtained about the extent to which the control addresses the risk or risks of material misstatement may be an input to the auditor's control risk assessment at the assertion level (see paragraph .A256).

.A208 Evaluating the design and determining the implementation of identified controls in the control activities component is not sufficient to test their operating effectiveness. However, for automated controls, if the procedures performed to evaluate the design of the controls and determine whether they have been implemented meets the requirements of a test of operating effectiveness in section 330,[54] the auditor may use the results of these procedures as a test of the operating effectiveness of the automated controls for the audit period if general IT controls provide for the consistent operation of the automated controls. Obtaining audit evidence about the implementation of a manual control at a point in time does not provide audit evidence about the operating effectiveness of the control at other times during the period under audit. Tests of the operating effectiveness of controls, including tests of indirect controls, are further described in section 330.[55]

.A209 When the auditor does not plan to test the operating effectiveness of identified controls, the auditor's evaluation of the design and determination of the implementation of certain controls may still assist in the design of the nature, timing, and extent of substantive procedures that are responsive to the related risks of material misstatement. Examples are as follows:

- These risk assessment procedures may provide a basis for the auditor's consideration of possible misstatements or likely sources of misstatements in a population when designing substantive procedures.
- These risk assessment procedures may lead the auditor to identify inadequate segregation of duties that may affect the design of the auditor's substantive procedures (for example, inadequate segregation of duties in the payroll function may indicate a fraud risk resulting from the ability to create fictitious employees for which the auditor's substantive procedures are required to be responsive to that risk).
- These risk assessment procedures may lead the auditor to identify missing controls that may affect the design of the auditor's substantive procedures (for example, the auditor may become aware that identified controls related to sales do not address the entity's bill-and-hold transactions with customers, resulting in different substantive procedures for such transactions)

.A210 In addition, when identified controls are designed effectively and implemented, risk assessment procedures may influence the auditor's determination of the nature and timing of substantive procedures to be performed (for example, the auditor may determine

[54] Paragraph .A34 of section 330.

[55] Paragraphs .08–.10 of section 330.

to perform inspection, rather than external confirmation or to perform procedures at an interim date, rather than at period end).

Control Deficiencies Within the Entity's System of Internal Control (Ref: par. .31)

.A211 In performing the evaluations required by paragraphs .21*b*, .22*b*, .24*c*#UUID-a1ba5383-a558-6e86-8df7-cfed793527c4_ad_315.21, .25*c*, and .30, the auditor may determine that certain of the entity's policies in a component are not appropriate to the nature and circumstances of the entity. Such determination may be an indicator that a control deficiency exists.

.A212 If the auditor has identified one or more control deficiencies, section 265, *Communicating Internal Control Related Matters Identified in an Audit*,[56] requires the auditor to determine whether, individually or in combination, the deficiencies constitute a material weakness or a significant deficiency. The auditor exercises professional judgment in determining whether a control deficiency represents a material weakness or a significant deficiency. Section 265 sets out indicators of material weaknesses and matters to be considered in determining whether a deficiency, or a combination of deficiencies, in internal control constitute a material weakness or a significant deficiency.[57]

Identifying and Assessing the Risks of Material Misstatement (Ref: par. .32–.41)

Why the Auditor Identifies and Assesses the Risks of Material Misstatement

.A213 Risks of material misstatement are identified and assessed by the auditor in order to determine the nature, timing, and extent of further audit procedures necessary to obtain sufficient appropriate audit evidence. This evidence enables the auditor to express an opinion on the financial statements at an acceptably low level of audit risk.

.A214 Information gathered by performing risk assessment procedures is used as audit evidence to provide the basis for the identification and assessment of the risks of material misstatement. For example, the audit evidence obtained when evaluating the design of identified controls and determining whether those controls have been implemented in the control activities component is used as audit evidence to support the risk assessment. Such evidence also provides a basis for the auditor to design overall responses to address the assessed risks of material misstatement at the financial statement level as well as designing and performing further audit procedures whose nature, timing, and extent are responsive to the assessed risks of material misstatement at the relevant assertion level, in accordance with section 330.

Identifying Risks of Material Misstatement (Ref: par. .32)

.A215 The identification of risks of material misstatement is performed before consideration of any related controls (that is, the determination is based on inherent risk) and is based on

---

[56]Paragraph .08 of section 265, *Communicating Internal Control Related Matters Identified in an Audit*.

[57]Paragraphs .A6–.A7 of section 265.

the auditor's preliminary consideration of misstatements that have a reasonable possibility of both occurring and being material if they were to occur.

.A216 Identifying the risks of material misstatement also provides the basis for the auditor's determination of relevant assertions, which assists the auditor's determination of the significant classes of transactions, account balances, and disclosures.

Assertions

Why the Auditor Uses Assertions

.A217 In identifying and assessing the risks of material misstatement, the auditor uses assertions to consider the different types of potential misstatements that may occur. Assertions for which the auditor has identified related risks of material misstatement are relevant assertions.

The Use of Assertions

.A218 In identifying and assessing the risks of material misstatement, the auditor may use the categories of assertions as described in subsequent paragraph .A219*a–b* or may express them differently, provided all aspects described in paragraph .A219*a–b* have been covered. The auditor may choose to combine the assertions about classes of transactions and events, and related disclosures, with the assertions about account balances and related disclosures.

.A219 Assertions used by the auditor in considering the different types of potential misstatements that may occur may fall into the following categories:

a. Assertions about classes of transactions and events, and related disclosures, for the period under audit:

   i. *Occurrence.* Transactions and events that have been recorded or disclosed have occurred, and such transactions and events pertain to the entity.

   ii. *Completeness.* All transactions and events that should have been recorded have been recorded, and all related disclosures that should have been included in the financial statements have been included.

   iii. *Accuracy*. Amounts and other data relating to recorded transactions and events have been recorded appropriately, and related disclosures have been appropriately measured and described.

   iv. *Cutoff*. Transactions and events have been recorded in the correct accounting period.

   v. *Classification*. Transactions and events have been recorded in the proper accounts.

   vi. *Presentation*. Transactions and events are appropriately aggregated or disaggregated and clearly described, and related disclosures are relevant and understandable in the context of the requirements of the applicable financial reporting framework.

b. Assertions about account balances, and related disclosures, at the period end:

   i. *Existence*. Assets, liabilities, and equity interests exist.

   ii. *Rights and obligations*. The entity holds or controls the rights to assets, and liabilities are the obligations of the entity.

   iii. *Completeness*. All assets, liabilities, and equity interests that should have been recorded have been recorded, and all related disclosures that should have been included in the financial statements have been included.

   iv. *Accuracy, valuation, and allocation.* Assets, liabilities, and equity interests have been included in the financial statements at appropriate amounts and any resulting valuation or allocation adjustments have been appropriately recorded, and related disclosures have been appropriately measured and described.

   v. *Classification*. Assets, liabilities, and equity interests have been recorded in the proper accounts.

   vi. *Presentation.* Assets, liabilities, and equity interests are appropriately aggregated or disaggregated and clearly described, and related disclosures are relevant and understandable in the context of the requirements of the applicable financial reporting framework.

.A220 The assertions described in preceding paragraph .A219*a–b*, adapted as appropriate, may also be used by the auditor in considering the different types of misstatements that may occur in disclosures not directly related to recorded classes of transactions, events, or account balances. For example, such a disclosure may be a description, required by the applicable financial reporting framework, of an entity's exposure to risks arising from financial instruments, including how the risks arise; the objectives, policies, and processes for managing the risks; and the methods used to measure the risks.

Considerations Specific to Governmental Entities

.A221 When making assertions about the financial statements of governmental entities, in addition to those assertions set out in paragraph .A219*a–b*, management may often assert that transactions and events have been carried out in accordance with law, regulation, or other authority. Such assertions may fall within the scope of the financial statement audit.

Risks of Material Misstatement at the Financial Statement Level (Ref: par. .32a and .34)

Why the Auditor Identifies and Assesses Risks of Material Misstatement at the Financial Statement Level

.A222 The auditor identifies risks of material misstatement at the financial statement level to determine whether the risks have a pervasive effect on the financial statements and, therefore, would require an overall response in accordance with section 330.[58]

.A223 In addition, risks of material misstatement at the financial statement level may also affect individual assertions, and identifying these risks may assist the auditor in assessing risks of material misstatement at the assertion level and in designing further audit procedures to address the identified risks.

Identifying and Assessing Risks of Material Misstatement at the Financial Statement Level

.A224 Risks of material misstatement at the financial statement level refer to risks that relate pervasively to the financial statements as a whole and potentially affect many assertions. Risks of this nature are not necessarily risks identifiable with specific assertions at the class of transactions, account balance, or disclosure level (for example, risk of management override of controls). Rather, they represent circumstances that may pervasively increase the risks of material misstatement at the assertion level. The auditor's evaluation of whether risks identified relate pervasively to the financial statements supports the auditor's assessment of the risks of material misstatement at the financial statement level. In other cases, a number of assertions may also be identified as susceptible to the risk and, therefore, may affect the auditor's risk identification and assessment of risks of material misstatement at the assertion level (see paragraph .A246).

.A225 Depending upon the entity's nature and its environment, for example, governmental entities, the identification of risks at the financial statement level may include consideration of matters related to the political climate, public interest, and sensitivity of programs or activities.

.A226 The auditor's identification and assessment of risks of material misstatement at the financial statement level is influenced by the auditor's understanding of the entity's system of internal control, in particular, the auditor's understanding of the control environment, the entity's risk assessment process, and the entity's process to monitor the system of internal control, in addition to the following:

- The outcome of the related evaluations required by paragraphs .21*b*, .22*b*, .24*c*, and .25*c*
- Any control deficiencies identified in accordance with paragraph .31

In particular, risks at the financial statement level may arise from control deficiencies in the control environment or from external events or conditions such as declining economic conditions. For example, control deficiencies such as a lack of management competence or a lack of oversight over the preparation and fair presentation of the financial statements may have a more pervasive effect on the financial statements and may require an overall response by the auditor in accordance with section 330.[59]

.A227 Risks of material misstatement due to fraud may be particularly relevant to the auditor's consideration of the risks of material misstatement at the financial statement level. For example, the auditor understands from inquiries of management that the entity's

[58] Paragraph .05 of section 330.

[59] Paragraph .05 of section 330.

financial statements are to be used in discussions with lenders in order to secure further financing to maintain working capital. The auditor also understands from such inquiries and other procedures that current loan agreements with these lenders contain financial covenants that the entity is at risk of failing to meet and identifies this condition as a fraud risk factor. Therefore, the auditor may determine that there is a greater susceptibility to misstatement due to this identified fraud risk factor, which affects inherent risk (that is, the susceptibility of the financial statements to material misstatement because of the risk of fraudulent financial reporting, such as overstatement of assets and revenue and understatement of liabilities and expenses to ensure that the covenants are met). The auditor may then identify assertion level risks with respect to existence, accuracy, or valuation of certain assets and completeness of certain liabilities that are susceptible to material misstatement as a result of this financial statement level risk.

.A228 The auditor's understanding, including the related evaluations, of the control environment and other components of the system of internal control may raise doubts about the auditor's ability to obtain audit evidence on which to base the audit opinion or be cause for withdrawal from the engagement when withdrawal is possible under applicable law or regulation. Examples are as follows:

- As a result of evaluating the entity's control environment, the auditor has concerns about the integrity of the entity's management, which may be so serious that it could cause the auditor to conclude that the risk of intentional misrepresentation by management in the financial statements is such that an audit cannot be conducted.
- As a result of evaluating the entity's information system and communication, the auditor determines that significant changes in the IT environment have been poorly managed, with little oversight from management and those charged with governance. The auditor concludes that there are significant concerns about the condition and reliability of the entity's accounting records. In such circumstances, the auditor may determine that it is unlikely that sufficient appropriate audit evidence will be available to support an unmodified opinion on the financial statements.

.A229 Section 705, *Modifications to the Opinion in the Independent Auditor's Report*, establishes requirements and provides guidance in determining whether there is a need for the auditor to express a qualified opinion or disclaim an opinion or, as may be required in some cases, to withdraw from the engagement when withdrawal is possible under applicable law or regulation.

Risks of Material Misstatement at the Assertion Level (Ref: par. .32b)

.A230 Appendix B sets out examples, in the context of inherent risk factors, of events or conditions that may indicate susceptibility to misstatement that may be material.

.A231 Risks of material misstatements that do not relate pervasively to the financial statements are risks of material misstatement at the assertion level. Assessed risks of material misstatement for the relevant assertions and the related significant classes of transactions, account balances, and disclosures are also referred to as *risks of material misstatement at the relevant assertion level*.

Relevant Assertions and Significant Classes of Transactions, Account Balances, and Disclosures (Ref: par. .33)

Why Relevant Assertions and Significant Classes of Transactions, Account Balances, and Disclosures Are Determined

.A232 Risks of material misstatement are assessed at the assertion level for significant classes of transactions, account balances, or disclosures in order to determine the nature, timing, and extent of further audit procedures necessary to obtain sufficient appropriate audit evidence. An approach to identifying and assessing risks of material misstatement may begin at the financial statement level and, with the auditor's overall understanding through risk assessment procedures, work down to significant classes of transactions, account balances, and disclosures and their relevant assertions. Further, determining the significant classes of transactions, account balances, and disclosures provides the basis for the scope of the auditor's understanding of the entity's information system required to be obtained in accordance with paragraph .25*a*. As described in paragraph .A144, the information obtained from the auditor's understanding and evaluation of the information system and communication component required by this section may confirm or further influence the auditor's expectations about the significant classes of transactions, account balances, and disclosures initially identified. This understanding may further assist the auditor in identifying and assessing risks of material misstatement (see paragraph .A96).

Automated Tools and Techniques

.A233 The auditor may use automated techniques to assist in the identification of significant classes of transactions, account balances, and disclosures. Examples are as follows:

- An entire population of transactions may be analyzed using automated tools and techniques to understand their nature, source, size, and volume. By applying automated techniques, the auditor may, for example, identify that an account with a zero balance at period end comprised numerous offsetting transactions and journal entries occurring during the period, indicating that the account balance or class of transactions may be significant (for example, a payroll clearing account). This same payroll clearing account may also identify expense reimbursements to management (and other employees), which could be a significant disclosure due to these payments being made to related parties.
- By analyzing the flows of an entire population of revenue transactions, the auditor may more easily identify a significant class of transactions that had not previously been identified.

Disclosures That May Be Significant

.A234 Significant disclosures include both quantitative and qualitative disclosures for which there is one or more relevant assertions. Examples of disclosures that have qualitative aspects and that may have relevant assertions and, therefore, may be considered significant by the auditor include disclosures about the following:

- Accounting and reporting complexities associated with an account
- Exposure to losses in an account
- Significant contingent liabilities arising from the activities reflected in an account
- Liquidity and debt covenants of an entity in financial distress
- Events or circumstances that have led to the recognition of an impairment loss
- Key sources of estimation uncertainty, including assumptions about the future
- The nature of a change in accounting policy, and other relevant disclosures required by the applicable financial reporting framework, where, for example, new financial reporting requirements are expected to have a significant impact on the financial position and financial performance of the entity
- Share-based payment arrangements, including information about how any amounts recognized were determined, and other relevant disclosures
- Related parties and related party transactions
- Sensitivity analysis, including the effects of changes in assumptions used in the entity's valuation techniques intended to enable users to understand the underlying measurement uncertainty of a recorded or disclosed amount

Assessing Risks of Material Misstatement at the Assertion Level

Assessing Inherent Risk (Ref: par. .35–.37)

Assessing the Likelihood and Magnitude of Misstatement (Ref: par. .35)

Why the Auditor Assesses Likelihood and Magnitude of Misstatement

.A235 The auditor assesses the likelihood and magnitude of misstatement for identified risks of material misstatement because the significance of the combination of the likelihood of a misstatement occurring and the magnitude of the potential misstatement were the misstatement to occur determines where on the spectrum of inherent risk the identified risk is assessed, which informs the auditor's design of further audit procedures to address the risk.

.A236 Assessing the inherent risk of identified risks of material misstatement also assists the auditor in determining significant risks. The auditor determines significant risks because specific responses to significant risks are required in accordance with section 330 and other AU-C sections.

.A237 Inherent risk factors influence the auditor's assessment of the likelihood and magnitude of misstatement for the identified risks of material misstatement at the assertion level. The greater the degree to which a class of transactions, account balance, or disclosure is susceptible to material misstatement, the higher the inherent risk assessment is likely to be. Considering the degree to which inherent risk factors affect the susceptibility of an assertion to misstatement assists the auditor in appropriately assessing inherent risk for risks of material misstatement at the assertion level and in designing a more precise response to such a risk.

Spectrum of Inherent Risk

.A238 In assessing inherent risk, the auditor exercises professional judgment in determining the significance of the combination of the likelihood and magnitude of a misstatement.

.A239 The assessed inherent risk relating to a particular risk of material misstatement at the assertion level represents a judgment within a range, from lower to higher, on the spectrum of inherent risk. The judgment about where in the range inherent risk is assessed may vary based on the nature, size, and complexity of the entity and takes into account the assessed likelihood and magnitude of the misstatement and inherent risk factors.

.A240 In considering the likelihood of a misstatement, the auditor considers the possibility that a misstatement may occur based on consideration of the inherent risk factors.

.A241 In considering the magnitude of a misstatement, the auditor considers the qualitative and quantitative aspects of the possible misstatement (that is, misstatements in assertions about classes of transactions, account balances, or disclosures may be judged to be material due to size, nature, or circumstances).

.A242 The auditor uses the significance of the combination of the likelihood and magnitude of a possible misstatement in determining where on the spectrum of inherent risk (that is, the range) inherent risk is assessed. The higher the combination of likelihood and magnitude, the higher the assessment of inherent risk; the lower the combination of likelihood and magnitude, the lower the assessment of inherent risk.

.A243 For a risk to be assessed as higher on the spectrum of inherent risk, it does not mean that both the magnitude and likelihood need to be assessed as high. Rather, it is the intersection of the magnitude and likelihood of the material misstatement on the spectrum of inherent risk that will determine whether the assessed inherent risk is higher or lower on the spectrum of inherent risk. A higher inherent risk assessment may also arise from different combinations of likelihood and magnitude, for example, a higher inherent risk assessment could result from a lower likelihood but a very high magnitude.

.A244 In order to develop appropriate strategies for responding to risks of material misstatement, the auditor may designate risks of material misstatement within categories along the spectrum of inherent risk, based on the auditor's assessment of inherent risk. These categories may be described in different ways, such as in quantitative terms or in nonquantitative terms. For example, the auditor may use percentages or classifications (for example, low, medium, or high; lower or higher; normal or elevated; or another type of nominal or arithmetic scale) to describe the level of inherent risk. Regardless of the method used, the auditor's assessment of inherent risk is appropriate when the design and implementation of further audit procedures to address the identified risks of material misstatement at the assertion level is appropriately responsive to the assessment of inherent risk and the reasons for that assessment.

Pervasive Risks of Material Misstatement at the Assertion Level (Ref: par. .35*b*)

.A245 In assessing the identified risks of material misstatement at the assertion level, the auditor may conclude that some risks of material misstatement relate more pervasively to the financial statements as a whole and potentially affect many assertions, in which case, the auditor may update the identification of risks of material misstatement at the financial statement level.

.A246 In circumstances in which risks of material misstatement are identified as financial statement level risks due to their pervasive effect on a number of assertions and are identifiable with specific assertions, the auditor is required to take into account those risks when assessing inherent risk for risks of material misstatement at the assertion level. Further, identified risks of material misstatement at the financial statement level may affect the auditor's assessment of significant risks at the assertion level.[60] For example, an entity may face operating losses and liquidity issues and be reliant on funding that has not yet been secured. In such a circumstance, the financial reporting framework may require management to evaluate whether there is substantial doubt about the entity remaining a going concern, and the auditor may determine that there is a significant risk associated with the related disclosures in the entity's financial statements.

Significant Risks (Ref: par. .36)

Why Significant Risks Are Determined and the Implications for the Audit

.A247 The determination of significant risks allows for the auditor to focus more attention on those risks that are close to the upper end of the spectrum of inherent risk, through the performance of certain required responses, including the following:

- Controls that address significant risks are required to be identified in accordance with paragraph .27*a* of this section, with a requirement to evaluate whether the control has been designed effectively and implemented in accordance with paragraph .30 of this section.
- In addition to the requirements and guidance in this section, section 330 includes special audit considerations in the form of specific requirements related to significant risks because of the nature of the risk and the likelihood and potential magnitude of misstatement related to the risk. In this regard, section 330 requires controls that address significant risks to be tested in the current period (when the auditor intends to rely on the operating effectiveness of such controls) and substantive procedures to be planned and performed that are specifically responsive to the identified significant risk.[61]
- Section 330 requires the auditor to obtain more persuasive audit evidence the higher the auditor's assessment of risk.[62]

[60] See paragraph .A214 of this section.

[61] Paragraphs .15 and .22 of section 330.

[62] Paragraph .07*b* of section 330.

- Section 260 requires communicating with those charged with governance about the significant risks identified by the auditor.[63]
- Section 701, *Communicating Key Audit Matters in the Independent Auditor's Report*, if applicable, requires the auditor to take into account significant risks when determining those matters that required significant auditor attention, which are matters that may be key audit matters.[64]
- Section 600A requires more involvement by the group engagement partner if the significant risk relates to a component in a group audit and for the group engagement team to direct the work required at the component by the component auditor.[65]

.A248 Timely review of audit documentation by the engagement partner at the appropriate stages during the audit allows significant matters, including significant risks, to be resolved on a timely basis to the engagement partner's satisfaction on or before the date of the auditor's report.[66]

Determining Significant Risks

.A249 In determining significant risks, the auditor may first identify those assessed risks of material misstatement that have been assessed higher on the spectrum of inherent risk to form the basis for considering which risks may be close to the upper end. Being close to the upper end of the spectrum of inherent risk will differ from entity to entity and will not necessarily be the same for an entity period on period. It may depend on the nature and circumstances of the entity for which the risk is being assessed.

.A250 The determination of which of the assessed risks of material misstatement are close to the upper end of the spectrum of inherent risk and, therefore, are significant risks, is a matter of professional judgment, unless the risk is of a type specified to be treated as a significant risk in accordance with the requirements of another AU-C section. Section 240 and section 550 provide further requirements and guidance in relation to the identification and assessment of the risks of material misstatement due to fraud and related party transactions that are also significant unusual transactions.[67,68] Examples are as follows:

- Cash at a supermarket retailer would ordinarily be determined to be a high likelihood of possible misstatement (due to the risk of cash being misappropriated); however, the magnitude would typically be very low (due to the low levels of physical cash handled in the stores). The combination of these two factors on the spectrum of inherent risk would be unlikely to result in the existence of cash being determined to be a significant risk.

[63] Paragraph .11 of section 260.

[64] Paragraph .08 of section 701, *Communicating Key Audit Matters in the Independent Auditor's Report*.

[65] Paragraphs .57–.58 of section 600A, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors)*.

[66] Paragraphs .19 and .A17 of section 220.

[67] Paragraphs .25–.27 of section 240.

[68] Paragraph .18 of section 550.

- An entity is in negotiations to sell a business segment. The auditor considers the effect on goodwill impairment and may determine there is a higher likelihood of possible misstatement and a higher magnitude due to the impact of inherent risk factors of subjectivity, uncertainty, and susceptibility to management bias or other fraud risk factors. This may result in goodwill impairment being determined to be a significant risk.

.A251 The auditor also takes into account the relative effects of inherent risk factors when assessing inherent risk. The lower the effect of inherent risk factors, the lower the assessed risk is likely to be. Risks of material misstatement that may be assessed as having higher inherent risk and, therefore, may be determined to be a significant risk, may arise from matters such as the following:

- Transactions for which there are multiple acceptable accounting treatments such that subjectivity is involved
- Accounting estimates that have high estimation uncertainty or complex models[69]
- Accounting for unusual or complex transactions (for example, accounting for revenue with multiple performance obligations that are difficult to value)
- Emerging areas (for example, accounting for digital assets)
- Complexity in data collection and processing to support account balances
- Account balances or quantitative disclosures that involve complex calculations
- Accounting principles that may be subject to differing interpretation
- Changes in the entity's business that involve changes in accounting, for example, mergers and acquisitions

Risks for Which Substantive Procedures Alone Do Not Provide Sufficient Appropriate Audit Evidence (Ref: par. .37)

Why Risks for Which Substantive Procedures Alone Do Not Provide Sufficient Appropriate Audit Evidence Are Required to Be Identified

.A252 Due to the nature of a risk of material misstatement, and the controls that address that risk, in some circumstances, the only way to obtain sufficient appropriate audit evidence is to test the operating effectiveness of controls. Accordingly, there is a requirement for the auditor to identify any such risks because of the implications for the design and performance of further audit procedures in accordance with section 330 to address risks of material misstatement at the assertion level.

.A253 Paragraph .27*c* also requires the identification of controls that address risks for which substantive procedures alone cannot provide sufficient appropriate audit evidence because the auditor is required, in accordance with section 330,[70] to design and perform tests of such controls.

---

[69] Paragraphs .10–.11 of section 540, *Auditing Accounting Estimates and Related Disclosures*.

Determining Risks for Which Substantive Procedures Alone Do Not Provide Sufficient Appropriate Audit Evidence

.A254 When routine business transactions are subject to highly automated processing with little or no manual intervention, it may not be possible to perform only substantive procedures in relation to the risk. This may be the case in circumstances in which a significant amount of an entity's information is initiated, recorded, processed, or reported in the financial statements only in electronic form. For example, it is typically not possible to obtain sufficient appropriate audit evidence relating to revenue for a telecommunications entity based on substantive procedures alone. This is because the evidence of call or data activity does not exist in a form that is observable. Instead, controls testing is typically performed to determine that the origination and completion of calls and data activity is correctly captured (for example, minutes of a call or volume of a download) and recorded correctly in the entity's billing system. In such cases

- audit evidence may be available only in electronic form, and its sufficiency and appropriateness usually depend on the effectiveness of controls over its accuracy and completeness.
- the potential for improper initiation or alteration of information to occur and not be detected may be greater if appropriate controls are not operating effectively.

.A255 Section 540 provides further guidance related to accounting estimates about risks for which substantive procedures alone do not provide sufficient appropriate audit evidence.[71] In relation to accounting estimates, this may not be limited to automated processing but may also be applicable to complex models.

Assessing Control Risk (Ref: par. .38)

.A256 The auditor's plans to test the operating effectiveness of controls is based on the expectation that controls are operating effectively, and this will form the basis of the auditor's assessment of control risk. The initial expectation of the operating effectiveness of controls is based on the auditor's evaluation of the design and the determination of implementation of the identified controls in the control activities component. The results of tests of the operating effectiveness of the controls in accordance with section 330 provide the basis for the auditor's determination of whether the initial expectation about the operating effectiveness of controls remains appropriate. If the controls are not operating effectively as expected, then the auditor will need to revise the control risk assessment in accordance with paragraph .41.

.A257 The auditor's assessment of control risk may be performed in different ways, depending on preferred audit techniques or methodologies, and may be expressed in different ways. For instance, the control risk assessment may be expressed using qualitative terms (such as control risk assessed as maximum, moderate, or minimum) or in terms of the auditor's expectation of how effective the controls are in addressing the identified risk, that

[70]Paragraph .08 of section 330.

[71]Paragraphs .A87–.A89 of section 540.

is, the planned reliance on the effective operation of controls. For example, if control risk is assessed as maximum, the auditor contemplates no reliance on the effective operation of controls. If control risk is assessed at less than maximum, the auditor contemplates reliance on the effective operation of controls. In accordance with paragraph .38, tests of the operating effectiveness of controls are required to support a control risk assessment below the maximum level.

.A258 If the auditor plans to test the operating effectiveness of controls, it may be necessary to test a combination of controls to confirm the auditor's expectation that the controls are operating effectively. The auditor may plan to test both direct and indirect controls, including general IT controls and, if so, take into account the combined expected effect of the controls when assessing control risk. To the extent that the control to be tested does not fully address the assessed inherent risk, the auditor determines the implications on the design of further audit procedures to reduce audit risk to an acceptably low level.

.A259 When the auditor plans to test the operating effectiveness of an automated control, the auditor may also plan to test the operating effectiveness of the relevant general IT controls that support the continued functioning of that automated control to address the risks arising from the use of IT, and to provide a basis for the auditor's expectation that the automated control operated effectively throughout the period. When the auditor expects related general IT controls to be ineffective, this determination may affect the auditor's assessment of control risk at the assertion level, and the auditor's further audit procedures may need to include substantive procedures to address the applicable risks arising from the use of IT. Further guidance about the procedures that the auditor may perform in these circumstances is provided in section 330.[72]

.A260 Regardless of whether the auditor plans to test the operating effectiveness of controls for the purpose of assessing control risk, the auditor's understanding of the entity and its environment, the financial reporting framework, and the entity's system of internal control informs the auditor's design of further audit procedures. Examples follow:

- The auditor's understanding of the entity's system of internal control may indicate that controls are not designed or implemented appropriately, or the entity's control environment does not support the effective operation of control. In this case, there is no point in testing the operating effectiveness of controls; the further audit procedures will consist solely of substantive procedures. If the auditor determines, pursuant to paragraph .37, that substantive procedures alone cannot provide sufficient appropriate audit evidence, the auditor may need to consider the effect on the auditor's report, as described in section 330.[73]
- The auditor's understanding of the entity's information system and communication will inform the auditor about the nature of documentation available for testing. For example, if the entity's records are all electronic, the auditor may design audit procedures differently than if the entity's records are in paper format.

[72]Paragraphs .A32–.A33 of section 330.

[73]Paragraph .29 of section 330.

Evaluating the Audit Evidence Obtained From the Risk Assessment Procedures (Ref: par. .39)

Why the Auditor Evaluates the Audit Evidence From the Risk Assessment Procedures

.A261 Audit evidence obtained from performing risk assessment procedures provides the basis for the identification and assessment of the risks of material misstatement. This provides the basis for the auditor's design of the nature, timing, and extent of further audit procedures responsive to the assessed risks of material misstatement at the relevant assertion level in accordance with section 330. Accordingly, the audit evidence obtained from the risk assessment procedures provides a basis for the identification and assessment of risks of material misstatement whether due to fraud or error at the financial statement and assertion levels.

The Evaluation of the Audit Evidence

.A262 Audit evidence from risk assessment procedures comprises both information that supports and corroborates management's assertions, and any information that contradicts such assertions.[74]

Professional Skepticism

.A263 In evaluating the audit evidence from the risk assessment procedures, the auditor considers whether sufficient understanding about the entity and its environment, the applicable financial reporting framework, and the entity's system of internal control has been obtained to be able to identify the risks of material misstatement as well as whether there is any evidence that is contradictory that may indicate a risk of material misstatement.

Classes of Transactions, Account Balances, and Disclosures That Are Not Significant but Are Material (Ref: par. .40)

.A264 As explained in section 320,[75] materiality and audit risk are considered when identifying and assessing the risks of material misstatement in classes of transactions, account balances, and disclosures. The auditor's determination of materiality is a matter of professional judgment and is affected by the auditor's perception of the financial information needs of users of the financial statements.[76] For purposes of this section, classes of transactions, account balances, or disclosures are material if there is a substantial likelihood that omitting, misstating, or obscuring information about them would influence the judgment made by a reasonable user based on the financial statements.

.A265 There may be classes of transactions, account balances, or disclosures that are material but have not been determined to be significant classes of transactions, account

[74] Paragraph .A1 of section 500.

[75] Paragraph .A2 of section 320.

[76] Paragraph .04 of section 320.

balances, or disclosures (that is, there are no relevant assertions identified). For example, the entity may have a disclosure about executive compensation for which the auditor has not identified a risk of material misstatement. However, the auditor may determine that this disclosure is material based on the considerations in paragraph .A264.

Revision of Risk Assessment (Ref: par. .41)

.A266 During the audit, new or other information may come to the auditor's attention that differs significantly from the information on which the risk assessment was based. For example, the entity's risk assessment may be based on an expectation that certain controls are operating effectively. In performing tests of those controls, the auditor may obtain audit evidence that they were not operating effectively at relevant times during the audit. Similarly, in performing substantive procedures, the auditor may detect misstatements in amounts or frequency greater than is consistent with the auditor's risk assessments. In such circumstances, the risk assessment may not appropriately reflect the true circumstances of the entity, and the further planned audit procedures may not be effective in detecting material misstatements. Section 330[77] provides further guidance about evaluating the operating effectiveness of controls.

Documentation (Ref: par. .42)

.A267 For recurring audits, certain documentation may be carried forward, updated as necessary to reflect changes in the entity's business or processes.

.A268 Section 230, *Audit Documentation*, notes that among other considerations, although there may be no single way in which the auditor's professional skepticism is documented, the audit documentation may, nevertheless, provide evidence of such professional skepticism.[78] For example, when the audit evidence obtained from risk assessment procedures includes evidence that both corroborates and contradicts management's assertions, the documentation may include how the auditor evaluated that evidence, including the professional judgments made in evaluating whether the audit evidence provides an appropriate basis for the auditor's identification and assessment of the risks of material misstatement. Examples of other requirements in this section for which documentation may provide evidence of the auditor's professional skepticism include the following:

- Paragraph .13, which requires the auditor to design and perform risk assessment procedures in a manner that is not biased toward obtaining audit evidence that may corroborate the existence of risks or toward excluding audit evidence that may contradict the existence of risks
- Paragraph .17, which requires a discussion among key engagement team members of the application of the applicable financial reporting framework and the susceptibility of the entity's financial statements to material misstatement

[77]Paragraphs .16–.17 of section 330.

[78]Paragraph .A9 of section 230.

- Paragraphs .19*b* and .20, which require the auditor to obtain an understanding of the reasons for any changes to the entity's accounting policies and to evaluate whether the entity's accounting policies are appropriate and consistent with the applicable financial reporting framework
- Paragraphs .21*b*, .22*b*, .23*b*, .24*c*, .25*c*, and .31, which require the auditor to evaluate, based on the required understanding obtained, whether the components of the entity's system of internal control are appropriate to the entity's circumstances considering the nature and complexity of the entity, and to determine whether one or more control deficiencies have been identified
- Paragraph .39, which requires the auditor to take into account all audit evidence obtained from the risk assessment procedures, whether corroborative or contradictory to assertions made by management, and to evaluate whether the audit evidence obtained from the risk assessment procedures provides an appropriate basis for the identification and assessment of the risks of material misstatement
- Paragraph .40, which requires the auditor to evaluate, when applicable, whether the auditor's determination that there are no risks of material misstatement for a material class of transactions, account balance, or disclosure remains appropriate

Scalability (Ref: par. .42)

.A269 The form and extent of the auditor's documentation is influenced by the nature, size, and complexity of the entity and its system of internal control, availability of information from the entity, and the audit methodology and technology used in the course of the audit. It is not necessary to document the entirety of the auditor's understanding of the entity and matters related to it. Key elements of understanding documented by the auditor may include those on which the auditor based the assessment of the risks of material misstatement. However, the auditor is not required to document every inherent risk factor that was taken into account in identifying and assessing the risks of material misstatement at the assertion level.

.A270 The manner in which the requirements of paragraph .42 are documented is for the auditor to determine exercising professional judgment.

.A271 The form, content, and extent of audit documentation that is sufficient to enable an experienced auditor having no previous experience with the audit to understand the nature, timing, and extent of the risk assessment procedures performed and the results of those procedures, including the conclusions reached and the rationale for the significant professional judgments made, depend on various factors. These factors include the need to document a conclusion or the basis for a conclusion otherwise not readily determinable from the documentation of the work performed or audit evidence obtained.[79] An example of such a circumstance may be the rationale for significant judgments related to the inherent risk of an identified risk of material misstatement, when such rationale is not otherwise evident from the audit documentation.

---

[79]Paragraph .A4 of section 230.

.A272 For the audits of less complex entities, the form and extent of documentation may be simple and relatively brief. Such audit documentation may be incorporated in the auditor's documentation of the overall strategy and audit plan.[80] Similarly, for example, the results of the risk assessment may be documented separately or as part of the auditor's documentation of further audit procedures.[81]

.A273 Section 200 states that GAAS typically refer to the risks of material misstatement, rather than inherent risk and control risk separately.[82] However, this section requires inherent risk to be assessed separately from control risk to provide a basis for designing and performing audit procedures to respond to the assessed risks of material misstatement at the relevant assertion level in accordance with section 330. Accordingly, the auditor may, but is not required to, document a combined assessment of inherent risk and control risk (see paragraphs .A244 and .A257).

Appendix A — Considerations for Understanding the Entity and Its Business Model (Ref: par. .A69–.A77)

.A274

This appendix explains the objectives and scope of the entity's business model and provides examples of matters that the auditor may consider in understanding the activities of the entity that may be included in the business model. The auditor's understanding of the entity's business model, and how it is affected by its business strategy and business objectives, may assist the auditor in identifying business risks that may have an effect on the financial statements. In addition, this may assist the auditor in identifying risks of material misstatement.

Objectives and Scope of an Entity's Business Model

1. An entity's business model describes how an entity considers, for example, its organizational structure, operations or scope of activities, business lines (including competitors and customers thereof), processes, growth opportunities, globalization, regulatory requirements, and technologies. The entity's business model describes how the entity creates, preserves, and captures financial or broader value for its stakeholders.

2. *Strategies* are the approaches by which management plans to achieve the entity's objectives, including how the entity plans to address the risks and opportunities that it faces. An entity's strategies are changed over time by management to respond to changes in its objectives and in the internal and external circumstances in which it operates.

3. A description of a business model typically includes the following:

- The scope of the entity's activities and why it does them
- The entity's structure and scale of its operations
- The markets or geographical or demographic spheres, and parts of the value chain, in which it operates, how it engages with those markets or spheres (main products, customer segments, and distribution methods), and the basis on which it competes
- The entity's business or operating processes (for example, investment, financing, and operating processes) employed in performing its activities, focusing on those parts of the business processes that are important in creating, preserving, or capturing value
- The resources (for example, financial, human, intellectual, environmental, and technological) and other inputs and relationships (for example, customers, competitors, suppliers, and employees) that are necessary or important to its success
- How the entity's business model integrates the use of IT in its interactions with customers, suppliers, lenders, and other stakeholders through IT interfaces and other technologies

4. A business risk may have an immediate consequence for the risk of material misstatement for classes of transactions, account balances, and disclosures at the assertion level or the financial statement level. For example, the business risk arising from a significant fall in real estate market values may increase the risk of material misstatement associated with the valuation assertion for a lender of medium-term real estate–backed loans. However, the same risk, particularly in combination with a severe economic downturn that concurrently increases the underlying risk of lifetime credit losses on its loans, may also have a longer-term consequence. The resulting net exposure to credit losses may cast substantial doubt on the entity's ability to continue as a going concern. If so, this could have implications for management's, and the auditor's, conclusion regarding the appropriateness of the entity's use of the going concern basis of accounting and determination about whether substantial doubt exists; therefore, whether a business risk may result in a risk of material misstatement is considered in light of the entity's circumstances. Examples of events and conditions that may give rise to the existence of risks of material misstatement are indicated in appendix B, "Understanding Inherent Risk Factors."

Activities of the Entity

5. The following are some examples of matters that the auditor may consider when obtaining an understanding of the activities of the entity (included in the entity's business model):

a. Business operations:
   i. Nature of revenue sources, products or services, and markets, including involvement in electronic commerce such as internet sales and marketing activities
   ii. Conduct of operations (for example, stages and methods of production or activities exposed to environmental risks)
   iii. Alliances, joint ventures, and outsourcing activities
   iv. Geographic dispersion and industry segmentation
   v. Location of production facilities, warehouses, and offices, and location and quantities of inventories
   vi. Key customers and important suppliers of goods and services, employment arrangements (including the existence of union contracts, pension and other post-employment benefits, stock options or incentive bonus arrangements, and government regulation related to employment matters)
   vii. Research and development activities and expenditures
   viii. Transactions with related parties

b. Investments and investment activities:
   i. Planned or recently executed acquisitions or divestitures
   ii. Investments and dispositions of securities and loans
   iii. Capital investment activities

iv. Investments in nonconsolidated entities, including noncontrolled partnerships, joint ventures, and noncontrolled variable interest entities

c. Financing and financing activities:

i. Ownership structure of major subsidiaries and associated entities, including consolidated and nonconsolidated structures

ii. Debt structure and related terms, including off-balance-sheet financing arrangements and leasing arrangements

iii. Beneficial owners (local, foreign, business reputation, and experience) and related parties

iv. Use of derivative financial instruments

Nature of Variable Interest Entities

6. A *variable interest entity* is an entity that is generally established for a narrow and well-defined purpose, such as to effect a lease or a securitization of financial assets or to carry out research and development activities. It may take the form of a corporation, trust, partnership, or unincorporated entity. The entity on behalf of which the variable interest entity has been created may often transfer assets to the latter (for example, as part of a derecognition transaction involving financial assets), obtain the right to use the latter's assets, or perform services for the latter, whereas other parties may provide the funding to the latter. In some circumstances, a variable interest entity may be a related party of the entity.

7. Financial reporting frameworks often specify detailed conditions that are deemed to amount to control or circumstances under which the variable interest entity should be considered for consolidation. The interpretation of the requirements of such frameworks often demands a detailed knowledge of the relevant agreements involving the variable interest entity.

Appendix B — Understanding Inherent Risk Factors (Ref: par. .12, .19, .A9–.A11, .A34, .A69, .A94–.A99, and .A230)

.A275

This appendix provides further explanation about inherent risk factors as well as matters that the auditor may consider in understanding and applying the inherent risk factors in identifying and assessing the risks of material misstatement at the assertion level.

The Inherent Risk Factors

1. *Inherent risk factors* are characteristics of events or conditions that affect susceptibility of an assertion about a class of transactions, account balance, or disclosure, to misstatement, whether due to fraud or error, and before consideration of controls. Such factors may be qualitative or quantitative and include complexity, subjectivity, change, uncertainty, or susceptibility to misstatement due to management bias or other fraud risk factors[1] insofar as they affect inherent risk. In obtaining the understanding of the entity and its environment, and the applicable financial reporting framework and entity's accounting policies, in accordance with paragraph .19*a*–*b*, the auditor also understands how inherent risk factors affect susceptibility of assertions to misstatement in the preparation of the financial statements.

2. Inherent risk factors relating to the preparation of information required by the applicable financial reporting framework (referred to in this paragraph as *required information*) include the following:

- *Complexity*. Arises either from the nature of the information or in the way that the required information is prepared, including when such preparation processes are more inherently difficult to apply. For example, complexity may arise in one of the following circumstances:
  - — In calculating supplier rebate provisions because it may be necessary to take into account different commercial terms with many different suppliers or many interrelated commercial terms that are all relevant in calculating the rebates due.
  - — When there are many potential data sources with different characteristics used in making an accounting estimate, the processing of that data involves many interrelated steps and, therefore, the data is inherently more difficult to identify, capture, access, understand, or process.
- *Subjectivity*. Arises from inherent limitations in the ability to prepare required information in an objective manner, due to limitations in the availability of knowledge or information, such that management may need to make an election or subjective judgment about the appropriate approach to take and about the resulting information to include in the financial statements. Because of different approaches to preparing the required information, different outcomes could result from appropriately applying

[1]Paragraphs .A28–.A32 of section 240, *Consideration of Fraud in a Financial Statement Audit*.

the requirements of the applicable financial reporting framework. As limitations in knowledge or data increase, the subjectivity in the judgments that could be made by reasonably knowledgeable and independent individuals and the diversity in possible outcomes of those judgments will also increase.

- *Change*. Results from events or conditions that, over time, affect the entity's business or the economic, accounting, regulatory, industry, or other aspects of the environment in which it operates, when the effects of those events or conditions are reflected in the required information. Such events or conditions may occur during, or between, financial reporting periods. For example, change may result from developments in the requirements of the applicable financial reporting framework, in the entity and its business model, or in the environment in which the entity operates. Such change may affect management's assumptions and judgments, including as they relate to management's selection of accounting policies or how accounting estimates are made or related disclosures are determined.

- *Uncertainty*. Arises when the required information cannot be prepared based only on sufficiently precise and comprehensive data that is verifiable through direct observation. In these circumstances, an approach may need to be taken that applies the available knowledge to prepare the information using sufficiently precise and comprehensive observable data, to the extent available, and reasonable assumptions supported by the most appropriate available data, when it is not. Constraints on the availability of knowledge or data, which are not within the control of management (subject to cost constraints where applicable) are sources of uncertainty, and their effect on the preparation of the required information cannot be eliminated. For example, estimation uncertainty arises when the required monetary amount cannot be determined with precision, and the outcome of the estimate is not known before the date the financial statements are finalized.

- *Susceptibility to misstatement due to management bias or other fraud risk factors insofar as they affect inherent risk*. Susceptibility to management bias results from conditions that create susceptibility to intentional or unintentional failure by management to maintain neutrality in preparing the information. Management bias is often associated with certain conditions that have the potential to give rise to management not maintaining neutrality in exercising judgment (indicators of potential management bias), which could lead to a material misstatement of the information that would be fraudulent if intentional. Such indicators include incentives or pressures insofar as they affect inherent risk (for example, as a result of motivation to achieve a desired result, such as a desired profit target or capital ratio) and opportunity, not to maintain neutrality. Factors relevant to the susceptibility to misstatement due to fraud in the form of fraudulent financial reporting or misappropriation of assets are described in section 240, *Consideration of Fraud in a Financial Statement Audit*.[2]

3. When complexity is an inherent risk factor, there may be an inherent need for more complex processes in preparing the information, and such processes may be inherently more

[2]Paragraphs .A1–.A5 of section 240.

difficult to apply. As a result, applying them may require specialized skills or knowledge and may require the use of a management's specialists.

4. When management judgment is more subjective, the susceptibility to misstatement due to management bias, whether unintentional or intentional, may also increase. For example, significant management judgment may be involved in making accounting estimates that have been identified as having high estimation uncertainty, and conclusions regarding methods, data, and assumptions may reflect unintentional or intentional management bias.

Examples of Events or Conditions That May Give Rise to the Existence of Risks of Material Misstatement

5. The following are examples of events (including transactions) and conditions that may indicate the existence of risks of material misstatement in the financial statements at the financial statement level or the assertion level. The examples, grouped by inherent risk factor, cover a broad range of events and conditions; however, not all events and conditions are relevant to every audit engagement, and the list of examples is not necessarily complete. The events and conditions have been categorized by the inherent risk factor that may have the greatest effect in the circumstances. Importantly, due to the interrelationships among inherent risk factors, the example events and conditions also are likely to be subject to, or affected by, other inherent risk factors to varying degrees.

Relevant inherent risk factor	Examples of events and conditions that may indicate the existence of risks of material misstatement at the assertion level
Complexity	Regulatory: • Operations that are subject to a high degree of complex regulation Business model: • The existence of complex alliances and joint ventures Applicable financial reporting framework: • Accounting measurements that involve complex processes Transactions: • Use of off-balance-sheet financing, variable interest entities, and other complex financing arrangements
Subjectivity	Applicable financial reporting framework: • A wide range of possible measurement criteria of an accounting estimate, for example, management's recognition of depreciation or construction income and expenses • Management's selection of a valuation technique or model for a noncurrent asset, such as investment properties
Change	Economic conditions: • Operations in regions that are economically unstable, for example, countries with significant currency devaluation or highly inflationary economies Markets: • Operations exposed to volatile markets, for example, futures trading Customer loss: • Going concern and liquidity issues, including loss of significant customers Industry model: • Changes in the industry in which the entity operates Business model: • Changes in the supply chain • Developing or offering new products or services, or moving into new lines of business Geography:

Relevant inherent risk factor	Examples of events and conditions that may indicate the existence of risks of material misstatement at the assertion level
	• Expanding into new locations Entity structure: • Changes in the entity, such as large acquisitions or reorganizations or other unusual events • Entities or business segments likely to be sold Human resources competence: • Changes in key personnel, including departure of key executives IT: • Changes in the IT environment • Installation of significant new IT systems related to financial reporting Applicable financial reporting framework: • Application of new accounting pronouncements Capital: • New constraints on the availability of capital and credit Regulatory: • Investigations into the entity's operations or financial results by regulatory or government bodies • Impact of new legislation related to environmental protection
Uncertainty	Reporting: • Events or transactions that involve significant measurement uncertainty, including accounting estimates, and related disclosures • Pending litigation and contingent liabilities, for example, sales warranties, financial guarantees, and environmental remediation
Susceptibility to misstatement due to management bias or other fraud risk factors insofar as they affect inherent risk	Reporting: • Incentives and pressures, or opportunities, for management and employees to engage in fraudulent financial reporting, including omission or obscuring, of significant information in disclosures. See appendix A, "Examples of Fraud Risk Factors," of section 240 for additional guidance regarding fraud risk factors Transactions: • Significant transactions with related parties

Relevant inherent risk factor	Examples of events and conditions that may indicate the existence of risks of material misstatement at the assertion level
	• Significant amount of nonroutine or nonsystematic transactions, including intercompany transactions and large revenue transactions at period end • Transactions that are recorded based on management's intent, for example, debt refinancing, assets to be sold, and classification of marketable securities

Other events or conditions that may indicate risks of material misstatement at the financial statement level:

- Lack of personnel with appropriate accounting and financial reporting skills
- Control deficiencies, particularly in the control environment, the entity's risk assessment process, and the entity's process for monitoring the system of internal control, and especially those not addressed by management
- Past misstatements, history of errors, or a significant amount of adjustments at period end

Appendix C — Understanding the Entity's System of Internal Control (Ref: par. .12, .21–.31, .A100–.A212)

.A276

1. The entity's system of internal control may be reflected in policy and procedures manuals, systems and forms, and the information embedded therein, and is effected by people. The entity's system of internal control is implemented by management, those charged with governance, and other personnel based on the structure of the entity. The entity's system of internal control can be applied based on the decisions of management, those charged with governance, or other personnel and in the context of legal or regulatory requirements to the operating model of the entity, the legal entity structure, or a combination of these.

2. This appendix further explains the components of, as well as the limitations of, the entity's system of internal control as set out in paragraphs .12, .21–.31, and .A100–.A209 as they relate to a financial statement audit.

3. Included within the entity's system of internal control are aspects that relate to the entity's reporting objectives, including its financial reporting objectives, but it may also include aspects that relate to its operations or compliance objectives, when such aspects are relevant to financial reporting. For example, controls over compliance with laws and regulations may be relevant to financial reporting when such controls are relevant to the entity's preparation of disclosures of contingencies in the financial statements.

Components of the Entity's System of Internal Control

Control Environment

4. The control environment includes the governance and management functions and the attitudes, awareness, and actions of those charged with governance and management concerning the entity's system of internal control and its importance in the entity. The control environment sets the tone of an organization, influencing the control consciousness of its people, and provides the overall foundation for the operation of the other components of the entity's system of internal control.

5. An entity's control consciousness is influenced by those charged with governance because one of their roles is to counterbalance pressures on management in relation to financial reporting that may arise from market demands or remuneration schemes. Therefore, the effectiveness of the design of the control environment in relation to participation by those charged with governance is influenced by such matters as the following:

- Their independence from management and their ability to evaluate the actions of management
- Whether they understand the entity's business transactions

- The extent to which they evaluate whether the financial statements are prepared in accordance with the applicable financial reporting framework, including whether the financial statements include adequate disclosures

6. The control environment encompasses the following elements:

a. *How management's oversight responsibilities are carried out, such as creating and maintaining the entity's culture and demonstrating management's commitment to integrity and ethical values.* The effectiveness of controls cannot rise above the integrity and ethical values of the people who create, administer, and monitor them. Integrity and ethical behavior are the products of the entity's ethical and behavioral standards or codes of conduct, as well as how they are communicated (for example, through policy statements), and how they are reinforced in practice (for example, through management actions to eliminate or mitigate incentives or temptations that might prompt personnel to engage in dishonest, illegal, or unethical acts). The communication of entity policies on integrity and ethical values may include the communication of behavioral standards to personnel through policy statements and codes of conduct and by example.

b. *When those charged with governance are separate from management, how those charged with governance demonstrate independence from management and exercise oversight of the entity's system of internal control.* An entity's control consciousness is influenced by those charged with governance. Considerations may include whether there are sufficient individuals who are independent from management and objective in their evaluations and decision making; how those charged with governance identify and accept oversight responsibilities and whether those charged with governance retain oversight responsibility for management's design, implementation, and conduct of the entity's system of internal control. The importance of the responsibilities of those charged with governance is recognized in codes of practice and other laws and regulations or guidance produced for the benefit of those charged with governance. Other responsibilities of those charged with governance include oversight of the design and effective operation of whistle-blower procedures.

c. *How the entity assigns authority and responsibility in pursuit of its objectives.* This may include the following considerations:

   - Key areas of authority and responsibility and appropriate lines of reporting
   - Policies relating to appropriate business practices, knowledge and experience of key personnel, and resources provided for carrying out duties
   - Policies and communications directed at ensuring that all personnel understand the entity's objectives, know how their individual actions interrelate and contribute to those objectives, and recognize how and for what they will be held accountable

d. *How the entity attracts, develops, and retains competent individuals in alignment with its objectives.* This includes how the entity ensures the individuals have the knowledge and skills necessary to accomplish the tasks that define the individual's job, such as the following:

- Standards for recruiting the most qualified individuals, with an emphasis on educational background, prior work experience, past accomplishments, and evidence of integrity and ethical behavior
- Training policies that communicate prospective roles and responsibilities, including practices such as training schools and seminars that illustrate expected levels of performance and behavior
- Periodic performance appraisals driving promotions that demonstrate the entity's commitment to the advancement of qualified personnel to higher levels of responsibility

e. *How the entity holds individuals accountable for their responsibilities in pursuit of the objectives of the entity's system of internal control.* This may be accomplished through some of the following examples:

- Mechanisms to communicate and hold individuals accountable for performance of controls responsibilities and implement corrective actions as necessary
- Establishing performance measures, incentives, and rewards for those responsible for the entity's system of internal control, including how the measures are evaluated and maintain their relevance
- How pressures associated with the achievement of control objectives affect the individual's responsibilities and performance measures
- How the individuals are disciplined as necessary

The appropriateness of the preceding matters will be different for every entity depending on its size, the complexity of its structure, and the nature of its activities.

The Entity's Risk Assessment Process

7. The entity's risk assessment process is an iterative process for identifying and analyzing risks to achieving the entity's objectives and forms the basis for how management or those charged with governance determine the risks to be managed.

8. For financial reporting purposes, the entity's risk assessment process includes how management identifies business risks relevant to the preparation of financial statements in accordance with the entity's applicable financial reporting framework, estimates their significance, assesses the likelihood of their occurrence, and decides upon actions to manage them and the results thereof. For example, the entity's risk assessment process may address how the entity considers the possibility of unrecorded transactions or identifies and analyzes significant estimates recorded in the financial statements or considers risks of fraud.

9. Risks relevant to reliable financial reporting include external and internal events, transactions, or circumstances that may occur and adversely affect an entity's ability to initiate, record, process, and report financial information consistent with the assertions of management in the financial statements. Management may initiate plans, programs, or actions to address specific risks, or it may decide to assume a risk because of cost or other considerations. Risks can arise or change due to circumstances such as the following:

- *Changes in operating environment.* Changes in the regulatory, economic, or operating environment can result in changes in competitive pressures and significantly different risks.
- *New personnel.* New personnel may have a different focus on or understanding of the entity's system of internal control.
- *New or revamped information system.* Significant and rapid changes in the information system can change the risk relating to the entity's system of internal control.
- *Rapid growth.* Significant and rapid expansion of operations can strain controls and increase the risk of a breakdown in controls.
- *New technology*. Incorporating new technologies into production processes or the information system may change the risk associated with the entity's system of internal control.
- *New business models, products, or activities.* Entering into business areas or transactions with which an entity has little experience may introduce new risks associated with the entity's system of internal control.
- *Corporate restructurings.* Restructurings may be accompanied by staff reductions and changes in supervision and segregation of duties that may change the risk associated with the entity's system of internal control.
- *Expanded foreign operations.* The expansion or acquisition of foreign operations carries new and often unique risks that may affect internal control, for example, additional or changed risks from foreign currency transactions.
- *New accounting pronouncements.* Adoption of new accounting principles or changing accounting principles may affect risks in preparing financial statements.
- *Use of IT.* Risks relating to
    - — maintaining the integrity of data and information processing;
    - — risks to the entity's business strategy that arise if the entity's IT strategy does not effectively support the entity's business strategy; or
    - — changes or interruptions in the entity's IT environment, such as those related to turnover of IT personnel, when the entity does not make necessary updates to the IT environment, or such updates are not timely.
- *Environmental, social, and governance (ESG) issues.* ESG issues, such as climate change, may affect businesses in various industries. For example, climate events or conditions may affect an entity in terms of the following:
    - — Climate events or conditions may influence the entity's business model, including the entity's supply chain, resulting in different risks.

- — New technological developments to address climate change may have a significant impact on the industry, which may create new or unique risks related to the entity's operations or processes.
- — Governments may change climate-related laws and regulations that could affect risks related to taxation or the entity's business model through increased environmental requirements.
- — Climate events or conditions may affect risks related to general economic conditions, interest rates and availability of financing, commodity prices and inflation, or currency revaluation.

The Entity's Process to Monitor the System of Internal Control

10. The entity's process to monitor the system of internal control is a continual process to evaluate the effectiveness of the entity's system of internal control and to take necessary remedial actions on a timely basis. The entity's process to monitor the entity's system of internal control may consist of ongoing activities, separate evaluations (conducted periodically), or some combination of the two. Ongoing monitoring activities are often built into the normal recurring activities of an entity and may include regular management and supervisory activities. The entity's process will likely vary in scope and frequency depending on the assessment of the risks by the entity.

11. The objectives and scope of internal audit functions typically include activities designed to evaluate or monitor the effectiveness of the entity's system of internal control.[1] The entity's process to monitor the entity's system of internal control may include activities such as management's review of whether bank reconciliations are being prepared on a timely basis, internal auditors' evaluation of sales personnel's compliance with the entity's policies on terms of sales contracts, and a legal department's oversight of compliance with the entity's ethical or business practice policies. Monitoring is done also to ensure that controls continue to operate effectively over time. For example, if the timeliness and accuracy of bank reconciliations are not monitored, personnel are likely to stop preparing them.

12. Controls related to the entity's process to monitor the entity's system of internal control, including those that monitor underlying automated controls, may be automated or manual, or a combination of both. For example, an entity may use automated monitoring controls over access to certain technology with automated reports of unusual activity to management, who manually investigate identified anomalies.

13. When distinguishing between a monitoring activity and a control related to the information system, the underlying details of the activity are considered, especially when the activity involves some level of supervisory review. Supervisory reviews are not automatically classified as monitoring activities, and it may be a matter of judgment whether a review is classified as a control related to the information system or a monitoring activity. For example, the intent of a monthly completeness control would be to detect and

---

[1]Section 610, *Using the Work of Internal Auditors*, and appendix D, "Considerations for Understanding an Entity's Internal Audit Function," of this section provide further guidance related to internal audit.

correct errors, whereas a monitoring activity would determine why errors are occurring and assign management the responsibility of fixing the process to prevent future errors. In simple terms, a control related to the information system responds to a specific risk, whereas a monitoring activity assesses whether controls within each of the five components of the entity's system of internal control are operating as intended.

14. Monitoring activities may include using information from communications from external parties that may indicate problems or highlight areas in need of improvement. Customers implicitly corroborate billing data by paying their invoices or complaining about their charges. In addition, regulators may communicate with the entity concerning matters that affect the functioning of the entity's system of internal control, for example, communications concerning examinations by bank regulatory agencies. Also, management may consider in performing monitoring activities any communications relating to the entity's system of internal control from external auditors.

The Information System and Communication

15. Business processes result in the transactions that are recorded, processed, and reported by the information system. An entity's business processes include the activities designed to

- develop, purchase, produce, sell, and distribute an entity's products and services;
- ensure compliance with laws and regulations; and
- record information, including accounting and financial reporting information.

16. The information system, and related business processes, includes the financial reporting process used to prepare the entity's financial statements, including disclosures.

17. The information system relevant to the preparation of the financial statements consists of activities and policies, and accounting and supporting records, designed and established to do the following:

- Initiate, record, and process entity transactions (as well as to capture, process, and disclose information about events and conditions other than transactions, such as changes in fair values or indicators of impairment) and to maintain accountability for the related assets, liabilities, and equity
- Resolve incorrect processing of transactions, for example, automated suspense files and procedures followed to clear suspense items out on a timely basis
- Process and account for system overrides or bypasses to controls
- Incorporate information from transaction processing in the general ledger (for example, transferring of accumulated transactions from various data tables)
- Capture and process information relevant to the preparation of the financial statements for events and conditions other than transactions, such as the depreciation and amortization of assets and changes in the recoverability of assets

- Ensure information required to be disclosed by the applicable financial reporting framework is accumulated, recorded, processed, summarized, and appropriately reported in the financial statements

18. The quality of information affects management's ability to make appropriate decisions in managing and controlling the entity's activities and to prepare reliable financial reports.

19. Communication, which involves providing an understanding of individual roles and responsibilities pertaining to the entity's system of internal control, may take such forms as policy manuals, accounting and financial reporting manuals, and memoranda. Communication also can be made electronically, orally, and through the actions of management.

20. Communication by the entity of the financial reporting roles and responsibilities and of significant matters relating to financial reporting involves providing an understanding of individual roles and responsibilities pertaining to the entity's system of internal control relevant to financial reporting. It may include such matters as the extent to which personnel understand how their activities in the information system relate to the work of others and the means of reporting exceptions to an appropriate higher level within the entity.

Control Activities

21. Controls in the control activities component are identified in accordance with paragraphs .26–.27 and .29*b*. Such controls include information-processing controls and general IT controls, both of which may be manual or automated in nature. The greater the extent of automated controls, or controls involving automated aspects, that management uses and relies on in relation to its financial reporting, the more important it may become for the entity to implement general IT controls that address the continued functioning of the automated aspects of information-processing controls. Controls in the control activities component may pertain, for example, to the following:

- *Authorization and approvals.* An authorization affirms that a transaction is valid (that is, it represents an actual economic event or is within an entity's policy). An authorization typically takes the form of an approval by a higher level of management or of verification and a determination if the transaction is valid. For example, a supervisor approves an expense report after reviewing whether the expenses seem reasonable and within policy. An example of an automated approval is when an invoice unit cost is automatically compared with the related purchase order unit cost within a pre-established tolerance level. Invoices within the tolerance level are automatically approved for payment. Those invoices outside the tolerance level are flagged for additional investigation.
- *Reconciliations.* Reconciliations compare two or more data elements. If differences are identified, action is taken to bring the data into agreement. Reconciliations generally address the completeness or accuracy of processing transactions.
- *Verifications*. Verifications compare two or more items with each other or compare an item with a policy and will likely involve a follow-up action when the two items do

not match or the item is not consistent with policy. Verifications generally address the completeness, accuracy, or validity of processing transactions.

- *Physical or logical controls, including those that address security of assets against unauthorized access, acquisition, use, or disposal*. Controls that encompass the following:
  - — The physical security of assets, including adequate safeguards such as secured facilities over access to assets and records
  - — The authorization for access to computer programs and data files (that is, logical access)
  - — The periodic counting and comparison with amounts shown on control records (for example, comparing the results of cash, security, and inventory counts with accounting records)
- The extent to which physical controls intended to prevent theft of assets are relevant to the reliability of financial statement preparation depends on circumstances such as when assets are highly susceptible to misappropriation.
  - *Segregation of duties*. Assigning different people the responsibilities of authorizing transactions, recording transactions, and maintaining custody of assets. Segregation of duties is intended to reduce the opportunities to allow any person to be in a position to both perpetrate and conceal errors or fraud in the normal course of the person's duties.

    For example, a manager authorizing credit sales is not responsible for maintaining accounts receivable records or handling cash receipts. If one person is able to perform all these activities he or she could, for example, create a fictitious sale that could go undetected. Similarly, salespersons should not have the ability to modify product price files or commission rates.

    Sometimes, segregation is not practical, cost effective, or feasible. For example, smaller and less complex entities may lack sufficient resources to achieve ideal segregation, and the cost of hiring additional staff may be prohibitive. In these situations, management may institute alternative controls. In the preceding example, if the salesperson can modify product price files, a detective control activity can be put in place to have personnel unrelated to the sales function periodically review whether and under what circumstances the salesperson changed prices.

22. Certain controls may depend on the existence of appropriate supervisory controls established by management or those charged with governance. For example, authorization controls may be delegated under established guidelines, such as investment criteria set by those charged with governance; alternatively, nonroutine transactions such as major acquisitions or divestments may require specific high-level approval, including, in some cases, that of shareholders.

Limitations of Internal Control

23. The entity's system of internal control, no matter how effective, can provide an entity with only reasonable assurance about achieving the entity's financial reporting objectives. The likelihood of their achievement is affected by the inherent limitations of internal control. These include the realities that human judgment in decision making can be faulty, and that breakdown in the entity's system of internal control can occur because of human error. For example, there may be an error in the design of, or in the change to, a control. Equally, the operation of a control may not be effective, such as when information produced for the purposes of the entity's system of internal control (for example, an exception report) is not effectively used because the individual responsible for reviewing the information does not understand its purpose or fails to take appropriate action.

24. Additionally, controls can be circumvented by the collusion of two or more people or inappropriate management override of controls. For example, management may enter into side agreements with customers that alter the terms and conditions of the entity's standard sales contracts, which may result in improper revenue recognition. Also, edit checks in an IT application that are designed to identify and report transactions that exceed specified credit limits may be overridden or disabled.

25. Further, in designing and implementing controls, management may make judgments on the nature and extent of the controls it chooses to implement, and the nature and extent of the risks it chooses to assume.

Appendix D — Considerations for Understanding an Entity's Internal Audit Function (Ref: par. .A31–.A32 and .A134)

.A277

This appendix provides further considerations relating to understanding the entity's internal audit function when such a function exists.

Objectives and Scope of the Internal Audit Function

1. The objectives and scope of an internal audit function, the nature of its responsibilities, and its status within the organization, including the function's authority and accountability, vary widely and depend on the size, complexity, and structure of the entity and the requirements of management and, when applicable, those charged with governance. These matters may be set out in an internal audit charter or terms of reference.

2. The responsibilities of an internal audit function may include performing procedures and evaluating the results to provide assurance to management and those charged with governance regarding the design and effectiveness of risk management, the entity's system of internal control, and governance processes. If so, the internal audit function may play an important role in the entity's process to monitor the entity's system of internal control. However, the responsibilities of the internal audit function may be focused on evaluating the economy, efficiency, and effectiveness of operations and, if so, the work of the function may not directly relate to the entity's financial reporting.

Inquiries of the Internal Audit Function

3. If an entity has an internal audit function, inquiries of the appropriate individuals within the function may provide information that is useful to the auditor in obtaining an understanding of the entity and its environment, the applicable financial reporting framework and the entity's system of internal control, and in identifying and assessing risks of material misstatement at the financial statement and assertion levels. In performing its work, the internal audit function is likely to have obtained insight into the entity's operations and business risks and may have findings based on its work, such as identified control deficiencies or risks, that may provide valuable input into the auditor's understanding of the entity and its environment, the applicable financial reporting framework, the entity's system of internal control, the auditor's risk assessments, or other aspects of the audit. Therefore, the auditor's inquiries are made regardless of whether the auditor expects to use the work of the internal audit function to modify the nature or timing, or reduce the extent, of audit procedures to be performed.[1] Inquiries of particular relevance may be about matters the internal audit function has raised with those charged with governance and the outcomes of the function's own risk assessment process.

4. If, based on responses to the auditor's inquiries, it appears that there are findings that may be relevant to the entity's financial reporting and the audit of the financial statements, the auditor may consider it appropriate to read related reports of the internal audit

[1]The relevant requirements are contained in section 610, *Using the Work of Internal Auditors*.

function. Examples of reports of the internal audit function that may be relevant include the function's strategy and planning documents and reports that have been prepared for management or those charged with governance describing the findings of the internal audit function's examinations.

5. In addition, in accordance with section 240, *Consideration of Fraud in a Financial Statement Audit*,[2] if the internal audit function provides information to the auditor regarding any actual, suspected, or alleged fraud, the auditor takes this into account in the auditor's identification of risk of material misstatement due to fraud.

6. Appropriate individuals within the internal audit function with whom inquiries are made are those who, in the auditor's professional judgment, have the appropriate knowledge, experience, and authority, such as the chief internal audit executive or, depending on the circumstances, other personnel within the function. The auditor may also consider it appropriate to have periodic meetings with these individuals.

Consideration of the Internal Audit Function in Understanding the Control Environment

7. In understanding the control environment, the auditor may consider how management has responded to the findings and recommendations of the internal audit function regarding identified control deficiencies relevant to the preparation of the financial statements, including whether and how such responses have been implemented, and whether they have been subsequently evaluated by the internal audit function.

Understanding the Role That the Internal Audit Function Plays in the Entity's Process to Monitor the System of Internal Control

8. If the nature of the internal audit function's responsibilities and assurance activities are related to the entity's financial reporting, the auditor may also be able to use the work of the internal audit function to modify the nature or timing, or reduce the extent, of audit procedures to be performed directly by the auditor in obtaining audit evidence. Auditors may be more likely to be able to use the work of an entity's internal audit function when it appears, for example, based on experience in previous audits or the auditor's risk assessment procedures, that the entity has an internal audit function that is adequately and appropriately resourced relative to the complexity of the entity and the nature of its operations and has a direct reporting relationship to those charged with governance.

9. If, based on the auditor's preliminary understanding of the internal audit function, the auditor expects to use the work of the internal audit function to modify the nature or timing, or reduce the extent, of audit procedures to be performed, section 610, *Using the Work of Internal Auditors*, applies.

10. As further discussed in section 610, the activities of an internal audit function are distinct from other monitoring controls that may be relevant to financial reporting, such as reviews of management accounting information that are designed to contribute to how the entity prevents or detects misstatements.

[2] Paragraph .19 of section 240, *Consideration of Fraud in a Financial Statement Audit*.

11. Establishing communications with the appropriate individuals within an entity's internal audit function early in the engagement, and maintaining such communications throughout the engagement, can facilitate effective sharing of information. It creates an environment in which the auditor can be informed of significant matters that may come to the attention of the internal audit function when such matters may affect the work of the auditor. Section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*, discusses the importance of the auditor planning and performing the audit with professional skepticism, including being alert to information that brings into question the reliability of documents and responses to inquiries to be used as audit evidence. Accordingly, communication with the internal audit function throughout the engagement may provide opportunities for internal auditors to bring such information to the auditor's attention. The auditor is then able to take such information into account in the auditor's identification and assessment of risks of material misstatement.

Appendix E — Considerations for Understanding IT (Ref: par. .12, .25*a*, .27–.29, .A109, and .A192)

.A278

This appendix provides further matters that the auditor may consider in understanding the entity's use of IT in its system of internal control.

Understanding the Entity's Use of IT in the Components of the Entity's System of Internal Control

1. An entity's system of internal control contains manual elements and automated elements (that is, manual and automated controls and other resources used in the entity's system of internal control). An entity's mix of manual and automated elements varies with the nature and complexity of the entity's use of IT. An entity's use of IT affects the manner in which the information relevant to the preparation of the financial statements in accordance with the applicable financial reporting framework is processed, stored, and communicated and, therefore, affects the manner in which the entity's system of internal control is designed and implemented. Each component of the entity's system of internal control may use some extent of IT.

