INDEPENDENT AUDITORS' REPORT

To the Board of Education Wilmot Union High School District Wilmot, Wisconsin

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of the Wilmot Union High School District, Wilmot, Wisconsin (the "District") as of and for the year ended June 30, 2017, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the District's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, each major fund, and the aggregate remaining fund information of the District as of June 30, 2017, and the respective changes in financial position thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Change in Accounting Principle

As discussed in Note C.2 the District adopted new accounting guidance, GASB Statement No. 74, *Financial Reporting for Postemployment Benefit Plans* and No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*. Our opinions are not modified with respect to this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the budgetary comparison information and the schedules relating to pensions and other postemployment benefits on pages 34 through 37 be presented to supplement the basic financial statements. Such information, although not part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Management has omitted the management's discussion and analysis that accounting principles generally accepted in the United States of America require to be presented to supplement the basic financial statements. Such missing information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. Our opinions on the basic financial statements are not affected by this missing information.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the District's basic financial statements. The financial information listed in the table of contents as supplementary information is presented for purposes of additional analysis and is not a required part of the basic financial statements. The schedule of expenditures of federal awards and the schedule of state financial assistance are presented for purposes of additional analysis as required by the Wisconsin Public School District Audit Manual issued by the Wisconsin Department of Public Instruction and are also not a required part of the basic financial statements.

The supplementary information and schedules of expenditures of federal awards and state financial assistance are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supplementary information, the schedule of expenditures of federal awards and the schedule of state financial assistance are fairly stated in all material respects in relation to the basic financial statements as a whole.

Report on Summarized Financial Information

We have previously audited the District's 2016 financial statements, and our report dated January 10, 2017, expressed unmodified opinions on those respective financial statements of the governmental activities, each major fund and the aggregate remaining fund information. In our opinion, the summarized comparative information presented herein as of and for the year ended June 30, 2016, is consistent, in all material respects, with the audited financial statements from which it has been derived.

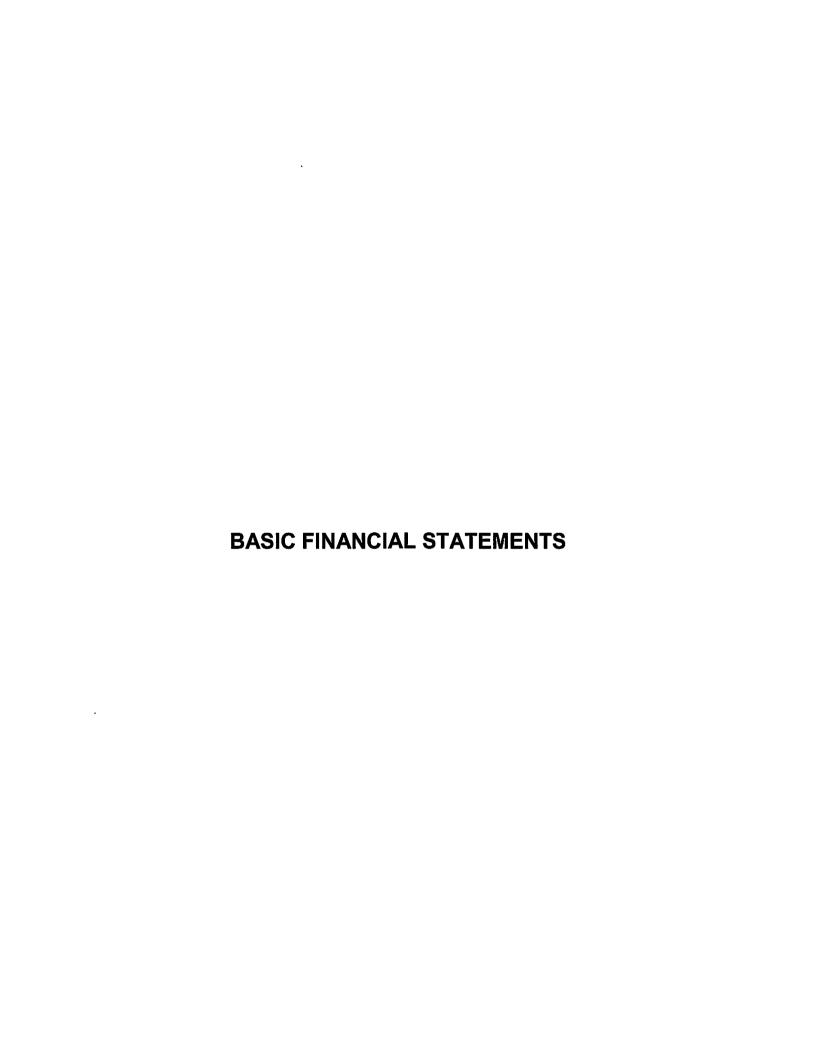

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated November 30, 2017, on our consideration of the District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the District's internal control over financial reporting and compliance.

Wilmot, Wisconsin
Notes to Basic Financial Statements
June 30, 2017

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The basic financial statements of the Wilmot Union High School District Wilmot, Wisconsin (the "District"), have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) as applied to government units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. The significant accounting principles and policies utilized by the District are described below:

1. Reporting Entity

The Wilmot Union High School District is organized as a union school district. The District, governed by a seven member elected school board, operates grades nine through twelve and is comprised of all or parts of seven taxing districts.

In accordance with GAAP, the basic financial statements are required to include the District (the primary government) and any separate component units that have a significant operational or financial relationship with the District. The District has not identified any component units that are required to be included in the basic financial statements in accordance with standards established by GASB Statement No. 61.