Generally, IT benefits an entity's system of internal control by enabling an entity to do the following:

- Consistently apply predefined business rules and perform complex calculations when processing large volumes of transactions or data
- Enhance the timeliness, availability, and accuracy of information
- Facilitate the additional analysis of information
- Enhance the ability to monitor the performance of the entity's activities and its policies and procedures
- Reduce the risk that controls will be circumvented
- Enhance the ability to achieve effective segregation of duties by implementing security controls in IT applications, databases, and operating systems

2. The characteristics of manual or automated elements are relevant to the auditor's identification and assessment of the risks of material misstatement and further audit procedures based thereon. Automated controls may be more reliable than manual controls because they cannot be as easily bypassed, ignored, or overridden, and they are also less prone to simple errors and mistakes. Automated controls may be more effective than manual controls in the following circumstances:

- High volume of recurring transactions, or in situations in which errors that can be anticipated or predicted can be prevented, or detected and corrected, through automation

- Controls in which the specific ways to perform the control can be adequately designed and automated

Understanding the Entity's Use of IT in the Information System (Ref: *par. .25* a *)*

3. The entity's information system may include the use of manual and automated elements, which also affect the manner in which transactions are initiated, recorded, processed, and incorporated in the general ledger and reported in the financial statements. In particular, procedures to initiate, record, process, and report transactions may be enforced through the IT applications used by the entity and how the entity has configured those applications. In addition, records in the form of digital information may replace or supplement records in the form of paper documents.

4. In obtaining an understanding of the IT environment relevant to the flows of transactions and information processing in the information system, the auditor gathers information about the nature and characteristics of the IT applications used as well as the supporting IT infrastructure and IT. This may include, for example, the complexity or level of customization related to IT applications, third-party hosting or outsourcing, and the use of interfaces, data warehouses, or report writers.

Emerging Technologies

5. Entities may use emerging technologies (for example, blockchain, robotics, or artificial intelligence) because such technologies may present specific opportunities to increase operational efficiencies or enhance financial reporting. When emerging technologies are used in the entity's information system relevant to the preparation of the financial statements, the auditor may include such technologies in the identification of IT applications and other aspects of the IT environment that are subject to risks arising from the use of IT. Although emerging technologies may be seen to be more sophisticated or more complex compared to existing technologies, the auditor's responsibilities in relation to IT applications and identified general IT controls in accordance with paragraphs .28–.29 remain unchanged.

Scalability

6. Obtaining an understanding of the entity's IT environment may be more easily accomplished for a less complex entity that uses commercial software and when the entity does not have access to the source code to make any program changes. Such entities may not have dedicated IT resources but may have a person assigned in an administrator role for the purpose of granting employee access or installing vendor-provided updates to the IT applications. Specific matters that the auditor may consider in understanding the nature of a commercial accounting software package, which may be the single IT application used by a less complex entity in its information system, may include the following:

- The extent to which the software is well established and has a reputation for reliability.

- The extent to which it is possible for the entity to modify the source code of the software to include additional modules (that is, add-ons) to the base software or to make direct changes to data.
- The nature and extent of modifications that have been made to the software. Although an entity may not be able to modify the source code of the software, many software packages allow for configuration (for example, setting or amending reporting parameters). These do not usually involve modifications to source code; however, the auditor may consider the extent to which the entity is able to configure the software when considering the accuracy and completeness of information produced by the software that is used as audit evidence.
- The extent to which data related to the preparation of the financial statements can be directly accessed (that is, direct access to the database without using the IT application) and the volume of data that is processed. The greater the volume of data, the more likely the entity may need controls that address maintaining the integrity of the data, which may include general IT controls over unauthorized access and changes to the data.

7. Complex IT environments may include highly customized or highly integrated IT applications and, therefore, may require more effort to understand. Financial reporting processes or IT applications may be integrated with other IT applications. Such integration may involve IT applications that are used in the entity's business operations and that provide information to the IT applications relevant to the flows of transactions and information processing in the entity's information system. In such circumstances, certain IT applications used in the entity's business operations may also be relevant to the preparation of the financial statements. Complex IT environments also may require dedicated IT departments that have structured IT processes supported by personnel that have software development and IT environment maintenance skills. In other cases, an entity may use internal or external service providers to manage certain aspects of, or IT processes within, its IT environment (for example, third-party hosting).

Identifying IT Applications That Are Subject to Risks Arising From the Use of IT

8. Through understanding the nature and complexity of the entity's IT environment, including the nature and extent of information-processing controls, the auditor may determine which IT applications the entity is relying upon to accurately process and maintain the integrity of financial information. The identification of IT applications on which the entity relies, may affect the auditor's decision to test the automated controls within such IT applications, assuming that such automated controls address identified risks of material misstatement. Conversely, if the entity is not relying on an IT application, the automated controls within such IT application are unlikely to be appropriate or sufficiently precise for purposes of operating effectiveness tests. Automated controls that may be identified in accordance with paragraph .27 may include, for example, automated calculations or input and processing and output controls, such as a three-way match of a purchase order, vendor shipping document, and vendor invoice. When automated controls are identified by the auditor and the auditor determines through the understanding of the IT environment that the entity is relying on the IT application that includes those automated controls, it may be more likely for the auditor to identify the IT application as one that is subject to risks arising from the use of IT.

9. In considering whether the IT applications for which the auditor has identified automated controls are subject to risks arising from the use of IT, the auditor is likely to consider whether, and the extent to which, the entity may have access to source code that enables management to make program changes to such controls or the IT applications. The extent to which the entity makes program or configuration changes and the extent to which the IT processes over such changes are formalized may also be relevant considerations. The auditor is also likely to consider the risk of inappropriate access or changes to data.

10. System-generated reports that the auditor may intend to use as audit evidence may include, for example, a trade receivable aging report or an inventory valuation report. For such reports, the auditor may obtain audit evidence about the accuracy and completeness of the reports by performing audit procedures to test the inputs and outputs of the report-generating process. In other cases, the auditor may plan to test the operating effectiveness of the controls over the preparation and maintenance of the report, in which case, the IT application from which it is produced is likely to be subject to risks arising from the use of IT. In addition to testing the accuracy and completeness of the report, the auditor may plan to test the operating effectiveness of general IT controls that address risks related to inappropriate or unauthorized program changes to, or data changes in, the report.

11. Some IT applications may include report-writing functionality within them, whereas some entities may also use separate report-writing applications (that is, report writers). In such cases, the auditor may need to determine the sources of system-generated reports (that is, the application that prepares the report and the data sources used by the report) to determine the IT applications subject to risks arising from the use of IT.

12. The data sources used by IT applications may be databases that, for example, can be accessed only through the IT application or by IT personnel with database administration privileges. In other cases, the data source may be a data warehouse that may itself be considered to be an IT application subject to risks arising from the use of IT.

13. The auditor may have identified a risk for which substantive procedures alone are not sufficient because of the entity's use of highly automated and paperless processing of transactions, which may involve multiple integrated IT applications. In such circumstances, the controls identified by the auditor are likely to include automated controls. Further, the entity may be relying on general IT controls to maintain the integrity of the transactions processed and other information used in processing. In such cases, the IT applications involved in the processing and storage of the information are likely subject to risks arising from the use of IT.

End-User Computing

14. Although audit evidence may also come in the form of system-generated output that is used in a calculation performed in an end-user computing tool (for example, spreadsheet software or simple databases), such tools are not typically identified as IT applications in the context of paragraph .29. Designing and implementing controls around access and change to end-user computing tools may be challenging, and such controls are rarely equivalent to, or as effective as, general IT controls. Rather, the auditor may consider a combination of information-processing controls, taking into account the purpose and complexity of the end-user computing involved, such as some or all of the following:

- Information-processing controls over the initiation and processing of the source data, including relevant automated or interface controls to the point from which the data is extracted (for example, the data warehouse)
- Controls to check that the logic is functioning as intended, for example, controls that "prove" the extraction of data, such as reconciling the report to the data from which it was derived, comparing the individual data from the report to the source and vice versa, and controls that check the formulas or macros
- Use of validation software tools, which systematically check formulas or macros, such as spreadsheet integrity tools

Scalability

15. The entity's ability to maintain the integrity of information stored and processed in the information system may vary based on the complexity and volume of the related transactions and other information. The greater the complexity and volume of data that supports a significant class of transactions, account balance, or disclosure, the less likely it may become for the entity to maintain integrity of that information through information-processing controls alone (for example, input and output controls or review controls). It also becomes less likely that the auditor will be able to obtain audit evidence about the accuracy and completeness of such information through substantive procedures alone when such information is used as audit evidence. In some circumstances, when volume and complexity of transactions are lower, management may have an information-processing control that is sufficient to verify the accuracy and completeness of the data (for example, individual sales orders processed and billed may be reconciled to the hard copy originally entered into the IT application). When the entity relies on general IT controls to maintain the integrity of certain information used by IT applications, the auditor may determine that the IT applications that maintain that information are subject to risks arising from the use of IT.

<table>
<tr><th colspan="2">Considerations That May Assist in Determining Whether IT Applications Are Subject to Risks Arising From the Use of IT</th></tr>
<tr><td>Example characteristics of an IT application that are less likely subject to risks arising from the use of IT include the following:

• Stand-alone applications.
• The volume of data (transactions) is not significant.
• The application's functionality is not complex.
• Each transaction is supported by original hard copy documentation.</td><td>Example characteristics of an IT application that are more likely subject to risks arising from the use of IT include the following:

• Applications are interfaced.
• The volume of data (transactions) is significant.
• The application's functionality is complex because
— the application automatically initiates transactions, and
— there are a variety of complex calculations underlying automated entries.</td></tr>
<tr><td>IT application is likely not subject to risks arising from the use of IT because of the following:

• The volume of data is not significant, and management is not relying upon an application system to process or maintain the data.
• Management does not rely on automated controls or other automated functionality. The auditor has not identified automated controls in accordance with paragraph .27.
• Although management uses system-generated reports in its controls, it does not rely on the IT application to produce complete and accurate reports. Instead, it reconciles the reports back to the hard copy documentation and verify the calculations in the reports.
• The auditor will directly test information produced by the entity used as audit evidence.</td><td>IT application is likely subject to risks arising from the use of IT because of the following:

• Management relies on an application system to process or maintain data.
• Management relies upon the application system to perform certain automated controls that the auditor has also identified.</td></tr>
</table>

Other Aspects of the IT Environment That Are Subject to Risks Arising From the Use of IT

16. When the auditor identifies IT applications that are subject to risks arising from the use of IT, other aspects of the IT environment are also typically subject to risks arising from the use of IT. The IT infrastructure includes databases, the operating system, and the network. Databases store the data used by IT applications and may consist of many interrelated data tables. Data in databases may also be accessed directly through database management systems by IT or other personnel with database administration privileges. The operating system is responsible for managing communications between hardware, IT applications, and other software used in the network. As such, IT applications and databases may be directly accessed through the operating system. A network is used in the IT infrastructure to transmit data and to share information, resources, and services through a common communications link. The network also typically establishes a layer of logical security (enabled through the operating system) for access to the underlying resources.

17. When IT applications are identified by the auditor to be subject to risks arising from the use of IT, the databases that store the data processed by an identified IT application are typically also identified. Similarly, because an IT application's ability to operate is often dependent on the operating system and IT applications, and databases may be directly accessed from the operating system, the operating system is typically subject to risks arising from the use of IT. The network may be identified when it is a central point of access to the identified IT applications and related databases, when an IT application interacts with vendors or external parties through the internet, or when web-facing IT applications are identified by the auditor.

Identifying Risks Arising From the Use of IT and General IT Controls

18. Examples of risks arising from the use of IT include risks related to inappropriate reliance on IT applications that are inaccurately processing data, processing inaccurate data, or both, as follows:

- Unauthorized access to data that may result in destruction of data or improper changes to data, including the recording of unauthorized or nonexistent transactions or inaccurate recording of transactions. Particular risks may arise when multiple users access a common database.
- The possibility of IT personnel gaining access privileges beyond those necessary to perform their assigned duties thereby breaking down segregation of duties.
- Unauthorized changes to data in master files.
- Unauthorized changes to IT applications or other aspects of the IT environment.
- Failure to make necessary changes to IT applications or other aspects of the IT environment.
- Inappropriate manual intervention.
- Potential loss of data or inability to access data as required.

19. The auditor's consideration of unauthorized access may include risks related to unauthorized access by internal or external parties. Such risks (for example, cybersecurity risks) may not necessarily affect financial reporting because an entity's IT environment may also include IT applications and related data that address operational or compliance needs. It is important to note that cyber incidents usually first occur through the perimeter and internal network layers, which tend to be further removed from the IT application, database, and operating systems that affect the preparation of the financial statements. Accordingly, if information about a security breach has been identified, the auditor ordinarily considers the extent to which such a breach had the potential to affect financial reporting. If financial reporting may be affected, the auditor may decide to understand and test the related controls to determine the possible impact or scope of potential misstatements in the financial statements or may determine that the entity has provided adequate disclosures in relation to such security breach.

20. In addition, laws and regulations that may have a direct or indirect effect on the entity's financial statements may include data protection legislation. Considering an entity's compliance with such laws or regulations, in accordance with section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*, may involve understanding the entity's IT processes and general IT controls that the entity has implemented to address the relevant laws or regulations.

21. General IT controls are implemented to address risks arising from the use of IT. Accordingly, the auditor uses the understanding obtained about the identified IT applications and other aspects of the IT environment and the applicable risks arising from the use of IT in determining the general IT controls to identify. In some cases, an entity may use common IT processes across its IT environment or across certain IT applications, in which case, common risks arising from the use of IT and common general IT controls may be identified.

22. In general, a greater number of general IT controls related to IT applications and databases are likely to be identified than for other aspects of the IT environment. This is because these aspects are the most closely concerned with the information processing and storage of information in the entity's information system. In identifying general IT controls, the auditor may consider controls over actions of both end users and of the entity's IT personnel or IT service providers.

23. Appendix F, "Considerations for Understanding General IT Controls," provides further explanation of the nature of the general IT controls that may be implemented for different aspects of the IT environment.

Appendix F — Considerations for Understanding General IT Controls (Ref: par. .29 and .A190–.A200)

.A279

This appendix provides further explanation of the nature of the general IT controls that may be implemented for different aspects of the IT environment.

1. The nature of the general IT controls that may be implemented for different aspects of the IT environment include the following:

a. *Applications*. General IT controls at the IT application layer will correlate to the nature and extent of application functionality and the access paths allowed in the technology. For example, different controls may be identified for highly integrated IT applications with complex security options than for an IT application supporting account balances with access methods only through transactions.

b. *Database*. General IT controls at the database layer typically address risks arising from the use of IT related to unauthorized updates to financial reporting information in the database through direct database access or execution of a script or program.

c. *Operating system*. General IT controls at the operating system layer typically address risks arising from the use of IT related to administrative access, which can facilitate the override of other controls. This includes actions such as compromising other user's credentials; adding new, unauthorized users; installing software that is not adequately tested, software containing an issue not yet fixed, or malware; or executing scripts or other unauthorized programs.

d. *Network*. General IT controls at the network layer typically address risks arising from the use of IT related to network segmentation, remote access, and authentication. Network controls may be relevant when an entity has web-facing applications used in financial reporting. Network controls may be relevant when the entity has significant business partner relationships or third-party outsourcing, which may increase data transmissions and the need for remote access.

2. Examples of general IT controls that may exist, organized by IT process, include the following:

a. Process to manage access:

   i. *Authentication*. Controls that validate that a user accessing the IT application or other aspect of the IT environment is using the user's own log-in credentials (that is, the user is not using another user's credentials).

   ii. *Authorization*. Controls that allow users to access the information necessary for their job responsibilities and nothing further, which facilitates appropriate segregation of duties.

iii. *Provisioning*. Controls to authorize new users and modifications to existing users' access privileges.

iv. *Deprovisioning*. Controls to remove user access upon termination or transfer.

v. *Privileged access.* Controls over administrative or powerful users' access.

vi. *User-access reviews*. Controls to recertify or evaluate user access for ongoing authorization over time.

vii. *Security configuration controls*. Each technology generally has key configuration settings that help restrict access to the environment.

viii. *Physical access*. Controls over physical access to the data center and hardware because such access may be used to override other controls.

b. Process to manage program or other changes to the IT environment:

i. *Change-management process.* Controls over the process to design, program, test, and migrate changes to a production (that is, end user) environment.

ii. *Segregation of duties over change migration*. Controls that segregate access to make and migrate changes to a production environment.

iii. *Systems development or acquisition or implementation.* Controls over initial IT application development or implementation (or in relation to other aspects of the IT environment).

iv. *Data conversion*. Controls over the conversion of data during development, implementation, or upgrades to the IT environment.

c. Process to manage IT operations:

i. *Job scheduling.* Controls over access to schedule and initiate jobs or programs that may affect financial reporting.

ii. *Job monitoring.* Controls to monitor financial reporting jobs or programs for successful execution.

iii. *Backup and recovery.* Controls to ensure backups of financial reporting data occur as planned and that such data is available and able to be accessed for timely recovery in the event of an outage or attack.

iv. *Intrusion detection.* Controls to monitor for vulnerabilities or intrusions in the IT environment.

3. General IT controls need not be identified for every IT process. General IT controls are identified based on the risks arising from the use of IT. See paragraph 15 of appendix E, "Considerations for Understanding IT," for examples of considerations that may assist the auditor in determining whether IT applications are subject to risks arising from the use of IT.

AU-C Section 320

Materiality in Planning and Performing an Audit

Source: SAS No. 122; SAS No. 134; SAS No. 138.

Effective for audits of financial statements for periods ending on or after December 15, 2012, unless otherwise indicated.

Note

In March 2023, the Accounting Standards Board issued Statement on Auditing Standards No. 149, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors and Audits of Referred-to Auditors)*, which contains amendments to this section.

The amendments are effective for audits of financial statements for periods ending on or after December 15, 2026, and can be viewed in appendix C of section 600 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility to apply the concept of materiality in planning and performing an audit of financial statements. Section 450, *Evaluation of Misstatements Identified During the Audit*, explains how materiality is applied in evaluating the effect of identified misstatements on the audit and the effect of uncorrected misstatements, if any, on the financial statements.

Materiality in the Context of an Audit

.02 Financial reporting frameworks often discuss the concept of materiality in the context of the preparation and fair presentation of financial statements. Although financial reporting frameworks may discuss materiality in different terms, they generally explain that

- misstatements, including omissions, are considered to be material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.
- judgments about materiality are made in light of surrounding circumstances and are affected by the size or nature of a misstatement, or a combination of both.
- judgments about materiality involve both qualitative and quantitative considerations.
- judgments about matters that are material to users of the financial statements are based on a consideration of the common financial information needs of users as a group. The possible effect of misstatements on specific individual users, whose needs may vary widely, is not considered.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 138.]

.03 Such a discussion about materiality provides a frame of reference to the auditor in determining materiality for the audit. If the applicable financial reporting framework does not include a discussion of the concept of materiality, the characteristics referred to in paragraph .02 provide the auditor with such a frame of reference.

.04 The auditor's determination of materiality is a matter of professional judgment and is affected by the auditor's perception of the financial information needs of users of the financial statements. For purposes of determining materiality, the auditor may assume that reasonable users

a. have a reasonable knowledge of business and economic activities and accounting and a willingness to study the information in the financial statements with reasonable diligence;

b. understand that financial statements are prepared, presented, and audited to levels of materiality;

c. recognize the uncertainties inherent in the measurement of amounts based on the use of estimates, judgment, and the consideration of future events; and

d. make reasonable judgments based on the information in the financial statements.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 138.]

.05 The concept of materiality is applied by the auditor both in planning and performing the audit; evaluating the effect of identified misstatements on the audit and the effect of uncorrected misstatements, if any, on the financial statements; and in forming the opinion in the auditor's report. (Ref: par. .A2)

.06 In planning the audit, the auditor makes judgments about misstatements that will be considered material. These judgments provide a basis for

a. determining the nature and extent of risk assessment procedures;

b. identifying and assessing the risks of material misstatement; and

c. determining the nature, timing, and extent of further audit procedures.

The materiality determined when planning the audit does not necessarily establish an amount below which uncorrected misstatements, individually or in the aggregate, will always be evaluated as immaterial. The circumstances related to some misstatements may cause the auditor to evaluate them as material even if they are below materiality. It is not practicable to design audit procedures to detect all misstatements that could be material solely because of their nature (that is, qualitative considerations). However, consideration of the nature of potential misstatements in disclosures is relevant to the design of audit procedures to address risks of material misstatement.[1] In addition, when evaluating the effect on the financial statements of all uncorrected misstatements, the auditor considers not only the size but also the nature of uncorrected misstatements, and the particular circumstances of their occurrence.[2] (Ref: par. .A1) [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Effective Date

.07 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objective

.08 The objective of the auditor is to apply the concept of materiality appropriately in planning and performing the audit.

Definition

.09 For purposes of generally accepted auditing standards (GAAS), the following term has the meaning attributed as follows:

Performance materiality. The amount or amounts set by the auditor at less than materiality for the financial statements as a whole to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds materiality for the financial statements as a whole. If applicable, *performance materiality* also refers to the amount or amounts set by the auditor at less than the materiality level or levels for particular classes of transactions, account balances, or disclosures. Performance materiality is to be distinguished from tolerable misstatement. (Ref: par. .A3)

[1]See paragraphs .A141–.A142 of section 315A, *Understanding the Entity and its Environment and Assessing the Risks of Material Misstatement*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

[2]Paragraph .A23 of section 450, *Evaluation of Misstatements Identified During the Audit*. [Footnote renumbered by the issuance of SAS No. 134, May 2019.]

Requirements

Determining Materiality and Performance Materiality When Planning the Audit

.10 When establishing the overall audit strategy, the auditor should determine materiality for the financial statements as a whole. If, in the specific circumstances of the entity, one or more particular classes of transactions, account balances, or disclosures exist for which there is a substantial likelihood that misstatements of lesser amounts than materiality for the financial statements as a whole would influence the judgment made by a reasonable user based on the financial statements, the auditor also should determine the materiality level or levels to be applied to those particular classes of transactions, account balances, or disclosures. (Ref: par. .A4–.A14) [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 138.]

.11 The auditor should determine performance materiality for purposes of assessing the risks of material misstatement and determining the nature, timing, and extent of further audit procedures. (Ref: par. .A15)

Revision as the Audit Progresses

.12 The auditor should revise materiality for the financial statements as a whole (and, if applicable, the materiality level or levels for particular classes of transactions, account balances, or disclosures) in the event of becoming aware of information during the audit that would have caused the auditor to have determined a different amount (or amounts) initially. (Ref: par. .A16–.A17)

.13 If the auditor concludes that a lower materiality than that initially determined for the financial statements as a whole (and, if applicable, materiality level or levels for particular classes of transactions, account balances, or disclosures) is appropriate, the auditor should determine whether it is necessary to revise performance materiality and whether the nature, timing, and extent of the further audit procedures remain appropriate.

Documentation

.14 The auditor should include in the audit documentation the following amounts and the factors considered in their determination:[3]

a. Materiality for the financial statements as a whole (see paragraph .10)

b. If applicable, the materiality level or levels for particular classes of transactions, account balances, or disclosures (see paragraph .10)

c. Performance materiality (see paragraph .11)

[3]Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*. [Footnote renumbered by the issuance of SAS No. 134, May 2019.]

d. Any revision of (*a*)–(*c*) as the audit progressed (see paragraphs .12–.13)

Application and Other Explanatory Material

Materiality in the Context of an Audit (Ref: par. .06)

.A1 Identifying and assessing the risks of material misstatement[4] involves the use of professional judgment to identify those classes of transactions, account balances, and disclosures, including qualitative disclosures, the misstatement of which could be material (in general, misstatements are considered to be material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements). When considering whether misstatements in qualitative disclosures could be material, the auditor may identify relevant factors such as the following:

- The circumstances of the entity for the period (For example, the entity may have undertaken a significant business combination during the period.)
- The applicable financial reporting framework, including changes therein (For example, a new financial reporting standard may require new qualitative disclosures that are significant to the entity.)
- Qualitative disclosures that are important to users of the financial statements because of the nature of an entity (For example, liquidity risk disclosures may be important to users of the financial statements for a financial institution.)

[Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. Revised, April 2020, to reflect conforming changes necessary due to the issuance of SAS No. 138.]

Materiality and Audit Risk (Ref: par. .05)

.A2 In conducting an audit of financial statements, the overall objectives of the auditor are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, thereby enabling the auditor to express an opinion on whether the financial statements are prepared, in all material respects, in accordance with an applicable financial reporting framework and to report on the financial statements and communicate, as required by GAAS, in accordance with the auditor's findings.[5] The auditor obtains reasonable assurance by obtaining sufficient appropriate audit evidence to reduce audit risk to an acceptably low level.[6]*Audit risk* is

---

[4]Paragraph .26 of section 315A requires the auditor to identify and assess the risk of material misstatement at the financial statement and assertion levels. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

[5]Paragraph .12 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*. [Footnote renumbered by the issuance of SAS No. 134, May 2019.]

[6]Paragraph .19 of section 200. [Footnote renumbered by the issuance of SAS No. 134, May 2019.]

the risk that the auditor expresses an inappropriate audit opinion when the financial statements are materially misstated. Audit risk is a function of the risks of material misstatement and detection risk.[7] Materiality and audit risk are considered throughout the audit, in particular, when

a. determining the nature and extent of risk assessment procedures to be performed;

b. identifying and assessing the risks of material misstatement;[8]

c. determining the nature, timing, and extent of further audit procedures;[9] and

d. evaluating the effect of uncorrected misstatements, if any, on the financial statements[10] and in forming the opinion in the auditor's report.

[Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Definition (Ref: par. .09)

.A3 *Tolerable misstatement* is the application of performance materiality to a particular sampling procedure. Section 530, *Audit Sampling*, defines *tolerable misstatement* and provides further application guidance about the concept.[11] [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Determining Materiality and Performance Materiality When Planning the Audit

Considerations Specific to Governmental Entities (Ref: par. .10)

.A4 In the case of a governmental entity, legislators and regulators are often the primary users of its financial statements. Furthermore, the financial statements may be used to make decisions other than economic decisions. The determination of materiality for the financial statements as a whole (and, if applicable, materiality level or levels for particular classes of transactions, account balances, or disclosures) in an audit of the financial statements of a governmental entity, therefore, may be influenced by law or regulation. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A5 For most state or local governments, a governmental entity's applicable financial reporting framework is based on multiple reporting units, and generally, the auditor expresses or disclaims an opinion on a government's financial statements as a whole by providing opinions or disclaimers of opinion on each opinion unit. That is, a state or local

[7]Paragraph .14 of section 200. [Footnote renumbered by the issuance of SAS No. 134, May 2019.]

[8]See section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*. [Footnote renumbered by the issuance of SAS No. 134, May 2019.]

[9]See section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*. [Footnote renumbered by the issuance of SAS No. 134, May 2019.]

[10]Paragraph .11 of section 450. [Footnote renumbered by the issuance of SAS No. 134, May 2019.]

[11]Paragraph .A6 of section 530, *Audit Sampling*. [Footnote renumbered by the issuance of SAS No. 134, May 2019.]

governmental entity's applicable financial reporting framework requires the presentation of financial statements for its varied activities in various reporting units. Consequently, a reporting unit, or aggregation of reporting units, of the governmental entity represents an opinion unit to the auditor. Accordingly, in these cases, materiality is established for each opinion unit. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Use of Benchmarks in Determining Materiality for the Financial Statements as a Whole (Ref: par. .10)

.A6 Determining materiality involves the exercise of professional judgment. A percentage is often applied to a chosen benchmark as a starting point in determining materiality for the financial statements as a whole. Factors that may affect the identification of an appropriate benchmark include the following:

- The elements of the financial statements (for example, assets, liabilities, equity, revenue, or expenses)
- Whether items exist on which the attention of the users of the particular entity's financial statements tends to be focused (for example, for the purpose of evaluating financial performance, users may tend to focus on profit, revenue, or net assets)
- The nature of the entity, where the entity is in its life cycle, and the industry and economic environment in which the entity operates
- The entity's ownership structure and the way it is financed (for example, if an entity is financed solely by debt rather than equity, users may put more emphasis on assets, and claims on them, than on the entity's earnings)
- The relative volatility of the benchmark

[Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A7 Examples of benchmarks that may be appropriate, depending on the circumstances of the entity, include categories of reported income, such as profit before tax, total revenue, gross profit, and total expenses; total equity; or net asset value. Profit before tax from continuing operations is often used for profit-oriented entities. When profit before tax from continuing operations is volatile, other benchmarks may be more appropriate, such as gross profit or total revenues. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A8 With regard to the chosen benchmark, relevant financial data ordinarily includes prior periods' financial results and financial positions; the period-to-date financial results and financial position, budgets, or forecasts for the current period, adjusted for significant changes in the circumstances of the entity (for example, a significant business acquisition); and relevant changes of conditions in the industry or economic environment in which the entity operates. For example, when, as a starting point, materiality for the financial statements as a whole is determined for a particular entity based on a percentage of profit before tax from continuing operations, circumstances that give rise to an exceptional decrease or increase in such profit may lead the auditor to conclude that materiality for the financial statements as a whole is more appropriately determined using a normalized profit before tax from continuing operations figure based on past results. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A9 Materiality relates to the financial statements that are being audited. When the financial statements are prepared for a financial reporting period of more or less than 12 months, such as may be the case for a new entity or a change in the financial reporting period, materiality relates to the financial statements prepared for that financial reporting period. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A10 Determining a percentage to be applied to a chosen benchmark involves the exercise of professional judgment. A relationship exists between the percentage and the chosen benchmark, such that a percentage applied to profit before tax from continuing operations will normally be higher than a percentage applied to total revenue. For example, the auditor may consider a percentage of profit before tax from continuing operations to be appropriate for a profit-oriented entity in a manufacturing industry. Chapter 3 of the AICPA Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* provides further guidance about the use of benchmarks in determining materiality. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Considerations Specific to Smaller, Less Complex Entities

.A11 When an entity's profit before tax from continuing operations is consistently nominal, which might be the case for an owner-managed business in which the owner takes much of the profit before tax in the form of remuneration, a benchmark such as profit before remuneration and tax may be more relevant. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Considerations Specific to Governmental Entities

.A12 In an audit of a governmental entity, total cost or net cost (expenses less revenues or expenditures less receipts) may be appropriate benchmarks for program activities. When a governmental entity has custody of public assets, assets may be an appropriate benchmark. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Materiality Level or Levels for Particular Classes of Transactions, Account Balances, or Disclosures (Ref: par. .10)

.A13 Factors that may indicate the existence of one or more particular classes of transactions, account balances, or disclosures for which there is a substantial likelihood that misstatements of lesser amounts than materiality for the financial statements as a whole would influence the judgment made by a reasonable user based on the financial statements include the following:

- Whether law, regulation, or the applicable financial reporting framework affect users' expectations regarding the measurement or disclosure of certain items (for example, related party transactions and the remuneration of management and those charged with governance, and sensitivity analysis for fair value accounting estimates with high estimation uncertainty)

- The key disclosures with regard to the industry in which the entity operates (for example, research and development costs for a pharmaceutical company)
- Whether attention is focused on a particular aspect of the entity's business that is separately disclosed in the financial statements (for example, disclosures about discontinued operations or a significant business combination)

[Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 138.]

.A14 In considering whether, in the specific circumstances of the entity, such classes of transactions, account balances, or disclosures exist, the auditor may find it useful to obtain an understanding of the views and expectations of those charged with governance and management. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Performance Materiality (Ref: par. .11)

.A15 Planning the audit solely to detect individual material misstatements overlooks the fact that the aggregate of individually immaterial misstatements may cause the financial statements to be materially misstated and leaves no margin for possible undetected misstatements. *Performance materiality* (which, as defined, is one or more amounts) is set to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements in the financial statements exceeds materiality for the financial statements as a whole. Similarly, performance materiality relating to a materiality level determined for a particular class of transactions, account balance, or disclosure is set to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements in that particular class of transactions, account balance, or disclosure exceeds the materiality level for that particular class of transactions, account balance, or disclosure. The determination of performance materiality is not a simple mechanical calculation and involves the exercise of professional judgment. It is affected by the auditor's understanding of the entity, updated during the performance of the risk assessment procedures, and the nature and extent of misstatements identified in previous audits and, thereby, the auditor's expectations regarding misstatements in the current period. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Revision as the Audit Progresses (Ref: par. .12)

.A16 In some situations, the auditor may determine materiality for planning purposes before the financial statements to be audited are prepared. In those situations, the auditor's professional judgment about materiality might be based on the entity's annualized interim financial statements or financial statements of one or more prior annual periods. If it appears as though the actual financial results are likely to be substantially different from the anticipated results, such as when there are major changes in the entity's circumstances (for example, a significant merger) or relevant changes in the economy as a whole or the industry in which the entity operates, the auditor may be required, in accordance with paragraph .12, to revise materiality. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A17 Materiality for the financial statements as a whole (and, if applicable, the materiality level or levels for particular classes of transactions, account balances, or disclosures) may need to be revised as a result of a change in circumstances that occurred during the audit (for example, a decision to dispose of a major part of the entity's business), new information, or a change in the auditor's understanding of the entity and its operations as a result of performing further audit procedures. For example, if, during the audit, it appears as though actual financial results are likely to be substantially different from the anticipated period-end financial results that were used initially to determine materiality for the financial statements as a whole, the auditor may be required, in accordance with paragraph .12, to revise materiality. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

AU-C Section 330

Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained

Source: SAS No. 122; SAS No. 134; SAS No. 135; SAS No. 136; SAS No. 142; SAS No. 145.

Effective for audits of financial statements for periods ending on or after December 15, 2012, unless otherwise indicated.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility to design and implement responses to the risks of material misstatement identified and assessed by the auditor in accordance with section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, and to evaluate the audit evidence obtained in an audit of financial statements. Section 700, *Forming an Opinion and Reporting on Financial Statements*, and section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, address the auditor's responsibility to form an opinion on the financial statements based on the evaluation of the audit evidence obtained. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

Effective Date

.02 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objective

.03 The objective of the auditor is to obtain sufficient appropriate audit evidence regarding the assessed risks of material misstatement through designing and implementing appropriate responses to those risks.

Definitions

.04 For purposes of generally accepted auditing standards, the following terms have the meanings attributed as follows:

Substantive procedure. An audit procedure designed to detect material misstatements at the assertion level. Substantive procedures comprise

a. tests of details (classes of transactions, account balances, and disclosures) and

b. substantive analytical procedures.

Test of controls. An audit procedure designed to evaluate the operating effectiveness of controls in preventing, or detecting and correcting, material misstatements at the assertion level.

Requirements

Overall Responses

.05 The auditor should design and implement overall responses to address the assessed risks of material misstatement at the financial statement level. (Ref: par. .A1–.A3)

Audit Procedures Responsive to the Assessed Risks of Material Misstatement at the Relevant Assertion Level

.06 The auditor should design and perform further audit procedures whose nature, timing, and extent are based on, and are responsive to, the assessed risks of material misstatement at the assertion level and in a manner that is not biased towards obtaining audit evidence that may be corroborative or towards excluding audit evidence that may be contradictory. When evaluating audit evidence with respect to the assessed risks of material misstatement, the auditor maintains professional skepticism, including when considering information that may be used as audit evidence and what procedures would be appropriate in the circumstances. (Ref: par. .A4–.A9) [As amended, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142.]

.07 In designing the further audit procedures to be performed, the auditor should

a. consider the reasons for the assessed risk of material misstatement at the relevant assertion level for each significant class of transactions, account balance, and disclosure, including

  i. the likelihood and magnitude of misstatement due to the particular characteristics of the significant class of transactions, account balance, or disclosure (the inherent risk) and

  ii. whether the risk assessment takes account of controls that address the risk of material misstatement (the control risk), thereby requiring the auditor to obtain audit evidence to determine whether the controls are operating effectively (that is, the auditor plans to test the operating effectiveness of controls in determining the nature, timing, and extent of substantive procedures), and (Ref: par. .A10–.A19)

b. obtain more persuasive audit evidence the higher the auditor's assessment of risk. (Ref: par. .A20)

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Tests of Controls

.08 The auditor should design and perform tests of controls to obtain sufficient appropriate audit evidence about the operating effectiveness of controls if

a. the auditor's assessment of risks of material misstatement at the relevant assertion level includes an expectation that the controls are operating effectively (that is, the auditor plans to test the operating effectiveness of controls in determining the nature, timing, and extent of substantive procedures) or

b. substantive procedures alone cannot provide sufficient appropriate audit evidence at the relevant assertion level. (Ref: par. .A21–.A26)

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.09 In designing and performing tests of controls, the auditor should obtain more persuasive audit evidence the greater the reliance the auditor places on the effectiveness of a control. (Ref: par. .A27)

Nature and Extent of Tests of Controls

.10 In designing and performing tests of controls, the auditor should

a. perform other audit procedures in combination with inquiry to obtain audit evidence about the operating effectiveness of the controls, including

   i. how the controls were applied at relevant times during the period under audit;

   ii. the consistency with which they were applied; and

   iii. by whom or by what means they were applied, including, when applicable, whether the person performing the control possesses the necessary authority and competence to perform the control effectively, and (Ref: par. .A28–.A34)

b. to the extent not already addressed, determine whether the controls to be tested depend upon other controls (indirect controls) and, if so, whether it is necessary to obtain audit evidence supporting the operating effectiveness of those indirect controls. (Ref: par. .A35)

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Timing of Tests of Controls

.11 The auditor should test controls for the particular time or throughout the period for which the auditor intends to rely on those controls, subject to paragraphs .12 and .15 that follow, in order to provide an appropriate basis for the auditor's intended reliance. (Ref: par. .A35)

Using Audit Evidence Obtained During an Interim Period

.12 If the auditor obtains audit evidence about the operating effectiveness of controls during an interim period, the auditor should

a. obtain audit evidence about significant changes to those controls subsequent to the interim period and

b. determine the additional audit evidence to be obtained for the remaining period. (Ref: par. .A36–.A37)

Using Audit Evidence Obtained in Previous Audits

.13 In determining whether it is appropriate to use audit evidence about the operating effectiveness of controls obtained in previous audits and, if so, the length of the time period that may elapse before retesting a control, the auditor should consider

a. the effectiveness of other components of the entity's system of internal control, including the control environment, the entity's process to monitor the system of internal control, and the entity's risk assessment process;

b. the risks arising from the characteristics of the control, including whether the control is manual or automated;

c. the effectiveness of general IT controls;

d. the effectiveness of the control and its application by the entity, including the nature and extent of deviations in the application of the control noted in previous audits and whether there have been personnel changes that significantly affect the application of the control;

e. whether the lack of a change in a particular control poses a risk due to changing circumstances; and

f. the risks of material misstatement and the extent of reliance on the control. (Ref: par. .A38)

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.14 If the auditor plans to use audit evidence from a previous audit about the operating effectiveness of specific controls, the auditor should perform audit procedures to establish the continuing relevance of that information to the current audit. The auditor should obtain this evidence by performing inquiry, combined with observation or inspection, to confirm the understanding of those specific controls, and

a. if there have been changes that affect the continuing relevance of the audit evidence from the previous audit, the auditor should test the controls in the current audit. (Ref: par. .A39)

b. if there have not been such changes, the auditor should test the controls at least once in every third audit and should test some controls during each audit to avoid the possibility of testing all the controls on which the auditor intends to rely in a single audit period with no testing of controls in the subsequent two audit periods. (Ref: par. .A40–.A42)

Controls Over Significant Risks

.15 If the auditor intends to rely on controls over a risk the auditor has determined to be a significant risk,[1] the auditor should test the operating effectiveness of those controls in the current period. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Evaluating the Operating Effectiveness of Controls

.16 When evaluating the operating effectiveness of controls upon which the auditor intends to rely, the auditor should evaluate whether misstatements that have been detected by substantive procedures indicate that controls are not operating effectively. The absence of misstatements detected by substantive procedures, however, does not provide audit evidence that controls related to the relevant assertion being tested are effective. (Ref: par. .A43) [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.17 If deviations from controls upon which the auditor intends to rely are detected, the auditor should make specific inquiries to understand these matters and their potential consequences and should determine whether

a. the tests of controls that have been performed provide an appropriate basis for reliance on the controls,

b. additional tests of controls are necessary, or

c. the risks of material misstatement need to be addressed using substantive procedures. (Ref: par. .A44)

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

---

[1]Paragraphs .28–.30 of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

Substantive Procedures

.18 The auditor should perform substantive procedures for each relevant assertion of each significant class of transactions, account balance, and disclosure, regardless of the assessed level of control risk.. (Ref: par. .A45–.A50) [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.19 The auditor should consider whether external confirmation procedures are to be performed as substantive audit procedures. (Ref: par. .A51–.A56)

.20 The auditor should use external confirmation procedures for accounts receivable, except when one or more of the following is applicable: (Ref: par. .A55)

a. The overall account balance is immaterial.

b. External confirmation procedures for accounts receivable would be ineffective. (Ref: par. .A54 and .A56)

c. The auditor's assessed level of risk of material misstatement at the relevant assertion level is low, and the other planned substantive procedures address the assessed risk. In many situations, the use of external confirmation procedures for accounts receivable and the performance of other substantive procedures are necessary to reduce the assessed risk of material misstatement to an acceptably low level.

Substantive Procedures Related to the Financial Statement Closing Process

.21 The auditor's substantive procedures should include audit procedures related to the financial statement closing process, such as

a. agreeing or reconciling information in the financial statements with the underlying accounting records, including agreeing or reconciling information in disclosures, whether such information is obtained from within or outside of the general and subsidiary ledgers, and

b. examining material journal entries and other adjustments made during the course of preparing the financial statements. (Ref: par. .A57)

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Substantive Procedures Responsive to Significant Risks

.22 If the auditor has determined that an assessed risk of material misstatement at the relevant assertion level is a significant risk, the auditor should perform substantive procedures that are specifically responsive to that risk. When the approach to a significant risk consists only of substantive procedures, those procedures should include tests of details. (Ref: par. .A58–.A59)

Timing of Substantive Procedures

.23 If substantive procedures are performed at an interim date, the auditor should cover the remaining period by performing

a. substantive procedures, combined with tests of controls for the intervening period, or

b. if the auditor determines that it is sufficient, further substantive procedures only,

that provide a reasonable basis for extending the audit conclusions from the interim date to the period-end. (Ref: par. .A60–.A64)

.24 If misstatements that the auditor did not expect when assessing the risks of material misstatement are detected at an interim date, the auditor should evaluate whether the related assessment of risk and the planned nature, timing, or extent of substantive procedures covering the remaining period need to be modified. See section 240, *Consideration of Fraud in a Financial Statement Audit*.[2] (Ref: par. .A65)

Selecting Items for Testing to Obtain Audit Evidence

.25 When designing tests of controls and tests of details, the auditor should determine the means of selecting items for testing that are effective in meeting the purpose of the audit procedure. (Ref: par. .A66–.A72)

Adequacy of Presentation of the Financial Statements

.26 The auditor should perform audit procedures to evaluate whether the overall presentation of the financial statements is in accordance with the applicable financial reporting framework. In making this evaluation, the auditor should consider whether the financial statements are presented in a manner that reflects the following:

a. The appropriate classification and description of financial information and the underlying transactions, events, and conditions

b. The appropriate presentation, structure, and content of the financial statements (Ref: par. .A73)

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Evaluating the Sufficiency and Appropriateness of Audit Evidence[3]

.27 Based on the audit procedures performed and the audit evidence obtained, the auditor should evaluate, before the conclusion of the audit, whether the assessments of the risks of material misstatement at the relevant assertion level remain appropriate. (Ref: par. .A74–.A76)

[2] Paragraphs .35–.36 of section 240, *Consideration of Fraud in a Financial Statement Audit*.

[3] See section 700, *Forming an Opinion and Reporting on Financial Statements*.

.28 The auditor should conclude whether sufficient appropriate audit evidence has been obtained. In forming a conclusion, the auditor should consider all audit evidence, regardless of whether it appears to corroborate or contradict the assertions in the financial statements. (Ref: par. .A77) [As amended, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142.]

.29 If the auditor has not obtained sufficient appropriate audit evidence related to a relevant assertion about a significant class of transactions, account balance, or disclosure, the auditor should attempt to obtain further audit evidence. If the auditor is unable to obtain sufficient appropriate audit evidence, the auditor should express a qualified opinion or disclaim an opinion on the financial statements.[4] [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Documentation

.30 The auditor should include in the audit documentation[5]

a. the overall responses to address the assessed risks of material misstatement at the financial statement level and the nature, timing, and extent of the further audit procedures performed;

b. the linkage of those procedures with the assessed risks at the relevant assertion level; and

c. the results of the audit procedures, including the conclusions when such conclusions are not otherwise clear. (Ref: par. .A78)

.31 If the auditor plans to use audit evidence about the operating effectiveness of controls obtained in previous audits, the auditor should include in the audit documentation the conclusions reached about relying on such controls that were tested in a previous audit.

.32 The auditor should include in the audit documentation the basis for any determination not to use external confirmation procedures for accounts receivable when the account balance is material.

.33 The auditor's documentation should demonstrate that information in the financial statements agrees or reconciles with the underlying accounting records, including agreeing or reconciling disclosures, whether such information is obtained from within or outside of the general and subsidiary ledgers. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

---

[4] Paragraphs .08–.10 of section 705, *Modifications to the Opinion in the Independent Auditor's Report*, address qualified, adverse, and disclaimer of opinions.

[5] Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*.

Application and Other Explanatory Material

Overall Responses (Ref: par. .05)

.A1 Overall responses to address the assessed risks of material misstatement at the financial statement level may include[6]

- emphasizing to the audit team the need to maintain professional skepticism.
- assigning more experienced staff or those with specialized skills or using specialists.
- providing changes to the nature, timing, and extent of direction and supervision of members of the engagement team and the review of the work performed.
- incorporating additional elements of unpredictability in the selection of further audit procedures to be performed.
- changes to the overall audit strategy as required by section 300, Planning an Audit, or planned audit procedures, and may include changes to the following:
  - — The auditor's determination of performance materiality in accordance with section 320.
  - — The auditor's plans to test the operating effectiveness of controls, and the persuasiveness of audit evidence needed to support the planned reliance on the operating effectiveness of the controls, particularly when control deficiencies in the control environment or the entity's monitoring activities are identified.
  - — The nature, timing, and extent of substantive procedures. For example, it may be appropriate to perform substantive procedures at or near the date of the financial statements when the risk of material misstatement is assessed as higher.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A2 The assessment of the risks of material misstatement at the financial statement level and, thereby, the auditor's overall responses are affected by the auditor's understanding of the control environment. An effective control environment may allow the auditor to have more confidence in internal control and the reliability of audit evidence generated internally within the entity and, thus, for example, allow the auditor to conduct some audit procedures at an interim date rather than at the period-end. Deficiencies in the control environment, however, have the opposite effect (for example, the auditor may respond to an ineffective control environment by

- conducting more audit procedures as of the period-end rather than at an interim date,
- obtaining more extensive audit evidence from substantive procedures, and

[6]Paragraphs .07–.08 of section 300, *Planning an Audit*, address the auditor's overall audit strategy.

- increasing the number of locations to be included in the audit scope).

.A3 Such considerations, therefore, have a significant bearing on the auditor's general approach (for example, an emphasis on substantive procedures [substantive approach] or an approach that uses tests of controls as well as substantive procedures [combined approach]).

Audit Procedures Responsive to the Assessed Risks of Material Misstatement at the Relevant Assertion Level

The Nature, Timing, and Extent of Further Audit Procedures (Ref: par. .06)

.A4 The auditor's assessment of the identified risks of material misstatement at the relevant assertion level provides a basis for considering the appropriate audit approach for designing and performing further audit procedures. For example, the auditor may determine that

a. in addition to the substantive procedures that are required for all relevant assertions, in accordance with paragraph .18, an effective response to the assessed risk of material misstatement for a particular assertion can be achieved only by also performing tests of controls.

b. performing only substantive procedures is appropriate for particular assertions, and therefore, the auditor excludes the effect of controls from the assessment of the risk of material misstatement. This may be because the auditor has not identified a risk for which substantive procedures alone cannot provide sufficient appropriate audit evidence and, as a result, is not required to test the operating effectiveness of controls. Therefore, the auditor may not plan to test the operating effectiveness of controls in determining the nature, timing, and extent of substantive procedures.

c. a combined approach using both tests of controls and substantive procedures is an effective approach.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A5 The nature of an audit procedure refers to its purpose (test of controls or substantive procedure) and its type (inspection, observation, inquiry, confirmation, recalculation, reperformance, or analytical procedure). See section 500, *Audit Evidence*, which provides further application guidance about audit procedures.[7] The nature of the audit procedures is most important in responding to the assessed risks.

.A6 Timing of an audit procedure refers to when it is performed or the period or date to which the audit evidence applies.

.A7 Extent of an audit procedure refers to the quantity to be performed (for example, a sample size or the number of observations of a control). [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

---

[7]Paragraphs .A10–.A26 of section 500, *Audit Evidence*.

.A8 Designing and performing further audit procedures whose nature, timing, and extent are based on, and are responsive to, the assessed risks of material misstatement at the relevant assertion level provides a clear linkage between the auditor's further audit procedures and the risk assessment.

.A9 Because effective internal controls generally reduce but do not eliminate the risk of material misstatement, tests of controls reduce but do not eliminate the need for substantive procedures. In addition, analytical procedures alone may not be sufficient in some cases. For example, when auditing certain estimation processes, such as the allowance for doubtful accounts, the auditor may perform substantive procedures beyond analytical procedures (for example, examining cash collections subsequent to the period-end) due to the risk of management override of controls[8] or the subjectivity of the account balance.

Responding to the Assessed Risks at the Assertion Level (Ref: par. .07a)

.A10 *Nature.* Section 315 requires that the auditor's assessment of the risks of material misstatement at the assertion level is performed by assessing inherent risk and control risk. The auditor assesses inherent risk by assessing the likelihood and magnitude of a misstatement, taking into account how and the degree to which the inherent risk factors affect the susceptibility of assertions to misstatement.[9] The auditor's assessed risks, including the reasons for those assessed risks, may affect both the types of audit procedures to be performed and their combination. For example, when an assessed risk is high, the auditor may confirm the completeness of the terms of a contract with the counterparty, in addition to inspecting the document. Further, certain audit procedures may be more appropriate for some assertions than others. For example, regarding revenue, tests of controls may be most responsive to the assessed risk of material misstatement of the completeness assertion, whereas substantive procedures may be most responsive to the assessed risk of material misstatement of the occurrence assertion. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A11 The reasons for the assessment given to a risk are relevant in determining the nature of audit procedures. For example, if an assessed risk is lower because of the particular characteristics of a class of transactions without consideration of the related controls, then the auditor may determine that substantive analytical procedures alone provide sufficient appropriate audit evidence. On the other hand, if the assessed risk is lower because the auditor plans to test the operating effectiveness of controls that are appropriately designed and implemented and the auditor intends to base the substantive procedures on that low assessment, then the auditor performs tests of those controls, as required by paragraph .08*a*. This may be the case, for example, for a class of transactions of reasonably uniform, noncomplex characteristics that are routinely processed and controlled by the entity's information system. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

---

[8]The auditor is required by paragraphs .31–.33 of section 240 to perform audit procedures responsive to risks related to management override of controls.

[9]Paragraph .48 of SAS No. 145. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A12 *Timing.* The auditor may perform tests of controls or substantive procedures at an interim date or at the period-end. The higher the risk of material misstatement, the more likely it is that the auditor may decide it is more effective to perform substantive procedures nearer to or at the period-end rather than at an earlier date or to perform audit procedures unannounced or at unpredictable times (for example, performing audit procedures at selected locations on an unannounced basis). This is particularly relevant when considering the response to the risks of fraud. For example, the auditor may conclude that, when the risks of intentional misstatement or manipulation have been identified, audit procedures to extend audit conclusions from the interim date to the period-end would not be effective.

.A13 On the other hand, performing audit procedures before the period-end may assist the auditor in identifying significant issues at an early stage of the audit and consequently resolving them with the assistance of management or developing an effective audit approach to address such issues.

.A14 In addition, certain audit procedures can be performed only at or after the period-end, for example,

- agreeing or reconciling information in the financial statements, including classes of transactions, account balances, and disclosures, with the underlying accounting records including, as applicable, those relevant accounting records that are outside the general and subsidiary ledgers;
- examining adjustments made during the course of preparing the financial statements; and
- procedures to respond to a risk that at the period-end the entity may have entered into improper sales contracts or transactions may not have been finalized.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

.A15 Further relevant factors that influence the auditor's consideration of when to perform audit procedures include

- the effectiveness of the control environment.
- when relevant information is available (for example, electronic files may subsequently be overwritten, or procedures to be observed may occur only at certain times).
- the nature of the risk (for example, if there is a risk of inflated revenues to meet earnings expectations by subsequent creation of false sales agreements, the auditor may examine contracts available on the date of the period-end).
- the period or date to which the audit evidence relates.
- the timing of the preparation of the financial statements, particularly for those disclosures that provide further explanation about amounts recorded in the financial statements.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

.A16 *Extent.* The extent of an audit procedure judged necessary is determined after considering the materiality, assessed risk, and degree of assurance the auditor plans to obtain. When a single purpose is met by a combination of procedures, the extent of each procedure may be considered separately. In general, the extent of audit procedures increases as the risks of material misstatement increase. For example, in response to the assessed risks of material misstatement due to fraud, increasing sample sizes or performing substantive analytical procedures at a more detailed level may be appropriate. However, increasing the extent of an audit procedure is effective only if the audit procedure itself is relevant to the specific risk.

.A17 The use of computer assisted audit techniques (CAATs) may enable more extensive testing of electronic transactions and account files, which may be useful when the auditor decides to modify the extent of testing (for example, in responding to the risks of material misstatement due to fraud). Such techniques can be used to select sample transactions from key electronic files, sort transactions with specific characteristics, or test an entire population instead of a sample.

.A18 *Considerations specific to governmental entities.* For the audits of governmental entities, the audit mandate and any other special auditing requirements may affect the auditor's consideration of the nature, timing, and extent of further audit procedures. For example, under some governmental audit requirements, the auditor is required to perform tests of controls, even if reliance is not planned.

.A19 *Considerations specific to smaller, less complex entities.* In the case of smaller entities, the auditor may not identify controls, or the extent to which their existence or operation have been documented by the entity may be limited. In such cases, it may be more efficient for the auditor to perform further audit procedures that are primarily substantive procedures. In some rare cases, however, the absence of controls or components of the system of internal control may make it impossible to obtain sufficient appropriate audit evidence. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Higher Assessments of Risk (Ref: par. .07b)

.A20 When obtaining more persuasive audit evidence because of a higher assessment of risk, the auditor may increase the quantity of the evidence or obtain evidence that is more relevant or reliable (for example by placing more emphasis on obtaining third party evidence or by obtaining corroborating evidence from a number of independent sources).

Tests of Controls

Designing and Performing Tests of Controls (Ref: par. .08)

.A21 Tests of controls are performed only on those controls that the auditor plans to test and has determined are suitably designed to prevent, or detect and correct, a material misstatement in a relevant assertion. If substantially different controls were used at different times during the period under audit, each is considered separately. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A22 Testing the operating effectiveness of controls is different from obtaining an understanding of and evaluating the design and implementation of controls. However, the same types of audit procedures are used. The auditor may, therefore, decide it is efficient to test the operating effectiveness of controls at the same time the auditor is evaluating their design and determining that they have been implemented.

.A23 Further, although some risk assessment procedures may not have been specifically designed as tests of controls, they may nevertheless provide audit evidence about the operating effectiveness of the controls and, consequently, serve as tests of controls. For example, the auditor's risk assessment procedures may have included the following:

- Inquiring about management's use of budgets
- Observing management's comparison of monthly budgeted and actual expenses
- Inspecting reports pertaining to the investigation of variances between budgeted and actual amounts

These audit procedures provide knowledge about the design of the entity's budgeting policies and whether they have been implemented but also may provide audit evidence about the effectiveness of the operation of budgeting policies in preventing, or detecting and correcting, material misstatements in the classification of expenses.

.A24 In addition, the auditor may design a test of controls to be performed concurrently with a test of details on the same transaction. Although the purpose of a test of controls is different from the purpose of a test of details, both may be accomplished concurrently by performing a test of controls and a test of details on the same transaction, which also is known as a dual purpose test. For example, the auditor may design and evaluate the results of a test to examine an invoice to determine whether it has been approved and to provide substantive audit evidence of a transaction. A dual purpose test is designed and evaluated by considering each purpose of the test separately.

.A25 In some cases, the auditor may find it impossible to design effective substantive procedures that, by themselves, provide sufficient appropriate audit evidence at the relevant assertion level.[10] This may occur when an entity conducts its business using IT and no documentation of transactions is produced or maintained, other than through the IT system. In such cases, paragraph .08*b* requires the auditor to perform tests of controls that address the risk for which substantive procedures alone cannot provide sufficient appropriate audit evidence. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A26 The auditor may consider testing the operating effectiveness of controls, if any, over the entity's preparation of information used by the auditor in performing substantive

[10] Paragraph .31 of section 315. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

analytical procedures in response to assessed risks. See section 520, *Analytical Procedures*, for further guidance.[11]

Audit Evidence and Intended Reliance (Ref: par. .09)

.A27 A higher level of assurance may be sought about the operating effectiveness of controls when the approach adopted consists primarily of tests of controls, in particular when it is not possible or practicable to obtain sufficient appropriate audit evidence only from substantive procedures.

Nature and Extent of Tests of Controls

.A28 *Other audit procedures in combination with inquiry (Ref: par. .10*a*).* Inquiry alone is not sufficient to test the operating effectiveness of controls. Accordingly, other audit procedures are performed in combination with inquiry. In this regard, inquiry combined with inspection, recalculation, or reperformance may provide more assurance than inquiry and observation because an observation is pertinent only at the point in time at which it is made.

.A29 The nature of the particular control influences the type of audit procedure necessary to obtain audit evidence about whether the control was operating effectively. For example, if operating effectiveness is evidenced by documentation, the auditor may decide to inspect such documentation to obtain audit evidence about operating effectiveness. For other controls, however, documentation may not be available or relevant. For example, documentation of operation may not exist for some factors in the control environment, such as assignment of authority and responsibility, or for some types of controls, such as automated controls. In such circumstances, audit evidence about operating effectiveness may be obtained through inquiry in combination with other audit procedures, such as observation or the use of CAATs. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A30 In some situations, particularly in smaller, less complex entities, an entity might use a third party to provide assistance with certain financial reporting functions. When assessing the competence of personnel responsible for an entity's financial reporting and associated controls, the auditor may take into account the combined competence of entity personnel and other parties that assist with functions related to financial reporting.

.A31 *Extent of tests of controls.* When more persuasive audit evidence is needed regarding the effectiveness of a control, it may be appropriate to increase the extent of testing of the control. In addition to the degree of reliance on controls, matters the auditor may consider in determining the extent of tests of controls include the following:

- The frequency of the performance of the control by the entity during the period

[11]Paragraph .A19 of section 520, *Analytical Procedures*. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

- The length of time during the audit period that the auditor is relying on the operating effectiveness of the control
- The expected rate of deviation from a control
- The relevance and reliability of the audit evidence to be obtained regarding the operating effectiveness of the control at the relevant assertion level
- The extent to which audit evidence is obtained from tests of other controls related to the relevant assertion

However, the rate of expected deviation may indicate that obtaining audit evidence from the performance of tests of controls will not be sufficient to reduce the control risk at the relevant assertion level. If the rate of expected deviation is expected to be high, tests of controls for a particular assertion may not provide sufficient appropriate audit evidence. Section 530, *Audit Sampling*, contains further guidance on the extent of testing.

.A32 Because of the inherent consistency of IT processing, it may not be necessary to increase the extent of testing of an automated control. An automated control can be expected to function consistently unless the IT application (including the tables, files, or other permanent data used by the IT application) is changed. Once the auditor determines that an automated control is functioning as intended (which could be done at the time the control is initially implemented or at some other date), the auditor may consider performing tests to determine that the control continues to function effectively. Such tests may include testing the general IT controls related to the IT application. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A33 Similarly, the auditor may perform tests of controls that address risks of material misstatement related to the integrity of the entity's data, or the accuracy and completeness of the entity's system-generated reports, or may determine they are necessary to address risks of material misstatement because substantive procedures alone cannot provide sufficient appropriate audit evidence. These tests of controls may include tests of general IT controls that address the matters in paragraph .10*a*. When this is the case, the auditor may not need to perform any further testing to obtain audit evidence about the matters in paragraph .10*a*. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A34 When the auditor determines that a general IT control is deficient, the auditor may consider the nature of the related risks arising from the use of IT that were identified in accordance with SAS No. 145[12] to provide the basis for the design of the auditor's additional procedures to address the assessed risk of material misstatement. Such procedures may address determining the following:

- Whether the related risks arising from the use of IT have occurred. For example, if users have unauthorized access to an IT application (but cannot access or modify the

[12]Paragraph .41 of SAS No. 145. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

system logs that track access), the auditor may decide to inspect the system logs to obtain audit evidence that those users did not access the IT application during the period.

- Whether there are any alternate or redundant general IT controls, or any other controls, that address the related risks arising from the use of IT. If so, the auditor may identify such controls (if not already identified) and, therefore, evaluate their design, determine that they have been implemented, and perform tests of their operating effectiveness. For example, if a general IT control related to user access is deficient, the entity may have an alternate control whereby IT management reviews end-user access reports on a timely basis. Circumstances in which an application control may address a risk arising from the use of IT may include when the information that may be affected by the general IT control deficiency can be reconciled to external sources (for example, a bank statement) or internal sources not affected by the general IT control deficiency (for example, a separate IT application or data source).

[Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A35 *Testing of indirect controls (Ref: par. .10*b*).* In some circumstances, it may be necessary to obtain audit evidence supporting the effective operation of indirect controls (for example, general IT controls). As explained in paragraphs .A33–.A34, general IT controls may have been identified in accordance with section 315 because of their support of the operating effectiveness of automated controls or due to their support in maintaining the integrity of information used in the entity's financial reporting, including system-generated reports. The requirement in paragraph .10*b* acknowledges that the auditor may have already tested certain indirect controls to address the matters in paragraph .10*a*. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

[.A36] [Paragraph renumbered and deleted by the issuance of SAS No. 145, October 2021.]

Timing of Tests of Controls

.A37 *Intended period of reliance (Ref: par. .11).* Audit evidence pertaining only to a point in time may be sufficient for the auditor's purpose (for example, when testing controls over the entity's physical inventory counting at the period-end). If, on the other hand, the auditor intends to rely on a control over a period, tests that are capable of providing audit evidence that the control operated effectively at relevant times during that period are appropriate. Such tests may include tests of controls in the entity's process to monitor the system of internal controls. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A38 *Using audit evidence obtained during an interim period (Ref: par. .12).* Relevant factors in determining what additional audit evidence to obtain about controls that were operating during the period remaining after an interim period, include the following:

- The significance of the assessed risks of material misstatement at the relevant assertion level
- The specific controls that were tested during the interim period and the results of those tests
- Significant changes to the controls since they were tested, including changes in the information system, processes, and personnel
- The degree to which audit evidence about the operating effectiveness of those controls was obtained
- The length of the remaining period
- The extent to which the auditor intends to reduce further substantive procedures based on the reliance of controls
- The effectiveness of the control environment

[Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A39 Additional audit evidence may be obtained, for example, by extending the testing of the operating effectiveness of controls over the remaining period or testing the entity's monitoring of controls. [Paragraph renumbered by the issuance of SAS No. 145,October 2021.]

.A40 *Using audit evidence obtained in previous audits (Ref: par. .13).* In certain circumstances, audit evidence obtained from previous audits may provide audit evidence, provided that the auditor has determined whether changes have occurred since the previous audit that may affect its relevance to the current audit and its reliability. For example, in performing a previous audit, the auditor may have determined that an automated control was functioning as intended. The auditor may obtain audit evidence to determine whether changes to the automated control have been made that affect its continued effective functioning through, for example, inquiries of management and the inspection of logs to indicate what controls have been changed. Consideration of audit evidence about these changes may support either increasing or decreasing the expected audit evidence to be obtained in the current period about the operating effectiveness of the controls. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A41 *Controls that have changed from previous audits (Ref: par. .14*a*).* Changes may affect the relevance and reliability of the audit evidence obtained in previous audits such that there may no longer be a basis for continued reliance. For example, changes in a system that enable an entity to receive a new report from the system probably do not affect the relevance of audit evidence from a previous audit; however, a change that causes data to be accumulated or calculated differently does affect it. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A42 *Controls that have not changed from previous audits (Ref: par. .14*b*).* The auditor's decision on whether to rely on audit evidence obtained in previous audits for controls that

- have not changed since they were last tested and
- are not controls that mitigate a significant risk

is a matter of professional judgment. In addition, the length of time between retesting such controls is also a matter of professional judgment but is required by paragraph .14*b* to be at least once in every third audit. (This guidance may not be appropriate for audits not performed at least on an annual basis.) [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A43 In general, the higher the risk of material misstatement or the greater the reliance on controls, the shorter the time period elapsed, if any, is likely to be. Factors that may decrease the period for retesting a control or result in not relying on audit evidence obtained in previous audits at all include the following:

- A deficient control environment
- A control deficiency in the entity's process to monitor the system of internal control
- A significant manual element to the identified controls
- Personnel changes that significantly affect the application of the control
- Changing circumstances that indicate the need for changes in the control
- Deficient general IT controls

[Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A44 When there are a number of controls for which the auditor intends to rely on audit evidence obtained in previous audits, testing some of those controls in each audit provides corroborating information about the continuing effectiveness of the control environment. This contributes to the auditor's decision about whether it is appropriate to rely on audit evidence obtained in previous audits. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

Evaluating the Operating Effectiveness of Controls (Ref: par. .16–.17)

.A45 In accordance with section 265, *Communicating Internal Control Related Matters Identified in an Audit*, the identification by the auditor of a material misstatement of the financial statements under audit in circumstances that indicate that the misstatement would not have been detected by the entity's internal control is an indicator of a material weakness.[13] [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A46 The concept of effectiveness of the operation of controls recognizes that some deviations in the way controls are applied by the entity may occur. Deviations from

[13]Paragraph .A11 of section 265, *Communicating Internal Control Related Matters Identified in an Audit*. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

prescribed controls may be caused by such factors as changes in key personnel, significant seasonal fluctuations in volume of transactions, and human error. The detected rate of deviation, in particular, in comparison with the expected rate, may indicate that the control cannot be relied on to reduce risk at the relevant assertion level to that assessed by the auditor. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

Substantive Procedures (Ref: par. .18)

.A47 Paragraph .18 requires the auditor to design and perform substantive procedures for all relevant assertions related to each significant class of transactions, account balance, and disclosure. For such classes of transactions, account balances, and disclosures, substantive procedures may have already been performed because paragraph .06 requires the auditor to design and perform further audit procedures that are responsive to the assessed risks of material misstatement at the relevant assertion level. Accordingly, substantive procedures are required to be designed and performed in accordance with paragraph .18 when the further audit procedures designed and performed in accordance with paragraph .06 for significant classes of transactions, account balances, or disclosures, designed and performed in accordance with paragraph .06, did not include substantive procedures. This requirement reflects the facts that (i) the auditor's assessment of risk is judgmental and may not identify all risks of material misstatement and (ii) inherent limitations to internal control exist, including management override. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]requires the auditor to design and perform substantive procedures for all relevant assertions related to each material class of transactions, account balance, and disclosure, irrespective of the assessed risks of material misstatement. This requirement reflects the facts that (i) the auditor's assessment of risk is judgmental and may not identify all risks of material misstatement and (ii) inherent limitations to internal control exist, including management override. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Nature and Extent of Substantive Procedures

.A48 Depending on the circumstances, the auditor may determine the following:

- Performing only substantive analytical procedures will be sufficient to reduce audit risk to an acceptably low level, such as, for example, when the auditor's assessment of risk is supported by audit evidence from tests of controls.
- Only tests of details are appropriate.
- A combination of substantive analytical procedures and tests of details are most responsive to the assessed risks.

[Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A49 Substantive analytical procedures are generally more applicable to large volumes of transactions that tend to be predictable over time. Section 520 addresses the application of analytical procedures during an audit. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A50 The assessment of the risk or the nature of the nature of the assertion is relevant to the design of tests of details. For example, tests of details related to the existence or occurrence assertion may involve selecting from items contained in a financial statement amount and obtaining audit evidence. On the other hand, tests of details related to the completeness assertion may involve selecting from items that are expected to be included in the relevant financial statement amount and investigating whether they are included. For example, the auditor might inspect subsequent cash disbursements and compare them with the recorded accounts payable to determine whether any purchases had been omitted from accounts payable. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A51 Because the assessment of the risks of material misstatement takes account of controls which the auditor plans to test, the extent of substantive procedures may need to be increased when the results from tests of controls are unsatisfactory. However, increasing the extent of an audit procedure is appropriate only if the audit procedure itself is relevant to the specific risk. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A52 In designing tests of details, the extent of testing is ordinarily thought of in terms of the sample size. However, other matters also are relevant, including whether it is more effective to use other selective means of testing. See paragraphs .A66–.A72. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

Considering Whether External Confirmation Procedures Are to Be Performed (Ref: par. .19–.20)

.A53 External confirmation procedures frequently may be relevant when addressing assertions associated with account balances and their elements but need not be restricted to these items. For example, the auditor may request external confirmation of the terms of agreements, contracts, or transactions between an entity and other parties. External confirmation procedures also may be performed to obtain audit evidence about the absence of certain conditions. For example, a request may specifically seek confirmation that no "side agreement" exists that may be relevant to an entity's revenue cut-off assertion. Other situations in which external confirmation procedures may provide audit evidence in responding to assessed risks of material misstatement include the following:

- Bank balances and other information relevant to banking relationships
- Inventories held by third parties at bonded warehouses for processing or on consignment
- Property title deeds held by lawyers or financiers for safe custody or as security
- Investments held for safekeeping by third parties or purchased from stockbrokers but not delivered at the balance sheet date

- Amounts due to lenders, including relevant terms of repayment and restrictive covenants
- Accounts payable balances and terms

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A54 Although external confirmations may provide audit evidence relating to certain assertions, some assertions exist for which external confirmations provide less persuasive audit evidence, for example, external confirmations provide less persuasive audit evidence relating to the recoverability of accounts receivable balances than they do of their existence. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A55 The auditor may determine that external confirmation procedures performed for one purpose provide an opportunity to obtain audit evidence about other matters. For example, confirmation requests for bank balances often include requests for information relevant to other financial statement assertions. Such considerations may influence the auditor's decision about whether to perform external confirmation procedures. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A56 Factors that may assist the auditor in determining whether external confirmation procedures are to be performed as substantive audit procedures include the following:

- The confirming party's knowledge of the subject matter. Responses may be more reliable if provided by a person at the confirming party who has the requisite knowledge about the information being confirmed.
- The ability or willingness of the intended confirming party to respond. For example, the confirming party
  - — may not accept responsibility for responding to a confirmation request,
  - — may consider responding too costly or time consuming,
  - — may have concerns about the potential legal liability resulting from responding,
  - — may account for transactions in different currencies, or
  - — may operate in an environment in which responding to confirmation requests is not a significant aspect of day-to-day operations.

  In such situations, confirming parties may not respond, may respond in a casual manner, or may attempt to restrict the reliance placed on the response.
- The objectivity of the intended confirming party. If the confirming party is a related party of the entity, responses to confirmation requests may be less reliable.

[Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A57 For purposes of this section, *accounts receivable* means

a. the entity's claims against customers that have arisen from the sale of goods or services in the normal course of business; and

b. a financial institution's loans.

[Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A58 External confirmation procedures may be ineffective when, based on prior years' audit experience or experience with similar entities

- response rates to properly designed confirmation requests will be inadequate; or
- responses are known or expected to be unreliable.

If the auditor has experienced poor response rates to properly designed confirmation requests in prior audits, the auditor may instead consider changing the manner in which the confirmation process is performed, with the objective of increasing the response rates, or may consider obtaining audit evidence from other sources. [Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

Substantive Procedures Related to the Financial Statement Closing Process (Ref: par. .21b)

.A59 The nature and also the extent of the auditor's substantive procedures related to the financial statement closing process, including testing the appropriateness of journal entries and other adjustments, depends on the nature and complexity of the entity's financial reporting process and the related risks of material misstatement. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

Substantive Procedures Responsive to Significant Risks (Ref: par. .22)

.A60 Paragraph .22 requires the auditor to perform substantive procedures that are specifically responsive to risks the auditor has determined to be significant risks. Because significant unusual transactions can affect the risks of material misstatement due to error or fraud, substantive procedures that take into account the types of potential misstatements that could result from significant unusual transactions may be necessary, including procedures performed pursuant to paragraph .32 of section 240. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135. Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

.A61 Audit evidence in the form of external confirmations received directly by the auditor from appropriate confirming parties may assist the auditor in obtaining audit evidence that the auditor requires to respond to significant risks of material misstatement, whether due to fraud or error. For example, if the auditor identifies that management is under pressure to meet earnings expectations, a risk may exist that management is inflating sales by improperly recognizing revenue related to sales agreements with terms that preclude revenue recognition or by invoicing sales before shipment. In these circumstances, the auditor may, for example, design external confirmation procedures not only to confirm outstanding amounts but also to confirm the details of the sales agreements, including date, any rights of return, and delivery terms. In addition, the auditor may find it effective to supplement such external confirmation procedures with inquiries of nonfinancial personnel in the entity regarding any changes in sales agreements and delivery terms. [Paragraph renumbered by the issuance of SAS No. 135, May 2019. As amended, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Timing of Substantive Procedures (Ref: par. .23–.24)

.A62 In most cases, audit evidence from a previous audit's substantive procedures provides little or no audit evidence for the current period. However, exceptions exist (for example, a legal opinion obtained in a previous audit related to the structure of a securitization to which no changes have occurred may be relevant in the current period). In such cases, it may be appropriate to use audit evidence from a previous audit's substantive procedures if that evidence and the related subject matter have not fundamentally changed and audit procedures have been performed during the current period to establish its continuing relevance. [Paragraph renumbered by the issuance of SAS No. 135, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A63 *Using audit evidence obtained during an interim period (Ref: par. .23).* In some circumstances, the auditor may determine that it is effective to perform substantive procedures at an interim date and compare and reconcile information concerning the balance at the period-end with the comparable information at the interim date to

a. identify amounts that appear unusual,

b. investigate any such amounts, and

c. perform substantive analytical procedures or tests of details to test the intervening period.

[Paragraph renumbered by the issuance of SAS No. 135, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A64 Performing substantive procedures at an interim date without undertaking additional procedures at a later date increases the risk that the auditor will not detect misstatements that may exist at the period-end. This risk increases as the remaining period is lengthened. Factors such as the following may influence whether to perform substantive procedures at an interim date:

- The effectiveness of the control environment and other controls
- The availability at a later date of information necessary for the auditor's procedures
- The purpose of the substantive procedure
- The assessed risk of material misstatement

- The nature of the class of transactions or account balance and relevant assertions
- The ability of the auditor to perform appropriate substantive procedures or substantive procedures combined with tests of controls to cover the remaining period in order to reduce the risk that misstatements that may exist at the period-end will not be detected

[Paragraph renumbered by the issuance of SAS No. 135, May 2019. Paragraph subsequently renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A65 In circumstances in which the auditor has identified risks of material misstatement due to fraud, the auditor's responses to address those risks may include changing the timing of audit procedures. For example, the auditor might conclude that, given the risks of intentional misstatement or manipulation, audit procedures to extend audit conclusions from an interim date to the period-end reporting date would not be effective. In such circumstances, the auditor might conclude that substantive procedures performed at or near the end of the reporting period best address an identified risk of material misstatement due to fraud. [Paragraph renumbered by the issuance of SAS No. 135, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A66 Factors such as the following may influence whether to perform substantive analytical procedures with respect to the period between the interim date and the period-end:

- Whether the period-end balances of the particular classes of transactions or account balances are reasonably predictable with respect to amount, relative significance, and composition
- Whether the entity's procedures for analyzing and adjusting such classes of transactions or account balances at interim dates and establishing proper accounting cutoffs are appropriate
- Whether the information system will provide information concerning the balances at the period-end and the transactions in the remaining period that is sufficient to permit investigation of the following:
  - — Significant unusual transactions or entries (including those at or near the period-end)
  - — Other causes of significant fluctuations or expected fluctuations that did not occur
  - — Changes in the composition of the classes of transactions or account balances

[Paragraph renumbered by the issuance of SAS No. 135, May 2019. Paragraph subsequently renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A67 *Misstatements detected at an interim date (Ref: par. .24).* When the auditor concludes that the planned nature, timing, or extent of substantive procedures covering the remaining period need to be modified as a result of unexpected misstatements detected at an interim date, such modification may include extending or repeating, at the period-end, the procedures performed at the interim date. [Paragraph renumbered by the issuance of SAS No. 135, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Selecting Items for Testing to Obtain Audit Evidence (Ref: par. .25)

.A68 An effective test provides appropriate audit evidence to the extent that it will be sufficient for the auditor's purpose when taken with other audit evidence obtained or to be obtained. In selecting items for testing, the auditor is required by section 500 to consider the relevance and reliability of information to be used as audit evidence;[14] the other aspect of effectiveness (extent) is an important consideration in selecting items to test. The means available to the auditor for selecting items for testing are

a. selecting all items (100 percent examination),

b. selecting specific items, and

c. audit sampling.

[Paragraph renumbered by the issuance of SAS No. 135, May 2019. As amended, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A69 The application of any one or combination of these means may be appropriate depending on the particular circumstances (for example, the risks of material misstatement related to the assertion being tested and the practicality and efficiency of the different means). [Paragraph renumbered by the issuance of SAS No. 135, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Selecting All Items

.A70 The auditor may decide that it will be most appropriate to examine the entire population of items that make up a class of transactions or account balance (or a stratum within that population). A 100 percent examination is unlikely in the case of tests of controls; however, it may be more common for tests of details. A 100 percent examination may be appropriate when, for example

- the population constitutes a small number of large value items,
- a significant risk exists and other means do not provide sufficient appropriate audit evidence, or
- the repetitive nature of a calculation or other process performed automatically by an information system makes a 100 percent examination cost effective.

---

[14]Paragraph .07 of section 500. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

[Paragraph renumbered by the issuance of SAS No. 135, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Selecting Specific Items

.A71 The auditor may decide to select specific items from a population. In making this decision, factors that may be relevant include the auditor's understanding of the entity, the assessed risks of material misstatement, and the characteristics of the population being tested. The judgmental selection of specific items is subject to nonsampling risk. Specific items selected may include

- high value or key items. The auditor may decide to select specific items within a population because they are of high value or exhibit some other characteristic (for example, items that are suspicious, unusual, particularly risk prone, or have a history of error).
- all items over a certain amount. The auditor may decide to examine items whose recorded values exceed a certain amount in order to verify a large proportion of the total amount of a class of transactions or account balance.
- items to obtain information. The auditor may examine items to obtain information about matters such as the nature of the entity or the nature of transactions.

[Paragraph renumbered by the issuance of SAS No. 135, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A72 Although selective examination of specific items from a class of transactions or account balance often will be an efficient means of obtaining audit evidence, it does not constitute audit sampling. Consequently, the results of audit procedures applied to items selected in this way cannot be projected to the entire population; furthermore, selective examination of specific items does not, by itself, provide sufficient appropriate audit evidence concerning the remainder of the population. [Paragraph renumbered by the issuance of SAS No. 135, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Audit Sampling

.A73 Audit sampling is designed to enable conclusions to be drawn about an entire population on the basis of testing a sample drawn from the population. Audit sampling is discussed in section 530. [Paragraph renumbered by the issuance of SAS No. 135, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A74 Valid conclusions ordinarily may be drawn using sampling approaches. However, if the sample size is too small, the sampling approach or the method of selection is not appropriate to achieve the specific audit objective or exceptions are not appropriately followed up, an unacceptable risk will exist that the auditor's conclusion based on a sample may be different from the conclusion reached if the entire population was subjected to the same audit procedure. Section 530 addresses planning, performing, and evaluating audit samples.

[Paragraph renumbered by the issuance of SAS No. 135, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Adequacy of Presentation of the Financial Statements (Ref: par. .26)

.A75 Evaluating the appropriate presentation, structure, and content of the financial statements includes, for example, consideration of the terminology used as required by the applicable financial reporting framework, the level of detail provided, the aggregation and disaggregation of amounts, and the bases of amounts set forth. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. Paragraph renumbered by the issuance of SAS No. 135, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

Evaluating the Sufficiency and Appropriateness of Audit Evidence (Ref: par. .27–.29)

.A76 An audit of financial statements is a cumulative and iterative process. As the auditor performs planned audit procedures, the audit evidence obtained may cause the auditor to modify the nature, timing, or extent of other planned audit procedures. Information may come to the auditor's attention that differs significantly from the information on which the risk assessments were based. For example

- the extent of misstatements that the auditor detects by performing substantive procedures may alter the auditor's professional judgment about the risk assessments and indicate a significant deficiency or material weakness in internal control.
- the auditor may become aware of discrepancies in accounting records or conflicting or missing evidence.
- analytical procedures performed at the overall review stage of the audit may indicate a previously unrecognized risk of material misstatement.

In such circumstances, the auditor may need to reevaluate the planned audit procedures, based on the revised consideration of assessed risks of material misstatement and the effect on the significant classes of transactions, account balances, or disclosures and their relevant assertions. SAS No. 145 contains further guidance on revising the auditor's risk assessment.[15] [Paragraph renumbered by the issuance of SAS No. 135, May 2019. Paragraph subsequently renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A77 By performing audit procedures, the auditor may determine that the accounting records are internally consistent and agree to the financial statements. However, accounting records alone do not provide sufficient appropriate audit evidence on which to base an audit opinion on the financial statements. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. Paragraph renumbered by the issuance of SAS No. 145, October 2021.]

---

[15] Paragraph .32 of section 315. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

.A78 The auditor cannot assume that an instance of fraud or error is an isolated occurrence. Therefore, the consideration of how the detection of a misstatement affects the assessed risks of material misstatement is important in determining whether the assessment remains appropriate. [Paragraph renumbered by the issuance of SAS No. 135, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 145, October 2021.]

.A79 The auditor's conclusion of whether sufficient appropriate audit evidence has been obtained is both at the relevant assertion level as well as the financial statement level. Section 500 enables the auditor to evaluate the results of audit procedures to inform the auditor's overall conclusion about whether sufficient appropriate audit evidence has been obtained as required by paragraph .28. The auditor's professional judgment about what constitutes sufficient appropriate audit evidence is influenced by the following additional factors:

- Significance of the potential misstatement in the relevant assertion and the likelihood of its having a material effect, individually or aggregated with other potential misstatements, on the financial statements (see section 450, *Evaluation of Misstatements Identified During the Audit*)
- Effectiveness of management's responses and controls to address the risks
- Experience gained during previous audits with respect to similar potential misstatements
- Whether the audit procedures that were performed identified specific instances of fraud or error
- Understanding of the entity and its environment, the applicable financial reporting framework, and the entity's system of internal control

[Paragraph renumbered by the issuance of SAS No. 135, May 2019. Paragraph subsequently renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. Paragraph subsequently renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Documentation (Ref: par. .30)

.A80 The form and extent of audit documentation is a matter of professional judgment and is influenced by the nature, size, and complexity of the entity; system of internal control of the entity; availability of information from the entity; and the audit methodology and technology used in the audit. [Paragraph renumbered by the issuance of SAS No. 135, May 2019. Paragraph subsequently renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

AU-C Section 402

Audit Considerations Relating to an Entity Using a Service Organization

Source: SAS No. 122; SAS No. 128; SAS No. 130; SAS No. 145.

See section 9402 for interpretations of this section.

Effective for audits of financial statements for periods ending on or after December 15, 2012, unless otherwise indicated.

Note

In March 2023, the ASB issued SAS No. 149, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors and Audits of Referred-to Auditors)*, which contains amendments to this section.

The amendments are effective for audits of financial statements for periods ending on or after December 15, 2026, and can be viewed in appendix C of section 600 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the user auditor's responsibility for obtaining sufficient appropriate audit evidence in an audit of the financial statements of a user entity that uses one or more service organizations. Specifically, it expands on how the user auditor applies section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, and section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, in obtaining an understanding of the user entity, including the entity's system of internal control relevant to the preparation of the financial statements, sufficient to identify and assess the risks of material misstatement and in designing and performing further audit procedures responsive to those risks. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.02 Many entities outsource aspects of their business activities to organizations that provide services ranging from performing a specific task under the direction of the entity to replacing entire business units or functions of the entity. Many of the services provided by such organizations are integral to the entity's business operations; however, not all of those services are relevant to the audit.

.03 Services provided by a service organization are relevant to the audit of a user entity's financial statements when those services and the controls over them affect the user entity's information system relevant to the preparation of the financial statements. Most controls at the service organization are likely to be part of the user entity's information system relevant to the preparation of the financial statements or other related controls, such as controls over the safeguarding of assets. A service organization's services are part of a user entity's information system if these services affect any of the following:

a. How information relating to significant classes of transactions, account balances, and disclosures flows through the user entity's information system, whether manually or using IT, and whether obtained from within or outside the general ledger and subsidiary ledgers. This includes when the service organization affects the following:
   i. How transactions of the user entity are initiated and how information about them is recorded, processed, corrected as necessary, and incorporated in the general ledger and reported in the financial statements
   ii. How information about events or conditions, other than transactions, is captured, processed, and disclosed by the user entity in the financial statements
b. The accounting records, specific accounts in the user entity's financial statements, and other supporting records relating to the flows of information in paragraph .03*a*.
c. The financial reporting process used to prepare the user entity's financial statements from the records described in paragraph .03b, including as it relates to disclosures and accounting estimates relating to significant classes of transactions, account balances, and disclosures
d. The entity's IT environment relevant to preceding subparagraphs (a)–(c)

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.04 The nature and extent of work to be performed by the user auditor regarding the services provided by a service organization depend on the nature and significance of those services to the user entity and the relevance of those services to the audit.

.05 This section does not apply to services that are limited to processing an entity's transactions that are specifically authorized by the entity, such as the processing of checking account transactions by a bank or the processing of securities transactions by a broker (that is, when the user entity retains responsibility for authorizing the transactions and maintaining the related accountability). In addition, this section does not apply to the audit of transactions arising from an entity that holds a proprietary financial interest in another entity, such as a partnership, corporation, or joint venture, when the partnership, corporation, or joint venture performs no processing on behalf of the entity.

Effective Date

.06 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objectives

.07 The objectives of the user auditor, when the user entity uses the services of a service organization, are to

a. obtain an understanding of the nature and significance of the services provided by the service organization and their effect on the user entity's system of internal control sufficient to provide an appropriate basis for the identification and assessment of the risks of material misstatement.

b. design and perform audit procedures responsive to those risks.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Definitions

.08 For purposes of generally accepted auditing standards, the following terms have the meanings attributed as follows:

Complementary user entity controls. Controls that management of the service organization assumes, in the design of its service, will be implemented by user entities and are necessary to achieve the control objectives stated in management's description of the service organization's system.

Management's description of a service organization's system and a service auditor's report on that description and on the suitability of the design of controls (referred to in this section as a *type 1 report*)**.** A report that comprises the following:

a. Management's description of the service organization's system

b. A written assertion by management of the service organization about whether, in all material respects, and based on suitable criteria

   i. management's description of the service organization's system fairly presents the service organization's system that was designed and implemented as of a specified date

   ii. the controls related to the control objectives stated in management's description of the service organization's system were suitably designed to achieve those control objectives as of the specified date

c. A service auditor's report that expresses an opinion on the matters in *b*(i–ii)

Management's description of a service organization's system and a service auditor's report on that description and on the suitability of the design and operating effectiveness of controls (referred to in this section as a *type 2 report*)**.** A report that comprises the following:

a. Management's description of the service organization's system

b. A written assertion by management of the service organization about whether in all material respects and, based on suitable criteria

   i. management's description of the service organization's system fairly presents the service organization's system that was designed and implemented throughout the specified period

   ii. the controls related to the control objectives stated in management's description of the service organization's system were suitably designed throughout the specified period to achieve those control objectives

   iii. the controls related to the control objectives stated in management's description of the service organization's system operated effectively throughout the specified period to achieve those control objectives

c. A service auditor's report that

   i. expresses an opinion on the matters in *b*(i–iii)

   ii. includes a description of the service auditor's tests of controls and the results thereof

Service auditor. A practitioner who reports on controls at a service organization.

Service organization. An organization or segment of an organization that provides services to user entities that are relevant to those user entities' internal control over financial reporting.

Service organization's system. The policies and procedures designed, implemented, and documented by management of the service organization to provide user entities with the services covered by the service auditor's report. Management's description of the service organization's system identifies the services covered, the period to which the description relates (or in the case of a type 1 report, the date to which the description relates), the control objectives specified by management or an outside party, the party specifying the control objectives (if not specified by management), and the related controls.

Subservice organization. A service organization used by another service organization to perform some of the services provided to user entities that are relevant to those user entities' internal control over financial reporting. (Ref: par. .A20)

User auditor. An auditor who audits and reports on the financial statements of a user entity.

User entity. An entity that uses a service organization and whose financial statements are being audited.

[Revised, December 2016, to reflect conforming changes necessary to reflect the issuance of SSAE No. 18.]

Requirements

Obtaining an Understanding of the Services Provided by a Service Organization, Including Internal Control

.09 When obtaining an understanding of the user entity in accordance with section 315, the user auditor should obtain an understanding of how the user entity uses the services of a service organization in the user entity's operations, including the following:[1] (Ref: par. .A1–.A2)

a. The nature of the services provided by the service organization and the significance of those services to the user entity, including their effect on the user entity's internal control (Ref: par. .A3–.A5)

b. The nature and materiality of the transactions processed or accounts or financial reporting processes affected by the service organization (Ref: par. .A6)

c. The degree of interaction between the activities of the service organization and those of the user entity (Ref: par. .A7)

d. The nature of the relationship between the user entity and the service organization, including the relevant contractual terms for the activities undertaken by the service organization (Ref: par. .A8–.A11)

.10 When obtaining an understanding of the entity's system of internal control in accordance with section 315,[2] the user auditor should identify controls in the control activities component at the user entity from those that relate to the services provided by the service organization, including those that are applied to the transactions processed by the service organization, and evaluate their design and determine whether they have been implemented.[3] (Ref: par. .A12–.A14) [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.11 The user auditor should determine whether a sufficient understanding of the nature and significance of the services provided by the service organization and their effect on the user entity's system of internal control has been obtained to provide an appropriate basis for the identification and assessment of the risks of material misstatement. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

---

[1]Paragraph .12 of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

[2]Paragraph .27 of section 315. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

[3]Paragraph .29 of section 315. [Footnote renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.12 If the user auditor is unable to obtain a sufficient understanding from the user entity, the user auditor should obtain that understanding from one or more of the following procedures:

a. Obtaining and reading a type 1 or type 2 report, if available

b. Contacting the service organization, through the user entity, to obtain specific information

c. Visiting the service organization and performing procedures that will provide the necessary information about the controls at the service organization that address risks of material misstatement at the assertion level in accordance with section 315[4]

d. Using another auditor to perform procedures that will provide the necessary information about the controls at the service organization that address risks of material misstatement at the assertion level in accordance with section 315[5] (Ref: par. .A15–.A20)

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Using a Type 1 or Type 2 Report to Support the User Auditor's Understanding of the Service Organization

.13 In determining the sufficiency and appropriateness of the audit evidence provided by a type 1 or type 2 report, the user auditor should be satisfied regarding the following:

a. The service auditor's professional competence and independence from the service organization

b. The adequacy of the standards under which the type 1 or type 2 report was issued (Ref: par. .A21–.A23)

[As amended, effective for audits for periods ending on or after December 15, 2016, by SAS No. 130.]

.14 If the user auditor plans to use a type 1 or type 2 report as audit evidence to support the user auditor's understanding about the design and implementation of identified controls at the service organization, the user auditor should

a. evaluate whether the type 1 report is as of a date, or in the case of a type 2 report, is for a period that is appropriate for the user auditor's purposes;

---

[4]Paragraphs .27 and .29*b* of section 315. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

[5]Paragraphs .35–.37 of section 315. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

b. evaluate the sufficiency and appropriateness of the evidence provided by the report for the understanding of the identified controls at the service organization; and

c. determine whether complementary user entity controls identified by the service organization address the risks of material misstatement relating to the relevant assertions in the user entity's financial statements and, if so, obtain an understanding of whether the user entity has designed and implemented such controls. (Ref: par. .A24–.A25)

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Responding to the Assessed Risks of Material Misstatement

.15 In responding to assessed risks in accordance with section 330, the user auditor should

a. determine whether sufficient appropriate audit evidence concerning the relevant financial statement assertions is available from records held at the user entity and, if not,

b. perform further audit procedures to obtain sufficient appropriate audit evidence or use another auditor to perform those procedures at the service organization on the user auditor's behalf. (Ref: par. .A26–.A30)

Tests of Controls

.16 When the user auditor's risk assessment includes an expectation that controls at the service organization are operating effectively, the user auditor should obtain audit evidence about the operating effectiveness of those controls from one or more of the following procedures:

a. Obtaining and reading a type 2 report, if available

b. Performing appropriate tests of controls at the service organization

c. Using another auditor to perform tests of controls at the service organization on behalf of the user auditor (Ref: par. .A31–.A32)

Using a Type 2 Report as Audit Evidence That Controls at the Service Organization Are Operating Effectively

.17 If, in accordance with paragraph .16*a*, the user auditor plans to use a type 2 report as audit evidence that identified controls at the service organization are operating effectively, the user auditor should determine whether the service auditor's report provides sufficient appropriate audit evidence about the effectiveness of the controls to support the user auditor's risk assessment by

a. evaluating whether the type 2 report is for a period that is appropriate for the user auditor's purposes;

b. determining whether complementary user entity controls identified by the service organization address the risks of material misstatement relating to the relevant assertions in the user entity's financial statements and, if so, obtaining an understanding of whether the user entity has designed and implemented such controls and, if so, testing their operating effectiveness;

c. evaluating the adequacy of the time period covered by the tests of controls and the time elapsed since the performance of the tests of controls; and

d. evaluating whether the tests of controls performed by the service auditor and the results thereof, as described in the service auditor's report, are relevant to the assertions in the user entity's financial statements and provide sufficient appropriate audit evidence to support the user auditor's risk assessment. (Ref: par. .A33–.A41)

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Type 1 and Type 2 Reports That Exclude the Services of a Subservice Organization

.18 If the user auditor plans to use a type 1 or a type 2 report that excludes the services provided by a subservice organization and those services are relevant to the audit of the user entity's financial statements, the user auditor should apply the requirements of this section with respect to the services provided by the subservice organization. (Ref: par. .A42)

Fraud, Noncompliance With Laws and Regulations, and Uncorrected Misstatements Related to Activities at the Service Organization

.19 The user auditor should inquire of management of the user entity about whether the service organization has reported to the user entity, or whether the user entity is otherwise aware of, any fraud, noncompliance with laws and regulations, or uncorrected misstatements affecting the financial statements of the user entity. The user auditor should evaluate how such matters, if any, affect the nature, timing, and extent of the user auditor's further audit procedures, including the effect on the user auditor's conclusions and user auditor's report. (Ref: par. .A43)

Reporting by the User Auditor

.20 The user auditor should modify the opinion in the user auditor's report in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*, if the user auditor is unable to obtain sufficient appropriate audit evidence regarding the services provided by the service organization relevant to the audit of the user entity's financial statements. (Ref: par. .A44)

.21 The user auditor should not refer to the work of a service auditor in the user auditor's report containing an unmodified opinion. (Ref: par. .A45)

.22 If reference to the work of a service auditor is relevant to an understanding of a modification of the user auditor's opinion, the user auditor's report should indicate that such reference does not diminish the user auditor's responsibility for that opinion. (Ref: par. .A45)

Application and Other Explanatory Material

Obtaining an Understanding of the Services Provided by a Service Organization, Including Internal Control

Sources of Information (Ref: par. .09)

.A1 Information about the nature of the services provided by a service organization may be available from a wide variety of sources, such as the following:

- User manuals
- System overviews
- Technical manuals
- The contract or service level agreement between the user entity and the service organization
- Reports by service organizations, the internal audit function, or regulatory authorities on controls at the service organization
- Reports by the service auditor, if available

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2014, by SAS No. 128.]

.A2 Knowledge obtained through the user auditor's experience with the service organization—for example, through experience with other audit engagements—may also be helpful in obtaining an understanding of the nature of the services provided by the service organization. This may be particularly helpful if the services and controls at the service organization over those services are highly standardized.

Nature of the Services Provided by the Service Organization (Ref: par. .09a)

.A3 A user entity may use a service organization, such as one that processes transactions and maintains the related accountability for the user entity or records transactions and processes related data. Service organizations that provide such services include, for example, bank trust departments that invest and service assets for employee benefit plans or for others, mortgage servicers that service mortgages for others, and application service providers that provide packaged software applications and a technology environment that enables customers to process financial and operational transactions.

.A4 Examples of services provided by service organizations that may be relevant to the audit include the following:

- Maintenance of the user entity's accounting records
- Management of the user entity's assets
- Initiating, authorizing, recording, or processing transactions as an agent of the user entity

Considerations Specific to Smaller Entities

.A5 Smaller entities may use external bookkeeping services ranging from the processing of certain transactions (for example, payment of payroll taxes) and maintenance of their accounting records to the preparation of their financial statements. The use of such a service organization for the preparation of its financial statements does not relieve management of the smaller entity and, when appropriate, those charged with governance of their responsibilities for the financial statements.[6]

Nature and Materiality of Transactions Processed by the Service Organization (Ref: par. .09b)

.A6 A service organization may establish policies and procedures (controls) that affect the user entity's internal control. These controls are at least in part physically and operationally separate from the user entity. The significance of the controls at the service organization to the user entity's internal control depends on the nature of the services provided by the service organization, including the nature and materiality of the transactions it processes for the user entity. In certain situations, the transactions processed and the accounts affected by the service organization may not appear to be material to the user entity's financial statements, but the nature of the transactions processed may be significant and the user auditor may determine that an understanding of controls over the processing of those transactions is necessary in the circumstances.

The Degree of Interaction Between the Activities of the Service Organization and the User Entity (Ref: par. .09c)

.A7 The significance of the controls at the service organization to the user entity's internal control also depends on the degree of interaction between the service organization's activities and those of the user entity. The degree of interaction refers to the extent to which a user entity is able to and elects to implement effective controls over the processing performed by the service organization. For example, a high degree of interaction exists between the activities of the user entity and those at the service organization when the user entity authorizes transactions and the service organization processes and accounts for those transactions. In these circumstances, it may be practicable for the user entity to implement effective controls over those transactions. On the other hand, when the service organization initiates or initially records, processes, and accounts for the user entity's transactions, a lower degree of interaction exists between the two organizations. In these circumstances, the

[6]Paragraph .05 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

user entity may be unable to, or may elect not to, implement effective controls over these transactions at the user entity and may rely on controls at the service organization.

Nature of the Relationship Between the User Entity and the Service Organization (Ref: par. .09d)

.A8 The contract or service level agreement between the user entity and the service organization may provide for matters such as the following:

- The information to be provided to the user entity and the responsibilities for initiating transactions relating to the activities undertaken by the service organization
- Complying with the requirements of regulatory bodies concerning the form of records to be maintained or access to them
- The indemnification, if any, to be provided to the user entity in the event of a performance failure
- Whether the service organization will provide a report on its controls and, if so, whether such a report will be a type 1 or type 2 report
- Whether the user auditor has rights of access to the accounting records of the user entity maintained by the service organization and other information necessary for the conduct of the audit
- Whether the agreement allows for direct communication between the user auditor and the service auditor

.A9 A direct relationship exists between the service organization and the user entity when the user entity enters into an agreement with the service organization, and between the service organization and the service auditor when the service organization engages the service auditor. These relationships do not create a direct relationship between the user auditor and the service auditor.

.A10 Communications between the user auditor and the service auditor usually are conducted through the user entity and the service organization. A user auditor may request through the user entity that a service auditor perform procedures for the benefit of the user auditor. For example, a service auditor may be engaged by the service organization to perform an agreed-upon procedures engagement related to testing controls at a service organization or performing procedures related to a user entity's transactions or balances maintained by the service organization. AT-C section 215, *Agreed-Upon Procedures Engagements*, establishes standards and provides guidance for agreed-upon procedures engagements. [Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Considerations Specific to Governmental Entities

.A11 For governmental entities, the auditor may be required to perform audit procedures with respect to the entity's compliance with laws and regulations. Such required procedures may include obtaining an understanding of internal control over compliance, performing tests of controls over compliance, and performing tests of compliance. Consequently, auditors of governmental entities that use a service organization may determine that it is appropriate to request, through the governmental entity, that the service auditor perform specified compliance-related audit procedures with respect to services provided by the service organization.[7]

Understanding the Controls Relating to Services Provided by the Service Organization (Ref: par. .10)

.A12 The user entity may establish controls over the service organization's services that may be tested by the user auditor and that may enable the user auditor to conclude that the user entity's controls are operating effectively for some or all of the related assertions, regardless of the controls in place at the service organization. If a user entity, for example, uses a service organization to process its payroll transactions, the user entity may establish controls over the submission and receipt of payroll information that could prevent, or detect and correct, material misstatements. These controls may include the following:

- Comparing the data submitted to the service organization with reports of information received from the service organization after the data has been processed
- Recomputing a sample of the payroll amounts for clerical accuracy and reviewing the total amount of the payroll for reasonableness

.A13 In this situation, the user auditor may perform tests of the user entity's controls over payroll processing that would provide a basis for the user auditor to conclude that the user entity's controls are operating effectively for the assertions related to payroll transactions.

.A14 As noted in section 315, for some risks the auditor may judge that it is not possible or practicable to obtain sufficient appropriate audit evidence only from substantive procedures.[8] Such risks may relate to the inaccurate or incomplete recording of routine and significant classes of transactions and account balances that may involve highly automated processing with little or no manual intervention. Risks related to such automated processing may be particularly present when the user entity uses a service organization. In such cases, the user auditor is required to identify controls over such risks and to evaluate the design of such controls and determine whether they have been implemented in accordance with paragraph .10 of this section. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Further Procedures When a Sufficient Understanding Cannot Be Obtained From the User Entity (Ref: par. .12)

.A15 The user auditor's decision regarding which procedure, individually or in combination, in paragraph .12 to undertake in order to obtain the information necessary to provide a basis for the identification and assessment of the risks of material misstatement regarding

[7]Section 935, *Compliance Audits*, addresses audits of an entity's compliance.

[8]Paragraph .31 of section 315. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

the user entity's use of the service organization, may be influenced by such matters as the following:

- The size of both the user entity and the service organization
- The complexity of the transactions at the user entity and the complexity of the services provided by the service organization
- The location of the service organization (for example, the user auditor may decide to use another auditor to perform procedures at the service organization on the user auditor's behalf if the service organization is in a remote location)
- Whether the procedure(s) is expected to effectively provide the user auditor with sufficient appropriate audit evidence
- The nature of the relationship between the user entity and the service organization

.A16 A service organization may engage a service auditor to report on the description and design of its controls (type 1 report) or on the description and design of its controls and their operating effectiveness (type 2 report). Type 1 or type 2 reports may be issued under AT-C section 320, *Reporting on an Examination of Controls at a Service Organization Relevant to User Entities' Internal Control Over Financial Reporting*, or under standards promulgated by an authorized or recognized standards-setting organization (for example, the International Auditing and Assurance Standards Board). [Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.A17 The availability of a type 1 or type 2 report generally will depend on whether the contract between the service organization and the user entity includes the provision of such a report by the service organization. A service organization may also elect, for practical reasons, to make a type 1 or type 2 report available to the user entities. However, in some cases, a type 1 or type 2 report may not be available to user entities.

.A18 In some circumstances, a user entity may outsource one or more significant business units or functions, such as its entire tax planning and compliance functions, finance and accounting functions, or the controllership function to one or more service organizations. As a report on controls at the service organization may not be available in these circumstances, visiting the service organization may be the most effective procedure for the user auditor to gain an understanding of controls at the service organization because there is likely to be direct interaction of management of the user entity with management of the service organization.

.A19 Another auditor may be used to perform procedures that will provide the necessary information about the controls at the service organization related to services provided to the user entity. If a type 1 or type 2 report has been issued, the user auditor may use the service auditor to perform these procedures as the service auditor has an existing relationship with the service organization. The user auditor using the work of another auditor may find the guidance in section 600A, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*, useful as it relates to understanding another auditor (including that auditor's independence and professional competence); involvement in the work of another auditor in planning the nature, extent, and timing of such work; and in evaluating the sufficiency and appropriateness of the audit evidence obtained.[9] [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A20 A user entity may use a service organization that in turn uses a subservice organization to provide some of the services provided to a user entity that are relevant to those user entities' internal control over financial reporting. The subservice organization may be a separate entity from the service organization or may be related to the service organization. A user auditor may need to consider controls at the subservice organization. In situations in which one or more subservice organizations are used, the interaction between the activities of the user entity and those of the service organization is expanded to include the interaction between the user entity, the service organization, and the subservice organizations. The degree of this interaction as well as the nature and materiality of the transactions processed by the service organization and the subservice organizations are the most important factors for the user auditor to consider in determining the significance of the service organization's and subservice organization's controls to the user entity's controls. (Ref: par. .08)

Using a Type 1 or Type 2 Report to Support the User Auditor's Understanding of the Service Organization (Ref: par. .13–.14)

.A21 The user auditor may make inquiries about the service auditor to the service auditor's professional organization or other practitioners and inquire whether the service auditor is subject to regulatory oversight. The service auditor may be practicing in a jurisdiction in which different standards are followed with respect to reports on controls at a service organization. In such a situation, the user auditor may obtain information about the standards used by the service auditor from the standards-setting organization in that jurisdiction.

.A22 Unless evidence to the contrary comes to the user auditor's attention, a service auditor's report implies that the service auditor is independent of the service organization. However, a service auditor need not be independent of the user entities.

.A23 Standards promulgated by a body designated by Council of the AICPA pursuant to the "Compliance With Standards Rule" (ET sec. 1.310.001) of the AICPA Code of Professional Conduct are presumed to be adequate. Although the International Auditing and Assurance Standards Board (IAASB) is not such a body, AT-C section 320 may be helpful when the service auditor's report is issued in accordance with International Standard on Assurance Engagements 3402, *Assurance Reports on Controls at a Service Organization*, promulgated by the IAASB.[10] [Paragraph added, effective for audits for periods ending on or after December 15, 2016, by SAS No. 130. Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

---

[9]Paragraphs .02 and .22 of section 600A, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

[10][Footnote deleted, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Footnote renumbered by the issuance of SAS No. 145, October 2021.]

.A24 A type 1 or type 2 report, along with information about the user entity, may assist the user auditor in obtaining an understanding of the following:

a. The controls at the service organization that may affect the processing of the user entity's transactions, including the use of subservice organizations

b. The flow of significant transactions through the service organization's system to determine the points in the transaction flow where material misstatements in the user entity's financial statements could occur

c. The control objectives stated in the description of the service organization's system that are relevant to the user entity's financial statement assertions

d. Whether controls at the service organization are suitably designed and implemented to prevent, or detect and correct, processing errors that could result in material misstatements in the user entity's financial statements

A type 1 or type 2 report may assist the user auditor in obtaining a sufficient understanding to identify and assess the risks of material misstatement of the user entity's financial statements. A type 1 report, however, does not provide any evidence of the operating effectiveness of the controls. [Paragraph renumbered by the issuance of SAS No. 130, December 2016. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A25 A type 1 report that is as of a date, or a type 2 report that is for a period outside of the reporting period of a user entity, may assist the user auditor in obtaining a preliminary understanding of the controls implemented at the service organization if the report is supplemented by additional current information from other sources. If the description of the service organization's system is as of a date or for a period that precedes the beginning of the period under audit, the user auditor may perform procedures to update the information in a type 1 or type 2 report, such as the following:

- Discussing changes at the service organization with user entity personnel who would be in a position to know of such changes
- Reviewing current documentation and correspondence issued by the service organization
- Discussing the changes with service organization personnel

[Paragraph renumbered by the issuance of SAS No. 130, December 2016.]

Responding to the Assessed Risks of Material Misstatement (Ref: par. .15)

.A26 Whether the use of a service organization increases a user entity's risk of material misstatement depends on the nature of the services provided and the controls over these services; in some cases, the use of a service organization may decrease a user entity's risk of material misstatement, particularly if the user entity itself does not possess the expertise necessary to undertake particular activities, such as initiating, processing, and recording transactions, or does not have adequate resources (for example, an IT system). [Paragraph renumbered by the issuance of SAS No. 130, December 2016.]

.A27 When the service organization maintains material elements of the accounting records of the user entity, direct access to those records may be necessary for the user auditor to obtain sufficient appropriate audit evidence relating to the operations of controls over those records, to substantiate transactions and balances recorded in them, or both. Such access may involve physical inspection of records at the service organization's premises or electronic interrogation of records, or both. When direct access is achieved electronically, the user auditor may also obtain evidence concerning the adequacy of the service organization's controls over the completeness and integrity of the user entity's data for which the service organization is responsible. [Paragraph renumbered by the issuance of SAS No. 130, December 2016.]

.A28 In determining the nature and extent of audit evidence to be obtained for financial statement balances representing assets held or transactions processed by a service organization for a user entity, the following procedures may be considered by the user auditor:

a. *Inspecting records and documents held by the user entity.* The reliability of this source of evidence is determined by the nature and extent of the accounting records and supporting documentation retained by the user entity. In some cases, the user entity may not maintain independent detailed records or documentation of specific transactions undertaken on its behalf.

b. *Inspecting records and documents held by the service organization.* The user auditor's access to the records of the service organization may be established as part of the contractual arrangements between the user entity and the service organization. The user auditor may also use another auditor, on its behalf, to gain access to the user entity's records maintained by the service organization, or ask the service organization through the user entity for access to the user entity's records maintained by the service organization.

c. *Obtaining confirmations of balances and transactions from the service organization.* When the user entity maintains independent records of balances and transactions, confirmation from the service organization corroborating those records usually constitutes reliable audit evidence concerning the existence of the transactions and assets concerned. For example, when multiple service organizations are used, such as an investment manager and a custodian, and these service organizations maintain independent records, the user auditor may confirm balances with these organizations in order to compare this information with the independent records of the user entity. If the user entity does not maintain independent records, information obtained in confirmations from the service organization is merely a statement of what is reflected in the records maintained by the service organization. Therefore, such confirmations do not, taken alone, constitute reliable audit evidence. In these circumstances, the user auditor may consider whether an alternative source of independent evidence can be identified.

d. *Performing analytical procedures on the records maintained by the user entity or on the reports received from the service organization.* The effectiveness of analytical procedures is likely to vary by assertion and will be affected by the extent and detail of information available.

[Paragraph renumbered by the issuance of SAS No. 130, December 2016.]

.A29 As noted in paragraph .A10, a service auditor may perform procedures under AT-C section 215 that are substantive in nature for the benefit of user auditors. Such an engagement may involve the performance by the service auditor of procedures agreed upon by the user entity and its user auditor and by the service organization and its service auditor. The findings resulting from the procedures performed by the service auditor are reviewed by the user auditor to determine whether they constitute sufficient appropriate audit evidence. In addition, requirements may be imposed by governmental authorities or through contractual arrangements whereby a service auditor performs designated procedures that are substantive in nature. The results of the application of the required procedures to balances and transactions processed by the service organization may be used by the user auditor as part of the evidence necessary to support the user auditor's audit opinion. In these circumstances, it may be useful for the user auditor and the service auditor to establish an understanding prior to the performance of the procedures concerning the audit documentation or means of accessing the audit documentation that will be provided to the user auditor. [Paragraph renumbered by the issuance of SAS No. 130, December 2016. Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.A30 In certain circumstances, in particular when a user entity outsources some or all of its finance function to a service organization, the user auditor may face a situation in which a significant portion of the audit evidence resides at the service organization. Substantive procedures may need to be performed at the service organization by the user auditor or the service auditor on behalf of the user auditor. A service auditor may provide a type 2 report and, in addition, may perform substantive procedures on behalf of the user auditor. As noted in paragraph .A44, the involvement of a service auditor does not alter the user auditor's responsibility to obtain sufficient appropriate audit evidence to afford a reasonable basis to support the user auditor's opinion. Accordingly, relevant information for the user auditor to consider when determining whether sufficient appropriate audit evidence has been obtained and whether the user auditor needs to perform further substantive procedures includes the user auditor's involvement with, or evidence of, the direction, supervision, and performance of the substantive procedures performed by the service auditor. [Paragraph renumbered by the issuance of SAS No. 130, December 2016.]

Tests of Controls (Ref: par. .16)

.A31 The user auditor is required by section 330 to design and perform tests of controls to obtain sufficient appropriate audit evidence concerning the operating effectiveness of controls in certain circumstances.[11] In the context of a service organization, this requirement applies when

a. the user auditor's assessment of risks of material misstatement includes an expectation that the controls at the service organization are operating effectively (that is, the user auditor intends to rely on the operating effectiveness of controls at the service organization in determining the nature, timing and extent of substantive procedures); or

b. substantive procedures alone, or in combination with tests of the operating effectiveness of controls at the user entity, cannot provide sufficient appropriate audit evidence at the assertion level.

[Paragraph renumbered by the issuance of SAS No. 130, December 2016. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A32 If a type 2 report is not available, a user auditor may contact the service organization through the user entity to request that a service auditor be engaged to perform a type 2 engagement that includes tests of the operating effectiveness of the controls or the user auditor may use another auditor to perform agreed-upon procedures at the service organization that test the operating effectiveness of those controls. A user auditor may also visit the service organization and perform tests of controls if the service organization agrees to it. The user auditor's risk assessments are based on the combined evidence provided by the service auditor's report and the user auditor's own procedures. [Paragraph renumbered by the issuance of SAS No. 130, December 2016. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Using a Type 2 Report as Audit Evidence That Controls at the Service Organization Are Operating Effectively (Ref: par. .17)

.A33 A type 2 report may be intended to satisfy the needs of several different user auditors; therefore, specific tests of controls and results described in a type 2 report may not be relevant to assertions that are significant in the user entity's financial statements. The relevant tests of controls and results of the tests are evaluated to determine whether the type 2 report provides sufficient appropriate audit evidence about the effectiveness of the controls to support the user auditor's risk assessment. In doing so, the user auditor may consider the following factors:

a. The time period covered by the tests of controls and the time elapsed since the performance of the tests of controls

b. The scope of the service auditor's work and the services and processes covered, the controls tested and the tests that were performed, and the way in which tested controls relate to the user entity's controls

c. The results of those tests of controls and the service auditor's opinion on the operating effectiveness of the controls

---

[11] Paragraph .08 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*. [Footnote renumbered by the issuance of SAS No. 130, December 2016. Footnote subsequently renumbered by the issuance of SAS No. 145, October 2021.]

[Paragraph renumbered by the issuance of SAS No. 130, December 2016.]

.A34 For certain assertions, the shorter the period covered by a specific test and the longer the time elapsed since the performance of the test, the less audit evidence the test may provide. In comparing the period covered by the type 2 report to the user entity's financial reporting period, the user auditor may conclude that the type 2 report offers less audit evidence if little overlap exists between the period covered by the type 2 report and the period for which the user auditor intends to rely on the report. When this is the case, an additional type 2 report covering a preceding or subsequent period may provide additional audit evidence. In other cases, the user auditor may determine it is necessary to perform, or use another auditor to perform, tests of controls at the service organization in order to obtain sufficient appropriate audit evidence about the operating effectiveness of those controls. [Paragraph renumbered by the issuance of SAS No. 130, December 2016.]

.A35 It may also be necessary for the user auditor to obtain additional evidence about significant changes in the controls at the service organization during a period outside the period covered by the type 2 report, or to determine what additional audit procedures need to be performed (for example, when little or no overlap exists between the period covered by the type 2 report and the period covered by the user entity's financial statements). Relevant factors in determining what additional audit evidence to obtain about controls at the service organization that were operating outside the period covered by the service auditor's report may include the following:

- The significance of the assessed risks of material misstatement at the assertion level
- The specific controls that were tested during the interim period and significant changes to them since they were tested, including changes in the information systems, processes, and personnel
- The degree to which audit evidence about the operating effectiveness of those controls was obtained
- The length of the remaining period
- The extent to which the user auditor intends to reduce further substantive procedures based on the reliance on controls
- The effectiveness of the control environment and the user entity's process to monitor the system of internal controls

[Paragraph renumbered by the issuance of SAS No. 130, December 2016. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A36 Additional audit evidence may be obtained, for example, by performing tests of controls that operated during the remaining period or testing the user entity's process to monitor the system of internal control. [Paragraph renumbered by the issuance of SAS No. 130, December 2016. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A37 If the service auditor's testing period is completely outside the user entity's financial reporting period, the user auditor will be unable to rely on such tests to conclude that the user entity's controls are operating effectively because the tests do not provide current audit period evidence of the effectiveness of the controls, unless other procedures are performed. [Paragraph renumbered by the issuance of SAS No. 130, December 2016.]

.A38 In certain circumstances, a service provided by the service organization may be designed with the assumption that certain controls will be implemented by the user entity. For example, the service may be designed with the assumption that the user entity will have controls in place for authorizing transactions before they are sent to the service organization for processing. In such a situation, the description of the service organization's system may include a description of those complementary user entity controls. The user auditor considers whether those complementary user entity controls are relevant to the service provided to the user entity. [Paragraph renumbered by the issuance of SAS No. 130, December 2016.]

.A39 If the user auditor believes that the service auditor's report may not provide sufficient appropriate audit evidence (for example, if a service auditor's report does not contain a description of the service auditor's tests of controls and results thereof), the user auditor may supplement his or her understanding of the service auditor's procedures and conclusions by contacting the service organization through the user entity to request a discussion with the service auditor about the scope and results of the service auditor's work. Also, if the user auditor believes it is necessary, the user auditor may contact the service organization through the user entity to request that the service auditor perform procedures at the service organization, or the user auditor may perform such procedures. [Paragraph renumbered by the issuance of SAS No. 130, December 2016.]

.A40 The service auditor's type 2 report identifies results of tests, including deviations, and other information that could affect the user auditor's conclusions. Deviations noted by the service auditor or a modified opinion in the service auditor's report do not automatically mean that the service auditor's report will not be useful for the audit of the user entity's financial statements in assessing the risks of material misstatement. Rather, the deviations and the matter giving rise to a modified opinion in the service auditor's type 2 report are considered in the user auditor's assessment of the tests of controls performed by the service auditor. In considering the deviations and matters giving rise to a modified opinion, the user auditor may discuss such matters with the service auditor. Such communication is dependent upon the user entity contacting the service organization, and obtaining the service organization's approval for the communication to take place. [Paragraph renumbered by the issuance of SAS No. 130, December 2016.]

.A41 *Communication of significant deficiencies and material weaknesses in internal control identified during the audit*. The user auditor is required by section 265, *Communicating Internal Control Related Matters Identified in an Audit*, to communicate in writing to management and those charged with governance significant deficiencies and material weaknesses identified during the audit.[12] Matters related to the use of a service organization that the user auditor may identify during the audit and may communicate to management and those charged with governance of the user entity include the following:

- Any controls within the entity's process to monitor the system of internal control that could be implemented by the user entity, including those identified as a result of obtaining a type 1 or type 2 report
- Instances when complementary user entity controls identified in the type 1 or type 2 report are not implemented at the user entity
- Controls that may be needed at the service organization that do not appear to have been implemented or that were implemented, but are not operating effectively

The auditor also may communicate other control related matters, including deficiencies that are not significant deficiencies or material weaknesses. [Paragraph renumbered by the issuance of SAS No. 130, December 2016. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Type 1 and Type 2 Reports That Exclude the Services of a Subservice Organization (Ref: par. .18)

.A42 If a service organization uses a subservice organization, the service auditor's report may either include or exclude the subservice organization's relevant control objectives and related controls in the service organization's description of its system and in the scope of the service auditor's engagement. These two methods of reporting are known as the *inclusive method* and the *carve-out method*, respectively. If the type 1 or type 2 report excludes the controls at a subservice organization and the services provided by the subservice organization are relevant to the audit of the user entity's financial statements, the user auditor is required to apply the requirements of this section with respect to the subservice organization. The nature and extent of work to be performed by the user auditor regarding the services provided by a subservice organization depend on the nature and significance of those services to the user entity and the relevance of those services to the audit. The application of the requirement in paragraph .09 assists the user auditor in determining the effect of the subservice organization and the nature and extent of work to be performed. [Paragraph renumbered by the issuance of SAS No. 130, December 2016.]

Fraud, Noncompliance With Laws and Regulations, and Uncorrected Misstatements Related to Activities at the Service Organization (Ref: par. .19)

.A43 A service organization may be required under the terms of the contract with user entities to disclose to affected user entities any fraud, noncompliance with laws and regulations, or uncorrected misstatements attributable to the service organization's management or employees. As required by paragraph .19, the user auditor makes inquiries of the user entity management regarding whether the service organization has reported any such matters and evaluates whether any matters reported by the service organization

---

[12]Paragraphs .11–.12 of section 265, *Communicating Internal Control Related Matters Identified in an Audit*. [Footnote renumbered by the issuance of SAS No. 130, December 2016. Footnote subsequently renumbered by the issuance of SAS No. 145, October 2021.]

affect the nature, timing, and extent of the user auditor's further audit procedures. In certain circumstances, the user auditor may require additional information to perform this evaluation and may request that the user entity contact the service organization to obtain the necessary information. [Paragraph renumbered by the issuance of SAS No. 130, December 2016.]

Reporting by the User Auditor (Ref: par. .20)

.A44 When a user auditor is unable to obtain sufficient appropriate audit evidence regarding the services provided by the service organization relevant to the audit of the user entity's financial statements, a limitation on the scope of the audit exists. This may be the case when

- the user auditor is unable to obtain a sufficient understanding of the services provided by the service organization and does not have a basis for the identification and assessment of the risks of material misstatement;
- a user auditor's risk assessment includes an expectation that controls at the service organization are operating effectively and the user auditor is unable to obtain sufficient appropriate audit evidence about the operating effectiveness of these controls; or
- sufficient appropriate audit evidence is only available from records held at the service organization, and the user auditor is unable to obtain direct access to these records.

Whether the user auditor expresses a qualified opinion or disclaims an opinion depends on the user auditor's conclusion regarding whether the possible effects on the financial statements are material, pervasive, or both.[13] [Paragraph renumbered by the issuance of SAS No. 130, December 2016.]

Reference to the Work of the Service Auditor (Ref: par. .21–.22)

.A45 The fact that a user entity uses a service organization does not alter the user auditor's responsibility to obtain sufficient appropriate audit evidence to afford a reasonable basis to support the user auditor's opinion. Therefore, the user auditor does not make reference to the service auditor's report as a basis, in part, for the user auditor's opinion on the user entity's financial statements. However, when the user auditor expresses a modified opinion because of a modified opinion in a service auditor's report, the user auditor is not precluded from referring to the service auditor's report if such reference assists in explaining the reason for the user auditor's modified opinion. In such circumstances, the user auditor need not identify the service auditor by name and may need the consent of the service auditor before making such a reference. [Paragraph renumbered by the issuance of SAS No. 130, December 2016.]

[13]Paragraphs .07–.10 of section 705, *Modifications to the Opinion in the Independent Auditor's Report*. [Footnote renumbered by the issuance of SAS No. 130, December 2016. Footnote subsequently renumbered by the issuance of SAS No. 145, October 2021.]

AU-C Section 9402

Audit Considerations Relating to an Entity Using a Service Organization: Auditing Interpretations of Section 402

1. Considerations Related to the Use of a SOC 2®[1] Report in an Audit of a User Entity's Financial Statements

.01 *Question* — Section 402, *Audit Considerations Relating to an Entity Using a Service Organization*, defines a *user entity* as an entity that uses a service organization and whose financial statements are being audited. It also defines a *service organization* as an organization or segment of an organization that provides services to user entities that are relevant to those user entities' internal control over financial reporting (ICFR). When a service organization does not provide a SOC 1®[2] report or a similar report issued under, for example, International Standard on Assurance Engagements (ISAE) 3402, *Assurance Reports on Controls at a Service Organization*, but does provide a SOC 2® report relevant to the services used by the user entity, may the auditor of a user entity's financial statements (a user auditor) use the SOC 2 report to meet the objectives of section 402?

.02 *Interpretation* — Section 402 contains requirements and guidance for a user auditor on (*a*) obtaining an understanding of the nature and significance of the services provided by a service organization and their effect on the user entity's internal control relevant to the audit, sufficient to identify and assess the risks of material misstatement, and (*b*) designing and performing audit procedures responsive to those risks.[3]

---

[1]The AICPA introduced the term *system and organization controls* (SOC) to refer to the suite of services practitioners may provide relating to system-level controls of a service organization and system or entity-level controls of other organizations. A SOC 2® engagement is an examination of controls over the security, availability, or processing integrity of a system or the confidentiality or privacy of the information processed by the system. It is performed under AT-C section 205, *Assertion-Based Examination Engagements.* AICPA Guide *Reporting on Controls at a Service Organization Relevant to Security, Availability, Processing Integrity, Confidentiality, or Privacy (SOC 2®)* is an interpretive publication that addresses SOC 2 engagements and provides recommendations on the application of AT-C section 205 to such engagements.

[2]A SOC 1® engagement is an examination engagement performed under AT-C section 320, *Reporting on an Examination of Controls at a Service Organization Relevant to User Entities' Internal Control Over Financial Reporting*.

[3]This paragraph is replaced with the following to reflect the issuance of Statement on Auditing Standards (SAS) No. 145, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, which has been codified in section 315:

> Section 402 contains requirements and guidance for a user auditor on (*a*) obtaining an understanding of the nature and significance of the services provided by a service organization and their effect on the user entity's system of internal control, sufficient to provide an

.03 A service auditor performs a SOC 1 engagement under AT-C section 320, *Reporting on an Examination of Controls at a Service Organization Relevant to User Entities' Internal Control Over Financial Reporting*, which is an attestation standard specifically designed to enable a service auditor to report on management of a service organization's description of its system (description) and the service organization's controls included in the description that are relevant to a user entity's ICFR. A SOC 1 report addresses the risks related to a financial statement audit and is intended to complement section 402. As such, a SOC 1 report or an equivalent report issued under, for example, ISAE 3402, is the preferred report for use in an audit of a user entity's financial statements. When a SOC 1 report is unavailable, a user auditor may be able to obtain relevant information from other types of attestation reports. One such report is a report on an examination of controls at a service organization relevant to one or more of the trust services categories of criteria, which include security, availability, processing integrity, confidentiality, and privacy (SOC 2 report).

.04 Although a SOC 2 report may provide a user auditor with information about the nature of the services provided by the service organization and the suitability of the design and operating effectiveness of certain controls at the service organization, a SOC 2 report is not specifically designed to address controls at a service organization relevant to a user entity's ICFR and therefore is unlikely to achieve the intent of the requirements in section 402. Because a SOC 2 report is not designed to serve the same purpose as a SOC 1 report, an understanding of the differences between these two types of reports may assist a user auditor in evaluating the sufficiency and appropriateness of the evidence provided by a SOC 2 report in an audit of a user entity's financial statements. The following are some considerations when determining whether a SOC 2 report may be used in the audit of a user entity's financial statements and some of the limitations of using a SOC 2 report in these circumstances:

- *Purpose of the report.* A SOC 2 engagement, which is performed under AT-C section 205, *Assertion-Based Examination Engagements*, addresses controls at a service organization that are intended to provide reasonable assurance that the service organization's service commitments and system requirements are achieved, based on the applicable trust services criteria. Importantly, a SOC 2 engagement is not designed to address the services performed by a service organization that are likely to be relevant to a user entity's ICFR and therefore is unlikely to completely address the effect that the service organization has on a user entity's financial reporting.

- *Potential overlap with financial reporting.* A SOC 2 report may address certain areas that could be relevant to a user entity's ICFR, such as logical access and change management. However, in a SOC 2 engagement, the service auditor's tests of such

---

appropriate basis for the identification and assessment of the risks of material misstatement, and (*b*) designing and performing audit procedures responsive to those risks.

SAS No. 145, issued in October 2021, is effective for audits of financial statements for periods ending on or after December 15, 2023. The distinct presentation of this content (as gray shaded) is intended to aid the reader in differentiating content that may not be effective for the reader's purposes. This paragraph applies when SAS No. 145 is early implemented or upon its effective date.

controls may be designed to address a different set of risks and are unlikely to provide sufficient appropriate audit evidence regarding controls at a service organization relevant to a user entity's ICFR. For example, although the change management criterion in a SOC 2 engagement[4] addresses attributes in the change management life cycle that may be relevant to a user entity's ICFR (for example, testing, approval, and implementation of changes into production), the service organization's service commitments and system requirements in a SOC 2 engagement typically address the effect that the change has on the security and availability of systems and therefore may not address the completeness, accuracy, and timeliness of the processing and reporting of transactions and balances relevant to a user entity's ICFR.

- *Scope of the report and understanding of the nature of the services provided by the service organization.* Because a SOC 2 report is not specifically designed to address services relevant to a user entity's ICFR, the description in a SOC 2 report may not include all the services, reports, statements, processes, and controls relevant to a user entity's ICFR. In contrast, the criteria for the description in AT-C section 320 require that such information be included in the description in a SOC 1 report.[5] Accordingly, the use of a SOC 2 report in an audit of a user entity's financial statements involves careful evaluation of the scope of the report and the content of the description in determining the relevance of the report to a user entity's ICFR.

- *Complementary user entity controls.* In a SOC 2 report, complementary user entity controls (CUECs) represent controls that management of the service organization assumed, in the design of the service organization's system, would be implemented by user entities and are necessary, in combination with controls at the service organization to provide reasonable assurance that the service organization's service commitments and system requirements would be achieved, based on the applicable trust services criteria. However, in a SOC 1 report, the CUECs represent controls that management of the service organization assumes, in the design of the service organization's system, will be implemented by user entities and are necessary to achieve a set of control objectives stated in the description that are relevant to user entities' ICFR. As a result, it is unlikely that a SOC 2 report will include the same set of CUECs that would be included in a SOC 1 report addressing similar services. The user auditor's careful analysis of the SOC 2 report is needed to identify (*a*) the CUECs included in a SOC 2 report, if any, that would need to be implemented at a user entity to achieve control objectives relevant to the user entity's ICFR, and (*b*) other controls that would need to be implemented by a user entity to mitigate the risks to the user entity's ICFR resulting from the use of a service organization (these controls are not identified as CUECs in a SOC 2 report). For example, if a service organization is responsible for performing logical access administration for users at the user entity, a SOC 1 report may include a CUEC indicating that the user entity provides complete, accurate, and appropriately authorized instructions for access changes. However, in

---

[4]See CC8.1 in TSP section 100, *2017 Trust Services Criteria for Security, Availability, Processing Integrity, Confidentiality, and Privacy.*

All TSP sections can be found in AICPA *Trust Services Criteria*.

[5]Paragraph .15 of AT-C section 320.

a SOC 2 report, this control may not be identified as a CUEC because the service organization is able to meet its service commitments to administer access based on the instructions provided by the user entity, regardless of the completeness and accuracy of those instructions.

To identify additional user responsibilities relevant to a user entity's ICFR that are not presented in a SOC 2 report as CUECs, a user auditor may review the following:

- — Contracts, service level agreements, or other documents between the user entity and the service organization to obtain an understanding of the services performed
- — The extent to which those services are, or are not, addressed by the SOC 2 report
- — The service organization's and user entity's responsibilities, even if not identified in the SOC 2 report as SOC 2–related CUECs

- *Access to the SOC 2 report not provided to downstream users.* For carved-out subservice organizations, paragraph .A70 of AT-C section 320 indicates that a user entity is also considered a user entity of the service organization's subservice organizations if controls at the subservice organizations are relevant to the user entity's ICFR. Paragraph .A70 refers to such user entities as *indirect* or *downstream* user entities. Because the definition of *user entity* in a SOC 2 engagement is substantially the same as it is in a SOC 1 engagement, downstream user entities of a SOC 2 report would be considered intended users of a SOC 2 report.

- *Services provided by subservice organizations likely to be relevant to a user entity's ICFR.* An additional user auditor consideration is that the scope of a SOC 2 report may not include all the services provided by subservice organizations that are likely to be relevant to a user entity's ICFR. For example, although a service provider that provides pricing data for investments may be a relevant subservice organization for a SOC 1 report, it may not be relevant to the SOC 2 report based on the applicable trust services criteria, which are intended to address the service organization's service commitments and system requirements.

- *Information prepared for user entities.* The information included in a SOC 2 report may address information prepared for user entities that is relevant to the service organization's service commitments — for example, system uptime reports to address availability commitments and user access listings related to security commitments — but may not address other types of information and reports that would be relevant to a user entity's ICFR. In evaluating the usefulness of a SOC 2 report in an audit of a user entity's financial statements, relevant considerations may include whether the scope of the SOC 2 report includes controls over the completeness and accuracy of the reports provided to user entities that are relevant to the user entities' ICFR. For example, a SOC 2 report that addresses an investment management system may include security reports such as user access lists or system availability reports for the application but may not include reports relevant to a user entity's financial transactions such as investment positions or transactions.

- *Intended users of the report.* The restricted-use paragraph in a type 2 SOC 2 report indicates that the intended users of a SOC 2 report include user entities of the system during some or all of the period covered by the report and practitioners providing services to such user entities. A user auditor would qualify as a practitioner providing services to a user entity and therefore would be considered an intended user of a SOC 2 report.

- *Service auditor's consideration of deficiencies.* In a SOC 2 engagement, the service auditor evaluates identified deficiencies in the design or operating effectiveness of controls based on their effect on the service organization's service commitments and system requirements, as opposed to their effect on the service organization's identified control objectives, as is the case in a SOC 1 engagement.

.05 The following table summarizes how a SOC 2 report may address the requirements in paragraph .09 of section 402:

Requirement in Requirement in Paragraph .09 of Section 402	How a SOC 2 Report May Address the Requirement in How a SOC 2 Report May Address the Requirement in Paragraph .09 of Section 402
.09 A user auditor should obtain an understanding of how the user entity uses the services of a service organization in the user entity's operations, including the following:	
a. The nature of the services provided by the service organization and the significance of those services to the user entity, including their effect on the user entity's internal control	A SOC 2 report may be useful in understanding the nature of some of the services provided by the service organization, including the service organization's service commitments and controls relative to categories of trust services criteria such as security and processing integrity. However, due to the intended scope of the report, it may not address all the services relevant to a user entity's internal control over financial reporting.
b. The nature and materiality of the transactions processed or accounts or financial reporting processes affected by the service organization	A SOC 2 report is unlikely to address the nature and materiality of transactions processed by the service organization unless it includes the processing integrity category of the trust services criteria.
c. The degree of interaction between the activities of the service organization and those of the user entity	A SOC 2 report may address the interaction between the activities of the service organization and those of the user entity especially as it relates to the service commitments that the service organization has made to its user entities based on the scope of the report.
d. The nature of the relationship between the user entity and the service organization, including the relevant contractual terms for the activities undertaken by the service organization	Like a SOC 1 report, a SOC 2 report is unlikely to address the relevant contractual terms; however, it will provide some information about the relationship between the user entity and the service organization. For example, the disclosure of the service organization's key service commitments relative to the trust services categories of criteria that are addressed by the SOC 2 report may assist the user auditor in understanding the nature of the relationship between the user entity and the service organization.

[Issue Date: December 2022.]

AU-C Section 450

Evaluation of Misstatements Identified During the Audit

Source: SAS No. 122; SAS No. 134; SAS No. 135; SAS No. 136; SAS No. 137; SAS No. 138.

Effective for audits of financial statements for periods ending on or after December 15, 2012, unless otherwise indicated.

NOTE

In March 2023, the Accounting Standards Board issued Statement on Auditing Standards No. 149, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors and Audits of Referred-to Auditors)*, which contains amendments to this section.

The amendments are effective for audits of financial statements for periods ending on or after December 15, 2026, and can be viewed in appendix C of section 600 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility to evaluate the effect of identified misstatements on the audit and the effect of uncorrected misstatements, if any, on the financial statements. Section 700, *Forming an Opinion and Reporting on Financial Statements*, and section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, address the auditor's responsibility in forming an opinion on the financial statements based on the evaluation of the audit evidence obtained. The auditor's conclusion, required by section 700 or section 703, takes into account the auditor's evaluation of uncorrected misstatements, if any, on the financial statements, in accordance with this section. Section 320, *Materiality in Planning and Performing an Audit*, addresses the auditor's responsibility to appropriately apply the concept of materiality in planning and performing an audit of financial statements. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

Effective Date

.02 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objective

.03 The objective of the auditor is to evaluate the effect of

a. identified misstatements on the audit and

b. uncorrected misstatements, if any, on the financial statements.

Definitions

.04 For purposes of generally accepted auditing standards, the following terms have the meanings attributed as follows:

Misstatement. A difference between the reported amount, classification, presentation, or disclosure of a financial statement item and the amount, classification, presentation, or disclosure that is required for the item to be presented fairly in accordance with the applicable financial reporting framework. Misstatements can arise from fraud or error. (Ref: par. .A1)

Misstatements also include those adjustments of amounts, classifications, presentations, or disclosures that, in the auditor's professional judgment, are necessary for the financial statements to be presented fairly, in all material respects.

Uncorrected misstatements. Misstatements that the auditor has accumulated during the audit and that have not been corrected.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Requirements

Accumulation of Identified Misstatements

.05 The auditor should accumulate misstatements identified during the audit, other than those that are clearly trivial. (Ref: par. .A2–.A3)

Consideration of Identified Misstatements as the Audit Progresses

.06 The auditor should determine whether the overall audit strategy and audit plan need to be revised if

a. the nature of identified misstatements and the circumstances of their occurrence indicate that other misstatements may exist that, when aggregated with misstatements accumulated during the audit, could be material or (Ref: par. .A7)

b. the aggregate of misstatements accumulated during the audit approaches materiality determined in accordance with section 320.[1] (Ref: par. .A8)

Communication and Correction of Misstatements

.07 The auditor should communicate on a timely basis with the appropriate level of management all misstatements accumulated during the audit. The auditor should request management to correct those misstatements. (Ref: par. .A9–.A11)

.08 If, at the auditor's request, management has examined a class of transactions, account balance, or disclosure and corrected misstatements that were detected, the auditor should perform additional audit procedures to determine whether misstatements remain. (Ref: par. .A12–.A14)

.09 If management refuses to correct some or all of the misstatements communicated by the auditor, the auditor should obtain an understanding of management's reasons for not making the corrections and should take that understanding into account when evaluating whether the financial statements as a whole are free from material misstatement.[2] (Ref: par. .A15–.A18)

Evaluating the Effect of Uncorrected Misstatements

.10 Prior to evaluating the effect of uncorrected misstatements, the auditor should reassess materiality[3] to confirm whether it remains appropriate in the context of the entity's actual financial results. (Ref: par. .A19–.A21)

.11 The auditor should determine whether uncorrected misstatements are material, individually or in the aggregate. In making this determination, the auditor should consider

a. the size and nature of the misstatements, both in relation to particular classes of transactions, account balances, or disclosures and the financial statements as a whole, and the particular circumstances of their occurrence and (Ref: par. .A22–.A29 and .A31–.A32)

b. the effect of uncorrected misstatements related to prior periods on the relevant classes of transactions, account balances, or disclosures and the financial statements as a whole. (Ref: par. .A30)

---

[1]Paragraph .10 of section 320, *Materiality in Planning and Performing an Audit*.

[2]Paragraph .13 of section 700, *Forming an Opinion and Reporting on Financial Statements*, or paragraph .38 of section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

[3]Paragraph .12 of section 320.

Documentation

.12 The auditor should include in the audit documentation[4] (Ref: par. .A33)

a. the amount below which misstatements would be regarded as clearly trivial; (See paragraph .05)

b. all misstatements accumulated during the audit and whether they have been corrected; and (See paragraphs .05–.07)

c. the auditor's conclusion about whether uncorrected misstatements are material, individually or in the aggregate, and the basis for that conclusion. (See paragraph .11)

Application and Other Explanatory Material

Definitions

Misstatement (Ref: par. .04)

.A1 Misstatements may result from fraud or error, such as

a. an inaccuracy in gathering or processing data from which the financial statements are prepared;

b. an omission of an amount or disclosure, including inadequate or incomplete disclosures and omission of those disclosures required to meet disclosure objectives of certain financial reporting frameworks as applicable;

c. a financial statement disclosure that is not presented in accordance with the applicable financial reporting framework;

d. an incorrect accounting estimate arising from overlooking or clear misinterpretation of facts;

e. judgments of management concerning accounting estimates that the auditor considers unreasonable or the selection or application of accounting policies that the auditor considers inappropriate;

f. an inappropriate classification, aggregation, or disaggregation of information; and

g. the omission of a disclosure necessary for the financial statements to achieve fair presentation beyond disclosures specifically required by the framework.

Other examples of misstatements arising from fraud are provided in section 240, *Consideration of Fraud in a Financial Statement Audit*.[5] [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

---

[4] Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*.

Accumulation of Identified Misstatements (Ref: par. .05)

"Clearly Trivial"

.A2 Paragraph .05 requires the auditor to accumulate misstatements identified during the audit other than those that are clearly trivial. "Clearly trivial" is not another expression for "not material." Misstatements that are clearly trivial will be of a wholly different (smaller) order of magnitude, or of a wholly different nature, than those that would be determined to be material and will be misstatements that are clearly inconsequential, whether taken individually or in the aggregate and whether judged by any criteria of size, nature, or circumstances. When there is any uncertainty about whether one or more items are clearly trivial, the misstatement is considered not to be clearly trivial. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Misstatements in Individual Statements

.A3 The auditor may designate an amount below which misstatements of amounts in the individual statements would be clearly trivial and would not need to be accumulated because the auditor expects that the accumulation of such amounts clearly would not have a material effect on the financial statements. However, misstatements of amounts that are above the designated amount would be accumulated as required by paragraph .05. In addition, misstatements relating to amounts may not be clearly trivial based on their nature or circumstances and, if not clearly trivial, would be accumulated as required by paragraph .05 of this section. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Misstatements in Disclosures

.A4 Misstatements in disclosures may also be clearly trivial whether taken individually or in the aggregate and whether judged based on size, nature, or circumstances. Misstatements in disclosures that are not clearly trivial are also accumulated to assist the auditor in evaluating the effect of such misstatements on the relevant disclosures and the financial statements as a whole. Paragraph .A23 provides examples of when misstatements in qualitative disclosures may be material. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Accumulation of Misstatements

.A5 Misstatements by nature or circumstances, accumulated as described in paragraphs .A3–.A4, cannot be added together as is possible in the case of misstatements of amounts. Nevertheless, the auditor is required by paragraph .11 to evaluate those misstatements individually and in the aggregate (that is, collectively with other misstatements) to determine whether they are material. [Paragraph added, effective for

---

[5] Paragraphs .A1–.A8 of section 240, *Consideration of Fraud in a Financial Statement Audit*.

audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

.A6 To assist the auditor in evaluating the effect of misstatements accumulated during the audit and in communicating misstatements to management and those charged with governance, the auditor may find it useful to distinguish between factual misstatements, judgmental misstatements, and projected misstatements, described as follows:

- *Factual misstatements* are misstatements about which there is no doubt.
- *Judgmental misstatements* are differences arising from the judgments of management including those concerning recognition, measurement, presentation, and disclosure in the financial statements (including the selection or application of accounting policies) that the auditor considers unreasonable or inappropriate.
- *Projected misstatements* are the auditor's best estimate of misstatements in populations, involving the projection of misstatements identified in audit samples to the entire population from which the samples were drawn. Guidance on the determination of projected misstatements and evaluation of the results is set out in section 530, *Audit Sampling*.[6]

[Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Consideration of Identified Misstatements as the Audit Progresses (Ref: par. .06)

.A7 A misstatement may not be an isolated occurrence. Evidence that other misstatements may exist include, for example, when the auditor identifies that a misstatement arose from a breakdown in internal control or from inappropriate assumptions or valuation methods that have been widely applied by the entity. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A8 If the aggregate of misstatements accumulated during the audit approaches materiality,[7] a greater than acceptably low level of risk may exist that possible undetected misstatements, when taken with the aggregate of uncorrected misstatements accumulated during the audit, could exceed materiality. Undetected misstatements could exist because of the presence of sampling risk and nonsampling risk.[8] [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Communication and Correction of Misstatements (Ref: par. .07–.09)

.A9 Timely communication of misstatements to the appropriate level of management is important because it enables management to evaluate whether the classes of transactions,

[6]Paragraphs .13–.14 of section 530, *Audit Sampling*.