2. <u>District-Wide and Fund Financial Statements</u>

The district-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the nonfiduciary activities of the District. For the most part, the effect of interfund activity has been removed from these statements. *Governmental activities* are normally supported by taxes and intergovernmental revenues.

The statement of activities demonstrates the degree to which the direct expenses of a given function are offset by program revenues. *Direct expenses* are those that are clearly identifiable with a specific function or segment. *Program revenues* include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function. Taxes and other items not properly included among program revenues are reported instead as *general revenues*.

Separate financial statements are provided for governmental funds and fiduciary funds, even though the latter are excluded from the district-wide financial statements. Governmental funds include general, special revenue, debt service and capital projects funds. The District has no proprietary funds or internal service funds. Major individual governmental funds are reported as separate columns in the fund financial statements.

The District reports the following major governmental funds:

GENERAL FUND

This is the District's main operating fund. It accounts for all financial resources of the general government, except those accounted for in another fund.

DEBT SERVICE FUNDS

These funds accounts for the resources accumulated and payments made for principal, interest, and related costs on long-term general obligation debt of governmental funds. The Referendum Debt Service fund accounts for transactions for the repayment of debt that were authorized by an approved referendum. The Non-referendum Debt Service Fund accounts for transactions for the repayment of debt approved by school board resolution.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

CAPITAL EXPANSION FUND

This fund is used to account for financial resources to be used for the acquisition or construction of major capital project facilities (other than those financed by trust funds).

Additionally, the government reports the following fund types:

The *private-benefit trust fund* is used to account for resources legally held in trust for scholarship awards. Only earnings on the invested resources may be used to support the scholarships.

The District accounts for assets held as an agent for various student organizations in an agency fund.

3. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The district-wide financial statements are reported using the *economic resources measurement focus* and the *accrual basis of accounting*, as are the fiduciary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenues as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the *current financial resources measurement focus* and the *modified accrual basis of accounting*. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be *available* when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the District considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

Property taxes are recognized as revenue in the fiscal year for which taxes have been levied. Tuition, grants, fees and interest associated with the current fiscal period are all considered to be susceptible to accrual and have been recognized as revenue of the current fiscal period. All other revenue items are considered to be measurable and available only when the cash is received by the District.

As a general rule the effect of interfund activity has been eliminated from the district-wide financial statements.

Amounts reported as *program revenues* include 1) charges to customers or applicants for goods, services, or privileges provided, 2) operating grants and contributions, and 3) capital grants and contributions. Internally dedicated resources are reported as *general revenues* rather than as program revenues. Likewise, general revenues include all taxes.

When both restricted and unrestricted resources are available for use, it is the District's policy to use restricted resources first, then unrestricted resources, as they are needed.

4. Assets, Liabilities, Deferred Inflows/Outflows of Resources and Net Position or Fund Balance

a. Cash and Investments

Cash and investments are combined in the financial statements. Cash deposits consist of demand and time deposits with financial institutions and are carried at cost. Investments are stated at fair value. Fair value is the price that would be received to sell an asset in an orderly transaction between market participants in an orderly transaction between market participants at the measurement date.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

b. Accounts Receivable

Accounts receivable are recorded at gross amount with uncollectible amounts recognized under the direct write-off method. No allowance for uncollectible accounts has been provided since it is believed that the amount of such allowance would not be material to the basic financial statements.

c. Interfund Receivables and Payables

During the course of operations, numerous transactions occur between individual funds for goods provided or services rendered. These receivables and payables are classified as "due from other funds" and "due to other funds" in the fund financial statements.

d. Inventory

Governmental fund inventory items are recorded at the lower of cost or market based on the FIFO (first-in, first-out) method using the consumption method of accounting.

Inventory of governmental fund types in the fund financial statements are offset by nonspendable fund balance to indicate that they do not represent spendable available resources.

e. Prepaid Items

Payments made to vendors that will benefits periods beyond the end of the current fiscal year are recorded as prepaid items, and are accounted for on the consumption method.

Prepaid items of governmental funds in the fund financial statements are offset by nonspendable fund balance to indicate that they do not represent spendable available financial resources.

f. Capital Assets

Capital assets, which include property, plant, machinery and equipment, are reported in the district-wide financial statements. Capital assets are defined by the District as assets with an initial, individual cost of \$5,000 or higher and an estimated useful life in excess of one year. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at fair acquisition value at the date of donation.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend asset lives are not capitalized.

Capital assets of the District are depreciated using the straight-line method over the following estimated useful lives:

Governmental

| <u>Assets</u> | |
| Land improvements | 20 - 50 |

g. Deferred Outflows/Inflows of Resources

In addition to assets, the statement of net position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense) until then. The District has three items that qualify for reporting in this category. The first is the deferred charge on refunding reported in the district-wide statement of net position. A deferred charge on refunding results from the difference in the carrying value of refunded debt and its reacquisition price. This amount is deferred and amortized over the shorter of the life of the refunded or refunding debt. The second is related to the District's proportionate share of the Wisconsin Retirement System pension plan and is deferred and amortized over the expected remaining service lives of the pension plan participants. The third is related to the District's other post-employment benefit plan and is deferred and amortized over the expected remaining service lives of the plan participants.

In addition to liabilities, the statement of net position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to a future period and so will not be recognized as an inflow of resources (revenue) until that time. The District currently has one item that qualifies for reporting in this category. This item is related to the District's proportionate share of the Wisconsin Retirement System pension plan and is deferred and amortized over the expected remaining service lives of the pension plan participants.

h. Long-term Obligations

In the district-wide financial statements long-term debt and other long-term obligations are reported as liabilities in the statement of net position. Bond premiums and discounts are deferred and amortized over the life of the bonds. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are reported as expense during the current period.