[7]Paragraph .12 of section 320.

[8]Paragraph .05 of section 530.

account balances, and disclosures are misstated, inform the auditor if it disagrees, and take action as necessary. Ordinarily, the appropriate level of management is the one that has responsibility and authority to evaluate the misstatements and take the necessary action. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

.A10 Law or regulation may restrict the auditor's communication of certain misstatements to management or others within the entity. For example, laws or regulations may specifically prohibit a communication or other action that might prejudice an investigation by an appropriate authority into an instance of noncompliance or suspected noncompliance with laws or regulations. In some circumstances, potential conflicts between the auditor's obligations of confidentiality and obligations to communicate may be complex. In such cases, the auditor may consider seeking legal advice. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A11 The correction by management of all misstatements, including those communicated by the auditor, enables management to maintain accurate accounting books and records and reduces the risks of material misstatement of future financial statements because of the cumulative effect of immaterial uncorrected misstatements related to prior periods. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A12 The auditor may request management to examine a class of transactions, account balance, or disclosure in order for management to understand the cause of a misstatement identified by the auditor; perform procedures to determine the amount of the actual misstatement in the class of transactions, account balance, or disclosure; and make appropriate adjustments to the financial statements. Such a request may be made, for example, based on the auditor's projection of misstatements identified in an audit sample to the entire population from which it was drawn. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A13 The auditor may request management to record an adjustment needed to correct all factual misstatements, including the effect of prior period misstatements (see paragraph .08), other than those that the auditor believes are clearly trivial. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A14 When the auditor has identified a judgmental misstatement involving differences in estimates, such as a difference in a fair value estimate, the auditor may request management to review the assumptions and methods used in developing management's estimate. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A15 Sections 700 and 703 require the auditor to evaluate whether the financial statements are presented fairly, in all material respects, in accordance with the requirements of the applicable financial reporting framework.[9] This evaluation includes consideration of the qualitative aspects of the entity's accounting practices, including indicators of possible bias in management's judgments, which may be affected by the auditor's understanding

[9] Paragraph .12 of section 700 and paragraph .37 of section 703, as applicable. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

of management's reasons for not making the corrections (see section 700).[10] [Paragraph renumbered by the issuance of SAS No. 134, May 2019. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

.A16 Section 580, *Written Representations*, addresses management representations, including representations with respect to uncorrected misstatements.[11] [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A17 In accordance with section 265, *Communicating Internal Control Related Matters Identified in an Audit*, identification by the auditor of a material misstatement of the financial statements under audit in circumstances that indicate that the misstatement would not have been detected by the entity's internal control is an indicator of a material weakness.[12] [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A18 Section 260, *The Auditor's Communication With Those Charged With Governance*, addresses matters to be communicated by the auditor to those charged with governance, including uncorrected misstatements. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Evaluating the Effect of Uncorrected Misstatements (Ref: par. .10–.11)

.A19 The auditor's determination of materiality in accordance with section 320 often is based on estimates of the entity's financial results because the actual financial results may not yet be known.[13] Therefore, prior to the auditor's evaluation of the effect of uncorrected misstatements, it may be necessary to revise materiality determined in accordance with section 320 based on the actual financial results. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A20 Section 320 explains that, as the audit progresses, materiality for the financial statements as a whole (and, if applicable, the materiality level or levels for particular classes of transactions, account balances, or disclosures) is revised in the event of the auditor becoming aware of information during the audit that would have caused the auditor to have determined a different amount (or amounts) initially.[14] Thus, any significant revision is likely to have been made before the auditor evaluates the effect of uncorrected misstatements. However, if the auditor's reassessment of materiality determined in accordance with section 320 (see paragraph .10 of this section) gives rise to a lower amount (or amounts), then performance materiality and the appropriateness of the nature, timing, and extent of the further audit procedures are reconsidered in order to obtain sufficient appropriate audit evidence on which to base the audit opinion. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

[10]Paragraph .14 of section 700 and paragraph .39 of section 703, as applicable. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

[11]Paragraph .14 of section 580, *Written Representations*.

[12]Paragraph .A11 of section 265, *Communicating Internal Control Related Matters Identified in an Audit*.

[13]Paragraph .10 of section 320.

[14]Paragraph .12 of section 320.

.A21 Materiality is determined based on the auditor's understanding of the user needs and expectations (see section 320).[15] Although user expectations may differ based on inherent uncertainty associated with the measurement of particular items in the financial statements, these expectations have already been considered in the auditor's determination of materiality. For example, the fact that the financial statements include very large provisions with a high degree of estimation uncertainty (for example, provisions for insurance claims in the case of an insurance company; oil rig decommissioning costs in the case of an oil company; or, more generally, legal claims against an entity) may influence the auditor's assessment of what users might consider material. However, after materiality is reassessed, this section requires the auditor to evaluate any misstatements in accordance with that level of materiality, regardless of the degree of inherent uncertainty associated with the measurement of particular items in the financial statements. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A22 Each individual misstatement of an amount is considered to evaluate its effect on the relevant classes of transactions, account balances, or disclosures, including whether the materiality level for that particular class of transactions, account balance, or disclosure, if any, has been exceeded. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

.A23 In addition, each individual misstatement of a qualitative disclosure is considered to evaluate its effect on the relevant disclosures, as well as its overall effect on the financial statements as a whole. The determination of whether a misstatement in a qualitative disclosure is material, in the context of the applicable financial reporting framework and the specific circumstances of the entity, is a matter that involves the exercise of professional judgment. Examples of misstatements that may be material include the following:

- Inaccurate or incomplete descriptions of information about the objectives, policies, and processes for managing capital
- The omission of information about the events or circumstances that have led to an impairment loss (for example, a significant long-term decline in the demand for a metal or commodity)
- An incorrect description of an accounting policy relating to a significant item in any of the statements that the financial statements comprise
- An inadequate description of the sensitivity of an exchange rate

[Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

.A24 In determining whether uncorrected misstatements by nature are material as required by paragraph .11, the auditor considers uncorrected misstatements in amounts and disclosures. Such misstatements may be considered material either individually or in combination with other misstatements. For example, depending on the misstatements identified in disclosures, the auditor may consider the following:

[15] Paragraph .10 of section 320.

- Whether identified errors are recurring or pervasive
- Whether a number of identified misstatements are relevant to the same matter and, considered collectively, may affect the users' understanding of that matter

This consideration of accumulated misstatements is also helpful when evaluating the financial statements as discussed in paragraph .A15 of section 700, *Forming an Opinion and Reporting on Financial Statements*,[16] or paragraph .A70 of section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*,[17] which states that evaluating whether the financial statements achieve fair presentation may include discussions with management about whether the presentation of amounts or disclosures obscures useful information or results in misleading information. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

.A25 The auditor is required by section 600A, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*, to evaluate the effect on the group audit opinion of any uncorrected misstatement identified by the group engagement team or communicated by the component auditors.[18] [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A26 If an individual misstatement is judged to be material, it is unlikely that it can be offset by other misstatements. For example, if revenue has been materially overstated, the financial statements as a whole will be materially misstated, even if the effect of the misstatement on earnings is completely offset by an equivalent overstatement of expenses. It may be appropriate to offset misstatements within the same account balance or class of transactions; however, the risk that further undetected misstatements may exist is considered before concluding that offsetting even immaterial misstatements is appropriate. The auditor may need to reassess the risks of material misstatement for a specific account balance or class of transactions upon identification of a number of immaterial misstatements within that account balance or class of transactions. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A27 Determining whether a classification misstatement is material involves the evaluation of qualitative considerations, such as the effect of the classification misstatement on debt or other contractual covenants, the effect on individual line items or subtotals, or the effect on key ratios. Circumstances may exist in which the auditor concludes that a classification misstatement is not material in the context of the financial statements as a whole, even though it may exceed the materiality level or levels applied in evaluating other misstatements. For example, a misclassification between balance sheet line items may

[16] Paragraph .16 of section 700, *Forming an Opinion and Reporting on Financial Statements*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

[17] Paragraph .41 of section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

[18] Paragraph .44 of section 600A, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*. [Footnote renumbered by the issuance of SAS No. 134, May 2019.]

not be considered material in the context of the financial statements as a whole when the amount of the misclassification is small in relation to the size of the related balance sheet line items and the misclassification does not affect the income statement or any key ratios. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A28 The circumstances related to some misstatements may cause the auditor to evaluate them as material, individually or when considered together with other misstatements accumulated during the audit, even if they are lower than materiality for the financial statements as a whole. Circumstances that may affect the evaluation include the extent to which the misstatement

- affects compliance with regulatory requirements.
- affects compliance with debt covenants or other contractual requirements.
- relates to the incorrect selection or application of an accounting policy that has an immaterial effect on the current period's financial statements but is likely to have a material effect on future periods' financial statements.
- masks a change in earnings or other trends, especially in the context of general economic and industry conditions.
- affects ratios used to evaluate the entity's financial position, results of operations, or cash flows.
- affects segment information presented in the financial statements (for example, the significance of the matter to a segment or other portion of the entity's business that has been identified as playing a significant role in the entity's operations or profitability).
- has the effect of increasing management compensation (for example, by ensuring that the requirements for the award of bonuses or other incentives are satisfied).
- is significant with regard to the auditor's understanding of known previous communications to users (for example, regarding forecast earnings).
- relates to items involving particular parties (for example, whether external parties to the transaction are related to members of the entity's management).
- is an omission of information not specifically required by the applicable financial reporting framework but that, in the professional judgment of the auditor, is important to the users' understanding of the financial position, financial performance, or cash flows of the entity.
- affects other information that will be communicated in documents containing the audited financial statements (for example, information to be included in a "Management Discussion and Analysis" or an "Operating and Financial Review") when there is substantial likelihood that the other information would influence the judgment made by a reasonable user based on the financial statements. Section 720, *The Auditor's Responsibilities Relating to Other Information Included in Annual Reports*, addresses the auditor's responsibilities relating to other information, whether

financial or nonfinancial information (other than the financial statements and the auditor's report thereon), included in an entity's annual report.

- is a misclassification between certain account balances affecting items disclosed separately in the financial statements (for example, misclassification between operating and nonoperating income or recurring and nonrecurring income items or a misclassification between restricted and unrestricted resources in a not-for-profit entity).
- offsets effects of individually significant but different misstatements.
- is currently immaterial and likely to have a material effect in future periods because of a cumulative effect, for example, that builds over several periods.
- is too costly to correct. It may not be cost beneficial for the client to develop a system to calculate a basis to record the effect of an immaterial misstatement. On the other hand, if management appears to have developed a system to calculate an amount that represents an immaterial misstatement, it may reflect a motivation of management.
- represents a risk that possible additional undetected misstatements would affect the auditor's evaluation.
- changes a loss into income or vice versa.
- heightens the sensitivity of the circumstances surrounding the misstatement (for example, the implications of misstatements involving fraud and possible instances of noncompliance with laws or regulations, violations of contractual provisions, and conflicts of interest).
- has a significant effect relative to reasonable user needs (for example,
  - — earnings to investors and the equity amounts to creditors,
  - — the magnifying effects of a misstatement on the calculation of purchase price in a transfer of interests [buy-sell agreement], and
  - — the effect of misstatements of earnings when contrasted with expectations).
- relates to the definitive character of the misstatement (for example, the precision of an error that is objectively determinable as contrasted with a misstatement that unavoidably involves a degree of subjectivity through estimation, allocation, or uncertainty).
- indicates the motivation of management (for example, [i] an indication of a possible pattern of bias by management when developing and accumulating accounting estimates, [ii] a misstatement precipitated by management's continued unwillingness to correct weaknesses in the financial reporting process, or [iii] an intentional decision not to follow the applicable financial reporting framework).

These circumstances are only examples — not all are likely to be present in all audits nor is the list necessarily complete. The existence of any circumstances such as these does not necessarily lead to a conclusion that the misstatement is material. [Paragraph renumbered by the issuance of SAS No. 134, May 2019. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 137. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 138.]

.A29 Section 240 explains how the implications of a misstatement that is, or may be, the result of fraud are required to be considered with regard to other aspects of the audit, even if the size of the misstatement is not material in relation to the financial statements.[19] Depending on the circumstances, misstatements in disclosures could also be indicative of fraud and, for example, may arise from the following:

- Misleading disclosures that have resulted from bias in management's judgments
- Extensive duplicative or uninformative disclosures that are intended to obscure a proper understanding of matters in the financial statements

When considering the implications of misstatements in classes of transactions, account balances, and disclosures, the auditor exercises professional skepticism in accordance with section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.[20] [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

.A30 The cumulative effect of immaterial uncorrected misstatements related to prior periods may have a material effect on the current period's financial statements. Different acceptable approaches to the auditor's evaluation of such uncorrected misstatements on the current period's financial statements are available. Using the same evaluation approach provides consistency from period to period. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Considerations Specific to Governmental Entities

.A31 In the case of an audit of a governmental entity, the evaluation of whether a misstatement is material also may be affected by the auditor's responsibilities established by law or regulation to report specific matters, including, for example, fraud. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

.A32 Furthermore, issues such as public interest, accountability, integrity, and ensuring effective legislative oversight, in particular, may affect the assessment of whether an item is material by virtue of its nature. This is particularly so for items that relate to compliance with law or regulation. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

---

[19]Paragraph .35 of section 240. [Footnote renumbered by the issuance of SAS No. 134, May 2019.]

[20]Paragraph .17 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Documentation (Ref: par. .12)

.A33 The auditor's documentation of uncorrected misstatements may take into account the following:

a. The consideration of the aggregate effect of uncorrected misstatements

b. The evaluation of whether the materiality level or levels for particular classes of transactions, account balances, or disclosures, if any, have been exceeded

c. The evaluation of the effect of uncorrected misstatements on key ratios or trends and compliance with legal, regulatory, and contractual requirements (for example, debt covenants)

[Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

AU-C Sections 500–599

AUDIT EVIDENCE

AU-C Section 500

Audit Evidence

(Supersedes SAS No. 122 section 500)

Source: SAS No. 142; SAS No. 145.

Effective for audits of financial statements for periods ending on or after December 15, 2022.

Introduction

Scope of This Section

.01 This section explains what constitutes audit evidence in an audit of financial statements and sets out attributes of information that are taken into account by the auditor when evaluating information to be used as audit evidence. Taking these attributes into account assists the auditor in maintaining professional skepticism. (Ref: par. .A1)

.02 The application of this section assists the auditor in fulfilling the auditor's responsibilities in other AU-C sections. This section should be read in conjunction with other AU-C sections, including those that address the auditor's responsibilities to identify and assess the risks of material misstatement,[1] design and implement responses to the risks of material misstatement identified and assessed by the auditor,[2] and form an opinion on the financial statements.[3] In particular, section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained,* requires the auditor to conclude whether sufficient appropriate audit evidence has been obtained and thereby provides a basis for the auditor's opinion. (Ref: par. .A2)

.03 The auditor's overall conclusion in accordance with section 330 about whether sufficient appropriate audit evidence has been obtained is a matter of professional judgment. Evaluating information to be used as audit evidence in accordance with this section assists the auditor in making that conclusion. The auditor's evaluation of information to be used as audit evidence is not a formulaic exercise and is dependent on the degree to which the attributes of information to be used as audit evidence influence the auditor's evaluation. (Ref: par. .A3–.A4)

---

[1]See section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

[2]Section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

[3]Section 700, *Forming an Opinion and Reporting on Financial Statements*.

Effective Date

.04 This section is effective for audits of financial statements for periods ending on or after December 15, 2022.

Objective

.05 The objective of the auditor is to evaluate information to be used as audit evidence, including the results of audit procedures, to inform the auditor's overall conclusion about whether sufficient appropriate audit evidence has been obtained.

Definitions

.06 For purposes of generally accepted auditing standards (GAAS), the following terms have the meanings attributed as follows:

Appropriateness (of audit evidence). The measure of the quality of audit evidence, that is, its relevance and reliability in providing support for the conclusions on which the auditor's opinion is based. (Ref: par. .A9)

Audit evidence. Information used by the auditor in arriving at the conclusions on which the auditor's opinion is based. Audit evidence is information to which audit procedures have been applied and consists of information that corroborates or contradicts assertions in the financial statements. (Ref: par. .A5–.A10)

External information source. An external individual or organization that provides information that is used by the entity in preparing the financial statements or that has been obtained by the auditor as audit evidence, when such information is suitable for use by a broad range of users. When information has been provided by an individual or organization acting in the capacity of management's specialist, service organization,[4] or auditor's specialist,[5] the individual or organization is not considered an external information source with respect to that particular information.

Sufficiency (of audit evidence). The measure of the quantity of audit evidence. The quantity of audit evidence necessary is affected by the auditor's assessment of the risks of material misstatement and the quality of the audit evidence obtained (that is, its appropriateness). (Ref: par. .A9–.A10)

Requirements

Evaluating Information to Be Used as Audit Evidence

.07 The auditor should evaluate information to be used as audit evidence by taking into account (Ref: par. .A11)

---

[4]See section 402, *Audit Considerations Relating to an Entity Using a Service Organization*.

[5]See section 620, *Using the Work of an Auditor's Specialist*.

a. the relevance and reliability of the information, including its source, and (Ref: par. .A12–.A34)

b. whether such information corroborates or contradicts assertions in the financial statements. (Ref: par. .A35–.A38)

.08 The auditor's evaluation of the information to be used as audit evidence in accordance with paragraph .07 should include

a. evaluating whether the information is sufficiently precise and detailed for the auditor's purposes and (Ref: par. .A39)

b. obtaining audit evidence about the accuracy and completeness of the information, as necessary (Ref: par. .A40–.A42).

Audit Procedures as a Basis for Concluding on the Sufficiency and Appropriateness of Audit Evidence

.09 In evaluating information to be used as audit evidence, the auditor should consider whether the results of audit procedures provide a basis for concluding on the sufficiency and appropriateness of audit evidence obtained. (Ref: par. .A43–.A64)

Inconsistencies in, or Doubts About the Reliability of, Audit Evidence

.10 The auditor should determine whether modifications or additions to audit procedures are necessary to resolve inconsistencies in, or doubts about the reliability of, audit evidence, including when

a. audit evidence obtained from one source is inconsistent with that obtained from another source.

b. the results of an audit procedure are inconsistent with the results of another audit procedure.

(Ref: par. .A65–.A66)

Application and Other Explanatory Material

Scope of This Section (Ref: par. .01–.03)

.A1 Section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards,* defines *professional skepticism* and *professional judgment*.[6] Section 200 and section 330 provide application material about maintaining professional skepticism and exercising professional judgment.[7] The auditor's evaluation of information to be used as audit evidence in accordance with this section

[6] Paragraph .14 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

involves maintaining professional skepticism, including the consideration of whether unconscious or conscious auditor biases may affect the auditor's professional judgments.[8] Paragraphs .A17, .A30–.A31, .A37–.A38, .A60, and .A63 of this section are examples of paragraphs that describe ways in which the auditor can maintain professional skepticism.

.A2 Paragraph .02 states that this section should be read in conjunction with other AU-C sections. For example, the objective of section 330 is for the auditor to obtain sufficient appropriate audit evidence regarding the assessed risks of material misstatement through designing and implementing appropriate responses to those risks.[9]Section 330 also states that the auditor is required to do the following:

- Design and perform further audit procedures whose nature, timing, and extent are based on, and are responsive to, the assessed risks of material misstatement at the relevant assertion level.[10]
- Obtain more persuasive audit evidence the higher the auditor's assessment of risk.[11]
- Conclude whether sufficient appropriate audit evidence has been obtained.[12]
- Attempt to obtain further audit evidence if the auditor has not obtained sufficient appropriate audit evidence about a relevant assertion.[13]

In addition, section 700, *Forming an Opinion and Reporting on Financial Statements*, requires the auditor to conclude whether reasonable assurance has been obtained about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error. The conclusions required by section 700 take into account, among other things, whether sufficient appropriate audit evidence has been obtained in accordance with section 330.[14]

.A3 Audit evidence is cumulative in nature and is obtained through the performance of one or more audit procedures on information obtained during the course of the audit. The auditor's evaluation of information to be used as audit evidence may be enhanced by the use of automated tools and techniques, which may enable the auditor to aggregate or disaggregate information or consider information obtained from multiple sources.

.A4 For example, the auditor may use automated tools and techniques for the purpose of planning or performing the audit, such as audit data analytics. *Data analytics* is described as the analysis of patterns, identification of anomalies, or extraction of other useful information in data underlying or related to the subject matter of an audit through analysis,

[14]Paragraph .13*a* of section 700.

modeling, or visualization. Examples of other automated tools and techniques are artificial intelligence, machine learning, remote observation tools, and robotic process automation.

Definitions (Ref: par. .06)

Audit Evidence

.A5 *Audit evidence* is information to which audit procedures have been applied, ordinarily during the course of the current-year audit. Information to be used as audit evidence may also be obtained by the auditor as part of designing and performing risk assessment procedures in accordance with section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, including from

a. the auditor's previous experience with the entity and audit procedures performed in previous audits, when the auditor has evaluated whether such information remains relevant and reliable as audit evidence for the current audit,

b. the auditor's procedures regarding acceptance or continuance of the client relationship or the audit engagement, and

c. when applicable, other engagements performed by the engagement partner for the entity.

.A6 The nature of the audit procedures that the auditor performs to use information as audit evidence may depend on the source of the information and range from simple to extensive audit procedures. For example, when using information from an external information source, obtaining the information may be relatively straightforward, and the auditor's procedures to evaluate that information would be largely focused on the relevance and reliability of the information, including its source, in accordance with this section. On the other hand, audit procedures to obtain evidence about the accuracy and completeness of the information, such as tests of controls, may be necessary when the auditor intends to use information generated internally from the entity's general and subsidiary ledgers as audit evidence.

.A7 In some cases, the absence of information is used by the auditor and, therefore, also constitutes audit evidence.[15]For example, when considering information regarding management's assertions related to the entity's recorded warranty provision, the absence of sales returns of the product in question may be audit evidence supporting management's assertion about the completeness of the warranty provision.

Sufficient Appropriate Audit Evidence

.A8 As explained in section 200, reasonable assurance is obtained when the auditor has obtained sufficient appropriate audit evidence to reduce audit risk (that is, the risk that the auditor expresses an inappropriate opinion when the financial statements are materially misstated) to an acceptably low level.[16]

---

[15]Paragraph .A32 of section 200.

.A9 As explained in section 200, the sufficiency and appropriateness of audit evidence are interrelated.[17]Together they affect the persuasiveness of audit evidence. The auditor's conclusion about whether sufficient appropriate audit evidence has been obtained in accordance with section 330 is both at the financial statement level as well as the relevant assertion level. Section 330 requires the auditor to obtain more persuasive audit evidence the higher the assessment of risk.[18]For example, ordinarily, more persuasive audit evidence is needed to respond to significant risks. *Persuasiveness*, therefore, relates to the auditor obtaining appropriate audit evidence that is sufficient for the auditor to draw reasonable conclusions.

.A10 The quantity of audit evidence, in and of itself, is not solely determinative of its persuasiveness. For example, obtaining more of the same type of audit evidence may not compensate for its lack of appropriateness. However, as the quality of audit evidence increases, the need for additional corroborating audit evidence decreases. Depending on the auditor's consideration of relevance and reliability, information obtained from a single source may provide persuasive audit evidence.

Evaluating Information to Be Used as Audit Evidence (Ref: par. .07–.08)

.A11 Information to be used as audit evidence may take different forms, which influences the nature of audit procedures that may be necessary to obtain or evaluate the information. Different forms of information, individually or in combination, include

- *oral information* obtained through a verbal response to an inquiry of management or external information sources (for example, oral inquiries made during the course of the audit).
- *visual information* obtained through observation (for example, a message that appears on-screen for a control restricting access to an IT) system or observed by the auditor using remote observation tools).
- *paper documents*, which are obtained in documentary form (for example, an original executed sales contract or a written confirmation).
- *electronic information*, which includes
  - — *documents* obtained in electronic documentary form (for example, a scanned version of an executed sales contract or an electronic confirmation).
  - — *data* stored in the entity's IT system or obtained electronically from an external information source. Such data may be manually input into the system or may be electronically generated (for example, an electronic data interface between the entity and a service organization).

[16]Paragraph .06 of section 200.

[17]Paragraph .A33 of section 200.

[18]See paragraph .07*b* of section 330.

Relevance and Reliability of the Information, Including Its Source (Ref: par. .07a)

Sources of Information to Be Used as Audit Evidence

.A12 The source of the information to be used as audit evidence often affects the consideration of its relevance and reliability. Information to be used as audit evidence may be obtained directly or derived individually or in combination from different sources, including the following:

a. *Management.* Management may provide the auditor with information obtained from the financial reporting process used to prepare the financial statements, including disclosures (for example, the entity's accounting records) as well as information obtained from outside of the general and subsidiary ledgers (for example, from the entity's risk management system or sales functions). This information may be stored by the entity within its IT systems or in a remote server. Management may also employ or engage a specialist who may provide information to be used as audit evidence.[19]

b. *External information sources and other external parties.* Management or the auditor may use information obtained from external information sources and other external parties (for example, information used as inputs to forecasts or models used to prepare accounting estimates or accumulated by an auditor to analyze industry trends). The auditor may obtain external confirmations or make inquiries of external parties to corroborate management's assertions. See appendix A, "Considerations Regarding the Use of External Information Sources," for the auditor's considerations when using external information sources.

c. *Auditor.* The auditor may develop information to be used as audit evidence. For example, an auditor may accumulate and analyze industry trends to be used in the audits of entities in that industry. The auditor may also employ or engage a specialist to assist the auditor in developing audit evidence, which could include developing an independent expectation to evaluate the reasonableness of an accounting estimate. The auditor may also use automated tools and techniques to analyze information provided by management or external parties, resulting in audit evidence.

.A13 Accounting records are an example of information provided by management that is obtained from the financial reporting process and may include the following:

- The records of initial accounting entries and supporting records, such as checks and records of electronic fund transfers; invoices; contracts; the general and subsidiary ledgers; and journal entries
- Records, such as spreadsheets, cost allocations, computations, reconciliations, and disclosures

[19]See section 501, *Audit Evidence — Specific Considerations for Selected Items*.

.A14 An example of information provided by management that is obtained from outside the general and subsidiary ledgers is internal marketing information developed by the entity's sales function as an assumption in making an accounting estimate for a warranty provision.

.A15 External confirmation[20] procedures may provide relevant information to be used as audit evidence when addressing assertions associated with certain account balances and their elements. However, external confirmations need not be restricted to classes of transactions, account balances, or disclosures. For example, the auditor may request confirmation of the terms of agreements or transactions an entity has with third parties; the confirmation request may be designed to ask if any modifications have been made to the agreement and, if so, the relevant details. External confirmation procedures are also used to obtain audit evidence about the absence of certain conditions (for example, the absence of a side agreement that may influence revenue recognition).

.A16 As indicated in paragraph .A12, information to be used as audit evidence by the auditor may be obtained directly or derived individually or in combination from different sources. For example, in making an accounting estimate for an accumulated pension obligation, management may use information that is obtained from the general and subsidiary ledgers; information obtained from outside the general and subsidiary ledgers; and information obtained from a management's specialist. Similarly, an auditor may obtain information to be used as audit evidence from multiple sources. For example, in performing a regression analysis to test revenue recorded, the auditor may obtain information about square footage of retail space and sales prices (both management-generated) and changes in an index published by a government agency (an external information source).

.A17 In some situations, there may be only one source of certain information external to the entity, for example, information from a central bank or government, such as an inflation rate, or single recognized industry body. In such cases, taking into account the reliability of such information is influenced by the nature and credibility of the source of the external information, the assessed risks of material misstatement to which that external information is relevant, and the degree to which the use of that external information is relevant to the reasons for the assessed risk of material misstatement. For example, when the information is from a credible authoritative source, the extent of the auditor's further audit procedures may be less extensive, such as corroborating the information with the source's website or published information. In other cases, when information is from a source not assessed as credible, the auditor may determine that more extensive audit procedures are appropriate. In the absence of an alternative independent information source against which to compare, the auditor may consider whether performing additional audit procedures to obtain information from the external information source is appropriate in order to obtain sufficient appropriate audit evidence (see paragraph 9 in appendix A).

.A18 In certain circumstances, the source of information may be a combination of management and external parties. For example, if an entity develops a distributed ledger to capture its transactions, there may be few or many other external parties participating in the transactions and contributing to the information included in the distributed ledger. Therefore, the source of the information included in the distributed ledger is not solely

[20] See section 505, *External Confirmations*.

management but also external parties. In such circumstances, professional judgment is exercised by the auditor to evaluate the relevance and reliability of the information obtained from the distributed ledger to be used as audit evidence.

Relevance and Reliability

.A19 *Relevance*. The relevance of the information to be used as audit evidence relates to the logical connection with, or bearing upon, the auditor's purposes. Information from one source may be relevant when performing one or more audit procedures (for example, sales information provided by management may be used to perform procedures related to both the entity's warranty provision and evaluation of management's cash flows forecast related to the entity's warranty provision). The following are factors that, individually or in combination, may affect the relevance of information to be used as audit evidence:

- The classes of transactions, account balances, or disclosures or assertions to which the information relates. Information to be used as audit evidence may be relevant to multiple classes of transactions, account balances, or disclosures.
- The period of time to which the information relates.

.A20 The following examples illustrate the relevance of information to be used as audit evidence:

- Recorded accounts payable may provide relevant information when the objective of the audit procedures is to test the existence or valuation pertaining to accounts payable.
- Employee salaries may provide relevant information regarding an accounting estimate for a bonus accrual.
- Commodity pricing data may be used in the performance of an audit data analytic to evaluate recorded revenue. The period of time used for the commodity pricing data has to be relevant to the time period revenue was recorded.

.A21 Certain information to be used as audit evidence may have direct relevance to one financial statement assertion but may not be relevant to all assertions:

- Inspection of a document constituting a financial instrument, such as a stock, bond, or a digital copy of a mortgage, may provide relevant audit evidence about existence but may not necessarily provide audit evidence about ownership or valuation.
- Inspection of tangible assets may provide relevant audit evidence with respect to their existence but not necessarily about the entity's rights and obligations.
- The collection of receivables after the period-end may provide relevant audit evidence regarding existence and valuation of receivables and occurrence and accuracy of revenue but not necessarily completeness of receivables and revenue.

.A22 *Reliability*. The reliability of audit evidence depends on the nature and source of the audit evidence and the circumstances under which it is obtained. Generally, the reliability of audit evidence increases when it is obtained from external parties because the information is less susceptible to management bias. Consideration of the sources of information to be used as audit evidence includes the possibility that the information source may not be reliable.

.A23 Information obtained directly by the auditor (for example, observation of the application of a control) may be more reliable than information obtained indirectly or by inference (for example, inquiry about the application of a control). When information has been obtained indirectly or by inference, the auditor may perform additional audit procedures to evaluate the reliability of that information, such as by reperforming the control activity.

.A24 Information in documentary form, whether paper or electronic, may be more reliable than evidence obtained through oral inquiries (for example, a contemporaneously written record of a meeting may be more reliable than a subsequent oral representation of the matters discussed).

.A25 Determining whether controls are effectively designed and implemented (including general IT controls, as appropriate) may help the auditor design appropriate audit procedures to evaluate the reliability of information.[21]In some cases, the reliability of such information may only be established when the related controls, whether manual or automated, including those over the preparation and maintenance of the information, have been tested and determined to be operating effectively.[22]

.A26 Using electronic information may require the auditor to perform additional audit procedures to establish its reliability. For example, when using a scanned version of an executed sales contract provided by the sales department, additional audit procedures, such as confirmation of the key terms with a third party, may be necessary if the auditor has not tested the operating effectiveness of the controls around execution of the original contract and the maintenance of the scanned version.

.A27 The reliability of information to be used as audit evidence is affected to varying degrees by the following attributes, individually or in combination:

- Accuracy
- Completeness
- Authenticity
- Susceptibility to management bias

These attributes are also relevant when automated tools and techniques are used to obtain audit evidence.

.A28 *Controls Over Information to Be Used as Audit Evidence*. When information has been transformed from its original medium (for example, documents that have been filmed,

[21]See paragraph .07 of this section.

[22]See also paragraph .05*b* of section 520, *Analytical Procedures*.

digitized, or otherwise transformed to electronic form), the reliability of that information may depend on the controls over the information's transformation and maintenance. In some situations, the auditor may determine that additional audit procedures are necessary to address reliability (for example, inspecting underlying original documents to validate the authenticity of information in electronic form). In other situations, the auditor may determine that it is necessary to test controls over the transformation and maintenance of the information.

.A29 Similarly, when a significant amount of information is electronically initiated, recorded, processed, or reported, information to be used as audit evidence may be available only in electronic form. In such cases, the sufficiency and appropriateness of the audit evidence usually depends on the effectiveness of controls over their accuracy and completeness. Furthermore, the potential for improper initiation or alteration of information to occur and not be detected may be greater if information is initiated, recorded, processed, or reported only in electronic form, and appropriate controls are not operating effectively.

.A30 *Authenticity*. An audit performed in accordance with GAAS rarely involves the authentication of documents, nor is the auditor trained as, or expected to be, an expert in such authentication. When the auditor identifies conditions that cause the auditor to believe that a document may not be authentic, that terms in a document may have been modified but not disclosed to the auditor, or that undisclosed side agreements may exist, the auditor may determine that additional audit procedures are necessary, including audit procedures to evaluate authenticity. Such audit procedures may include

- confirming directly with the third party.
- using the work of a specialist to assess the document's authenticity.[23]

.A31 *Susceptibility to Management Bias*. Information with a higher susceptibility to management bias is considered less reliable than information for which the susceptibility to management bias is lower unless audit procedures have been performed to address the higher susceptibility to management bias.

.A32 A susceptibility to management bias may exist in the development of information itself or may exist due to interpretation of the information by the entity. A greater susceptibility to management bias may exist when information is generated from internal sources.

.A33 In accordance with section 200, the auditor is required to exercise professional judgment.[24]This includes determining the impact of management bias in evaluating the reliability of information from external information sources to be used as audit evidence. Determining the effect of management bias involves considering the following:

a. The ability of the entity to influence the external information source

[23]Paragraph .A11 of section 240, *Consideration of Fraud in a Financial Statement Audit*.

[24]Paragraph .18 of section 200.

b. Management's selection of information from an external source known to be favorably biased toward corroborating management's assertions or information

.A34 External information is more likely to be suitable for use by a broad range of users and less likely to be subject to influence by any particular user if the external individual or organization provides it to the public for free or makes it available to a wide range of users in return for payment of a fee.

*Corroborative or Contradictory Information (Ref: **par. .07b**)*

.A35 Section 330 states that, in forming a conclusion about whether sufficient appropriate audit evidence has been obtained, the auditor should consider all relevant audit evidence, regardless of whether it appears to corroborate or contradict the assertions being tested by the auditor or the amounts recorded in the financial statements.[25]

.A36 Evaluating information to be used as audit evidence involves taking into account information that corroborates assertions or contradicts assertions in the financial statements. For example, audit evidence obtained through the inspection of an original document may corroborate a financial statement assertion, whereas audit evidence obtained from confirmation with an external party may contradict that financial statement assertion. In this example, additional audit evidence may be necessary to enable the auditor to conclude on the relevant assertion.

.A37 Contradictory information may be relevant even when the source of that information is less reliable than the source of corroborative information. For example, in the audit of a depository institution, reports of decreasing property values in a particular geographical area may have been obtained by the auditor that contradicted the report of an external appraisal provided by management to support its estimate of the values of collateral for a loan portfolio. In this case, given that contradictory information has been obtained, the auditor may determine that it is necessary to perform additional audit procedures to obtain audit evidence about the value of the property.

.A38 Contradictory information is not considered in isolation but, rather, as part of the auditor's consideration with respect to that management assertion taken as a whole. In such cases, professional skepticism and judgment is necessary to evaluate the persuasiveness of the audit evidence taken as a whole, rather than focusing on an individual piece of audit evidence. For example, the auditor may be aware of information on social media suggesting a company's product has major quality issues and that all buyers would be returning the product. The auditor may have obtained external confirmations regarding product sales and outstanding accounts receivable that do not indicate quality or return issues and may have scanned the sales returns subsidiary ledger, which contained only an immaterial amount of returns subsequent to year-end. In light of that, the auditor may conclude that the contradictory information does not suggest a reasonable possibility of a risk of material misstatement and that further audit procedures are not necessary.

[25] Paragraph .28 of section 330.

Evaluating Whether the Information Is Sufficiently Precise and Detailed for the Auditor's Purposes (Ref: par. 08a)

.A39 In some cases, the auditor may intend to use information obtained from management for other audit purposes. For example, the auditor may use the performance measures included in the entity's internal audit function reports, initially obtained for the purpose of evaluating monitoring activities, in a substantive analytical procedure. In such cases, the appropriateness of this information to be used as audit evidence is affected by whether the information is sufficiently precise or detailed for the auditor's purposes.

Accuracy and Completeness (Ref: par. .08b)

.A40 In accordance with paragraph 8, the auditor is required to determine whether it is necessary to obtain audit evidence about the accuracy and completeness of information to be used as audit evidence. Examples of this would be the reliability of

- the price and sales volume data produced by the entity used to develop an expectation of revenue is affected by the accuracy and completeness of the information being used.
- a population being tested for a certain characteristic, such as payment authorization, is affected by the completeness of the population from which items are selected.

.A41 The auditor may obtain audit evidence about the accuracy or completeness of information to be used as audit evidence through the performance of an audit procedure that was not primarily intended for that purpose. For example, in testing valuation, the auditor may reconcile the listing of investment purchases for completeness before selecting a sample. In other situations, the auditor may consider it necessary to obtain audit evidence about the accuracy and completeness of information by testing controls over the preparation and maintenance of the information (for example, in light of the nature, frequency, and volume of transactions).

.A42 In contrast to paragraph .A41, evaluating certain attributes related to the relevance and reliability of information obtained from external information sources, such as completeness, used by the auditor may not be practicable. Procedures regarding the reliability of external information may depend on how the external information will be used in the execution of an audit procedure because the auditor may not be able to evaluate the completeness and accuracy of information obtained from an external source to the same degree as the auditor would evaluate the completeness and accuracy of internal information obtained from management. For example, when using information from external information sources to perform an audit data analytic, the auditor's evaluation may focus more on the quality of that information (for example, that the information was from a reputable source), rather than its completeness.

Audit Procedures as a Basis for Concluding on the Sufficiency and Appropriateness of Audit Evidence (Ref: par. .09)

.A43 Audit procedures performed on information may include inspection, observation, confirmation, recalculation, reperformance, and analytical procedures, often in some combination, in addition to inquiry. These audit procedures may be performed either manually or using automated tools and techniques. The nature, timing, and extent of audit procedures performed on information influences the persuasiveness of the audit evidence obtained. For example, inspection or observation may provide more persuasive audit evidence than inquiry.

.A44 As explained further in section 315A and section 330, to draw reasonable conclusions on which to base the auditor's opinion, audit evidence is obtained by performing the following:[26,27]

a. Risk assessment procedures

b. Further audit procedures, which comprise

    i. tests of controls, when required by the AU-C sections or when the auditor has chosen to do so, and

    ii. substantive procedures, which include tests of details and substantive analytical procedures

An audit procedure may have characteristics of one or more of the preceding categories and can be designed to accomplish more than one objective. The auditor's focus is on evaluating the results of the audit procedures performed.

.A45 The auditor may use automated tools and techniques to process, organize, structure, or present data in a given context in order to generate useful information that can be used as audit evidence.

.A46 An auditor may use automated tools and techniques to perform both a risk assessment procedure and a substantive procedure concurrently. As illustrated by the concepts in exhibit A, a properly designed audit data analytic may be used to perform risk assessment procedures and may also provide sufficient appropriate audit evidence to address a risk of material misstatement.

.A47 The auditor may also use automated tools and techniques to obtain audit evidence about the operation of the entity's internal control. For example, if management has controls over the sequential numbering of sales invoices, the auditor may be able to obtain corroborating audit evidence about the sequential numbering of sales invoices for the period by using automated tools and techniques to determine whether any gaps in numbering or duplicates exist, which may provide audit evidence about the controls over the completeness of invoices issued during the period.

.A48 Some information may be available only in electronic form or only at certain points or periods in time, which may affect the nature and timing of the audit procedures to be performed.

[26] Paragraphs .05–.06 of section 315A.

[27] Paragraphs .06–.07 of section 330.

.A49 Certain electronic information may be destroyed or deleted after a specified period of time (for example, if files are changed and back-up files do not exist). Accordingly, as a result of the entity's data retention policies, the auditor may find it necessary to request retention of some information for the performance of audit procedures at a later point in time or to perform audit procedures at a time when the information is available.

.A50 Some electronic information (for example, records maintained on a distributed ledger, such as a blockchain) is available on a continuous basis during the audit. In such cases, auditors may develop audit procedures using automated tools and techniques to obtain information about transactions on a real-time basis.

Inspection

.A51 Inspection involves an examination (being physically present or using remote observation tools) of an asset or an examination of records or documents, whether internal or external or in paper form, electronic form, or other media. An example of inspection used as a test of controls is inspection of records, using manual or automated techniques, for evidence of authorization. An example of an automated technique for inspection is the use of text-recognition programs to examine large populations of documents, such as contracts, to identify items for further audit consideration.

Observation

.A52 Observation includes looking at a process or procedure being performed by others (for example, the auditor's observation of inventory counting by the entity's personnel or the performance of control activities).

.A53 Remote observation tools (for example, a camera mounted on a drone or a video transmission) may aid the auditor in performing an inspection or an observation procedure, such as management's physical inventory count.

.A54 Audit evidence obtained through observation procedures is limited to the point in time at which the observation takes place and by the fact that the act of being observed may affect how the process or procedure is performed.

Confirmation

.A55 An external confirmation is defined as audit evidence obtained as a direct written response to the auditor from a third party (the confirming party), either in paper form or by electronic or other medium (for example, through the auditor's direct access to information held by a third party). See section 505, *External Confirmations*, for further guidance.

Recalculation

.A56 Recalculation consists of testing the mathematical accuracy of information. Recalculation may be performed manually or using automated tools and techniques.

.A57 By using automated tools and techniques, auditors may be able to perform recalculation procedures on 100% of a population, for example, recalculating the gross margin for each product sold for an entity's product line.

Reperformance

.A58 Reperformance involves the independent execution of procedures or controls by the auditor that were originally performed as part of the entity's internal control.

Analytical Procedures

.A59 Analytical procedures consist of evaluations of financial information through analysis of plausible relationships among both financial and nonfinancial data. Analytical procedures also encompass investigation as necessary of identified fluctuations or relationships that are inconsistent with other relevant information or that differ from expected values by a significant amount. Audit data analytics are techniques that the auditor may use to perform risk assessment procedures or substantive procedures.

.A60 Use of audit data analytics may enable auditors to identify areas that might represent specific risks relevant to the audit, including the existence of unusual transactions and events, and amounts, ratios, and trends that warrant investigation. An analytical procedure performed using audit data analytics may be used to produce a visualization of transactional detail to assist the auditor in performing risk assessment procedures. For example, a visualization depicting the composition of a population may be prepared to illustrate the volume and dollar value of items in the population. Although the auditor may find this technique useful in obtaining information in order to identify and assess the risks of material misstatement, the information provided may not be sufficiently precise for the auditor's purpose of obtaining information to respond to the assessed risks of material misstatement at the assertion level.

.A61 Analytical procedures involve the auditor's exercise of professional judgment and may be performed manually or by using automated tools and techniques. For example, the auditor may manually scan data to identify significant or unusual items to test, which may include the identification of unusual individual items within account balances or other data through the reading or analysis of entries in transaction listings, subsidiary ledgers, general ledger control accounts, adjusting entries, suspense accounts, reconciliations, and other detailed reports for indications of misstatements that have occurred. The auditor also might use automated tools and techniques to scan an entire population of transactions and identify those transactions meeting the auditor's criteria for a transaction being unusual. The identification of items that exhibit characteristics of risk of material misstatement through analytical procedures provides the auditor with audit evidence about those items. Analytical procedures also provide audit evidence about the items not exhibiting characteristics of risks of material misstatements because the auditor has determined, exercising professional judgment, that the items not selected for further audit procedures are less likely to be materially misstated.

Inquiry

.A62 Inquiry consists of seeking information, both financial and nonfinancial, from knowledgeable persons within the entity or outside the entity. Inquiry is used extensively throughout the audit, in addition to other audit procedures.

.A63 Responses to inquiries may provide the auditor with information that corroborates other information or with new information. Alternatively, responses might provide information that contradicts other information that the auditor has obtained (for example, regarding the possibility of management override of controls). Responses to inquiries may provide a basis for the auditor to modify or perform additional audit procedures. Evaluating responses to inquiries is an integral part of the inquiry process.

.A64 Inquiries of knowledgeable persons outside the entity do not meet the definition of *external confirmations* in accordance with section 505. However, the responses to inquiries of persons outside of the entity are considered in accordance with this section and may constitute reliable information to be used as audit evidence.

Inconsistencies in, or Doubts About the Reliability of, Audit Evidence (Ref: par. .10)

.A65 Information obtained from different sources may indicate that an individual item of audit evidence is not reliable, such as when audit evidence obtained from one source is inconsistent with that obtained from another. This may be the case when, for example, an external confirmation is inconsistent with the terms of a debt obligation. Section 230, *Audit Documentation*, includes a specific documentation requirement if the auditor identifies information that is inconsistent with the auditor's final conclusion regarding a significant finding or issue.[28]

.A66 In the case of inquiries about management's intent, the information available to support management's intent may be limited.[29]Section 580, *Written Representations*, provides guidance about obtaining written representations that address management's intent. Maintaining professional skepticism is particularly important when corroborative audit evidence is limited to inquiry. In such circumstances, it may be helpful to consider the consistency, or lack thereof, between the information obtained through inquiry and management's history of carrying out its stated intentions, management's stated reasons for choosing a course of action, and management's ability to pursue a specific course of action.

[28]Paragraph .12 of section 230, *Audit Documentation*.

[29]Paragraph .A13 of section 580, *Written Representations*.

Appendix A — Considerations Regarding the Use of External Information Sources (Ref: par. .A12*b*)

.A67

1. As defined in paragraph 6 of this section, an *external information* source is an external individual or organization that provides information used by the entity in preparing the financial statements or that has been obtained by the auditor as audit evidence, when such information is suitable for use by a broad range of users.

2. External information sources may include pricing services, governmental organizations, central banks, recognized stock exchanges, media, or academic journals. Examples of information that may be obtained from external information sources include the following:

   - Prices and pricing-related data
   - Macroeconomic data, such as historical and forecast unemployment rates and economic growth rates, or census data
   - Credit history data
   - Industry-specific data, such as an index of reclamation costs for certain extractive industries or viewership information or ratings used to determine advertising revenue in the entertainment industry
   - Mortality tables used to determine liabilities in the life insurance and pension sectors
   - Documents or records on websites or in databases or distributed ledgers

3. As set forth in generally accepted auditing standards, an external individual or organization cannot, in respect of any particular set of information, be both an external information source and

   - a management's specialist,
   - a service organization, or
   - an auditor's specialist.

4. However, an external individual or organization may, for example, be acting as a management's specialist when providing a particular set of information but acting as an external information source when providing a different set of information. Professional judgment may be needed to determine whether an external individual or organization is acting as an external information source or as a management's specialist with respect to a particular set of information. The following examples illustrate some of the considerations that may be used. Each situation may be influenced by individual facts and circumstances:

   - An external individual or organization may be providing information about real estate prices that is suitable for use by a broad range of users, for example, information made generally available pertaining to a geographical region, and determined to be an external information source with respect to that set of information. The same external organization may also be acting as a management's or auditor's specialist in providing commissioned valuations, with respect to the entity's real estate portfolio specifically tailored for the entity's facts and circumstances.

- Some actuarial organizations publish mortality tables for general use that, when used by an entity, would generally be considered to be information from an external information source. The same actuarial organization may also be a management's specialist with respect to different information tailored to the specific circumstances of the entity to help management determine the pension liability for several of the entity's pension plans.
- An external individual or organization may possess expertise in the application of models to estimate the fair value of securities for which there is no observable market. If the external individual or organization applies that expertise in making an estimate specifically for the entity and that work is used by management in preparing its financial statements, the external individual or organization is likely to be a management's specialist with respect to that information. If, on the other hand, that external individual or organization merely provides, to the public, prices or pricing-related data regarding private transactions, and the entity uses that information in its own estimation methods, the external individual or organization is likely to be an external information source with respect to such information.
- An external individual or organization may publish information, suitable for a broad range of users, about risks or conditions in an industry. If used by an entity in preparing its risk disclosures (for example, in compliance with FASB *Accounting Standards Codification* 275, *Risk and Uncertainties*), such information would ordinarily be considered to be information from an external information source. However, if the same type of information has been specifically commissioned by the entity to use its expertise to develop information about those risks, tailored to the entity's circumstances, the external individual or organization is likely to be acting as a management's specialist.
- An external individual or organization may apply its expertise in providing information about current and future market trends, which it makes available to, and is suitable for use by, a broad range of users. If used by the entity to help make decisions about assumptions to be used in making accounting estimates, such information is likely to be considered to be information from an external information source. If the same type of information has been commissioned by the entity to address current and future trends relevant to the entity's specific facts and circumstances, the external individual or organization is likely to be acting as a management's specialist.

5. The auditor is required by paragraph 7 of this section to take into account the relevance and reliability of information to be used as audit evidence regardless of

whether that information has been used by the entity in preparing the financial statements or was obtained by the auditor. For information obtained from an external information source, that consideration may, in certain cases, include

- information about the external information source,
- details about the preparation of the information by the external information source, or
- audit evidence obtained through designing and performing further audit procedures in accordance with section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained,* or, where applicable, section 540, *Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures*.

6. Obtaining an understanding of why management or, when applicable, a management's specialist uses an external information source, and how the relevance and reliability of the information was taken into account (including its accuracy and completeness), may help inform the auditor's consideration of relevance and reliability of that information.

7. The following factors may be important when taking into account the relevance and reliability of information obtained from an external information source, including its accuracy and completeness. Some of these factors may only be relevant when the information has been used by management in preparing the financial statements or has been obtained by the auditor:

   - The nature and authority of the external information source (for example, a central bank or government statistics office with a legislative mandate to provide industry information to the public may be considered a reliable external information source for certain types of information.)
   - The ability of management to influence the information obtained, through relationships between the entity and the external information source
   - The competence and reputation of the external information source with respect to the information, including whether, in the auditor's professional judgment, the information is routinely provided by an external information source with a track record of providing reliable information
   - Past experience of the auditor with the reliability of the information provided by the external information source
   - Evidence of general market acceptance by users of the relevance or reliability of information from an external information source for a similar purpose to that for which the information has been used by management or the auditor
   - Whether the entity has in place controls to address the relevance and reliability of the information obtained and used
   - Whether the external information source accumulates overall market information or engages directly in "setting" market transactions

- Whether the information is suitable for use in the manner in which it is being used and, if applicable, was developed taking into account the applicable financial reporting framework
- Alternative information that may contradict the information used
- The nature and extent of disclaimers or other restrictive language relating to the information obtained[1]
- Information about the methods used in preparing the information; how the methods are being applied including, where applicable, how models have been used in such application; and the controls over the methods
- When available, information relevant to considering the appropriateness of assumptions and other data applied by the external information sources in developing the information obtained

8. The nature and extent of the auditor's consideration takes into account the assessed risks of material misstatement at the assertion level to which the use of the external information is relevant, the degree to which the use of that information is relevant to the reasons for the assessed risks of material misstatement, and the possibility that the information from the external information source may not be reliable (for example, whether it is from a credible source). Based on the auditor's consideration of the matters described in paragraph 5 of this appendix, the auditor may determine that

   a. further understanding of the entity and its environment, the applicable financial reporting framework, and the entity's system of internal control, is needed, in accordance with Statement on Auditing Standards (SAS) No. 145, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, or

   b. further audit procedures, in accordance with section 330[2] and section 540,[3] when applicable, are appropriate in the circumstances, to respond to the assessed risks of material misstatement at the assertion level related to the use of information from an external information source. Such audit procedures may include the following:

      i. Performing a comparison of information obtained from the external information source with information obtained from an alternative independent information source

      ii. When relevant to considering management's use of an external information source, obtaining an understanding of controls management has in place to consider the reliability of the information

[1]Paragraphs .A56–.A62 of section 501, *Audit Evidence — Specific Considerations for Selected Items*.

[2]Paragraph .06 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

[3]Paragraphs .12–.14 of section 540, *Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures*.

from external information sources and potentially testing the operating effectiveness of such controls

iii. Performing procedures to obtain information from the external information source to understand its processes, techniques, and assumptions, for the purposes of identifying, understanding, and when relevant, testing the operating effectiveness of its controls

9. When the auditor does not have a sufficient basis upon which to consider the relevance and reliability of information from an external information source, the auditor may have a limitation on scope if sufficient appropriate audit evidence cannot be obtained through alternative procedures. Any imposed limitation on scope is evaluated in accordance with the requirements of section 705, *Modifications to the Opinion in the Independent Auditor's Report.*

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Exhibit A — Using ADAs to Simultaneously Accomplish Multiple Audit Procedures (Ref: par. A46 and par. A61)

.A68

This exhibit illustrates the use of an audit data analytic (ADA) that simultaneously accomplishes the objectives of both risk assessment and substantive audit procedures.

Background

The fact pattern in this example, in which the auditor uses a revenue transaction scoring model, will focus on the audit of an entity that recognizes revenue when control of the product (or satisfaction of the performance obligation) transfers at a specific point in time,[1] such as a manufacturer of external data storage devices.

For purposes of this example, assume the following:

- Revenue was determined to be a material account during initial planning and scoping with the occurrence (including cut-off) and accuracy assertions being more susceptible to misstatement.
- The ADA was performed after initial planning and scoping as part of the ongoing and iterative risk assessment process.
- All transactions within the account were subject to the same processes and controls.
- The purpose of the ADA was to design the nature, timing, and extent of the audit procedures and to obtain audit evidence.
- Based on the understanding of controls, the auditor has concluded that the controls over revenue were effectively designed and have been implemented, the auditor has tested certain relevant controls and determined they are operating effectively, and the auditor is otherwise satisfied the entity has appropriately applied the requirements of the applicable financial reporting framework (for example, FASB *Accounting Standards Codification* (ASC) 606, *Revenue from Contracts with Customers*).
- Data used in the ADA are relevant and reliable and have been tested for accuracy and completeness.
- Customers tend to purchase consistent quantities throughout the year, with the exception of purchases just prior to major retail holidays, such as Memorial Day, Black Friday, and Christmas.
- Some customers only purchase in bulk a few times a year, but most customers consistently purchase quantities one to two times a month.
- The customer base does not fluctuate significantly from period to period.

[1]FASB *Accounting Standards Codification* 606-10-25-30.

- Revenue is recognized when control transfers at a free-on-board (FOB) shipping point.
- Invoicing occurs the day the product ships from the entity's warehouse.
- Warehouse personnel typically do not work weekends.
- The company does not sell product to any related parties.

All items that are determined to be individually material were excluded from the ADA and substantively tested separately. The remaining population that was subject to the ADA comprised routine, non-complex transactions with third parties. The processing and recording of transactions are highly automated and less likely to be susceptible to management override.

Description of the ADA

ADA Scoring Model — A complete population of transactions (at the individual item level) for one material account (excluding individually significant items) was subjected to an ADA designed to identify and assess risk and obtain audit evidence specific to a relevant assertion using different routines. The scoring of each routine is based on the evidence expected to be provided by that routine in relation to the auditor's assessment of the risks of material misstatement.

The routines were as follows:

Routine	Description	Characteristic	Transaction Scoring Model	Risk Score	Relevant Fact Pattern
1	Identify customers with infrequent revenue activity (less than X transactions)	Volume	Less than 6 transactions	2	Some customers only purchase in bulk a few times a year, but most customers consistently purchase quantities one to two times a month
			6–12 transactions	1	Some customers only purchase in bulk a few times a year, whereas others purchase smaller quantities one to two times a month.
			More than 12 transactions	0	
2	Identify customers with a significant fluctuation in volume of products purchased (item level) on a period-over-period basis	Volume	Greater than 70% variance	2	Customers tend to purchase consistent quantities throughout the year, with the exception of purchases just prior to major retail holidays, such as Memorial Day, Black Friday, and Christmas.
			30% to 70% variance	1	Some customers only purchase in bulk a few times a year, but most customers consistently purchase quantities one to two times a month.
			Less than 30% variance	0	
3	Identify activity for new customers	Volume	Customer for 6 months or less	1	The customer base does not fluctuate significantly from period to period.
			Customer for greater than 6 months	0	
4	Identify all transactions recorded within X days of quarter-end.	Timing	Within 3 days of quarter end	1	Revenue is recognized when control transfers at FOB shipping point.
			Greater than 3 days of quarter end	0	
5	Identify revenue transactions with an invoice date on an unusual date (for example,	Timing	Transaction on a weekend/holiday	2	Invoicing occurs the day the product ships from the company's warehouse.

Routine	Description	Characteristic	Transaction Scoring Model	Risk Score	Relevant Fact Pattern
	weekend or holiday)				
			Transaction on a weekday	0	Warehouse personnel typically do not work weekends.
6	Identify instances in which the shipping document date and invoice date do not match.	Timing	Invoice and shipping document do not match, and invoice date is before shipping date.	4	Revenue is recognized when control transfers at FOB shipping point.
			Invoice and shipping document do not match, and shipping date is before invoice date.	2	Invoicing occurs the day the product ships from the company's warehouse.
			Invoice and shipping document match.	0	

Running the revenue transaction level detail through the ADA routines produces a total score for each transaction. The auditor then groups each transaction into a sub-population based on the individual transaction score. The number of sub-populations may differ depending upon the type of ADA developed, the scores produced by the ADA, and the auditor's assessment of those scores. For purposes of this example, the auditor grouped the population of the account into sub-populations as follows:

Assessed Risk	Total Risk Score	Group
High risk	8–12	A
Moderate risk	4–7	B
Low risk	0–3	C

- Group A – High risk — Comprises items with characteristics deemed to present a higher risk of material misstatement.

  Approach — The auditor would perform additional substantive procedures to provide more persuasive audit evidence for the items identified by the ADA. For example, the nature of the substantive procedure may be confirmation as opposed to inspection; the extent of testing may be greater (larger proportionate sample size); or the timing of the procedure may be at or near the financial statement date as opposed to earlier in the period.

- Group B – Moderate risk — Comprises items that warrant further procedures but do not have characteristics of those in the higher risk group.

  Approach — The auditor would perform substantive procedures appropriate for the items identified by the ADA in less depth relative to the higher risk population. For example, the nature of the substantive procedure may be limited to inspection of documents and records; the extent of testing may be less (smaller proportionate sample size); and the timing of the procedure may be earlier in the period.

- Group C – Low risk — Comprises items that demonstrate no unusual characteristics based on the procedure performed using the ADA.

  Approach — The results of other audit procedures performed throughout the audit would be evaluated for contradictory information regarding the assessed risk of material misstatement. In the absence of contradictory information, as the routines of the ADA are sufficiently precise for the auditor to conclude that the risks of material misstatement have been addressed, no additional substantive procedures may be warranted for any reason other than to incorporate an element of unpredictability in the selection of auditing procedures to be performed from year to year.

As a result of the previous procedures, the auditor concluded

- Groups A, B, and C comprise a material account in the aggregate for which each group has differing risks.
- for Group C, the audit evidence provided over the transactions (within the population analyzed by the ADA in combination with the audit evidence provided by testing of certain key controls over revenue as determined by the auditor and the absence of contradictory audit evidence from the testing of related accounts) was sufficiently persuasive for the auditor to conclude that the risk of material misstatement was addressed.
- for Groups A and B, the audit evidence provided by the ADA was not sufficiently persuasive, and further substantive procedures were required to address the risk of material misstatement.

AU-C Section 9500

Audit Evidence: Auditing Interpretations of Section 500

1. The Effect of an Inability to Obtain Audit Evidence Relating to Income Tax Accruals

.01 *Question*—The IRS's audit manual instructs its examiners on how to secure from corporate officials "tax accrual workpapers" or the "tax liability contingency analysis," including "a memorandum discussing items reflected in the financial statements as income or expense where the ultimate tax treatment is unclear." The audit manual states that the examiner may question or summons a corporate officer or manager concerning the "knowledge of the items that make up the corporation's contingent reserve accounts." It also states that "in unusual circumstances, access may be had to the audit or tax workpapers" of an independent accountant or an accounting firm after attempting to obtain the information from the taxpayer. IRS policy also includes specific procedures to be followed in circumstances involving "listed transactions," to help address what the IRS considers to be abusive tax avoidance transactions (Internal Revenue Manual, section 4024.2-.5, 5/14/81, and Internal Revenue Service Announcement 2002-63, 6/17/02).

.02 Concern over IRS access to tax accrual working papers might cause some entities to not prepare or maintain appropriate documentation of the calculation or contents of the accrual for income taxes included in the financial statements or to deny the independent auditor access to such information.

.03 What effect does this situation have on the auditor's opinion on the financial statements?

.04 *Interpretation*—The entity is responsible for its tax accrual, the underlying support for the accrual, and the related disclosures. Limitations on the auditor's access to information considered necessary to audit the tax accrual will affect the auditor's ability to issue an unmodified opinion on the financial statements.

.05 The auditor is required to design and perform audit procedures that are appropriate in the circumstances for the purpose of obtaining sufficient appropriate audit evidence.[1]

.06 If the entity does not have appropriate documentation of the calculation or contents of the accrual for income taxes and denies the auditor access to entity personnel responsible for making the judgments and estimates relating to the accrual, the auditor is required to conclude whether sufficient appropriate audit evidence has been obtained. If the auditor has

[1] Paragraph .06 of section 500, *Audit Evidence*.

not obtained sufficient appropriate audit evidence about a relevant assertion, the auditor is required to attempt to obtain further audit evidence.[2]

.07 If the auditor is unable to obtain sufficient appropriate audit evidence, the auditor is required to express a qualified opinion or disclaim an opinion on the financial statements.[3]

.08 If the entity has appropriate documentation but denies the auditor access to it and to entity personnel who possess the information, the auditor is required to perform procedures to evaluate the consequence of an inability to obtain sufficient appropriate audit evidence due to a management-imposed limitation.[4]

.09 The auditor is required to request management to provide a written representation that it has provided the auditor with all relevant information and access, as agreed upon in the terms of the audit engagement.[5] If management does not provide the written representations required by section 580, *Written Representations*, the auditor is required to disclaim an opinion on the financial statements in accordance section 705, *Modifications to the Opinion in the Independent Auditor's Report*, or withdraw from the engagement.[6]

.10 *Question*—An entity may allow the auditor to inspect its tax accrual workpapers but request that copies not be retained for audit documentation, particularly copies of the tax liability contingency analysis. The entity also may suggest that the auditor not prepare and maintain similar documentation of his or her own. What are the auditor's requirements in deciding a response to such a request?

.11 *Interpretation*—Section 230, *Audit Documentation*, defines *audit documentation* as the record of audit procedures performed, relevant audit evidence obtained, and conclusions the auditor reached.[7] The auditor is required to prepare audit documentation that is sufficient to enable an experienced auditor, having no previous connection with the audit, to understand

a. the nature, timing, and extent of the audit procedures performed to comply with generally accepted auditing standards and applicable legal and regulatory requirements;

b. the results of the audit procedures performed and the audit evidence obtained; and

c. significant findings or issues arising during the audit, the conclusions reached thereon, and significant judgments made in reaching those conclusions.[8]

---

[2]Paragraphs .28–.29 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

[3]Paragraphs .08 and .10 of section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

[4]Paragraphs .11–.14 of section 705.

[5]Paragraph .11*a* of section 580, *Written Representations*.

[6]Paragraph .25 of section 580.

[7]Paragraph .06 of section 230, *Audit Documentation*.

[8]Paragraph .08 of section 230.

Section 500, *Audit Evidence*, states that other information includes information obtained by the auditor from inquiry, observation, inspection, and physical examination. The quantity, type, and content of audit documentation are matters of the auditor's judgment.

.12 The audit documentation of the results of auditing procedures directed at the tax accounts and related disclosures also includes sufficient appropriate audit evidence about the significant elements of the entity's tax liability contingency analysis. This audit documentation includes copies of the entity's documents, schedules, or analyses (or auditor-prepared summaries thereof) to enable the auditor to support his or her conclusions regarding the appropriateness of the entity's accounting and disclosure of significant tax-related contingency matters. The audit documentation reflects the procedures performed and conclusions reached by the auditor and, for significant matters, include the entity's documentary support for its financial statement amounts and disclosures.

.13 The audit documentation includes the significant elements of the entity's analysis of tax contingencies or reserves, including roll-forward of material changes to such reserves. In addition, the audit documentation provides the entity's position and support for income tax related disclosures, such as its effective tax rate reconciliation, and support for its intraperiod allocation of income tax expense or benefit to continuing operations and to items other than continuing operations. When applicable, the audit documentation also includes the entity's basis for assessing deferred tax assets and related valuation allowances and its support for applying the "indefinite reversal criteria" discussed in FASB ASC 740-30-25-17, including its specific plans for reinvestment of undistributed foreign earnings.

.14 *Question*—In some situations, an entity may furnish its external legal counsel or in-house legal or tax counsel with information concerning the tax contingencies covered by the accrual for income taxes included in the financial statements and ask counsel to provide the auditor an opinion on the adequacy of the accrual for those contingencies.

.15 In such circumstances, rather than inspecting and obtaining documentary evidence of the entity's tax liability contingency analysis and making inquiries of the entity, may the auditor consider the counsel as a management's specialist within the meaning of section 500 and rely solely on counsel's opinion as an appropriate procedure for obtaining audit evidence to support his or her opinion on the financial statements?

.16 *Interpretation*—No. The opinion of legal counsel in this situation does not provide sufficient appropriate audit evidence to afford a reasonable basis for an opinion on the financial statements. The opinion of legal counsel on specific tax issues that he or she is asked to address and to which he or she has devoted substantive attention, as contemplated by the legal counsel's response to an auditor's letter of inquiry, can be useful to the auditor in forming his or her own opinion.

.17 An opinion from an entity's legal or tax counsel, similar to other work products obtained from a management's specialist, is useful in situations in which the auditor does not have adequate technical training and proficiency. In this case, however, the auditor's education, training, and experience, on the other hand, do enable him or her to be knowledgeable concerning income tax matters and competent to assess their presentation in the financial statements.

.18 Therefore, while the opinion of legal counsel on specific tax issues can be useful to the auditor in forming his or her own opinion, the audit of income tax accounts requires a combination of tax expertise and knowledge about the entity's business that is accumulated during all aspects of an audit. Therefore, as previously stated, it is not appropriate for the auditor to rely solely on such legal opinion.

.19 *Question*—A entity may have obtained the advice or opinion of an outside tax adviser related to the tax accrual or matters affecting it, including tax contingencies, and further may attempt to limit the auditor's access to such advice or opinion, or limit the auditor's documentation of such advice or opinion. This limitation on the auditor's access may be proposed on the basis that such information is privileged. Can the auditor rely solely on the conclusions of third-party tax advisers? What audit evidence should the auditor obtain and include in the audit documentation?

.20 *Interpretation*—As discussed in paragraphs .16–.18 of this interpretation, the auditor cannot accept an entity's or a third party's analysis or opinion with respect to tax matters without careful consideration and application of the auditor's tax expertise and knowledge about the entity's business. As a result of applying such knowledge to the facts, the auditor may encounter situations in which the auditor either disagrees with the position taken by the entity, or its advisers, or does not have sufficient appropriate audit evidence to support his or her opinion.

.21 If the entity's support for the tax accrual or matters affecting it, including tax contingencies, is based upon an opinion issued by an outside adviser with respect to a potentially material matter, the auditor is required to obtain access to the opinion,[9] notwithstanding potential concerns regarding attorney-client or other forms of privilege. The audit documentation includes either the actual advice or opinions rendered by an outside adviser or other sufficient documentation or abstracts supporting both the transactions or facts addressed as well as the analysis and conclusions reached by the entity and adviser. Alternatives such as redacted or modified opinions may be considered but must, nonetheless, include sufficient content to articulate and document the entity's position so that the auditor can formulate his or her conclusion. Similarly, it may be possible to accept an entity's analysis summarizing an outside adviser's opinion, but the entity's analysis must provide sufficient appropriate audit evidence for the auditor to formulate his or her conclusion. In addition, written representations may be obtained stating that the entity has not received any advice or opinions that are contradictory to the entity's support for the tax accrual.

.22 If the auditor is unable to accumulate sufficient appropriate audit evidence about whether there is a supported and reasonable basis for the entity's position, the auditor is required to consider the effect of this scope limitation on his or her opinion.[10]

[Issue Date: March 1981; Amended: April 9, 2003; Revised: December 2005; Revised: March 2006; Revised: March 2008; Revised: June 2009; Revised: October 2011, effective for audits of financial statements for periods ending on or after December 15, 2012.]

---

[9] Paragraph .11 of this interpretation.

[10] Paragraphs .11–.14 of section 705.

New GASB Pension Standards

In June 2012, the Governmental Accounting Standards Board (GASB) issued two new standards that will substantially change the accounting and financial reporting of public employee pension plans and the state and local governments that participate in such plans. GASB Statement No. 67, *Financial Reporting for Pension Plans*, revises existing guidance for the financial reports of most governmental pension plans. GASB Statement No. 68, *Accounting and Financial Reporting for Pensions*, revises and establishes new financial reporting requirements for most governments that provide their employees with pension benefits. GASB Statement No. 67 is effective for financial statements for periods beginning after June 15, 2013. GASB Statement No. 68 is effective for financial statements for fiscal years beginning after June 15, 2014.

Interpretation No. 2, "Auditor of Participating Employer in a Governmental Cost-Sharing Multiple-Employer Pension Plan" (paragraphs .23–.29), Interpretation No. 3, "Auditor of Participating Employer in a Governmental Agent Multiple-Employer Pension Plan" (paragraphs .30–.36), and Interpretation Nos. 1–2 of section 805, *Special Considerations —Audits of Single Financial Statements and Specific Elements, Accounts, or Items of a Financial Statement*, are intended to assist both plan and employer auditors who are auditing entities that have implemented the new accounting standards.

2. Auditor of Participating Employer in a Governmental Cost-Sharing Multiple-Employer Pension Plan

.23 *Question*—GASB Statement No. 68 requires governmental entities (employers) participating in governmental cost-sharing multiple-employer pension plans (cost-sharing plan or plan) to present certain pension amounts in employer financial statements that are calculated by the plan or its actuary. Such amounts are based, in part, on records maintained only by the plan.

.24 Do the audited financial statements of the plan prepared in accordance with generally accepted accounting principles (GAAP) and additional unaudited information provided by the plan's management necessary to calculate the employer's net pension liability provide the employer's auditor with sufficient appropriate audit evidence upon which to base the opinion on the affected opinion units of the governmental employer financial reporting entity?

.25 *Interpretation*—No. GASB Statement No. 67 requires only the disclosure of the collective net pension liability for all participating employers in GAAP financial statements of cost-sharing plans, not each employer's proportionate share of the collective net pension liability. Further, GAAP does not require the plan to present deferred outflows of resources or deferred inflows of resources by category, pension expense, or each participating employer's share of collective pension amounts. Unaudited information provided by the plan's management to the employers to support allocations or pension amounts that has not been subjected to further audit procedures beyond those performed in the audit of the basic plan financial statements would not constitute sufficient appropriate audit evidence to support the relevant assertions in the employer's financial statements related to the pension amounts, including required disclosures.

.26 Absent additional audit evidence from the cost-sharing plan (for example, auditor's opinions on the schedule of employer allocations and certain key elements including net pension liability, total deferred outflows of resources, total deferred inflows of resources, and total pension expense in a schedule of pension amounts), the employer auditor would not likely be able to accumulate sufficient appropriate audit evidence to support the pension amounts and disclosures in the employer's financial statements. When pension amounts are material to one or more applicable opinion units of the employer's financial statements and the auditor is unable to obtain sufficient appropriate audit evidence to conclude that the financial statements of those opinion units are free from material misstatement, the auditor should modify the audit opinion pursuant to section 705.