In the fund financial statements, governmental funds recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

i. Other Postemployment Benefits Other Than Pensions (OPEB)

For purposes of measuring the total OPEB liability, deferred outflows of resources and deferred inflows of resources related to OPEB, and OPEB expense, information about the fiduciary net position of the Wilmot Union High School District's Other Postemployment Benefit Plan (the "Plan") and additions to/deductions from the Plan's fiduciary net position have been determined on the same basis as they are reported by the Plan. For this purpose, the Plan recognizes benefit payments when due and payable in accordance with the benefit terms.

j. Pensions

For purposes of measuring the net pension liability (asset), deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Wisconsin Retirement System (WRS) and additions to/deductions from WRS' fiduciary net position have been determined on the same basis as they are reported by WRS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

k. Fund Equity/Net Position

GOVERNMENTAL FUND FINANCIAL STATEMENTS

Fund balance of governmental funds is reported in various categories based on the nature of any limitations requiring the use of resources for specific purposes. The following classifications describe the relative strength of the spending constraints placed on the purposes for which resources can be used:

- Nonspendable fund balance Amounts that are not in spendable form (such as inventory, prepaid items, or long-term receivables) or are legally or contractually required to remain intact.
- Restricted fund balance Amounts that are constrained for specific purposes by external parties (such as grantor or bondholders), through constitutional provisions, or by enabling legislation.
- Committed fund balance Amounts that are constrained for specific purposes by action of the Board of Education. These constraints can only be removed or changed by the Board of Education using the same action that was used to create them.
- Assigned fund balance Amounts that are constrained for specific purposes by action of District management. The Board of Education has authorized the District Administrator and the Business Manager to assign fund balance. Residual amounts in any governmental fund, other than the General Fund, are also reported as assigned.
- Unassigned fund balance Amounts that are available for any purpose. Positive unassigned amounts are only reported in the General Fund.

The District has adopted a fund balance spend down policy regarding the order in which fund balance will be utilized. Where applicable, the policy requires restricted funds would be spent first, followed by committed funds, and then assigned funds. Unassigned funds would be spent last.

DISTRICT-WIDE STATEMENTS

Equity is classified as net position and displayed in three components:

- Net investment in capital assets Amount of capital assets, net of accumulated depreciation, and capital related deferred outflows of resources less outstanding balances of any bonds, mortgages, notes, or other borrowings that are attributable to the acquisition, construction, or improvement of those assets and any capital related deferred inflows of resources.
- Restricted net position Amount of net position that are subject to restrictions that are imposed by 1) external groups, such as creditors, grantors, contributors or laws or regulations of other governments or 2) law through constitutional provisions or enabling legislation.
- Unrestricted net position Net position that is neither classified as restricted nor as net investment in capital assets.

5. Use of Estimates

The preparation of all financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

6. Summarized Comparative Information

The basic financial statements include certain prior-year summarized comparative information in total but not at the level of detail required for a presentation in conformity with generally accepted accounting principles. Accordingly, such information should be read in conjunction with the government's financial statements for the year ended June 30, 2016, from which the summarized information was derived.

7. Reclassifications

Certain amounts in the prior year financial statements have been reclassified to conform with the presentation in the current year financial statements with no change in previously reported net position, changes in net position, fund balance or changes in fund balance.

NOTE B - DETAILED NOTES ON ALL FUNDS

1. Cash and Investments

The debt service fund accounts for its transactions through separate and distinct bank and investment accounts as required by State Statutes. In addition, the fiduciary funds use separate and distinct accounts. All other funds share in common bank and investment accounts.

Invested cash consists of deposits and investments that are restricted by Wisconsin Statutes to the following:

Time deposits; repurchase agreements; securities issued by federal, state and local governmental entities; statutorily authorized commercial paper and corporate securities; and the Wisconsin local government investment pool. Investments in the private-purpose trust fund may be invested in other types of investments as authorized under Wisconsin Statute 881.01, "Uniform Prudent Investor Act".

The carrying amount of the District's cash and investments, totaled \$4,790,732 on June 30, 2017 as summarized below:

Fair Value Measurements

The District categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets: Level 2 inputs are significant observable inputs: Level 3 inputs are significant unobservable inputs.

The District has the following fair value measurements as of June 30, 2017:

| | | Fair Value Measurements Using: | | | | | |
|--------------------------|---|--------------------------------|----|---------|----|---------|--|
| | L | evel 1 | L | _evel 2 | | Level 3 | |
| Investments | | | | | | | |
| U.S. Treasury securities | | - | \$ | 56,965 | \$ | | |

Deposits and investments of the District are subject to various risks. Presented below is a discussion of the specific risks and the District's policy related to the risk.

Custodial Credit Risk

Custodial credit risk for deposits is the risk that, in the event of the failure of a depository financial institution, a government will not be able to recover its deposits or will not be able to recover collateral securities that are in the possession of an outside party. The custodial credit risk for investments is the risk that, in the event of the failure of the counterparty (e.g., broker-dealer) to a transaction, a government will not be able to recover the value of its investment or collateral securities that are in the possession of another party. Wisconsin statutes require repurchase agreements to be fully collateralized by bonds or securities issued or guaranteed by the federal government or its instrumentalities. The District does not have an additional custodial credit risk policy.