.27 *Question*—A plan has engaged its auditor to audit and report on the schedule of employer allocations and certain key elements including net pension liability, total deferred outflows of resources, total deferred inflows of resources, and total pension expense in a schedule of pension amounts, as described in the AICPA's State and Local Governments Expert Panel white paper *Governmental Employer Participation in Cost-Sharing Multiple-Employer Plans: Issues Related to Information for Employer Reporting*. May an employer auditor use the plan auditor's report as evidence for the audit of the employer's financial statements?

.28 *Interpretation*—Yes. The employer auditor is solely responsible for the audit of the employer's financial statements and, therefore, is responsible for determining the sufficiency and appropriateness of audit evidence necessary to reduce audit risk to an appropriately low level. Nevertheless, the employer auditor may use the plan auditor's report on the schedules as evidence that the pension amounts allocated to the employer and included in the employer's financial statements are not materially misstated.

.29 Before using the report of the plan auditor as evidence, the employer auditor should evaluate whether the plan auditor's report and accompanying schedules are adequate and appropriate for the employer auditor's purposes. For example, the employer auditor may review the plan auditor's report and any related opinion modifications and assess other matters discussed in the report. Additionally, the employer auditor should evaluate whether the plan auditor has the necessary competence and independence for the employer auditor's purposes. Further, the employer auditor has a responsibility to verify and recalculate amounts specific to the applicable employer, including the employer amount used in the allocation percentage (that is, the numerator of the calculation), to recalculate the allocation percentage for the employer, and to recalculate the pension amounts allocated to the employer based on the allocation percentage.

[Issue Date: April 2014.]

3. Auditor of Participating Employer in a Governmental Agent Multiple-Employer Pension Plan

.30 *Question*—GASB Statement No. 68 requires governmental entities (employers) participating in governmental agent multiple-employer pension plans (agent plan or plan) to present certain pension amounts in employer financial statements that are calculated by the plan or its actuary. Such amounts are based, in part, on records maintained only by the plan.

.31 Do the audited financial statements of the plan prepared in accordance with GAAP and additional unaudited information provided by the plan's management necessary to calculate the employer's net pension liability provide the employer's auditor with sufficient appropriate audit evidence upon which to base the opinion on the affected opinion units of the governmental employer financial reporting entity?

.32 *Interpretation*—No. GASB Statement No. 67 does not require the plan to present net pension liability, deferred outflows of resources or deferred inflows of resources by category, pension expense, or each participating employer's specific pension amounts. Unaudited information provided by the plan's management to the employers to support allocations or pension amounts that has not been subjected to further audit procedures beyond those performed in the audit of the basic plan financial statements would not constitute sufficient appropriate audit evidence to support the relevant assertions in the employer's financial statements related to the pension amounts, including required disclosures.

.33 Absent additional evidence obtained, for example, through the suggested best practices as described in the AICPA's State and Local Governments Expert Panel white paper *Governmental Employer Participation in Agent Multiple-Employer Plans: Issues Related to Information for Employer Reporting*, the employer auditor would not likely be able to accumulate sufficient appropriate audit evidence to support the pension amounts and disclosures in the employer's financial statements. When pension amounts are material to one or more applicable opinion units of the employer's financial statements and the auditor is unable to obtain sufficient appropriate audit evidence to conclude that the financial statements of those opinion units are free from material misstatement, the auditor should modify the audit opinion pursuant to section 705.

.34 *Question*—A plan has engaged its auditor to audit and report on the schedule of changes in fiduciary net position by employer, as described in the AICPA's State and Local Governments Expert Panel white paper referenced in paragraph .33 of this interpretation. May an employer auditor use the plan auditor's report as evidence about the fiduciary net position and changes in fiduciary net position for the audit of the employer's financial statements?

.35 *Interpretation*—Yes. The employer auditor is solely responsible for the audit of the employer's financial statements and, therefore, is responsible for determining the sufficiency and appropriateness of audit evidence necessary to reduce audit risk to an appropriately low level. Nevertheless, the employer auditor may use the plan auditor's report on the schedule as evidence about both the fiduciary net position and changes in fiduciary net position of the employer. However, the employer auditor should consider whether the opinion is on the schedule as a whole or on each employer column. If the opinion is on the schedule as a whole, it is likely that the employer auditor will need additional evidence to support these amounts in the employer's financial statements (examples of such audit evidence are included in the white paper referenced in paragraph .33 of this interpretation).

.36 Before using the work of the plan auditor as evidence, the employer auditor should evaluate whether the plan auditor's report and accompanying schedule are adequate and appropriate for the employer auditor's purposes. For example, the employer auditor may review the plan auditor's report and any related opinion modifications and assess other matters discussed in the report. Additionally, the employer auditor should evaluate whether the plan auditor has the necessary competence and independence for the employer auditor's purposes.

AU-C Section 501

Audit Evidence — Specific Considerations for Selected Items

Source: SAS No. 122; SAS No. 136; SAS No. 142; SAS No. 143; SAS No. 144; SAS No. 145.

Effective for audits of financial statements for periods ending on or after December 15, 2012, unless otherwise indicated.

Note

In March 2023, the Accounting Standards Board issued Statement on Auditing Standards No. 149, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors and Audits of Referred-to Auditors)*, which contains amendments to this section.

The amendments are effective for audits of financial statements for periods ending on or after December 15, 2026, and can be viewed in appendix C of section 600 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses specific considerations by the auditor in obtaining sufficient appropriate audit evidence, in accordance with section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*; section 500, *Audit Evidence*; section 540, *Auditing Accounting Estimates and Related Disclosures*; and other relevant AU-C sections, regarding certain aspects of (*a*) investments in securities and derivative instruments; (*b*) inventory; (*c*) litigation, claims, and assessments involving the entity; (*d*) segment information in an audit of financial statements; and (*e*) use of management's specialists. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 143.]

Effective Date

.02 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objective

.03 The objective of the auditor is to obtain sufficient appropriate audit evidence regarding the

a. valuation of investments in securities and derivative instruments;

b. existence and condition of inventory;

c. completeness of litigation, claims, and assessments involving the entity;

d. presentation and disclosure of segment information, in accordance with the applicable financial reporting framework; and

e. work of management's specialists.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

Definition

.04 For purposes of GAAS, the following term has the meaning attributed as follows:

Management's specialist. An individual or organization possessing expertise in a field other than accounting or auditing, whose work in that field is used by the entity to assist the entity in preparing the financial statements.

[Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142.]

Requirements

Investments in Securities and Derivative Instruments (Ref: par. .A1–.A4)

Investments in Securities When Valuations Are Based on the Investee's Financial Results (Excluding Investments Accounted for Using the Equity Method of Accounting)

.05 When investments in securities are valued based on an investee's financial results, excluding investments accounted for using the equity method of accounting, the auditor should obtain audit evidence regarding the investee's financial results. including as applicable in the circumstances, performing the following procedures: (Ref: par. .A5–.A9)

a. Obtain and read available financial statements of the investee and the accompanying audit report, if any, including determining whether the report of the other auditor is satisfactory for this purpose.

b. If the investee's financial statements are not audited, or if the audit report on such financial statements is not satisfactory to the auditor, apply, or request that the investor entity arrange with the investee to have another auditor apply, appropriate auditing procedures to such financial statements, considering the materiality of the investment in relation to the financial statements of the investor entity.

c. If the carrying amount of the investment reflects factors that are not recognized in the investee's financial statements or fair values of assets that are materially different from the investee's carrying amounts, obtain sufficient appropriate audit evidence regarding such amounts.

d. If the difference between the financial statement period of the entity and the investee has or could have a material effect on the entity's financial statements, determine whether the entity's management has properly considered the lack of comparability and determine the effect, if any, on the auditor's report. (Ref: par. .A10)

If the auditor is not able to obtain sufficient appropriate audit evidence in support of the investee's financial results because of an inability to perform appropriate procedures, the auditor should determine the effect on the auditor's opinion, in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*. [Paragraph renumbered by the issuance of SAS No. 142, July 2020. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 143.]

.06 With respect to subsequent events and transactions of the investee occurring after the date of the investee's financial statements but before the date of the auditor's report, the auditor should obtain and read available interim financial statements of the investee and make appropriate inquiries of management of the investor to identify such events and transactions that may be material to the investor's financial statements and that may need to be recognized or disclosed in the investor's financial statements. (Ref: par. .A11) [Paragraph renumbered by the issuance of SAS No. 142, July 2020.]

[Investments in Derivative Instruments and Securities Measured or Disclosed at Fair Value]

[.07–.11] [Paragraphs deleted by the issuance of SAS No. 143, July 2020.][1]

Inventory

.12 If inventory is material to the financial statements, the auditor should obtain sufficient appropriate audit evidence regarding the existence and condition of inventory[2] by

a. attending physical inventory counting, unless impracticable, to (Ref: par. .A21–.A23)

[1][Footnote deleted by the issuance of SAS No. 143, July 2020.]

i. evaluate management's instructions and procedures for recording and controlling the results of the entity's physical inventory counting, (Ref: par. .A24)

ii. observe the performance of management's count procedures, (Ref: par. .A25)

iii. inspect the inventory, and (Ref: par. .A26)

iv. perform test counts and (Ref: par. .A27)

b. performing audit procedures over the entity's final inventory records to determine whether they accurately reflect actual inventory count results. (Ref: par. .A28–.A31)

[Paragraph renumbered by the issuance of SAS No. 142, July 2020.]

.13 If physical inventory counting is conducted at a date other than the date of the financial statements, the auditor should, in addition to the procedures required by paragraph .12, perform audit procedures to obtain audit evidence about whether changes in inventory between the count date and the date of the financial statements are recorded properly. (Ref: par. .A32–.A34) [Paragraph renumbered by the issuance of SAS No. 142, July 2020.]

.14 If the auditor is unable to attend physical inventory counting due to unforeseen circumstances, the auditor should make or observe some physical counts on an alternative date and perform audit procedures on intervening transactions. [Paragraph renumbered by the issuance of SAS No. 142, July 2020.]

.15 If attendance at physical inventory counting is impracticable, the auditor should perform alternative audit procedures to obtain sufficient appropriate audit evidence regarding the existence and condition of inventory. If it is not possible to do so, the auditor should modify the opinion in the auditor's report, in accordance with section 705. (Ref: par. .A35–.A37) [Paragraph renumbered by the issuance of SAS No. 142, July 2020.]

.16 If inventory under the custody and control of a third party is material to the financial statements, the auditor should obtain sufficient appropriate audit evidence regarding the existence and condition of that inventory by performing one or both of the following:

a. Request confirmation from the third party regarding the quantities and condition of inventory held on behalf of the entity (Ref: par. .A38)

b. Perform inspection or other audit procedures appropriate in the circumstances (Ref: par. .A39)

[Paragraph renumbered by the issuance of SAS No. 142, July 2020.]

---

[2]Section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, addresses the auditor's procedures to respond to the assessed risks of material misstatements at the relevant assertion level.

Litigation, Claims, and Assessments

.17 The auditor should design and perform audit procedures to identify litigation, claims, and assessments involving the entity that may give rise to a risk of material misstatement, including (Ref: par. .A40–.A46)

a. inquiring of management and, when applicable, others within the entity, including in-house legal counsel;

b. obtaining from management a description and evaluation of litigation, claims, and assessments that existed at the date of the financial statements being reported on and during the period from the date of the financial statements to the date the information is furnished, including an identification of those matters referred to legal counsel;[3]

c. reviewing minutes of meetings of those charged with governance; documents obtained from management concerning litigation, claims, and assessments; and correspondence between the entity and its external legal counsel; and

d. reviewing legal expense accounts and invoices from external legal counsel.

[Paragraph renumbered by the issuance of SAS No. 142, July 2020.]

.18 For actual or potential litigation, claims, and assessments identified based on the audit procedures required in paragraph .17, the auditor should obtain audit evidence relevant to the following factors:

a. The period in which the underlying cause for legal action occurred

b. The degree of probability of an unfavorable outcome

c. The amount or range of potential loss

[Paragraph renumbered by the issuance of SAS No. 142, July 2020.]

Communication With the Entity's Legal Counsel

.19 Unless the audit procedures required by paragraph .17 indicate that no actual or potential litigation, claims, or assessments that may give rise to a risk of material misstatement exist, the auditor should, in addition to the procedures required by other AU-C sections, seek direct communication with the entity's external legal counsel. The auditor should do so through a letter of inquiry prepared by management and sent by the auditor requesting the entity's external legal counsel to communicate directly with the auditor. (Ref: par. .A41 and .A47–.A64) [Paragraph renumbered by the issuance of SAS No. 142, July 2020.]

.20 In addition to the direct communications with the entity's external legal counsel referred to in paragraph .19, the auditor should, in cases when the entity's in-house legal

[3]For purposes of this section, the term *legal counsel* refers to the entity's in-house legal counsel and external legal counsel.

counsel has the responsibility for the entity's litigation, claims, and assessments, seek direct communication with the entity's in-house legal counsel through a letter of inquiry similar to the letter referred to in paragraph .19. Audit evidence obtained from in-house legal counsel in this manner is not, however, a substitute for the auditor seeking direct communication with the entity's external legal counsel, as described in paragraph .19. (Ref: par. .A65) [Paragraph renumbered by the issuance of SAS No. 142, July 2020.]

.21 The auditor should document the basis for any determination not to seek direct communication with the entity's legal counsel, as required by paragraphs .19–.20. [Paragraph renumbered by the issuance of SAS No. 142, July 2020.]

.22 The auditor should request management to authorize the entity's legal counsel to discuss applicable matters with the auditor. [Paragraph renumbered by the issuance of SAS No. 142, July 2020.]

.23 As described in paragraphs .19–.20, the auditor should request, through letter(s) of inquiry, the entity's legal counsel to inform the auditor of any litigation, claims, assessments, and unasserted claims that the counsel is aware of, together with an assessment of the outcome of the litigation, claims, and assessments, and an estimate of the financial implications, including costs involved. Each letter of inquiry should include, but not be limited to, the following matters: (Ref: par. .A89)

1. Identification of the entity, including subsidiaries, and the date of the audit
2. A list prepared by management (or a request by management that the legal counsel prepare a list) that describes and evaluates pending or threatened litigation, claims, and assessments with respect to which the legal counsel has been engaged and to which the legal counsel has devoted substantive attention on behalf of the company in the form of legal consultation or representation
3. A list prepared by management that describes and evaluates unasserted claims and assessments that management considers to be probable of assertion and that, if asserted, would have at least a reasonable possibility of an unfavorable outcome with respect to which the legal counsel has been engaged and to which the legal counsel has devoted substantive attention on behalf of the entity in the form of legal consultation or representation
4. Regarding each matter listed in item *b*, a request that the legal counsel either provide the following information or comment on those matters on which the legal counsel's views may differ from those stated by management, as appropriate:
   i. A description of the nature of the matter, the progress of the case to date, and the action that the entity intends to take (for example, to contest the matter vigorously or to seek an out-of-court settlement)
   ii. An evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss (Ref: par. .A66)
   iii. With respect to a list prepared by management (or by the legal counsel at management's request), an identification of the omission of any pending or

threatened litigation, claims, and assessments or a statement that the list of such matters is complete

5. Regarding each matter listed in item *c*, a request that the legal counsel comment on those matters on which the legal counsel's views concerning the description or evaluation of the matter may differ from those stated by management
6. A statement that management understands that whenever, in the course of performing legal services for the entity with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, the legal counsel has formed a professional conclusion that the entity should disclose or consider disclosure concerning such possible claim or assessment, the legal counsel, as a matter of professional responsibility to the entity, will so advise the entity and will consult with the entity concerning the question of such disclosure and the requirements of the applicable financial reporting framework (for example, the requirements of Financial Accounting Standards Board [FASB] *Accounting Standards Codification* [ASC] 450, *Contingencies*)
7. A request that the legal counsel confirm whether the understanding described in item *f* is correct
8. A request that the legal counsel specifically identify the nature of, and reasons for, any limitation on the response
9. A request that the legal counsel specify the effective date of the response

[Paragraph renumbered by the issuance of SAS No. 142, July 2020.]

.24 When the auditor is aware that an entity has changed legal counsel or that the legal counsel previously engaged by the entity has resigned, the auditor should consider making inquiries of management or others about the reasons such legal counsel is no longer associated with the entity. (Ref: par. .A56) [Paragraph renumbered by the issuance of SAS No. 142, July 2020.]

.25 The auditor should modify the opinion in the auditor's report, in accordance with section 705, if (Ref: par. .A57–.A66)

a. the entity's legal counsel refuses to respond appropriately to the letter of inquiry and the auditor is unable to obtain sufficient appropriate audit evidence by performing alternative audit procedures or
b. management refuses to give the auditor permission to communicate or meet with the entity's external legal counsel.

[Paragraph renumbered by the issuance of SAS No. 142, July 2020.]

Segment Information

.26 The auditor should obtain sufficient appropriate audit evidence regarding the presentation and disclosure of segment information, in accordance with the applicable financial reporting framework, by (Ref: par. .A67–.A68)

a. obtaining an understanding of the methods used by management in determining segment information and (Ref: par. .A69)
   i. evaluating whether such methods are likely to result in disclosure in accordance with the applicable financial reporting framework and
   ii. when appropriate, testing the application of such methods and
b. performing analytical procedures or other audit procedures appropriate in the circumstances.

[Paragraph renumbered by the issuance of SAS No. 142, July 2020.]

Management's Specialist

.27 If information to be used as audit evidence has been prepared using the work of a management's specialist, the auditor should, to the extent necessary, taking into account the significance of that specialist's work for the auditor's purposes, perform the following: (Ref: par. .A70–.A72)

a. Evaluate the competence, capabilities, and objectivity of that specialist (Ref: par. .A73–.A79)
b. Obtain an understanding of the work of that specialist (Ref: par. .A80–.A83)
c. Evaluate the appropriateness of that specialist's work as audit evidence for the relevant assertion (Ref: par. .A84–.A88)

[Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

Application and Other Explanatory Material

Investments in Securities and Derivative Instruments (Ref: par. .05–.06)

.A1 Section 540 addresses the auditor's responsibilities relating to accounting estimates, including fair value accounting estimates and related disclosures, in an audit of financial statements. This section addresses aspects relating to auditing valuation of investments in securities and derivative instruments that are incremental to section 540. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 143.]

.A2 Evaluating audit evidence for assertions about investments in securities and derivative instruments often involves professional judgment because the assertions, especially those about valuation, are based on highly subjective assumptions or are particularly sensitive to changes in the underlying circumstances. Valuation assertions relating to investments in securities and derivative instruments may be based on assumptions about the occurrence of future events for which expectations are difficult to develop or on assumptions about conditions expected to exist over a long period (for example, default rates or prepayment rates). Accordingly, competent persons could reach different conclusions about estimates of fair values or estimates of ranges of fair values. Professional judgment also may be necessary when evaluating audit evidence for assertions based on features of the security or derivative and the requirements of the applicable financial reporting framework, including underlying criteria for hedge accounting, which may be complex. For example, determining the fair value of a structured note may require consideration of a variety of features of the note that react differently to changes in economic conditions. In addition, one or more other derivatives may be designated to hedge changes in cash flows under the note. Evaluating audit evidence about the fair value of the note, the determination of whether the hedge is highly effective, and the allocation of changes in fair value to earnings and other comprehensive income requires professional judgment. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 143.]

[.A3] [Paragraph renumbered and deleted by issuance of SAS No. 143, July 2020]

Investments in Securities When Valuations Are Based on Cost

.A4 Procedures to obtain evidence about the valuation of securities that are recorded at cost may include inspection of documentation of the purchase price, confirmation with the issuer or holder of those securities, and testing discount or premium amortization either by recomputation or through the use of analytical procedures. [Revised, February 2017, to better reflect the AICPA Council Resolution designating the PCAOB to promulgate technical standards. Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

Investments in Securities When Valuations Are Based on the Investee's Financial Results (Excluding Investments Accounted for Using the Equity Method of Accounting) (Ref: par. .05–.06)

.A5 Section 600A, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors)*, addresses auditing investments accounted for using the equity method of accounting. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A6 For valuations based on an investee's financial results (excluding investments accounted for using the equity method of accounting), obtaining and reading the financial statements of the investee that have been audited by an auditor whose report is satisfactory may be sufficient for the purpose of obtaining sufficient appropriate audit evidence of the amount used in the estimate. In determining whether the report of another auditor is satisfactory, the auditor may perform procedures such as making inquiries regarding the professional reputation and standing of the other auditor, visiting the other auditor, discussing the audit procedures followed and the results thereof, and reviewing the audit plan and audit documentation of the other auditor. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 143.]

.A7 After obtaining and reading the audited financial statements of an investee, the auditor may conclude that additional audit procedures are necessary to obtain sufficient appropriate audit evidence, for example, when the date of the audited financial statements is different from the investor's measurement date. Further examples for when the auditor may conclude that additional audit evidence is needed include significant differences in accounting principles, changes in ownership, or the significance of the investment to the investor's financial position or results of operations. Examples of procedures that the auditor may perform are reviewing information in the investor's files that relates to the investee, such as investee minutes and budgets, and investee cash flow information and making inquiries of investor management about the investee's financial results. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 143.]

.A8 The auditor may need to obtain evidence relating to transactions between the entity and investee to evaluate

a. the propriety of the elimination of unrealized profits and losses on transactions between the entity and investee, if applicable, and

b. the adequacy of disclosures about material related party transactions or relationships.

[Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A9 Section 540 addresses auditing fair value accounting estimates. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 143.]

.A10 The date of the investor's financial statements and those of the investee may be different. If the difference between the date of the entity's financial statements and those of the investee has or could have a material effect on the entity's financial statements, the auditor is required, in accordance with paragraph .05*d*, to determine whether the entity's management has properly considered the lack of comparability. The effect may be material, for example, because the difference between the financial statement period ends of the entity and investee is not consistent with the prior period in comparative statements or because a significant transaction occurred during the time period between the financial statement period end of the entity and investee. If a change in the difference between the financial statement period end of the entity and investee has a material effect on the investor's financial statements, the auditor may be required, in accordance with section 708, *Consistency of Financial Statements*, to add an emphasis-of-matter paragraph to the auditor's report because the comparability of financial statements between periods has been materially affected by a change in reporting period. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A11 Section 560, *Subsequent Events and Subsequently Discovered Facts*, addresses the auditor's responsibilities relating to subsequent events and subsequently discovered facts in an audit of financial statements. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

[Investments in Derivative Instruments and Securities Measured or Disclosed at Fair Value (Ref: par. .07–.09)]

[.A12–.A20] [Paragraphs renumbered and deleted by the issuance of SAS No. 143, July 2020.][4-6]

Inventory

Attendance at Physical Inventory Counting (Ref: par. .12a)

.A21 Management ordinarily establishes procedures under which inventory is physically counted at least once per year to serve as a basis for the preparation of the financial statements and, if applicable, to ascertain the reliability of the entity's perpetual inventory system. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A22 Attendance at physical inventory counting involves

- inspecting the inventory to ascertain its existence and evaluate its condition and performing test counts,
- observing compliance with management's instructions and the performance of procedures for recording and controlling the results of the physical inventory count, and
- obtaining audit evidence about the reliability of management's count procedures.

These procedures may serve as tests of controls or substantive procedures, or both, depending on the auditor's risk assessment, planned approach, and the specific procedures carried out. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A23 Matters relevant in planning attendance at physical inventory counting (or in designing and performing audit procedures pursuant to paragraphs .12–.16) include, for example, the following:

- The risks of material misstatement related to inventory.
- The control risk related to inventory.
- Whether adequate procedures are expected to be established and proper instructions issued for physical inventory counting.
- The timing of physical inventory counting.

[4-6][Footnotes deleted by the issuance of SAS No. 143, July 2020.]

- Whether the entity maintains a perpetual inventory system.
- The locations at which inventory is held, including the materiality of the inventory and the risks of material misstatement at different locations, in deciding at which locations attendance is appropriate. Section 600A addresses the involvement of component auditors and, accordingly, may be relevant if such involvement is with regard to attendance of physical inventory counting at a remote location.
- Whether the assistance of an auditor's specialist is needed. Section 620, *Using the Work of an Auditor's Specialist*, addresses the use of an auditor's specialist to assist the auditor in obtaining sufficient appropriate audit evidence.

[Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

Evaluate Management's Instructions and Procedures (Ref: par. .12a(i))

.A24 Matters relevant in evaluating management's instructions and procedures for recording and controlling the physical inventory counting include whether they address, for example, the following:

- The application of appropriate controls (for example, the collection of used physical inventory count records, accounting for unused physical inventory count records, and count and recount procedures)
- The accurate identification of the stage of completion of work in progress; slow moving, obsolete, or damaged items; and inventory owned by a third party (for example, on consignment)
- The procedures used to estimate physical quantities, when applicable, such as may be needed in estimating the physical quantity of a coal pile
- Control over the movement of inventory between areas and the shipping and receipt of inventory before and after the cut-off date

[Paragraph renumbered by the issuance of SAS No. 143, July 2020. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Observe the Performance of Management's Count Procedures (Ref: par. .12a(ii))

.A25 Observing the performance of management's count procedures (for example, those relating to control over the movement of inventory before, during, and after the count) assists the auditor in obtaining audit evidence that management's instructions and count procedures are designed and implemented adequately. In addition, the auditor may obtain copies of cutoff information, such as details of the movement of inventory, to assist the auditor in performing audit procedures over the accounting for such movements at a later date. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

Inspect the Inventory (Ref: par. .12a(iii))

.A26 Inspecting inventory when attending physical inventory counting assists the auditor in ascertaining the existence of the inventory (though not necessarily its ownership) and in identifying obsolete, damaged, or aging inventory. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

Perform Test Counts (Ref: par. .12a(iv))

.A27 Performing test counts (for example, by tracing items selected from management's count records to the physical inventory and tracing items selected from the physical inventory to management's count records) provides audit evidence about the completeness and accuracy of those records. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A28 In addition to recording the auditor's test counts, obtaining copies of management's completed physical inventory count records assists the auditor in performing subsequent audit procedures to determine whether the entity's final inventory records accurately reflect actual inventory count results. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

Using the Work of an External Inventory-Taking Firm

.A29 Management may engage external organizations that have expertise in the taking of physical inventories to count, list, price, and subsequently compute the total dollar amount of inventory on hand at the date of the physical count. For example, such external inventory-taking firms are often used by entities such as retail stores, hospitals, and automobile dealers. [Paragraph renumbered by the issuance of SAS No. 143, July 2020. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

.A30 The report of an external inventory-taking firm about the work it performed does not, by itself, provide the auditor with sufficient appropriate audit evidence. Paragraph .12 requires the auditor, if inventory is material to the financial statements, to perform certain procedures regarding the existence and condition of inventory.[7] The auditor may, for example, examine the external inventory-taking firm's program, observe its procedures and controls, make or observe some physical counts of the inventory, recompute calculations of the submitted inventory on a test basis, and apply appropriate tests to the intervening transactions. [Paragraph renumbered by the issuance of SAS No. 143, July 2020. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

.A31 Although the auditor may adjust the extent of the work on the physical count of inventory because of the work of an external inventory-taking firm, any restriction imposed on the auditor such that the auditor is unable to perform the procedures that the auditor considers necessary is a scope limitation. In such cases, section 705 requires the auditor to

[7] [Footnote deleted by the issuance of SAS No. 144, June 2021.]

modify the opinion in the auditor's report as a result of the scope limitation. [Paragraph renumbered by the issuance of SAS No. 143, July 2020. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

Physical Inventory Counting Conducted Other Than at the Date of the Financial Statements (Ref: par. .13)

.A32 For practical reasons, the physical inventory counting may be conducted at a date, or dates, other than the date of the financial statements. This may be done irrespective of whether management determines inventory quantities by an annual physical inventory counting or maintains a perpetual inventory system. In either case, the effectiveness of the design, implementation, and maintenance of controls over changes in inventory determines whether the conduct of physical inventory counting at a date (or dates) other than the date of the financial statements is appropriate for audit purposes. Section 330 addresses substantive procedures performed at an interim date.[8] [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A33 When a perpetual inventory system is maintained, management may perform physical counts or other tests to ascertain the reliability of inventory quantity information included in the entity's perpetual inventory records. In some cases, management or the auditor may identify differences between the perpetual inventory records and actual physical inventory quantities on hand; this may indicate that the controls over changes in inventory are not operating effectively. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A34 Relevant matters for consideration when designing audit procedures to obtain audit evidence about whether changes in inventory amounts between the count date, or dates, and the final inventory records are recorded properly include the following:

- Whether the perpetual inventory records are properly adjusted
- Reliability of the entity's perpetual inventory records
- Reasons for significant differences between the information obtained during the physical count and the perpetual inventory records

[Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

Attendance at Physical Inventory Counting Is Impracticable (Ref: par. .15)

.A35 In some cases, attendance at physical inventory counting may be impracticable. This may be due to factors such as the nature and location of the inventory (for example, when inventory is held in a location that may pose threats to the safety of the auditor). The matter of general inconvenience to the auditor, however, is not sufficient to support a decision by the auditor that attendance is impracticable. Further, as explained in section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*, the matter of difficulty, time, or cost involved is not, in itself, a valid basis for the auditor to omit an audit procedure for which no alternative

[8] Paragraphs .23–.24 of section 330.

exists or to be satisfied with audit evidence that is less than persuasive. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A36 In some cases, when attendance is impracticable, alternative audit procedures (for example, observing a current physical inventory count and reconciling it to the opening inventory quantities or inspection of documentation of the subsequent sale of specific inventory items acquired or purchased prior to the physical inventory counting) may provide sufficient appropriate audit evidence about the existence and condition of inventory. If the audit covers the current period and one or more periods for which the auditor had not observed or made some physical counts of prior inventories, alternative audit procedures, such as tests of prior transactions or reviews of the records of prior counts, may provide sufficient appropriate audit evidence about the prior inventories. The effectiveness of the alternative procedures that an auditor may perform is affected by the length of the period that the alternative procedures cover. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A37 In other cases, however, it may not be possible to obtain sufficient appropriate audit evidence regarding the existence and condition of inventory by performing alternative audit procedures. In such cases, section 705 requires the auditor to modify the opinion in the auditor's report as a result of the scope limitation. In addition, section 510, *Opening Balances — Initial Audit Engagements, Including Reaudit Engagements*, addresses the auditor's procedures regarding inventory opening balances in initial audit engagements.[9] [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

Inventory Under the Custody and Control of a Third Party

Confirmation (Ref: par. .16a)

.A38 Section 505, *External Confirmations*, addresses external confirmation procedures. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

Other Audit Procedures (Ref: par. .16b)

.A39 Depending on the circumstances (for example, when information is obtained that raises doubt about the integrity and objectivity of the third party), the auditor may consider it appropriate to perform other audit procedures instead of, or in addition to, confirmation with the third party. Examples of other audit procedures include the following:

- Attending, or arranging for another auditor to attend, the third party's physical counting of inventory, if practicable
- Obtaining another auditor's report on the adequacy of the third party's internal control for ensuring that inventory is properly counted and adequately safeguarded
- Inspecting documentation regarding inventory held by third parties (for example, warehouse receipts)

---

[9]Paragraph .A13 of section 510, *Opening Balances — Initial Audit Engagements, Including Reaudit Engagements*.

- Requesting confirmation from other parties when inventory has been pledged as collateral

[Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

Litigation, Claims, and Assessments

Completeness of Litigation, Claims, and Assessments (Ref: par. .17)

.A40 Litigation, claims, and assessments involving the entity may have a material effect on the financial statements and, thus, may be required to be recognized, measured, or disclosed in the financial statements. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A41 Other legal matters involving the entity may not have a material effect on the entity's financial statements and, accordingly, would not give rise to risks of material misstatement. Examples of such other legal matters may be

- matters unrelated to actual or potential litigation, claims, or assessments, such as consulting services related to real estate or potential merger and acquisition transactions;
- matters in which the entity records indicate that management or the legal counsel has not devoted substantive attention to the matter;
- matters in which the entity's insurance coverage exceeds the amount of the actual or potential litigation, claim, or assessment sought against the entity; or
- matters that are clearly trivial to the financial statements.

[Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A42 Management is responsible for adopting policies and procedures to identify, evaluate, and account for litigation, claims, and assessments as a basis for the preparation of financial statements, in accordance with the requirements of the applicable financial reporting framework. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A43 Management is the primary source of information about events or conditions considered in the financial accounting for, and reporting of, litigation, claims, and assessments because these matters are within the direct knowledge and, often, control of management. Accordingly, the auditor's procedures with respect to litigation, claims, and assessments include the following:

- Making inquiries of management as required by paragraph .17*a*, which may include a discussion about the policies and procedures adopted for identifying, evaluating, and accounting for litigation, claims, and assessments involving the entity that may give rise to a risk of material misstatement
- Obtaining written representations from management, in accordance with section 580, *Written Representations*, that all known actual or possible litigation, claims,

and assessments whose effects should be considered when preparing the financial statements have been disclosed to the auditor and accounted for and disclosed in accordance with the applicable financial reporting framework[10]

[Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A44 In addition to the procedures identified in paragraph .17, other relevant procedures include, for example, using information obtained through risk assessment procedures carried out as part of obtaining an understanding of the entity and its environment to assist the auditor to become aware of litigation, claims, and assessments involving the entity. Examples of such procedures are as follows:

- Reading minutes of meetings of stockholders; directors; governing bodies of governmental entities; and appropriate committees held during, and subsequent to, the period being audited
- Reading contracts, loan agreements, leases, correspondence from taxing or other governmental agencies, and similar documents
- Obtaining information concerning guarantees from bank confirmation forms
- Inspecting other documents for possible guarantees by the entity

Section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, requires the auditor to obtain an understanding of the entity and its environment.[11] In addition, section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*, requires the auditor to obtain an understanding of the entity's legal and regulatory framework applicable to the entity and industry or sector in which the entity operates and how the entity is complying with that framework. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A45 Audit evidence obtained for purposes of identifying litigation, claims, and assessments that may give rise to a risk of material misstatement also may provide audit evidence regarding other relevant considerations, such as valuation or measurement, regarding litigation, claims, and assessments. Section 540 establishes requirements and provides guidance relevant to the auditor's consideration of litigation, claims, and assessments requiring accounting estimates or related disclosures in the financial statements. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A46 This section addresses inquiries of the entity's legal counsel with whom management has consulted. If management has not consulted legal counsel, the auditor would rely on the procedures required by paragraph .17 to identify litigation, claims, and assessments involving the entity, which may give rise to a risk of material misstatement, and the written representation of management regarding litigation, claims, and assessments, as required by section 580. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

---

[10]Paragraph .15 of section 580, *Written Representations*.

[11]Paragraph .12 of section , *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

Communication With the Entity's Legal Counsel (Ref: par. .19–.25)

.A47 An auditor ordinarily does not possess legal skills and, therefore, cannot make legal judgments concerning information coming to the auditor's attention. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A48 Direct communication with the entity's legal counsel assists the auditor in obtaining sufficient appropriate audit evidence about whether potentially material litigation, claims, and assessments are known and management's estimates of the financial implications, including costs, are reasonable. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A49 The American Bar Association (ABA) has approved *Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information* (the ABA statement), which explains the concerns of the legal counsel and the nature of the limitations that an auditor is likely to encounter in connection with seeking direct communication with the entity's legal counsel about litigation, claims, assessments, and unasserted claims.[12] [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A50 A letter of inquiry to the entity's legal counsel is the auditor's primary means of obtaining corroboration of the information provided by management concerning material litigation, claims, and assessments. Audit evidence obtained from the entity's in-house general counsel or legal department may provide the auditor with the necessary corroboration. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A51 In certain circumstances, the auditor also may judge it necessary to meet with the entity's legal counsel to discuss the likely outcome of the litigation or claims. This may be the case, for example, when

- the auditor determines that the matter is a significant risk.
- the matter is complex.
- a disagreement exists between management and the entity's external legal counsel.

Ordinarily, such meetings require management's permission and are held with a representative of management in attendance. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A52 An external legal counsel's response to a letter of inquiry and the procedures set forth in paragraphs .17–.18 provide the auditor with sufficient appropriate audit evidence concerning the accounting for, and reporting of, pending and threatened litigation, claims, and assessments. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A53 Audit evidence about the status of litigation, claims, and assessments up to the date of the auditor's report may be obtained by inquiry of management, including in-house

[12] The *Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information* is reprinted as exhibit A, "American Bar Association Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information," for the convenience of readers but is not an integral part of this section.

legal counsel responsible for dealing with the relevant matters. The auditor may need to obtain updated information from the entity's legal counsel. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A54 In accordance with section 700, *Forming an Opinion and Reporting on Financial Statements*, or section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, the auditor is required to date the auditor's report no earlier than the date on which the auditor has obtained sufficient appropriate audit evidence on which to base the auditor's opinion on the financial statements.[13] Accordingly, it is preferable that the entity's legal counsel's response be as close to the date of the auditor's report as is practicable in the circumstances. Specifying the effective date of the entity's legal counsel's response to reasonably approximate the expected date of the auditor's report may obviate the need to obtain updated information from the entity's legal counsel. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136. Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A55 Clearly specifying the earliest acceptable effective date of the response and the latest date by which it is to be sent to the auditor and informing the entity's legal counsel of these dates timely facilitates the entity's legal counsel's ability to respond timely and adequately. A two-week period between the specified effective date of the entity's legal counsel's response and the latest date by which the response is to be sent to the auditor is generally sufficient. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A56 In some circumstances, the legal counsel may be required by relevant ethical requirements to resign the engagement if the legal counsel's advice concerning financial accounting and reporting for litigation, claims, and assessments is disregarded by the entity. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A57 The legal counsel appropriately may limit the response to matters to which the legal counsel has given substantive attention in the form of legal consultation or representation. Also, the legal counsel's response may be limited to matters that are considered individually or collectively material to the financial statements, such as when the entity and auditor have reached an understanding on the limits of materiality for this purpose and management has communicated such understanding to the legal counsel. Such limitations are not limitations on the scope of the audit. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A58 The legal counsel may be unable to respond concerning the likelihood of an unfavorable outcome of litigation, claims, and assessments or the amount or range of potential loss because of inherent uncertainties. Factors influencing the likelihood of an unfavorable outcome sometimes may not be within the legal counsel's competence to judge; historical experience of the entity in similar litigation or the experience of other entities may not

[13]Paragraph .43 of section 700, *Forming an Opinion and Reporting on Financial Statements*, or paragraphs .82 and .126 of section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

be relevant or available, and the amount of the possible loss frequently may vary widely at different stages of litigation. Consequently, the legal counsel may not be able to form a conclusion with respect to such matters. In such circumstances, the auditor may conclude that the financial statements are affected by an uncertainty concerning the outcome of a future event that cannot be reasonably estimated. If the auditor is unable to obtain sufficient appropriate audit evidence to conclude that the financial statements as a whole are free from material misstatement, section 705 requires the auditor to modify the opinion in addressing the effect, if any, of the legal counsel's response on the auditor's report as a result of the scope limitation.[14] [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A59 An external legal counsel's refusal to furnish the information requested in an inquiry letter either in writing or orally may cause a scope limitation of the audit sufficient to preclude an unmodified opinion. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A60 Although the auditor would consider the inability to review information that could have a significant bearing on the audit as a scope limitation, in recognition of the public interest in protecting the confidentiality of lawyer-client communications, such inability is not intended to require an auditor to examine documents that the client identifies as subject to the lawyer-client privilege. In the event of questions concerning the applicability of this privilege, the auditor may request confirmation from the entity's legal counsel that the information is subject to that privilege and that the information was considered by the legal counsel in responding to the letter of inquiry or, if the matters are being handled by another legal counsel, an identification of such legal counsel for the purpose of sending a letter of inquiry. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A61 If management imposes a limitation on the scope of the audit and the auditor is unable to obtain sufficient appropriate audit evidence by performing alternative audit procedures, the auditor is required by section 705 to either disclaim an opinion on the financial statements or, when practicable, withdraw from the audit.[15] [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A62 In some cases, in order to emphasize the preservation of the attorney-client privilege or the attorney work-product privilege, some entities may include the following or substantially similar language in the audit inquiry letter to legal counsel:

> We do not intend that either our request to you to provide information to our auditor or your response to our auditor should be construed in any way to constitute a waiver of the attorney-client privilege or the attorney work-product privilege.

For the same reason, some legal counsel may include the following or substantially similar language in their response letters to auditors:

[14] Paragraph .07 of section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

[15] Paragraph .13 of section 705.

> The Company [*or other defined term*] has advised us that, by making the request set forth in its letter to us, the Company [*or other defined term*] does not intend to waive the attorney-client privilege with respect to any information which the Company [*or other defined term*] has furnished to us. Moreover, please be advised that our response to you should not be construed in any way to constitute a waiver of the protection of the attorney work-product privilege with respect to any of our files involving the Company [*or other defined term*].

Explanatory language similar to the foregoing in the letters of the entity or legal counsel is not a limitation on the scope of the legal counsel's response. See exhibit B, "Report of the Subcommittee on Audit Inquiry Responses." [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A63 In order to emphasize the preservation of the attorney-client privilege with respect to unasserted possible claims or assessments, some legal counsel may include the following or substantially similar language in their responses to audit inquiry letters:

> Please be advised that pursuant to clauses (b) and (c) of Paragraph 5 of the ABA Statement of Policy [*American Bar Association's Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information*] and related Commentary referred to in the last paragraph of this letter, it would be inappropriate for this firm to respond to a general inquiry relating to the existence of unasserted possible claims or assessments involving the Company. We can only furnish information concerning those unasserted possible claims or assessments upon which the Company has specifically requested in writing that we comment. We also cannot comment upon the adequacy of the Company's listing, if any, of unasserted possible claims or assessments or its assertions concerning the advice, if any, about the need to disclose same.

Additional language similar to the foregoing in a letter from legal counsel is not a limitation on the scope of the audit. However, the ABA statement and the understanding between the legal and accounting professions assumes that the legal counsel, under certain circumstances, will advise and consult with the entity concerning the entity's obligation to make financial statement disclosure with respect to unasserted possible claims or assessments. Confirmation of this understanding is included in the legal counsel's response. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A64 If the auditor believes that there may be actual or potential material litigation, claims, or assessments and the entity has not engaged external legal counsel relating to such matters, the auditor may discuss with the client the possible need to consult legal counsel to assist the client in determining the appropriate measurement, recognition, or disclosure of related liabilities or loss contingencies in the financial statements, in accordance with the applicable financial reporting framework. Depending on the significance of the matter(s), refusal by management to consult legal counsel in these circumstances may result in a scope limitation of the audit sufficient to preclude an unmodified opinion. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

Direct Communication With the Entity's In-House Legal Counsel

.A65 In-house legal counsel can range from one lawyer to a large staff, with responsibilities ranging from specific internal matters to a comprehensive coverage of all of the entity's legal needs, including litigation with outside parties. Because both in-house and external legal counsel are bound by an applicable code of ethics, there should be no significant difference in their professional obligations and responsibilities. In some circumstances, external legal counsel, if used at all, may be used only for limited purposes, such as data accumulation or account collection activity. In such circumstances, in-house legal counsel may have the primary responsibility for corporate legal matters and may be in the best position to know and precisely describe the status of all litigation, claims, and assessments or to corroborate information provided by management. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

Evaluation of the Outcome of Litigation, Claims, or Assessment (Ref: par. .23d(ii))

.A66 Although paragraph 5 of the ABA statement states that the legal counsel "may in appropriate circumstances communicate to the auditor his view that an unfavorable outcome is 'probable' or 'remote,'" the legal counsel is not required to use those terms in communicating the evaluation to the auditor. The auditor may find other wording sufficiently clear, as long as the terms can be used to classify the outcome of the uncertainty under one of the three probability classifications established in FASB ASC 450. Some examples of evaluations concerning litigation that may be considered to provide sufficient clarity that the likelihood of an unfavorable outcome is remote, even though they do not use that term, are the following:

- "We are of the opinion that this action will not result in any liability to the company."
- "It is our opinion that the possible liability to the company in this proceeding is nominal in amount."
- "We believe the company will be able to defend this action successfully."
- "We believe that the plaintiff's case against the company is without merit."
- "Based on the facts known to us, after a full investigation, it is our opinion that no liability will be established against the company in these suits."

Absent any contradictory information obtained by the auditor either in other parts of the legal counsel's letter or otherwise, the auditor need not obtain further clarification of evaluations such as the foregoing. Because of inherent uncertainties described in paragraph .A58 and the ABA statement, an evaluation furnished by the legal counsel may indicate significant uncertainties or stipulations about whether the client will prevail. The following are examples of the legal counsel's evaluations that are unclear about the likelihood of an unfavorable outcome:

- "This action involves unique characteristics wherein authoritative legal precedents do not seem to exist. We believe that the plaintiff will have serious problems establishing the company's liability under the act; nevertheless, if the plaintiff is successful, the award may be substantial."

- "It is our opinion that the company will be able to assert meritorious defenses to this action." (The term *meritorious defenses* indicates that the entity's defenses will not be summarily dismissed by the court; it does not necessarily indicate the legal counsel's opinion that the entity will prevail.)
- "We believe the action can be settled for less than the damages claimed."
- "We are unable to express an opinion as to the merits of the litigation at this time. The company believes there is absolutely no merit to the litigation." (If the entity's legal counsel, with the benefit of all relevant information, is unable to conclude that the likelihood of an unfavorable outcome is remote, it is unlikely that management would be able to form a judgment to that effect.)
- "In our opinion, the company has a substantial chance of prevailing in this action." (A *substantial chance*, a *reasonable opportunity*, and similar terms indicate more uncertainty than an opinion that the company will prevail.)

If the auditor is uncertain about the meaning of the legal counsel's evaluation, clarification either in a follow-up letter or conference with the legal counsel and entity, appropriately documented, may be appropriate. If the legal counsel is still unable to give an unequivocal evaluation of the likelihood of an unfavorable outcome in writing or orally, the auditor is required by section 700, or section 703, to determine the effect, if any, of the legal counsel's response on the auditor's report. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136. Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

Segment Information (Ref: par. .26)

.A67 Depending on the applicable financial reporting framework, the entity may be required or permitted to disclose segment information in the financial statements. The auditor's responsibility regarding the presentation and disclosure of segment information is in relation to the financial statements as a whole. Accordingly, the auditor is not required to perform audit procedures that would be necessary to express an opinion on the segment information presented on a stand-alone basis. [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

Considerations Specific to Governmental Entities

.A68 For governmental entities required by the applicable financial reporting framework to disclose segment information, the auditor's responsibility regarding the presentation and disclosure of segment information is in relation to the financial statements of the opinion unit(s) on which the segment information is based.[16] [Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

[16]Paragraph .A14 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

Understanding of the Methods Used by Management (Ref: par. .26a)

.A69 Depending on the circumstances, examples of matters that may be relevant when obtaining an understanding of the methods used by management in determining segment information and evaluating whether such methods are likely to result in disclosure in accordance with the applicable financial reporting framework include the following:

- Sales, transfers, and charges between segments and elimination of intersegment amounts
- Comparisons with budgets and other expected results (for example, operating profits as a percentage of sales)
- The allocation of assets and costs among segments
- Consistency with prior periods and the adequacy of the disclosures with respect to inconsistencies
- Management's process for identifying those segments that require disclosure in accordance with the entity's financial reporting framework

[Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

Using the Work of a Management's Specialist (Ref: par. .27)

.A70 The preparation of an entity's financial statements may require expertise in a field other than accounting or auditing, such as actuarial calculations, valuations, or engineering data. The entity uses a management's specialist in these fields to obtain the needed expertise to prepare the financial statements. Failure to do so when such expertise is necessary increases the risks of material misstatement and may be a significant deficiency or material weakness.[17] [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A71 When information to be used as audit evidence has been prepared using the work of a management's specialist, the requirement in paragraph .27 applies. For example, an individual or organization may possess expertise in the application of models to estimate the fair value of securities for which no observable market exists. If the individual or organization applies that expertise in making an estimate, which the entity uses in preparing its financial statements, the individual or organization is a management's specialist, and paragraph .27 applies. If, on the other hand, that individual or organization merely provides price data regarding private transactions not otherwise available to the entity, which the entity uses in its own estimation methods, such information, if used as audit evidence, is subject to the evaluation required by section 500,[18] but it is not the use of a management's specialist by the entity. [Paragraph added, effective for audits of financial

[17] See section 265, *Communicating Internal Control Related Matters Identified in an Audit*, for further guidance. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142.]

statements for periods ending on or after December 15, 2022, by SAS No. 142. Paragraph renumbered by the issuance of SAS No. 143, July 2020. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

.A72 The nature, timing, and extent of audit procedures with regard to the requirement in paragraph .27 may be affected by matters such as the following:

- The nature and complexity of the matter to which the management's specialist relates
- The risks of material misstatement of the matter
- The availability of alternative sources of audit evidence
- The nature, scope, and objectives of the work of the management's specialist
- Whether the management's specialist is employed by the entity or is a party engaged by it to provide relevant services
- The extent to which management can exercise control or influence over the management's specialist (including, when applicable, the organization that employs the individual specialist), thereby influencing the work of the management's specialist
- Whether the management's specialist is subject to technical performance standards or other professional or industry requirements
- The nature and extent of any controls within the entity over the work of the management's specialist
- The auditor's knowledge and experience of the field of expertise of management's specialist
- The auditor's previous experience of the work of that specialist

More persuasive audit evidence is needed with regard to the requirement in paragraph .27 as the significance of the management's specialist's work, the risk of material misstatement at the relevant assertion level, or the ability of management to affect the specialist's judgments increases, or as the competence, capabilities, and objectivity possessed by the specialist in the particular field decreases. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. Paragraph renumbered by the issuance of SAS No. 143, July 2020. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

The Competence, Capabilities, and Objectivity of a Management's Specialist (Ref: par. .27a)

.A73 Competence relates to the nature and level of expertise of the management's specialist. Capability relates to the ability of the management's specialist to exercise that competence

[18]See paragraph .07 of section 500, *Audit Evidence*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

in the circumstances. Factors that influence capability may include, for example, geographic location and the availability of time and resources. Objectivity relates to the possible effects that bias, conflict of interest, or the influence of others may have on the professional or business judgment of the management's specialist. The competence, capabilities, and objectivity of a management's specialist, and any controls within the entity over that specialist's work, are important factors with regard to the reliability of any information produced by a management's specialist. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A74 Information regarding the competence, capabilities, and objectivity of a management's specialist may come from a variety of sources, such as the following:

- Personal experience with previous work of that specialist
- Discussions with that specialist
- Discussions with others who are familiar with that specialist's work
- Knowledge of that specialist's qualifications, membership in a professional body or industry association, license to practice, or other forms of external recognition
- Published papers or books written by that specialist
- An auditor's specialist, if any, that assists the auditor in obtaining sufficient appropriate audit evidence with respect to information produced by the management's specialist

[Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A75 Matters relevant to evaluating the competence, capabilities, and objectivity of a management's specialist include whether that specialist's work is subject to technical performance standards or other professional or industry requirements, for example, ethical standards and other membership requirements of a professional body or industry association, accreditation standards of a licensing body, or requirements imposed by law or regulation. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A76 Other matters that may be relevant include the following:

- The relevance of the capabilities and competence of the management's specialist to the matter for which that specialist's work will be used, including any areas of specialty within that specialist's field. For example, a particular actuary may specialize in property and casualty insurance but have limited expertise regarding pension calculations

- The competence of the management's specialist with respect to relevant accounting requirements, for example, knowledge of assumptions and methods, including models, when applicable, that are consistent with the applicable financial reporting framework
- Whether unexpected events, changes in conditions, or the audit evidence obtained from the results of audit procedures indicate that it may be necessary to reconsider the initial evaluation of the competence, capabilities, and objectivity of the management's specialist as the audit progresses

[Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A77 A broad range of circumstances may threaten objectivity, for example, self-interest threats, advocacy threats, familiarity threats, self-review threats, and intimidation threats. Safeguards may reduce such threats and may be created either by external structures (for example, the profession, legislation, or regulation of the management's specialist) or by the work of the management's specialist's environment (for example, quality control policies and procedures). [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A78 Although safeguards cannot eliminate all threats to the objectivity of a management's specialist, threats such as intimidation threats may be of less significance to a specialist engaged by the entity than to a specialist employed by the entity, and the effectiveness of safeguards such as quality control policies and procedures may be greater. Because the threat to objectivity created by being an employee of the entity will always be present, a specialist employed by the entity cannot ordinarily be regarded as being more likely to be objective than other employees of the entity. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A79 When evaluating the objectivity of a specialist engaged by the entity, it may be relevant to discuss with management and that specialist any interests and relationships that may create threats to the specialist's objectivity and any applicable safeguards, including any professional requirements that apply to the specialist, and to evaluate whether the safeguards are adequate. Relevant information may be obtained by the auditor from procedures performed in accordance with section 550, *Related Parties*. Interests and relationships creating threats may include the following:

- Financial interests
- Business and personal relationships between the entity and the individual specialist and between the entity and the organization that employs the individual specialist
- Provision of other services

[Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. Paragraph renumbered by the issuance of SAS No. 143, July 2020. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

*Obtaining an Understanding of the Work of the Management's Specialist (Ref: **par. .27b**)*

.A80 An understanding of the work of the management's specialist includes an understanding of the relevant field of expertise. An understanding of the relevant field of expertise may be obtained in conjunction with the auditor's determination of whether the auditor has the expertise to evaluate the work of the management's specialist or whether the auditor needs an auditor's specialist for this purpose.[19] [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A81 Aspects of the field of the management's specialist relevant to the auditor's understanding may include

- whether that specialist's field has areas of specialty within it that are relevant to the audit.
- whether any professional or other standards and regulatory or legal requirements apply.
- what assumptions and methods are used by the management's specialist and whether they are generally accepted within that specialist's field appropriately applied under the applicable financial reporting framework.
- the nature of internal and external data or information the management's specialist uses.

[Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. Paragraph renumbered by the issuance of SAS No. 143, July 2020. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

.A82 In the case of a management's specialist engaged by the entity, there will ordinarily be an engagement letter or other written form of agreement between the entity and that specialist. Evaluating that agreement when obtaining an understanding of the work of the management's specialist may assist the auditor in determining for the auditor's purposes the appropriateness of

- the nature, scope, and objectives of that specialist's work;
- the respective roles and responsibilities of management and that specialist; and
- the nature, timing, and extent of communication between management and that specialist, including the form of any report to be provided by that specialist.

---

[19]Paragraph .07 of section 620, *Using the Work of an Auditor's Specialist*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. Footnote renumbered by the issuance of SAS No. 144, June 2021.]

[Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

.A83 In the case of a management's specialist employed by the entity, it is less likely that there will be a written agreement of this kind. Inquiry of the specialist and other members of management may be the most appropriate way for the auditor to obtain the necessary understanding. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. Paragraph renumbered by the issuance of SAS No. 143, July 2020.]

*Evaluating the Appropriateness of the Work of the Management's Specialist (Ref: **par. .27c**)*

.A84 Section 540 includes requirements and guidance related to accounting estimates, including the selection and application of the methods, significant assumptions, and data used in making the accounting estimate.[20] Considerations when evaluating the appropriateness of the work of the management's specialist as audit evidence for the relevant assertion may include

- if that specialist's work involves significant assumptions, the appropriateness of the assumptions, taking into account the consistency of those assumptions with relevant information
- if that specialist's work involves the use of methods, the appropriateness of the methods under the circumstances, taking into account the requirements of the applicable financial reporting framework;
- if that specialist's work involves significant use of source data, including entity-produced data, the relevance and reliability of that source data; and
- the relevance and reasonableness of that specialist's findings or conclusions, the consistency of the findings or conclusions with other audit evidence, and whether the findings or conclusions have been appropriately reflected in the financial statements.

[Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142. Paragraph renumbered by the issuance of SAS No. 143, July 2020. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

.A85 If the work of the management's specialist involves use of significant assumptions developed by the management's specialist, evaluating the appropriateness of those assumptions may include taking into account the consistency of those assumptions with relevant information such as the following:

- Assumptions generally accepted within the specialist's field

[20]Paragraph .21 of section 540, *Auditing Accounting Estimates and Related Disclosures*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

- Supporting information provided by the specialist
- Industry, regulatory, and other external factors, including economic conditions
- The entity's objectives, strategies, and related business risks
- Existing market information
- Historical or recent experience, along with changes in conditions and events affecting the entity
- Significant assumptions used in other estimates tested in the entity's financial statements

[Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

.A86 If the methods of the management's specialist include the use of a proprietary model, the auditor's procedures may include, for example

- obtaining an understanding of the model through
  - — inquiry of the specialist, and
  - — reading descriptions of the model in the specialist's report or equivalent communication;
- testing controls over the entity's evaluation of the specialist's work;
- testing mathematical accuracy of the calculations under the model, if practicable; or
- assessing the inputs to and output from the model, which may involve using an alternative model for comparison.

The extent of such procedures will depend on the type of model used (for example, commercially available versus internally developed) and the applicability of the factors described in paragraph .A72. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

.A87 Factors that affect the relevance and reliability of the work of the management's specialist include the following:

- The results of the auditor's procedures over internal or external data, significant assumptions, and methods
- The nature of any restrictions, disclaimers, or limitations in the specialist's report or equivalent communication
- The consistency of the management's specialist's work with other evidence obtained by the auditor and the auditor's understanding of the entity and its environment

[Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

.A88 Additional procedures may be necessary if the management's specialist's findings or conclusions appear to contradict the relevant assertion, or the management's specialist's work does not provide sufficient appropriate audit evidence. Examples of situations in which additional procedures may be necessary include the following:

- The findings and conclusions of the management's specialist are inconsistent with
  - — other information, if any, in the specialist's report, or equivalent communication,
  - — other evidence obtained by the auditor, or
  - — the auditor's understanding of the entity and its environment.
- The management's specialist's report, or equivalent communication, contains restrictions, disclaimers, or limitations regarding the auditor's use of the report or communication.
- The auditor has identified exceptions in performing procedures related to data, significant assumptions, or methods.
- The auditor has doubts about the competence, capabilities, or objectivity of the management's specialist.
- The management's specialist has a conflict of interest relevant to the specialist's work.

[Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 144.]

Appendix — Illustrative Audit Inquiry Letter to Legal Counsel (Ref: par. .23)

.A89

In connection with an audit of our financial statements at (balance sheet date) and for the (period) then ended, management of the Company has prepared, and furnished to our auditors (name and address of auditors), a description and evaluation of certain contingencies, including those set forth below involving matters with respect to which you have been engaged and to which you have devoted substantive attention on behalf of the Company in the form of legal consultation or representation. These contingencies are regarded by management of the Company as material for this purpose (management may indicate a materiality limit if an understanding has been reached with the auditor). Your response should include matters that existed at (balance sheet date) and during the period from that date to the date of your response.

[*Alternative wording when management requests the lawyer to prepare the list that describes and evaluates pending or threatened litigation, claims, and assessments is as follows:*]

In connection with an audit of our financial statements as of (balance-sheet date) and for the (period) then ended, please furnish our auditors, (name and address of auditors), with the information requested below concerning certain contingencies involving matters with respect to which you have devoted substantive attention on behalf of the Company in the form of legal consultation or representation. [*When a materiality limit has been established based on an understanding between management and the auditor, the following sentence should be added: This request is limited to contingencies amounting to (amount) individually or items involving lesser amounts that exceed (amount) in the aggregate.*]

Pending or Threatened Litigation (Excluding Unasserted Claims)

[*Ordinarily the information would include the following: (1) the nature of the litigation, (2) the progress of the case to date, (3) how management is responding or intends to respond to the litigation (for example, to contest the case vigorously or to seek an out-of-court settlement), and (4) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.*] This letter will serve as our consent for you to furnish to our auditor all the information requested herein. Accordingly, please furnish to our auditors such explanation, if any, that you consider necessary to supplement the foregoing information, including an explanation of those matters for which your views may differ from those stated and an identification of the omission of any pending or threatened litigation, claims, and assessments or a statement that the list of such matters is complete.

[*Alternative wording when management requests the lawyer to prepare the list that describes and evaluates pending or threatened litigation, claims, and assessments is as follows:*]

Regarding pending or threatened litigation, claims, and assessments, please include in your response: (1) the nature of each matter, (2) the progress of each matter to date, (3) how the Company is responding or intends to respond (for example, to contest the case vigorously or seek an out-of-court settlement), and (4) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.

Unasserted Claims and Assessments (Considered by Management to be Probable of Assertion and That, if Asserted, Would Have at Least a Reasonable Possibility of an Unfavorable Outcome)

[*Ordinarily management's information would include the following: (1) the nature of the matter, (2) how management intends to respond if the claim is asserted, and (3) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.*] Please furnish to our auditors such explanation, if any, that you consider necessary to supplement the foregoing information, including an explanation of those matters for which your views may differ from those stated.

We understand that whenever, in the course of performing legal services for us with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, if you have formed a professional conclusion that we should disclose or consider disclosure concerning such possible claim or assessment, as a matter of professional responsibility to us, you will so advise us and will consult with us concerning the question of such disclosure and the applicable requirements of Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 450, *Contingencies*. Please specifically confirm to our auditors that our understanding is correct.

[*Alternative wording when management requests the lawyer to prepare the list that describes and evaluates pending or threatened litigation, claims, and assessments is as follows:*]

We have represented to our auditors that there are no unasserted possible claims or assessments that you have advised us are probable of assertion and must be disclosed in accordance with FASB ASC 450. We understand that whenever, in the course of performing legal services for us with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, you have formed a professional conclusion that we should disclose or consider disclosure concerning such possible claim or assessment, as a matter of professional responsibility to us, you will so advise us and will consult with us concerning the question of such disclosure and the applicable requirements of FASB ASC 450. Please specifically confirm to our auditors that our understanding is correct.

Please specifically identify the nature of and reasons for any limitation on your response.

[*The auditor may request the client to inquire about additional matters, for example, unpaid or unbilled charges or specified information on certain contractually assumed obligations of the Company, such as guarantees of indebtedness of others.*]

[*Alternative wording when management requests the lawyer to prepare the list that describes and evaluates pending or threatened litigation, claims, and assessments is as follows:*]

> Your response should include matters that existed as of (balance-sheet date) and during the period from that date to the effective date of your response. Please specifically identify the nature of and reasons for any limitations on your response. Our auditors expect to have the audit completed about (expected completion date). They would appreciate receiving your reply by that date with a specified effective date no earlier than (ordinarily two weeks before expected completion date).

[*Wording that could be used in an audit inquiry letter, instead of the heading and first paragraph, when the client believes that there are no unasserted claims or assessments (to be specified to the lawyer for comment) that are probable of assertion and that, if asserted, would have a reasonable possibility of an unfavorable outcome as specified by Financial Accounting Standards Board* Accounting Standards Codification *450,* Contingencies*, is as follows:*]

> *Unasserted claims and assessments* — We have represented to our auditors that there are no unasserted possible claims that you have advised us are probable of assertion and must be disclosed, in accordance with Financial Accounting Standards Board *Accounting Standards Codification* 450, *Contingencies*. (The second paragraph in the section relating to unasserted claims and assessments would not be altered.)

Exhibit A — American Bar Association Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information (Ref: par. .A49)

.A90

> **Note**
> This document, in the form herein set forth, was approved by the Board of Governors of the American Bar Association (ABA) in December 1975, which official action permitted its release to lawyers and accountants as the standard recommended by the ABA for the lawyer's response to letters of audit inquiry.

Source: Statement on Auditing Standards No. 12 section 337C, *Exhibit II—American Bar Association Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information*[a]

Preamble

The public interest in protecting the confidentiality of lawyer-client communications is fundamental. The American legal, political and economic systems depend heavily upon voluntary compliance with the law and upon ready access to a respected body of professionals able to interpret and advise on the law. The expanding complexity of our laws and governmental regulations increases the need for prompt, specific and unhampered lawyer-client communication. The benefits of such communication and early consultation underlie the strict statutory and ethical obligations of the lawyer to preserve the confidences and secrets of the client, as well as the long-recognized testimonial privilege for lawyer-client communication.

Both the Code of Professional Responsibility and the cases applying the evidentiary privilege recognize that the privilege against disclosure can be knowingly and voluntarily waived by the client. It is equally clear that disclosure to a third party may result in loss of the "confidentiality" essential to maintain the privilege. Disclosure to a third party of the lawyer-client communication on a particular subject may also destroy the privilege as to other communications on that subject. Thus, the mere disclosure by the lawyer to the outside auditor, with due client consent, of the substance of communications between the lawyer and client may significantly impair the client's ability in other contexts to maintain the confidentiality of such communications.

Under the circumstances a policy of audit procedure which requires clients to give consent and authorize lawyers to respond to general inquiries and disclose information to auditors

[a]Statement on Auditing Standards No. 12 section 337C, *Exhibit II — American Bar Association Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information*, has been superseded by this section.

concerning matters which have been communicated in confidence is essentially destructive of free and open communication and early consultation between lawyer and client. The institution of such a policy would inevitably discourage management from discussing potential legal problems with counsel for fear that such discussion might become public and precipitate a loss to or possible liability of the business enterprise and its stockholders that might otherwise never materialize.

It is also recognized that our legal, political and economic systems depend to an important extent on public confidence in published financial statements. To meet this need the accounting profession must adopt and adhere to standards and procedures that will command confidence in the auditing process. It is not, however, believed necessary, or sound public policy, to intrude upon the confidentiality of the lawyer-client relationship in order to command such confidence. On the contrary, the objective of fair disclosure in financial statements is more likely to be better served by maintaining the integrity of the confidential relationship between lawyer and client, thereby strengthening corporate management's confidence in counsel and encouraging its readiness to seek advice of counsel and to act in accordance with counsel's advice.

Consistent with the foregoing public policy considerations, it is believed appropriate to distinguish between, on the one hand, litigation which is pending or which a third party has manifested to the client a present intention to commence and, on the other hand, other contingencies of a legal nature or having legal aspects. As regards the former category, unquestionably the lawyer representing the client in a litigation matter may be the best source for a description of the claim or claims asserted, the client's position (e.g., denial, contest, etc.), and the client's possible exposure in the litigation (to the extent the lawyer is in a position to do so). As to the latter category, it is submitted that, for the reasons set forth above, it is not in the public interest for the lawyer to be required to respond to general inquiries from auditors concerning possible claims.

It is recognized that the disclosure requirements for enterprises subject to the reporting requirements of the Federal securities laws are a major concern of managements and counsel, as well as auditors. It is submitted that compliance therewith is best assured when clients are afforded maximum encouragement, by protecting lawyer-client confidentiality, freely to consult counsel. Likewise, lawyers must be keenly conscious of the importance of their clients being competently advised in these matters.

Statement of Policy

NOW, THEREFORE, BE IT RESOLVED that it is desirable and in the public interest that this Association adopt the following Statement of Policy regarding the appropriate scope of the lawyer's response to the auditor's request, made by the client at the request of the auditor, for information concerning matters referred to the lawyer during the course of his representation of the client:

1. *Client Consent to Response*. The lawyer may properly respond to the auditor's requests for information concerning loss contingencies (the term and concept established by Statement of Financial Accounting Standards No. 5,[b] promulgated by the Financial Accounting Standards Board in March 1975 and discussed in

Paragraph 5.1 of the accompanying Commentary), to the extent hereinafter set forth, subject to the following:

a. Assuming that the client's initial letter requesting the lawyer to provide information to the auditor is signed by an agent of the client having apparent authority to make such a request, the lawyer may provide to the auditor information requested, without further consent, unless such information discloses a confidence or a secret or requires an evaluation of a claim.

b. In the normal case, the initial request letter does not provide the necessary consent to the disclosure of a confidence or secret or to the evaluation of a claim since that consent may only be given after full disclosure to the client of the legal consequences of such action.

c. Lawyers should bear in mind, in evaluating claims, that an adverse party may assert that any evaluation of potential liability is an admission.

d. In securing the client's consent to the disclosure of confidences or secrets, or the evaluation of claims, the lawyer may wish to have a draft of his letter reviewed and approved by the client before releasing it to the auditor; in such cases, additional explanation would in all probability be necessary so that the legal consequences of the consent are fully disclosed to the client.

2. *Limitation on Scope of Response*. It is appropriate for the lawyer to set forth in his response, by way of limitation, the scope of his engagement by the client. It is also appropriate for the lawyer to indicate the date as of which information is furnished and to disclaim any undertaking to advise the auditor of changes which may thereafter be brought to the lawyer's attention. *Unless the lawyer's response indicates otherwise, (a) it is properly limited to matters which have been given substantive attention by the lawyer in the form of legal consultation and, where appropriate, legal representation since the beginning of the period or periods being reported upon, and (b) if a law firm or a law department, the auditor may assume that the firm or department has endeavored, to the extent believed necessary by the firm or department, to determine from lawyers currently in the firm or department who have performed services for the client since the beginning of the fiscal period under audit whether such services involved substantive attention in the form of legal consultation concerning those loss contingencies referred to in Paragraph 5(a) below but, beyond that, no review has been made of any of the client's transactions or other matters for the purpose of identifying loss contingencies to be described in the response*.[c]

3. *Response may be Limited to Material Items*. In response to an auditor's request for disclosure of loss contingencies of a client, it is appropriate for the lawyer's response

---

[b]In July 2009, the Financial Accounting Standards Board (FASB) issued FASB *Accounting Standards Codification* (ASC) as authoritative. FASB ASC is now the source of authoritative U.S. accounting and reporting standards for nongovernmental entities, in addition to guidance promulgated by the Securities and Exchange Commission (SEC). As of July 1, 2009, all other nongrandfathered, non-SEC accounting literature not included in FASB ASC became nonauthoritative. FASB Statement No. 5, *Accounting for Contingencies*, has been codified as FASB ASC 450, *Contingencies*.

[c]As contemplated by Paragraph 8 of this Statement of Policy, this sentence is intended to be the subject of incorporation by reference as therein provided.

to indicate that the response is limited to items which are considered individually or collectively material to the presentation of the client's financial statements.

4. *Limited Responses*. Where the lawyer is limiting his response in accordance with the Statement of Policy, his response should so indicate (see Paragraph 8). If in any other respect the lawyer is not undertaking to respond to or comment on particular aspects of the inquiry when responding to the auditor, he should consider advising the auditor that his response is limited, in order to avoid any inference that the lawyer has responded to all aspects; otherwise, he may be assuming a responsibility which he does not intend.

5. *Loss Contingencies*. When properly requested by the client, it is appropriate for the lawyer to furnish to the auditor information concerning the following matters if the lawyer has been engaged by the client to represent or advise the client professionally with respect thereto and he has devoted substantive attention to them in the form of legal representation or consultation:

   a. *overtly threatened or pending litigation*, whether or not specified by the client;

   b. *a contractually assumed obligation* which the client has specifically identified and upon which the client has specifically requested, in the inquiry letter or a supplement thereto, comment to the auditor;

   c. *an unasserted possible claim or assessment* which the client has specifically identified and upon which the client has specifically requested, in the inquiry letter or a supplement thereto, comment to the auditor.

   With respect to clause (a), overtly threatened litigation means that a potential claimant has manifested to the client an awareness of and present intention to assert a possible claim or assessment unless the likelihood of litigation (or of settlement when litigation would normally be avoided) is considered remote. With respect to clause (c), where there has been no manifestation by a potential claimant of an awareness of and present intention to assert a possible claim or assessment, consistent with the considerations and concerns outlined in the Preamble and Paragraph 1 hereof, the client should request the lawyer to furnish information to the auditor only if the client has determined that it is probable that a possible claim will be asserted, that there is a reasonable possibility that the outcome (assuming such assertion) will be unfavorable, and that the resulting liability would be material to the financial condition of the client. Examples of such situations might (depending in each case upon the particular circumstances) include the following: (i) a catastrophe, accident or other similar physical occurrence in which the client's involvement is open and notorious, or (ii) an investigation by a government agency where enforcement proceedings have been instituted or where the likelihood that they will not be instituted is remote, under circumstances where assertion of one or more private claims for redress would normally be expected, or (iii) a public disclosure by the client acknowledging (and thus focusing attention upon) the existence of one or more probable claims arising out of an event or circumstance. In assessing whether or not the assertion of a possible claim is probable, it is expected that the client would normally employ, by reason of the inherent uncertainties involved and insufficiency of available data, concepts parallel to those used by the lawyer (discussed below) in assessing whether or not an unfavorable outcome is probable; thus, assertion of a possible claim would be considered probable only when the prospects of its being asserted seem reasonably certain (i.e., supported by extrinsic evidence strong enough to establish a presumption that it will happen) and the prospects of nonassertion seem slight.