Deposits with financial institutions within the State of Wisconsin are insured by the Federal Deposit Insurance Corporation (FDIC) in the amount of \$250,000 for the combined amount of time and savings deposits and \$250,000 for all interest-bearing and noninterest-bearing demand deposits per official custodian per insured depository institution. Deposits with financial institutions located outside the State of Wisconsin are insured by the FDIC in the amount of \$250,000 for all time accounts, savings accounts and interest-bearing demand deposit accounts per official custodian per depository institution. Also, the State of Wisconsin has a State Guarantee Fund which provides a maximum of \$400,000 per public depository above the amount provided by an agency of the U.S. Government. However, due to the relatively small size of the State Guarantee Fund in relation to the Fund's total coverage, total recovery of insured losses may not be available.

As of June 30, 2017, \$259,660 of the District's deposits with financial institutions were in excess of federal and state depository insurance limits. \$259,660 was collateralized with securities held by a third party financial institution.

On June 30, 2017, the District held repurchase agreement investments of \$94,016 of which the underlying securities are held by the investment's counterparty, not in the name of the District.

NOTE B - DETAILED NOTES ON ALL FUNDS (Continued)

Credit Risk

Generally, credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. This is measured by the assignment of a rating by a nationally recognized statistical rating organization. Wisconsin statutes limit investments in securities to the top two ratings assigned by nationally recognized statistical rating organizations. The District does not have an additional credit risk policy. Presented below is the actual rating as of year-end for each investment type.

| | | Exempt From | | | Not |
|---|------------------------|-----------------|----------------|----|----------------|
| Investment Type | Amount | Disclosure | AAA | Aa | Rated |
| Wisconsin Local Government Investment Pool U.S. Treasury securities | \$ 3,440,526 56,965 | \$ - 56,96 | \$ <u>-</u> | • | - \$ 3,440,526 |
| U.S. Heasury securities | \$ 3,497,491 | \$ <u>56,96</u> | - | \$ | - \$ 3,440,526 |

Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributed to the magnitude of the District's investment in a single issuer. The investment policy of the District contains no limitations on the amount that can be invested in any one issuer.

Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment, the greater the sensitivity of its fair value to changes in market interest rates. The District does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

Information about the sensitivity of the fair values of the District's investments to market interest rate fluctuations is provided by the following table that shows the distribution of the District's investments by maturity.

| | | Remaining Maturity (in Months) | | | | | | |
|----------------------------|--------------|--------------------------------|----------|----------|-----------|--|--|--|
| | | 12 Months | 13 to 24 | 25 to 60 | More Than | | | |

| | \$ 3,591,507 | \$ 3,534,542 | \$ - | \$ - | \$ 56,965 | | | |

Investments

The District has investments in the Wisconsin local government investment pool of \$3,440,526 at year-end. The Wisconsin local government investment pool (LGIP) is part of the State Investment Fund (SIF), and is managed by the State of Wisconsin Investment Board. The SIF is not registered with the Securities and Exchange Commission, but operates under the statutory authority of Wisconsin Chapter 25. The SIF reports the fair value of its underlying assets annually. Participants in the LGIP have the right to withdraw their funds in total on one day's notice. At June 30, 2017, the fair value of the District's share of the LGIP's assets was substantially equal to the carrying value.

2. Property Taxes

The aggregate District tax levy is apportioned and certified in November of the current fiscal year for collection to comprising municipalities based on the immediate past October 1 full or "equalized" taxable property values. As permitted by a collecting municipality's ordinance, taxes must be paid in full or in two or more installments with the first installment payable the subsequent January 31 and a final payment no later than the following July 31. On or before January 15, and by the 20th of each subsequent month thereafter, the District is paid by the collecting municipalities its proportionate share of tax collections received through the last day of the preceding month. On or before August 20, the county treasurer makes full settlement to the District for any remaining balance.

Property taxes are recognized as revenue in the fiscal year levied as they are considered due as of January 1, the date from which interest and penalties accrue for non-payment of a scheduled installment, and full receipt of the entire levy is assured within sixty days of fiscal year end, meeting the availability criteria necessary for property tax revenue recognition by accounting principles generally accepted in the United States of America.

3. Capital Assets

Capital asset activity for the year ended June 30, 2017 was as follows:

NOTE C - OTHER INFORMATION

1. Pension Plan

a. Plan Description

The WRS is a cost-sharing multiple-employer defined benefit pension plan. WRS benefits and other plan provisions are established by Chapter 40 of the Wisconsin Statutes. Benefit terms may only be modified by the legislature. The retirement system is administered by the Wisconsin Department of Employee Trust Funds (ETF). The system provides coverage to all eligible State of Wisconsin, local government and other public employees. All employees, initially employed by a participating WRS employer on or after July 1, 2011, and expected to work at least 1200 hours a year (880 hours for teachers and school district educational support employees) and expected to be employed for at least one year from employee's date of hire are eligible to participate in the WRS.

ETF issues a standalone Comprehensive Annual Financial Report (CAFR), which can be found at http://etf.wi.gov/publications/cafr.htm.

For employees beginning participation on or after January 1, 1990, and no longer actively employed on or after April 24, 1998, creditable service in each of five years is required for eligibility for a retirement annuity. Participants employed prior to 1990 and on or after April 24, 1998, and prior to July 1, 2011, are immediately vested. Participants who initially became WRS eligible on or after July 1, 2011, must have five years of creditable service to be vested.