It would not be appropriate, however, for the lawyer to be requested to furnish information in response to an inquiry letter or supplement thereto if it appears that (a) the client has been required to specify unasserted possible claims without regard to the standard suggested in the preceding paragraph, or (b) the client has been required to specify all or substantially all unasserted possible claims as to which legal advice may have been obtained, since, in either case, such a request would be in substance a general inquiry and would be inconsistent with the intent of this Statement of Policy.

The information that lawyers may properly give to the auditor concerning the foregoing matters would include (to the extent appropriate) an identification of the proceedings or matter, the stage of proceedings, the claim(s) asserted, and the position taken by the client.

In view of the inherent uncertainties, the lawyer should normally refrain from expressing judgments as to outcome except in those relatively few clear cases where it appears to the lawyer that an unfavorable outcome is either "probable" or "remote"; for purposes of any such judgment it is appropriate to use the following meanings:

i. *probable* — an unfavorable outcome for the client is probable if the prospects of the claimant not succeeding are judged to be extremely doubtful and the prospects for success by the client in its defense are judged to be slight.

ii. *remote* — an unfavorable outcome is remote if the prospects for the client not succeeding in its defense are judged to be extremely doubtful and the prospects of success by the claimant are judged to be slight.

If, in the opinion of the lawyer, considerations within the province of his professional judgment bear on a particular loss contingency to the degree necessary to make an informed judgment, he may in appropriate circumstances communicate to the auditor his view that an unfavorable outcome is "probable" or "remote," applying the above meanings. No inference should be drawn, from the absence of such a judgment, that the client will not prevail.

The lawyer also may be asked to estimate, in dollar terms, the potential amount of loss or range of loss in the event that an unfavorable outcome is not viewed to be "remote." In such a case, the amount or range of potential loss will normally be as inherently impossible to ascertain, with any degree of certainty, as the outcome of the litigation. Therefore, it is appropriate for the lawyer to provide an estimate of the amount or range of potential loss (if the outcome should be unfavorable) only if he believes that the probability of inaccuracy of the estimate of the amount or range of potential loss is slight.

The considerations bearing upon the difficulty in estimating loss (or range of loss) where pending litigation is concerned are obviously even more compelling in the case of unasserted possible claims. In most cases, the lawyer will not be able to provide any such estimate to the auditor.

As indicated in Paragraph 4 hereof, the auditor may assume that all loss contingencies specified by the client in the manner specified in clauses (b) and (c) above have received comment in the response, unless otherwise therein indicated. The lawyer should not be asked, nor need the lawyer undertake, to furnish information to the auditor concerning loss contingencies except as contemplated by this Paragraph 5.

6. *Lawyer's Professional Responsibility*. Independent of the scope of his response to the auditor's request for information, the lawyer, depending upon the nature of the matters as to which he is engaged, may have as part of his professional responsibility to his client an obligation to advise the client concerning the need for or advisability of public disclosure of a wide range of events and circumstances. The lawyer has an obligation not knowingly to participate in any violation by the client of the disclosure requirements of the securities laws. In appropriate circumstances, the lawyer also may be required under the Code of Professional Responsibility to resign his engagement if his advice concerning disclosures is disregarded by the client. The auditor may properly assume that whenever, in the course of performing legal services for the client with respect to a matter recognized to involve an unasserted possible claim or assessment which may call for financial statement disclosure, the lawyer has formed a professional conclusion that the client must disclose or consider disclosure concerning such possible claim or assessment, the lawyer, as a matter of professional responsibility to the client, will so advise the client and will consult with the client concerning the question of such disclosure and the applicable requirements[d] of FAS 5.

7. *Limitation on Use of Response. Unless otherwise stated in the lawyer's response, it shall be solely for the auditor's information in connection with his audit of the financial condition of the client and is not to be quoted in whole or in part or otherwise referred to in any financial statements of the client or related documents, nor is it to be filed with any governmental agency or other person, without the lawyer's prior written consent.*[c] *Notwithstanding such limitation, the response can properly be furnished to others in compliance with court process or when necessary in order to defend the auditor against a challenge of the audit by the client or a regulatory agency, provided that the lawyer is given written notice of the circumstances at least twenty days before the response is so to be furnished to others, or as long in advance as possible if the situation does not permit such period of notice.*[c]

8. *General*. This Statement of Policy, together with the accompanying Commentary (which is an integral part hereof), has been developed for the general guidance of the legal profession. In a particular case, the lawyer may elect to supplement or modify the approach hereby set forth. If desired, this Statement of Policy may

---

[d]Under FAS 5, when there has been no manifestation by a potential claimant of an awareness of a possible claim or assessment, disclosure of an unasserted possible claim is required only if the enterprise concludes that (i) it is probable that a claim will be asserted, (ii) there is a reasonable possibility, if the claim is in fact asserted, that the outcome will be unfavorable, and (iii) the liability resulting from such unfavorable outcome would be material to its financial condition.

> be incorporated by reference in the lawyer's response by the following statement: "This response is limited by, and in accordance with, the ABA Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information (December 1975); without limiting the generality of the foregoing, the limitations set forth in such Statement on the scope and use of this response (Paragraphs 2 and 7) are specifically incorporated herein by reference, and any description herein of any 'loss contingencies' is qualified in its entirety by Paragraph 5 of the Statement and the accompanying Commentary (which is an integral part of the Statement)."

The accompanying Commentary is an integral part of this Statement of Policy.

Commentary

Paragraph 1 (Client Consent to Response)

In responding to any aspect of an auditor's inquiry letter, the lawyer must be guided by his ethical obligations as set forth in the Code of Professional Responsibility. Under Canon 4 of the Code of Professional Responsibility a lawyer is enjoined to preserve the client's confidences (defined as information protected by the attorney-client privilege under applicable law) and the client's secrets (defined as other information gained in the professional relationship that the client has requested be held inviolate or the disclosure of which would be embarrassing or would be likely to be detrimental to the client). The observance of this ethical obligation, in the context of public policy, "... not only facilitates the full development of facts essential to proper representation of the client but also encourages laymen to seek early legal assistance." (Ethical Consideration 4-1).

The lawyer's ethical obligation therefore includes a much broader range of information than that protected by the attorney-client privilege. As stated in Ethical Consideration 4-4: "The attorney-client privilege is more limited than the ethical obligation of a lawyer to guard the confidences and secrets of his client. This ethical precept, unlike the evidentiary privilege, exists without regard to the nature or source of information or the fact that others share the knowledge."

In recognition of this ethical obligation, the lawyer should be careful to disclose fully to his client any confidence, secret or evaluation that is to be revealed to another, including the client's auditor, and to satisfy himself that the officer or agent of a corporate client consenting to the disclosure understands the legal consequences thereof and has authority to provide the required consent.

The law in the area of attorney-client privilege and the impact of statements made in letters to auditors upon that privilege has not yet been developed. Based upon cases treating the attorney-client privilege in other contexts, however, certain generalizations can be made with respect to the possible impact of statements in letters to auditors.

It is now generally accepted that a corporation may claim the attorney-client privilege. Whether the privilege extends beyond the control group of the corporation (a concept found in the existing decisional authority), and if so, how far, is yet unresolved.

If a client discloses to a third party a part of any privileged communication he has made to his attorney, there may have been a waiver as to the whole communication; further, it has been suggested that giving accountants access to privileged statements made to attorneys may waive any privilege as to those statements. Any disclosure of privileged communications relating to a particular subject matter may have the effect of waiving the privilege on other communications with respect to the same subject matter.

To the extent that the lawyer's knowledge of unasserted possible claims is obtained by means of confidential communications from the client, any disclosure thereof might constitute a waiver as fully as if the communication related to pending claims.

A further difficulty arises with respect to requests for evaluation of either pending or unasserted possible claims. It might be argued that any evaluation of a claim, to the extent based upon a confidential communication with the client, waives any privilege with respect to that claim.

Another danger inherent in a lawyer's placing a value on a claim, or estimating the likely result, is that such a statement might be treated as an admission or might be otherwise prejudicial to the client.

The Statement of Policy has been prepared in the expectation that judicial development of the law in the foregoing areas will be such that useful communication between lawyers and auditors in the manner envisaged in the Statement will not prove prejudicial to clients engaged in or threatened with adversary proceedings. If developments occur contrary to this expectation, appropriate review and revision of the Statement of Policy may be necessary.

Paragraph 2 (Limitation on Scope of Response)

In furnishing information to an auditor, the lawyer can properly limit himself to loss contingencies which he is handling on a substantive basis for the client in the form of legal consultation (advice and other attention to matters not in litigation by the lawyer in his professional capacity) or legal representation (counsel of record or other direct professional responsibility for a matter in litigation). Some auditors' inquiries go further and ask for information on matters of which the lawyer "has knowledge." Lawyers are concerned that such a broad request may be deemed to include information coming from a variety of sources including social contact and third party contacts as well as professional engagement and that the lawyer might be criticized or subjected to liability if some of this information is forgotten at the time of the auditor's request.

It is also believed appropriate to recognize that the lawyer will not necessarily have been authorized to investigate, or have investigated, all legal problems of the client, even when on notice of some facts which might conceivably constitute a legal problem upon exploration and development. Thus, consideration in the form of preliminary or passing advice, or regarding an incomplete or hypothetical state of facts, or where the lawyer has not been requested to give studied attention to the matter in question, would not come within the concept of "substantive attention" and would therefore be excluded. Similarly excluded are matters which may have been mentioned by the client but which are not actually being handled by the lawyer. Paragraph 2 undertakes to deal with these concerns.

Paragraph 2 is also intended to recognize the principle that the appropriate lawyer to respond as to a particular loss contingency is the lawyer having charge of the matter for the client (e.g., the lawyer representing the client in a litigation matter and/or the lawyer having overall charge and supervision of the matter), and that the lawyer not having that kind of role with respect to the matter should not be expected to respond merely because of having become aware of its existence in a general or incidental way.

The internal procedures to be followed by a law firm or law department may vary based on factors such as the scope of the lawyer's engagement and the complexity and magnitude of the client's affairs. Such procedures could, but need not, include use of a docket system to record litigation, consultation with lawyers in the firm or department having principal responsibility for the client's affairs or other procedures which, in light of the cost to the client, are not disproportionate to the anticipated benefit to be derived. Although these procedures may not necessarily identify all matters relevant to the response, the evolution and application of the lawyer's customary procedures should constitute a reasonable basis for the lawyer's response.

As the lawyer's response is limited to matters involving his professional engagement as counsel, such response should not include information concerning the client which the lawyer receives in another role. In particular, a lawyer who is also a director or officer of the client would not include information which he received as a director or officer unless the information was also received (or, absent the dual role, would in the normal course be received) in his capacity as legal counsel in the context of his professional engagement. Where the auditor's request for information is addressed to a law firm as a firm, the law firm may properly assume that its response is not expected to include any information which may have been communicated to the particular individual by reason of his serving in the capacity of director or officer of the client. The question of the individual's duty, in his role as a director or officer, is not here addressed.

Paragraph 3 (Response May Cover only Material Items in Certain Cases)

Paragraph 3 makes it clear that the lawyer may optionally limit his responses to those items which are individually or collectively material to the auditor's inquiry. If the lawyer takes responsibility for making a determination that a matter is not material for the purposes of his response to the audit inquiry, he should make it clear that his response is so limited. The auditor, in such circumstance, should properly be entitled to rely upon the lawyer's response as providing him with the necessary corroboration. It should be emphasized that the employment of inside general counsel by the client should not detract from the acceptability of his response since inside general counsel is as fully bound by the professional obligations and responsibilities contained in the Code of Professional Responsibility as outside counsel. If the audit inquiry sets forth a definition of materiality but the lawyer utilizes a different test of materiality, he should specifically so state. The lawyer may wish to reach an understanding with the auditor concerning the test of materiality to be used in his response, but he need not do so if he assumes responsibility for the criteria used in making materiality determinations. Any such understanding with the auditor should be referred to or set forth in the lawyer's response. In this connection, it is assumed that the test of materiality so agreed upon would not be so low in amount as to result in a disservice to the client and an unreasonable burden on counsel.

Paragraph 4 (Limited Responses)

The Statement of Policy is designed to recognize the obligation of the auditor to complete the procedures considered necessary to satisfy himself as to the fair presentation of the company's financial condition and results, in order to render a report which includes an opinion not qualified because of a limitation on the scope of the audit. In this connection, reference is made to SEC Accounting Series Release No. 90 [*Financial Reporting Release No. 1, section 607.01(b)*], in which it is stated:

"A 'subject to' or 'except for' opinion paragraph in which these phrases refer to the scope of the audit, indicating that the accountant has not been able to satisfy himself on some significant element in the financial statements, is not acceptable in certificates filed with the Commission in connection with the public offering of securities. The 'subject to' qualification is appropriate when the reference is to a middle paragraph or to footnotes explaining the status of matters which cannot be resolved at statement date."

Paragraph 5 (Loss Contingencies)

Paragraph 5 of the Statement of Policy summarizes the categories of "loss contingencies" about which the lawyer may furnish information to the auditor. The term loss contingencies and the categories relate to concepts of accounting accrual and disclosure specified for the accounting profession in Statement of Financial Accounting Standards No. 5[b] ("FAS 5") issued by the Financial Accounting Standards Board in March, 1975.

5.1 Accounting Requirements

To understand the significance of the auditor's inquiry and the implications of any response the lawyer may give, the lawyer should be aware of the following accounting concepts and requirements set out in FAS 5:[e]

a. A "loss contingency" is an existing condition, situation or set of circumstances involving uncertainty as to possible loss to an enterprise that will ultimately be resolved when one or more events occur or fail to occur. Resolutions of the uncertainty may confirm the loss or impairment of an asset or the incurrence of a liability. (Para. 1)

b. When a "loss contingency" exists, the likelihood that a future event or events will confirm the loss or impairment of an asset or the incurrence of a liability can range from probable to remote. There are three areas within that range, defined as follows:

    i. Probable — "The future event or events are likely to occur."

    ii. Reasonably possible — "The chance of the future event or events occurring is more than remote but less than likely."

    iii. Remote — "The chance of the future event or events occurring is slight." (Para. 3)

[e]Citations are to paragraph numbers of FAS 5.

c. *Accrual* in a client's financial statements by a charge to income of the period will be required if both the following conditions are met:

   i. "Information available prior to issuance of the financial statements indicates that it is *probable* that an asset had been impaired or a liability had been incurred at the date of the financial statements. It is implicit in this condition that it must be *probable* that one or more future events will occur confirming the fact of the loss." (emphasis added; footnote omitted)

   ii. "The amount of loss can be reasonably estimated." (Para. 8)

d. If there is no *accrual* of the loss contingency in the client's financial statements because one of the two conditions outlined in (c) above are not met, disclosure may be required as provided in the following:

   "If no accrual is made for a loss contingency because one or both of the conditions in paragraph 8 are not met, or if an exposure to loss exists in excess of the amount accrued pursuant to the provisions of paragraph 8, *disclosure* of the contingency *shall be made when there is at least a reasonable possibility* that a loss or an additional loss may have been incurred. *The disclosure shall indicate the nature of the contingency and shall give an estimate of the possible loss or range of loss or state that such an estimate cannot be made. Disclosure is not required of a loss contingency involving an unasserted claim* or assessment *when there has been no manifestation by potential claimant of an awareness of a possible claim or assessment unless it is considered probable that a claim will be asserted and there is a reasonable possibility that the outcome will be unfavorable*." (emphasis added; footnote omitted) (Para. 10)

e. The accounting requirements recognize or specify that (i) the opinions or views of counsel are not the sole source of audit evidence in making determinations about the accounting recognition or treatment to be given to litigation, and (ii) the fact that the lawyer is notable to express an opinion that the outcome will be favorable does not necessarily require an accrual of a loss. Paragraphs 36 and 37 of FAS 5 state as follows:

   "If the underlying cause of the litigation, claim, or assessment is an event occurring before the date of an enterprise's financial statements, the probability of an outcome unfavorable to the enterprise must be assessed to determine whether the condition in paragraph 8(a) is met. Among the factors that should be considered are the nature of the litigation, claim, or assessment, the progress of the case (including progress after the date of the financial statements but before those statements are issued), the opinions or views of legal counsel and other advisers, the experience of the enterprise in similar cases, the experience of other enterprises, and any decision of the enterprise's management as to how the enterprise intends to respond to the lawsuit, claim, or assessment (for example, a decision to contest the case vigorously or a decision to seek an out-of-court settlement). The fact that legal counsel is unable to express an opinion that the outcome will be favorable to the enterprise should not necessarily be interpreted to mean that the condition for accrual of a loss in paragraph 8(a) is met.

"The filing of a suit or formal assertion of a claim or assessment does not automatically indicate that accrual of a loss may be appropriate. The degree of probability of an unfavorable outcome must be assessed. The condition for accrual in paragraph 8(a) would be met if an unfavorable outcome is determined to be probable. If an unfavorable outcome is determined to be reasonably possible but not probable, or if the amount of loss cannot be reasonably estimated, accrual would be inappropriate, but disclosure would be required by paragraph 10 of this Statement."

f. Paragraph 38 of FAS 5 focuses on certain examples concerning the determination by the enterprise whether an assertion of an *unasserted possible claim* may be considered probable:

"With respect to unasserted claims and assessments, an enterprise must determine the degree of probability that a suit may be filed or a claim or assessment may be asserted and the possibility of an unfavorable outcome. For example, a catastrophe, accident, or other similar physical occurrence predictably engenders claims for redress, and in such circumstances their assertion may be probable; similarly, an investigation of an enterprise by a governmental agency, if enforcement proceedings have been or are likely to be instituted, is often followed by private claims for redress, and the probability of their assertion and the possibility of loss should be considered in each case. By way of further example, an enterprise may believe there is a possibility that it has infringed on another enterprise's patent rights, but the enterprise owning the patent rights has not indicated an intention to take any action and has not even indicated an awareness of the possible infringement. In that case, a judgment must first be made as to whether the assertion of a claim is probable. If the judgment is that assertion is not probable, no accrual or disclosure would be required. On the other hand, if the judgment is that assertion is probable, then a second judgment must be made as to the degree of probability of an unfavorable outcome. If an unfavorable outcome is probable and the amount of loss can be reasonably estimated, accrual of a loss is required by paragraph 8. If an unfavorable outcome is probable but the amount of loss cannot be reasonably estimated, accrual would not be appropriate, but disclosure would be required by paragraph 10. If an unfavorable outcome is reasonably possible but not probable, disclosure would be required by paragraph 10."

For a more complete presentation of FAS 5, reference is made to AU section 337B, *Exhibit I — Excerpts From Financial Accounting Standards Board* Accounting Standards

Codification *450,* Contingencies [SAS No. 12 section 337B],[f] in which are set forth excerpts selected by the AICPA as relevant to a Statement on Auditing Standards, issued by its Auditing Standards Executive Committee, captioned "Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments."

5.2 Lawyer's Response

Concepts of probability inherent in the usage of terms like "probable" or "reasonably possible" or "remote" mean different things in different contexts. Generally, the outcome of, or the loss which may result from, litigation cannot be assessed in any way that is comparable to a statistically or empirically determined concept of "probability" that may be applicable when determining such matters as reserves for warranty obligations or accounts receivable or loan losses when there is a large number of transactions and a substantial body of known historical experience for the enterprise or comparable enterprises. While lawyers are accustomed to counseling clients during the progress of litigation as to the possible amount required for settlement purposes, the estimated risks of the proceedings at particular times and the possible application or establishment of points of law that may be relevant, such advice to the client is not possible at many stages of the litigation and may change dramatically depending upon the development of the proceedings. Lawyers do not generally quantify for clients the "odds" in numerical terms; if they do, the quantification is generally only undertaken in an effort to make meaningful, for limited purposes, a whole host of judgmental factors applicable at a particular time, without any intention to depict "probability" in any statistical, scientific or empirically-grounded sense. Thus, for example, statements that litigation is being defended vigorously and that the client has meritorious defenses do not, and do not purport to, make a statement about the probability of outcome in any measurable sense.

Likewise, the "amount" of loss — that is, the total of costs and damages that ultimately might be assessed against a client — will, in most litigation, be a subject of wide possible variance at most stages; it is the rare case where the amount is precise and where the question is whether the client against which claim is made is liable either for all of it or none of it.

In light of the foregoing considerations, it must be concluded that, as a general rule, it should not be anticipated that meaningful quantifications of "probability" of outcome or amount of damages can be given by lawyers in assessing litigation. To provide content to the definitions set forth in Paragraph 5 of the Statement of Policy, this Commentary amplifies the meanings of the terms under discussion, as follows:

> *"probable"* — An unfavorable outcome is normally "probable" if, but only if, investigation, preparation (including development of the factual data and legal research) and progress of the matter have reached a stage where a judgment can be made, taking all relevant factors into account which may affect the outcome, that it is extremely doubtful that the client will prevail.

---

[f] Statement on Auditing Standards No. 12 section 337B, *Exhibit I — Excerpts From Financial Accounting Standards Board* Accounting Standards Codification *450*, Contingencies, has been withdrawn by this section.

> *"remote"* — The prospect for an unfavorable outcome appears, at the time, to be slight; i.e., it is extremely doubtful that the client will not prevail. Normally, this would entail the ability to make an unqualified judgment, taking into account all relevant factors which may affect the outcome, that the client may confidently expect to prevail on a motion for summary judgment on all issues due to the clarity of the facts and the law.

In other words, for purposes of the lawyer's response to the request to advise auditors about litigation, an unfavorable outcome will be "probable" only if the chances of the client prevailing appear slight and of the claimant losing appear extremely doubtful; it will be "remote" when the client's chances of losing appear slight and of not winning appear extremely doubtful. It is, therefore, to be anticipated that, in most situations, an unfavorable outcome will be neither "probable" nor "remote" as defined in the Statement of Policy.

The discussion above about the very limited basis for furnishing judgments about the outcome of litigation applies with even more force to a judgment concerning whether or not the assertion of a claim not yet asserted is "probable." That judgment will infrequently be one within the professional competence of lawyers and therefore the lawyer should not undertake such assessment except where such judgment may become meaningful because of the presence of special circumstances, such as catastrophes, investigations and previous public disclosure as cited in Paragraph 5 of the Statement of Policy, or similar extrinsic evidence relevant to such assessment. Moreover, it is unlikely, absent relevant extrinsic evidence, that the client or anyone else will be in a position to make an informed judgment that assertion of a possible claim is "probable" as opposed to "reasonably possible" (in which event disclosure is not required). In light of the legitimate concern that the public interest would not be well served by resolving uncertainties in a way that invites the assertion of claims or otherwise causes unnecessary harm to the client and its stockholders, a decision to treat an unasserted claim as "probable" of assertion should be based only upon compelling judgment.

Consistent with these limitations believed appropriate for the lawyer, he should not represent to the auditor, nor should any inference from his response be drawn, that the unasserted possible claims identified by the client (as contemplated by Paragraph 5(c) of the Statement of Policy) represent all such claims of which the lawyer may be aware or that he necessarily concurs in his client's determination of which unasserted possible claims warrant specification by the client; within proper limits, this determination is one which the client is entitled to make — and should make — and it would be inconsistent with his professional obligations for the lawyer to volunteer information arising from his confidential relationship with his client.

As indicated in Paragraph 5, the lawyer also may be asked to estimate the potential loss (or range) in the event that an unfavorable outcome is not viewed to be "remote." In such a case, the lawyer would provide an estimate only if he believes that the probability of inaccuracy of the estimate of the range or amount is slight. What is meant here is that the estimate of amount of loss presents the same difficulty as assessment of outcome and that the same formulation of "probability" should be used with respect to the determination of estimated loss amounts as should be used with respect to estimating the outcome of the matter.

In special circumstances, with the proper consent of the client, the lawyer may be better able to provide the auditor with information concerning loss contingencies through conferences where there is opportunity for more detailed discussion and interchange. However, the principles set forth in the Statement of Policy and this Commentary are fully applicable to such conferences.

Subsumed throughout this discussion is the ongoing responsibility of the lawyer to assist his client, at the client's request, in complying with the requirements of FAS 5 to the extent such assistance falls within his professional competence. This will continue to involve, to the extent appropriate, privileged discussions with the client to provide a better basis on which the client can make accrual and disclosure determinations in respect of its financial statements.

In addition to the considerations discussed above with respect to the making of any judgment or estimate by the lawyer in his response to the auditor, including with respect to a matter specifically identified by the client, the lawyer should also bear in mind the risk that the furnishing of such a judgment or estimate to any one other than the client might constitute an admission or be otherwise prejudicial to the client's position in its defense against such litigation or claim (see Paragraph 1 of the Statement of Policy and of this Commentary).

Paragraph 6 (Lawyer's Professional Responsibility)

The client must satisfy whatever duties it has relative to timely disclosure, including appropriate disclosure concerning material loss contingencies, and, to the extent such matters are given substantive attention in the form of legal consultation, the lawyer, when his engagement is to advise his client concerning a disclosure obligation, has a responsibility to advise his client concerning its obligations in this regard. Although lawyers who normally confine themselves to a legal specialty such as tax, antitrust, patent or admiralty law, unlike lawyers consulted about SEC or general corporate matters, would not be expected to advise generally concerning the client's disclosure obligations in respect of a matter on which the lawyer is working, the legal specialist should counsel his client with respect to the client's obligations under FAS 5 to the extent contemplated herein. Without regard to legal specialty, the lawyer should be mindful of his professional responsibility to the client described in Paragraph 6 of the Statement of Policy concerning disclosure.

The lawyer's responsibilities with respect to his client's disclosure obligations have been a subject of considerable discussion and there may be, in due course, clarification and further guidance in this regard. In any event, where in the lawyer's view it is clear that (i) the matter is of material importance and seriousness, and (ii) there can be no reasonable doubt that its non-disclosure in the client's financial statements would be a violation of law giving rise to material claims, rejection by the client of his advice to call the matter to the attention of the auditor would almost certainly require the lawyer's withdrawal from employment in accordance with the Code of Professional Responsibility. (See, e.g., Disciplinary Rule 7-102 (A)(3) and (7), and Disciplinary Rule 2-110 (B)(2).) Withdrawal under such circumstances is obviously undesirable and might present serious problems for the client. Accordingly, in the context of financial accounting and reporting for loss contingencies arising from unasserted claims, the standards for which are contained in FAS

5, clients should be urged to disclose to the auditor information concerning an unasserted possible claim or assessment (not otherwise specifically identified by the client) where in the course of the services performed for the client it has become clear to the lawyer that (i) the client has no reasonable basis to conclude that assertion of the claim is not probable (employing the concepts hereby enunciated) and (ii) given the probability of assertion, disclosure of the loss contingency in the client's financial statements is beyond reasonable dispute required.

Paragraph 7 (Limitation on Use of Response)

Some inquiry letters make specific reference to, and one might infer from others, an intention to quote verbatim or include the substance of the lawyer's reply in footnotes to the client's financial statements. Because the client's prospects in pending litigation may shift as a result of interim developments, and because the lawyer should have an opportunity, if quotation is to be made, to review the footnote in full, it would seem prudent to limit the use of the lawyer's reply letter. Paragraph 7 sets out such a limitation.

Paragraph 7 also recognizes that it may be in the client's interest to protect information contained in the lawyer's response to the auditor, if and to the extent possible, against unnecessary further disclosure or use beyond its intended purpose of informing the auditor. For example, the response may contain information which could prejudice efforts to negotiate a favorable settlement of a pending litigation described in the response. The requirement of consent to further disclosure, or of reasonable advance notice where disclosure may be required by court process or necessary in defense of the audit, is designed to give the lawyer an opportunity to consult with the client as to whether consent should be refused or limited or, in the case of legal process or the auditor's defense of the audit, as to whether steps can and should be taken to challenge the necessity of further disclosure or to seek protective measures in connection therewith. It is believed that the suggested standard of twenty days advance notice would normally be a minimum reasonable time for this purpose.

Paragraph 8 (General)

It is reasonable to assume that the Statement of Policy will receive wide distribution and will be readily available to the accounting profession. Specifically, the Statement of Policy has been reprinted as Exhibit II to the Statement on Auditing Standards, "Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments," issued by the Auditing Standards Executive Committee of the American Institute of Certified Public Accountants. Accordingly, the mechanic for its incorporation by reference will facilitate lawyer-auditor communication. The incorporation is intended to include not only limitations, such as those provided by Paragraphs 2 and 7 of the Statement of Policy, but also the explanatory material set forth in this Commentary.

Annex A

[*Illustrative forms of letters for full response by outside practitioner or law firm and inside general counsel to the auditor's inquiry letter. These illustrative forms, which are not part of the Statement of Policy, have been prepared by the Committee on Audit Inquiry Responses* *solely in order to assist those who may wish to have, for reference purposes, a form of response which incorporates the principles of the Statement of Policy and accompanying Commentary. Other forms of response letters will be appropriate depending on the circumstances.*]

Illustrative Form of Letter for Use by Outside Practitioner or Law Firm:

[*Name and Address of Accounting Firm*]

Re: [*Name of Client*] [*and Subsidiaries*]

Dear Sirs:

By letter date [*insert date of request*] Mr. [*insert name and title of officer signing request*] of [*insert name of client*] [*(the "Company") or (together with its subsidiaries, the "Company")*] has requested us to furnish you with certain information in connection with your examination of the accounts of the Company as at [*insert fiscal year-end*].

[*Insert description of the scope of the lawyer's engagement; the following are sample descriptions:*]

While this firm represents the Company on a regular basis, our engagement has been limited to specific matters as to which we were consulted by the Company.

[*or*]

We call your attention to the fact that this firm has during the past year represented the Company only in connection with certain [*Federal income tax matters*] [*litigation*] [*real estate transactions*] [*describe other specific matters, as appropriate*] and has not been engaged for any other purpose.

Subject to the foregoing and to the last paragraph of this letter, we advise you that since [*insert date of beginning of fiscal period under audit*] we have not been engaged to give substantive attention to, or represent the Company in connection with, [*material*][g] loss contingencies coming within the scope of clause (a) of Paragraph 5 of the Statement of Policy referred to in the last paragraph of this letter, except as follows:

[*Describe litigation and claims which fit the foregoing criteria.*]

[*If the inquiry letter requests information concerning specified unasserted possible claims or assessments and/or contractually assumed obligations:*]

With respect to the matters specifically identified in the Company's letter and upon which comment has been specifically requested, as contemplated by clauses (b) or (c) of Paragraph 5 of the ABA Statement of Policy, we advise you, subject to the last paragraph of this letter, as follows:

[*Insert information as appropriate*]

The information set forth herein is [*as of the date of this letter*] [*as of (insert date), the date on which we commenced our internal review procedures for purposes of preparing this*

[g]***Note:*** See Paragraph 3 of the Statement of Policy and the accompanying Commentary for guidance where the response is limited to material items.

response], except as otherwise noted, and we disclaim any undertaking to advise you of changes which thereafter may be brought to our attention.

[*Insert information with respect to outstanding bills for services and disbursements.*]

This response is limited by, and in accordance with, the ABA Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information (December 1975); without limiting the generality of the foregoing, the limitations set forth in such Statement on the scope and use of this response (Paragraphs 2 and 7) are specifically incorporated herein by reference, and any description herein of any "loss contingencies" is qualified in its entirety by Paragraph 5 of the Statement and the accompanying Commentary (which is an integral part of the Statement). Consistent with the last sentence of Paragraph 6 of the ABA Statement of Policy and pursuant to the Company's request, this will confirm as correct the Company's understanding as set forth in its audit inquiry letter to us that whenever, in the course of performing legal services for the Company with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, we have formed a professional conclusion that the Company must disclose or consider disclosure concerning such possible claim or assessment, we, as a matter of professional responsibility to the Company, will so advise the Company and will consult with the Company concerning the question of such disclosure and the applicable requirements of Statement of Financial Accounting Standards No. 5.[b] [*Describe any other or additional limitation as indicated by Paragraph 4 of the Statement*]

Very truly yours,

Illustrative Form of Letter for Use by Inside General Counsel:

[*Name and Address of Accounting Firm*]

Re: [*Name of Company*] [*and Subsidiaries*]

Dear Sirs:

As General Counsel[h] of [*insert name of client*] [*(the "Company")*] [*(together with its subsidiaries, the "Company")*], I advise you as follows in connection with your examination of the accounts of the Company as at [*insert fiscal year-end*].

I call your attention to the fact that as General Counsel[h]for the Company I have general supervision of the Company's legal affairs. [*If the general legal supervisory responsibilities of the person signing the letter are limited, set forth here a clear description of those legal matters over which such person exercises general supervision, indicating exceptions to such supervision and situations where primary reliance should be placed on other sources.*] In such capacity, I have reviewed litigation and claims threatened or asserted involving the Company and have consulted with outside legal counsel with respect thereto where I have deemed appropriate.

Subject to the foregoing and to the last paragraph of this letter, I advise you that since [*insert date of beginning of fiscal period under audit*] neither I, nor any of the lawyers over whom I exercise general legal supervision, have given substantive attention to, or represented the Company in connection with, [*material*][g] loss contingencies coming within the scope of clause (a) of Paragraph 5 of the Statement of Policy referred to in the last paragraph of this letter, except as follows:

[*Describe litigation and claims which fit the foregoing criteria.*]

[*If information concerning specified unasserted possible claims or assessments and/or contractually assumed obligations is to be supplied:*]

With respect to matters which have been specifically identified as contemplated by clauses (b) or (c) of Paragraph 5 of the ABA Statement of Policy, I advise you, subject to the last paragraph of this letter, as follows:

[*Insert information as appropriate*]

The information set forth herein is [*as of the date of this letter*] as of [*insert date*], the date on which we commenced our internal review procedures for purposes of preparing this response, except as otherwise noted, and I disclaim any undertaking to advise you of changes which thereafter may be brought to my attention or to the attention of the lawyers over whom I exercise general legal supervision.

[h]It may be appropriate in some cases for the response to be given by inside counsel other than inside general counsel, in which event this letter should be appropriately modified.

This response is limited by, and in accordance with, the ABA Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information (December 1975); without limiting the generality of the foregoing, the limitations set forth in such Statement on the scope and use of this response (Paragraphs 2 and 7) are specifically incorporated herein by reference, and any description herein of any "loss contingencies" is qualified in its entirety by Paragraph 5 of the Statement and the accompanying Commentary (which is an integral part of the Statement). Consistent with the last sentence of Paragraph 6 of the ABA Statement of Policy, this will confirm as correct the Company's understanding that whenever, in the course of performing legal services for the Company with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, I have formed a professional conclusion that the Company must disclose or consider disclosure concerning such possible claim or assessment, I, as a matter of professional responsibility to the Company, will so advise the Company and will consult with the Company concerning the question of such disclosure and the applicable requirements of Statement of Financial Accounting Standards No. 5.[b][*Describe any other or additional limitation as indicated by Paragraph 4 of the Statement.*]

Very truly yours,

[Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 143, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 144, July 2021.]

Exhibit B — Report of the Subcommittee on Audit Inquiry Responses[1]

.A91 Because of a recent court case and other judicial decisions involving lawyers' responses to auditors' requests for information, an area of uncertainty or concern has been brought to the Subcommittee's attention and is the subject of the following comment:

This Committee's report does not modify the ABA Statement of Policy, nor does it constitute an interpretation thereof. The Preamble to the ABA Statement of Policy states as follows:

> Both the Code of Professional Responsibility and the cases applying the evidentiary privilege recognize that the privilege against disclosure can be knowingly and voluntarily waived by the client. It is equally clear that disclosure to a third party may result in loss of the "confidentiality" essential to maintain the privilege. Disclosure to a third party of the lawyer-client communication on a particular subject may also destroy the privilege as to other communications on that subject. Thus, the mere disclosure by the lawyer to the outside auditor, with due client consent, of the substance of communications between the lawyer and client may significantly impair the client's ability in other contexts to maintain the confidentiality of such communications.

Under the circumstances a policy of audit procedure which requires clients to give consent and authorize lawyers to respond to general inquiries and disclose information to auditors concerning matters which have been communicated in confidence is essentially destructive of free and open communication and early consultation between lawyer and client. The institution of such a policy would inevitably discourage management from discussing potential legal problems with counsel for fear that such discussion might become public and precipitate a loss to or possible liability of the business enterprise and its stockholders that might otherwise never materialize.

It is also recognized that our legal, political, and economic systems depend to an important extent on public confidence in published financial statements. To meet this need the accounting profession must adopt and adhere to standards and procedures that will command confidence in the auditing process. It is not, however, believed necessary, or sound public policy, to intrude upon the confidentiality of the lawyer-client relationship in order to command such confidence. On the contrary, the objective of fair disclosure in financial statements is more likely to be better served by maintaining the integrity of the confidential relationship between lawyer and client, thereby strengthening corporate management's confidence in counsel and to act in accordance with counsel's advice.

Paragraph 1 of the ABA Statement of Policy provides as follows:

1. *Client Consent to Response*. The lawyer may properly respond to the auditor's requests for information concerning loss contingencies (the term and concept

[1] Excerpted from "Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information," *The Business Lawyer* 31, no. 3 (1976). Reprinted by permission of the American Bar Association.

established by Statement of Financial Accounting Standards No. 5, promulgated by the Financial Accounting Standards Board in March 1975 and discussed in Paragraph 5.1 of the accompanying commentary), to the extent hereinafter set forth, subject to the following:

a. Assuming that the client's initial letter requesting the lawyer to provide information to the auditor is signed by an agent of the client having apparent authority to make such a request, the lawyer may provide to the auditor information requested, without further consent, unless such information discloses a confidence or a secret or requires an evaluation of a claim.

b. In the normal case, the initial request letter does not provide the necessary consent to the disclosure of a confidence or secret or to the evaluation of a claim since that consent may only be given after full disclosure to the client of the legal consequences of such action.

c. Lawyers should bear in mind, in evaluating claims, that an adverse party may assert that any evaluation of potential liability is an admission.

d. In securing the client's consent to the disclosure of confidences or secrets, or the evaluation of claims, the lawyer may wish to have a draft of his letter reviewed and approved by the client before releasing it to the auditor; in such cases, additional explanation would in all probability be necessary so that the legal consequences of the consent are fully disclosed to the client.

In order to preserve explicitly the evidentiary privileges, some lawyers have suggested that clients include language in the following or substantially similar form:

> We do not intend that either our request to you to provide information to our auditor or your response to our auditor should be construed in any way to constitute a waiver of the attorney-client privilege or the attorney work-product privilege.

If client's request letter does not contain language similar to that in the preceding paragraph, the lawyer's statement that the client has so advised him or her may be based upon the fact that the client has in fact so advised the lawyer, in writing or orally, in other communications or in discussions.

For the same reason, the response letter from some lawyers also includes language in the following or substantially similar form:

> The Company [*or other defined term*] has advised us that, by making the request set forth in its letter to us, the Company [*or other defined term*] does not intend to waive the attorney-client privilege with respect to any information which the Company [*or other defined term*] has furnished to us. Moreover, please be advised that our response to you should not be construed in any way to constitute a waiver of the protection of the attorney work-product privilege with respect to any of our files involving the Company [*or other defined term*].

We believe that language similar to the foregoing in letters of the client or the lawyer simply makes explicit what has always been implicit, namely, it expressly states clearly that neither the client nor the lawyer intended a waiver. It follows that non-inclusion of either or both of the foregoing statements by the client or the lawyer in their respective letters at any time in the past or the future would not constitute an expression of intent to waive the privileges.

On the other hand, the inclusion of such language does not necessarily assure the client that, depending on the facts and circumstances, a waiver may not be found by a court of law to have occurred.

We do not believe that the foregoing types of inclusions cause a negative impact upon the public policy considerations described in the Preamble to the ABA Statement of Policy nor do they intrude upon the arrangements between the legal profession and the accounting profession contemplated by the ABA Statement of Policy. Moreover, we do not believe that such language interferes in any way with the standards and procedures of the accounting profession in the auditing process nor should it be construed as a limitation upon the lawyer's reply to the auditors. We have been informed that the Auditing Standards Board of the AICPA has adopted an interpretation of SAS 12 recognizing the propriety of these statements.

Lawyers, in any case, should be encouraged to have their draft letters to auditors reviewed and approved by the client before releasing them to the auditors and may wish to explain to the client the legal consequences of the client's consent to lawyer's response as contemplated by subparagraph 1(d) of the Statement of Policy.

[Paragraph renumbered by the issuance of SAS No. 142, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 143, July 2020. Paragraph subsequently renumbered by the issuance of SAS No. 144, July 2021.]

Exhibit C — Statement on Updates to Audit Response Letters[a]

.A92 *By Audit Responses Committee, ABA Business Law Section*

Requests for updates to lawyers' audit response letters have become more frequent in recent years. Typically, the client's audit inquiry letter to its lawyers calls for a response before the anticipated issuance date of the audited financial statements. An "update" or "bringdown" is an audit response letter provided to the auditor in which a lawyer provides information about loss contingencies as of a date after the date of the lawyer's initial response to the audit inquiry letter and any previous update.

The *ABA Statement of Policy Regarding Lawyers' Responses to Auditors' Requests*[1] does not specifically discuss updates to audit response letters. In view of the increased frequency of update requests and the lack of guidance regarding these requests, the ABA Business Law Section Audit Responses Committee has prepared this statement to outline the reasons auditors seek updates of audit response letters and to present the Committee's views on appropriate practices for responding to update requests under the *ABA Statement of Policy*. The Committee hopes that the guidance provided in this Statement will enhance the ability of lawyers to respond efficiently to update requests, thereby facilitating the audit process and contributing to audit quality.

The Reasons for Update Requests

The *ABA Statement of Policy*, including its reference to accounting and auditing standards, provides the framework for lawyers' audit response letters. The *ABA Statement of Policy* recognizes the fundamental importance to the American legal system of maintaining client confidences. It makes clear that lawyers may provide information to auditors only at the request, and with the express consent, of their clients.[2] In accordance with the *ABA Statement of Policy*, lawyers typically indicate in their audit response letters that the information they are furnishing is as of a specified date and disclaim any undertaking to advise the auditor of changes that may later be brought to the lawyer's attention.[3] The *ABA Statement of Policy* also contemplates that "the auditor may assume that the firm or department has endeavored, to the extent believed necessary by the firm or department, to determine from lawyers currently in the firm or department who have performed services for the client since the beginning of the fiscal period under audit whether such services involved substantive attention in the form of legal consultation concerning" loss contingencies.[4]

---

[1]*American Bar Association Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information*, 31 BUS. LAW. 1709 (1976) [hereinafter *ABA Statement of Policy*], *reprinted in* ABA BUS. LAW SECTION AUDIT RESPONSES COMM., AUDITOR'S LETTER HANDBOOK 1 (2d ed. 2013).

[2]*Id.* at 2–3 (¶ 1).

[3]*Id.* at 3 (¶ 2) ("It is also appropriate for the lawyer to indicate the date as of which information is furnished and to disclaim any undertaking to advise the auditor of changes which may thereafter be brought to the lawyer's attention.").

In recent years, requests for updates have become standard procedure for many auditors. This reflects changes in applicable accounting standards and auditing practices, as well as increased emphasis on loss contingencies by the Securities and Exchange Commission ("SEC") and Financial Accounting Standards Board ("FASB"), which in turn has increased auditors' focus on loss contingencies. Requests for updates to audit response letters typically are made in three contexts:

- *Audit of annual financial statements.* Changes to financial reporting standards require the entity's management to evaluate "subsequent events," which can include changes in loss contingencies, through the date the financial statements are issued or are available to be issued.[5]

  As a result of changes in auditing practices,[6] most auditors' reports are now dated as of the date the financial statements are issued or are available to be issued, as opposed to the date on which fieldwork is completed. Accordingly, the auditor may seek to obtain audit evidence, in the form of audit letter updates, to corroborate

---

[4]*Id.* Although a law firm's or law department's internal review procedure may include canvassing lawyers who performed services for a client from the beginning of the fiscal period under audit, many firms or departments limit their response to matters existing at the end of that period or arising after the end of the period. This approach is based upon the statement in the typical request letter to the effect that the response should include matters that existed at the end of the fiscal period under audit and during the period from that date to the date as of which the response is given. See INTERIM AUDITING STANDARDS, AU § 337A (Pub. Co. Accounting Oversight Bd. 2003) (illustrative audit inquiry letter); CODIFICATION OF STATEMENTS ON AUDITING STANDARDS, Statement on Auditing Standards No. 122, AU-C § 501.A69 (Am. Inst. of Certified Pub. Accountants 2011) (illustrative audit inquiry letter). Thus, under this approach, matters resolved during the fiscal period, which no longer comprise "loss contingencies" at or after the fiscal period end date, are not reported.

[5]See SUBSEQUENT EVENTS, Accounting Standards Codification, Topic 855 (Fin. Accounting Standards Bd. 2010) [hereinafter ASC 855]. ASC 855 codifies a prior accounting standard on subsequent events. See SUBSEQUENT EVENTS, Statement of Fin. Accounting Standards, No. 165 (Fin. Accounting Standards Bd. 2009) [hereinafter SFAS 165]. Notably, SFAS 165 amended the accounting standard governing contingencies. See ACCOUNTING FOR CONTINGENCIES, Statement of Fin. Accounting Standards No. 5 (Fin. Accounting Standards Bd. 1975), amended by SFAS 165, ¶ B3 (codified as CONTINGENCIES, Accounting Standards Codification, Topic 450 (Fin. Accounting Standards Bd. 2009)) [hereinafter ASC 450]. As amended, ASC 450 provides that, in assessing the accounting for a loss contingency, the reporting entity must consider information available through the date the financial statements were issued or available to be issued. *See id.* 450-20-25. Under ASC 855, for SEC filers, financial statements are "issued" on the date they are filed with the SEC; for non-SEC filers, they are "available to be issued" when they are complete and all internal approvals for issuance have occurred. ASC 855-10-25. ASC 855 also requires that entities disclose in the financial statements the date through which they evaluated subsequent events. *See id.* 855-10-50.

[6]In connection with its adoption of Auditing Standard No. 5 in 2007, the Public Company Accounting Oversight Board amended Interim Auditing Standard AU 530 to provide that "the auditor should date the audit report no earlier than the date on which the auditor has obtained sufficient appropriate evidence to support the auditor's opinion." INTERIM AUDITING STANDARDS, AU § 530.01 (Pub. Co. Accounting Oversight Bd. 2007). Previously, AU 530 had provided that generally the date of completion of the field work should be used as the date of the report. See Proposed Auditing Standard — An Audit of Internal Control over Financial Reporting that Is Integrated with an Audit of Financial Statements and Related Other Proposals, PCAOB Release No. 2006-007, at 34 (Dec. 19, 2006), *available at*http://pcaobus.org/Rules/Documents/2006-12-19_Release_No._2006-007.pdf. The PCAOB also amended its Interim Auditing Standards to provide that "the latest date of the period covered by the lawyer's response (the 'effective date') should be as close to the date of the auditor's report as is practicable in the circumstances." INTERIM AUDITING STANDARDS, AU § 9337.05 (Pub. Co. Accounting Oversight Bd. 2007). Previously, the standard had said that the effective date should be "as close to the completion of field work" as practicable in the circumstances. INTERIM AUDITING STANDARDS, AU § 9337.05 (Pub. Co. Accounting Oversight Bd. 2003).

management's identification of and accounting for loss contingencies as of the issuance date.

- *Review of quarterly financial statements*. As with annual financial statements, an entity is required to consider subsequent events, including loss contingencies, through the date of issuance of its quarterly financial statements. SEC rules require that quarterly financial statements be reviewed by the entity's external auditors in accordance with relevant auditing standards.[7] Although they are not ordinarily required to do so,[8] auditors may request confirmation from counsel about loss contingencies as part of their internal procedures before they will sign off on the filing of quarterly financial statements with the SEC.

- *Consents in connection with registered securities offerings*. Auditors must consent to the use of their audit reports in registration statements for public offerings of securities. Auditing standards require the auditors to perform certain procedures before consenting to the inclusion of a previously issued audit report in a registration statement or amendment to a registration statement.[9] Although these standards do not require an auditor to make inquiries of lawyers, before issuing a consent, many auditors ask lawyers to update their audit response letters. In offerings involving shelf takedowns, the auditors may request one or more updates in connection with their delivery of "comfort letters" to underwriters.

The foregoing explains the increased frequency of auditors' requests for updates. However, the experience of many lawyers suggests that auditors (and sometimes clients) do not always appreciate the need for lawyers to perform internal procedures to be able to deliver an update.

Lawyers' Responses to Update Requests — A Framework

A lawyer's update to an audit response letter is subject to the *ABA Statement of Policy* and should be prepared and delivered in accordance with its terms. This has several implications.

Client Requests for Updates to Audit Response Letters. As with the initial response letter, a lawyer may only provide information to the auditor at the client's request, even if, as is often the case, the auditor requests the update directly. The lawyer should be satisfied that the client has provided the necessary authorization for the update. The Committee does not believe that any specific form of authorization is necessary, so long as it expresses the client's intent that the lawyer deliver an update to the lawyer's response letter to the

[7]Regulation S-X, Rule 10-01(d), 17 C.F.R. § 210.10-01(d) (2014).

[8]*See* INTERIM AUDITING STANDARDS, AU § 722.20 (Pub. Co. Accounting Oversight Bd. 2003); CODIFICATION OF AUDITING STANDARDS AND PROCEDURES, Statement on Auditing Standards No. 100, AU § 722.20 (Am. Inst. of Certified Pub. Accountants 2002), *superseded by* CODIFICATION OF STATEMENTS ON AUDITING STANDARDS, Statement on Auditing Standards No. 122, AU-C § 930.15 (Am. Inst. of Certified Pub. Accountants 2011).

[9]*See* INTERIM AUDITING STANDARDS, AU § 711 (Pub. Co. Accounting Oversight Bd. 2003); CODIFICATION OF STATEMENTS ON AUDITING STANDARDS, Statement on Auditing Standards No. 122, AU-C § 925 (Am. Inst. of Certified Pub. Accountants 2011).

auditor. A lawyer may rely on any form of written request, including electronic mail. The Committee believes that lawyers may also rely on oral requests for an update, though it may be advisable for them to document such requests.

Standing Requests. In some cases, a client's initial request letter may contain a standing request that the lawyer deliver updates to response letters upon request by the auditor. The inclusion of such a request can facilitate the audit response process. Many lawyers view a client request to provide information to the auditors in connection with the audit of the annual financial statements to include an implicit standing request to respond to update requests related to issuance of those financial statements. Other lawyers require a separate authorization for every update, absent a standing request.

The Committee believes that lawyers may provide an update on the basis of a standing request, but recognizes that in some circumstances they may want a specific request or consent from the client. Among those circumstances are (1) when significant time has elapsed since the initial request, and (2) when developments have occurred that would be required to be reported in the update, such as pending or threatened litigation that has arisen since the previous response or significant developments in previously described pending or threatened litigation, and the lawyer believes the client should be consulted before issuing the update response.

Preparation of Updates to Audit Response Letters. The Committee recognizes that circumstances may allow lawyers significantly less time to prepare an update than they had for the initial response letter. Still, clients and auditors should recognize that because, from the lawyers' standpoint, each update is tantamount to reissuance of the initial response letter, lawyers may have to perform internal review procedures similar to those performed for the initial response letter. Those may include inquiring again of lawyers in the law firm or law department who may have relevant information. Clients should be encouraged to communicate with their lawyers and the auditor when the client becomes aware of a filing or transaction that will require an update to an audit response letter, so that the lawyers have adequate time to perform sufficient internal review procedures to provide the update.[10]

The internal procedures lawyers perform to issue an update will depend on the particular circumstances and the professional judgment of the lawyers involved as to what is necessary. For example, some law firms or law departments may canvass the lawyers who provided information reflected in the earlier response to the audit inquiry letter, even if those lawyers have not subsequently recorded time for the client. Other firms or law departments may only canvass lawyers who have performed legal services for the client since the cutoff date for the last internal inquiry and any other lawyers they believe are likely to have relevant information. The Committee believes that either approach is

[10]See *ABA Statement of Policy, supra* note 1, at 9–10 (commentary ¶ 2) ("The internal procedures to be followed by a law firm or law department may vary based on factors such as the scope of the lawyer's engagement and the complexity and magnitude of the client's affairs. Such procedures could, but need not, include use of a docket system to record litigation, consultation with lawyers in the firm or department having principal responsibility for the client's affairs or other procedures which, in light of the cost to the client, are not disproportionate to the anticipated benefit to be derived. Although these procedures may not necessarily identify all matters relevant to the response, the evolution and application of the lawyer's customary procedures should constitute a reasonable basis for the lawyer's response.").

acceptable. The Committee recognizes that the professional judgment of lawyers may lead to different procedures in particular cases, which might involve varying types and amount of inquiry and documentation.

Form of Updates to Audit Response Letters. Updates ordinarily should be delivered in writing, not communicated orally. Any update to an audit response letter should be made in accordance with the *ABA Statement of Policy*, including its conditions and limitations. Unlike lawyers' initial responses to audit inquiry letters, no illustrative form of update response has been established, and many different forms are in common use.

Some lawyers regularly use a "long form" response letter that employs the same form as the initial response letter but provides information about loss contingencies as of an effective date after the effective date of the previous letter. Others use a "short form" letter that does not contain all the language of a long-form letter, but rather references the information in the previous letter and identifies any reportable developments with respect to previously reported loss contingencies or reportable loss contingencies that have arisen since the prior effective date. Finally, some lawyers have adopted a hybrid approach under which they use a short form in some circumstances and a long form in others; these lawyers may use a short form when they have no developments to report since the previous response letter and a long form when additional information about loss contingencies (whether previously reported or new) needs to be reported.

If a short form is used, the Committee suggests that it should (1) refer to the relevant client request(s), the entity or entities covered by the response, and the most recent long form response letter and previous update letters, if any, identifying them by date, and (2) state expressly that the response is subject to the same limitations and qualifications contained in the earlier letter. Nothing in this statement is intended to limit the professional judgment of a lawyer regarding the form the lawyer uses to update an audit response letter.

[Paragraph added, June 2015, to reflect *Statement on Updates to Audit Response Letter* by the Audit Responses Committee of the American Bar Association. AU-C Section 505

External Confirmations

Source: SAS No. 122; SAS No. 145.

Effective for audits of financial statements for periods ending on or after December 15, 2012, unless otherwise indicated.

Introduction

Scope of This Section

.01 This section addresses the auditor's use of external confirmation procedures to obtain audit evidence, in accordance with the requirements of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, and section 500, *Audit Evidence*. It does not address inquiries regarding litigation, claims, and assessments, which are addressed in section 501, *Audit Evidence—Specific Considerations for Selected Items*. [Revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142.]

External Confirmation Procedures to Obtain Audit Evidence

.02 Section 500 indicates that the reliability of audit evidence depends on the nature and source of the audit evidence and the circumstances under which it is obtained.[1] Section 500 also includes the following generalizations applicable to audit evidence:[2]

- Audit evidence is more reliable when it is obtained from external parties.
- Audit evidence obtained directly by the auditor is more reliable than audit evidence obtained indirectly or by inference.
- Audit evidence is more reliable when it exists in documentary form, whether paper or electronic.

Accordingly, depending on the circumstances of the audit, audit evidence in the form of external confirmations received directly by the auditor from confirming parties may be more reliable than evidence generated internally by the entity. This section is intended to assist the auditor in designing and performing external confirmation procedures to obtain relevant and reliable audit evidence. [Revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142.]

[1]Paragraph .A22 of section 500, *Audit Evidence*. [Footnote revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142.]

[2]Paragraphs .A22–.A24 of section 500. [Footnote revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142.]

.03 Other AU-C sections recognize the importance of external confirmations as audit evidence; for example

- section 330 discusses the auditor's responsibility (*a*) to design and implement overall responses to address the assessed risks of material misstatement at the financial statement level and (*b*) to design and perform further audit procedures whose nature, timing, and extent are based on, and are responsive to, the assessed risks of material misstatement at the relevant assertion level.[3,4] The auditor is required to consider whether external confirmation procedures are to be performed as substantive audit procedures and is required to use external confirmation procedures for accounts receivable unless
  - — the overall account balance is immaterial,
  - — external confirmation procedures would be ineffective, or
  - — the auditor's assessed level of risk of material misstatement at the relevant assertion level is low, and the other planned substantive procedures address the assessed risk.[5]
- section 330 requires that the auditor obtain more persuasive audit evidence the higher the auditor's assessment of risk.[6] To do this, the auditor may increase the quantity of the evidence or obtain evidence that is more relevant or reliable, or both. For example, the auditor may place more emphasis on obtaining evidence directly from third parties or obtaining corroborating evidence from a number of independent sources. Section 330 also indicates that external confirmation procedures may assist the auditor in obtaining audit evidence with the high level of reliability that the auditor requires to respond to significant risks of material misstatement, whether due to fraud or error.[7]
- section 240, *Consideration of Fraud in a Financial Statement Audit*, indicates that the auditor may design confirmation requests to obtain additional corroborative information as a response to address the assessed risks of material misstatement due to fraud at the assertion level.[8]
- section 500 indicates that external confirmations need not be restricted to classes of transactions, account balances, or disclosures. For example, the auditor may request confirmation of the terms of agreements or transactions an entity has with third parties; the confirmation request may be designed to ask if any modifications have been made to the agreement and, if so, the relevant details. External confirmation procedures are also used to obtain audit evidence about the absence of certain

conditions (for example, the absence of a side agreement that may influence revenue recognition).[9]

[Revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142. As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Effective Date

.04 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objective

.05 The objective of the auditor, when using external confirmation procedures, is to design and perform such procedures to obtain relevant and reliable audit evidence.

Definitions

.06 For purposes of generally accepted auditing standards, the following terms have the meanings attributed as follows:

Exception. A response that indicates a difference between information requested to be confirmed, or contained in the entity's records, and information provided by the confirming party.

External confirmation. Audit evidence obtained as a direct written response to the auditor from a third party (the confirming party), either in paper form or by electronic or other medium (for example, through the auditor's direct access to information held by a third party). (Ref: par. .A1)

Negative confirmation request. A request that the confirming party respond directly to the auditor only if the confirming party disagrees with the information provided in the request.

Nonresponse. A failure of the confirming party to respond, or fully respond, to a positive confirmation request or a confirmation request returned undelivered.

Positive confirmation request. A request that the confirming party respond directly to the auditor by providing the requested information or indicating whether the confirming party agrees or disagrees with the information in the request.

---

[9]Paragraph .A15 of section 500. [Footnote revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142.]

Requirements

External Confirmation Procedures

.07 When using external confirmation procedures, the auditor should maintain control over external confirmation requests, including

a. determining the information to be confirmed or requested; (Ref: par. .A2)

b. selecting the appropriate confirming party; (Ref: par. .A3)

c. designing the confirmation requests, including determining that requests are properly directed to the appropriate confirming party and provide for being responded to directly to the auditor; and (Ref: par. .A4–.A7)

d. sending the requests, including follow-up requests, when applicable, to the confirming party. (Ref: par. .A8)

Management's Refusal to Allow the Auditor to Perform External Confirmation Procedures

.08 If management refuses to allow the auditor to perform external confirmation procedures, the auditor should

a. inquire about management's reasons for the refusal and seek audit evidence about their validity and reasonableness; (Ref: par. .A9)

b. evaluate the implications of management's refusal on the auditor's assessment of the relevant risks of material misstatement, including the risk of fraud, and on the nature, timing, and extent of other audit procedures; and (Ref: par. .A10)

c. perform alternative audit procedures designed to obtain relevant and reliable audit evidence. (Ref: par. .A11)

.09 If the auditor concludes that management's refusal to allow the auditor to perform external confirmation procedures is unreasonable or the auditor is unable to obtain relevant and reliable audit evidence from alternative audit procedures, the auditor should communicate with those charged with governance, in accordance with section 260, *The Auditor's Communication With Those Charged With Governance*.[10] The auditor also should determine the implications for the audit and the auditor's opinion, in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

[10]Paragraph .12 of section 260, *The Auditor's Communication With Those Charged With Governance*.

Results of the External Confirmation Procedures

Reliability of Responses to Confirmation Requests

.10 If the auditor identifies factors that give rise to doubts about the reliability of the response to a confirmation request, the auditor should obtain further audit evidence to resolve those doubts. (Ref: par. .A12–.A22)

.11 If the auditor determines that a response to a confirmation request is not reliable, the auditor should evaluate the implications on the assessment of the relevant risks of material misstatement, including the risk of fraud, and on the related nature, timing, and extent of other audit procedures. (Ref: par. .A23)

Nonresponses and Oral Responses

.12 In the case of each nonresponse, the auditor should perform alternative audit procedures to obtain relevant and reliable audit evidence. (Ref: par. .A24–.A27)

When a Written Response to a Positive Confirmation Request Is Necessary to Obtain Sufficient Appropriate Audit Evidence

.13 If the auditor has determined that a written response to a positive confirmation request is necessary to obtain sufficient appropriate audit evidence, alternative audit procedures will not provide the audit evidence the auditor requires. If the auditor does not obtain such confirmation, the auditor should determine the implications for the audit and the auditor's opinion, in accordance with section 705. (Ref: par. .A28–.A29)

Exceptions

.14 The auditor should investigate exceptions to determine whether they are indicative of misstatements. (Ref: par. .A30–.A31)

Negative Confirmations

.15 Negative confirmations provide less persuasive audit evidence than positive confirmations. Accordingly, the auditor should not use negative confirmation requests as the sole substantive audit procedure to address an assessed risk of material misstatement at the assertion level, unless all of the following are present:

a. The auditor has assessed the risk of material misstatement as low and has obtained sufficient appropriate audit evidence regarding the operating effectiveness of controls relevant to the assertion.

b. The population of items subject to negative confirmation procedures comprises a large number of small, homogeneous account balances, transactions, or conditions.

c. A very low exception rate is expected.

d. The auditor is not aware of circumstances or conditions that would cause recipients of negative confirmation requests to disregard such requests. (Ref: par. .A32)

Evaluating the Evidence Obtained

.16 The auditor should evaluate whether the results of the external confirmation procedures provide relevant and reliable audit evidence or whether further audit evidence is necessary. (Ref: par. .A33–.A34)

Application and Other Explanatory Material

Definitions

External Confirmation (Ref: par. .06)

.A1 The auditor's direct access to information held by a third party (the confirming party) may meet the definition of an *external confirmation* when, for example, the auditor is provided by the confirming party with the electronic access codes or information necessary to access a secure website where data that addresses the subject matter of the confirmation is held. The auditor's access to information held by the confirming party may also be facilitated by a third-party service provider. When access codes or information necessary to access the confirming party's data is provided to the auditor by management, evidence obtained by the auditor from access to such information does not meet the definition of an *external confirmation*.

External Confirmation Procedures

Determining the Information to Be Confirmed or Requested (Ref: par. .07a)

.A2 External confirmation procedures frequently are performed to confirm or request information regarding account balances, elements thereof, and disclosures. They also may be used to confirm the terms of agreements, contracts, or transactions between an entity and other parties or to confirm the absence of certain conditions, such as a "side agreement."

Selecting the Appropriate Confirming Party (Ref: par. .07b)

.A3 Responses to confirmation requests provide more relevant and reliable audit evidence when confirmation requests are sent to a confirming party who the auditor believes is knowledgeable about the information to be confirmed. For example, a financial institution official who is knowledgeable about the transactions or arrangements for which confirmation is requested may be the most appropriate person at the financial institution from whom to request confirmation.

Designing Confirmation Requests (Ref: par. .07c)

.A4 The design of a confirmation request may directly affect the confirmation response rate and the reliability and nature of the audit evidence obtained from responses.

.A5 Factors to consider when designing confirmation requests include the following:

- The assertions being addressed.
- Specific identified risks of material misstatement, including fraud risks.
- The layout and presentation of the confirmation request.
- Prior experience on the audit or similar engagements.
- The method of communication (for example, in paper form or by electronic or other medium).
- Management's authorization or encouragement to the confirming parties to respond to the auditor. Confirming parties may only be willing to respond to a confirmation request containing management's authorization.
- The ability of the intended confirming party to confirm or provide the requested information (for example, individual invoice amount versus total balance).

.A6 A positive external confirmation request asks the confirming party to reply to the auditor in all cases, either by indicating the confirming party's agreement with the given information or asking the confirming party to provide information. A response to a properly designed positive confirmation request ordinarily is expected to provide reliable audit evidence. A risk exists, however, that a confirming party may reply to the confirmation request without verifying that the information is correct. The auditor may reduce this risk by using positive confirmation requests that do not state the amount (or other information) on the confirmation request and that ask the confirming party to fill in the amount or furnish other information. On the other hand, use of this type of "blank" confirmation request may result in lower response rates because additional effort is required from the confirming parties to provide the requested information.

.A7 Determining that requests are properly addressed includes verifying the accuracy of the addresses, including testing the validity of some or all of the addresses on the confirmation requests before they are sent out, regardless of the confirmation method used. When a confirmation request is sent by e-mail, the auditor's determination that the request is being properly directed to the appropriate confirming party may include performing procedures to test the validity of some or all of the e-mail addresses supplied by management. The nature and extent of the necessary procedures is dependent on the risks associated with the particular type of confirmation or address. For example, a confirmation addressing a higher risk assertion or a confirmation address that appears to be potentially less reliable (for example, an electronic confirmation addressed in a manner that appears easier to falsify) may necessitate different or more extensive procedures to determine that the request is directed to the intended recipient. See further guidance in paragraphs .A14–.A15.

Follow-Up on Confirmation Requests (Ref: par. .07d)

.A8 The auditor may send an additional confirmation request when a reply to a previous request has not been received within a reasonable time. For example, the auditor may, having reverified the accuracy of the original address, send an additional or follow-up request.

Management's Refusal to Allow the Auditor to Perform External Confirmation Procedures

Reasonableness of Management's Refusal (Ref: par. .08a)

.A9 A refusal by management to allow the auditor to perform external confirmation procedures is a limitation on the audit evidence the auditor seeks to obtain; therefore, the auditor is required to inquire about the reasons for the limitation. A common reason offered by management is the existence of a legal dispute or ongoing negotiation with the intended confirming party, the resolution of which may be affected by an untimely confirmation request. The auditor is required to seek audit evidence about the validity and reasonableness of the reasons for management's refusal because of the risk that management may be attempting to deny the auditor access to audit evidence that may reveal fraud or error.

Implications for the Assessment of Risks of Material Misstatement (Ref: par. .08b)

.A10 The auditor may conclude from the evaluation in paragraph .08*b* that it would be appropriate to revise the assessment of the risks of material misstatement at the assertion level and modify planned audit procedures, in accordance with section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.[11] For example, if management's request to not confirm is unreasonable, this may indicate a fraud risk factor that requires evaluation, in accordance with section 240.[12]

Alternative Audit Procedures (Ref: par. .08c)

.A11 The alternative audit procedures performed may be similar to those appropriate for a nonresponse, as set out in paragraphs .A24–.A27. Such procedures also would take into account the results of the auditor's evaluation in paragraph .08*b*.

Results of the External Confirmation Procedures

Reliability of Responses to Confirmation Requests (Ref: par. .10)

.A12 Section 500 indicates that consideration of the sources of information to be used as audit evidence includes the possibility that the information source may not be reliable.[13] All responses carry some risk of interception, alteration, or fraud. Such risk exists regardless of whether a response is obtained in paper form or by electronic or other medium. Factors that may indicate doubts about the reliability of a response include whether it

[11] Paragraph .32 of section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

[12] Paragraph .24 of section 240.

[13] Paragraph .A22 of section 500. [Footnote revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142.]

- was received by the auditor indirectly or
- appeared not to come from the originally intended confirming party.

[Revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142.]

.A13 The auditor's consideration of the reliability of the information obtained through the confirmation process to be used as audit evidence includes consideration of the risks that

a. the information obtained may not be from an authentic source,

b. a respondent may not be knowledgeable about the information to be confirmed, and

c. the integrity of the information may have been compromised.

When an electronic confirmation process or system is used, the auditor's consideration of the risks described in *a–c* includes the consideration of risks that the electronic confirmation process is not secure or is improperly controlled.

.A14 Responses received electronically (for example, by fax or e-mail) involve risks relating to reliability because proof of origin or identity of the confirming party may be difficult to establish, and alterations may be difficult to detect. The auditor may determine that it is appropriate to address such risks by utilizing a system or process that validates the respondent or by directly contacting the purported sender (for example, by telephone) to validate the identity of the sender of the response and to validate that the information received by the auditor corresponds to what was transmitted by the sender.

.A15 An electronic confirmation system or process that creates a secure confirmation environment may mitigate the risks of interception or alteration. Creating a secure confirmation environment depends on the process or mechanism used by the auditor and the respondent to minimize the possibility that the results will be compromised because of interception or alteration of the confirmation. If the auditor is satisfied that such a system or process is secure and properly controlled, evidence provided by responses received using the system or process may be considered reliable. Various means might be used to validate the source of the electronic information. For example, the use of encryption, electronic digital signatures, and procedures to verify website authenticity may improve the security of the electronic confirmation system or process. If a system or process that facilitates electronic confirmation between the auditor and the respondent is in place and the auditor plans to rely on the controls over such a system or process, an assurance trust services report (for example, Systrust) or another assurance report on that system or process may assist the auditor in assessing the design and operating effectiveness of the electronic and manual controls with respect to that system or process. Such an assurance report may address the risks described in paragraph .A13. If these risks are not adequately addressed in such a report, the auditor may perform additional procedures to address those risks.

.A16 The auditor is required by section 500 to determine whether to modify or add procedures to resolve doubts over the reliability of information to be used as audit evidence.[14] The auditor may choose to verify the source and contents of a response to a confirmation request by contacting the confirming party (for example, as described in paragraph .A14). When a response has been returned to the auditor indirectly (for example, because the confirming party incorrectly addressed it to the entity rather than the auditor), the auditor may request the confirming party to respond in writing directly to the auditor. [Revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142.]

Disclaimers and Other Restrictions in Confirmation Responses

.A17 A response to a confirmation request may contain restrictive language regarding its use. Such restrictions do not necessarily invalidate the reliability of the response as audit evidence. Whether the auditor may rely on the information confirmed and the degree of such reliance will depend on the nature and substance of the restrictive language.

.A18 Restrictions that appear to be boilerplate disclaimers of liability may not affect the reliability of the information being confirmed. Examples of such disclaimers may include the following:

- Information is furnished as a matter of courtesy without a duty to do so and without responsibility, liability, or warranty, express or implied.
- The reply is given solely for the purpose of the audit without any responsibility on the part of the respondent, its employees, or its agents, and it does not relieve the auditor from any other inquiry or the performance of any other duty.

.A19 Other restrictive language also may not affect the reliability of a response if it does not relate to the assertion being tested. For example, in a confirmation of investments, a disclaimer regarding the valuation of the investments may not affect the reliability of the response if the auditor's objective in using the confirmation request is to obtain audit evidence regarding whether the investments exist.

.A20 Certain restrictive language may, however, cast doubt about the completeness or accuracy of the information contained in the response or on the auditor's ability to rely on such information. Examples of such restrictions may include the following:

- Information is obtained from electronic data sources, which may not contain all information in the respondent's possession.
- Information is not guaranteed to be accurate nor current and may be a matter of opinion.
- The recipient may not rely upon the information in the confirmation.

.A21 When the auditor has doubts about the reliability of the response as a result of restrictive language, then, in accordance with paragraph .10, the auditor is required to obtain further audit evidence to resolve those doubts. When the practical effect of the

[14] Paragraph .10 of section 500. [Footnote revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142.]

restrictive language is difficult to ascertain in the particular circumstances, the auditor may consider it appropriate to seek clarification from the respondent or seek legal advice.

.A22 If the auditor is unable to resolve the doubts about the reliability of a response as a result of restrictive language, then, in accordance with paragraph .11, the auditor is required to evaluate the implications on the assessment of the relevant risks of misstatement, including the risk of fraud, and on the related nature, timing, and extent of other audit procedures. The nature, timing, and extent of such procedures will depend on factors such as the nature of the financial statement item, the assertion being tested, the nature and substance of the restrictive language, and relevant information obtained through other audit procedures.