Employees who retire at or after age 65 (54 for protective occupation employees, 62 for elected officials and State executive participants) are entitled to receive an unreduced retirement benefit. The factors influencing the benefit are: (1) final average earnings, (2) years of creditable service, and (3) a formula factor.

Final average earnings is the average of the participant's three highest years' earnings. Creditable service is the creditable current and prior service expressed in years or decimal equivalents of partial years for which a participant receives earnings and makes contributions as required. The formula factor is a standard percentage based on employment category.

Employees may retire at age 55 (50 for protective occupation employees) and receive reduced benefits. Employees terminating covered employment before becoming eligible for a retirement benefit may withdraw their contributions and forfeit all rights to any subsequent benefits.

The WRS also provides death and disability benefits for employees.

NOTE C - OTHER INFORMATION (Continued)

b. Post-Retirement Adjustments

The Employee Trust Funds Board may periodically adjust annuity payments from the retirement system based on annual investment performance in accordance with s. 40.27, Wis. Stat. An increase (or decrease) in annuity payments may result when investment gains (losses), together with other actuarial experience factors, create a surplus (shortfall) in the reserves, as determined by the system's consulting actuary. Annuity increases are not based on cost of living or other similar factors. For Core annuities, decreases may be applied only to previously granted increases. By law, Core annuities cannot be reduced to an amount below the original, guaranteed amount (the "floor") set at retirement. The Core and Variable annuity adjustments granted during recent years are as follows:

| Year | Core Fund Adjustment | Variable Fund Adjustment |
|------|----------------------|--------------------------|
| 2007 | 3.0% | 10% |
| 2008 | 6.6% | 0% |
| 2009 | (2.1)% | (42)% |
| 2010 | (1.3)% | 22% |
| 2011 | (1.2)% | 11% |
| 2012 | (7.0)% | (7)% |
| 2013 | (9.6)% | 9% |
| 2014 | 4.7% | 25% |
| 2015 | 2.9% | 2% |
| 2016 | 0.5% | (5)% |

c. Contributions

Required contributions are determined by an annual actuarial valuation in accordance with Chapter 40 of the Wisconsin Statutes. The employee required contribution is one-half of the actuarially determined contribution rate for general category employees, including teachers, and Executives and Elected Officials. Starting on January 1, 2016, the Executives and Elected Officials category was merged into the General Employee Category. Required contributions for protective employees are the same rate as general employees. Employers are required to contribute the remainder of the actuarially determined contribution rate. The employer may not pay the employee required contribution unless provided for by an existing collective bargaining agreement.

During the reporting period, the WRS recognized \$551,742 in contributions from the District.

Contribution rates as of June 30, 2017 are:

| Employee Category | Employee | Employer |
|------------------------------------|----------|----------|
| General (including teachers) | 6.6% | 6.6% |
| Protective with Social Security | 6.6% | 9.4% |
| Protective without Social Security | 6.6% | 13.2% |

d. Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

At June 30, 2017, the District reported a liability of \$450,495 for its proportionate share of the net pension liability. The net pension liability was measured as of December 31, 2016, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of December 31, 2015 rolled forward to December 31, 2016. No material changes in assumptions or benefit terms occurred between the actuarial valuation date and the measurement date. The District's proportion of the net pension liability was based on the District's share of contributions to the pension plan relative to the contributions of all participating employers. At December 31, 2016, the District's proportion was .05465590%, which was an increase of .00150941% from its proportion measured as of December 31, 2015.

For the year ended June 30, 2017 the District recognized pension expense of \$1,165,766.

At June 30, 2017, the District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

| | Defe | rred Outflows | De | ferred Inflows |
|--|------|---------------|----|----------------|

\$336,547 reported as deferred outflows related to pension resulting from the District's contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended June 30, 2018. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pension will be recognized in pension expense as follows:

NOTE C - OTHER INFORMATION (Continued)

e. Actuarial Assumption

The total pension liability in the December 31, 2016, actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Actuarial Valuation Date: December 31, 2015
Measurement Date of Net Pension Liability (Asset): December 31, 2016

Actuarial Cost Method: Entry Age

Asset Valuation Method: Fair Market Value

Long-Term Expected Rate of Return: 7.2% Discount Rate: 7.2%

Salary Increases:

Inflation 3.2% Seniority/Merit 0.2% - 5.6%

Mortality: Wisconsin 2012 Mortality Table

Post-retirement Adjustments* 2.1%

* No post-retirement adjustment is guaranteed. Actual adjustments are based on recognized investment return, actuarial experience and other factors. 2.1% is the assumed annual adjustment based on the investment return assumption and the post-retirement discount rate.

Actuarial assumptions are based upon an experience study conducted in 2015 using experience from 2012 - 2014. The total pension liability for December 31, 2016 is based upon a roll-forward of the liability calculated from the December 31, 2015 actuarial valuation.

Long-term Expected Return on Plan Assets. The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

| | | Destination | Long-Term | Long-Term |
|----------------------------|---------------|--------------|------------------|------------------|
| | Current Asset | Target Asset | Expected Nominal | Expected Real |

NOTE C - OTHER INFORMATION (Continued)

Single Discount Rate. A single discount rate of 7.20% was used to measure the total pension liability. This single discount rate was based on the expected rate of return on pension plan investments of 7.20% and a long term bond rate of 3.78%. Because of the unique structure of WRS, the 7.20% expected rate of return implies that a dividend of approximately 2.1% will always be paid. For purposes of the single discount rate, it was assumed that the dividend would always be paid. The projection of cash flows used to determine this single discount rate assumed that plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments (including expected dividends) of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the District's proportionate share of the net pension liability (asset) to changes in the discount rate. The following presents the District's proportionate share of the net pension liability (asset) calculated using the discount rate of 7.20 percent, as well as what the District's proportionate share of the net pension liability (asset) would be if it were calculated using a discount rate that is 1-percentage-point lower (6.20 percent) or 1-percentage-point higher (8.20 percent) than the current rate:

f. Payable to the WRS

At June 30, 2017 the District reported a payable of \$-0- for the outstanding amount of contributions to the pension plan for the year ended June 30, 2017.

2. Other Postemployment Benefits Other Than Pension Benefits (OPEB)

The District has adopted GASB Statements No. 74, Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans and No. 75, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions for the year ended June 30, 2017. These statements revised and established new financial reporting requirements for governments that provide their employees with postemployment benefits. Financial statements for the year ended June 30, 2016 have not been restated.

Wilmot, Wisconsin Notes to Basic Financial Statements June 30, 2017

NOTE C - OTHER INFORMATION (Continued)

The cumulative effect of this change was to decrease the June 30, 2016 net position by \$1,227,099 as follows:

Other postemployment asset, as previously reported 115,283

Other postemployment liability

(1,259,150) Actuarially determined balance

\$ (1,374,433) Change in other postemployment asset (liability)

Deferred outflows of resources

Employer contributions subsequent to the measurement date 147,334

(1.227.099)

a. Plan Description

The Plan is a single-employer defined benefit postemployment health plan that covers retired employees of the District. Eligible retired employees have access to group medical coverage through the District's group plan. All employees of the District are eligible for the Plan if they are at least age 55 at retirement.

No assets are accumulated in a trust that meets the criteria in paragraph 4 of Statement 75.

b. Benefits Provided

Teachers retired prior to July 1, 2012

Continued medical coverage subsidized by the District based on rate in effect the year following the year of retirement. Retiree may elect to remain on District's group medical plan upon exhaustion of District provided medical benefit provided they self-pay the full amount (100%) of the premiums.

Administrators retired prior to July 1, 2015

Continued medical coverage subsidized by the District based on rate in effect the year following the year of retirement for a period of 3 years or until death of retiree. Retiree may elect to remain on District's group medical plan upon exhaustion of District provided medical benefit provided they self-pay the full amount (100%) of the premiums.

Administrators retiring on or after July 1, 2015, Teachers retiring on or after July 1, 2012 and Support Staff

Retiree may elect to remain on the District's group medical plan provided they self-pay the full amount (100%) of the premiums.

c. Employees covered by benefit terms

At June 30, 2016, the following employees were covered by the benefit terms:

d. Total OPEB Liability

The District's total OPEB liability was measured as of June 30, 2016, and was determined by an actuarial valuation as of that date.

Actuarial Assumptions. The total OPEB liability in the June 30, 2016 actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement, unless otherwise specified:

Inflation: 3.0 percent

Salary increases: Ranges from 0.2 percent to 5.8

percent

Discount rate: 3.00 percent

Healthcare cost trend rates: 1.00 percent in the first year, followed

by 7.00 percent and 6.50 percent in years 2 and 3, then decreasing by .10 percent per year down to 5.0 percent

and level thereafter

Mortality rates are the same as those used in the December 31, 2014 Wisconsin Retirement System's annual report.

The actuarial assumptions used in the June 30, 2016 valuation were based on the results of an actuarial experience study for the period July 1, 2015 - June 30 2016.

Discount rate. The discount rate used to measure the total OPEB liability was 3.00% percent which approximates the municipal bond rate.

f. OPEB Expense and Deferred Outflows of Resources Related to OPEB

For the year ended June 30, 2017, the District recognized OPEB expense of \$107,884. At June 30, 2017, the District reported deferred outflows of resources of \$103,457 related to OPEB resulting from amounts paid by the District as benefits subsequent to the measurement date that will be recognized as a reduction of the total OPEB liability in subsequent years.

3. Risk Management

The District is exposed to various risks of loss related to torts; theft of, damage to and destruction of assets; errors and omissions; and natural disasters for which the government carries commercial insurance. The District completes an annual review of its insurance coverage to ensure adequate coverage.

4. Contingencies

- a. The District participates in a number of federal and state assisted grant programs. These programs are subject to program compliance audits by the grantors or their representatives. Accordingly, the District's compliance with applicable grant requirements will be established at some future date. The amount, if any, of expenditures which may be disallowed by the granting agencies cannot be determined at this time although the District expects such amounts, if any, to be immaterial.
- b. From time to time, the District is party to other various pending claims and legal proceedings. Although the outcome of such matters cannot be forecast with certainty, it is the opinion of management that the likelihood is remote that any such claims or proceedings will have a material adverse effect on the District's financial position or results of operations.

5. <u>Limitation on School District Revenues</u>

Wisconsin Statutes limit the amount of revenues a school district may derive from general school aids and property taxes unless a higher amount is approved by a referendum.

This limitation does not apply to revenue needed for payment of any general obligation debt service (including refinanced debt) authorized by either of the following:

- a. A resolution of the school board or by referendum prior to August 12, 1993.
- b. A referendum on or after August 12, 1993.