Unreliable Responses (Ref: par. .11)

.A23 When the auditor concludes that a response is unreliable, the auditor may need to revise the assessment of the risks of material misstatement at the assertion level and modify planned audit procedures accordingly, in accordance with section 315A.[15] For example, an unreliable response may indicate a fraud risk factor that requires evaluation, in accordance with section 240.[16]

Nonresponses and Oral Responses (Ref: par. .12)

.A24 The nature and extent of alternative procedures are affected by the account and assertion in question. Examples of alternative audit procedures the auditor may perform include the following:

- For accounts receivable balances, examining specific subsequent cash receipts (including matching such receipts with the actual items being paid), shipping documentation, or other client documentation providing evidence for the existence assertion
- For accounts payable balances, examining subsequent cash disbursements or correspondence from third parties and other records, such as receiving reports and statements that the client receives from vendors providing evidence for the completeness assertion

.A25 A nonresponse to a confirmation request may indicate a previously unidentified risk of material misstatement. In such situations, the auditor may need to revise the assessed risk of material misstatement at the assertion level and modify planned audit procedures, in accordance with section 315A.[17] For example, a fewer or greater number of responses to confirmation requests than anticipated may indicate a previously unidentified fraud risk factor that requires evaluation, in accordance with section 240.[18]

---

[15] Paragraph .32 of section 315A.

[16] Paragraph .24 of section 240.

[17] Paragraph .32 of section 315A.

[18] Paragraph .24 of section 240.

.A26 The auditor may determine that it is not necessary to perform additional alternative audit procedures beyond the evaluation of the confirmation results if such evaluation indicates that relevant and reliable audit evidence has already been obtained. This may be the case when testing for overstatement of amounts and (*a*) the nonresponses in the aggregate, projected as 100 percent misstatements to the population and added to the sum of all other unadjusted differences, would not affect the auditor's decision about whether the financial statements are materially misstated and (*b*) the auditor has not identified unusual qualitative factors or systematic characteristics related to the nonresponses, such as that all nonresponses pertain to year-end transactions.

.A27 An oral response to a confirmation request does not meet the definition of an *external confirmation* because it is not a direct written response to the auditor. Provided that the auditor has not concluded that a direct written response to a positive confirmation is necessary to obtain sufficient appropriate audit evidence, the auditor may take the receipt of an oral response to a confirmation request into consideration when determining the nature and extent of alternative audit procedures required to be performed for nonresponses, in accordance with paragraph .12. The auditor may perform additional procedures to address the reliability of the evidence provided by the oral response, such as initiating a call to the respondent using a telephone number that the auditor has independently verified as being associated with the entity. For example, the auditor might call the main telephone number obtained from a reliable source and ask to be directed to the named respondent instead of calling a direct extension provided by the client or included in the statement or other correspondence received by the entity. The auditor may determine that the additional evidence provided by contacting the respondent directly, together with the evidence upon which the original confirmation request is based (for example, a statement or other correspondence received by the entity), is sufficient appropriate audit evidence. In appropriately documenting the oral response, the auditor may include specific details, such as the identity of the person from whom the response was received, his or her position, and the date and time of the conversation.

When a Written Response to a Positive Confirmation Request Is Necessary to Obtain Sufficient Appropriate Audit Evidence (Ref: par. .13)

.A28 In certain circumstances, the auditor may identify an assessed risk of material misstatement at the assertion level for which a response to a positive confirmation request is necessary to obtain sufficient appropriate audit evidence. Such circumstances may include the following:

- The information available to corroborate management's assertion(s) is only available outside the entity.
- Specific fraud risk factors, such as the risk of management override of controls or the risk of collusion, which can involve employee(s) or management, or both, prevent the auditor from relying on evidence from the entity.

.A29 When the auditor has determined that a written response is necessary to obtain sufficient appropriate audit evidence and the auditor has obtained only an oral response to a confirmation request, the auditor may request the confirming party to respond in writing directly to the auditor. If no such response is received, in accordance with paragraph .13, alternative audit procedures will not provide the audit evidence the auditor requires, and the auditor is required to determine the implications for the audit and the auditor's opinion, in accordance with section 705.

Exceptions (Ref: par. .14)

.A30 Exceptions noted in responses to confirmation requests may indicate misstatements or potential misstatements in the financial statements. When a misstatement is identified, the auditor is required by section 240 to evaluate whether such misstatement is indicative of fraud.[19] Exceptions may provide a guide to the quality of responses from similar confirming parties or for similar accounts. Exceptions also may indicate a deficiency, or deficiencies, in the entity's internal control over financial reporting.

.A31 Some exceptions do not represent misstatements. For example, the auditor may conclude that differences in responses to confirmation requests are due to timing, measurement, or clerical errors in the external confirmation procedures.

Negative Confirmations (Ref: par. .15)

.A32 The failure to receive a response to a negative confirmation request does not indicate receipt by the intended confirming party of the confirmation request or verification of the accuracy of the information contained in the request. Accordingly, a failure of a confirming party to respond to a negative confirmation request provides significantly less persuasive audit evidence than does a response to a positive confirmation request. Confirming parties also may be more likely to respond indicating their disagreement with a confirmation request when the information in the request is not in their favor but less likely to respond otherwise. For example, holders of bank deposit accounts may be more likely to respond if they believe that the balance in their account is understated in the confirmation request but less likely to respond when they believe the balance is overstated. Therefore, sending negative confirmation requests to holders of bank deposit accounts may be a useful procedure in considering whether such balances may be understated but is unlikely to be effective if the auditor is seeking evidence regarding overstatement.

Evaluating the Evidence Obtained (Ref: par. .16)

.A33 When evaluating the results of individual external confirmation requests, the auditor may categorize such results as follows:

a. A response by the appropriate confirming party indicating agreement with the information provided in the confirmation request or providing requested information without exception

b. A response deemed unreliable

c. A nonresponse

[19]Paragraph .35 of section 240.

d. A response indicating an exception

.A34 The auditor's evaluation, when taken into account with other audit procedures the auditor may have performed, may assist the auditor in concluding whether sufficient appropriate audit evidence has been obtained or whether further audit evidence is necessary, as required by section 330.[20]

AU-C Section 510

Opening Balances — Initial Audit Engagements, Including Reaudit Engagements

Source: SAS No. 122; SAS No. 134; SAS No. 135; SAS No. 136; SAS No. 138.

Effective for audits of financial statements for periods ending on or after December 15, 2012, unless otherwise indicated.

Note

In March 2023, the Accounting Standards Board issued Statement on Auditing Standards No. 149, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors and Audits of Referred-to Auditors)*, which contains amendments to this section.

The amendments are effective for audits of financial statements for periods ending on or after December 15, 2026, and can be viewed in appendix C of section 600 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibilities relating to opening balances in an initial audit engagement, including a reaudit engagement. In addition to financial statement amounts, opening balances include matters requiring disclosure that existed at the beginning of the period, such as contingencies and commitments. When comparative financial statements are presented, the relevant requirements and guidance for comparative financial statements in section 700, *Forming an Opinion and Reporting on Financial Statements*, or section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*, also apply. Section 300, *Planning an Audit*, includes additional requirements and guidance regarding activities prior to starting an initial audit. Section 708, *Consistency of Financial Statements*, also applies with respect to the auditor's evaluation of the consistency of accounting principles between the periods presented and covered by the auditor's opinion. Section A, *Terms of Engagement*, includes requirements and guidance with respect to communications with a predecessor auditor before accepting an initial audit engagement, including a reaudit engagement. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

.02 This section, with respect to predecessor auditors, does not apply if the most recent audited financial statements are more than one year prior to the beginning of the earliest period to be audited.

Effective Date

.03 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objective

.04 The objective of the auditor, in conducting an initial audit engagement, including a reaudit engagement, is to obtain sufficient appropriate audit evidence regarding opening balances about whether (Ref: par. .A1)

a. opening balances contain misstatements that materially affect the current period's financial statements and

b. appropriate accounting policies reflected in the opening balances have been consistently applied in the current period's financial statements or changes thereto are appropriately accounted for and adequately presented and disclosed in accordance with the applicable financial reporting framework.

Definitions

.05 For the purposes of generally accepted auditing standards, the following terms have the meanings attributed as follows:

Initial audit engagement. An engagement in which either (*a*) the financial statements for the prior period were not audited, or (*b*) the financial statements for the prior period were audited by a predecessor auditor.

Opening balances. Those account balances that exist at the beginning of the period. Opening balances are based upon the closing balances of the prior period and reflect the effects of transactions and events of prior periods and accounting policies applied in the prior period. Opening balances also include matters requiring disclosure that existed at the beginning of the period, such as contingencies and commitments.

Predecessor auditor. The auditor from a different audit firm who has reported on the most recent audited financial statements or was engaged to perform but did not complete an audit of the financial statements. (Ref: par. .A2)

Reaudit. An initial audit engagement to audit financial statements that have been previously audited by a predecessor auditor.

Requirements

Audit Procedures

.06 The auditor should read the most recent financial statements, if any, and the predecessor auditor's report thereon, if any, for information relevant to opening balances, including disclosures, and consistency in the application of accounting policies.

.07 In instances in which the prior period financial statements were audited by a predecessor auditor, the auditor should request management to authorize the predecessor auditor to allow a review of the predecessor auditor's audit documentation and for the predecessor auditor to respond fully to inquiries by the auditor, thereby providing the auditor with information to assist in planning and performing the engagement. (Ref: par. .A3–.A11)

Opening Balances

.08 The auditor should obtain sufficient appropriate audit evidence about whether the opening balances contain misstatements that materially affect the current period's financial statements by

a. determining whether the prior period's closing balances have been correctly brought forward to the current period or, when appropriate, have been restated;

b. determining whether the opening balances reflect the application of appropriate accounting policies; and

c. evaluating whether audit procedures performed in the current period provide evidence relevant to the opening balances and performing one or both of the following: (Ref: par. .A7–.A9 and .A12–.A14)

   i. When the prior year financial statements were audited, reviewing the predecessor auditor's audit documentation to obtain evidence regarding the opening balances

   ii. Performing specific audit procedures to obtain evidence regarding the opening balances

.09 If the auditor obtains audit evidence that the opening balances contain misstatements that could materially affect the current period's financial statements, the auditor should perform such additional audit procedures as are appropriate in the circumstances to determine the effect on the current period's financial statements. If the auditor concludes that such misstatements exist in the current period's financial statements, the auditor should communicate the misstatements to the appropriate level of management and those charged with governance, in accordance with section 260, *The Auditor's Communication With Those Charged With Governance*. If the prior period financial statements were audited by a predecessor auditor, the auditor should also refer to paragraphs .12–.13.

Consistency of Accounting Policies

.10 The auditor should obtain sufficient appropriate audit evidence about whether the accounting policies reflected in the opening balances have been consistently applied in the current period's financial statements and whether changes in the accounting policies have been appropriately accounted for and adequately presented and disclosed in accordance with the applicable financial reporting framework.

Relevant Information in the Predecessor Auditor's Report

.11 If the prior period's financial statements were audited by a predecessor auditor, and a modification was made to the opinion, the auditor should evaluate the effect of the matter giving rise to the modification in assessing the risks of material misstatement in the current period's financial statements, in accordance with section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

Discovery of Possible Material Misstatements in Financial Statements Reported on by a Predecessor Auditor

.12 If the auditor becomes aware of information during the audit that leads the auditor to believe that financial statements reported on by the predecessor auditor may require revision, the auditor should request management to inform the predecessor auditor of the situation and arrange for the three parties to discuss this information and attempt to resolve the matter. The auditor should communicate to the predecessor auditor information that the auditor believes the predecessor auditor may need to consider, in accordance with section 560, *Subsequent Events and Subsequently Discovered Facts*, which addresses the auditor's responsibilities when facts become known to the auditor after the date of the auditor's report that, had they been known to the auditor at that date, may have caused the auditor to amend the auditor's report. (Ref: par. .A15)

.13 If management refuses to inform the predecessor auditor that the prior period financial statements may need revision or if the auditor is not satisfied with the resolution of the matter, the auditor should evaluate (*a*) the implications on the current engagement and (*b*) whether to withdraw from the engagement or, when withdrawal is not possible under applicable law or regulation, disclaim an opinion on the financial statements. (Ref: par. .A16)

Audit Conclusions and Reporting

.14 The auditor should not make reference to the report or work of the predecessor auditor as the basis, in part, for the auditor's own opinion.

Opening Balances

.15 If the auditor is unable to obtain sufficient appropriate audit evidence regarding the opening balances, the auditor should express a qualified opinion or disclaim an opinion on the financial statements, as appropriate, in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*. (Ref: par. .A17)

.16 If the auditor concludes that the opening balances contain a misstatement that materially affects the current period's financial statements, and the effect of the misstatement is not appropriately accounted for or adequately presented or disclosed, the auditor should express a qualified opinion or an adverse opinion, as appropriate, in accordance with section 705.

Consistency of Accounting Policies

.17 If the auditor concludes that

a. the current period's accounting policies are not consistently applied regarding opening balances, in accordance with the applicable financial reporting framework, or

b. a change in accounting policies is not appropriately accounted for or adequately presented or disclosed, in accordance with the applicable financial reporting framework,

the auditor should express a qualified opinion or an adverse opinion, as appropriate, in accordance with section 705.

Modification to the Opinion in the Predecessor Auditor's Report

.18 If the predecessor auditor's opinion regarding the prior period's financial statements included a modification to the auditor's opinion that remains relevant and material to the current period's financial statements, the auditor should modify the auditor's opinion on the current period's financial statements, in accordance with section 705. (Ref: par. .A18)

Application and Other Explanatory Material

Objective (Ref: par. .04)

.A1 Audit evidence regarding opening balances and the consistency of accounting principles may include the most recent audited financial statements, the predecessor auditor's report thereon, the results of inquiry of the predecessor auditor, the results of the auditor's review of the predecessor auditor's audit documentation relating to the most recently completed audit, and audit procedures performed on the current period's transactions that may provide evidence about the opening balances or consistency.

Definitions

Predecessor Auditor (Ref: par. .05)

.A2 Two predecessor auditors may exist: the auditor who reported on the most recent audited financial statements and the auditor who was engaged to perform, but did not complete, an audit of any subsequent financial statements.

Audit Procedures (Ref: par. .07)

.A3 The auditor may initiate communications with management to authorize review of the predecessor auditor's audit documentation and for the predecessor auditor to respond fully to inquiries by the auditor, either before or after accepting the engagement. Relevant ethical and professional requirements guide the auditor's communications with the predecessor auditor.

.A4 The predecessor auditor may request a consent and acknowledgment letter from the entity to document this authorization in an effort to reduce misunderstandings about the scope of the communications being authorized. Exhibit B, "Illustrative Entity Consent and Acknowledgment Letter," contains an illustrative entity consent and acknowledgment letter.

.A5 It is customary for the predecessor auditor to make himself or herself available to the auditor and to make available for review certain audit documentation. The predecessor auditor determines which audit documentation is to be made available for review and which may be copied. The predecessor auditor ordinarily permits the auditor to review audit documentation, including documentation of planning; risk assessment procedures; further audit procedures; audit results; and other matters of continuing accounting and auditing significance, such as the schedule of uncorrected misstatements, working paper analysis of balance sheet accounts, and those relating to contingencies, related parties, and significant unusual transactions. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 135.]

.A6 Before permitting access to the audit documentation, the predecessor auditor may request written confirmation of the auditor's agreement regarding the use of the audit documentation. Exhibit C, "Illustrative Successor Auditor Acknowledgment Letter," contains an illustrative successor auditor acknowledgment letter.

.A7 The extent, if any, to which a predecessor auditor permits access to the audit documentation or responds to inquiries from the auditor is a matter of the predecessor auditor's professional judgment. The predecessor auditor's denial or limitation of access may affect the auditor's assessment of risk regarding the opening balances or the nature, timing, and extent of the auditor's procedures with respect to the opening balances and consistency of accounting principles. (Ref: par. .07 and .08*c*)

.A8 If the predecessor auditor permits access to the audit documentation, the auditor may review the predecessor auditor's audit documentation for information relevant to planning and performing the audit. The auditor's determination whether to use information resulting from such review as part of the auditor's risk assessment procedures or as evidence regarding the opening balances is influenced by the auditor's assessment of the professional competence and independence of the predecessor auditor. Although the predecessor auditor is not a component auditor, as defined in section 600A, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*, the auditor may make inquiries similar to those listed in section 600A concerning the professional competence and independence of the predecessor auditor.[1] (Ref: par. .07 and .08*c*)

.A9 The auditor's review of the predecessor auditor's audit documentation may provide audit evidence about the opening balances and consistency of accounting principles.

However, the nature, timing, and extent of audit work performed and the conclusions reached are solely the responsibility of the auditor, as required by section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*. (Ref: par. .07 and .08*c*)

Considerations Specific to Governmental Entities (Ref: par. .07)

.A10 In audits of governmental entities, law or regulation may limit the information that the auditor can obtain from a predecessor auditor. Certain information may be identified as classified or otherwise prohibited from disclosure by federal, state, or local laws or public safety or security concerns. For example, if a governmental entity that has previously been audited by a government audit organization (for example, the U.S. Government Accountability Office, a federal inspector general, an elected or statutorily appointed state auditor general, or other suitably qualified audit organization) engages a public accounting firm, the amount of access to audit documentation or other information that the government audit organization can provide an incoming auditor may be constrained by privacy or confidentiality laws or regulations. In situations when communications with a predecessor auditor are restricted, audit evidence may need to be obtained through other means and, if sufficient appropriate audit evidence cannot be obtained, consideration given to the effect on the auditor's opinion, in accordance with the requirement in paragraph .15.

.A11 If a government audit organization engages a public accounting firm in an agency capacity to perform an audit of a governmental entity and such firm did not audit the financial statements of the governmental entity in the prior period, this is usually regarded as a change in auditors; therefore, this section applies.

Opening Balances (Ref: par. .08c)

.A12 The nature and extent of audit procedures necessary to obtain sufficient appropriate audit evidence regarding opening balances depend on such matters as the following:

- The accounting policies followed by the entity
- The nature of the account balances, classes of transactions and disclosures, and the risks of material misstatement in the current period's financial statements
- The significance of the opening balances relative to the current period's financial statements
- Whether the prior period's financial statements were audited and, if so, whether the predecessor auditor's opinion was modified

.A13 For current assets and liabilities, some audit evidence about opening balances may be obtained as part of the current period's audit procedures. For example, the collection (payment) of opening accounts receivable (accounts payable) during the current period will provide some audit evidence of their existence, rights and obligations, completeness, and

[1]Paragraph .22 of section 600A, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*.

valuation at the beginning of the period. In the case of inventories, however, the current period's audit procedures on the closing inventory balance provide little audit evidence regarding inventory on hand at the beginning of the period. Therefore, additional audit procedures, such as one or more of the following, may be necessary to obtain sufficient appropriate audit evidence:

- Observing a current physical inventory count and reconciling it to the opening inventory quantities
- Performing audit procedures on the valuation of the opening inventory items
- Performing audit procedures on gross profit and cutoff

.A14 For noncurrent assets and liabilities, such as property, plant, and equipment; investments; and long-term debt, some audit evidence may be obtained by examining the accounting records and other information underlying the opening balances. In certain cases, the auditor may be able to obtain some audit evidence regarding opening balances through confirmation with third parties (for example, for long-term debt and investments). In other cases, the auditor may need to carry out additional audit procedures.

Discovery of Possible Material Misstatements in Financial Statements Reported on by a Predecessor Auditor

.A15 Section 560 provides reporting guidance to the predecessor auditor who is requested to reissue a previously issued report on financial statements of a prior period when those financial statements are to be presented on a comparative basis with audited financial statements of a subsequent period.[2]Section 700 and section 703, as applicable, provides reporting guidance to the auditor reporting on comparative financial statements when the predecessor auditor is unable or unwilling to reissue the auditor's report on prior period financial statements that have been restated.[3] (Ref: par. .12) [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

.A16 If management refuses to inform the predecessor auditor that the prior period financial statements may need revision, or if the auditor is not satisfied with the resolution of the matter, the auditor may seek legal advice in determining an appropriate course of action, including evaluating whether to withdraw from the engagement when withdrawal is possible under applicable law or regulation. (Ref: par. .13)

---

[2]Paragraphs .19–.20 of section 560, *Subsequent Events and Subsequently Discovered Facts*.

[3]Paragraph .A75 of section 700, *Forming an Opinion and Reporting on Financial Statements*, and paragraph .A129 of section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 136.]

Audit Conclusions and Reporting

Opening Balances (Ref: par. .15)

.A17 Section 705 addresses circumstances that may result in a modification to the auditor's opinion on the financial statements, the type of opinion appropriate in the circumstances, and the content of the auditor's report when the auditor's opinion is modified. The inability of the auditor to obtain sufficient appropriate audit evidence regarding opening balances may result in one of the following modifications to the opinion in the auditor's report:

a. A qualified opinion or a disclaimer of opinion, as is appropriate in the circumstances.

b. An opinion that is qualified or disclaimed, as appropriate, regarding the results of operations and cash flows, when relevant, and unmodified regarding financial position. Exhibit A, "Illustration of Report With Disclaimer of Opinion on Results of Operations and Cash Flows and Unmodified Opinion on Financial Position," includes such an illustrative report.

.A18 If the auditor encountered significant difficulty in obtaining sufficient appropriate audit evidence about whether the opening balances contain misstatements that materially affect the current period's financial statements, the auditor may determine this to be a key audit matter in accordance with section 701, *Communicating Key Audit Matters in the Independent Auditor's Report*. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Modification to the Opinion in the Predecessor Auditor's Report (Ref: par. .18)

.A19 In some situations, a modification to the predecessor auditor's opinion may not be relevant and material to the opinion on the current period's financial statements. This may be the case when, for example, there was a scope limitation in the prior period but the matter giving rise to the scope limitation has been resolved in the current period. [Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Exhibit A — Illustration of Report With Disclaimer of Opinion on Results of Operations and Cash Flows and Unmodified Opinion on Financial Position

.A20 Circumstances include the following:

- Audit of a complete set of general purpose financial statements. The audit is not a group audit.
- Management is responsible for the preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America, as promulgated by the Financial Accounting Standards Board.
- The terms of the audit engagement reflect the description of management's responsibility for the financial statements in section A, *Terms of Engagement*.
- The auditor did not observe the counting of the physical inventory at the beginning of the current period and was unable to obtain sufficient appropriate audit evidence regarding the opening balances of inventory.
- The possible effects of the inability to obtain sufficient appropriate audit evidence regarding opening balances of inventory are deemed to be material and pervasive to the entity's results of operations and cash flows.[1]
- The financial position at year-end is fairly presented.
- A disclaimer of opinion regarding the results of operations and cash flows and an unmodified opinion regarding financial position is considered appropriate in the circumstances.
- Based on the audit evidence obtained, the auditor has concluded that there are no conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in accordance with section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.
- The auditor has not been engaged to communicate key audit matters.

[1] If the possible effects, in the auditor's professional judgment, are considered to be material but not pervasive to the entity's results of operations and cash flows, the auditor would express a qualified opinion on the results of operations and cash flows.

Independent Auditor's Report

[*Appropriate Addressee*]

Report on the Audit of the Financial Statements[2]

Opinions

We have audited the balance sheet of ABC Company as of December 31, 20X1, and were engaged to audit the related statements of income, changes in stockholders' equity, and cash flows for the year then ended, and the related notes to the financial statements.

Disclaimer of Opinion on the Results of Operations and Cash Flows

We do not express an opinion on the results of operations and cash flows of ABC Company for the year ended December 31, 20X1. Because of the significance of the matter described in the Basis for Disclaimer of Opinion on the Results of Operations and Cash Flows section of our report, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on the results of operations and cash flows for the year ended December 31, 20X1.

Opinion on the Financial Position

In our opinion, the balance sheet presents fairly, in all material respects, the financial position of ABC Company as of December 31, 20X1, in accordance with accounting principles generally accepted in the United States of America.

Basis for Disclaimer of Opinion on the Results of Operations and Cash Flows

We were not engaged as auditors of the Company until after December 31, 20X0, and, therefore, did not observe the counting of physical inventories at the beginning of the year. We were unable to satisfy ourselves by performing other auditing procedures concerning the inventory held at December 31, 20X0. Since opening inventories enter into the determination of net income and cash flows, we were unable to determine whether any adjustments might have been necessary in respect of the profit for the year reported in the income statement and the net cash flows from operating activities reported in the cash flow statement.

Basis for Opinion on the Financial Position

We conducted our audit of the balance sheet in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit.

[2]The subtitle "Report on the Audit of Financial Statements" is unnecessary in circumstances when the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our unmodified opinion on the financial position.

Responsibility of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for [*insert the time period set by the applicable financial reporting framework*].

Auditor's Responsibilities for the Audit of the Financial Statements

Our responsibility is to conduct an audit of the Company's financial statements in accordance with auditing standards generally accepted in the United States of America. However, because of the matters described in the Basis for Opinions section of our report, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on the results of operations and cash flows.

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards (GAAS) will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose

of expressing an opinion on the effectiveness of ABC Company's internal control.[3] Accordingly, no such opinion is expressed.

- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABC Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Report on Other Legal and Regulatory Requirements

[*The form and content of this section of the auditor's report would vary depending on the nature of the auditor's other reporting responsibilities.*]

[*Signature of the auditor's firm*]

[*City and state where the auditor's report is issued*]

[*Date of the auditor's report*]

[Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134. As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 138.]

[3] In circumstances in which the auditor also has a responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, the auditor should omit the following: "but not for the purpose of expressing an opinion on the effectiveness of ABC Company's internal control. Accordingly, no such opinion is expressed." [As amended, effective for audits of financial statements for periods ending on or after December 15, 2021, by SAS No. 134.]

Exhibit B — Illustrative Entity Consent and Acknowledgment Letter (Ref: par. .07 and .A4)

.A21 Paragraph .07 requires that the auditor request management to authorize the predecessor auditor to allow a review of the predecessor auditor's audit documentation and for the predecessor auditor to respond fully to inquiries by the auditor, thereby providing the auditor with information to assist in planning and performing the engagement. Paragraph .A4 states that the predecessor auditor may request a consent and acknowledgment letter from the entity to document this authorization in an effort to reduce misunderstandings about the scope of the communications being authorized. The following letter is presented for illustrative purposes only and is not required by professional standards.

[*Date*]

ABC Enterprises

[*Address*]

You have given your consent to allow [*name of successor CPA firm*], as independent auditors for ABC Enterprises (ABC), access to our audit documentation for our audit of the December 31, 20X1, financial statements of ABC. You also have given your consent to us to respond fully to [*name of successor CPA firm*] inquiries. You understand and agree that the review of our audit documentation is undertaken solely for the purpose of obtaining an understanding about ABC and certain information about our audit to assist [*name of successor CPA firm*] in planning and performing the audit of the December 31, 20X2, financial statements of ABC.

Please confirm your agreement with the foregoing by signing and dating a copy of this letter and returning it to us.

Attached is the form of the letter we will furnish [*name of successor CPA firm*] regarding the use of the audit documentation.

Very truly yours,

[*Predecessor Auditor*]

[Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

Exhibit C — Illustrative Successor Auditor Acknowledgment Letter (Ref: par. .A6)

.A22 Paragraph .A6 states that the predecessor auditor may request that the auditor confirm in writing his or her agreement regarding the use of the predecessor auditor's audit documentation before permitting access to it. The following letter is presented for illustrative purposes only and is not required by professional standards.

[*Date*]

[*Successor Auditor*]

[*Address*]

We have previously audited, in accordance with auditing standards generally accepted in the United States of America, the December 31, 20X1, financial statements of ABC Enterprises (ABC). We rendered a report on those financial statements and have not performed any audit procedures subsequent to the audit report date. In connection with your audit of ABC's 20X2 financial statements, you have requested access to our audit documentation prepared in connection with that audit. ABC has authorized our firm to allow you to review that audit documentation.

Our audit, and the audit documentation prepared in connection therewith, of ABC's financial statements were not planned or conducted in contemplation of your review. Therefore, items of possible interest to you may not have been specifically addressed. Our use of professional judgment and the assessment of audit risk and materiality for the purpose of our audit mean that matters may have existed that would have been assessed differently by you. We make no representation about the sufficiency or appropriateness of the information in our audit documentation for your purposes.

We understand that the purpose of your review is to obtain information about ABC and our 20X1 audit results to assist you in planning and performing your 20X2 audit of ABC. For that purpose only, we will provide you access to our audit documentation that relates to that objective.

Upon request, we will provide copies of audit documentation that provides factual information about ABC. You agree to subject any such copies or information otherwise derived from our audit documentation to your normal policy for retention of audit documentation and protection of confidential entity information. Furthermore, in the event of a third-party request for access to your audit documentation prepared in connection with your audits of ABC, you agree to obtain our permission before voluntarily allowing any such access to our audit documentation or information otherwise derived from our audit documentation, and to obtain on our behalf any releases that you obtain from such third party. You agree to advise us promptly and provide us a copy of any subpoena, summons, or other court order for access to your audit documentation that include copies of our audit documentation or information otherwise derived therefrom.

Please confirm your agreement with the foregoing by signing and dating a copy of this letter and returning it to us.

Very truly yours,

[*Predecessor Auditor*]

Date: __________________

Even with management's consent, access to the predecessor auditor's audit documentation may still be limited. Experience has shown that the predecessor auditor may be willing to grant broader access if given additional assurance concerning the use of the audit documentation. Accordingly, the auditor might consider agreeing to the following additional limitations on the review of the predecessor auditor's audit documentation in order to obtain broader access:

- The auditor will not comment, orally or in writing, to anyone as a result of the review about whether the predecessor auditor's engagement was performed in accordance with generally accepted auditing standards.
- The auditor will not provide expert testimony or litigation support services or otherwise accept an engagement to comment on issues relating to the quality of the predecessor auditor's audit.
- The auditor accepts sole responsibility for the nature, timing, and extent of audit work performed and the conclusions reached in expressing an opinion on the 20X2 financial statements of ABC.

The following paragraph illustrates the previous text:

Because your review of our audit documentation is undertaken solely for the purpose described previously and may not entail a review of all our audit documentation, you agree that (1) the information obtained from the review will not be used by you for any other purpose, (2) you will not comment, orally or in writing, to anyone as a result of that review about whether our audit was performed in accordance with generally accepted auditing standards, (3) you will not provide expert testimony or litigation support services or otherwise accept an engagement to comment on issues relating to the quality of our audit, and (4) you accept sole responsibility for the nature, timing and extent of audit work performed and the conclusions reached in expressing your opinion on the 20X2 financial statements of ABC.

[Paragraph renumbered by the issuance of SAS No. 134, May 2019.]

AU-C Section 520

Analytical Procedures

Source: SAS No. 122.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

Introduction

Scope of This Section

.01 This section addresses the auditor's use of analytical procedures as substantive procedures (substantive analytical procedures). It also addresses the auditor's responsibility to perform analytical procedures near the end of the audit that assist the auditor when forming an overall conclusion on the financial statements. Section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, addresses the use of analytical procedures as risk assessment procedures (which may be referred to as analytical procedures used to plan the audit).[1] Section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, addresses the nature, timing, and extent of audit procedures in response to assessed risks; these audit procedures may include substantive analytical procedures.[2]

Effective Date

.02 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objectives

.03 The objectives of the auditor are to

a. obtain relevant and reliable audit evidence when using substantive analytical procedures and

b. design and perform analytical procedures near the end of the audit that assist the auditor when forming an overall conclusion about whether the financial statements are consistent with the auditor's understanding of the entity. (Ref: par. .A1)

---

[1] Paragraph .06*b* of section 315A, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

[2] Paragraphs .06 and .18 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

Definition

.04 For the purposes of generally accepted auditing standards, the following term has the meaning attributed as follows:

Analytical procedures. Evaluations of financial information through analysis of plausible relationships among both financial and nonfinancial data. Analytical procedures also encompass such investigation, as is necessary, of identified fluctuations or relationships that are inconsistent with other relevant information or that differ from expected values by a significant amount. (Ref: par. .A2–.A6)

Requirements

Substantive Analytical Procedures

.05 When designing and performing analytical procedures, either alone or in combination with tests of details, as substantive procedures in accordance with section 330, the auditor should[3] (Ref: par. .A7–.A9)

a. determine the suitability of particular substantive analytical procedures for given assertions, taking into account the assessed risks of material misstatement and tests of details, if any, for these assertions; (Ref: par. .A10–.A16)

b. evaluate the reliability of data from which the auditor's expectation of recorded amounts or ratios is developed, taking into account the source, comparability, and nature and relevance of information available and controls over preparation; (Ref: par. .A17–.A20)

c. develop an expectation of recorded amounts or ratios and evaluate whether the expectation is sufficiently precise (taking into account whether substantive analytical procedures are to be performed alone or in combination with tests of details) to identify a misstatement that, individually or when aggregated with other misstatements, may cause the financial statements to be materially misstated; and (Ref: par. .A21–.A23)

d. determine the amount of any difference of recorded amounts from expected values that is acceptable without further investigation as required by paragraph .07 and compare the recorded amounts, or ratios developed from recorded amounts, with the expectations. (Ref: par. .A24)

Analytical Procedures That Assist When Forming an Overall Conclusion

.06 The auditor should design and perform analytical procedures near the end of the audit that assist the auditor when forming an overall conclusion about whether the financial statements are consistent with the auditor's understanding of the entity. (Ref: par. .A25–.A27)

---

[3]Paragraph .18 of section 330.

Investigating Results of Analytical Procedures

.07 If analytical procedures performed in accordance with this section identify fluctuations or relationships that are inconsistent with other relevant information or that differ from expected values by a significant amount, the auditor should investigate such differences by

a. inquiring of management and obtaining appropriate audit evidence relevant to management's responses and

b. performing other audit procedures as necessary in the circumstances. (Ref: par. .A28–.A29)

Documentation (Ref: par. .A30)

.08 When substantive analytical procedures have been performed, the auditor should include in the audit documentation the following:[4]

a. The expectation referred to in paragraph .05*c* and the factors considered in its development when that expectation or those factors are not otherwise readily determinable from the audit documentation

b. Results of the comparison referred to in paragraph .05*d* of the recorded amounts, or ratios developed from recorded amounts, with the expectations

c. Any additional auditing procedures performed in accordance with paragraph .07 relating to the investigation of fluctuations or relationships that are inconsistent with other relevant information or that differ from expected values by a significant amount and the results of such additional procedures

Application and Other Explanatory Material

Objectives (Ref: par. .03b)

.A1 Analytical procedures performed near the end of the audit are intended to corroborate audit evidence obtained during the audit of the financial statements to assist the auditor in drawing reasonable conclusions on which to base the auditor's opinion.

Definition (Ref: par. .04)

.A2 Analytical procedures include the consideration of comparisons of the entity's financial information with, for example

- comparable information for prior periods.
- anticipated results of the entity, such as budgets or forecasts, or expectations of the auditor, such as an estimation of depreciation.

---

[4]Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*.

- similar industry information, such as a comparison of the entity's ratio of sales to accounts receivable and gross margin percentages with industry averages or other entities of comparable size in the same industry.

.A3 Analytical procedures also include consideration of relationships, for example

- among elements of financial information, such as gross margin percentages, that would be expected to conform to a predictable pattern based on recent history of the entity and industry.
- between financial information and relevant nonfinancial information, such as payroll costs to number of employees.

.A4 Various methods may be used to perform analytical procedures. These methods range from performing simple comparisons to performing complex analyses using advanced statistical techniques. Analytical procedures may be applied to consolidated financial statements, components, and individual elements of information.

.A5 Scanning data is a type of analytical procedure involving the auditor's exercise of professional judgment to review accounting data to identify significant or unusual items to test. This type of analytical procedure is described further in section 500, *Audit Evidence*.[5] [Revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142.]

.A6 A basic premise underlying the application of analytical procedures is that plausible relationships among data may reasonably be expected to exist and continue in the absence of known conditions to the contrary. The reasons that make relationships plausible are an important consideration because data sometimes appears to be related when it is not, which may lead the auditor to erroneous conclusions. In addition, the presence of an unexpected relationship may provide important evidence when appropriately scrutinized.

Substantive Analytical Procedures (Ref: par. .05)

.A7 The auditor's substantive procedures to address the assessed risk of material misstatement for relevant assertions may be tests of details, substantive analytical procedures, or a combination of both. The decision about which audit procedures to perform, including whether to use substantive analytical procedures, is based on the auditor's professional judgment about the expected effectiveness and efficiency of the available audit procedures to reduce the assessed risk of material misstatement to an acceptably low level.

.A8 The expected effectiveness and efficiency of a substantive analytical procedure in addressing risks of material misstatement depends on, among other things, (*a*) the nature of the assertion, (*b*) the plausibility and predictability of the relationship, (*c*) the availability and reliability of the data used to develop the expectation, and (*d*) the precision of the expectation.

---

[5]Paragraph .A61 of section 500, *Audit Evidence*. [Footnote revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142.]

.A9 The auditor may inquire of management about the availability and reliability of information needed to apply substantive analytical procedures and the results of any such analytical procedures performed by the entity. It may be effective to use analytical data prepared by management, provided that the auditor is satisfied that such data is properly prepared.

Suitability of Particular Substantive Analytical Procedures for Given Assertions (Ref: par. .05a)

.A10 When more persuasive audit evidence is desired from substantive analytical procedures, more predictable relationships are necessary to develop the expectation. Relationships in a stable environment are usually more predictable than relationships in a dynamic or unstable environment. Relationships involving income statement accounts tend to be more predictable than relationships involving only balance sheet accounts because income statement accounts represent transactions over a period of time, whereas balance sheet accounts represent amounts as of a point in time. Relationships involving transactions subject to management discretion may be less predictable. For example, management may elect to incur maintenance expense rather than replace plant and equipment, or they may delay advertising expenditures.

.A11 Substantive analytical procedures are generally more effective for large volumes of transactions that tend to be predictable over time. The application of planned analytical procedures is based on the expectation that relationships among data exist and continue in the absence of known conditions to the contrary. Particular conditions that can cause variations in these relationships include, for example, specific unusual transactions or events, accounting changes, business changes, random fluctuations, or misstatements. The suitability of a particular analytical procedure will depend upon the auditor's assessment of how effective it will be in detecting a misstatement that, individually or when aggregated with other misstatements, may cause the financial statements to be materially misstated.

.A12 In some cases, even an unsophisticated predictive model may be effective as an analytical procedure. For example, when an entity has a known number of employees at fixed rates of pay throughout the period, it may be possible for the auditor to use this data to estimate the total payroll costs for the period with a high degree of accuracy, thereby providing audit evidence for a significant item in the financial statements and reducing the need to perform tests of details on the payroll. The use of widely recognized trade ratios (such as profit margins for different types of retail entities) can often be used effectively in substantive analytical procedures to provide evidence to support the reasonableness of recorded amounts.

.A13 Different types of analytical procedures provide different levels of assurance. Analytical procedures involving, for example, the prediction of total rental income on a building divided into apartments, taking the rental rates, the number of apartments, and vacancy rates into consideration, can provide persuasive evidence and may eliminate the need for further verification by means of tests of details, provided that the elements are appropriately verified. In contrast, calculation and comparison of gross margin percentages as a means of confirming a revenue figure may provide less persuasive evidence but may provide useful corroboration if used in combination with other audit procedures.

.A14 The determination of the suitability of particular substantive analytical procedures is influenced by the nature of the assertion and the auditor's assessment of the risk of material misstatement. For example, if controls over payroll processing are deficient, the auditor may need to perform more extensive tests of details for assertions related to compensation.

.A15 Particular substantive analytical procedures may also be considered suitable when tests of details are performed on the same assertion. For example, when obtaining audit evidence regarding the valuation assertion for accounts receivable balances, the auditor may apply analytical procedures to an aging of customers' accounts, in addition to performing tests of details on subsequent cash receipts, to determine the collectability of the receivables.

Considerations Specific to Governmental Entities

.A16 The relationships between individual financial statement items traditionally considered in the audit of for-profit businesses may not always be relevant in the audit of governmental entities. For example, relationships describing profitability or return on investment may have limited or no applicability. In addition, the nature of balances reported by a governmental entity may result in different expected relationships than those traditionally assumed for businesses. For example, relationships between revenue, receivables, and inventory may be different when revenue and receivables arise from nonexchange transactions and inventory does not represent products held for sale. Also, governmental entities' budgets are a source of data that may be used as a benchmark for evaluating individual financial statements.

The Reliability of the Data (Ref: par. .05b)

.A17 The reliability of data depends on the nature and source of the audit evidence and the circumstances under which it is obtained. Accordingly, the following are relevant when determining whether data is reliable for purposes of designing substantive analytical procedures:

a. The source of the information available. Generally, the reliability of audit evidence increases when it is obtained from external parties because the information is less susceptible to management bias.[6]

b. The comparability of the information available. For example, broad industry data may need to be supplemented to be comparable to that of an entity that produces and sells specialized products.

c. The nature and relevance of the information available. For example, whether budgets have been established as results to be expected rather than as goals to be achieved.

[6]Paragraph .A22 of section 500. [Footnote revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142.]

d. Controls over the preparation of the information that are designed to ensure its completeness, accuracy, and validity. For example, controls over the preparation, review, and maintenance of budgets.

[Revised, December 2022, to reflect conforming changes necessary due to the issuance of SAS No. 142.]

.A18 Data may be readily available to develop expectations for some assertions. For example, the auditor may consider whether financial information, such as budgets or forecasts, and nonfinancial information, such as the number of units produced or sold, is available to design substantive analytical procedures.

.A19 The auditor may consider testing the operating effectiveness of controls, if any, over the entity's preparation of information used by the auditor in performing substantive analytical procedures in response to assessed risks. When such controls are effective, the auditor may have greater confidence in the reliability of the information and, therefore, in the results of analytical procedures. The operating effectiveness of controls over nonfinancial information may often be tested in conjunction with other tests of controls. For example, in establishing controls over the processing of sales invoices, an entity may include controls over the recording of unit sales. In these circumstances, the auditor may test the operating effectiveness of controls over the recording of unit sales in conjunction with tests of the operating effectiveness of controls over the processing of sales invoices. Alternatively, the auditor may consider whether the information was subjected to audit testing. Section 330 addresses determining the audit procedures to be performed on the information to be used for substantive analytical procedures.[7]

.A20 The matters discussed in paragraph .A17*a–d* are relevant irrespective of whether the auditor performs substantive analytical procedures on the entity's period-end financial statements or at an interim date and plans to perform substantive analytical procedures for the remaining period. Section 330 addresses performing substantive procedures at an interim date.[8]

*Evaluation of Whether the Expectation Is Sufficiently Precise (Ref: **par. .05c**)*

.A21 In evaluating whether the expectation is sufficiently precise when performing a substantive analytical procedure, it is appropriate for the auditor to take into account whether substantive analytical procedures are the only substantive procedures planned to address a particular risk of misstatement at the relevant assertion level or whether the risk will be addressed through a combination of substantive analytical procedures and tests of details. A less precise expectation may be appropriate when evidence obtained from performing the substantive analytical procedure will be combined with audit evidence from performing tests of details. A more precise expectation, however, is necessary when the substantive analytical procedure is the only procedure planned to address a particular risk of misstatement for a relevant assertion.

---

[7]Paragraph .25 of section 330.

[8]Paragraphs .23–.24 of section 330.

.A22 As expectations become more precise, the range of expected differences becomes narrower, and accordingly, the likelihood increases that significant differences from the expectations are due to misstatements. Matters relevant to the auditor's evaluation of whether the expectation can be developed with sufficient precision to identify a misstatement that, when aggregated with other misstatements, may cause the financial statements to be materially misstated, include the following:

- The accuracy with which the expected results of substantive analytical procedures can be predicted. For example, the auditor may expect greater consistency in comparing gross profit margins from one period to another than in comparing discretionary expenses, such as research or advertising.
- The degree to which information can be disaggregated. For example, substantive analytical procedures may be more effective when applied to financial information on individual sections of an operation or to financial statements of components of a diversified entity than when applied to the financial statements of the entity as a whole.

.A23 When expectations are developed at a more detailed level, it is more likely that the analytical procedure will more effectively address the assessed risk of misstatement to which it is directed. Monthly amounts may be more effective than annual amounts, and comparisons by location or line of business usually are more effective than companywide comparisons. The appropriate level of detail may be influenced by the nature of the entity, its size, and its complexity. The risk that material misstatements may be obscured by offsetting factors increases as an entity's operations become more complex and diversified. Disaggregation of the information helps reduce this risk.

Amount of Acceptable Difference of Recorded Amounts From Expected Values (Ref: par. .05d)

.A24 The auditor's determination of the amount of difference from the expectation that can be accepted without further investigation is influenced by materiality[9] and the desired level of assurance, while taking into account the possibility that a misstatement, individually or when aggregated with other misstatements, may cause the financial statements to be materially misstated. Section 330 requires the auditor to obtain more persuasive audit evidence the higher the auditor's assessment of risk.[10] Accordingly, as the assessed risk increases, the amount of difference considered acceptable without further investigation decreases in order to achieve the desired level of persuasive evidence.[11]

Analytical Procedures That Assist When Forming an Overall Conclusion (Ref: par. .06)

.A25 A wide variety of analytical procedures may be used when forming an overall conclusion. These procedures may include reading the financial statements and considering

[9]Paragraph .A16 of section 320, *Materiality in Planning and Performing an Audit*.

[10]Paragraph .07*b* of section 330.

[11]Paragraph .A20 of section 330.

(*a*) the adequacy of the evidence gathered in response to unusual or unexpected balances identified during the course of the audit and (*b*) unusual or unexpected balances or relationships that were not previously identified. Results of these analytical procedures may indicate that additional evidence is needed.

.A26 The results of analytical procedures designed and performed in accordance with paragraph .06 may identify a previously unrecognized risk of material misstatement. In such circumstances, section 315A requires the auditor to revise the auditor's assessment of the risks of material misstatement and modify the further planned audit procedures accordingly.[12]

.A27 The analytical procedures performed in accordance with paragraph .06 may be similar to those that would be used as risk assessment procedures.

Investigating Results of Analytical Procedures (Ref: par. .07)

.A28 Audit evidence relevant to management's responses may be obtained by evaluating those responses, taking into account the auditor's understanding of the entity and its environment and other audit evidence obtained during the course of the audit.

.A29 The need to perform other audit procedures may arise when, for example, management is unable to provide an explanation, or the explanation, together with the audit evidence obtained relevant to management's response, is not considered adequate.

Documentation (Ref: par. .08)

.A30 Section 230, *Audit Documentation*, addresses the auditor's responsibilities for preparing audit documentation and applies to substantive analytical procedures and analytical procedures performed near the end of the audit. Paragraph .08 of this section addresses specific requirements that apply to substantive analytical procedures but is not intended to provide a complete list of items that are required to be documented by section 230.

[12]Paragraph .32 of section 315A.

AU-C Section 530

Audit Sampling

Source: SAS No. 122; SAS No. 142; SAS No. 145.

Effective for audits of financial statements for periods ending on or after December 15, 2012, unless otherwise indicated.

Introduction

Scope of This Section

.01 This section applies when the auditor has decided to use audit sampling in performing audit procedures. It addresses the auditor's use of statistical and nonstatistical sampling when designing and selecting the audit sample, performing tests of controls and tests of details, and evaluating the results from the sample. (Ref: par. .A1–.A2)

.02 This section complements section 500, *Audit Evidence*, which explains what constitutes audit evidence and addresses how an auditor evaluates information to be used as audit evidence. Section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, provides guidance on the means available to the auditor for selecting items for testing, one of which is audit sampling.[1] [As amended, effective for audits of financial statements for periods ending on or after December 15, 2022, by SAS No. 142.]

Effective Date

.03 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objective

.04 The objective of the auditor, when using audit sampling, is to provide a reasonable basis for the auditor to draw conclusions about the population from which the sample is selected.

Definitions

.05 For purposes of generally accepted auditing standards, the following terms have the meanings attributed as follows:

Audit sampling (sampling). The selection and evaluation of less than 100 percent of the population of audit relevance such that the auditor expects the items selected (the sample)

[1] Paragraphs .A65–.A71 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

to be representative of the population and, thus, likely to provide a reasonable basis for conclusions about the population. In this context, *representative* means that evaluation of the sample will result in conclusions that, subject to the limitations of sampling risk, are similar to those that would be drawn if the same procedures were applied to the entire population. (Ref: par. .A3)

Nonsampling risk. The risk that the auditor reaches an erroneous conclusion for any reason not related to sampling risk. (Ref: par. .A4)

Population. The entire set of data from which a sample is selected and about which the auditor wishes to draw conclusions.

Sampling risk. The risk that the auditor's conclusion based on a sample may be different from the conclusion if the entire population were subjected to the same audit procedure. Sampling risk can lead to two types of erroneous conclusions:

a. In the case of a test of controls, that controls are more effective than they actually are, or in the case of a test of details, that a material misstatement does not exist when, in fact, it does. The auditor is primarily concerned with this type of erroneous conclusion because it affects audit effectiveness and is more likely to lead to an inappropriate audit opinion.

b. In the case of a test of controls, that controls are less effective than they actually are, or in the case of a test of details, that a material misstatement exists when, in fact, it does not. This type of erroneous conclusion affects audit efficiency because it would usually lead to additional work to establish that initial conclusions were incorrect.

Sampling unit. The individual items constituting a population. (Ref: par. .A5)

Statistical sampling. An approach to sampling that has the following characteristics:

a. Random selection of the sample items (Ref: par. .A16)

b. The use of an appropriate statistical technique to evaluate sample results, including measurement of sampling risk

A sampling approach that does not have characteristics *a* and *b* is considered nonstatistical sampling.

Stratification. The process of dividing a population into subpopulations, each of which is a group of sampling units that have similar characteristics.

Tolerable misstatement. A monetary amount set by the auditor in respect of which the auditor seeks to obtain an appropriate level of assurance that the monetary amount set by the auditor is not exceeded by the actual misstatement in the population. (Ref: par. .A6)

Tolerable rate of deviation. A rate of deviation set by the auditor in respect of which the auditor seeks to obtain an appropriate level of assurance that the rate of deviation set by the auditor is not exceeded by the actual rate of deviation in the population.

Requirements

Sample Design, Size, and Selection of Items for Testing

.06 When designing an audit sample, the auditor should consider the purpose of the audit procedure and the characteristics of the population from which the sample will be drawn. (Ref: par. .A7–.A11)

.07 The auditor should determine a sample size sufficient to reduce sampling risk to an acceptably low level. (Ref: par. .A12–.A14)

.08 The auditor should select items for the sample in such a way that the auditor can reasonably expect the sample to be representative of the relevant population and likely to provide the auditor with a reasonable basis for conclusions about the population. (Ref: par. .A15–.A17)

Performing Audit Procedures

.09 The auditor should perform audit procedures, appropriate to the purpose, on each item selected.

.10 If the audit procedure is not applicable to the selected item, the auditor should perform the procedure on a replacement item. (Ref: par. .A18)

.11 If the auditor is unable to apply the designed audit procedures, or suitable alternative procedures, to a selected item, the auditor should treat that item as a deviation from the prescribed control (in the case of tests of controls) or a misstatement (in the case of tests of details). (Ref: par. .A19–.A20)

Nature and Cause of Deviations and Misstatements

.12 The auditor should investigate the nature and cause of any deviations or misstatements identified and evaluate their possible effect on the purpose of the audit procedure and on other areas of the audit. (Ref: par. .A21–.A23)

Projecting the Results of Audit Sampling

.13 The auditor should project the results of audit sampling to the population. (Ref: par. .A24–.A25)

Evaluating the Results of Audit Sampling

.14 The auditor should evaluate

a. the results of the sample, including sampling risk, and (Ref: par. .A26–.A27)

b. whether the use of audit sampling has provided a reasonable basis for conclusions about the population that has been tested. (Ref: par. .A28)

Application and Other Explanatory Material

Scope of This Section (Ref: par. .01)

.A1 The AICPA Audit Guide *Audit Sampling* provides interpretative guidance to apply the concepts in this section, including its definitions.

Considerations Specific to Governmental Entities

.A2 Chapter 11 of the AICPA Audit Guide Government Auditing Standards *and Circular A-133 Audits* provides interpretative guidance in designing an audit approach that includes audit sampling to achieve audit objectives related to both compliance and internal control over compliance in a Circular A-133 compliance audit or program-specific audit performed in accordance with Office of Management and Budget Circular A-133, *Audits of States, Local Governments and Non-Profit Organizations*.

Definitions

Audit Sampling (Ref: par. .05)

.A3 There may be audit procedures that are not considered audit sampling but that involve examination of fewer than 100 percent of the items comprising an account balance or class of transactions. For example, an auditor may examine only a few transactions from an account balance or class of transactions to (*a*) gain an understanding of the nature of an entity's operations or (*b*) clarify the auditor's understanding of the entity's internal control. In such cases, the guidance in this section is not applicable.

Nonsampling Risk (Ref: par. .05)

.A4 Examples of nonsampling risk include the use of inappropriate audit procedures or misinterpretation of audit evidence and failure to recognize a misstatement or deviation. Nonsampling risk may be reduced to an acceptable level through such factors as adequate planning (see section 300, *Planning an Audit*) and proper conduct of a firm's audit practice (see section 220A, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*).

Sampling Unit (Ref: par. .05)

.A5 The sampling units might be physical items (for example, checks listed on deposit slips, credit entries on bank statements, sales invoices, or accounts receivable) or monetary units.

Tolerable Misstatement (Ref: par. .05)

.A6 The auditor is required by section 320, *Materiality in Planning and Performing an Audit*, to determine performance materiality.[2] Performance materiality is determined to reduce to an appropriately low level the probability that the aggregate of uncorrected and

[2]Paragraph .11 of section 320, *Materiality in Planning and Performing an Audit*.

undetected misstatements in the financial statements exceeds materiality for the financial statements as a whole. *Tolerable misstatement* is the application of performance materiality to a particular sampling procedure. Tolerable misstatement may be the same amount or an amount smaller than performance materiality (for example, when the population from which the sample is selected is smaller than the account balance).

Sample Design, Size, and Selection of Items for Testing

Sample Design (Ref: par. .06)

.A7 Audit sampling enables the auditor to obtain and evaluate audit evidence about some characteristic of the items selected in order to form or assist in forming a conclusion concerning the population from which the sample is drawn. Audit sampling can be applied using either statistical or nonstatistical sampling approaches.

.A8 When designing an audit sample, the auditor's consideration includes the specific purpose to be achieved and the combination of audit procedures that is likely to achieve that purpose. Consideration of the nature of the audit evidence sought and possible deviation or misstatement conditions or other characteristics relating to that audit evidence will assist the auditor in defining what constitutes a deviation or misstatement and what population to use for sampling. In fulfilling the requirement in section 500 when performing audit sampling, the auditor is required to perform audit procedures to obtain evidence that the population from which the audit sample is drawn is complete.[3]

.A9 The auditor's consideration of the purpose of the audit procedure, as required by paragraph .06, includes a clear understanding of what constitutes a deviation or misstatement so that all, and only, those conditions that are relevant to the assertions are included in the evaluation of deviations or projection of misstatements. For example, in a test of details relating to the existence of accounts receivable, such as confirmation, payments made by the customer before the confirmation date but received shortly after that date by the client are not considered a misstatement. Also, an incorrect posting between customer accounts does not affect the total accounts receivable balance. Therefore, it may not be appropriate to consider this a misstatement in relation to the relevant assertion even though it may have an important effect on other areas of the audit, such as the assessment of the risk of fraud or the adequacy of the allowance for doubtful accounts.

.A10 In considering the test objective and characteristics of a population for tests of controls, the auditor makes an assessment of the expected rate of deviation based on the auditor's understanding of the controls. This assessment is made in order to design an audit sample and determine sample size. For example, if the expected rate of deviation is unacceptably high, the auditor will normally decide not to perform tests of controls. Similarly, for tests of details, the auditor makes an assessment of the expected misstatement in the population. If the expected misstatement is high, 100 percent examination or increasing the sample size may be appropriate when performing tests of details. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

---

[3]Paragraph .08 of section 500, *Audit Evidence*.

.A11 In considering the characteristics of the population from which the sample will be drawn, the auditor may determine that stratification or value-weighted selection is appropriate.

Sample Size (Ref: par. .07)

.A12 The level of sampling risk that the auditor is willing to accept affects the sample size required. The lower the risk the auditor is willing to accept, the greater the sample size necessary.

.A13 The sample size can be determined by the application of a statistically based formula or through the exercise of professional judgment. Various factors typically influence determination of sample size, as follows:

- For tests of controls:
  - — The tolerable rate of deviation of the population to be tested
  - — The expected rate of deviation of the population to be tested
  - — The desired level of assurance (complement of risk of overreliance) that the tolerable rate of deviation is not exceeded by the actual rate of deviation in the population; the auditor may decide the desired level of assurance based on the extent to which the auditor's risk assessment takes into account relevant controls
  - — The number of sampling units in the population if the population is very small
- For substantive tests of details:
  - — The auditor's desired level of assurance (complement of risk of incorrect acceptance) that tolerable misstatement is not exceeded by actual misstatement in the population; the auditor may decide the desired level of assurance based on the following:
    - The auditor's assessment of the risk of material misstatement
    - The assurance obtained from other substantive procedures directed at the same assertion
  - — Tolerable misstatement
  - — Expected misstatement for the population
  - — Stratification of the population when performed
  - — For some sampling methods, the number of sampling units in each stratum

.A14 The decision whether to use a statistical or nonstatistical sampling approach is a matter for the auditor's professional judgment; however, sample size is not a valid criterion to use in deciding between statistical and nonstatistical approaches. An auditor who applies statistical sampling may use tables or formulas to compute sample size based on the factors in paragraph .A13. An auditor who applies nonstatistical sampling exercises professional judgment to relate the same factors used in statistical sampling in determining the appropriate sample size. Ordinarily, this would result in a sample size comparable with the sample size resulting from an efficient and effectively designed statistical sample, considering the same sampling parameters. This guidance does not suggest that the auditor using nonstatistical sampling also compute a corresponding sample size using an appropriate statistical technique.

Selection of Items for Testing (Ref: par. .08)

.A15 Audit sampling involves selection techniques that are probabilistic in nature. For example, through the assessment of the risk of material misstatement, an auditor might identify areas in which misstatement is relatively likely. The auditor might first separately examine those items deemed to be of relatively high risk and then use audit sampling (which will involve some form of probabilistic selection) to form an estimate of some characteristic of the remaining population.

.A16 Random selection techniques include the following:

a. Simple random

b. Systematic random

c. Probability weighted, including monetary unit

A detailed discussion of selection techniques is included in the AICPA Audit Guide *Audit Sampling*.

.A17 With statistical sampling, sample items are selected using random selection techniques. The principal techniques of selecting a nonstatistical sample are the use of random selection and haphazard selection to select sample items.

Performing Audit Procedures (Ref: par. .10–.11)

.A18 An example of when it is necessary to perform the procedure on a replacement item is when a voided check is selected while testing for evidence of payment authorization. If the auditor is satisfied that the check has been properly voided such that it does not constitute a deviation, an appropriately chosen replacement is examined.

.A19 In some circumstances, the auditor may not be able to apply the planned audit procedures to selected sample items because, for example, the entity might not be able to locate supporting documentation. The auditor's treatment of unexamined items will depend on their effect on the auditor's evaluation of the sample. If the auditor's evaluation of the sample results would not be altered by considering those unexamined items to be misstated, it may not be necessary to examine the items, for example, if the aggregate amount of the unexamined items, if treated as misstatements or deviations, would not cause the auditor's assessment of the amount of the misstatement or deviation in the population to exceed tolerable misstatement or tolerable deviation, respectively. However, when this is not the case, the auditor is required by paragraph .11 to perform alternative procedures that provide sufficient appropriate audit evidence to form a conclusion about the sample item and use the results of these procedures in assessing the sample results. If alternative procedures cannot be satisfactorily performed in these cases, the auditor is required to treat the items as misstatements or deviations, as appropriate, in evaluating the results of the sample. Section 240, *Consideration of Fraud in a Financial Statement Audit*, also requires the auditor to consider whether the reasons for the auditor's inability to examine the items have implications with regard to assessing risks of material misstatement due to fraud, the assessed level of control risk that the auditor expects to be supported, or the degree of reliance on management representations.

.A20 An example of a suitable alternative procedure for an accounts receivable positive confirmation request for which no reply has been received might be the examination of subsequent cash receipts, together with evidence of their source and the items they are intended to settle.

Nature and Cause of Deviations and Misstatements (Ref: par. .12)

.A21 Section 450, *Evaluation of Misstatements Identified During the Audit*, explains that the auditor may request management to examine a class of transactions, account balance, or disclosure in order for management to understand the cause of a misstatement identified by the auditor; perform procedures to determine the amount of the actual misstatement in the class of transactions, account balance, or disclosure; and make appropriate adjustments to the financial statements.[4]

.A22 In analyzing the deviations and misstatements identified, the auditor may observe that many have a common feature (for example, type of transaction, location, product line, or period of time). In such circumstances, the auditor may decide to identify all items in the population that possess the common feature and extend audit procedures to those items. In addition, such deviations or misstatements may be intentional and may indicate the possibility of fraud.

.A23 In addition to the evaluation of the frequency and amounts of monetary misstatements, section 450 requires the auditor to consider the qualitative aspects of the misstatements.[5] These include (*a*) the nature and cause of misstatements, such as whether they are differences in principle or application, are errors, or are caused by fraud or are due to misunderstanding of instructions or carelessness, and (*b*) the possible relationship of the misstatements to other phases of the audit. The discovery of fraud requires a broader consideration of possible implications than does the discovery of an error.

Projecting the Results of Audit Sampling (Ref: par. .13)

.A24 For tests of details, the auditor is required by paragraph .13 to project misstatements observed in an audit sample to the population in order to obtain a likely misstatement. Due to sampling risk, this projection may not be sufficient to determine an amount to be recorded.

---

[4]Paragraph .A9 of section 450, *Evaluation of Misstatements Identified During the Audit*.

[5]Paragraph .11 of section 450.

.A25 For tests of controls, the sample deviation rate is also the projected deviation rate for the population as a whole. Section 330 addresses the auditor's response when deviations from controls upon which the auditor intends to rely are detected.[6]

Evaluating the Results of Audit Sampling (Ref: par. .14)

.A26 For tests of controls, an unexpectedly high sample deviation rate may lead to an increase in the assessed risks of material misstatement, unless further audit evidence substantiating the initial assessment is obtained. For tests of details, an unexpectedly high misstatement amount in a sample may cause the auditor to believe that a class of transactions or account balance is materially misstated, in the absence of further audit evidence that no material misstatement exists.

.A27 Considering the results of other audit procedures helps the auditor assess the risk that actual misstatement in the population exceeds tolerable misstatement; such risk may be reduced if additional audit evidence is obtained. In the case of tests of details, the *projected misstatement* is the auditor's best estimate of misstatement in the population. As the projected misstatement approaches or exceeds tolerable misstatement, the more likely that actual misstatement in the population exceeds tolerable misstatement. Also, if the projected misstatement is greater than the auditor's expectations of misstatement used to determine the sample size, the auditor may conclude that there is an unacceptable sampling risk that the actual misstatement in the population exceeds the tolerable misstatement. The AICPA Audit Guide *Audit Sampling* contains further guidance regarding the concept of sampling risk.

.A28 If the auditor concludes that audit sampling has not provided a reasonable basis for conclusions about the population that has been tested, the auditor may

- request management to investigate misstatements that have been identified and the potential for further misstatements and to make any necessary adjustments or
- tailor the nature, timing, and extent of those further audit procedures to best achieve the required assurance. For example, in the case of tests of controls, the auditor might extend the sample size, test an alternative control, or modify related substantive procedures.

Section 450 addresses misstatements identified by the auditor during the audit.

AU-C Section 540

Auditing Accounting Estimates and Related Disclosures

(Supersedes SAS No. 122 section 540)

Source: SAS No. 143; SAS No. 144; SAS No. 145.

Effective for audits of financial statements for periods ending on or after December 15, 2023.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibilities relating to accounting estimates, including fair value accounting estimates and related disclosures, in an audit of financial statements. Specifically, it includes requirements and guidance that refer to or expand on how section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*; section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*; section 450, *Evaluation of Misstatements Identified During the Audit*; and section 500, *Audit Evidence*, and other relevant AU-C sections are to be applied with regard to accounting estimates and related disclosures. It also includes requirements and guidance related to the evaluation of misstatements of accounting estimates and related disclosures, and indicators of possible management bias.

Nature of Accounting Estimates

.02 Accounting estimates vary widely in nature and are required to be made by management when the monetary amounts cannot be directly observed. The measurement of these monetary amounts is subject to estimation uncertainty, which reflects inherent limitations in knowledge or data. These limitations give rise to inherent subjectivity and variation in the measurement outcomes. The process of making accounting estimates involves selecting and applying a method using assumptions and data, which requires judgment by management and can give rise to complexity in measurement. The effects of complexity, subjectivity, or other inherent risk factors on the measurement of these monetary amounts affects their susceptibility to misstatement. (Ref: par. .A1–.A6 and app. A)

.03 Although this section applies to all accounting estimates, including fair value accounting estimates,[1] the degree to which an accounting estimate is subject to estimation uncertainty will vary substantially. The nature, timing, and extent of the risk assessment and further audit procedures required by this section will vary in relation to the estimation uncertainty and the assessment of the related risks of material misstatement. For certain accounting estimates, estimation uncertainty may be very low, based on their nature, and the complexity and subjectivity involved in making them may also be very low. For such accounting estimates, the risk assessment procedures and further audit procedures required by this section would not be expected to be extensive. When estimation uncertainty, complexity, or subjectivity are very high, such procedures would be expected to be much more extensive. This section contains guidance on how the requirements of this section can be scaled. (Ref: par. .A7)

Key Concepts of This Section

.04 Statement on Auditing Standards (SAS) No. 145, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, requires inherent risk and control risk to be assessed separately for identified risks of material misstatement at the relevant assertion level. In the context of this section and depending on the nature of a particular accounting estimate, the susceptibility of an assertion to a misstatement that could be material may be subject to or affected by estimation uncertainty, complexity, subjectivity, or other inherent risk factors, and the interrelationship among them. As explained in section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*,[2] inherent risk is influenced by inherent risk factors. Accordingly, the assessment of inherent risk depends on the degree to which the inherent risk factors affect the susceptibility of an assertion to misstatement, and the level of inherent risk varies on a scale that is referred to as *the spectrum of inherent risk*. In assessing control risk, the auditor takes into account whether the auditor's further audit procedures contemplate planned reliance on the operating effectiveness of controls. If the auditor does not intend to test and rely on the operating effectiveness of controls, the auditor's assessment of control risk is such that the assessment of the risk of material misstatement is the same as the assessment of inherent risk. (Ref: par. .A8–.A10, .A65–.A66, and app. A) [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.05 This section refers to relevant requirements in SAS No. 145 and section 330 and provides related guidance to emphasize the importance of the auditor's decisions about controls relating to accounting estimates, including decisions about whether

- there are controls required to be identified in accordance with SAS No. 145[3] for which the auditor is required to evaluate their design and determine whether they have been implemented.

[1]For purposes of generally accepted auditing standards, a fair value measurement is a form of accounting estimate.

[2]Paragraph .A42 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

[3]See paragraphs 27 and 29*b* of Statement on Auditing Standards (SAS) No. 145, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

- to test the operating effectiveness of relevant controls.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.06 This section emphasizes that the auditor's further audit procedures (including, when appropriate, tests of controls) need to be responsive to the reasons for the assessed risks of material misstatement at the relevant assertion level, taking into account the effect of one or more inherent risk factors and the auditor's assessment of control risk.

.07 The exercise of professional skepticism in relation to accounting estimates is affected by the auditor's consideration of inherent risk factors, and its importance increases when accounting estimates are subject to a greater degree of estimation uncertainty or are affected to a greater degree by complexity, subjectivity, or other inherent risk factors. Similarly, the exercise of professional skepticism is important when there is greater susceptibility to misstatement due to management bias or other fraud risk factors insofar as they affect inherent risk. (Ref: par. .A11) [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.08 This section requires the auditor to evaluate, based on the audit procedures performed and the audit evidence obtained, whether the accounting estimates and related disclosures are reasonable[4] in the context of the applicable financial reporting framework or are misstated. For purposes of this section, *reasonable*, in the context of the applicable financial reporting framework, means that the relevant requirements of the applicable financial reporting framework have been applied appropriately, including those that address the following: (Ref: par. .A12–.A13 and .A139–.A144)

- The development of the accounting estimate, including the selection of the method, assumptions, and data in view of the nature of the accounting estimate and the facts and circumstances of the entity
- The selection of management's point estimate
- The disclosures about the accounting estimate, including disclosures about how the accounting estimate was developed and that explain the nature, extent, and sources of estimation uncertainty

Effective Date

.09 This section is effective for audits of financial statements for periods ending on or after December 15, 2023.

[4]See also paragraph .15*c* of section 700, *Forming an Opinion and Reporting on Financial Statements*, or paragraph .40*c* of section 703, *Forming an Opinion and Reporting on Financial Statements of Employee Benefit Plans Subject to ERISA*. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

Objective

.10 The objective of the auditor is to obtain sufficient appropriate audit evidence about whether accounting estimates and related disclosures in the financial statements are reasonable, in the context of the applicable financial reporting framework.

Definitions

.11 For purposes of generally accepted auditing standards (GAAS), the following terms have the meanings attributed as follows:

Accounting estimate. A monetary amount for which the measurement, in accordance with the requirements of the applicable financial reporting framework, is subject to estimation uncertainty. (Ref: par. .A14)

Auditor's point estimate or auditor's range. An amount, or range of amounts, respectively, developed by the auditor in evaluating management's point estimate. (Ref: par. .A15)

Estimation uncertainty. Susceptibility to an inherent lack of precision in measurement. (Ref: par. .A16 and app. A)

Management bias. A lack of neutrality by management in the preparation of information. (Ref: par. .A17)

Management's point estimate. The amount selected by management for recognition or disclosure in the financial statements as an accounting estimate.