6. Upcoming Accounting Pronouncements

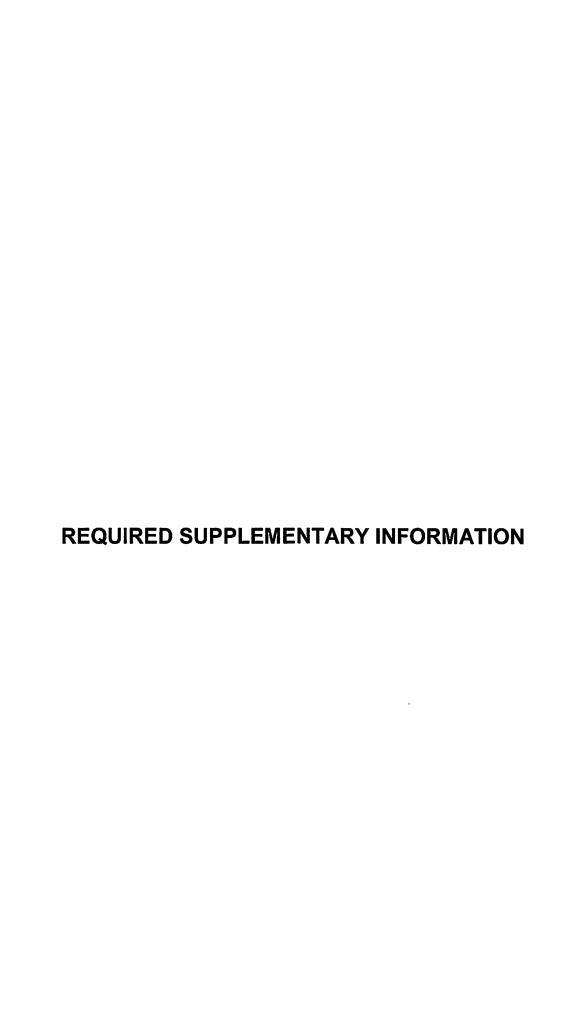

In January, 2017, the GASB issued GASB Statement No. 84, *Fiduciary Activities*. The Statement establishes criteria for identifying fiduciary activities and addresses financial reporting for these activities. This statement is effective for reporting periods beginning after June 15, 2018. The District is currently evaluating the impact this standard will have on the financial statements when adopted.

In June 2017, the GASB issued GASB Statement No. 87, Leases. The Statement establishes a single model for lease accounting based on the principle that leases are financings of the right to use an underlying asset. This statement is effective for reporting periods beginning after December 15, 2019. The District is currently evaluating the impact this standard will have on the financial statements when adopted.

7. Subsequent Event

On September 14, 2017, the District issued \$3,560,000 General Obligation Refunding Bonds, Series 2017A to refund the March 1, 2025 maturity of the District's General Obligation Refunding Bonds, dated June 4, 2014 (Series 2014 Bonds). The Series 2017A Bonds bear interest at an annual rate of 2.50% and mature on March 1, 2025.

The crossover refinancing was undertaken to achieve debt service savings. Bond proceeds of \$3,684,934 were deposited with the Escrow Agent to pay interest on the Series 2017A Bonds through March 1, 2019 and redeem the Series 2014 Bonds on the anticipated call date of March 1, 2019 at a price of par plus accrued interest. The District will be responsible for all interest payments of the Series 2017A Bonds after March 1, 2019.

Notes to Required Supplementary Information
For the Year Ended June 30, 2017

NOTE A – OTHER POST-EMPLOYMENT BENEFITS

The District implemented GASB Statement No. 74, Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans and Statement No. 75, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions for the fiscal year ended June 30, 2017. No assets are accumulated in a trust that meets the criteria in paragraph 4 of GASB Statement No. Statement 75. 'There were no changes in benefit terms or assumptions during the measurement period.

The valuation and measurement dates are June 30, 2016; therefore, the amounts reported were based on the OPEB transactions which occurred during the prior fiscal year. The District is required to present the last ten fiscal years of data; however accounting standards allow the presentation of as many years as are available until ten fiscal years are presented.

NOTE B - WISCONSIN RETIREMENT SYSTEM

There were no changes of benefit terms or assumptions for any participating employer in WRS.

The amounts reported for each fiscal year were determined as of the calendar year-end that occurred within the fiscal year. The District is required to present the last ten fiscal years of data; however accounting standards allow the presentation of as many years as are available until ten fiscal years are presented.

NOTE C - BUDGET AND BUDGETARY ACCOUNTING

Operating budgets are adopted each fiscal year for all governmental funds in accordance with Section 65.90 of the Wisconsin Statutes using the budgetary accounting procedures prescribed by the Wisconsin Department of Public Instruction (DPI). The DPI requires the District to separate special education revenues and expenditures from other general fund amounts. Budgetary expenditure control is exercised at the two digit function level for the general fund and the special education fund. All other fund budgets are adopted at the fund level. Reported budget amounts are as originally adopted or as amended by Board of Education resolution.

The District follows these procedures in establishing the budgetary data reflected in the basic financial statements:

- Based upon requests from District staff, District administration recommends budget proposals to the Board of Education.
- The Board of Education prepares a proposed budget including proposed expenditures and the means of financing them for the July 1 through June 30 fiscal year.
- A public notice is published containing a summary of the budget and identifying the time and place where a public hearing will be held on the proposed budget.
- Pursuant to the public budget hearing, the Board of Education may make alterations to the proposed budget.
- Once the Board of Education (following the public hearing) adopts the budget, no changes may be made
 in the amount of tax to be levied or in the amount of the various appropriations and the purposes of such
 appropriations unless authorized by a 2/3 vote of the entire Board of Education.
- Appropriations lapse at year end unless authorized as a carryover by the Board of Education. The
 portion of fund balance representing carryover appropriations is reported as committed or assigned fund
 balance in the fund financial statements.
- Encumbrance accounting is formally used by the District.

ADDITIONAL INDEPENDENT AUDITORS' REPORT FOR BASIC FINANCIAL STATEMENTS

INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

To the Board of Education Wilmot Union High School District Wilmot, Wisconsin

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of the Wilmot Union High School District of Wisconsin, as of and for the year ended June 30, 2017, and the related notes to the financial statements, which collectively comprise the Wilmot Union High School District's basic financial statements, and have issued our report thereon which included an emphasis of matter paragraph as indicated on page 2 dated November 30, 2017.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Wilmot Union High School District's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Wilmot Union High School District's internal control. Accordingly, we do not express an opinion on the effectiveness of the Wilmot Union High School District's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the District's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. We did identify a deficiency in internal control, described in the accompanying summary of audit results as item 2017-001 that we consider to be a significant deficiency.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Wilmot Union High School District's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Wilmot Union High School District's Response to Finding

Wilmot Union High School District's response to the finding identified in our audit is described in the accompanying schedule of prior year audit findings and corrective action plan. Wilmot Union High School District's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of Wilmot Union High School District's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Wilmot Union High School District's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

INDEPENDENT AUDITORS' REPORT ON COMPLIANCE FOR EACH STATE PROGRAM WITH REQUIRED PROCEDURES AND ON INTERNAL CONTROL OVER COMPLIANCE REQUIRED BY WISCONSIN DEPARTMENT OF PUBLIC INSTRUCTION

To the Board of Education Wilmot Union High School Wilmot, Wisconsin

Report on Compliance for Each State Program with Required Procedures

We have audited the Wilmot Union High School District, Wilmot, Wisconsin (the "District)'s compliance with the types of compliance requirements described in the *Wisconsin Public School District Audit Manual*, issued by the Wisconsin Department of Public Instruction, that could have a direct and material effect on each of the District's state programs with required procedures for the year ended June 30, 2017. The District's state programs that have required procedures are identified in the accompanying summary of audit results.

Management's Responsibility

Management is responsible for compliance with state statutes, regulations, and the terms and conditions of its state awards applicable to its state programs.

Auditors' Responsibility

Our responsibility is to express an opinion on compliance for each of the District's state programs with required procedures based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the compliance requirements of the Wisconsin Department of Public Instruction in the *Wisconsin Public School District Audit Manual*. Those standards and compliance requirements require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on the state programs with required procedures occurred. An audit includes examining, on a test basis, evidence about the District's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for each state program with required procedures. However, our audit does not provide a legal determination on the District's compliance.

Opinion on Each State Program

In our opinion, the District complied, in all material respects, with the types of requirements referred to above that could have a direct and material effect on each of its state programs with required procedures for the year ended June 30, 2017.

Report on Internal Control Over Compliance

Management of the District is responsible for establishing and maintaining effective internal control over compliance with the types of requirements referred to above. In planning and performing our audit of compliance, we considered the District's internal control over compliance with the types of requirements that could have a direct and material effect on each state program with required procedures to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing our opinion on compliance for each state program with required procedures and to test and report on internal control over compliance in accordance with the Wisconsin Public School District Audit Manual, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the District's internal control over compliance.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a state program on a timely basis. A material weakness in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a state program will not be prevented, or detected and corrected, on a timely basis. A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a state program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be deficiencies, significant deficiencies, or material weaknesses. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Purpose of this Report

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of testing based on requirements of the *Wisconsin Public School District Manual*. Accordingly, this report is not suitable for any other purpose.

Section II - Financial Statement Findings

| Finding No. | Internal Control Deficiencies |
|-----------------|---|
| 2017-001 | Preparation of Annual Financial Report |
| | Repeat of Finding 2015-001 |
| Condition: | Current District staff maintains accounting records which reflect the District's financial transactions; however, preparing the District's annual financial report, including note disclosures, involves the selection and application of specific accounting principles which would require additional experience and knowledge. The District contracts with us and our knowledge of applicable accounting principles, financial statement formats, and note disclosures to assist in the preparation of the annual financial report in an efficient manner. |
| Criteria: | The preparation and review of the annual financial report by staff with expertise in financial reporting is an internal control intended to prevent, detect and correct a potential omission or misstatement in the financial statements or notes. |
| Cause: | District management has determined that the additional costs associated with training staff to become experienced in applicable accounting principles and note disclosures outweigh the derived benefits. |
| Effect: | Without our involvement, the District may not be able to completely prepare an annual financial report in accordance with accounting principles generally accepted in the United States of America. |
| Recommendation: | We recommend the District continue reviewing the annual financial report. While it may not be cost beneficial to train additional staff to completely prepare the report, a thorough review of this information by appropriate staff of the District is necessary to obtain a complete and adequate understanding of the District's annual financial report. |

Schedule of Prior Year Audit Findings and Corrective Action Plan
For the Year Ended June 30, 2017

Status of Prior Year Audit Findings

The findings noted in the 2016 Summary of Audit Results have been reported to the proper state agencies. The current status of the prior year audit findings, as provided by management, follows:

| Finding No. | Prior Year Audit Finding |
|-------------|--------------------------|

2015-001 Preparation of Annual Financial Report

Management continues to rely upon the audit firm to prepare its financial statements. The finding is repeated 2017-001.

Corrective Action Plan

2017-001 Preparation of Annual Financial Report

Management believes the cost of additional staff time and training to prepare year-end closing entries and reports outweigh the benefits to be received. Management will continue to review the audit report. The Business Manager has reviewed and approved the annual financial report prior to issuance.