Outcome of an accounting estimate. The actual monetary amount that results from the resolution of the transactions, events, or conditions addressed by an accounting estimate. (Ref: par. .A18)

Requirements

Risk Assessment Procedures and Related Activities

.12 When obtaining an understanding of the entity and its environment, the applicable financial reporting framework, and the entity's system of internal control, as required by SAS No. 145, the auditor should obtain an understanding of the following matters related to the entity's accounting estimates. The auditor's procedures to obtain the understanding should be performed to the extent necessary to obtain audit evidence that provides an appropriate basis for the identification and assessment of risks of material misstatement at the financial statement and assertion levels.[5] (Ref: par. .A19–.A23)

[5]Paragraphs .05–.06 and .12–.13 of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

Obtaining an Understanding of the Entity and Its Environment and the Applicable Financial Reporting Framework

a. The entity's transactions or other events and conditions that may give rise to the need for or changes in accounting estimates to be recognized or disclosed in the financial statements (Ref: par. .A24)

b. The requirements of the applicable financial reporting framework related to accounting estimates (including the recognition criteria, measurement bases, and the related presentation and disclosure requirements) and how they apply in the context of the nature and circumstances of the entity and its environment, including how the inherent risk factors affect susceptibility of assertions to misstatement. (Ref: par. .A25–.A26)

c. Regulatory factors relevant to the entity's accounting estimates, including, when applicable, regulatory frameworks (Ref: par. .A27)

d. The nature of the accounting estimates and related disclosures that the auditor expects to be included in the entity's financial statements, based on the auditor's understanding of the matters in paragraph .12*a–c* of this section (Ref: par. .A28)

Obtaining an Understanding of the Entity's System of Internal Control

e. The nature and extent of oversight and governance that the entity has in place over management's financial reporting process relevant to accounting estimates (Ref: par. .A29–.A31)

f. How management identifies the need for and applies specialized skills or knowledge related to accounting estimates, including with respect to the use of a management's specialist (Ref: par. .A32)

g. How the entity's risk assessment process identifies and addresses risks relating to accounting estimates (Ref: par. .A33–.A34)

h. The entity's information system as it relates to accounting estimates, including the following:

   i. How information relating to accounting estimates and related disclosures for significant classes of transactions, account balances, or disclosures flows through the entity's information system (Ref: par. .A20 and .A35)

   ii. For such accounting estimates and related disclosures, how management

      1. identifies the relevant methods, assumptions, or sources of data, and the need for changes in them, that are appropriate in the context of the applicable financial reporting framework, including how management (Ref: par. .A36–.A37)

         a. selects or designs, and applies, the methods used, including the use of models (Ref: par. .A38–.A39)

b. selects the assumptions to be used, including consideration of alternatives, and identifies significant assumptions (Ref: par. .A40–.A43)

c. selects the data to be used (Ref: par. .A44)

2. understands the degree of estimation uncertainty, including by considering the range of possible measurement outcomes (Ref: par. .A45)

3. addresses the estimation uncertainty, including selecting a point estimate and related disclosures for inclusion in the financial statements (Ref: par. .A46–.A49)

i. Identified controls in the control activities component[6] over management's process for making accounting estimates as described in paragraph .12*h*(ii) of this section (Ref: par. .A50–.A54)

j. How management reviews the outcomes of previous accounting estimates and responds to the results of that review

.13 The auditor should review the outcome of previous accounting estimates or, when applicable, their subsequent re-estimation to assist in identifying and assessing the risks of material misstatement in the current period. The auditor should take into account the characteristics of the accounting estimates in determining the nature and extent of that review. The review is not intended to call into question judgments about previous-period accounting estimates that were appropriate based on the information available at the time they were made. (Ref: par. .A55–.A60)

.14 With respect to accounting estimates, the auditor should determine whether the engagement team requires specialized skills or knowledge to perform the risk assessment procedures, to identify and assess the risks of material misstatement, to design and perform audit procedures to respond to those risks, or to evaluate the audit evidence obtained. (Ref: par. .A61–.A63)

Identifying and Assessing the Risks of Material Misstatement

.15 In identifying and assessing the risks of material misstatement relating to an accounting estimate and related disclosures at the assertion level, including separately assessing inherent risk and control risk, as required by SAS No. 145,[7] the auditor should take the following into account in identifying the risks of material misstatement and assessing inherent risk: (Ref: par. .A64–.A71)

[6] Paragraphs 27 and 29*b* of SAS No. 145. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

[7] Paragraphs 31–34 of SAS No. 145. [Footnote renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

a. The degree to which the accounting estimate is subject to estimation uncertainty (Ref: par. .A72–.A75)

b. The degree to which one or both of the following are affected by complexity, subjectivity, or other inherent risk factors: (Ref: par. .A76–.A79)

   i. The selection and application of the method, assumptions, and data in making the accounting estimate

   ii. The selection of management's point estimate and related disclosures for inclusion in the financial statements

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.16 The auditor should determine whether any of the risks of material misstatement identified and assessed in accordance with paragraph .15 are, in the auditor's professional judgment, a significant risk.[8] If the auditor has determined that a significant risk exists, the auditor should identify controls that address that risk[9] and evaluate whether such controls have been suitably designed and implemented to mitigate such risks.[10] (Ref: par. .A80) [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Responses to the Assessed Risks of Material Misstatement

.17 As required by section 330,[11] the auditor's further audit procedures should be responsive to the assessed risks of material misstatement at the relevant assertion level,[12] considering the reasons for the assessment given to those risks. The auditor's further audit procedures should include one or more of the following approaches:

a. Obtaining audit evidence from events occurring up to the date of the auditor's report (see paragraph .20 of this section)

b. Testing how management made the accounting estimate (see paragraphs .21–.26 of this section)

c. Developing an auditor's point estimate or range (see paragraphs .27–.28 of this section)

---

[8]Paragraph 32 of SAS No. 145. [Footnote renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

[9]Paragraph 26*a*(i) of SAS No. 145. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

[10]Paragraph 26*a* of SAS No. 145. [Footnote renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

[11]Paragraphs .06–.15 and .18 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

[12]Paragraphs .06–.07 and .22 of section 330. [Footnote renumbered, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

The auditor's further audit procedures should take into account that the higher the assessed risk of material misstatement, the more persuasive the audit evidence needs to be.[13] The auditor should design and perform further audit procedures in a manner that is not biased toward obtaining audit evidence that may be corroborative or toward excluding audit evidence that may be contradictory. (Ref: par. .A81–.A84)

.18 As required by section 330,[14] the auditor should design and perform tests to obtain sufficient appropriate audit evidence about the operating effectiveness of controls, if

a. the auditor's assessment of risks of material misstatement at the relevant assertion level includes an expectation that the controls are operating effectively, or

b. substantive procedures alone cannot provide sufficient appropriate audit evidence at the relevant assertion level.

In relation to accounting estimates, the auditor's tests of such controls should be responsive to the reasons for the assessment given to the risks of material misstatement. In designing and performing tests of controls, the auditor should obtain more persuasive audit evidence the greater the reliance the auditor places on the effectiveness of a control.[15] (Ref: par. .A85–.A89) [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.19 For a significant risk relating to an accounting estimate, the auditor's further audit procedures should include tests of controls in the current period if the auditor plans to rely on those controls. When the approach to a significant risk consists only of substantive procedures, those procedures should include tests of details.[16] (Ref: par. .A90)

Obtaining Audit Evidence From Events Occurring Up to the Date of the Auditor's Report

.20 When the auditor's further audit procedures include obtaining audit evidence from events occurring up to the date of the auditor's report, the auditor should evaluate whether such audit evidence is sufficient and appropriate to address the risks of material misstatement relating to the accounting estimate, taking into account that changes in circumstances and other relevant conditions between the event and the measurement date may affect the relevance of such audit evidence in the context of the applicable financial reporting framework. (Ref: par. .A91–.A93)

Testing How Management Made the Accounting Estimate

.21 When testing how management made the accounting estimate, the auditor's further audit procedures should include procedures, designed and performed in accordance with paragraphs .22–.25, to obtain sufficient appropriate audit evidence regarding the risks of material misstatement[17] relating to the following: (Ref: par. .A94)

---

[13]Paragraph .07*b* of section 330. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

[14]Paragraph .08 of section 330. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

[15]Paragraph .09 of section 330. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

[16]Paragraphs .15 and .22 of section 330. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

a. The selection and application of the methods, significant assumptions, and data used by management in making the accounting estimate

b. How management selected the point estimate and developed related disclosures about estimation uncertainty

Methods

.22 In applying the requirements of paragraph .21, with respect to methods, the auditor's further audit procedures should address the following:

a. Whether the method selected is appropriate in the context of the applicable financial reporting framework and, if applicable, changes from the method used in prior periods are appropriate (Ref: par. .A95 and .A97)

b. Whether judgments made in selecting the method give rise to indicators of possible management bias (Ref: par. .A96)

c. Whether the calculations are applied in accordance with the method and are mathematically accurate

d. When management's application of the method involves complex modeling, whether judgments have been applied consistently, and whether, when applicable (Ref: par. .A98–.A100)

   i. the design of the model meets the measurement objective of the applicable financial reporting framework, is appropriate in the circumstances, and, if applicable, changes from the prior period's model are appropriate in the circumstances.

   ii. adjustments to the output of the model are consistent with the measurement objective of the applicable financial reporting framework and are appropriate in the circumstances.

e. Whether the integrity of the significant assumptions and the data has been maintained in applying the method (Ref: par. .A101)

Significant Assumptions

.23 In applying the requirements of paragraph .21, with respect to significant assumptions, the auditor's further audit procedures should address the following:

a. Whether the significant assumptions are appropriate in the context of the applicable financial reporting framework and, if applicable, changes from prior periods are appropriate (Ref: par. .A95 and .A102–.A103)

---

[17]See paragraph .17 of this section for discussion regarding the responses to the assessed risk of material misstatement. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

b. Whether judgments made in selecting the significant assumptions give rise to indicators of possible management bias (Ref: par. .A96)

c. Whether the significant assumptions are consistent with each other and with those used in other accounting estimates, or with related assumptions used in other areas of the entity's business activities, based on the auditor's knowledge obtained in the audit (Ref: par. .A104)

d. When applicable, whether management has the intent to carry out specific courses of action and has the ability to do so (Ref: par. .A105)

Data

.24 In applying the requirements of paragraph .21, with respect to data, the auditor's further audit procedures should address the following:

a. Whether the data is appropriate in the context of the applicable financial reporting framework and, if applicable, changes from prior periods are appropriate (Ref: par. .A95 and .A106)

b. Whether judgments made in selecting the data give rise to indicators of possible management bias (Ref: par. .A96)

c. Whether the data is relevant and reliable in the circumstances (Ref: par. .A107)

d. Whether the data has been appropriately understood or interpreted by management, including with respect to contractual terms (Ref: par. .A108)

Management's Selection of a Point Estimate and Related Disclosures About Estimation Uncertainty

.25 In applying the requirements of paragraph .21, the auditor's further audit procedures should address whether, in the context of the applicable financial reporting framework, management has taken appropriate steps to do the following:

a. Understand estimation uncertainty (Ref: par. .A109)

b. Address estimation uncertainty by selecting an appropriate point estimate and by developing related disclosures about estimation uncertainty (Ref: par. .A110–.A114)

.26 When, in the auditor's judgment based on the audit evidence obtained, management has not taken appropriate steps to understand or address estimation uncertainty, the auditor should (Ref: par. .A115–.A117)

a. request management to perform additional procedures to understand estimation uncertainty or address it by reconsidering the selection of management's point estimate or considering providing additional disclosures relating to the estimation uncertainty, and evaluate management's responses in accordance with paragraph .25 of this section.

b. to the extent practicable, develop an auditor's point estimate or range in accordance with paragraphs .27–.28 of this section, if the auditor determines that management's response to the auditor's request does not sufficiently address estimation uncertainty.

c. evaluate whether a deficiency in internal control exists and, if so, communicate in accordance with section 265, *Communicating Internal Control Related Matters Identified in an Audit.*

Developing an Auditor's Point Estimate or Range

.27 When the auditor develops a point estimate or range to evaluate management's point estimate and related disclosures about estimation uncertainty, including when required by paragraph .26*b*, the auditor's further audit procedures should include procedures to evaluate whether the methods, assumptions, or data used are appropriate in the context of the applicable financial reporting framework. Regardless of whether the auditor uses management's or the auditor's own methods, assumptions, or data, these further audit procedures should be designed and performed to address the matters in paragraphs .22–.24. (Ref: par. .A118–.A123)

.28 If the auditor develops an auditor's range, the auditor should

a. determine that the range includes only amounts that are supported by sufficient appropriate audit evidence and have been evaluated by the auditor to be reasonable in the context of the measurement objectives and other requirements of the applicable financial reporting framework. (Ref: par. .A124–.A125)

b. design and perform further audit procedures to obtain sufficient appropriate audit evidence regarding the assessed risks of material misstatement relating to the disclosures in the financial statements that describe the estimation uncertainty.

Other Considerations Relating to Audit Evidence

.29 In obtaining audit evidence regarding the risks of material misstatement relating to accounting estimates, irrespective of the sources of information to be used as audit evidence, the auditor should comply with the relevant requirements in section 500 and section 501, *Audit Evidence — Specific Considerations for Selected Items*.

.30 When using the work of a management's specialist, the requirements in paragraphs .20–.28 of this section may assist the auditor in evaluating the appropriateness of the specialist's work as audit evidence for a relevant assertion in accordance with section 501.[18] In evaluating the work of the management's specialist, the nature, timing, and extent of the further audit procedures are affected by the auditor's evaluation of the specialist's competence, capabilities, and objectivity; the auditor's understanding of the nature of the work performed by the specialist; and the auditor's familiarity with the specialist's field of expertise. (Ref: par. .A126–.A132)

[18] Paragraph .27*c* of section 501, *Audit Evidence — Specific Considerations for Selected Items*, as amended by Statement on Auditing Standards (SAS) No. 142, *Audit Evidence* (sec. 500). [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

Disclosures Related to Accounting Estimates

.31 The auditor should design and perform further audit procedures to obtain sufficient appropriate audit evidence regarding the assessed risks of material misstatement at the relevant assertion level for disclosures related to an accounting estimate, including those procedures related to estimation uncertainty addressed in paragraphs .25*b* and .28*b*.

Indicators of Possible Management Bias

.32 The auditor should evaluate whether judgments and decisions made by management in making the accounting estimates included in the financial statements, even if they are individually reasonable, are indicators of possible management bias. When indicators of possible management bias are identified, the auditor should evaluate the implications for the audit. When there is intention to mislead, management bias is fraudulent in nature. (Ref: par. .A133–.A136)

Overall Evaluation Based on Audit Procedures Performed

.33 In applying section 330 to accounting estimates,[19] the auditor should evaluate, based on the audit procedures performed and audit evidence obtained, whether (Ref: par. .A137–.A138)

a. the assessments of the risks of material misstatement at the relevant assertion level remain appropriate, including when indicators of possible management bias have been identified;

b. management's decisions relating to the recognition, measurement, presentation, and disclosure of these accounting estimates in the financial statements are in accordance with the applicable financial reporting framework; and

c. sufficient appropriate audit evidence has been obtained.

.34 In making the evaluation required by paragraph .33*c* of this section, the auditor should take into account all relevant audit evidence obtained, whether corroborative or contradictory.[20] If the auditor is unable to obtain sufficient appropriate audit evidence, the auditor should evaluate the implications for the audit or the auditor's opinion on the financial statements in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

Determining Whether the Accounting Estimates Are Reasonable or Misstated

.35 The auditor should determine whether the accounting estimates and related disclosures are reasonable in the context of the applicable financial reporting framework or are misstated. Section 450[21] provides guidance on how the auditor may distinguish misstatements (whether factual, judgmental, or projected) for the auditor's evaluation of

---

[19]Paragraphs .27–.28 of section 330. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

[20]Paragraph .28 of section 330. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

the effect of uncorrected misstatements on the financial statements. (Ref: par. .A12–.A13 and .A139–.A145)

.36 In relation to accounting estimates, the auditor should evaluate whether management has included disclosures, beyond those specifically required by the framework, that are necessary to achieve the fair presentation of the financial statements as a whole.[22]

Communication With Those Charged With Governance, Management, or Other Relevant Parties

.37 In applying section 260, *The Auditor's Communication With Those Charged With Governance*,[23] and section 265,[24] the auditor is required to communicate with those charged with governance or management about certain matters, including significant qualitative aspects of the entity's significant accounting practices and significant deficiencies and material weaknesses in internal control identified during the audit, respectively. In doing so, the auditor should consider the matters, if any, to communicate regarding accounting estimates and take into account whether the reasons given to the risks of material misstatement relate to estimation uncertainty or the effects of complexity, subjectivity, or other inherent risk factors in making accounting estimates and related disclosures. In addition, in certain circumstances, the auditor is required by law or regulation to communicate about certain matters with other relevant parties, such as regulators. (Ref: par. .A146–.A147)

Documentation

.38 The auditor should include the following in the audit documentation:[25] (Ref: par. .A148–.A151)

a. Key elements of the auditor's understanding of the entity and its environment, including the entity's internal control related to the entity's accounting estimates

b. The linkage of the auditor's further audit procedures with the assessed risks of material misstatement at the relevant assertion level,[26] taking into account the reasons given to the assessment of those risks

---

[26] Paragraph .30*b* of section 330. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

c. The auditor’s responses when management has not taken appropriate steps to understand and address estimation uncertainty

d. Indicators of possible management bias related to accounting estimates, if any, and the auditor’s evaluation of the implications for the audit, as required by paragraph .32

e. Significant judgments relating to the auditor's determination of whether the accounting estimates and related disclosures are reasonable in the context of the applicable financial reporting framework or are misstated

Application and Other Explanatory Material

Nature of Accounting Estimates

Examples of Accounting Estimates

.A1 Examples of accounting estimates related to classes of transactions, account balances, and disclosures include the following:

- Inventory obsolescence
- Depreciation of property and equipment
- Valuation of infrastructure assets, such as buildings and roadways
- Valuation of financial instruments
- Outcome of pending litigation
- Provision for expected credit losses
- Valuation of insurance contract liabilities
- Warranty obligations
- Employee retirement benefits liabilities
- Share-based payments
- Fair value of assets or liabilities acquired in a business combination, including the determination of goodwill and intangible assets
- Impairment of long-lived assets or property or equipment held for disposal
- Nonmonetary exchanges of assets or liabilities between independent parties
- Revenue recognized for long-term contracts

Methods

.A2 A *method* is a measurement technique used by management to make an accounting estimate in accordance with the required measurement basis. For example, one recognized method used to make accounting estimates relating to share-based payment transactions is to determine a theoretical option call price using the Black-Scholes option-pricing formula. A method is applied using a computational tool or process, sometimes referred to as a *model*, and involves applying assumptions and data and taking into account a set of relationships between them.

Assumptions and Data

.A3 Assumptions involve judgments based on available information about matters such as the choice of an interest rate, a discount rate, or judgments about future conditions or events. An assumption may be selected by management from a range of appropriate alternatives. Assumptions that may be made or identified by a management's expert become management's assumptions when used by management in making an accounting estimate.

.A4 For purposes of this section, *data* is information that can be obtained through direct observation or from a party external to the entity. Information obtained by applying analytical or interpretive techniques to data is referred to as *derived data* when such techniques have a well-established theoretical basis and, therefore, less need for management judgment. Otherwise, such information is an assumption.

.A5 Examples of data include one or more of the following:

- Prices generated by market transactions
- Operating times or quantities of output from a production machine
- Historical prices or other terms included in contracts, such as a contracted interest rate, a payment schedule, and term included in a loan agreement
- Forward-looking information, such as economic or earnings forecasts obtained from an external information source
- A future interest rate determined using interpolation techniques from forward interest rates (derived data)

.A6 Data can come from a wide range of sources. For example, data can be

- generated within the organization or externally,
- obtained from a system that is either within or outside the general or subsidiary ledgers,
- observable in contracts, or
- observable in legislative or regulatory pronouncements.

Scalability (Ref: par. .03)

.A7 Examples of paragraphs that include guidance on how the requirements of this section can be scaled include paragraphs .A21–.A23, .A64, .A68, and .A85.

Key Concepts of This Section

Inherent Risk Factors (Ref: par. .04)

.A8 *Inherent risk factors* are characteristics of events or conditions that affect the susceptibility to misstatement, whether due to fraud or error, of an assertion about a class of transactions, account balance, or disclosure, before consideration of controls.[27]Appendix A, "Inherent Risk Factors," further explains the nature of these inherent risk factors, and their interrelationships, in the context of making accounting estimates and their presentation in the financial statements. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A9 When assessing the risks of material misstatement at the assertion level[28] in addition to estimation uncertainty, complexity, and subjectivity, the auditor also takes into account the degree to which other inherent risk factors included in SAS No. 145 affect susceptibility of assertions to misstatement about the accounting estimate. Such additional inherent risk factors include the following:

- A change in the nature or circumstances of the relevant financial statement items, or requirements of the applicable financial reporting framework, which may give rise to the need for changes in the method, assumptions, or data used to make the accounting estimate
- Susceptibility to misstatement due to management bias or other fraud risk factors insofar as they affect inherent risk, in making the accounting estimate
- Uncertainty, other than estimation uncertainty

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Control Risk

.A10 In assessing control risk at the relevant assertion level in accordance with SAS No. 145, the auditor takes into account whether the auditor plans to test the operating effectiveness of controls. When the auditor is considering whether to test the operating effectiveness of controls, the auditor's evaluation that controls are effectively designed and have been implemented supports an expectation, by the auditor, about the operating effectiveness of the controls in establishing the plan to test them. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

---

[27]Paragraph 12 of SAS No. 145. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

[28]Paragraph 31 of SAS No. 145. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Professional Skepticism (Ref: par. .07)

.A11 Paragraphs .A60, .A95–.A96, .A137, and .A139 are examples of paragraphs that describe ways in which the auditor can exercise professional skepticism. Paragraph .A151 provides guidance on ways in which the auditor's exercise of professional skepticism may be documented and includes examples of specific paragraphs in this section for which documentation may provide evidence of the exercise of professional skepticism.

Concept of "Reasonable" (Ref: par. .08 and .35)

.A12 Other considerations that may be relevant to the auditor's consideration of whether the accounting estimates and related disclosures are reasonable in the context of the applicable financial reporting framework include whether

- the data and assumptions used in making the accounting estimate are consistent with each other and with those used in other accounting estimates or areas of the entity's business activities, and
- the accounting estimate takes into account appropriate information as required by the applicable financial reporting framework.

.A13 The term *applied appropriately* as used in paragraph .08 means in a manner that not only complies with the requirements of the applicable financial reporting framework but, in doing so, reflects judgments that are consistent with the objective of the measurement basis in that framework.

Definitions

Accounting Estimate (Ref: par. .11)

.A14 *Accounting estimates* are monetary amounts that may be related to classes of transactions or account balances recognized or disclosed in the financial statements. Accounting estimates also include monetary amounts included in disclosures or used to make judgments about recognition or disclosure relating to a class of transactions or account balances. For purposes of GAAS, a fair value measurement is a form of accounting estimate.

Auditor's Point Estimate or Auditor's Range (Ref: par. .11)

.A15 An auditor's point estimate or range may be used to evaluate an accounting estimate directly (for example, an impairment provision or the fair value of different types of financial instruments) or indirectly (for example, an amount to be used as a significant assumption for an accounting estimate). A similar approach may be taken by the auditor in developing an amount or range of amounts in evaluating a nonmonetary item of data or an assumption (for example, an estimated useful life of an asset).

Estimation Uncertainty (Ref: par. .11)

.A16 Not all accounting estimates are subject to a high degree of estimation uncertainty. For example, some financial statement items may have an active and open market that provides readily available and reliable information on the prices at which actual exchanges occur. Estimation uncertainty may exist even when the valuation method and data are well-defined. In addition, general economic circumstances prevailing at the time, for example, illiquidity in a particular market, may affect estimation uncertainty.

Management Bias (Ref: par. .11)

.A17 Financial reporting frameworks often call for neutrality, that is, freedom from bias. Estimation uncertainty gives rise to subjectivity in making an accounting estimate. The presence of subjectivity gives rise to the need for judgment by management and the susceptibility to unintentional or intentional management bias. The susceptibility of an accounting estimate to management bias increases with the extent to which there is subjectivity in making the accounting estimate

Outcome of an Accounting Estimate (Ref: par. .11)

.A18 Some accounting estimates, by their nature, do not have an outcome that is relevant for the auditor's work performed in accordance with this section. For example, an accounting estimate may be based on perceptions of market participants at a point in time. Accordingly, the price realized when an asset is sold or a liability is transferred may differ from the related accounting estimate made at the reporting date because, with the passage of time, the market participants' perceptions of value have changed.

Risk Assessment Procedures and Related Activities

Obtaining an Understanding of the Entity and Its Environment (Ref: par. .12)

.A19 SAS No. 145[29] requires the auditor to obtain an understanding of certain matters about the entity and its environment, the applicable financial reporting framework, and the entity's system of internal control. The requirements in paragraph .12 of this section relate more specifically to accounting estimates and build on the broader requirements in SAS No. 145. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A20 The classes of transactions, events, and conditions within the scope of paragraph .12*h* of this section are the same as the classes of transactions, events, and conditions relating to accounting estimates and related disclosures that are subject to SAS No. 145.[30] In obtaining the understanding of the entity's information system as it relates to accounting estimates, the auditor may consider

- whether the accounting estimates arise from the recording of routine and recurring transactions or whether they arise from nonrecurring or unusual transactions.
- how the information system addresses the completeness of accounting estimates and related disclosures, in particular, for accounting estimates related to liabilities.

[29] Paragraphs .12–.25 of section 315. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

[30] Paragraph .19*a* and *d* of section 315. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Scalability

.A21 The nature, timing, and extent of the auditor's procedures to obtain the understanding of the entity and its environment, including the applicable financial reporting framework, and the entity's system of internal control, related to the entity's accounting estimates, may depend, to a greater or lesser degree, on the extent to which the individual matters apply in the circumstances. For example, the entity may have few transactions or other events or conditions that give rise to the need for accounting estimates; the applicable financial reporting requirements may be simple to apply; and there may be no relevant regulatory factors. Further, the accounting estimates may not require significant judgments, and the process for making the accounting estimates may be less complex. In these circumstances, the accounting estimates may be subject to or affected by estimation uncertainty, complexity, subjectivity, or other inherent risk factors to a lesser degree, and there may be fewer identified controls in the control activities component. If so, the auditor's risk assessment procedures are likely to be less extensive and may be performed primarily through inquiries of management with appropriate responsibilities for the financial statements, such as observation of management's process for making the accounting estimate (including when evaluating whether identified controls in that process are designed effectively and when determining whether the control has been implemented). [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A22 By contrast, the accounting estimates may require significant judgments by management, and the process for making the accounting estimates may be complex and involve the use of complex models. In addition, the entity may have a more sophisticated information system and more extensive controls over accounting estimates. In these circumstances, the accounting estimates may be subject to or affected by estimation uncertainty, subjectivity, complexity, or other inherent risk factors to a greater degree. If so, the nature or timing of the auditor's risk assessment procedures are likely to be different, or more extensive, than in the circumstances in paragraph .A21.

.A23 The following considerations may be relevant for entities with only simple businesses, which may include many smaller entities: (Ref: par. .A72 and .A149)

- Processes relevant to accounting estimates may be uncomplicated because the business activities are simple or the required estimates may have a lesser degree of estimation uncertainty.
- Accounting estimates may be generated outside of the general and subsidiary ledgers, controls over their development may be limited, and an owner-manager may have significant influence over their determination. The owner-manager's role in making the accounting estimates may need to be taken into account by the auditor both when identifying the risks of material misstatement and when considering the risk of management bias.

The Entity and Its Environment

.A24 *The entity's transactions and other events or conditions (Ref: par. .12*a*).* Changes in circumstances that may give rise to the need for or changes in accounting estimates may include, for example, whether

- the entity has engaged in new types of transactions,
- terms of transactions have changed, or
- new events or conditions have occurred.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A25 *The requirements of the applicable financial reporting framework (Ref: par. .12*b*).* Obtaining an understanding of the requirements of the applicable financial reporting framework provides the auditor with a basis for discussion with management and, when applicable, those charged with governance about how management has applied the requirements of the applicable financial reporting framework relevant to the accounting estimates, and about the auditor's determination of whether they have been applied appropriately. This understanding also may assist the auditor in communicating with those charged with governance when the auditor considers a significant accounting practice that is acceptable under the applicable financial reporting framework to not be the most appropriate in the circumstances of the entity.[31] [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A26 In obtaining this understanding, the auditor may seek to understand whether

- the applicable financial reporting framework
  - — prescribes certain criteria for the recognition, or methods for the measurement of, accounting estimates,
  - — specifies certain criteria that permit or require measurement at a fair value, for example, by referring to management's intentions to carry out certain courses of action with respect to an asset or liability, or
  - — specifies required or suggested disclosures, including disclosures concerning judgments, assumptions, or other sources of estimation uncertainty relating to accounting estimates, and
- changes in the applicable financial reporting framework require changes to the entity's accounting policies relating to accounting estimates.

.A27 *Regulatory factors (Ref: par. .12*c*).* Obtaining an understanding of regulatory factors, if any, that are relevant to accounting estimates may assist the auditor in identifying applicable regulatory frameworks and in determining whether such regulatory frameworks

[31] Paragraph .12*a* of section 260. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

- address conditions for the recognition, or methods for the measurement, of accounting estimates or provides related guidance thereon,
- specify or provide guidance about disclosures in addition to the requirements of the applicable financial reporting framework,
- provide an indication of areas for which there may be a potential for management bias to meet regulatory requirements, or
- contain requirements for regulatory purposes that are not consistent with requirements of the applicable financial reporting framework, which may indicate potential risks of material misstatement. For example, some regulators may seek to influence minimum levels for expected credit loss provisions that exceed those required by the applicable financial reporting framework.

.A28 *The nature of the accounting estimates and related disclosures that the auditor expects to be included in the financial statements (Ref: par. .12*d*).* Obtaining an understanding of the nature of accounting estimates and related disclosures that the auditor expects to be included in the entity's financial statements assists the auditor in understanding the measurement basis of such accounting estimates and the nature and extent of disclosures that may be relevant. Such an understanding provides the auditor with a basis for discussion with management about how management makes the accounting estimates.

The Entity's System of Internal Control

.A29 *The nature and extent of oversight and governance (Ref: par. .12*e*).* In applying SAS No. 145,[32] the auditor's understanding of the nature and extent of oversight and governance that the entity has in place over management's process for making accounting estimates may be important to the auditor's required evaluation about whether

- management, with the oversight of those charged with governance, has created and maintained a culture of honesty and ethical behavior, and
- the control environment provides an appropriate foundation for the other components of the system of internal control considering the nature and size of the entity, and
- control deficiencies identified in the control environment undermine the other components of the system of internal control.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A30 The auditor may obtain an understanding of whether those charged with governance

- have the skills or knowledge to understand the characteristics of a particular method or model to make accounting estimates, or the risks related to the accounting estimate, for example, risks related to the method or IT used in making the accounting

[32]Paragraph 21*a* of SAS No. 145. [Footnote renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

estimates, or the susceptibility of the accounting estimate to misstatement due to management bias or fraud,

- have the skills and knowledge to understand whether management made the accounting estimates in accordance with the applicable financial reporting framework,
- have the information required to evaluate on a timely basis how management made the accounting estimates and the authority to call into question management's actions when those actions appear to be inadequate or inappropriate,
- oversee management's process for making the accounting estimates, including the use of models, or
- oversee the monitoring activities undertaken by management. This may include supervision and review procedures designed to detect and correct any deficiencies in the design or operating effectiveness of controls over the accounting estimates.

.A31 Obtaining an understanding of the oversight by those charged with governance may be important when there are accounting estimates that

- require significant judgment by management to address subjectivity,
- have high estimation uncertainty,
- are complex to make, for example, because of the extensive use of IT, large volumes of data, or the use of multiple data sources or assumptions with complex interrelationships,
- had or ought to have had a change in the method, assumptions, or data compared to previous periods, or
- involve significant assumptions.

.A32 *Management's application of specialized skills or knowledge, including the use of management's specialists (Ref: par. .12f).* The auditor may consider whether the following circumstances increase the likelihood that management needs to engage a specialist:[33]

- The specialized nature of the matter requiring estimation, for example, the accounting estimate may involve measurement of mineral or hydrocarbon reserves in extractive industries or the evaluation of the likely outcome of applying complex contractual terms
- The complex nature of the models required to apply the relevant requirements of the applicable financial reporting framework, as may be the case in certain measurements, such as level 3 fair values[34]

[33]See paragraph .27 of section 501 as amended by SAS No. 142. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

[34]See, for example, FASB *Accounting Standards Codification* (ASC) 820, *Fair Value Measurement*. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

- The unusual or infrequent nature of the condition, transaction, or event requiring an accounting estimate

.A33 *The entity's risk assessment process (Ref: par. .12*g*).* Understanding how the entity's risk assessment process identifies and addresses risks relating to accounting estimates may assist the auditor in considering changes in the following:

- The requirements of the applicable financial reporting framework related to the accounting estimates
- The availability or nature of data sources that are relevant to making the accounting estimates or that may affect the reliability of the data used
- The entity's information system or IT environment
- Key personnel

.A34 Matters that the auditor may consider in obtaining an understanding of how management identifies and addresses the susceptibility to misstatement due to management bias or fraud in making accounting estimates, include whether, and if so, how, management does the following:

- Pays particular attention to selecting or applying the methods, assumptions, and data used in making accounting estimates
- Monitors key performance indicators that may indicate unexpected or inconsistent performance compared with historical or budgeted performance or with other known factors
- Identifies financial or other incentives that may be a motivation for bias
- Monitors the need for changes in the methods, significant assumptions, or the data used in making accounting estimates
- Establishes appropriate oversight and review of models used in making accounting estimates
- Requires documentation of the rationale for or an independent review of significant judgments made in making accounting estimates

.A35 *The entity's information system relating to accounting estimates (Ref: par. .12*h*(i)).* During the audit, the auditor may identify classes of transactions, events, or conditions that give rise to the need for accounting estimates and related disclosures that management failed to identify. SAS No. 145 addresses circumstances in which the auditor identifies risks of material misstatement that management failed to identify, including considering the implications for the auditor's evaluation of the entity's risk assessment process.[35] [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

[35] Paragraph .18 of section 315. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

.A36 *Management's identification of the relevant methods, assumptions, and sources of data (Ref: par. .12*h*(ii)(1)).* If management has changed the method for making an accounting estimate, considerations may include whether the new method is, for example, more appropriate; is itself a response to changes in the environment or circumstances affecting the entity or to changes in the requirements of the applicable financial reporting framework or regulatory environment; or whether management has another valid reason.

.A37 If management has not changed the method for making an accounting estimate, considerations may include whether the continued use of the previous methods, assumptions, and data is appropriate in view of the current environment or circumstances.

.A38 *Methods (Ref: par. .12*h*(ii)(1)(a)).* The applicable financial reporting framework may prescribe the method to be used in making an accounting estimate. In many cases, however, the applicable financial reporting framework does not prescribe a single method, or the required measurement basis prescribes, or allows, the use of alternative methods.

.A39 *Models.* Management may design and implement specific controls around models used for making accounting estimates, whether it's management's own model or an external model. When the model itself has an increased level of complexity or subjectivity, such as an expected credit loss model or a fair value model using level 3 inputs, controls that address the risks of material misstatement related to such complexity or subjectivity may be more likely to be identified in accordance with SAS No. 145.[36] When complexity in relation to models is present, controls over data integrity are also more likely to be identified controls in accordance with SAS No. 145. Factors that may be appropriate for the auditor to consider in obtaining an understanding of the model and related identified controls include the following:

- How management determines the relevance and accuracy of the model.
  - — The validation or back-testing of the model, including whether the model is validated prior to use and revalidated at regular intervals to determine whether it remains suitable for its intended use. The entity's validation of the model may include evaluation of
    - the model's theoretical soundness,
    - the model's mathematical integrity, and
    - the accuracy and completeness of the data and the appropriateness of data and assumptions used in the model.
- How the model is appropriately changed or adjusted on a timely basis for changes in market or other conditions and whether there are appropriate change control policies over the model.
- Whether adjustments, also referred to as *overlays* in certain industries, are made to the output of the model and whether such adjustments are appropriate in the circumstances in accordance with the requirements of the applicable financial

[36]Paragraph 27 and 29*b* of SAS No. 145. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

reporting framework. When the adjustments are not appropriate, such adjustments may be indicators of possible management bias.

- Whether the model is adequately documented, including its intended applications, limitations, key parameters, required data and assumptions, and the results of any validation performed on it and the nature of and basis for any adjustments made to its output.

Examples of valuation models may include the present value of expected future cash flows, option-pricing models, matrix pricing, option-adjusted spread models, and fundamental analysis. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A40 *Assumptions (Ref: par. .12*h*(ii)(1)(b)).* Matters that the auditor may consider in obtaining an understanding of how management selected the assumptions used in making the accounting estimates include, for example, the following:

- The basis for management's selection and the documentation supporting the selection of the assumption. The applicable financial reporting framework may provide criteria or guidance to be used in the selection of an assumption.
- How management assesses whether the assumptions are relevant and complete.
- When applicable, how management determines that the assumptions are consistent with each other, with those used in other accounting estimates or areas of the entity's business activities, or with other matters that are
  - — within the control of management (for example, assumptions about the maintenance programs that may affect the estimation of an asset's useful life) and whether they are consistent with the entity's business plans and the external environment, and
  - — outside the control of management (for example, assumptions about interest rates, mortality rates, or potential judicial or regulatory actions).
- The requirements of the applicable financial reporting framework related to the disclosure of assumptions.

.A41 With respect to fair value accounting estimates, assumptions vary in terms of the sources of the data and the basis for the judgments to support them, as follows:

a. Those that reflect what market participants would use in pricing an asset or liability, developed based on market data obtained from sources independent of the reporting entity

b. Those that reflect the entity's own judgments about what assumptions market participants would use in pricing the asset or liability, developed based on the best data available in the circumstances

In practice, however, the distinction between (*a*) and (*b*) may not always be apparent, and distinguishing between them depends on understanding the sources of data and the basis for the judgments that support the assumption. Further, it may be necessary for management to select from a number of different assumptions used by different market participants.

.A42 Assumptions used in making an accounting estimate are referred to as *significant assumptions* in this section if a reasonable variation in the assumption would materially affect the measurement of the accounting estimate. A sensitivity analysis may be useful in demonstrating the degree to which the measurement varies based on one or more assumptions used in making the accounting estimate.

.A43 *Inactive or illiquid markets.* When markets are inactive or illiquid, the auditor's understanding of how management selects assumptions may include understanding the following:

- Whether management has implemented appropriate policies for adapting the application of the method in such circumstances. Such adaptation may include making model adjustments or developing new models that are appropriate in the circumstances.
- Whether management has resources with the necessary skills or knowledge to adapt or develop a model, if necessary, on an urgent basis, including selecting the valuation technique that is appropriate in such circumstances.
- Whether management has the resources to determine the range of outcomes, given the uncertainties involved, for example, by performing a sensitivity analysis.
- Whether management has the means to assess how, when applicable, the deterioration in market conditions has affected the entity's operations, environment, and relevant business risks and the implications for the entity's accounting estimates, in such circumstances.
- Whether management has an appropriate understanding of how the price data, and the relevance thereof, from particular external information sources may vary in such circumstances.

.A44 *Data (Ref: par. .12*h*(ii)(1)(c)).* Matters that the auditor may consider in obtaining an understanding of how management selects the data on which the accounting estimates are based include the following:

- The nature and source of the data, including information obtained from an external information source
- How management evaluates whether the data is appropriate
- The accuracy and completeness of the data
- The consistency of the data used with data used in previous periods

- The complexity of the IT applications or other aspects of the entity's IT environment used to obtain and process the data, including when this involves handling large volumes of data
- How the data is obtained, transmitted, and processed and how its integrity is maintained

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A45 *How management understands and addresses estimation uncertainty (Ref: par. .12*h*(2)–(3)).* Matters that may be appropriate for the auditor to consider relating to whether and how management understands the degree of estimation uncertainty include, for example, the following:

- Whether, and if so, how, management identified alternative methods, significant assumptions, or sources of data that are appropriate in the context of the applicable financial reporting framework
- Whether, and if so, how, management considered alternative outcomes by, for example, performing a sensitivity analysis to determine the effect of changes in the significant assumptions or the data used in making the accounting estimate

.A46 The requirements of the applicable financial reporting framework may specify the approach to selecting management's point estimate from the reasonably possible measurement outcomes. Financial reporting frameworks may recognize that the appropriate amount is one that is appropriately selected from the reasonably possible measurement outcomes and, in some cases, may indicate that the most relevant amount may be in the central part of that range.

.A47 For example, with respect to fair value estimates, FASB *Accounting Standards Codification* (ASC) 820, *Fair Value Measurment*,[37] indicates that if multiple valuation techniques are used to measure fair value, the results (that is, respective indications of fair value) should be evaluated considering the reasonableness of the range of values indicated by those results. A fair value measurement is the point within that range that is most representative of fair value in the circumstances. In other cases, such as estimates for loss contingencies, FASB ASC 450, *Contingencies*,[38] indicates that when recognition criteria are met and the reasonably estimable loss is a range, if no amount in the range is a better estimate than any other amount, the minimum amount in the range is required to be accrued.

.A48 The applicable financial reporting framework may prescribe disclosures or disclosure objectives related to accounting estimates, and some entities may choose to disclose additional information. These disclosures or disclosure objectives may address, for example, the following:

[37]Paragraph 24B of FASB ASC 820-10-35. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]
[38]Paragraph 1 of FASB ASC 450-20-30. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

- The method of estimation used, including any applicable model and the basis for its selection
- Information that has been obtained from models, or from other calculations used to determine estimates recognized or disclosed in the financial statements, including information relating to the underlying data and assumptions used in those models, such as
  - — assumptions developed internally, or
  - — data, such as interest rates, that are affected by factors outside the control of the entity
- The effect of any changes to the method of estimation from the prior period
- The sources of estimation uncertainty
- Fair value information
- Information about sensitivity analyses derived from financial models that demonstrates that management has considered alternative assumptions

.A49 In some cases, the applicable financial reporting framework may require specific disclosures regarding estimation uncertainty. Examples follow:

- The disclosure of information about the assumptions made about the future and other major sources of estimation uncertainty that give rise to a higher likelihood or magnitude of material adjustment to the carrying amounts of assets and liabilities after the period end. Such requirements may be described using terms such as *key sources of estimation uncertainty* or *critical accounting estimates*. They may relate to accounting estimates that require management's most difficult, subjective, or complex judgments. Such judgments may be more subjective and complex, and accordingly, the potential for a consequential material adjustment to the carrying amounts of assets and liabilities may increase, with the number of items of data and assumptions affecting the possible future resolution of the estimation uncertainty. Information that may be disclosed includes the following:
  - — The nature of the assumption or other source of estimation uncertainty
  - — The sensitivity of carrying amounts to the methods and assumptions used, including the reasons for the sensitivity
  - — The expected resolution of an uncertainty and the range of reasonably possible outcomes in respect of the carrying amounts of the assets and liabilities affected
  - — An explanation of changes made to past assumptions concerning those assets and liabilities, if the uncertainty remains unresolved
- The disclosure of the range of possible outcomes and the assumptions used in determining the range.
- The disclosure of specific information, such as

— information regarding the significance of fair value accounting estimates to the entity's financial position and performance, and

— disclosures regarding market inactivity or illiquidity.

- Qualitative disclosures, such as the exposures to risk, and how they arise; the entity's objectives, policies, and procedures for managing the risk and the methods used to measure the risk; and any changes from the previous period of these qualitative concepts.

- Quantitative disclosures, such as the extent to which the entity is exposed to risk, based on information provided internally to the entity's key management personnel, including credit risk, liquidity risk, and market risk.

.A50 *Identified controls over management's process for making accounting estimates (Ref: par. .12*i*).* The auditor's judgment in identifying controls in the control activities component and, therefore, the need to evaluate the design of those controls and determine whether they have been implemented, relates to management's process described in paragraph .12*h*(ii). The auditor may not identify controls in relation to all aspects of paragraph .12*h*(ii). [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A51 As part of identifying controls, and evaluating their design and determining whether they have been implemented,[39] the auditor may consider the following:

- How management determines the appropriateness of the data used to develop the accounting estimates, including when management uses an external information source or data from outside the general and subsidiary ledgers.

- The review and approval of accounting estimates, including the assumptions or data used in their development, by appropriate levels of management and, where appropriate, those charged with governance.

- The segregation of duties between those responsible for making the accounting estimates and those committing the entity to the related transactions, including whether the assignment of responsibilities appropriately takes account of the nature of the entity and its products or services. For example, in the case of a large financial institution, relevant segregation of duties may consist of an independent function responsible for estimation and validation of fair value pricing of the entity's financial products staffed by individuals whose remuneration is not tied to such products.

- The effectiveness of the design of the controls. Generally, it may be more difficult for management to design controls that address subjectivity and estimation uncertainty in a manner that effectively prevents, or detects and corrects, material misstatements than it is to design controls that address complexity. Controls that address subjectivity and estimation uncertainty may need to include more manual elements, which may be less reliable than automated controls as they can be more easily bypassed, ignored, or

[39] Paragraph 30 of SAS No. 145. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

overridden by management. The design effectiveness of controls addressing complexity may vary depending on the reason for and the nature of the complexity. For example, it may be easier to design more effective controls related to a method that is routinely used or over the integrity of data.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A52 When management makes extensive use of IT in making an accounting estimate, identified controls in the control activities component are likely to include general IT controls and information-processing controls. Such controls may address risks related to the following:

- Whether the IT application or other aspects of the IT environment system has the capability and are appropriately configured to process large volumes of data.
- Complex calculations in applying a method. When diverse IT applications are required to process complex transactions, regular reconciliations between the IT applications are made, in particular, when the IT applications do not have automated interfaces or may be subject to manual intervention.
- Whether the design and calibration of models is periodically evaluated.
- The complete and accurate extraction of data regarding accounting estimates from the entity's records or from external information sources.
- Data, including the complete and accurate flow of data through the entity's information system, the appropriateness of any modification to the data used in making accounting estimates, and the maintenance of the integrity and security of the data; when using external information sources, risks related to processing or recording the data.
- Whether management has controls around access, change, and maintenance of individual models to maintain a strong audit trail of the accredited versions of models and to prevent unauthorized access or amendments to those models.
- Whether there are appropriate controls over the transfer of information relating to accounting estimates into the general ledger, including appropriate controls over journal entries.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A53 In some entities, the term *governance* may be used to describe activities within the control environment, the entity's process to monitor the system of internal control, and other components of the system of internal control, as described in SAS No. 145.[40] [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

[40] Paragraph .A78 of section 315. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

.A54 For entities with an internal audit function, its work may be particularly helpful to the auditor in obtaining an understanding of the following:

- The nature and extent of management's use of accounting estimates
- The design and implementation of controls that address the risks related to the data, assumptions, and models used to make the accounting estimates
- The aspects of the entity's information system that generate the data on which the accounting estimates are based
- How new risks relating to accounting estimates are identified, assessed, and managed

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Reviewing the Outcome or Re-Estimation of Previous Accounting Estimates (Ref: par. .13)

.A55 A review of the outcome or re-estimation of previous accounting estimates (retrospective review) assists in identifying and assessing the risks of material misstatement when previous accounting estimates have an outcome through transfer or realization of the asset or liability in the current period or are re-estimated for the purpose of the current period. Through performing a retrospective review, the auditor may obtain the following:

- Information regarding the effectiveness of management's previous estimation process, from which the auditor can obtain audit evidence about the likely effectiveness of management's current process.
- Audit evidence of matters, such as the reasons for changes that may be required to be disclosed in the financial statements.
- Information regarding the complexity, subjectivity, or estimation uncertainty pertaining to the accounting estimates.
- Information regarding the susceptibility of accounting estimates to, or that may be an indicator of, possible management bias. The auditor's professional skepticism assists in identifying such circumstances or conditions and in determining the nature, timing, and extent of further audit procedures.

.A56 A retrospective review may provide audit evidence that supports the identification and assessment of the risks of material misstatement in the current period. Such a retrospective review may be performed for accounting estimates made for the prior period's financial statements or may be performed over several periods or a shorter period (such as half-yearly or quarterly). In some cases, a retrospective review over several periods may be appropriate when the outcome of an accounting estimate is resolved over a longer period, or when a history of outcomes provides meaningful information or evidence of a trend.

.A57 A retrospective review of management judgments and assumptions related to significant accounting estimates is required by section 240, *Consideration of Fraud in* *a Financial Statement Audit*.[41] As a practical matter, the auditor's review of previous accounting estimates as a risk assessment procedure in accordance with this section may be carried out in conjunction with the review required by section 240.

.A58 Based on the auditor's previous assessment of the risks of material misstatement, for example, if inherent risk is assessed as higher for one or more risks of material misstatement, the auditor may judge that a more detailed retrospective review is required. As part of the detailed retrospective review, the auditor may pay particular attention, when practicable, to the effect of data and significant assumptions used in making the previous accounting estimates. On the other hand, for example, for accounting estimates that arise from the recording of routine and recurring transactions, the auditor may judge that the application of analytical procedures as risk assessment procedures is sufficient for purposes of the review.

.A59 The measurement objective for fair value accounting estimates and other accounting estimates, based on current conditions at the measurement date, deals with perceptions about value at a point in time, which may change significantly and rapidly as the environment in which the entity operates changes. The auditor may, therefore, focus the review on obtaining information that may be relevant to identifying and assessing risks of material misstatement. For example, in some cases, obtaining an understanding of changes in market participant assumptions that affected the outcome of a previous period's fair value accounting estimates may be unlikely to provide relevant audit evidence. In this case, audit evidence may be obtained by understanding the outcomes of assumptions (such as a cash flow projection) and understanding the effectiveness of management's prior estimation process that supports the identification and assessment of the risk of material misstatement in the current period.

.A60 A difference between the outcome of an accounting estimate and the amount recognized in the previous period's financial statements does not necessarily represent a misstatement of the previous period's financial statements. For example, an entity assumed a forecasted unemployment rate in the development of a loan loss estimate, and the actual losses and unemployment rate differed from that assumed. A difference may represent a misstatement if, for example, the difference arises from information that was available to management when the previous period's financial statements were finalized or that could reasonably be expected to have been obtained and taken into account in the context of the applicable financial reporting framework.[42] Such a difference may call into question management's process for taking information into account in making the accounting estimate. As a result, the auditor may need to reconsider his or her risk assessment or may determine that more persuasive audit evidence needs to be obtained about the matter. Many financial reporting frameworks contain guidance on distinguishing between changes in accounting estimates that constitute misstatements and changes that do not, and the accounting treatment required to be followed in each case.

---

[42] Paragraph .15 of section 560, *Subsequent Events*. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

Specialized Skills or Knowledge (Ref: par. .14)

.A61 Matters that may affect the auditor's determination of whether the engagement team requires specialized skills or knowledge, include, for example, the following:[43]

- The nature of the accounting estimates for a particular business or industry (for example, mineral deposits, agricultural assets, complex financial instruments, and insurance contract liabilities)
- The degree of estimation uncertainty
- The complexity of the method or model used
- The complexity of the requirements of the applicable financial reporting framework relevant to accounting estimates, including whether there are areas known to be subject to differing interpretation or practice or areas where there are inconsistencies in how accounting estimates are made
- The procedures that the auditor intends to undertake in responding to assessed risks of material misstatement
- The need for judgment about matters not specified by the applicable financial reporting framework
- The degree of judgment needed to select data and assumptions
- The complexity and extent of the entity's use of IT in making accounting estimates

The nature, timing, and extent of the involvement of individuals with specialized skills and knowledge may vary throughout the audit.

.A62 The auditor may not possess the specialized skills or knowledge necessary when the matter involved is in a field other than accounting or auditing (for example, valuation skills) and may need to use an auditor's specialist.[44]

.A63 Many accounting estimates do not require the application of specialized skills or knowledge. For example, specialized skills or knowledge may not be needed for a simple inventory obsolescence calculation. However, for example, for expected credit losses of a banking institution or an insurance contract liability for an insurance entity, the auditor is likely to conclude that it is necessary to apply specialized skills or knowledge.

Identifying and Assessing the Risks of Material Misstatement (Ref: par. .04 and .15)

.A64 Identifying and assessing risks of material misstatement at the assertion level relating to accounting estimates includes not only accounting estimates that are recognized

---

[43]Paragraph .16 of section 220A, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, and paragraph .08*e* of section 300, *Planning an Audit*. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

[44]See section 620, *Using the Work of an Auditor's Specialist*. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

in the financial statements but also those that are included in the notes to the financial statements. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A65 SAS No. 145 requires a separate assessment of inherent risk and control risk to provide a basis for designing and performing further audit procedures to respond to the risks of material misstatement at the assertion level,[45,46] including significant risks, in accordance with section 330. See paragraphs .A148–.A149 of this section for discussion about documentation of inherent risk factors. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A66 As discussed in paragraph .04 of this section, section 200[47] explains that inherent risk is influenced by inherent risk factors. In identifying the risks of material misstatement and in assessing inherent risk for accounting estimates in accordance with SAS No. 145, the auditor is required to take into account the inherent risk factors that affect the susceptibility of assertions to misstatement and how they do so. The auditor's consideration of the inherent risk factors may also provide information to be used in the following:

- Assessing the likelihood and magnitude of misstatement (such as, where inherent risk is assessed on the spectrum of inherent risk)
- Determining the reasons for the assessment given to the risks of material misstatement at the relevant assertion level, and that the auditor's further audit procedures in accordance with paragraph .18 of this section are responsive to those reasons

The interrelationships between the inherent risk factors are further explained in appendix A. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A67 The reasons for the auditor's assessment of inherent risk at the relevant assertion level may result from one or more of the inherent risk factors of estimation uncertainty, complexity, subjectivity, or other inherent risk factors. Examples follow:

- Accounting estimates of expected credit losses are likely to be complex because the expected credit losses cannot be directly observed and may require the use of a complex model. The model may use a complex set of historical data and assumptions about future developments in a variety of entity-specific scenarios that may be difficult to predict. Accounting estimates for expected credit losses are also likely to be subject to high estimation uncertainty and significant subjectivity in making judgments about future events or conditions. Similar considerations apply to insurance contract liabilities.

---

[45][Footnote renumbered and deleted by the issuance of SAS No. 145, October 2021.]

[46]Paragraphs 31 and 34 of SAS No. 145. [Footnote renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

[47]Paragraph .A42 of section 200. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

- An accounting estimate for an obsolescence provision for an entity with a wide range of different inventory types may require complex systems and processes but may involve little subjectivity, and the degree of estimation uncertainty may be low, depending on the nature of the inventory.
- Other accounting estimates may not be complex to make but may have high estimation uncertainty and require significant judgment, for example, an accounting estimate that requires a single critical judgment about a liability, the amount of which is contingent on the outcome of the litigation.

.A68 The relevance and significance of inherent risk factors may vary from one estimate to another. Accordingly, the inherent risk factors may, either individually or in combination, affect simple accounting estimates to a lesser degree, and the auditor may identify fewer risks or assess inherent risk close to the lower end of the spectrum of inherent risk. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A69 Conversely, the inherent risk factors may, either individually or in combination, affect complex accounting estimates to a greater degree and may lead the auditor to assess inherent risk at the higher end of the spectrum of inherent risk. For these accounting estimates, the auditor's consideration of the effects of the inherent risk factors is likely to directly affect the number and nature of identified risks of material misstatement, the assessment of such risks, and ultimately, the persuasiveness of the audit evidence needed in responding to the assessed risks. Also, for these accounting estimates, the auditor's application of professional skepticism may be particularly important.

.A70 Events occurring after the date of the financial statements may provide additional information relevant to the auditor's assessment of the risks of material misstatement at the relevant assertion level. For example, the outcome of an accounting estimate may become known during the audit. In such cases, the auditor may assess or revise the assessment of the risks of material misstatement at the relevant assertion level,[48] regardless of how inherent risk factors affect susceptibility of assertions to misstatement relating to the accounting estimate. Events occurring after the date of the financial statements also may influence the auditor's selection of the approach to testing the accounting estimate in accordance with paragraph .18. For example, for a simple bonus accrual that is based on a straightforward percentage of compensation for selected employees, the auditor may conclude that there is relatively little complexity or subjectivity in making the accounting estimate and, therefore, may assess inherent risk at the relevant assertion level close to the lower end of the spectrum of inherent risk. The payment of the bonuses subsequent to period-end may provide sufficient appropriate audit evidence regarding the assessed risks of material misstatement at the relevant assertion level. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

[48]Paragraph 37 of SAS No. 145. [Footnote renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A71 The auditor's assessment of control risk may be done in different ways depending on preferred audit techniques or methodologies. The control risk assessment may be expressed using qualitative categories (for example, control risk assessed as maximum, moderate, or minimum) or in terms of the auditor's expectation of how effective the controls are in addressing the identified risk, that is, the planned reliance on the effective operation of controls. For example, if control risk is assessed as maximum, the auditor contemplates no reliance on the effective operation of controls. If control risk is assessed at less than maximum, the auditor contemplates reliance on the effective operation of controls.

Estimation Uncertainty (Ref: par. .15a)

.A72 In taking into account the degree to which the accounting estimate is subject to estimation uncertainty, the auditor may consider the following:

- Whether the applicable financial reporting framework requires
  - — the use of a method to make the accounting estimate that inherently has a high level of estimation uncertainty. For example, the financial reporting framework may require the use of unobservable inputs.
  - — the use of assumptions that inherently have a high level of estimation uncertainty, such as assumptions with a long forecast period, assumptions that are based on data that are unobservable and, therefore, difficult for management to develop, or the use of various assumptions that are interrelated.
  - — disclosures about estimation uncertainty.
- The business environment. An entity may be active in a market that experiences turmoil or possible disruption (for example, from major currency movements or inactive markets) and the accounting estimate may, therefore, be dependent on data that is not readily observable.
- Whether it is possible (or practicable, insofar as permitted by the applicable financial reporting framework) for management
  - — to make a precise and reliable prediction about the future realization of a past transaction (for example, the amount that will be paid under a contingent contractual term) or about the incidence and impact of future events or conditions (for example, the amount of a future credit loss or the amount at which an insurance claim will be settled and the timing of its settlement), or
  - — to obtain precise and complete information about a present condition (for example, information about valuation attributes that would reflect the perspective of market participants at the date of the financial statements, to develop a fair value estimate).

.A73 The size of the amount recognized or disclosed in the financial statements for an accounting estimate is not, in itself, an indicator of its susceptibility to misstatement because, for example, the accounting estimate may be understated.

.A74 In some circumstances, the estimation uncertainty may be so high that a reasonable accounting estimate cannot be made. The applicable financial reporting framework may preclude recognition of an item in the financial statements or its measurement at fair value. In such cases, there may be risks of material misstatement that relate not only to whether an accounting estimate should be recognized, or whether it should be measured at fair value, but also to the reasonableness of the disclosures. With respect to such accounting estimates, the applicable financial reporting framework may require disclosure of the accounting estimates and the estimation uncertainty associated with them (see paragraphs .A112–.A113 and .A143–.A144).

.A75 In some cases, the estimation uncertainty relating to an accounting estimate may cast significant doubt about the entity's ability to continue as a going concern. Section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, establishes requirements and provides guidance in such circumstances.

Complexity or Subjectivity (Ref: par. .15b)

The Degree to Which Complexity Affects the Selection and Application of the Method

.A76 In taking into account the degree to which the selection and application of the method used in making the accounting estimate are affected by complexity, the auditor may consider the following:

- The need for specialized skills or knowledge by management, which may indicate that the method used to make an accounting estimate is inherently complex and, therefore, the accounting estimate may have a greater susceptibility to material misstatement. There may be a greater susceptibility to material misstatement when management has developed a model internally and has relatively little experience in doing so or uses a model that applies a method that is not established or commonly used in a particular industry or environment.
- The nature of the measurement basis required by the applicable financial reporting framework, which may result in the need for a complex method that requires multiple sources of historical and forward-looking data or assumptions, with multiple interrelationships between them. For example, an expected credit loss provision may require judgments about future credit repayments and other cash flows, based on consideration of historical experience data and the application of forward-looking assumptions. Similarly, the valuation of an insurance contract liability may require judgments about future insurance contract payments to be projected based on historical experience and current and assumed future trends.

The Degree to Which Complexity Affects the Selection and Application of the Data

.A77 In taking into account the degree to which the selection and application of the data used in making the accounting estimate are affected by complexity, the auditor may consider the following:

- The complexity of the process to derive the data, taking into account the relevance and reliability of the data source. Data from certain sources may be more reliable than from others. Also, for confidentiality or proprietary reasons, some external information sources will not (or not fully) disclose information that may be relevant in considering the reliability of the data they provide, such as the sources of the underlying data they used or how it was accumulated and processed.

- The inherent complexity in maintaining the integrity of the data. When there is a high volume of data and multiple sources of data, there may be inherent complexity in maintaining the integrity of data that is used to make an accounting estimate.
- The need to interpret complex contractual terms. For example, the determination of cash inflows or outflows arising from a commercial supplier or customer rebates may depend on very complex contractual terms that require specific experience or competence to understand or interpret.

The Degree to Which Subjectivity Affects the Selection and Application of the Method, Assumptions, or Data

.A78 In taking into account the degree to which the selection and application of method, assumptions, or data are affected by subjectivity, the auditor may consider the following:

- The degree to which the applicable financial reporting framework does not specify the valuation approaches, concepts, techniques, and factors to use in the estimation method.
- The uncertainty regarding the amount or timing, including the length of the forecast period. The amount and timing is a source of inherent estimation uncertainty and gives rise to the need for management judgment in selecting a point estimate, which, in turn, creates an opportunity for management bias. For example, an accounting estimate that incorporates forward-looking assumptions may have a high degree of subjectivity, which may be susceptible to management bias.

Other Inherent Risk Factors (Ref: par. .15b)

.A79 The degree of subjectivity associated with an accounting estimate influences the susceptibility of the accounting estimate to misstatement due to management bias or other fraud risk factors insofar as they affect inherent risk. For example, when an accounting estimate is subject to a high degree of subjectivity, the accounting estimate is likely to be more susceptible to misstatement due to management bias or fraud, and this may result in a wide range of possible measurement outcomes. Management may select a point estimate from that range that is inappropriate in the circumstances, or that is inappropriately influenced by unintentional or intentional management bias, and that is, therefore, misstated. For continuing audits, indicators of possible management bias identified during the audit of preceding periods may influence the planning and risk assessment procedures in the current period. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

Significant Risks (Ref: par. .16)

.A80 The auditor's assessment of inherent risk, which takes into account the degree to which an accounting estimate is subject to or affected by estimation uncertainty, complexity, subjectivity, or other inherent risk factors, assists the auditor in determining whether any of the risks of material misstatement identified and assessed are a significant risk.

Responses to the Assessed Risks of Material Misstatement

The Auditor's Further Audit Procedures (Ref: par. .17)

.A81 In designing and performing further audit procedures, the auditor may use any of the three testing approaches (individually or in combination) listed in paragraph .17. For example, when several assumptions are used to make an accounting estimate, the auditor may decide to use a different testing approach or combination of testing approaches for each assumption tested.

Obtaining Relevant Audit Evidence, Whether Corroborative or Contradictory

.A82 Audit evidence comprises both information that supports and corroborates management's assertions and any information that contradicts such assertions.[49] Obtaining audit evidence in an unbiased manner may involve obtaining evidence from multiple sources within and outside the entity. However, the auditor is not required to perform an exhaustive search to identify all possible sources of audit evidence.

.A83 Section 330 requires the auditor to obtain more persuasive audit evidence the higher the auditor's assessment of the risk.[50] Therefore, the consideration of the nature or quantity of the audit evidence may be more important when inherent risks relating to an accounting estimate is assessed at the higher end of the spectrum of inherent risk.

.A84 *Scalability.* The nature, timing, and extent of the auditor's further audit procedures are affected by, for example, the following:

- The assessed risks of material misstatement, which affect the persuasiveness of the audit evidence needed and influence the approach the auditor selects to audit an accounting estimate. For example, the assessed risks of material misstatement relating to the existence or valuation assertions may be lower for a straightforward accrual for bonuses that are paid to employees shortly after period-end. In this situation, it may be more practical for the auditor to obtain sufficient appropriate audit evidence by evaluating events occurring up to the date of the auditor's report, rather than through other testing approaches.
- The reasons for the assessed risks of material misstatement.

When the Auditor Intends to Rely on the Operating Effectiveness of Relevant Controls (Ref: par. .18)

.A85 Testing the operating effectiveness of controls may be appropriate when inherent risk is assessed as higher on the spectrum of inherent risk, including for significant risks. This

[49] Paragraphs .A35–.A38 of section 500. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

[50] Paragraph .07*b* and .A20 of section 330. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

may be the case when the accounting estimate is subject to or affected by a high degree of complexity. When the accounting estimate is affected by a high degree of subjectivity and, therefore, requires significant judgment by management, inherent limitations in the effectiveness of the design of controls may lead the auditor to focus more on substantive procedures than on testing the operating effectiveness of controls. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2023, by SAS No. 145.]

.A86 In determining the nature, timing, and extent of testing of the operating effectiveness of controls relating to accounting estimates, the auditor may consider factors such as the following:

- The nature, frequency, and volume of transactions
- The effectiveness of the design of the controls, including whether controls are appropriately designed to respond to the assessed inherent risk, and the strength of governance
- The importance of particular controls to the overall control objectives and processes in place at the entity, including the sophistication of the information system to support transactions
- The monitoring of controls and identified deficiencies in internal control
- The nature of the risks the controls are intended to address, for example, controls related to the exercise of judgment compared with controls over supporting data
- The competency of those involved in the control activities
- The frequency of performance of the control activities
- The evidence of performance of control activities

Section 940, *An Audit of Internal Control Over Financial Reporting That Is Integrated With an Audit of Financial Statements*, establishes requirements and provides guidance that applies only when an auditor is engaged to perform an audit of internal control over financial reporting that is integrated with an audit of financial statements. However, section 940 includes guidance and examples of factors that affect the risk associated with a control that may be useful information when determining the nature, timing, and extent of testing of the operating effectiveness of controls relating to accounting estimates.[51]

Substantive Procedures Alone Cannot Provide Sufficient Appropriate Audit Evidence

.A87 When management makes extensive use of IT to conduct business, it may be more likely that there are risks related to certain accounting estimates for which substantive procedures alone cannot provide sufficient appropriate audit evidence.

[51]Paragraph .A66 of section 940, *An Audit of Internal Control Over Financial Reporting That Is Integrated With an Audit of Financial Statements*. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

.A88 Circumstances when risks for which substantive procedures alone cannot provide sufficient appropriate audit evidence at the relevant assertion level may exist include

- when controls are necessary to mitigate risks relating to the initiation, recording, processing, or reporting of information obtained from outside of the general and subsidiary ledgers.
- information supporting one or more assertions is electronically initiated, recorded, processed, or reported. This is likely to be the case when there is a high volume of transactions or data, or a complex model is used, requiring the extensive use of IT to ensure the accuracy and completeness of the information. A complex expected credit loss provision may be required for a financial institution or utility entity. For example, in the case of a utility entity, the data used in developing the expected credit loss provision may comprise many small balances resulting from a high volume of transactions. In these circumstances, the auditor may conclude that sufficient appropriate audit evidence cannot be obtained without testing controls around the model used to develop the expected credit loss provision.

In such cases, the sufficiency and appropriateness of the audit evidence may depend on the effectiveness of controls over the accuracy and completeness of the information.

.A89 As part of the audit of the financial statements for certain entities, the auditor also may be required by law or regulation to undertake additional procedures in relation to, or to provide an assurance conclusion on, internal control. In these and other similar circumstances, the auditor may be able to use information obtained in performing such procedures as audit evidence, subject to determining whether subsequent changes have occurred that may affect its relevance to the audit.

Significant Risks (Ref: par. .19)

.A90 When the auditor's further audit procedures in response to a significant risk consist only of substantive procedures, section 330[52] requires that those procedures include tests of details. Such tests of details may be designed and performed under each of the approaches described in paragraph .17 of this section based on the auditor's professional judgment in the circumstances. Examples of tests of details for significant risks related to accounting estimates include the following:

- Examination, for example, examining contracts to corroborate terms or assumptions
- Recalculation, for example, verifying the mathematical accuracy of a model
- Agreeing assumptions used to supporting documentation, such as third-party published information

[52]Paragraph .22 of section 330. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

Obtaining Audit Evidence From Events Occurring Up to the Date of the Auditor's Report (Ref: par. .20)

.A91 In some circumstances, obtaining audit evidence from events occurring up to the date of the auditor's report may provide sufficient appropriate audit evidence to address the risks of material misstatement. For example, sale of the complete inventory of a discontinued product shortly after the period-end may provide sufficient appropriate audit evidence relating to the estimate of its net realizable value at the period-end. In other cases, it may be necessary to use this testing approach in connection with another approach in paragraph .17.

.A92 For some accounting estimates, events occurring up to the date of the auditor's report are unlikely to provide sufficient appropriate audit evidence regarding the accounting estimate. For example, the conditions or events relating to some accounting estimates develop only over an extended period. Also, because of the measurement objective of fair value accounting estimates, information after the period-end may not reflect the events or conditions existing at the balance sheet date and, therefore, may not be relevant to the measurement of the fair value accounting estimate.

.A93 Even if the auditor decides not to undertake this testing approach in respect of specific accounting estimates, the auditor is required to comply with section 560, *Subsequent Events and Subsequently Discovered Facts*. Section 560 requires the auditor to perform audit procedures designed to obtain sufficient appropriate audit evidence that all subsequent events that require adjustment of or disclosure in the financial statements have been identified[53] and appropriately reflected in the financial statements in accordance with the applicable financial reporting framework.[54] Because the measurement of many accounting estimates, other than fair value accounting estimates, usually depends on the outcome of future conditions, transactions, or events, the auditor's work under section 560 is particularly relevant.

Testing How Management Made the Accounting Estimate (Ref: par. .21)

.A94 Testing how management made the accounting estimate may be an appropriate approach when, for example

- the auditor's review of similar accounting estimates made in the prior-period financial statements suggests that management's current period process is appropriate.
- the accounting estimate is based on a large population of items of a similar nature that individually are not significant.
- the applicable financial reporting framework specifies how management is expected to make the accounting estimate. For example, this may be the case for an expected credit loss provision.
- the accounting estimate is derived from the routine processing of data.

[53] Paragraph .09 of section 560. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

[54] Paragraph .11 of section 560. [Footnote renumbered by the issuance of SAS No. 145, October 2021.]

Testing how management made the accounting estimate may also be an appropriate approach when neither of the other testing approaches is practical to perform or may be an appropriate approach in combination with one of the other testing approaches.

Changes in Methods, Significant Assumptions, and the Data From Prior Periods (Ref: par. .22a, .23a, and .24a)

.A95 The auditor may need to have further discussions with management about the following circumstances and, in doing so, challenge management regarding the appropriateness of the assumptions used:

- When there is a change from prior periods in a method, or significant assumption
- When the data is not based on new circumstances or new information
- When significant assumptions are inconsistent with each other and with those used in other accounting estimates or with related assumptions used in other areas of the entity's business activities

Indicators of Management Bias (Ref: par. .22b, .23b, and .24b)

.A96 When the auditor identifies indicators of possible management bias, the auditor may need a further discussion with management and may need to reconsider whether sufficient appropriate audit evidence has been obtained, indicating that the method, assumptions, and data used were appropriate and supportable in the circumstances. An example of an indicator of management bias for a particular accounting estimate may be when management has developed an appropriate range for several different assumptions, and in each case, the assumption used was from the end of the range that resulted in the most favorable measurement outcome.

Methods

.A97 *The selection of the method (Ref: par. .22*a*).* Relevant considerations for the auditor regarding the appropriateness of the method selected in the context of the applicable financial reporting framework and, if applicable, the appropriateness of changes from the prior period may include the following:

- Whether management's rationale for the method selected is appropriate.
- Whether the method is appropriate in the circumstances given the nature of the accounting estimate, the requirements of the applicable financial reporting framework, other available valuation concepts or techniques, regulatory requirements, and the business, industry, and environment in which the entity operates.
- When management has determined that different methods result in a range of significantly different estimates, how management has investigated the reasons for these differences.
- Whether the change is based on new circumstances or new information. When this is not the case, the change may not be reasonable or in compliance with the applicable

financial reporting framework. Arbitrary changes result in inconsistent financial statements over time and may give rise to financial statement misstatements or may be an indicator of possible management bias. (See also paragraphs .A133–.A136).

These matters are important when the applicable financial reporting framework does not prescribe the method of measurement or allows multiple methods.

.A98 *Complex modeling (Ref: par. .22*d*).* A model, and the related method, is more likely to be complex when

- understanding and applying the method, including designing the model and selecting and using appropriate data and assumptions, requires specialized skills or knowledge;
- it is difficult to obtain data needed for use in the model because there are restrictions on the availability or observability of, or access to, data; or
- it is difficult to maintain the integrity (for example, accuracy, consistency, or completeness) of the data and assumptions in using the model due to multiple valuation attributes, multiple relationships between them, or multiple iterations of the calculation.

.A99 Matters that the auditor may consider when management uses a complex model include, for example, the following:

- Whether the model is validated prior to usage or when there has been a change to the model, with periodic reviews to ensure it is still suitable for its intended use. The entity's validation process may include evaluation of
  - — the model's theoretical soundness,
  - — the model's mathematical integrity,
  - — the accuracy and completeness of the model's data and assumptions, and
  - — the model's output as compared to actual transactions.
- Whether appropriate change control policies and procedures exist.
- Whether management uses appropriate skills and knowledge in using the model.

.A100 Management may make adjustments to the output of the model to meet the requirements of the applicable financial reporting framework. In some industries these adjustments are referred to as *overlays*. In the case of fair value accounting estimates, it may be relevant to consider whether adjustments to the output of the model, if any, reflect the assumptions market participants would use in similar circumstances.
